

1
00:00:23,460 --> 00:00:21,990
[Music]

2
00:00:48,549 --> 00:00:23,470
do

3
00:00:50,470 --> 00:00:48,559
[Music]

4
00:01:23,510 --> 00:00:50,480
do

5
00:01:25,350 --> 00:01:23,520
[Music]

6
00:01:28,630 --> 00:01:25,360
what's up everybody

7
00:01:30,230 --> 00:01:28,640
welcome to witness citizen i'm your host

8
00:01:33,270 --> 00:01:30,240
sean rash

9
00:01:36,069 --> 00:01:33,280
and with me today is our very special

10
00:01:37,190 --> 00:01:36,079
co-host mr j christopher king how are

11
00:01:39,190 --> 00:01:37,200
you sir

12
00:01:40,630 --> 00:01:39,200
i'm doing great how are you doing today

13
00:01:43,429 --> 00:01:40,640

it's wonderful to see you

14

00:01:44,389 --> 00:01:43,439

wonderful thank you virtually see you as

15

00:01:46,710 --> 00:01:44,399

well

16

00:01:49,749 --> 00:01:46,720

oh man it's always great to virtually

17

00:01:50,789 --> 00:01:49,759

see you it's great to really see you

18

00:01:54,310 --> 00:01:50,799

it's

19

00:01:56,709 --> 00:01:54,320

i'll even take you pawing at me like uh

20

00:01:57,990 --> 00:01:56,719

anyway i can get you i'll take it for

21

00:02:00,069 --> 00:01:58,000

sure

22

00:02:02,550 --> 00:02:00,079

yeah that's really sweet of you

23

00:02:03,830 --> 00:02:02,560

yeah we uh gosh we had the we had last

24

00:02:05,590 --> 00:02:03,840

week off

25

00:02:07,670 --> 00:02:05,600

and what to say

26

00:02:09,589 --> 00:02:07,680

it was a little summer break which was

27

00:02:11,110 --> 00:02:09,599

great are you crying you crying already

28

00:02:14,150 --> 00:02:11,120

yeah that was really that was really

29

00:02:18,710 --> 00:02:17,750

i missed you i'm just not used to that

30

00:02:21,750 --> 00:02:18,720

right

31

00:02:24,070 --> 00:02:21,760

i was scared you wouldn't come back but

32

00:02:25,589 --> 00:02:24,080

then you came back no it's great

33

00:02:27,990 --> 00:02:25,599

yeah i'm glad to have you we're going to

34

00:02:31,110 --> 00:02:28,000

have a great show uh we're looking at

35

00:02:32,390 --> 00:02:31,120

some pretty cool pictures from uh the

36

00:02:35,350 --> 00:02:32,400

universe

37

00:02:38,470 --> 00:02:35,360

and we're we're going to talk about um

38

00:02:40,630 --> 00:02:38,480

the recent ndaa

39

00:02:42,550 --> 00:02:40,640

language uh for the uap stuff in

40

00:02:43,589 --> 00:02:42,560

immunity uh language and see what that

41

00:02:46,229 --> 00:02:43,599

looks like and we're gonna bring out

42

00:02:47,830 --> 00:02:46,239

some experts for that with katie holland

43

00:02:52,390 --> 00:02:47,840

and christopher sharp they're gonna come

44

00:02:53,190 --> 00:02:52,400

in at uh in about a half hour so and and

45

00:02:54,630 --> 00:02:53,200

um

46

00:02:57,110 --> 00:02:54,640

you know take us to school on that

47

00:02:58,470 --> 00:02:57,120

language and and we'll get into that

48

00:03:02,390 --> 00:02:58,480

and before that we'll

49

00:03:05,110 --> 00:03:02,400

you know talk shop about uh the universe

50

00:03:07,910 --> 00:03:05,120

yeah absolutely i mean this has been a

51
00:03:09,830 --> 00:03:07,920
really wild week and um it's it's

52
00:03:11,270 --> 00:03:09,840
interesting because you know within the

53
00:03:12,470 --> 00:03:11,280
field of

54
00:03:16,790 --> 00:03:12,480
kind of

55
00:03:19,430 --> 00:03:16,800
uh anomalous studies exopolitics uh uap

56
00:03:21,030 --> 00:03:19,440
issues ufos all this stuff we really

57
00:03:22,790 --> 00:03:21,040
kind of have to run the gamut right

58
00:03:23,990 --> 00:03:22,800
because you're dealing with everything

59
00:03:28,550 --> 00:03:24,000
from like

60
00:03:29,350 --> 00:03:28,560
you know metallurgy uh to astrophysics

61
00:03:43,190 --> 00:03:29,360
to

62
00:03:45,430 --> 00:03:43,200
it's it's a it's a great field if you

63
00:03:48,630 --> 00:03:45,440

really like being a generalist

64

00:03:50,789 --> 00:03:48,640

right yeah um a renaissance man or a

65

00:03:53,750 --> 00:03:50,799

renaissance man like yourself

66

00:03:59,750 --> 00:03:57,030

and uh and today we're going to kind of

67

00:04:02,470 --> 00:03:59,760

go through from kind of galactic

68

00:04:03,190 --> 00:04:02,480

intrigue uh to

69

00:04:06,229 --> 00:04:03,200

to

70

00:04:09,110 --> 00:04:06,239

the world of uh dc and political

71

00:04:11,830 --> 00:04:09,120

intrigue and we're gonna start i guess

72

00:04:13,589 --> 00:04:11,840

with some uh some galactic intrigue if

73

00:04:15,589 --> 00:04:13,599

you'd like does that sound good to you

74

00:04:17,670 --> 00:04:15,599

yeah yeah

75

00:04:18,789 --> 00:04:17,680

i mean look at that stuff you know

76

00:04:23,030 --> 00:04:18,799

so

77

00:04:24,870 --> 00:04:23,040

you know this we're looking at to just

78

00:04:26,950 --> 00:04:24,880

frame things up here we're we're really

79

00:04:28,629 --> 00:04:26,960

looking at um

80

00:04:29,990 --> 00:04:28,639

this week for those of you that uh

81

00:04:32,870 --> 00:04:30,000

didn't look at the front page of the new

82

00:04:34,710 --> 00:04:32,880

york times today or whatever paper is of

83

00:04:36,790 --> 00:04:34,720

your choice or

84

00:04:39,909 --> 00:04:36,800

media sources the milwaukee journal

85

00:04:40,790 --> 00:04:39,919

sentinel that's right that's right

86

00:04:42,870 --> 00:04:40,800

yes

87

00:04:43,990 --> 00:04:42,880

now that's that's sean's paper for those

88

00:04:46,310 --> 00:04:44,000

that don't know

89

00:04:48,550 --> 00:04:46,320

i have choice but

90

00:04:51,110 --> 00:04:48,560

so the james webb telescope this has

91

00:04:53,350 --> 00:04:51,120

been a huge project this is the largest

92

00:04:54,469 --> 00:04:53,360

and most powerful observatory ever put

93

00:04:56,070 --> 00:04:54,479

into space

94

00:04:57,590 --> 00:04:56,080

thousands of people worked on this for

95

00:04:59,749 --> 00:04:57,600

over two decades

96

00:05:01,830 --> 00:04:59,759

at one point the number 20 000 was

97

00:05:04,230 --> 00:05:01,840

thrown out by the senior scientist that

98

00:05:07,350 --> 00:05:04,240

in the 20 plus years of this project so

99

00:05:08,790 --> 00:05:07,360

far 20 000 people have worked on it

100

00:05:10,870 --> 00:05:08,800

it was primarily developed at the

101
00:05:11,990 --> 00:05:10,880
goddard space flight center in greenbelt

102
00:05:14,870 --> 00:05:12,000
maryland

103
00:05:16,710 --> 00:05:14,880
and so far this week we've had two major

104
00:05:19,189 --> 00:05:16,720
events um

105
00:05:20,550 --> 00:05:19,199
that regarding the james webb telescope

106
00:05:23,430 --> 00:05:20,560
and it sounds like there's going to be

107
00:05:24,710 --> 00:05:23,440
at least one more major release later

108
00:05:26,710 --> 00:05:24,720
this week

109
00:05:29,830 --> 00:05:26,720
um right now i think

110
00:05:31,430 --> 00:05:29,840
sorry to interrupt from what i hear

111
00:05:33,749 --> 00:05:31,440
they're gonna be

112
00:05:36,629 --> 00:05:33,759
pushing out pictures almost once a week

113
00:05:38,790 --> 00:05:36,639

basically um maybe not like as hyped as

114

00:05:41,749 --> 00:05:38,800

this one or whatever but i mean this was

115

00:05:44,150 --> 00:05:41,759

the first release so but um and they

116

00:05:46,469 --> 00:05:44,160

kept stressing the fact and in all their

117

00:05:48,629 --> 00:05:46,479

uh speeches and all their you know

118

00:05:49,830 --> 00:05:48,639

introductory uh conversations and

119

00:05:52,469 --> 00:05:49,840

everything that this is just the

120

00:05:55,029 --> 00:05:52,479

beginning as well so it's important to

121

00:05:56,710 --> 00:05:55,039

keep in mind because people see this and

122

00:05:58,390 --> 00:05:56,720

you know they're like oh okay and then

123

00:06:00,790 --> 00:05:58,400

they move on with their life but this is

124

00:06:02,710 --> 00:06:00,800

just the beginning of the work that'll

125

00:06:04,950 --> 00:06:02,720

be done with the james telescope so i

126

00:06:06,790 --> 00:06:04,960

i'm looking forward to

127

00:06:09,110 --> 00:06:06,800

not only continuing to look at these

128

00:06:11,430 --> 00:06:09,120

pictures but to see what's next

129

00:06:12,550 --> 00:06:11,440

absolutely absolutely completely agreed

130

00:06:14,550 --> 00:06:12,560

so this picture that you're showing

131

00:06:17,270 --> 00:06:14,560

right now is it was the first picture

132

00:06:21,110 --> 00:06:17,280

that they revealed uh the deep field

133

00:06:24,230 --> 00:06:21,120

picture um which is just an amazingly

134

00:06:26,230 --> 00:06:24,240

great um desktop photo for the old

135

00:06:27,670 --> 00:06:26,240

computer right and so this one was the

136

00:06:28,629 --> 00:06:27,680

first one released was released on

137

00:06:30,150 --> 00:06:28,639

monday

138

00:06:30,950 --> 00:06:30,160

and um

139

00:06:32,710 --> 00:06:30,960

it

140

00:06:34,870 --> 00:06:32,720

there was an event on monday where we

141

00:06:36,870 --> 00:06:34,880

had nasa administrator bill nielsen who

142

00:06:39,110 --> 00:06:36,880

you're a big fan of and i am as well

143

00:06:41,350 --> 00:06:39,120

he's a real folksy guy that seems like

144

00:06:43,990 --> 00:06:41,360

he he's he's

145

00:06:46,550 --> 00:06:44,000

he's honest about transparency efforts

146

00:06:49,029 --> 00:06:46,560

as more than more so than we've often

147

00:06:51,110 --> 00:06:49,039

got in the past from nasa administrators

148

00:06:52,710 --> 00:06:51,120

uh also president joe biden and vice

149

00:06:54,469 --> 00:06:52,720

president kamala harris were there and

150

00:06:56,309 --> 00:06:54,479

they were releasing this very first

151
00:06:58,469 --> 00:06:56,319
photo to the public from the james webb

152
00:07:00,230 --> 00:06:58,479
telescope did you did you happen to

153
00:07:03,189 --> 00:07:00,240
catch that event sean what'd you think

154
00:07:05,029 --> 00:07:03,199
of it when you saw it it was uh it was

155
00:07:07,909 --> 00:07:05,039
incredibly

156
00:07:10,230 --> 00:07:07,919
uh kind of bizarre to me only because

157
00:07:13,350 --> 00:07:10,240
first of all they were so late

158
00:07:17,189 --> 00:07:13,360
i think maybe they're over an hour late

159
00:07:19,029 --> 00:07:17,199
and then they got to it and uh you know

160
00:07:21,350 --> 00:07:19,039
the speeches or whatever were fine but

161
00:07:22,230 --> 00:07:21,360
it was just so short it was here and

162
00:07:24,309 --> 00:07:22,240
gone

163
00:07:26,790 --> 00:07:24,319

like in an instant

164

00:07:28,950 --> 00:07:26,800

my favorite thing was what uh

165

00:07:30,469 --> 00:07:28,960

president biden said at the end when he

166

00:07:32,870 --> 00:07:30,479

inquired about what the press would be

167

00:07:35,830 --> 00:07:32,880

like in the other planets

168

00:07:37,430 --> 00:07:35,840

i thought that was uh very

169

00:07:39,350 --> 00:07:37,440

very interesting and then you could

170

00:07:41,510 --> 00:07:39,360

almost tell that like

171

00:07:43,350 --> 00:07:41,520

uh the other people like bill nelson and

172

00:07:48,869 --> 00:07:43,360

the other people there like didn't say

173

00:07:53,909 --> 00:07:51,830

not ready you don't know how far people

174

00:07:55,350 --> 00:07:53,919

when you followed you will take this

175

00:07:58,710 --> 00:07:55,360

don't do it

176

00:08:01,589 --> 00:07:58,720

absolutely absolutely but no but but it

177

00:08:03,589 --> 00:08:01,599

was great um although just really fast

178

00:08:06,390 --> 00:08:03,599

and and late you know so it reminds me

179

00:08:07,990 --> 00:08:06,400

of like you're invited to a dinner party

180

00:08:09,830 --> 00:08:08,000

and you show up

181

00:08:12,629 --> 00:08:09,840

you know an hour late

182

00:08:14,790 --> 00:08:12,639

right you show up just when they're

183

00:08:16,469 --> 00:08:14,800

serving the food you sit down you eat

184

00:08:17,830 --> 00:08:16,479

you finish maybe you're fast eater

185

00:08:19,540 --> 00:08:17,840

you're done in five ten minutes then

186

00:08:21,830 --> 00:08:19,550

you're like well i gotta go

187

00:08:22,629 --> 00:08:21,840

[Laughter]

188

00:08:28,469 --> 00:08:22,639

yeah

189

00:08:30,550 --> 00:08:28,479

we've been and we probably as viewers um

190

00:08:32,790 --> 00:08:30,560

and as enthusiasts in the field probably

191

00:08:35,509 --> 00:08:32,800

a lot of us i was looking at the

192

00:08:37,269 --> 00:08:35,519

anticipation on twitter and other places

193

00:08:38,630 --> 00:08:37,279

online on the experienter group and

194

00:08:40,149 --> 00:08:38,640

stuff like that and people are like

195

00:08:43,350 --> 00:08:40,159

what's it going to be what's it and i

196

00:08:44,870 --> 00:08:43,360

feel like a lot of us thought

197

00:08:46,470 --> 00:08:44,880

that we were it was almost like we'd

198

00:08:48,389 --> 00:08:46,480

slaved away in the kitchen all day

199

00:08:50,310 --> 00:08:48,399

anticipating the guests to arrive and

200

00:08:51,990 --> 00:08:50,320

then they showed up late right right but

201
00:08:53,910 --> 00:08:52,000
we did get this really cool photo out of

202
00:08:55,910 --> 00:08:53,920
it right the guest is so cool though

203
00:08:57,269 --> 00:08:55,920
that it doesn't matter right like the

204
00:08:59,350 --> 00:08:57,279
photo yeah yeah

205
00:09:00,630 --> 00:08:59,360
yeah yeah yeah it's like i don't know

206
00:09:02,630 --> 00:09:00,640
who that cool thing you know paul

207
00:09:04,870 --> 00:09:02,640
stanley from kiss could be anybody i'm

208
00:09:06,070 --> 00:09:04,880
just playing for fun

209
00:09:07,590 --> 00:09:06,080
it doesn't matter because they're that

210
00:09:11,350 --> 00:09:07,600
goal and you're just thankful that's

211
00:09:14,389 --> 00:09:13,350
so um so this first image that was

212
00:09:16,310 --> 00:09:14,399
released

213
00:09:17,509 --> 00:09:16,320

they called they refer to it as the deep

214

00:09:18,310 --> 00:09:17,519

field image

215

00:09:19,750 --> 00:09:18,320

um

216

00:09:21,590 --> 00:09:19,760

now part of the point of this image

217

00:09:23,829 --> 00:09:21,600

being released as i put it yesterday or

218

00:09:26,389 --> 00:09:23,839

two days ago is that the image is

219

00:09:28,550 --> 00:09:26,399

teeming with galaxies that everywhere we

220

00:09:29,990 --> 00:09:28,560

point in there i mean those though the

221

00:09:32,470 --> 00:09:30,000

majority of what we're seeing in there

222

00:09:35,269 --> 00:09:32,480

are not stars those are whole galaxies

223

00:09:38,949 --> 00:09:35,279

like that one right there and so um you

224

00:09:42,710 --> 00:09:38,959

know each galaxy a rough estimate for

225

00:09:47,030 --> 00:09:42,720

how many stars would be in a galaxy

226

00:09:50,150 --> 00:09:47,040

is tens to hundreds of billions of stars

227

00:09:53,269 --> 00:09:50,160

and within a galaxy and most of those

228

00:09:55,829 --> 00:09:53,279

are going to have planets around them so

229

00:09:57,350 --> 00:09:55,839

an image like this is an extraordinarily

230

00:09:59,590 --> 00:09:57,360

mind-boggling

231

00:10:01,350 --> 00:09:59,600

kind of piece of data just on the face

232

00:10:02,790 --> 00:10:01,360

of it with that right

233

00:10:05,590 --> 00:10:02,800

right

234

00:10:07,590 --> 00:10:05,600

i mean we had as bill nelson put it on

235

00:10:09,670 --> 00:10:07,600

that first day this deep field image is

236

00:10:11,509 --> 00:10:09,680

equivalent to the amount of space we'd

237

00:10:14,150 --> 00:10:11,519

view from here on earth if you took one

238

00:10:16,389 --> 00:10:14,160

grain of sand and stuck it out at arm's

239

00:10:18,710 --> 00:10:16,399

level length that would be the amount of

240

00:10:20,870 --> 00:10:18,720

kind of the sky that it would cover

241

00:10:23,350 --> 00:10:20,880

and it's so tiny right i mean i

242

00:10:25,829 --> 00:10:23,360

seriously think about that can you even

243

00:10:28,150 --> 00:10:25,839

go to a beach and pick up only one grain

244

00:10:30,710 --> 00:10:28,160

of sand it's incredibly difficult like

245

00:10:32,790 --> 00:10:30,720

you have to

246

00:10:34,310 --> 00:10:32,800

really try and then if you do that you

247

00:10:35,590 --> 00:10:34,320

could probably barely see it on your

248

00:10:37,509 --> 00:10:35,600

finger

249

00:10:39,509 --> 00:10:37,519

that's this and there's like what a

250

00:10:41,030 --> 00:10:39,519

thousand galaxies in here i heard like a

251

00:10:42,870 --> 00:10:41,040

rough number about that

252

00:10:45,269 --> 00:10:42,880

yeah i mean i don't i can't even count

253

00:10:47,030 --> 00:10:45,279

how many are in there and i i'm sure i

254

00:10:49,990 --> 00:10:47,040

get the number wrong but it's

255

00:10:51,269 --> 00:10:50,000

astonishing and i think from from what i

256

00:10:52,310 --> 00:10:51,279

heard from

257

00:10:53,670 --> 00:10:52,320

from

258

00:11:05,110 --> 00:10:53,680

the

259

00:11:08,150 --> 00:11:05,120

stars that are in our

260

00:11:11,030 --> 00:11:08,160

our um galaxy in the milky way and we're

261

00:11:12,630 --> 00:11:11,040

kind of looking through them yeah and

262

00:11:14,230 --> 00:11:12,640

they kind of let the lens flare sit

263

00:11:15,990 --> 00:11:14,240

there so that you can have an ace

264

00:11:17,910 --> 00:11:16,000

because it's pretty and b

265

00:11:20,230 --> 00:11:17,920

um so that you have a rough estimate i

266

00:11:22,550 --> 00:11:20,240

guess of distance and looking out into

267

00:11:24,660 --> 00:11:22,560

the deep beyond over there we're not

268

00:11:26,710 --> 00:11:24,670

alone i just have to say it i mean

269

00:11:27,750 --> 00:11:26,720

[Laughter]

270

00:11:30,630 --> 00:11:27,760

i mean

271

00:11:33,990 --> 00:11:30,640

i think it's almost like impossible

272

00:11:35,670 --> 00:11:34,000

to be alone at this point you know yeah

273

00:11:38,949 --> 00:11:35,680

like the percentages

274

00:11:41,190 --> 00:11:38,959

are are not in the favor of being alone

275

00:11:43,430 --> 00:11:41,200

you know what does that mean what forum

276

00:11:45,910 --> 00:11:43,440

or what shape does

277

00:11:47,509 --> 00:11:45,920

does life take i have no freaking clue

278

00:11:49,910 --> 00:11:47,519

but i can tell you one thing if somebody

279

00:11:51,190 --> 00:11:49,920

came up to me is like

280

00:11:53,910 --> 00:11:51,200

i know how much you got in your bank

281

00:11:56,870 --> 00:11:53,920

account and i want you to bet it all all

282

00:12:00,550 --> 00:11:56,880

in texas no hold poker

283

00:12:02,389 --> 00:12:00,560

put all your chips in on life

284

00:12:03,590 --> 00:12:02,399

i wouldn't even have to think about it i

285

00:12:05,190 --> 00:12:03,600

mean there's

286

00:12:11,110 --> 00:12:05,200

so many

287

00:12:13,670 --> 00:12:11,120

you know if if we were alone the the

288

00:12:15,269 --> 00:12:13,680

miracle of that would do like i can't

289

00:12:17,509 --> 00:12:15,279

even comprehend that that'd be harder

290

00:12:21,269 --> 00:12:17,519

than winning like a million powerballs

291

00:12:24,310 --> 00:12:21,279

in your lifetime yeah absolutely yeah

292

00:12:27,509 --> 00:12:24,320

i totally agree you know and and it was

293

00:12:30,150 --> 00:12:27,519

really heartening and beautiful to see

294

00:12:32,550 --> 00:12:30,160

after this photo was released seeing it

295

00:12:35,350 --> 00:12:32,560

kind of pop up and p and people

296

00:12:38,710 --> 00:12:35,360

retweeting it and seeing everybody from

297

00:12:41,350 --> 00:12:38,720

like professional athletes too i saw um

298

00:12:44,389 --> 00:12:41,360

uh america's sweetheart henry winkler uh

299

00:12:47,670 --> 00:12:44,399

the fonz also of the wonderful

300

00:12:48,870 --> 00:12:47,680

hit murder comedy barry which i love um

301
00:12:50,629 --> 00:12:48,880
and um

302
00:12:52,790 --> 00:12:50,639
he's a great fisherman too i mean henry

303
00:12:54,870 --> 00:12:52,800
winkler he's got it all a lot of people

304
00:12:56,870 --> 00:12:54,880
don't know that yeah he looks like a

305
00:12:58,870 --> 00:12:56,880
good hugger as well which i appreciate

306
00:13:00,550 --> 00:12:58,880
but anyway you know he was like his line

307
00:13:02,069 --> 00:13:00,560
was like you know i know in my heart

308
00:13:03,350 --> 00:13:02,079
that we're not alone

309
00:13:05,430 --> 00:13:03,360
and um

310
00:13:08,470 --> 00:13:05,440
and something interesting about henry

311
00:13:10,150 --> 00:13:08,480
winkler actually in relation to where

312
00:13:11,990 --> 00:13:10,160
i'm from

313
00:13:14,629 --> 00:13:12,000

uh milwaukee

314

00:13:18,230 --> 00:13:14,639

yeah and it was a big to-do

315

00:13:19,910 --> 00:13:18,240

and it's called the bronze fonz

316

00:13:22,310 --> 00:13:19,920

and they put a statue of him that's

317

00:13:25,190 --> 00:13:22,320

right they put a statue of him

318

00:13:26,949 --> 00:13:25,200

by the river over here

319

00:13:29,190 --> 00:13:26,959

really pretty

320

00:13:31,670 --> 00:13:29,200

it was pretty weird because um i was

321

00:13:33,030 --> 00:13:31,680

thinking like uh of all the people why

322

00:13:35,430 --> 00:13:33,040

would you

323

00:13:36,790 --> 00:13:35,440

show a statue of the bronze fawns by the

324

00:13:38,310 --> 00:13:36,800

river

325

00:13:40,310 --> 00:13:38,320

it was pretty weird people would you

326

00:13:41,829 --> 00:13:40,320

know obviously do weird things to it

327

00:13:46,389 --> 00:13:41,839

take pictures and stuff i'll just show

328

00:13:49,350 --> 00:13:48,230

there he is oh wow there he is the font

329

00:13:51,189 --> 00:13:49,360

he's right there

330

00:13:52,710 --> 00:13:51,199

now is it life size is it bigger than

331

00:13:54,949 --> 00:13:52,720

life size or

332

00:13:57,189 --> 00:13:54,959

that's a good question because i think

333

00:13:58,550 --> 00:13:57,199

it's life size but if it is he's a

334

00:14:00,870 --> 00:13:58,560

pretty short guy

335

00:14:02,710 --> 00:14:00,880

oh he is kind of a short guy yeah i mean

336

00:14:04,069 --> 00:14:02,720

not you know nothing against you know

337

00:14:05,910 --> 00:14:04,079

the vertically challenged or whatever

338

00:14:08,310 --> 00:14:05,920

but i think that he's something like

339

00:14:09,910 --> 00:14:08,320

five seven or five eight he's a little

340

00:14:11,430 --> 00:14:09,920

he's you know

341

00:14:13,030 --> 00:14:11,440

would you think the fonz was that height

342

00:14:14,550 --> 00:14:13,040

i'm not sure you know what i mean it's

343

00:14:16,230 --> 00:14:14,560

hard to tell it's always hard to tell on

344

00:14:17,750 --> 00:14:16,240

tv especially when you like the person

345

00:14:18,870 --> 00:14:17,760

you always imagine they're a lot taller

346

00:14:21,110 --> 00:14:18,880

than they are

347

00:14:23,110 --> 00:14:21,120

yeah yeah and stars you kind of always

348

00:14:25,430 --> 00:14:23,120

think they're going to be bigger than

349

00:14:27,269 --> 00:14:25,440

they are some you know or i often did in

350

00:14:29,030 --> 00:14:27,279

the past yeah i think the only per one

351

00:14:30,710 --> 00:14:29,040

of the only people that i've seen the

352

00:14:32,310 --> 00:14:30,720

two people that i think that i've seen

353

00:14:33,750 --> 00:14:32,320

that actually

354

00:14:36,389 --> 00:14:33,760

were as big as i thought they were going

355

00:14:38,470 --> 00:14:36,399

to be were um conan o'brien and thurston

356

00:14:41,110 --> 00:14:38,480

moore from sonic hughes those are those

357

00:14:42,790 --> 00:14:41,120

two guys are super super super tall it's

358

00:14:44,629 --> 00:14:42,800

crazy oh and charcoal

359

00:14:46,870 --> 00:14:44,639

i thought james lindonly was going to be

360

00:14:50,230 --> 00:14:46,880

like 8-4 but

361

00:14:53,030 --> 00:14:50,240

yeah no he's only 7-4 it's crazy right

362

00:14:55,829 --> 00:14:53,040

weird so the next picture you want to

363

00:14:59,030 --> 00:14:55,839

move on to the next one sure sure

364

00:15:01,269 --> 00:14:59,040

um i mean yeah let's see

365

00:15:04,710 --> 00:15:01,279

there we go okay so let's go to the next

366

00:15:08,069 --> 00:15:07,030

so this is um

367

00:15:13,430 --> 00:15:08,079

this

368

00:15:17,310 --> 00:15:13,440

information from

369

00:15:20,790 --> 00:15:17,320

uh the hot gas giant exoplanet wasp

370

00:15:22,629 --> 00:15:20,800

96b rolls right off the tongue right and

371

00:15:24,629 --> 00:15:22,639

it's rolled out this this data was

372

00:15:26,470 --> 00:15:24,639

rolled out in the live broadcast by

373

00:15:29,030 --> 00:15:26,480

representatives from the canadian space

374

00:15:31,110 --> 00:15:29,040

agency so this we see a graph showing

375

00:15:33,829 --> 00:15:31,120

the atmospheric conditions that they're

376

00:15:35,590 --> 00:15:33,839

able to detect with the telescope using

377

00:15:38,629 --> 00:15:35,600

uh infrared data

378

00:15:40,470 --> 00:15:38,639

and spectroscopy and they do this by

379

00:15:43,350 --> 00:15:40,480

waiting for the

380

00:15:45,749 --> 00:15:43,360

the planet to pass in front of a star

381

00:15:48,230 --> 00:15:45,759

and then they're able to kind of zoom in

382

00:15:50,870 --> 00:15:48,240

and look at the kind of like haze around

383

00:15:53,110 --> 00:15:50,880

the planet's atmosphere and gauge a lot

384

00:15:55,509 --> 00:15:53,120

from that right and so and what did they

385

00:15:57,430 --> 00:15:55,519

find here water i mean you see it water

386

00:15:59,590 --> 00:15:57,440

water water water water right

387

00:16:01,269 --> 00:15:59,600

water in the atmosphere lots of water

388

00:16:04,310 --> 00:16:01,279

and cloud formations

389

00:16:06,150 --> 00:16:04,320

now you know that's an extraordinarily

390

00:16:08,230 --> 00:16:06,160

good sign in terms of the hunt for

391

00:16:10,389 --> 00:16:08,240

extraterrestrial life at least as far as

392

00:16:12,389 --> 00:16:10,399

the kinds of life we're caught we would

393

00:16:14,470 --> 00:16:12,399

commonly find here on earth and this is

394

00:16:16,710 --> 00:16:14,480

water that was actually on an

395

00:16:18,710 --> 00:16:16,720

extraordinarily hot planet

396

00:16:20,629 --> 00:16:18,720

so it was a little bit of a surprise

397

00:16:22,629 --> 00:16:20,639

that it would be there it's basically in

398

00:16:25,910 --> 00:16:22,639

them like mist and there's haze on the

399

00:16:27,509 --> 00:16:25,920

planet and you know from what i recall

400

00:16:29,670 --> 00:16:27,519

that's where a lot of the water source

401
00:16:31,749 --> 00:16:29,680
was coming from the h2o

402
00:16:33,189 --> 00:16:31,759
but it's just incredible how you know

403
00:16:34,790 --> 00:16:33,199
how

404
00:16:36,389 --> 00:16:34,800
um

405
00:16:38,470 --> 00:16:36,399
common

406
00:16:40,710 --> 00:16:38,480
water is right and then you add that to

407
00:16:42,150 --> 00:16:40,720
how common uh i don't know galaxies are

408
00:16:44,150 --> 00:16:42,160
planets are

409
00:16:45,749 --> 00:16:44,160
you know all the molecules that make us

410
00:16:50,069 --> 00:16:45,759
who we are how common they are

411
00:16:51,509 --> 00:16:50,079
throughout the universe we're not alone

412
00:16:53,749 --> 00:16:51,519
now it's also awesome because as i

413
00:16:56,230 --> 00:16:53,759

recall now don't like don't quote me on

414

00:16:59,590 --> 00:16:56,240

this but i think that this planet is

415

00:17:01,269 --> 00:16:59,600

about a thousand light years away from

416

00:17:04,630 --> 00:17:01,279

us i think that's what they said about a

417

00:17:06,390 --> 00:17:04,640

thousand light years away from us so a

418

00:17:07,909 --> 00:17:06,400

you know this is

419

00:17:10,949 --> 00:17:07,919

we would be looking at what was

420

00:17:13,429 --> 00:17:10,959

happening a thousand years ago

421

00:17:15,909 --> 00:17:13,439

right because you know the light took

422

00:17:17,829 --> 00:17:15,919

you know a light year it's you know 100

423

00:17:20,309 --> 00:17:17,839

000. okay a thousand light years and

424

00:17:23,110 --> 00:17:20,319

then on top of that

425

00:17:25,590 --> 00:17:23,120

you know it's amazing that that

426

00:17:27,429 --> 00:17:25,600

the piece of engineering that like crazy

427

00:17:29,990 --> 00:17:27,439

paper kite that they put into space

428

00:17:32,470 --> 00:17:30,000

that's doing all this photography and

429

00:17:34,470 --> 00:17:32,480

and spectroscopy that it can actually

430

00:17:35,909 --> 00:17:34,480

detect like clouds in the atmosphere of

431

00:17:37,830 --> 00:17:35,919

something that that's

432

00:17:39,990 --> 00:17:37,840

you know this is this is actually kind

433

00:17:41,510 --> 00:17:40,000

of child's play to it in a way because

434

00:17:44,150 --> 00:17:41,520

of some of the other data that we're

435

00:17:46,150 --> 00:17:44,160

picking up from other places um

436

00:17:46,950 --> 00:17:46,160

which is extraordinary you know what i

437

00:17:49,669 --> 00:17:46,960

mean

438

00:17:52,789 --> 00:17:49,679

like um just in our lifetime just in our

439

00:17:53,830 --> 00:17:52,799

lifetime sean you and i um you know we

440

00:17:57,029 --> 00:17:53,840

wondered

441

00:17:59,430 --> 00:17:57,039

if we were going to get data about water

442

00:18:02,310 --> 00:17:59,440

on mars you know what i mean and here we

443

00:18:03,430 --> 00:18:02,320

are looking way way way beyond that it's

444

00:18:04,470 --> 00:18:03,440

super cool

445

00:18:06,310 --> 00:18:04,480

okay

446

00:18:09,909 --> 00:18:06,320

it'll be interesting to see you know

447

00:18:14,070 --> 00:18:11,590

by the end of the year first of all i

448

00:18:16,230 --> 00:18:14,080

think amazing things will will come out

449

00:18:18,230 --> 00:18:16,240

from this but just like

450

00:18:19,430 --> 00:18:18,240

within 20 years

451

00:18:20,870 --> 00:18:19,440

how

452

00:18:22,310 --> 00:18:20,880

you know

453

00:18:24,870 --> 00:18:22,320

our knowledge of the universe will

454

00:18:26,549 --> 00:18:24,880

change as it always does when

455

00:18:28,549 --> 00:18:26,559

you know we build ourselves a great tool

456

00:18:29,430 --> 00:18:28,559

like we just did so

457

00:18:30,310 --> 00:18:29,440

yep

458

00:18:34,870 --> 00:18:30,320

now

459

00:18:36,710 --> 00:18:34,880

called the star death photo

460

00:18:38,789 --> 00:18:36,720

um which is kind of wild because it

461

00:18:40,950 --> 00:18:38,799

looks you know kind of like a beautiful

462

00:18:42,230 --> 00:18:40,960

serene almost like

463

00:18:43,350 --> 00:18:42,240

you know it looks a little bit like an

464

00:18:44,870 --> 00:18:43,360

eye it looks a little bit like a

465

00:18:47,990 --> 00:18:44,880

firework right

466

00:18:50,390 --> 00:18:48,000

but um that orange foaminess you see is

467

00:18:53,270 --> 00:18:50,400

apparently due to the molecular hydrogen

468

00:18:55,990 --> 00:18:53,280

that's newly formed in the expansion of

469

00:18:57,750 --> 00:18:56,000

the process of this star while it's

470

00:19:00,230 --> 00:18:57,760

dying all right

471

00:19:02,390 --> 00:19:00,240

and the blue area is due to hot ionized

472

00:19:05,110 --> 00:19:02,400

gas that's heated up by the leftover hot

473

00:19:06,230 --> 00:19:05,120

core of this dying star

474

00:19:08,470 --> 00:19:06,240

so

475

00:19:10,710 --> 00:19:08,480

and those there's these little rays that

476

00:19:12,870 --> 00:19:10,720

you can see kind of like at around like

477

00:19:14,549 --> 00:19:12,880

nine o'clock or something like that that

478

00:19:17,190 --> 00:19:14,559

that those kind of like

479

00:19:19,190 --> 00:19:17,200

um horizontal almost lines that you see

480

00:19:21,909 --> 00:19:19,200

yeah like over in the left

481

00:19:24,549 --> 00:19:21,919

um at the left upper part of the photo

482

00:19:26,230 --> 00:19:24,559

now so those rays

483

00:19:28,630 --> 00:19:26,240

are um

484

00:19:30,630 --> 00:19:28,640

uh those are holes in the inner nebula

485

00:19:32,070 --> 00:19:30,640

that are allowing the central star's

486

00:19:35,510 --> 00:19:32,080

light to come through kind of like

487

00:19:36,470 --> 00:19:35,520

patchy clouds letting in rays of our sun

488

00:19:38,950 --> 00:19:36,480

um

489

00:19:41,590 --> 00:19:38,960

and so and then in that picture on the

490

00:19:43,669 --> 00:19:41,600

right which is the near infrared as

491

00:19:45,350 --> 00:19:43,679

opposed to the infrared view the one

492

00:19:48,870 --> 00:19:45,360

yeah i'm learning all about infrared

493

00:19:51,190 --> 00:19:48,880

there's mid infrared near infrared

494

00:19:53,110 --> 00:19:51,200

yeah like

495

00:19:55,430 --> 00:19:53,120

how many infrareds are there

496

00:19:56,710 --> 00:19:55,440

i know right and i mean again it gets

497

00:19:58,870 --> 00:19:56,720

back to what we're talking about at the

498

00:20:00,070 --> 00:19:58,880

top of the

499

00:20:02,149 --> 00:20:00,080

show which is

500

00:20:04,149 --> 00:20:02,159

you know it's it's this is a great field

501
00:20:05,350 --> 00:20:04,159
if you want to be a generalist or you

502
00:20:07,590 --> 00:20:05,360
know um

503
00:20:09,909 --> 00:20:07,600
or for me you know jack of all trades

504
00:20:12,470 --> 00:20:09,919
master of none right yeah because uh but

505
00:20:13,909 --> 00:20:12,480
um and i certainly feel like one when

506
00:20:15,350 --> 00:20:13,919
whenever i'm walking into a situation

507
00:20:17,270 --> 00:20:15,360
like this and prepping for a show like

508
00:20:19,669 --> 00:20:17,280
today and i'm like i realize how little

509
00:20:22,630 --> 00:20:19,679
i know about astronomy right i know

510
00:20:24,149 --> 00:20:22,640
they're less than you even

511
00:20:26,149 --> 00:20:24,159
but like on the right with this

512
00:20:27,990 --> 00:20:26,159
near-infrared they were able to say they

513
00:20:30,070 --> 00:20:28,000

were able to figure out if you zoom in

514

00:20:32,390 --> 00:20:30,080

there you can see that it's actually a

515

00:20:35,510 --> 00:20:32,400

binary star system so

516

00:20:37,350 --> 00:20:35,520

so on the left you know with infrared

517

00:20:38,710 --> 00:20:37,360

you know there's just a big a big haze

518

00:20:40,149 --> 00:20:38,720

in the middle and then with this near

519

00:20:41,750 --> 00:20:40,159

infrared in the right you can see that

520

00:20:43,990 --> 00:20:41,760

there are two dots in the middle so it's

521

00:20:46,310 --> 00:20:44,000

actually a binary star system and and

522

00:20:48,710 --> 00:20:46,320

that's what's what's uh kind of eating

523

00:20:51,590 --> 00:20:48,720

itself right there in this photo

524

00:20:52,950 --> 00:20:51,600

which is super super wild

525

00:20:54,870 --> 00:20:52,960

um

526

00:20:56,230 --> 00:20:54,880

now that

527

00:20:57,669 --> 00:20:56,240

go ahead

528

00:20:59,110 --> 00:20:57,679

well no i was just gonna say i don't

529

00:21:00,630 --> 00:20:59,120

want to feel like i'm rushing you i just

530

00:21:01,350 --> 00:21:00,640

want to make sure we get up to all of

531

00:21:05,110 --> 00:21:01,360

them

532

00:21:08,789 --> 00:21:07,190

no this is great this is great yeah i'm

533

00:21:10,310 --> 00:21:08,799

checking the time and i know that we've

534

00:21:12,789 --> 00:21:10,320

got some wonderful guests coming in here

535

00:21:15,669 --> 00:21:12,799

in about eight minutes or so now this

536

00:21:17,270 --> 00:21:15,679

this is what's called stefan's quintet

537

00:21:19,110 --> 00:21:17,280

this was rolled out by representatives

538

00:21:21,669 --> 00:21:19,120

from the european space agency in

539

00:21:23,990 --> 00:21:21,679

germany now this is a photo with five

540

00:21:27,110 --> 00:21:24,000

large galaxies in the foreground there's

541

00:21:29,830 --> 00:21:27,120

this one kind of classic looking galaxy

542

00:21:32,310 --> 00:21:29,840

on the left and then on the right that

543

00:21:35,510 --> 00:21:32,320

kind of kidney bean shape is actually

544

00:21:38,789 --> 00:21:35,520

four kind of like slightly overlapping

545

00:21:41,909 --> 00:21:38,799

um galaxies all jammed up on top of each

546

00:21:44,549 --> 00:21:41,919

other basically right um now in each

547

00:21:47,029 --> 00:21:44,559

galaxy a very conservative estimate

548

00:21:49,669 --> 00:21:47,039

would be that there are a few billion

549

00:21:52,070 --> 00:21:49,679

within a particular dwarf galaxies and

550

00:21:53,669 --> 00:21:52,080

perhaps 100 to 400 billion stars in a

551
00:21:55,750 --> 00:21:53,679
larger galaxy

552
00:21:59,110 --> 00:21:55,760
you know the mind really boggles at

553
00:22:01,350 --> 00:21:59,120
those kinds of numbers right so

554
00:22:02,870 --> 00:22:01,360
right so in this image

555
00:22:05,430 --> 00:22:02,880
so i hope that doesn't happen in the

556
00:22:07,510 --> 00:22:05,440
milky way that's all right so in this

557
00:22:09,190 --> 00:22:07,520
image it's not unlikely at all that

558
00:22:11,350 --> 00:22:09,200
there would be more than

559
00:22:13,029 --> 00:22:11,360
that there would be you know

560
00:22:15,270 --> 00:22:13,039
it's not unlikely that there are two or

561
00:22:17,669 --> 00:22:15,280
three trillion stars like within the

562
00:22:19,669 --> 00:22:17,679
field of view here

563
00:22:22,230 --> 00:22:19,679

almost all of which likely have planets

564

00:22:26,149 --> 00:22:22,240

around them all right we're not alone

565

00:22:31,909 --> 00:22:29,110

yeah the four on the right are about 300

566

00:22:34,950 --> 00:22:31,919

million light years from us

567

00:22:36,950 --> 00:22:34,960

300 million light years

568

00:22:39,350 --> 00:22:36,960

um so what we're looking at with them

569

00:22:42,149 --> 00:22:39,360

again is what was going on there 300

570

00:22:44,149 --> 00:22:42,159

million years ago now for reference

571

00:22:46,230 --> 00:22:44,159

alligators are some of the oldest larger

572

00:22:47,669 --> 00:22:46,240

animals that exist on our planet and the

573

00:22:51,430 --> 00:22:47,679

first alligator

574

00:22:53,750 --> 00:22:51,440

ancestors evolved some 245 million years

575

00:22:55,350 --> 00:22:53,760

ago so what we're seeing in this picture

576

00:22:58,549 --> 00:22:55,360

that was just taken

577

00:23:00,789 --> 00:22:58,559

um is you know what was happening 300

578

00:23:02,630 --> 00:23:00,799

million light years away from us

579

00:23:05,190 --> 00:23:02,640

from before the time that alligators

580

00:23:06,870 --> 00:23:05,200

existed so

581

00:23:09,430 --> 00:23:06,880

this could possibly look different by

582

00:23:10,630 --> 00:23:09,440

now right yeah for sure

583

00:23:12,549 --> 00:23:10,640

for sure

584

00:23:14,149 --> 00:23:12,559

right how do we know

585

00:23:16,710 --> 00:23:14,159

i mean they could be it could be are

586

00:23:18,390 --> 00:23:16,720

they even there anymore right well not

587

00:23:20,710 --> 00:23:18,400

only that but like the whole place could

588

00:23:23,190 --> 00:23:20,720

be like occup you know like even at this

589

00:23:25,190 --> 00:23:23,200

view you we don't know like how occupied

590

00:23:27,270 --> 00:23:25,200

that area could be right

591

00:23:29,350 --> 00:23:27,280

and like now you know it could

592

00:23:31,830 --> 00:23:29,360

it it could have

593

00:23:33,909 --> 00:23:31,840

whatever the population might be there

594

00:23:37,110 --> 00:23:33,919

of advanced civilizations just you know

595

00:23:38,950 --> 00:23:37,120

as as a mental exercise you know that

596

00:23:41,430 --> 00:23:38,960

those people could have like

597

00:23:43,750 --> 00:23:41,440

lived and died you know hundreds of

598

00:23:45,830 --> 00:23:43,760

times over you know what i mean like you

599

00:23:48,310 --> 00:23:45,840

know like just think of our civilization

600

00:23:51,510 --> 00:23:48,320

or what we think of as

601
00:23:52,950 --> 00:23:51,520
as the the relevant time period of of

602
00:23:54,710 --> 00:23:52,960
human progress

603
00:23:57,990 --> 00:23:54,720
and then and then

604
00:24:00,310 --> 00:23:58,000
jam you know divide that into 300

605
00:24:01,590 --> 00:24:00,320
million years it's it's crazy to look

606
00:24:02,870 --> 00:24:01,600
it's incredible

607
00:24:04,789 --> 00:24:02,880
think about those

608
00:24:06,070 --> 00:24:04,799
the that kind of time frame

609
00:24:12,710 --> 00:24:06,080
in

610
00:24:15,269 --> 00:24:12,720
um bill nelson said it best when he said

611
00:24:16,400 --> 00:24:15,279
there are no words just

612
00:24:18,630 --> 00:24:16,410
wow

613
00:24:20,230 --> 00:24:18,640

[Laughter]

614

00:24:21,750 --> 00:24:20,240

absolutely

615

00:24:25,190 --> 00:24:21,760

he's got he's got away with those no

616

00:24:29,269 --> 00:24:27,669

this is it seems like the the favorite

617

00:24:31,350 --> 00:24:29,279

amongst people are paying attention to

618

00:24:34,630 --> 00:24:31,360

this and looking at this stuff

619

00:24:37,750 --> 00:24:34,640

and you know you can see why it's

620

00:24:39,669 --> 00:24:37,760

very beautiful and

621

00:24:40,470 --> 00:24:39,679

there's so many different things to look

622

00:24:42,549 --> 00:24:40,480

at

623

00:24:44,390 --> 00:24:42,559

um and this is uh

624

00:24:46,070 --> 00:24:44,400

the birth of a star

625

00:24:48,789 --> 00:24:46,080

right that's right well it's actually

626
00:24:50,149 --> 00:24:48,799
the karina nebula and so that whole kind

627
00:24:52,630 --> 00:24:50,159
of haze

628
00:24:54,310 --> 00:24:52,640
yeah no but yeah no it's true um and

629
00:24:56,950 --> 00:24:54,320
they called it star birth but it's queen

630
00:24:59,669 --> 00:24:56,960
and nebula so you actually see many

631
00:25:02,630 --> 00:24:59,679
hundreds of star like probably

632
00:25:03,430 --> 00:25:02,640
you know many many stars forming in that

633
00:25:06,630 --> 00:25:03,440
kind of

634
00:25:07,669 --> 00:25:06,640
thirds of the picture not just one

635
00:25:09,669 --> 00:25:07,679
incredible

636
00:25:12,830 --> 00:25:09,679
which is astonishing right and this is

637
00:25:15,430 --> 00:25:12,840
actually 7 600 light years away but it's

638
00:25:17,590 --> 00:25:15,440

still with oh that's it our own galaxy

639

00:25:21,590 --> 00:25:17,600

yeah it's still within our own milky way

640

00:25:24,950 --> 00:25:23,029

it's less impressive now that you know

641

00:25:26,710 --> 00:25:24,960

that yeah it's like oh it's practically

642

00:25:28,789 --> 00:25:26,720

our neighbor

643

00:25:31,510 --> 00:25:28,799

but it's crazy to think that even within

644

00:25:35,909 --> 00:25:31,520

our own galaxy like stars would be you

645

00:25:38,549 --> 00:25:35,919

know created now or 7 600 years ago when

646

00:25:41,510 --> 00:25:38,559

basically which is what this photo is

647

00:25:46,149 --> 00:25:41,520

kind of referencing right at least yeah

648

00:25:49,350 --> 00:25:48,230

like a wave like the ocean

649

00:25:51,990 --> 00:25:49,360

right

650

00:25:53,430 --> 00:25:52,000

it's it's uh but it's pretty beautiful i

651
00:25:55,110 --> 00:25:53,440
i mean i wonder what it'd be like to

652
00:25:56,710 --> 00:25:55,120
just be

653
00:25:59,269 --> 00:25:56,720
in that

654
00:26:01,510 --> 00:25:59,279
right inside of that just looking at it

655
00:26:04,149 --> 00:26:01,520
one thing i wonder is

656
00:26:05,110 --> 00:26:04,159
are these the actual colors

657
00:26:07,750 --> 00:26:05,120
um

658
00:26:10,149 --> 00:26:07,760
no they're not i didn't think so

659
00:26:11,510 --> 00:26:10,159
yeah they i mean at one point during the

660
00:26:14,070 --> 00:26:11,520
broadcast they showed a couple of the

661
00:26:16,310 --> 00:26:14,080
people that work on the colors and

662
00:26:18,789 --> 00:26:16,320
you know they they were they took pains

663
00:26:19,909 --> 00:26:18,799

to say you know this is a combination of

664

00:26:21,830 --> 00:26:19,919

them

665

00:26:26,230 --> 00:26:21,840

trying to

666

00:26:27,350 --> 00:26:26,240

that you can see different elements

667

00:26:31,750 --> 00:26:27,360

within

668

00:26:33,750 --> 00:26:31,760

and aesthetics and so they're kind of

669

00:26:35,269 --> 00:26:33,760

shipped we gotta get those out

670

00:26:36,789 --> 00:26:35,279

yeah yeah definitely gotta get the

671

00:26:38,789 --> 00:26:36,799

spaceship yeah

672

00:26:41,110 --> 00:26:38,799

you know if there's any if there's any

673

00:26:42,630 --> 00:26:41,120

et's that are waving in the frame

674

00:26:43,590 --> 00:26:42,640

motherships or anything like that that's

675

00:26:46,070 --> 00:26:43,600

gotta make it

676
00:26:47,909 --> 00:26:46,080
flipping you off we gotta airbrush that

677
00:26:50,149 --> 00:26:47,919
right yeah the two people that they

678
00:26:52,390 --> 00:26:50,159
showed that that kind of helped scrub

679
00:26:54,070 --> 00:26:52,400
the images they seemed really nice you

680
00:26:56,310 --> 00:26:54,080
know they seemed like artistic nice

681
00:26:58,470 --> 00:26:56,320
people so you know maybe there's

682
00:27:00,390 --> 00:26:58,480
you know who who knows

683
00:27:01,909 --> 00:27:00,400
sorry if to anybody in the chat you know

684
00:27:03,350 --> 00:27:01,919
we're definitely going to be doing a

685
00:27:05,110 --> 00:27:03,360
little bit of specu

686
00:27:06,870 --> 00:27:05,120
it's it's important right there's this

687
00:27:08,630 --> 00:27:06,880
thing where it's kind of funny you know

688
00:27:11,510 --> 00:27:08,640

we're used to

689

00:27:13,750 --> 00:27:11,520

uh nasa within ufology is kind of like

690

00:27:15,590 --> 00:27:13,760

never a straight answer right we talk

691

00:27:17,350 --> 00:27:15,600

about them that way and you know there's

692

00:27:19,830 --> 00:27:17,360

a lot of frustration because they're a

693

00:27:22,549 --> 00:27:19,840

public-facing agency that uses tax money

694

00:27:24,470 --> 00:27:22,559

and whatnot and at the same time

695

00:27:27,029 --> 00:27:24,480

you know there's that there have been

696

00:27:29,750 --> 00:27:27,039

hampered transparency efforts then there

697

00:27:33,510 --> 00:27:29,760

are days like this week where

698

00:27:36,389 --> 00:27:33,520

we definitely get our our money's worth

699

00:27:38,230 --> 00:27:36,399

out of them seemingly and

700

00:27:40,870 --> 00:27:38,240

to cap it off as we have a wonderful

701
00:27:44,070 --> 00:27:40,880
guest in in the green room drinking pbr

702
00:27:46,630 --> 00:27:44,080
towel boys waiting for the show to start

703
00:27:51,110 --> 00:27:48,389
what a

704
00:27:54,149 --> 00:27:51,120
crap show that presentation was as far

705
00:27:56,070 --> 00:27:54,159
as the like logistics of it

706
00:27:57,830 --> 00:27:56,080
like and at the end she was all like

707
00:27:59,350 --> 00:27:57,840
thanking her producers and i was like

708
00:28:01,990 --> 00:27:59,360
that's the last thank you you guys are

709
00:28:04,710 --> 00:28:02,000
getting you're getting fired after this

710
00:28:07,110 --> 00:28:04,720
because that was terrible

711
00:28:08,710 --> 00:28:07,120
like that poor lady host was like and

712
00:28:10,870 --> 00:28:08,720
now we're gonna go over here and she's

713
00:28:11,750 --> 00:28:10,880

like well maybe not this time and just

714

00:28:14,830 --> 00:28:11,760

get my

715

00:28:17,110 --> 00:28:14,840

just kept smiling as nothing worked

716

00:28:19,110 --> 00:28:17,120

yeah michelle thawler i think was her

717

00:28:20,950 --> 00:28:19,120

name and she i mean she did an admiral

718

00:28:23,110 --> 00:28:20,960

job rolling with the punches i don't

719

00:28:24,870 --> 00:28:23,120

know you know like i at the very least

720

00:28:26,549 --> 00:28:24,880

that audio like whoever that was the

721

00:28:29,110 --> 00:28:26,559

audio supervisor i hope he's not

722

00:28:31,830 --> 00:28:29,120

listening right now or she um because

723

00:28:34,549 --> 00:28:31,840

there are a lot of audio flubs in there

724

00:28:37,510 --> 00:28:34,559

you know the the the fact that like

725

00:28:38,710 --> 00:28:37,520

they had so much satellite

726

00:28:40,710 --> 00:28:38,720

convo

727

00:28:42,389 --> 00:28:40,720

like kind of baked into the script but

728

00:28:43,590 --> 00:28:42,399

it seemed like they hadn't workshopped

729

00:28:45,909 --> 00:28:43,600

the fact that there was going to be like

730

00:28:48,149 --> 00:28:45,919

about a 15 second lag time or something

731

00:28:51,750 --> 00:28:48,159

like that could you imagine if that was

732

00:28:54,149 --> 00:28:51,760

uh you know that was the time they were

733

00:28:56,310 --> 00:28:54,159

going to disclose that there's other

734

00:28:57,510 --> 00:28:56,320

life in the universe and and that's how

735

00:28:59,510 --> 00:28:57,520

it went

736

00:29:01,750 --> 00:28:59,520

it's it's a nightmare

737

00:29:03,990 --> 00:29:01,760

it's also funny because like you know

738

00:29:06,149 --> 00:29:04,000

we're doing essentially like a satellite

739

00:29:07,830 --> 00:29:06,159

broadcast right now you know what i mean

740

00:29:09,669 --> 00:29:07,840

and it's just like like you guys could

741

00:29:11,110 --> 00:29:09,679

have just used stream yard it's not it's

742

00:29:13,430 --> 00:29:11,120

not the most difficult thing in the

743

00:29:15,430 --> 00:29:13,440

world it's okay you know you're just

744

00:29:16,549 --> 00:29:15,440

pushing it out on youtube anyway but you

745

00:29:18,950 --> 00:29:16,559

know hey yeah

746

00:29:20,549 --> 00:29:18,960

you know hopefully

747

00:29:22,310 --> 00:29:20,559

yeah exactly hopefully over the course

748

00:29:23,430 --> 00:29:22,320

of the next weeks they'll figure out

749

00:29:25,909 --> 00:29:23,440

their format

750

00:29:29,190 --> 00:29:25,919

um but anyway it was kind of funny at

751
00:29:31,190 --> 00:29:29,200
times hey thanks for going over uh those

752
00:29:32,950 --> 00:29:31,200
photos bringing some great points to

753
00:29:34,630 --> 00:29:32,960
each one i really appreciate that i

754
00:29:36,070 --> 00:29:34,640
think those were beautiful i can't wait

755
00:29:38,710 --> 00:29:36,080
to get more

756
00:29:40,389 --> 00:29:38,720
um for sure my biggest takeaway from

757
00:29:43,110 --> 00:29:40,399
these was we're

758
00:29:47,029 --> 00:29:43,120
you know we're just we're just not

759
00:29:49,110 --> 00:29:47,039
freaking alone and we knew

760
00:29:52,630 --> 00:29:49,120
a lot of this stuff already right how

761
00:29:54,710 --> 00:29:52,640
big the the universe is and all that and

762
00:29:57,029 --> 00:29:54,720
um that there's a lot of galaxies and so

763
00:30:00,070 --> 00:29:57,039

much opportunity for life to to be there

764

00:30:03,510 --> 00:30:00,080

but it's just uh what when you see

765

00:30:05,110 --> 00:30:03,520

the image you know it's it's uh it's

766

00:30:08,070 --> 00:30:05,120

breathtaking

767

00:30:10,870 --> 00:30:08,080

it really is so it's really astonishing

768

00:30:11,750 --> 00:30:10,880

um i've got a couple of quick bios for

769

00:30:14,470 --> 00:30:11,760

for

770

00:30:17,510 --> 00:30:14,480

our wonderful guests bio it up man

771

00:30:21,190 --> 00:30:19,350

as an award-winning humanitarian with

772

00:30:23,909 --> 00:30:21,200

experience managing programs related to

773

00:30:26,789 --> 00:30:23,919

genocide response childhood literacy and

774

00:30:29,990 --> 00:30:26,799

global health across the middle east and

775

00:30:33,110 --> 00:30:30,000

sub-saharan africa and increasingly she

776

00:30:36,470 --> 00:30:33,120

is involved in uap transparency efforts

777

00:30:39,190 --> 00:30:36,480

uh christopher sharpe is the editor in

778

00:30:42,310 --> 00:30:39,200

chief of liberation times and he's a

779

00:30:47,510 --> 00:30:42,320

senior contributing writer for

780

00:30:52,870 --> 00:30:49,269

so chris hey

781

00:30:54,470 --> 00:30:52,880

and katie hey there it is absolutely

782

00:30:56,470 --> 00:30:54,480

wonderful to see you

783

00:30:58,310 --> 00:30:56,480

great to see you guys

784

00:31:01,190 --> 00:30:58,320

how are you

785

00:31:02,950 --> 00:31:01,200

chris

786

00:31:05,190 --> 00:31:02,960

oh i'm awful no i'm just kidding i'm

787

00:31:07,509 --> 00:31:05,200

doing great i'm anytime i can chat with

788

00:31:09,590 --> 00:31:07,519

you guys i'm happy so nice to finally

789

00:31:11,350 --> 00:31:09,600

meet chris

790

00:31:12,870 --> 00:31:11,360

that's our person

791

00:31:13,669 --> 00:31:12,880

i think it's the first time you guys

792

00:31:15,509 --> 00:31:13,679

have

793

00:31:16,830 --> 00:31:15,519

interacted at least in in this kind of a

794

00:31:19,750 --> 00:31:16,840

format

795

00:31:21,750 --> 00:31:19,760

right yeah i think so yeah it's the

796

00:31:24,310 --> 00:31:21,760

first time that we've um chatted by

797

00:31:26,310 --> 00:31:24,320

video we've dm'd a few times and you

798

00:31:27,990 --> 00:31:26,320

know i've given my support for what

799

00:31:30,789 --> 00:31:28,000

she's doing it's astonishing you know

800

00:31:32,870 --> 00:31:30,799

and it um just shows how far we've come

801
00:31:34,630 --> 00:31:32,880
to get people of her caliber just kind

802
00:31:37,269 --> 00:31:34,640
of supporting us and

803
00:31:39,269 --> 00:31:37,279
yeah i'm just so glad that we're

804
00:31:41,029 --> 00:31:39,279
that we got you on board do you want to

805
00:31:42,149 --> 00:31:41,039
follow me around in my day-to-day life

806
00:31:45,190 --> 00:31:42,159
because i'll

807
00:31:48,789 --> 00:31:47,350
that's a documentary in the making katie

808
00:31:51,830 --> 00:31:48,799
you did a

809
00:31:53,430 --> 00:31:51,840
fantastic job with the activism earlier

810
00:31:55,750 --> 00:31:53,440
this week trying to get people to tweet

811
00:31:56,549 --> 00:31:55,760
and make phone calls

812
00:31:59,590 --> 00:31:56,559
to

813
00:32:00,389 --> 00:31:59,600

uh the correct people regarding the ndaa

814

00:32:01,750 --> 00:32:00,399

language

815

00:32:04,070 --> 00:32:01,760

you want to tell us give us a little

816

00:32:05,909 --> 00:32:04,080

breakdown what inspired that and how it

817

00:32:08,389 --> 00:32:05,919

went for you

818

00:32:11,350 --> 00:32:08,399

yeah um i was

819

00:32:13,190 --> 00:32:11,360

fallen told into it

820

00:32:15,430 --> 00:32:13,200

i don't i don't know their actual names

821

00:32:16,630 --> 00:32:15,440

if you're watching i'm sorry but black

822

00:32:18,549 --> 00:32:16,640

t-y

823

00:32:20,310 --> 00:32:18,559

yeah they called me out and they asked

824

00:32:22,389 --> 00:32:20,320

what i was gonna do about it so i said

825

00:32:23,909 --> 00:32:22,399

okay well i guess it's time to do

826

00:32:26,710 --> 00:32:23,919

something so i know other people have

827

00:32:28,950 --> 00:32:26,720

done advocacy efforts beforehand but i

828

00:32:31,029 --> 00:32:28,960

really wanted to oh great i have like

829

00:32:34,549 --> 00:32:31,039

eyeliner coming on my eyelid there

830

00:32:36,470 --> 00:32:34,559

lovely um really wanted to

831

00:32:37,990 --> 00:32:36,480

professionalize it a bit and try to make

832

00:32:39,509 --> 00:32:38,000

it a little easier

833

00:32:41,590 --> 00:32:39,519

uh you know for folks because i know it

834

00:32:43,350 --> 00:32:41,600

can be really intimidating so

835

00:32:45,509 --> 00:32:43,360

my goal is just to kind of demystify it

836

00:32:46,870 --> 00:32:45,519

make it as painless as possible so i

837

00:32:49,350 --> 00:32:46,880

don't know you guys can tell me whether

838

00:32:50,149 --> 00:32:49,360

or not i did that um but

839

00:33:28,389 --> 00:32:50,159

i

840

00:33:29,350 --> 00:33:28,399

that very much and

841

00:33:30,950 --> 00:33:29,360

so

842

00:33:33,110 --> 00:33:30,960

gracias

843

00:33:35,509 --> 00:33:33,120

and then i don't know

844

00:33:38,630 --> 00:33:35,519

as long as i can be helpful i will so

845

00:33:41,029 --> 00:33:38,640

whatever you guys want i'm here speaking

846

00:33:43,669 --> 00:33:41,039

of the ndaa language uh christopher

847

00:33:44,870 --> 00:33:43,679

sharp what's your take on it

848

00:33:48,470 --> 00:33:44,880

do you think

849

00:33:50,389 --> 00:33:48,480

some people will be getting immunity and

850

00:33:51,350 --> 00:33:50,399

uh how do you think that's gonna look do

851

00:33:53,430 --> 00:33:51,360

you think people are going to come

852

00:33:55,509 --> 00:33:53,440

forward and start talking or what

853

00:33:57,990 --> 00:33:55,519

well as my good friend brian bender's

854

00:33:59,669 --> 00:33:58,000

just reported it's um it's just passed

855

00:34:01,750 --> 00:33:59,679

through um

856

00:34:02,950 --> 00:34:01,760

yeah no debate or anything it's just

857

00:34:04,630 --> 00:34:02,960

password

858

00:34:08,149 --> 00:34:04,640

just now um

859

00:34:11,190 --> 00:34:08,159

about 36 minutes ago so yeah wow

860

00:34:14,389 --> 00:34:11,200

it's in there so well done i don't know

861

00:34:16,230 --> 00:34:14,399

congratulations like oh wow

862

00:34:18,629 --> 00:34:16,240

thank you but this is not because of me

863

00:34:20,710 --> 00:34:18,639

i will happily take the credit if you're

864

00:34:22,230 --> 00:34:20,720

giving it but

865

00:34:24,629 --> 00:34:22,240

we'll just hand it to you we'll just

866

00:34:26,629 --> 00:34:24,639

give it to you or why not

867

00:34:32,629 --> 00:34:26,639

they should they should probably rename

868

00:34:35,909 --> 00:34:34,230

well that's pretty awesome that it just

869

00:34:38,069 --> 00:34:35,919

got past like that no debate or anything

870

00:34:40,310 --> 00:34:38,079

and i feel like a lot of these

871

00:34:42,629 --> 00:34:40,320

uh this uh when this happens and

872

00:34:44,149 --> 00:34:42,639

language comes around in the nda it kind

873

00:34:45,589 --> 00:34:44,159

of

874

00:34:47,750 --> 00:34:45,599

happens that way

875

00:34:51,430 --> 00:34:47,760

doesn't it

876

00:34:54,869 --> 00:34:51,440

yeah so i mean what's gonna happen is um

877

00:34:57,030 --> 00:34:54,879

so i mean i'm waiting for the senate

878

00:34:58,950 --> 00:34:57,040

to um to come up with language i

879

00:35:01,109 --> 00:34:58,960

remember this time last year around

880

00:35:04,470 --> 00:35:01,119

about this time last year gallego um

881

00:35:06,550 --> 00:35:04,480

came up with a bill for a uap office of

882

00:35:09,430 --> 00:35:06,560

sorts and then

883

00:35:11,750 --> 00:35:09,440

came the gila brand amendment

884

00:35:13,750 --> 00:35:11,760

and uh it was just like

885

00:35:15,430 --> 00:35:13,760

it was just amazing so

886

00:35:18,390 --> 00:35:15,440

i'm gonna i'm gonna wait until the

887

00:35:21,990 --> 00:35:18,400

senate um comes up with language

888

00:35:23,910 --> 00:35:22,000

um to see what it's got and um yeah that

889

00:35:26,790 --> 00:35:23,920

that should be pretty exciting as well

890

00:35:29,910 --> 00:35:26,800

um should they have language on uap um

891

00:35:32,550 --> 00:35:29,920

and immunity um so i'm watching out for

892

00:35:34,710 --> 00:35:32,560

that at the moment and then obviously

893

00:35:36,870 --> 00:35:34,720

i mean these bills usually get passed

894

00:35:39,270 --> 00:35:36,880

around about december i think last time

895

00:35:41,829 --> 00:35:39,280

was passed around december by joe biden

896

00:35:43,190 --> 00:35:41,839

it was signed by um

897

00:35:45,589 --> 00:35:43,200

and then around

898

00:35:47,670 --> 00:35:45,599

november and december the house and the

899

00:35:50,230 --> 00:35:47,680

senate have to come together

900

00:35:51,750 --> 00:35:50,240

and um kind of like put their language

901
00:35:55,829 --> 00:35:51,760
together and say okay this is going to

902
00:35:57,510 --> 00:35:55,839
be one bill with both our language

903
00:35:58,390 --> 00:35:57,520
and we're going to choose the best parts

904
00:36:01,109 --> 00:35:58,400
of

905
00:36:03,030 --> 00:36:01,119
the house and the senate um so yeah that

906
00:36:05,829 --> 00:36:03,040
so there's there's exciting times ahead

907
00:36:07,510 --> 00:36:05,839
let's say um and yeah on the music it's

908
00:36:10,790 --> 00:36:07,520
going to be great so it's going to it's

909
00:36:13,349 --> 00:36:10,800
going to provide a secure channel um for

910
00:36:15,670 --> 00:36:13,359
people with knowledge let's say um on

911
00:36:19,430 --> 00:36:15,680
classified programs past legal illegal

912
00:36:21,349 --> 00:36:19,440
programs to come forward um to aoi msg

913
00:36:25,270 --> 00:36:21,359

as it's called currently it may soon

914

00:36:30,230 --> 00:36:26,790

and um

915

00:36:32,390 --> 00:36:30,240

and then yeah then there'll be a way for

916

00:36:33,670 --> 00:36:32,400

that information to go to

917

00:36:35,750 --> 00:36:33,680

um

918

00:36:37,910 --> 00:36:35,760

let's say

919

00:36:39,270 --> 00:36:37,920

politicians on key committees or in key

920

00:36:41,270 --> 00:36:39,280

positions

921

00:36:42,150 --> 00:36:41,280

such as gang of eight for instance

922

00:36:44,069 --> 00:36:42,160

um

923

00:36:46,230 --> 00:36:44,079

and that's gonna be really exciting the

924

00:36:49,270 --> 00:36:46,240

only question i have is terms of

925

00:36:50,550 --> 00:36:49,280

how is that information going to become

926
00:36:51,670 --> 00:36:50,560
public

927
00:36:53,510 --> 00:36:51,680
um

928
00:36:55,030 --> 00:36:53,520
that's the one thing and from my

929
00:36:57,349 --> 00:36:55,040
understanding

930
00:36:59,990 --> 00:36:57,359
um yes you may be able to

931
00:37:02,630 --> 00:37:00,000
provide protections

932
00:37:05,109 --> 00:37:02,640
so you don't get in jail on stuff but i

933
00:37:06,550 --> 00:37:05,119
think some people may still be a little

934
00:37:09,030 --> 00:37:06,560
bit nervous about losing some of their

935
00:37:10,470 --> 00:37:09,040
clearances if especially

936
00:37:12,390 --> 00:37:10,480
they can do it via the classified

937
00:37:13,670 --> 00:37:12,400
channel secure channels fine but if

938
00:37:14,710 --> 00:37:13,680

you're going to speak up in a public

939

00:37:16,870 --> 00:37:14,720

hearing

940

00:37:18,230 --> 00:37:16,880

there may be that fear

941

00:37:19,990 --> 00:37:18,240

however

942

00:37:23,430 --> 00:37:20,000

i expect

943

00:37:25,109 --> 00:37:23,440

people who retired from such programs

944

00:37:27,270 --> 00:37:25,119

may be more willing to do so because

945

00:37:28,870 --> 00:37:27,280

look okay

946

00:37:30,790 --> 00:37:28,880

you know you're retired who cares if you

947

00:37:33,430 --> 00:37:30,800

lose your clearance you know you you've

948

00:37:35,190 --> 00:37:33,440

done a great public service katie you

949

00:37:37,430 --> 00:37:35,200

may have different thoughts on that um

950

00:37:39,430 --> 00:37:37,440

yeah unfortunately there's a lot of

951
00:37:40,790 --> 00:37:39,440
money behind keeping that even after

952
00:37:43,030 --> 00:37:40,800
you've retired

953
00:37:44,230 --> 00:37:43,040
in the private sector

954
00:37:45,510 --> 00:37:44,240
i have a

955
00:37:48,710 --> 00:37:45,520
colleague who

956
00:37:50,310 --> 00:37:48,720
i got a six-figure bump for keeping a

957
00:37:52,550 --> 00:37:50,320
certain level clearance while in the

958
00:37:53,510 --> 00:37:52,560
while in the private sector so

959
00:37:54,630 --> 00:37:53,520
um

960
00:37:55,910 --> 00:37:54,640
there's a really big financial

961
00:37:57,670 --> 00:37:55,920
disincentive

962
00:37:59,430 --> 00:37:57,680
you know not to so let's hope that we

963
00:38:02,630 --> 00:37:59,440

have some patriots who are

964

00:38:04,310 --> 00:38:02,640

willing to kind of put that aside um it

965

00:38:05,589 --> 00:38:04,320

also depends on if they're still if

966

00:38:08,470 --> 00:38:05,599

they're retired from the government or

967

00:38:10,550 --> 00:38:08,480

if they're retired from work period

968

00:38:12,390 --> 00:38:10,560

so fingers crossed there

969

00:38:14,390 --> 00:38:12,400

very interesting

970

00:38:15,349 --> 00:38:14,400

jay do you have any uh thoughts or

971

00:38:17,349 --> 00:38:15,359

questions

972

00:38:18,470 --> 00:38:17,359

oh yeah i was just going to ask if if

973

00:38:21,349 --> 00:38:18,480

there was

974

00:38:23,829 --> 00:38:21,359

chris did a great job of of kind of um

975

00:38:25,670 --> 00:38:23,839

laying out some of the the structure of

976

00:38:28,630 --> 00:38:25,680

what we can anticipate as far as the

977

00:38:31,430 --> 00:38:28,640

timeline from here towards like november

978

00:38:33,349 --> 00:38:31,440

and december and further on from there

979

00:38:35,109 --> 00:38:33,359

um katie would you like to

980

00:38:37,910 --> 00:38:35,119

kind of color in the lines further in

981

00:38:40,150 --> 00:38:37,920

terms of what um we and the audience can

982

00:38:43,910 --> 00:38:40,160

expect with regards to

983

00:38:46,390 --> 00:38:43,920

to the the the defense uh bill and

984

00:38:49,510 --> 00:38:46,400

appropriations and uh specifically this

985

00:38:51,030 --> 00:38:49,520

amendment how long you got that jay i

986

00:38:54,870 --> 00:38:51,040

mean do you want to hear how things

987

00:38:57,109 --> 00:38:54,880

should go yeah or how things do go

988

00:38:58,829 --> 00:38:57,119

and when i just play this game game

989

00:39:01,589 --> 00:38:58,839

every single

990

00:39:03,349 --> 00:39:01,599

option you will be here for a long time

991

00:39:05,109 --> 00:39:03,359

uh yeah so

992

00:39:06,710 --> 00:39:05,119

it's a complicated process and it's

993

00:39:08,790 --> 00:39:06,720

important to understand

994

00:39:10,150 --> 00:39:08,800

at you know in broad strokes how this

995

00:39:11,750 --> 00:39:10,160

works because

996

00:39:14,470 --> 00:39:11,760

there are going to be key times where

997

00:39:16,150 --> 00:39:14,480

you're called to do more advocacy and

998

00:39:17,990 --> 00:39:16,160

it's not that we're

999

00:39:20,390 --> 00:39:18,000

redundant and asking for the same things

1000

00:39:22,550 --> 00:39:20,400

over and over again there really are new

1001
00:39:25,270 --> 00:39:22,560
movement points as chris mentioned this

1002
00:39:26,790 --> 00:39:25,280
is just the house version of the ndaa so

1003
00:39:28,630 --> 00:39:26,800
the senate will pass their version and

1004
00:39:31,510 --> 00:39:28,640
then they conference the two and then

1005
00:39:34,310 --> 00:39:31,520
that goes to the president's desk

1006
00:39:37,750 --> 00:39:34,320
what i do see a lot is confusion between

1007
00:39:39,670 --> 00:39:37,760
author authorizations and appropriations

1008
00:39:41,510 --> 00:39:39,680
um and essentially you can think of

1009
00:39:43,990 --> 00:39:41,520
authorizations as permission to spend

1010
00:39:46,390 --> 00:39:44,000
money appropriations as actually giving

1011
00:39:48,550 --> 00:39:46,400
the money right so an authorizations

1012
00:39:51,430 --> 00:39:48,560
bill which is the ndaa

1013
00:39:53,670 --> 00:39:51,440

um we'll establish new offices we'll set

1014

00:39:55,270 --> 00:39:53,680

new rules we'll

1015

00:39:57,190 --> 00:39:55,280

kind of set the parameters of what they

1016

00:39:58,790 --> 00:39:57,200

want to spend money on

1017

00:40:00,950 --> 00:39:58,800

but none of that matters if there's no

1018

00:40:02,470 --> 00:40:00,960

teeth behind it in appropriations bills

1019

00:40:05,430 --> 00:40:02,480

so

1020

00:40:06,630 --> 00:40:05,440

what's really interesting this year

1021

00:40:08,710 --> 00:40:06,640

is

1022

00:40:10,870 --> 00:40:08,720

it follows logically that you would want

1023

00:40:13,109 --> 00:40:10,880

authorizations to proceed appropriations

1024

00:40:15,190 --> 00:40:13,119

right because what if you say you want a

1025

00:40:17,270 --> 00:40:15,200

new uap office well you better want some

1026

00:40:19,829 --> 00:40:17,280

money so you can hire staff to run it

1027

00:40:21,349 --> 00:40:19,839

right um right now we're in this weird

1028

00:40:22,870 --> 00:40:21,359

position where the house has already

1029

00:40:26,069 --> 00:40:22,880

passed their appropriations bill for

1030

00:40:29,190 --> 00:40:26,079

defense um even though we haven't passed

1031

00:40:31,109 --> 00:40:29,200

the ndaa yet um or it looks like maybe

1032

00:40:32,710 --> 00:40:31,119

we have passed it i don't know if it was

1033

00:40:34,230 --> 00:40:32,720

just certain

1034

00:40:36,870 --> 00:40:34,240

amendments that were voted on chris if

1035

00:40:39,270 --> 00:40:36,880

it was the whole the whole thing um

1036

00:40:42,150 --> 00:40:39,280

but they're kind of doing the processes

1037

00:40:44,069 --> 00:40:42,160

simultaneously so all that to say

1038

00:40:44,950 --> 00:40:44,079

we're going to have a long process ahead

1039

00:40:47,109 --> 00:40:44,960

of us

1040

00:40:48,790 --> 00:40:47,119

and getting the ndaa final version

1041

00:40:51,270 --> 00:40:48,800

passed but we also want to keep an eye

1042

00:40:53,430 --> 00:40:51,280

on the money as well um because that

1043

00:40:55,670 --> 00:40:53,440

probably won't have a huge impact on

1044

00:41:00,150 --> 00:40:55,680

this i suspect but it might have a big

1045

00:41:02,870 --> 00:41:00,950

you know

1046

00:41:04,790 --> 00:41:02,880

robert covert in the chatter brings up a

1047

00:41:06,470 --> 00:41:04,800

good point i don't see how we can expect

1048

00:41:11,589 --> 00:41:06,480

these people to give up their clearances

1049

00:41:15,190 --> 00:41:13,190

and that's pretty

1050

00:41:17,990 --> 00:41:15,200

that's pretty spot on but i guess i

1051

00:41:20,630 --> 00:41:18,000

would go back to you know the

1052

00:41:21,910 --> 00:41:20,640

idea that you brought up is maybe

1053

00:41:23,349 --> 00:41:21,920

they're retired

1054

00:41:24,550 --> 00:41:23,359

you know something like that maybe they

1055

00:41:26,470 --> 00:41:24,560

don't need it

1056

00:41:30,309 --> 00:41:26,480

maybe they're just a good freaking

1057

00:41:36,069 --> 00:41:33,430

or maybe they have like

1058

00:41:38,069 --> 00:41:36,079

40 lucrative patents under the name like

1059

00:41:40,069 --> 00:41:38,079

carrying in like they could just do

1060

00:41:42,550 --> 00:41:40,079

whatever regardless right i'm kind of

1061

00:41:44,150 --> 00:41:42,560

already millionaire but

1062

00:41:45,829 --> 00:41:44,160

well it's important to remember when

1063

00:41:47,190 --> 00:41:45,839

we're talking about losing clearances

1064

00:41:48,550 --> 00:41:47,200

that you can lose your clearance for

1065

00:41:51,109 --> 00:41:48,560

things that are legal

1066

00:41:52,950 --> 00:41:51,119

um so for example

1067

00:41:54,870 --> 00:41:52,960

if you fi if

1068

00:41:56,309 --> 00:41:54,880

well sure but even if you've like filed

1069

00:41:58,390 --> 00:41:56,319

bankruptcy there's something illegal

1070

00:42:00,550 --> 00:41:58,400

about that um a lot of times you will be

1071

00:42:01,910 --> 00:42:00,560

able to get a clearance um right because

1072

00:42:03,589 --> 00:42:01,920

you could be turned right the whole

1073

00:42:05,990 --> 00:42:03,599

thing about that is if you have a

1074

00:42:07,270 --> 00:42:06,000

weakness that could be used to you know

1075

00:42:09,510 --> 00:42:07,280

turn against

1076

00:42:12,309 --> 00:42:09,520

you know the us or whatever so

1077

00:42:14,150 --> 00:42:12,319

you know a china spy could be like hey

1078

00:42:16,390 --> 00:42:14,160

you're freaking broke man and i know it

1079

00:42:18,490 --> 00:42:16,400

i'll give you 20 million dollars to just

1080

00:42:20,470 --> 00:42:18,500

tell me what's in that box over there

1081

00:42:22,790 --> 00:42:20,480

[Laughter]

1082

00:42:24,630 --> 00:42:22,800

okay fine yeah they get so they can't do

1083

00:42:26,309 --> 00:42:24,640

stuff like that right

1084

00:42:27,910 --> 00:42:26,319

yeah

1085

00:42:33,270 --> 00:42:27,920

are they i'm really good at doing

1086

00:42:39,190 --> 00:42:36,069

um now uh chris you

1087

00:42:41,589 --> 00:42:39,200

wrote um a a piece recently

1088

00:42:43,990 --> 00:42:41,599

um this month for the library liberation

1089

00:42:46,069 --> 00:42:44,000

times which by the way uh it's your one

1090

00:42:47,109 --> 00:42:46,079

year anniversary of the liberation times

1091

00:42:48,470 --> 00:42:47,119

this month

1092

00:42:52,870 --> 00:42:48,480

uh

1093

00:42:54,309 --> 00:42:52,880

called it had the tantalizing title

1094

00:42:56,870 --> 00:42:54,319

you're always good with your tantalizing

1095

00:42:59,589 --> 00:42:56,880

headlines pandora's box is about to be

1096

00:43:02,309 --> 00:42:59,599

opened as congress searches for ufo

1097

00:43:04,150 --> 00:43:02,319

answers love that love that love that

1098

00:43:07,109 --> 00:43:04,160

and in that you said in recent years

1099

00:43:09,270 --> 00:43:07,119

previous versions of both acts um

1100

00:43:11,030 --> 00:43:09,280

the national defense authorization act

1101
00:43:15,750 --> 00:43:11,040
which we were just talking about and the

1102
00:43:18,470 --> 00:43:15,760
intelligence authorization act the iaa

1103
00:43:20,390 --> 00:43:18,480
for 2023. you said in recent years

1104
00:43:22,710 --> 00:43:20,400
previous versions of both acts played

1105
00:43:27,190 --> 00:43:22,720
significant roles as congress commenced

1106
00:43:29,910 --> 00:43:27,200
its uap investigation iaa 2021

1107
00:43:33,270 --> 00:43:29,920
established the navy's uap task force

1108
00:43:36,550 --> 00:43:33,280
and ndaa 2022 established the current

1109
00:43:38,790 --> 00:43:36,560
uap office for the moment named aimsoc

1110
00:43:42,630 --> 00:43:38,800
which is a terrible name

1111
00:43:45,990 --> 00:43:42,640
however you said its acts of 2023 may

1112
00:43:48,790 --> 00:43:46,000
may be remembered by history as truly

1113
00:43:49,910 --> 00:43:48,800

pivotal uh can you tell us why

1114

00:43:52,390 --> 00:43:49,920

um

1115

00:43:56,069 --> 00:43:52,400

yes yes and i think it has a large part

1116

00:43:58,630 --> 00:43:56,079

to do with the immunity language um

1117

00:44:01,589 --> 00:43:58,640

which has now been confirmed um

1118

00:44:03,670 --> 00:44:01,599

and i think you know my sources are very

1119

00:44:05,990 --> 00:44:03,680

very bullish in terms of

1120

00:44:06,829 --> 00:44:06,000

how this may now pull out and play out

1121

00:44:08,630 --> 00:44:06,839

sorry

1122

00:44:12,309 --> 00:44:08,640

um and

1123

00:44:13,349 --> 00:44:12,319

i think there is now a real will

1124

00:44:15,190 --> 00:44:13,359

in

1125

00:44:17,670 --> 00:44:15,200

um congress

1126

00:44:20,470 --> 00:44:17,680

to find the origin of these craft

1127

00:44:24,230 --> 00:44:20,480

because they keep on getting reports of

1128

00:44:26,150 --> 00:44:24,240

you know uaps you see the videos

1129

00:44:27,670 --> 00:44:26,160

here from the witnesses and all this

1130

00:44:30,630 --> 00:44:27,680

stuff they're giving these big briefings

1131

00:44:32,630 --> 00:44:30,640

and stuff but anyhow they're not given

1132

00:44:34,829 --> 00:44:32,640

any information as to who the actors are

1133

00:44:37,670 --> 00:44:34,839

behind the

1134

00:44:43,990 --> 00:44:37,680

wheels a complaint yeah

1135

00:44:46,550 --> 00:44:44,000

absolutely and i think um ousd in s has

1136

00:44:49,030 --> 00:44:46,560

has historically not been very upfront

1137

00:44:52,950 --> 00:44:49,040

with playing bornish issue hence why the

1138

00:44:55,670 --> 00:44:52,960

zondo left that office um and it's been

1139

00:44:58,550 --> 00:44:55,680

in control of amesog um you know until

1140

00:45:01,670 --> 00:44:58,560

recently gary reed who was not proponing

1141

00:45:03,430 --> 00:45:01,680

for uap was kind of like heading

1142

00:45:05,990 --> 00:45:03,440

song as well which is unbelievable when

1143

00:45:08,309 --> 00:45:06,000

you think about it so yeah i think yeah

1144

00:45:10,710 --> 00:45:08,319

so i i think i think kind of like um in

1145

00:45:12,470 --> 00:45:10,720

simplistic terms um congrats is just

1146

00:45:14,390 --> 00:45:12,480

kind of like screw this

1147

00:45:17,270 --> 00:45:14,400

there are legal programs they know a lot

1148

00:45:18,390 --> 00:45:17,280

more let's go jump straight to that i

1149

00:45:20,390 --> 00:45:18,400

mean you're saying you don't need to be

1150

00:45:22,309 --> 00:45:20,400

origin or anything like that so if

1151

00:45:23,750 --> 00:45:22,319

there's crash retrievals and stuff like

1152

00:45:25,589 --> 00:45:23,760

that and we've got these crafts and

1153

00:45:27,670 --> 00:45:25,599

legal programs let's just jump straight

1154

00:45:30,870 --> 00:45:27,680

to that because

1155

00:45:33,109 --> 00:45:30,880

the united states is not stupid um

1156

00:45:35,109 --> 00:45:33,119

i mean obviously people got lots and

1157

00:45:36,630 --> 00:45:35,119

lots of opinions on the government but

1158

00:45:39,910 --> 00:45:36,640

they're not stupid i mean this stuff's

1159

00:45:41,829 --> 00:45:39,920

been going on for 70 years now um i mean

1160

00:45:43,430 --> 00:45:41,839

stuff you've uncovered sean i mean that

1161

00:45:47,030 --> 00:45:43,440

tells you something else has been going

1162

00:45:49,190 --> 00:45:47,040

on behind the scenes um you ain't etf um

1163

00:45:51,510 --> 00:45:49,200

you know aid pain sog they've always

1164

00:45:53,030 --> 00:45:51,520

kind of like been outside that circle

1165

00:45:54,630 --> 00:45:53,040

you know they've never got into the

1166

00:45:57,829 --> 00:45:54,640

inner circle

1167

00:45:59,589 --> 00:45:57,839

or legal programs so i think that

1168

00:46:01,750 --> 00:45:59,599

congress is just kind of like okay are

1169

00:46:03,270 --> 00:46:01,760

you sdis you're not playing ball you're

1170

00:46:05,829 --> 00:46:03,280

not really helping us here we're not

1171

00:46:08,309 --> 00:46:05,839

making any ground so we're just going to

1172

00:46:11,910 --> 00:46:08,319

jump straight to these legal programs

1173

00:46:14,309 --> 00:46:11,920

and get the answers straight away um and

1174

00:46:15,910 --> 00:46:14,319

yeah i i think it will uh it will be a

1175

00:46:18,230 --> 00:46:15,920

huge story it could be like a cosmic

1176

00:46:19,910 --> 00:46:18,240

kind of like watergate um if it is

1177

00:46:22,950 --> 00:46:19,920

proven true that there are these legal

1178

00:46:24,390 --> 00:46:22,960

programs which i'm pretty sure of um so

1179

00:46:26,150 --> 00:46:24,400

i think that

1180

00:46:29,109 --> 00:46:26,160

you know um

1181

00:46:31,190 --> 00:46:29,119

the authorization acts um of 2023 will

1182

00:46:33,109 --> 00:46:31,200

play a large part in getting us to that

1183

00:46:34,710 --> 00:46:33,119

place um

1184

00:46:36,790 --> 00:46:34,720

so i think this is gonna be like it's

1185

00:46:38,790 --> 00:46:36,800

gonna be really really big um because

1186

00:46:42,550 --> 00:46:38,800

we're not gonna be relying on

1187

00:46:44,390 --> 00:46:42,560

staff within ousd on ins anymore um

1188

00:46:45,829 --> 00:46:44,400

people we know haven't played ball so i

1189

00:46:48,230 --> 00:46:45,839

think congress is now taking matters

1190

00:46:49,910 --> 00:46:48,240

into its own hands and they want to talk

1191

00:46:50,870 --> 00:46:49,920

to these um

1192

00:46:52,230 --> 00:46:50,880

people who are going to provide

1193

00:46:54,710 --> 00:46:52,240

testimony at least

1194

00:46:57,270 --> 00:46:54,720

perhaps to them in private

1195

00:46:58,550 --> 00:46:57,280

and get that information made public

1196

00:47:04,309 --> 00:46:58,560

somehow

1197

00:47:05,990 --> 00:47:04,319

do you think that these programs are

1198

00:47:07,750 --> 00:47:06,000

um

1199

00:47:10,710 --> 00:47:07,760

are you saying these programs are most

1200

00:47:14,069 --> 00:47:10,720

likely illegal government programs

1201
00:47:15,829 --> 00:47:14,079
or private contractor programs or both

1202
00:47:18,390 --> 00:47:15,839
could be both but the fact is that if

1203
00:47:20,790 --> 00:47:18,400
there's no government oversight um from

1204
00:47:23,349 --> 00:47:20,800
congressional committees

1205
00:47:25,829 --> 00:47:23,359
i doubt they're legal

1206
00:47:27,510 --> 00:47:25,839
in terms of having that transparency

1207
00:47:28,549 --> 00:47:27,520
component about them

1208
00:47:30,069 --> 00:47:28,559
especially

1209
00:47:31,430 --> 00:47:30,079
if you've got kind of breakthrough

1210
00:47:34,309 --> 00:47:31,440
technologies and stuff that could

1211
00:47:35,990 --> 00:47:34,319
perhaps provide um the keys to solving

1212
00:47:37,510 --> 00:47:36,000
climate change and key issues and stuff

1213
00:47:38,950 --> 00:47:37,520

like that i think that's sort of the

1214

00:47:40,630 --> 00:47:38,960

public address and interest to the

1215

00:47:41,829 --> 00:47:40,640

united states government

1216

00:47:44,150 --> 00:47:41,839

and if they're not getting information

1217

00:47:45,990 --> 00:47:44,160

they don't have any oversight of that

1218

00:47:48,630 --> 00:47:46,000

then that's a really really big problem

1219

00:47:51,750 --> 00:47:48,640

if they're operating in secret without

1220

00:47:54,230 --> 00:47:51,760

any knowledge of um portfolio holders in

1221

00:47:55,750 --> 00:47:54,240

government and that that is really big

1222

00:47:56,549 --> 00:47:55,760

especially if the president

1223

00:48:01,190 --> 00:47:56,559

um

1224

00:48:04,630 --> 00:48:02,870

which yeah we've we've heard a lot of

1225

00:48:06,630 --> 00:48:04,640

different things on that what presidents

1226
00:48:08,390 --> 00:48:06,640
are briefed or which aren't or whatever

1227
00:48:11,430 --> 00:48:08,400
truth is i don't i don't know that we

1228
00:48:13,349 --> 00:48:11,440
really know um but

1229
00:48:15,349 --> 00:48:13,359
you know what you have i always just go

1230
00:48:17,109 --> 00:48:15,359
back to the start when eric davis was

1231
00:48:20,950 --> 00:48:17,119
quoted as saying off-world freaking

1232
00:48:22,870 --> 00:48:20,960
vehicles you know

1233
00:48:23,829 --> 00:48:22,880
chris mellon backs it up

1234
00:48:26,069 --> 00:48:23,839
you know

1235
00:48:28,230 --> 00:48:26,079
lou says the guy couldn't tell a lie

1236
00:48:29,670 --> 00:48:28,240
everybody backs this guy up

1237
00:48:32,710 --> 00:48:29,680
so like

1238
00:48:35,030 --> 00:48:32,720

that has to be enough and could be what

1239

00:48:38,230 --> 00:48:35,040

is propelling a lot of this action but

1240

00:48:41,030 --> 00:48:38,240

that has to be enough to point someone

1241

00:48:42,309 --> 00:48:41,040

uh to action you know in in the right

1242

00:48:44,470 --> 00:48:42,319

place

1243

00:48:46,549 --> 00:48:44,480

and enough to get language like this

1244

00:48:48,870 --> 00:48:46,559

passed and enough to get hearings done

1245

00:48:50,790 --> 00:48:48,880

and all that because i mean you're right

1246

00:48:53,270 --> 00:48:50,800

skip all the nonsense go right to the

1247

00:48:55,589 --> 00:48:53,280

vehicles right like

1248

00:48:57,750 --> 00:48:55,599

show us the stuff man

1249

00:49:00,470 --> 00:48:57,760

like if you bring one of those out it's

1250

00:49:03,030 --> 00:49:00,480

over you know

1251

00:49:04,390 --> 00:49:03,040

well and sean

1252

00:49:05,750 --> 00:49:04,400

you just triggered something in me i

1253

00:49:06,790 --> 00:49:05,760

think it's also important that we

1254

00:49:09,190 --> 00:49:06,800

remember

1255

00:49:11,589 --> 00:49:09,200

there's a high likelihood that some

1256

00:49:14,069 --> 00:49:11,599

friendly faces are guiding this like the

1257

00:49:16,069 --> 00:49:14,079

this legislation they get emails and

1258

00:49:18,230 --> 00:49:16,079

have meetings and i'm one of the people

1259

00:49:20,790 --> 00:49:18,240

that used to do the emails you know and

1260

00:49:22,309 --> 00:49:20,800

try to guide things so i know people who

1261

00:49:24,950 --> 00:49:22,319

are much more intelligent about these

1262

00:49:27,910 --> 00:49:24,960

things than i am are absolutely in

1263

00:49:30,630 --> 00:49:27,920

contact and i find it interesting that

1264

00:49:32,710 --> 00:49:30,640

someone i i do not believe that rep

1265

00:49:34,710 --> 00:49:32,720

gallagher found out about the wilson

1266

00:49:38,950 --> 00:49:34,720

davis memo on his own

1267

00:49:40,710 --> 00:49:38,960

and i find it very very interesting that

1268

00:49:42,950 --> 00:49:40,720

we have these kind of parallel

1269

00:49:44,309 --> 00:49:42,960

situations happening where the wilson

1270

00:49:46,950 --> 00:49:44,319

davis memo was entered into the

1271

00:49:49,030 --> 00:49:46,960

congressional record a month ago

1272

00:49:51,430 --> 00:49:49,040

right and all of a sudden we have this

1273

00:49:53,750 --> 00:49:51,440

immunity language i think that we have

1274

00:49:55,990 --> 00:49:53,760

to look at this step back for a second

1275

00:49:58,230 --> 00:49:56,000

of what's going on behind the scenes

1276

00:49:59,829 --> 00:49:58,240

because there might be some connections

1277

00:50:02,150 --> 00:49:59,839

well it depends who you ask because some

1278

00:50:04,069 --> 00:50:02,160

people would say that ufo twitter's

1279

00:50:07,430 --> 00:50:04,079

you know bizarre theories are driving

1280

00:50:11,270 --> 00:50:08,870

i wish no

1281

00:50:12,950 --> 00:50:11,280

actually no i don't wish

1282

00:50:14,549 --> 00:50:12,960

is just watching twitter he's like oh

1283

00:50:17,750 --> 00:50:14,559

man we got to get immunity going that

1284

00:50:19,589 --> 00:50:17,760

sean guys said there's probably programs

1285

00:50:20,309 --> 00:50:19,599

they're totally going up yeah

1286

00:50:26,630 --> 00:50:20,319

no

1287

00:50:27,670 --> 00:50:26,640

i was just thinking earlier today like

1288

00:50:29,589 --> 00:50:27,680

uh

1289

00:50:31,589 --> 00:50:29,599

they obviously have some idea of who

1290

00:50:33,349 --> 00:50:31,599

would be willing to come forward and

1291

00:50:35,349 --> 00:50:33,359

talk you know before they go ahead and

1292

00:50:37,109 --> 00:50:35,359

do all this work of making this language

1293

00:50:39,109 --> 00:50:37,119

because you know that's not an easy

1294

00:50:41,750 --> 00:50:39,119

thing to do like uh

1295

00:50:43,349 --> 00:50:41,760

absolutely it's uh bureaucracy is

1296

00:50:44,309 --> 00:50:43,359

difficult

1297

00:50:45,030 --> 00:50:44,319

yeah

1298

00:50:48,549 --> 00:50:45,040

and

1299

00:50:50,790 --> 00:50:48,559

chris made

1300

00:50:52,950 --> 00:50:50,800

in his recent article chris you

1301
00:50:54,549 --> 00:50:52,960
you pointed out the trans-medium

1302
00:50:56,230 --> 00:50:54,559
language that's that's been kind of

1303
00:50:58,069 --> 00:50:56,240
floating around and making it into

1304
00:50:59,750 --> 00:50:58,079
things and that that yeah certainly

1305
00:51:01,430 --> 00:50:59,760
doesn't seem like it's it's because

1306
00:51:03,910 --> 00:51:01,440
people are reading ufo twitter and know

1307
00:51:06,230 --> 00:51:03,920
about like say leaked phone calls from

1308
00:51:08,470 --> 00:51:06,240
kit green or whatever it's probably it's

1309
00:51:09,670 --> 00:51:08,480
probably from somewhere else um do you

1310
00:51:11,990 --> 00:51:09,680
have anything that you'd like to say

1311
00:51:13,589 --> 00:51:12,000
about that kind of trans medium language

1312
00:51:15,109 --> 00:51:13,599
uh yes

1313
00:51:19,030 --> 00:51:15,119

i mean if you look at the definition of

1314

00:51:20,630 --> 00:51:19,040

like um uap within the ndaa 2022s it

1315

00:51:24,150 --> 00:51:20,640

does kind of clearly state that it is

1316

00:51:26,950 --> 00:51:24,160

trans medium however changing it to

1317

00:51:29,190 --> 00:51:26,960

explicitly reference trans medium is a

1318

00:51:32,870 --> 00:51:29,200

step forward in terms of kind of like

1319

00:51:34,950 --> 00:51:32,880

public awareness education of what

1320

00:51:36,309 --> 00:51:34,960

what we're dealing with and also i think

1321

00:51:38,549 --> 00:51:36,319

just kind of like helping people come

1322

00:51:39,750 --> 00:51:38,559

forward as well like you know say that

1323

00:51:41,670 --> 00:51:39,760

um

1324

00:51:44,150 --> 00:51:41,680

you can see something going to the ocean

1325

00:51:45,990 --> 00:51:44,160

oh that's not um a uap because it's not

1326

00:51:48,549 --> 00:51:46,000

aerial oh no but we're dealing with

1327

00:51:50,710 --> 00:51:48,559

trans medium now so oh perhaps it is

1328

00:51:51,750 --> 00:51:50,720

perhaps i should report that as a kind

1329

00:51:54,549 --> 00:51:51,760

of like

1330

00:51:56,150 --> 00:51:54,559

transgender cool um so stuff like that i

1331

00:51:57,990 --> 00:51:56,160

think just like makes a difference

1332

00:51:59,910 --> 00:51:58,000

although kind of like it's a

1333

00:52:01,670 --> 00:51:59,920

technicality in terms of what's

1334

00:52:04,390 --> 00:52:01,680

implicitly mentioned as a definition

1335

00:52:06,069 --> 00:52:04,400

within nda 2022 i think it really really

1336

00:52:09,829 --> 00:52:06,079

helps move the ball forwards as well to

1337

00:52:10,950 --> 00:52:09,839

get it clear what a uap actually is um

1338

00:52:12,710 --> 00:52:10,960

so i think

1339

00:52:14,790 --> 00:52:12,720

trans media phenomena would be my

1340

00:52:17,190 --> 00:52:14,800

favorite but i don't know we'll see what

1341

00:52:19,030 --> 00:52:17,200

language um they come up with at the

1342

00:52:20,230 --> 00:52:19,040

moment they've got kind of like language

1343

00:52:20,870 --> 00:52:20,240

which i think

1344

00:52:25,270 --> 00:52:20,880

in

1345

00:52:26,950 --> 00:52:25,280

like that so aerospace

1346

00:52:29,030 --> 00:52:26,960

and space

1347

00:52:30,390 --> 00:52:29,040

and that that language really

1348

00:52:33,670 --> 00:52:30,400

um

1349

00:52:35,190 --> 00:52:33,680

gives corbell's story a lot more weight

1350

00:52:37,030 --> 00:52:35,200

doesn't it like

1351
00:52:39,670 --> 00:52:37,040
he's the one who kind of really brought

1352
00:52:41,030 --> 00:52:39,680
the trans medium i mean not solely but

1353
00:52:42,950 --> 00:52:41,040
he was one of the people who brought the

1354
00:52:46,230 --> 00:52:42,960
whole trans medium thing to the

1355
00:52:47,270 --> 00:52:46,240
foreground with his uh you know videos

1356
00:52:50,309 --> 00:52:47,280
and

1357
00:52:52,950 --> 00:52:50,319
the sphere going into the water right

1358
00:52:55,270 --> 00:52:52,960
and the reports of witnesses um talking

1359
00:52:57,430 --> 00:52:55,280
about transmedium right and language

1360
00:52:59,589 --> 00:52:57,440
like this gets passed and is in the ndaa

1361
00:53:01,750 --> 00:52:59,599
and yet people still come out and say

1362
00:53:03,589 --> 00:53:01,760
he's full of it

1363
00:53:05,349 --> 00:53:03,599

absolutely i think

1364

00:53:07,270 --> 00:53:05,359

there's misconceptions about jeremy you

1365

00:53:08,790 --> 00:53:07,280

know i work quite closely with him on

1366

00:53:10,710 --> 00:53:08,800

that story getting that story out which

1367

00:53:12,309 --> 00:53:10,720

is very very important i think in terms

1368

00:53:14,230 --> 00:53:12,319

of that story is just there's just more

1369

00:53:15,990 --> 00:53:14,240

questions and there are answers like

1370

00:53:18,069 --> 00:53:16,000

jeremy isn't turning around saying oh

1371

00:53:20,549 --> 00:53:18,079

it's definitely kind of like um trans

1372

00:53:22,309 --> 00:53:20,559

medium um uap or anything like that he's

1373

00:53:25,430 --> 00:53:22,319

just like questions you know okay why

1374

00:53:27,270 --> 00:53:25,440

did they um say it was um you know

1375

00:53:29,990 --> 00:53:27,280

drones for instance okay we've got

1376

00:53:31,750 --> 00:53:30,000

sources on record saying actually

1377

00:53:34,069 --> 00:53:31,760

looking back at it perhaps that wasn't

1378

00:53:36,710 --> 00:53:34,079

the way to go about in terms of defining

1379

00:53:39,430 --> 00:53:36,720

it um because we couldn't

1380

00:53:42,390 --> 00:53:39,440

definitely say they were drones um the

1381

00:53:44,710 --> 00:53:42,400

thing that was missing was origin um so

1382

00:53:46,470 --> 00:53:44,720

the bass straight which was of being

1383

00:53:48,390 --> 00:53:46,480

kind of like the origin

1384

00:53:49,589 --> 00:53:48,400

i've got on good information they

1385

00:53:51,430 --> 00:53:49,599

searched that and they didn't find

1386

00:53:53,270 --> 00:53:51,440

a single drone on that ship

1387

00:53:57,030 --> 00:53:53,280

it wouldn't have been hard it was

1388

00:54:01,910 --> 00:53:57,040

dr by long long beach red or what was it

1389

00:54:04,950 --> 00:54:01,920

yeah yes i think i think during um

1390

00:54:06,470 --> 00:54:04,960

during a large portion of the harassment

1391

00:54:07,670 --> 00:54:06,480

of us

1392

00:54:09,750 --> 00:54:07,680

maybe ships

1393

00:54:12,230 --> 00:54:09,760

that ship was adopted in yeah at long

1394

00:54:14,069 --> 00:54:12,240

beach so it couldn't be i don't know we

1395

00:54:15,750 --> 00:54:14,079

should search that that's kind of tough

1396

00:54:18,630 --> 00:54:15,760

you know it's right

1397

00:54:21,589 --> 00:54:18,640

we can just it's right by us uh

1398

00:54:24,710 --> 00:54:21,599

you know let's just blame it on the ship

1399

00:54:26,870 --> 00:54:24,720

but not search it yeah absolutely yeah

1400

00:54:28,230 --> 00:54:26,880

and uh i think we just got like

1401

00:54:29,990 --> 00:54:28,240

lots of questions

1402

00:54:31,589 --> 00:54:30,000

in terms of that

1403

00:54:34,150 --> 00:54:31,599

i'm very very wary of people who that

1404

00:54:35,670 --> 00:54:34,160

who make definitive conclusions it's

1405

00:54:37,349 --> 00:54:35,680

kind of like actually one's gonna have

1406

00:54:39,349 --> 00:54:37,359

all the answers and i think what we want

1407

00:54:41,829 --> 00:54:39,359

to really get across that's true is that

1408

00:54:43,750 --> 00:54:41,839

there are more questions to answer in

1409

00:54:45,990 --> 00:54:43,760

terms of that and i asked

1410

00:54:47,990 --> 00:54:46,000

the pentagon i said look can you confirm

1411

00:54:50,470 --> 00:54:48,000

where the origin of the so-called drones

1412

00:54:54,069 --> 00:54:50,480

were they can't do that they said that

1413

00:54:56,309 --> 00:54:54,079

to me so still um still an open story

1414

00:54:57,349 --> 00:54:56,319

but i wouldn't i wouldn't kind of like

1415

00:54:59,270 --> 00:54:57,359

um

1416

00:55:00,710 --> 00:54:59,280

i wouldn't put all my money behind this

1417

00:55:02,870 --> 00:55:00,720

story and say it's definitely kind of

1418

00:55:05,030 --> 00:55:02,880

like trans medium ufos it's just one of

1419

00:55:07,109 --> 00:55:05,040

it's just a good example of kind of like

1420

00:55:08,710 --> 00:55:07,119

a case where they've got plenty of kind

1421

00:55:11,510 --> 00:55:08,720

of information out there but they're

1422

00:55:13,670 --> 00:55:11,520

still unable to determine the origin of

1423

00:55:14,950 --> 00:55:13,680

the craft and that's quite completely

1424

00:55:17,109 --> 00:55:14,960

for that

1425

00:55:19,270 --> 00:55:17,119

that is being honest what uh drives a

1426

00:55:21,589 --> 00:55:19,280

lot of the secrecy like the last thing

1427

00:55:23,910 --> 00:55:21,599

that the the you know the military

1428

00:55:24,950 --> 00:55:23,920

establishments wants to admit is that

1429

00:55:27,670 --> 00:55:24,960

there's

1430

00:55:29,829 --> 00:55:27,680

um you know applying objects transmedium

1431

00:55:31,829 --> 00:55:29,839

objects that they can't identify going

1432

00:55:33,750 --> 00:55:31,839

in their restricted airspace whether

1433

00:55:35,589 --> 00:55:33,760

it's a drone or not they don't want to

1434

00:55:38,309 --> 00:55:35,599

admit that to people you know because

1435

00:55:39,990 --> 00:55:38,319

that's a huge vulnerability like uh was

1436

00:55:43,750 --> 00:55:40,000

some of the documents i posted not too

1437

00:55:46,069 --> 00:55:43,760

long ago was back in 1952 yeah but um

1438

00:55:47,990 --> 00:55:46,079

you know it said in

1439

00:55:50,069 --> 00:55:48,000

the air force's paperwork and their very

1440

00:55:51,510 --> 00:55:50,079

own words and their administrative

1441

00:55:54,309 --> 00:55:51,520

paperwork that they could only

1442

00:55:56,150 --> 00:55:54,319

positively identify seven percent

1443

00:55:57,670 --> 00:55:56,160

you know but that's not what they tell

1444

00:55:59,430 --> 00:55:57,680

the public they don't go and say oh no

1445

00:56:02,630 --> 00:55:59,440

we can only positively identify seven

1446

00:56:04,710 --> 00:56:02,640

percent of these now they say that 20

1447

00:56:06,390 --> 00:56:04,720

remain unidentified because the rest

1448

00:56:10,789 --> 00:56:06,400

they have to guess

1449

00:56:12,390 --> 00:56:10,799

balloon or probably balloon yada yada

1450

00:56:14,230 --> 00:56:12,400

you know and that's exactly what they're

1451

00:56:16,870 --> 00:56:14,240

doing here with these drones

1452

00:56:20,309 --> 00:56:16,880

you know or the uavs or ufos with the

1453

00:56:23,910 --> 00:56:20,319

2019 events they're putting together

1454

00:56:25,430 --> 00:56:23,920

probables you know based on uh prosaic

1455

00:56:29,510 --> 00:56:25,440

answers right

1456

00:56:32,069 --> 00:56:29,520

that is probably a uav probable drone

1457

00:56:33,190 --> 00:56:32,079

you know but what they're not saying

1458

00:56:34,390 --> 00:56:33,200

which is

1459

00:56:36,309 --> 00:56:34,400

what they're really afraid to say

1460

00:56:38,470 --> 00:56:36,319

because it makes them vulnerable is we

1461

00:56:40,150 --> 00:56:38,480

can't positively identify it we don't

1462

00:56:43,270 --> 00:56:40,160

know

1463

00:56:45,829 --> 00:56:43,280

absolutely that is the crux you can't

1464

00:56:47,750 --> 00:56:45,839

they're unable to positively identify

1465

00:56:49,510 --> 00:56:47,760

what's going on and i think a key part

1466

00:56:51,030 --> 00:56:49,520

of this as well and in terms of the

1467

00:56:52,390 --> 00:56:51,040

trans medium language is actually having

1468

00:56:55,030 --> 00:56:52,400

a joined up approach you know like

1469

00:56:57,589 --> 00:56:55,040

you're a sailor you see something um go

1470

00:56:59,750 --> 00:56:57,599

into the water um it just came from the

1471

00:57:01,430 --> 00:56:59,760

sky okay then you need space command

1472

00:57:03,270 --> 00:57:01,440

space force to curve like feeding did

1473

00:57:04,950 --> 00:57:03,280

they track anything coming in did the

1474

00:57:08,630 --> 00:57:04,960

air force see anything coming to the

1475

00:57:11,349 --> 00:57:08,640

atmosphere okay and then we go to um no

1476

00:57:15,589 --> 00:57:11,359

is it noah um

1477

00:57:18,069 --> 00:57:15,599

um the oceanic agency oceanic people see

1478

00:57:20,630 --> 00:57:18,079

um and also the us navy as well in terms

1479

00:57:23,109 --> 00:57:20,640

of its submarine um sensors under water

1480

00:57:25,109 --> 00:57:23,119

sensors so okay so

1481

00:57:26,870 --> 00:57:25,119

just need that

1482

00:57:29,829 --> 00:57:26,880

and that takes four months to do all

1483

00:57:34,150 --> 00:57:30,710

yeah

1484

00:57:36,069 --> 00:57:34,160

and i i think that's another qualm of um

1485

00:57:38,309 --> 00:57:36,079

politicians as well you need that joined

1486

00:57:40,630 --> 00:57:38,319

up approach and it needs to be done more

1487

00:57:42,309 --> 00:57:40,640

efficiently um there needs to be good

1488

00:57:44,870 --> 00:57:42,319

communication going on there and there

1489

00:57:47,589 --> 00:57:44,880

needs to be kind of like an operator

1490

00:57:49,750 --> 00:57:47,599

get that going a vehicle you know so um

1491

00:57:51,990 --> 00:57:49,760

yeah it needs to be a lot quicker i

1492

00:57:54,309 --> 00:57:52,000

think and um i think katie you're pretty

1493

00:57:55,510 --> 00:57:54,319

aware of the inefficiencies and time it

1494

00:57:57,670 --> 00:57:55,520

takes things to get done in a

1495

00:57:59,829 --> 00:57:57,680

bureaucracy

1496

00:58:01,910 --> 00:57:59,839

unfortunately so

1497

00:58:03,589 --> 00:58:01,920

yeah i worked on a joint army navy

1498

00:58:05,990 --> 00:58:03,599

program and anytime you have more than

1499

00:58:08,230 --> 00:58:06,000

one branch or more than one agency just

1500

00:58:10,710 --> 00:58:08,240

be prepared for if you thought dmv

1501
00:58:12,549 --> 00:58:10,720
bureaucracy was bad try doubling it

1502
00:58:14,309 --> 00:58:12,559
right and that's every time you add a

1503
00:58:17,190 --> 00:58:14,319
new player

1504
00:58:18,950 --> 00:58:17,200
yeah that's extraordinary now it is the

1505
00:58:20,789 --> 00:58:18,960
first that you just brought up something

1506
00:58:22,950 --> 00:58:20,799
just by having a little crosstalk there

1507
00:58:25,349 --> 00:58:22,960
is that you two haven't as we said you

1508
00:58:28,950 --> 00:58:25,359
two haven't had a conversation like this

1509
00:58:30,710 --> 00:58:28,960
uh before right just a couple dm's so um

1510
00:58:33,190 --> 00:58:30,720
it'd also be cool to throw a wild card

1511
00:58:34,549 --> 00:58:33,200
in there of uh do you have any questions

1512
00:58:36,069 --> 00:58:34,559
for each other or anything that you'd

1513
00:58:38,150 --> 00:58:36,079

like to say to each other chris and

1514

00:58:39,589 --> 00:58:38,160

katie

1515

00:58:42,390 --> 00:58:39,599

i i just want to say

1516

00:58:44,870 --> 00:58:42,400

um i think it goes about saying i i just

1517

00:58:46,230 --> 00:58:44,880

said ma like everything you you've done

1518

00:58:48,789 --> 00:58:46,240

and um

1519

00:58:52,390 --> 00:58:48,799

i i i want to ask how did you get into

1520

00:58:54,150 --> 00:58:52,400

this um topic i know that you

1521

00:58:55,829 --> 00:58:54,160

i think you said you had an interview or

1522

00:58:57,829 --> 00:58:55,839

something with uh with melon at one

1523

00:58:59,750 --> 00:58:57,839

point or there was some kind of meeting

1524

00:59:01,589 --> 00:58:59,760

that he was in and you were in i thought

1525

00:59:04,870 --> 00:59:01,599

that quite interesting yeah

1526

00:59:08,549 --> 00:59:04,880

yeah so um most people found out about

1527

00:59:11,109 --> 00:59:08,559

me because i arranged a private event

1528

00:59:13,190 --> 00:59:11,119

with chris mellon to come speak to

1529

00:59:15,349 --> 00:59:13,200

um basically a foreign policy fellowship

1530

00:59:17,510 --> 00:59:15,359

i'm a part of um

1531

00:59:18,950 --> 00:59:17,520

but i found out about it because i

1532

00:59:20,470 --> 00:59:18,960

was a

1533

00:59:23,030 --> 00:59:20,480

foreign policy volunteer on the biting

1534

00:59:26,870 --> 00:59:23,040

campaign um i interned for him way back

1535

00:59:28,950 --> 00:59:26,880

back in the day um and

1536

00:59:30,549 --> 00:59:28,960

yeah we were given the opportunity to

1537

00:59:31,990 --> 00:59:30,559

meet with a lot of like senior officials

1538

00:59:34,230 --> 00:59:32,000

as kind of like professional development

1539

00:59:35,910 --> 00:59:34,240

and one of them was john podesta who

1540

00:59:37,750 --> 00:59:35,920

obviously had his own thoughts and

1541

00:59:39,589 --> 00:59:37,760

feelings and recommended leslie kane's

1542

00:59:42,230 --> 00:59:39,599

ufo's book and that's kind of how i dove

1543

00:59:43,910 --> 00:59:42,240

in and i was really frustrated because

1544

00:59:46,789 --> 00:59:43,920

you know i've worked

1545

00:59:50,470 --> 00:59:46,799

tangentially to this national security

1546

00:59:52,549 --> 00:59:50,480

field for my you know a decade now and

1547

00:59:53,349 --> 00:59:52,559

all of my friends are people who are

1548

00:59:55,030 --> 00:59:53,359

like

1549

00:59:57,190 --> 00:59:55,040

constantly talking about this kind of

1550

00:59:59,109 --> 00:59:57,200

stuff and anytime i would bring it up it

1551
01:00:01,270 --> 00:59:59,119
was just crickets and i was getting

1552
01:00:03,190 --> 01:00:01,280
really annoyed and so i basically said

1553
01:00:04,950 --> 01:00:03,200
okay well then i'm gonna force you guys

1554
01:00:06,630 --> 01:00:04,960
to listen to christopher mellon because

1555
01:00:09,589 --> 01:00:06,640
maybe you'll listen to him because he

1556
01:00:11,750 --> 01:00:09,599
has an impressive title and whatnot so

1557
01:00:14,470 --> 01:00:11,760
um i basically harassed chris mellon on

1558
01:00:16,870 --> 01:00:14,480
linkedin until he agreed to be friends

1559
01:00:19,589 --> 01:00:16,880
with me um which is kind of my approach

1560
01:00:20,789 --> 01:00:19,599
in life in general so that's how i ended

1561
01:00:23,829 --> 01:00:20,799
up here

1562
01:00:24,630 --> 01:00:23,839
um but yeah no honestly chris like i'm

1563
01:00:27,109 --> 01:00:24,640

just

1564

01:00:28,549 --> 01:00:27,119

it ditto to you man i'm so impressed

1565

01:00:32,230 --> 01:00:28,559

with what you do i mean you literally

1566

01:00:33,510 --> 01:00:32,240

created your own reporting um

1567

01:00:35,430 --> 01:00:33,520

uh

1568

01:00:36,789 --> 01:00:35,440

venued because this wasn't getting

1569

01:00:38,870 --> 01:00:36,799

enough coverage i mean i don't think

1570

01:00:42,470 --> 01:00:38,880

people realize how much work

1571

01:00:44,150 --> 01:00:42,480

goes into that um day in and day out i

1572

01:00:46,150 --> 01:00:44,160

ran my own nonprofit for a while and i

1573

01:00:48,390 --> 01:00:46,160

know that like it's not a nine to five

1574

01:00:50,549 --> 01:00:48,400

you're never off the clock so just

1575

01:00:52,710 --> 01:00:50,559

massive appreciation to you and what

1576

01:00:54,789 --> 01:00:52,720

you're doing keep it up and i'm so happy

1577

01:00:56,950 --> 01:00:54,799

to finally put a face

1578

01:00:59,430 --> 01:00:56,960

live to the name

1579

01:01:01,829 --> 01:00:59,440

oh thank you thank you so much i really

1580

01:01:04,069 --> 01:01:01,839

appreciate it i had another question

1581

01:01:06,150 --> 01:01:04,079

actually what's the um relationship

1582

01:01:09,190 --> 01:01:06,160

between like john podesta

1583

01:01:12,150 --> 01:01:09,200

and joe biden and how do you think

1584

01:01:13,750 --> 01:01:12,160

um joe biden would approach this issue

1585

01:01:15,670 --> 01:01:13,760

are you able to like read into it just

1586

01:01:16,549 --> 01:01:15,680

from his character

1587

01:01:18,309 --> 01:01:16,559

so

1588

01:01:21,030 --> 01:01:18,319

i mean i don't know much much about

1589

01:01:22,789 --> 01:01:21,040

podesta i know that um i mean obviously

1590

01:01:24,870 --> 01:01:22,799

he was like white house chief of staff

1591

01:01:26,630 --> 01:01:24,880

in the clinton era

1592

01:01:28,710 --> 01:01:26,640

and so he was very deeply enmeshed in

1593

01:01:30,549 --> 01:01:28,720

the clinton world the biting campaign

1594

01:01:32,950 --> 01:01:30,559

their foreign policy volunteers were

1595

01:01:34,630 --> 01:01:32,960

basically a mixture of people who were

1596

01:01:37,030 --> 01:01:34,640

like really high up like that but

1597

01:01:39,190 --> 01:01:37,040

couldn't quit their jobs to like join

1598

01:01:42,309 --> 01:01:39,200

the campaign and then people

1599

01:01:44,390 --> 01:01:42,319

you know much much different like me who

1600

01:01:46,069 --> 01:01:44,400

you know maybe had worked on other

1601
01:01:48,390 --> 01:01:46,079
competitors campaigns and were trying to

1602
01:01:49,750 --> 01:01:48,400
kind of cohesively contribute and rally

1603
01:01:51,670 --> 01:01:49,760
around the nominee

1604
01:01:54,789 --> 01:01:51,680
um so i really can't speak much to

1605
01:01:56,069 --> 01:01:54,799
podesta um in terms of

1606
01:01:57,670 --> 01:01:56,079
joe

1607
01:02:00,230 --> 01:01:57,680
i would say that the biggest thing to

1608
01:02:03,270 --> 01:02:00,240
understand about him is he's very

1609
01:02:05,430 --> 01:02:03,280
he has a lot of respect for senate norms

1610
01:02:09,510 --> 01:02:05,440
and procedures and processes right he

1611
01:02:12,270 --> 01:02:09,520
spent 30 years in the senate um and so

1612
01:02:16,309 --> 01:02:12,280
he's going to take things very

1613
01:02:18,829 --> 01:02:16,319

procedurally based um which i think is

1614

01:02:21,109 --> 01:02:18,839

reflective of how we're going in in

1615

01:02:23,990 --> 01:02:21,119

congress um

1616

01:02:24,710 --> 01:02:24,000

however he also has a wild streak i mean

1617

01:02:37,750 --> 01:02:24,720

i

1618

01:02:39,029 --> 01:02:37,760

speeches because you would

1619

01:02:40,950 --> 01:02:39,039

we would write

1620

01:02:43,270 --> 01:02:40,960

well not me but the speechwriters would

1621

01:02:45,510 --> 01:02:43,280

write a speech for him and then he'd go

1622

01:02:47,750 --> 01:02:45,520

and just start spewing off you know the

1623

01:02:49,190 --> 01:02:47,760

unemployment rate in some small town and

1624

01:02:51,430 --> 01:02:49,200

the top employers and this and that and

1625

01:02:53,750 --> 01:02:51,440

you'd have all of us going no no no stay

1626

01:02:55,750 --> 01:02:53,760

on script and then we'd check it and

1627

01:02:58,069 --> 01:02:55,760

he'd be right it was just like this wild

1628

01:03:00,549 --> 01:02:58,079

thing the man has an encyclopedic

1629

01:03:01,829 --> 01:03:00,559

memory um so

1630

01:03:03,430 --> 01:03:01,839

you know i think it's really going to

1631

01:03:06,470 --> 01:03:03,440

depend on

1632

01:03:08,309 --> 01:03:06,480

if he can get enough advisors who are

1633

01:03:11,270 --> 01:03:08,319

just constantly pushing this in front of

1634

01:03:13,910 --> 01:03:11,280

him um so i look at who's on the nsc

1635

01:03:15,510 --> 01:03:13,920

which kind of rotates um basically

1636

01:03:18,549 --> 01:03:15,520

people are detailed from other agencies

1637

01:03:19,990 --> 01:03:18,559

so you'll have cia folks dod folks and

1638

01:03:21,829 --> 01:03:20,000

they kind of rotate in and out on a

1639

01:03:23,589 --> 01:03:21,839

yearly basis so i'd pay attention to

1640

01:03:25,589 --> 01:03:23,599

that and i think that would probably be

1641

01:03:27,750 --> 01:03:25,599

your biggest indicator of where things

1642

01:03:29,589 --> 01:03:27,760

will go at the presidential level

1643

01:03:31,510 --> 01:03:29,599

i think the national security council

1644

01:03:33,910 --> 01:03:31,520

probably has a lot more to do with this

1645

01:03:37,510 --> 01:03:33,920

stuff than we'd imagine if you were to

1646

01:03:38,950 --> 01:03:37,520

ask me i know it's a long way from 1953

1647

01:03:41,589 --> 01:03:38,960

but uh

1648

01:03:42,549 --> 01:03:41,599

they had a huge hand in the roberts

1649

01:03:45,029 --> 01:03:42,559

panel

1650

01:03:46,069 --> 01:03:45,039

in initiating that secrecy to begin with

1651
01:03:47,670 --> 01:03:46,079
so

1652
01:03:49,829 --> 01:03:47,680
who knows

1653
01:03:51,109 --> 01:03:49,839
but uh that's a that's a lot of leaders

1654
01:03:54,069 --> 01:03:51,119
from a lot of different departments

1655
01:04:07,349 --> 01:03:56,069
but yeah so

1656
01:04:10,150 --> 01:04:08,950
people are watching like wait have i

1657
01:04:10,829 --> 01:04:10,160
frozen

1658
01:04:18,150 --> 01:04:10,839
no

1659
01:04:20,309 --> 01:04:18,160
[Laughter]

1660
01:04:21,829 --> 01:04:20,319
that's good that's a good one

1661
01:04:24,470 --> 01:04:21,839
i think that had more to do with pbs

1662
01:04:25,430 --> 01:04:24,480
than nasa but it could be wrong

1663
01:04:26,630 --> 01:04:25,440

yeah

1664

01:04:27,910 --> 01:04:26,640

sure

1665

01:04:30,870 --> 01:04:27,920

um

1666

01:04:32,630 --> 01:04:30,880

do you have any questions sean for for

1667

01:04:35,270 --> 01:04:32,640

chris and katie i just want to thank you

1668

01:04:38,870 --> 01:04:35,280

both for coming on i mean you two are

1669

01:04:41,910 --> 01:04:38,880

very valuable um uh people in this

1670

01:04:43,670 --> 01:04:41,920

community and in this push for

1671

01:04:45,190 --> 01:04:43,680

disclosure

1672

01:04:47,190 --> 01:04:45,200

and um

1673

01:04:50,390 --> 01:04:47,200

you know we'd be lost without you you

1674

01:04:53,349 --> 01:04:50,400

know i can only make wisecracks so long

1675

01:04:55,510 --> 01:04:53,359

until we need the smart people to come

1676

01:04:58,150 --> 01:04:55,520

and help out

1677

01:05:00,309 --> 01:04:58,160

you know i really really appreciative of

1678

01:05:02,630 --> 01:05:00,319

you two doing that um i think you're

1679

01:05:04,630 --> 01:05:02,640

brilliant and bring a lot to the table

1680

01:05:06,470 --> 01:05:04,640

and i'm just so grateful that you took

1681

01:05:07,510 --> 01:05:06,480

time out of your day to spend it with

1682

01:05:08,549 --> 01:05:07,520

jay and i

1683

01:05:10,870 --> 01:05:08,559

so yeah

1684

01:05:14,309 --> 01:05:10,880

absolutely completely agreed you you're

1685

01:05:16,309 --> 01:05:14,319

both uh super inspiring i mean uh katie

1686

01:05:18,549 --> 01:05:16,319

was what uh the colin initiative just

1687

01:05:21,029 --> 01:05:18,559

this week that's absolutely incredible

1688

01:05:23,910 --> 01:05:21,039

and uh and chris the recent series of

1689

01:05:26,470 --> 01:05:23,920

articles are absolutely astonishing and

1690

01:05:28,630 --> 01:05:26,480

it's really great to see uh how you're

1691

01:05:29,430 --> 01:05:28,640

helping to push the conversation forward

1692

01:05:34,230 --> 01:05:29,440

um

1693

01:05:37,190 --> 01:05:34,240

next for katie howland and what's up

1694

01:05:41,430 --> 01:05:37,200

next for chris sharp

1695

01:05:43,109 --> 01:05:41,440

what's up next well i

1696

01:05:46,390 --> 01:05:43,119

i'm looking forward to the senate

1697

01:05:48,710 --> 01:05:46,400

language uh expect some more annoying

1698

01:05:50,630 --> 01:05:48,720

calls for me to make more annoying calls

1699

01:05:53,349 --> 01:05:50,640

to your potentially annoying members of

1700

01:05:54,789 --> 01:05:53,359

congress no i'm just kidding um

1701
01:05:56,710 --> 01:05:54,799
yeah so i'm looking forward to that and

1702
01:05:58,710 --> 01:05:56,720
then personally

1703
01:06:01,109 --> 01:05:58,720
i have to go take my dog for a walk

1704
01:06:03,430 --> 01:06:01,119
because she's being a needy little drama

1705
01:06:04,950 --> 01:06:03,440
queen

1706
01:06:08,549 --> 01:06:04,960
that's what's going on for me in my

1707
01:06:13,109 --> 01:06:09,589
hello

1708
01:06:15,270 --> 01:06:13,119
yeah yeah i've got a um an incoming

1709
01:06:18,150 --> 01:06:15,280
story but it's dependent on when susan

1710
01:06:19,430 --> 01:06:18,160
goff's going to respond to me um won't

1711
01:06:20,950 --> 01:06:19,440
give away any details at the moment

1712
01:06:23,430 --> 01:06:20,960
until this will confirm but that should

1713
01:06:24,950 --> 01:06:23,440

be quite cool um

1714

01:06:27,430 --> 01:06:24,960

and then i've got and that will be a

1715

01:06:29,430 --> 01:06:27,440

liberation client's piece um and then

1716

01:06:30,950 --> 01:06:29,440

i've got like a big story that i'm

1717

01:06:34,150 --> 01:06:30,960

working like a big project kind of like

1718

01:06:36,069 --> 01:06:34,160

history um the daily mail um

1719

01:06:38,069 --> 01:06:36,079

again i can't go into any details

1720

01:06:40,630 --> 01:06:38,079

apologies but um that should be pretty

1721

01:06:41,910 --> 01:06:40,640

cool when it comes out but a large part

1722

01:06:43,190 --> 01:06:41,920

of this is just verifying the

1723

01:06:44,069 --> 01:06:43,200

information

1724

01:06:46,150 --> 01:06:44,079

um

1725

01:06:47,990 --> 01:06:46,160

just in terms of the questions we need

1726

01:06:50,230 --> 01:06:48,000

to ask in terms of stories and what we

1727

01:06:52,069 --> 01:06:50,240

can answer we can't answer

1728

01:06:54,789 --> 01:06:52,079

it takes a lot of time you have to

1729

01:06:56,630 --> 01:06:54,799

verify the sources and stuff so um yeah

1730

01:06:59,029 --> 01:06:56,640

you don't verify you just throw stuff

1731

01:07:02,789 --> 01:06:59,039

out there you don't ask anybody

1732

01:07:04,870 --> 01:07:02,799

you just don't even don't just get it

1733

01:07:06,789 --> 01:07:04,880

sean don't feed the trolls please

1734

01:07:08,470 --> 01:07:06,799

just get it

1735

01:07:09,829 --> 01:07:08,480

people oh people don't realize that that

1736

01:07:11,270 --> 01:07:09,839

you put a lot of time and effort to make

1737

01:07:13,270 --> 01:07:11,280

sure what you put out is accurate and

1738

01:07:14,950 --> 01:07:13,280

time and time again it shows that it is

1739

01:07:17,349 --> 01:07:14,960

accurate just like nasa getting into the

1740

01:07:19,190 --> 01:07:17,359

uab game you posted something about that

1741

01:07:21,990 --> 01:07:19,200

i think weeks before and then lo and

1742

01:07:24,549 --> 01:07:22,000

behold here it is you know like and

1743

01:07:26,150 --> 01:07:24,559

those are reasons to to trust the things

1744

01:07:28,069 --> 01:07:26,160

you're doing and

1745

01:07:30,390 --> 01:07:28,079

look at your website and take notice

1746

01:07:31,910 --> 01:07:30,400

because you put the time in uh to make

1747

01:07:33,029 --> 01:07:31,920

sure you're putting out relevant

1748

01:07:35,670 --> 01:07:33,039

accurate

1749

01:07:37,910 --> 01:07:35,680

um and needed information

1750

01:07:40,470 --> 01:07:37,920

thank you yeah there's a lot of unwell

1751
01:07:43,029 --> 01:07:40,480
people out there and um unfortunately

1752
01:07:45,589 --> 01:07:43,039
this topic attracts a lot of people that

1753
01:07:47,029 --> 01:07:45,599
do have some complicated

1754
01:07:48,789 --> 01:07:47,039
issues and

1755
01:07:51,349 --> 01:07:48,799
sadly some of them work for national

1756
01:07:53,270 --> 01:07:51,359
publication international publications

1757
01:07:54,950 --> 01:07:53,280
and i think their employees should be

1758
01:07:57,750 --> 01:07:54,960
taking action against and the way that

1759
01:08:00,390 --> 01:07:57,760
they act on social media bullying people

1760
01:08:01,829 --> 01:08:00,400
um and in some cases perhaps looking

1761
01:08:03,510 --> 01:08:01,839
after their welfare because it seems

1762
01:08:05,190 --> 01:08:03,520
like they're unwell we weren't doing

1763
01:08:07,270 --> 01:08:05,200

many but i think you know who i'm on

1764

01:08:09,910 --> 01:08:07,280

about here can you come do a show with

1765

01:08:12,870 --> 01:08:09,920

me about uh once an hour monday through

1766

01:08:15,510 --> 01:08:12,880

friday then i may be able to

1767

01:08:17,430 --> 01:08:15,520

put my day job

1768

01:08:19,749 --> 01:08:17,440

and mental health is showing you like a

1769

01:08:22,070 --> 01:08:19,759

major issue

1770

01:08:23,510 --> 01:08:22,080

and it's savage on social media as well

1771

01:08:25,590 --> 01:08:23,520

and some people

1772

01:08:27,749 --> 01:08:25,600

representing big organizations should

1773

01:08:29,669 --> 01:08:27,759

should do better and those organizations

1774

01:08:32,149 --> 01:08:29,679

that they work for that pay them they

1775

01:08:33,829 --> 01:08:32,159

should be taking action as well and

1776

01:08:35,669 --> 01:08:33,839

disappointing when that doesn't happen

1777

01:08:37,349 --> 01:08:35,679

it's it's not okay to cheat on the

1778

01:08:41,510 --> 01:08:37,359

details just because it's something you

1779

01:08:44,390 --> 01:08:42,390

um

1780

01:08:45,749 --> 01:08:44,400

any other last words from you jay or

1781

01:08:47,510 --> 01:08:45,759

anybody else

1782

01:08:49,829 --> 01:08:47,520

i'm just really happy you both were able

1783

01:08:52,070 --> 01:08:49,839

to make it today and i'm i'm so happy to

1784

01:08:55,110 --> 01:08:52,080

see you always and it's it's great to

1785

01:08:57,590 --> 01:08:55,120

have this uh configuration this week uh

1786

01:08:59,030 --> 01:08:57,600

it's it's cool to have like uh katie

1787

01:09:02,390 --> 01:08:59,040

doing uh uh

1788

01:09:05,189 --> 01:09:02,400

have katie for a bit of a victory lap um

1789

01:09:07,430 --> 01:09:05,199

with the nba language and it's wonderful

1790

01:09:10,149 --> 01:09:07,440

to have kind of a preemptive victory lap

1791

01:09:12,149 --> 01:09:10,159

for chris for his two articles that that

1792

01:09:14,070 --> 01:09:12,159

we don't even quite uh have fully

1793

01:09:15,829 --> 01:09:14,080

fleshed out can you give us like three

1794

01:09:17,269 --> 01:09:15,839

words that are in them you don't even

1795

01:09:18,630 --> 01:09:17,279

have to tell us what they're about just

1796

01:09:31,829 --> 01:09:18,640

three words

1797

01:09:35,430 --> 01:09:34,550

and that note

1798

01:09:37,829 --> 01:09:35,440

thank you

1799

01:09:39,669 --> 01:09:37,839

dude thanks we'll do this again soon

1800

01:09:40,870 --> 01:09:39,679

thank you so much i've really enjoyed

1801

01:09:43,189 --> 01:09:40,880

this thank you

1802

01:09:45,269 --> 01:09:43,199

thank you hi guys thanks for having us

1803

01:09:46,829 --> 01:09:45,279

thank you

1804

01:09:50,309 --> 01:09:46,839

all right

1805

01:09:51,910 --> 01:09:50,319

fantastic uh what good vibes they both

1806

01:09:54,709 --> 01:09:51,920

have such good vibes

1807

01:09:56,550 --> 01:09:54,719

yeah i really really enjoy uh both those

1808

01:09:59,189 --> 01:09:56,560

individuals how are you doing man you

1809

01:10:01,350 --> 01:09:59,199

good good yeah i'm doing great i thought

1810

01:10:03,510 --> 01:10:01,360

that was a great show i love those two

1811

01:10:05,750 --> 01:10:03,520

dearly i think they're fantastic

1812

01:10:07,110 --> 01:10:05,760

additions to not only the show but the

1813

01:10:09,910 --> 01:10:07,120

community

1814

01:10:12,070 --> 01:10:09,920

um and i love talking to you and having

1815

01:10:14,310 --> 01:10:12,080

our wednesdays and doing this it's it's

1816

01:10:17,189 --> 01:10:14,320

uh the highlight of my week

1817

01:10:18,870 --> 01:10:17,199

over and over again too it's mine too i

1818

01:10:20,790 --> 01:10:18,880

i i love hanging out with you i love

1819

01:10:22,550 --> 01:10:20,800

hanging out with everybody in the chat

1820

01:10:24,709 --> 01:10:22,560

uh and to

1821

01:10:26,550 --> 01:10:24,719

to all of you in the chat uh

1822

01:10:28,709 --> 01:10:26,560

to all every anybody that's gonna be

1823

01:10:31,590 --> 01:10:28,719

watching in this in the future uh hello

1824

01:10:34,070 --> 01:10:31,600

from the past and uh we we really

1825

01:10:36,950 --> 01:10:34,080

appreciate you uh thanks for tuning in

1826

01:10:38,709 --> 01:10:36,960

and helping uh push the ball forward uh

1827

01:10:40,870 --> 01:10:38,719

continuing this conversation with us

1828

01:10:43,750 --> 01:10:40,880

it's it's super impactful and means a

1829

01:10:46,070 --> 01:10:43,760

lot to to me as well for sure it really

1830

01:10:48,390 --> 01:10:46,080

does it's the support from from y'all in

1831

01:10:50,709 --> 01:10:48,400

the chat the people that like the video

1832

01:10:52,550 --> 01:10:50,719

and watch the show and are positive

1833

01:10:55,030 --> 01:10:52,560

um with the shares and all that stuff

1834

01:10:56,950 --> 01:10:55,040

that that help us

1835

01:10:58,630 --> 01:10:56,960

um continue and stay

1836

01:11:00,950 --> 01:10:58,640

confident about what we're doing and

1837

01:11:05,430 --> 01:11:00,960

that we're bringing some value so

1838

01:11:07,910 --> 01:11:05,440

it's very important that you don't leave

1839

01:11:09,590 --> 01:11:07,920

oh yeah you continue to be positive and

1840

01:11:12,630 --> 01:11:09,600

and share it with with friends and all

1841

01:11:13,990 --> 01:11:12,640

that stuff so i really appreciate it

1842

01:11:15,510 --> 01:11:14,000

yeah so

1843

01:11:17,750 --> 01:11:15,520

yeah it's a great community that we have

1844

01:11:20,470 --> 01:11:17,760

developing here and it's only going to

1845

01:11:23,270 --> 01:11:20,480

grow over time it's awesome so yeah

1846

01:11:24,550 --> 01:11:23,280

that being said

1847

01:11:27,110 --> 01:11:24,560

we will

1848

01:11:29,189 --> 01:11:27,120

see you later see you next time

1849

01:11:31,110 --> 01:11:29,199

absolutely all right see you very soon

1850

01:11:32,550 --> 01:11:31,120

and oh and i love this outro because i

1851
01:11:34,390 --> 01:11:32,560
love the intro i assume that you're

1852
01:11:35,750 --> 01:11:34,400
going to play the same one i this is

1853
01:11:38,310 --> 01:11:35,760
like my favorite

1854
01:11:39,830 --> 01:11:38,320
it's my favorite intro outro that i

1855
01:11:43,350 --> 01:11:39,840
think that you've done so far it's so

1856
01:11:45,510 --> 01:11:43,360
good it's a twist on the intro

1857
01:11:47,430 --> 01:11:45,520
okay

1858
01:11:48,790 --> 01:11:47,440
i'm psyched you've seen it you've seen

1859
01:11:51,189 --> 01:11:48,800
it already all right

1860
01:11:54,710 --> 01:11:51,199
thanks guys thanks so much love you man

1861
01:12:06,830 --> 01:12:04,630
[Music]

1862
01:12:09,430 --> 01:12:06,840
that we think there are

1863
01:12:11,910 --> 01:12:09,440

oceans in their oceans

1864

01:12:21,189 --> 01:12:11,920

there is very likely to be life

1865

01:12:24,390 --> 01:12:23,030

with all due respect to the air force i

1866

01:12:26,630 --> 01:12:24,400

believe that some of them will prove to

1867

01:12:28,470 --> 01:12:26,640

be of interplanetary origin

1868

01:12:30,709 --> 01:12:28,480

during a three-year investigation i

1869

01:12:33,270 --> 01:12:30,719

found that many police have described

1870

01:12:35,270 --> 01:12:33,280

objects of substance and high speed in

1871

01:12:37,189 --> 01:12:35,280

one case polish reported their plane was

1872

01:12:38,950 --> 01:12:37,199

buffeted by an object would pass them at

1873

01:12:41,110 --> 01:12:38,960

500 miles an hour and what we're going

1874

01:12:43,189 --> 01:12:41,120

to try to do to

1875

01:12:45,850 --> 01:12:43,199

make sure we

1876

01:12:47,669 --> 01:12:45,860

have a better process for identifying

1877

01:12:48,709 --> 01:12:47,679

[Music]

1878

01:12:51,520 --> 01:12:48,719

these

1879

01:13:01,590 --> 01:12:51,530

phenomena

1880

01:13:02,550 --> 01:13:01,600

[Music]

1881

01:13:05,090 --> 01:13:02,560

issues

1882

01:13:14,070 --> 01:13:05,100

as

1883

01:13:16,709 --> 01:13:14,080

[Music]

1884

01:13:19,350 --> 01:13:16,719

there's footage and records of
