PUBLIC SAFE DISCLOSURE

Sean Raasch

1
00:00:08,509 --> 00:00:05,870
Senator gillibran makes clear that this

2
00:00:11,570 --> 00:00:08,519
process started because of Senator Reid

3
00:00:14,330 --> 00:00:11,580
in 2017. so she started this whole

4
00:00:16,310 --> 00:00:14,340
hearing making it known that the reason

5
00:00:19,609 --> 00:00:16,320
that we are here is because of the

6
00:00:23,570 --> 00:00:19,619
events of 2017 which if you remember as

7
00:00:26,390 --> 00:00:23,580
people like Lou Elizondo Chris melon the

8
00:00:27,970 --> 00:00:26,400
New York Times story and others no

9
00:00:33,830 --> 00:00:27,980
budget

10
00:00:35,630 --> 00:00:33,840
and he didn't put enough to barely do

11
00:00:37,370 --> 00:00:35,640
anything for Arrow and that's the

12
00:00:40,130 --> 00:00:37,380
president's budget so

13
00:00:43,069 --> 00:00:40,140

the president is not allocating enough

14

00:00:45,889 --> 00:00:43,079

for Arrow right there she acknowledged

15

00:00:48,529 --> 00:00:45,899

Mr Chris melon who is the one to say and

16

00:00:50,630 --> 00:00:48,539

mention the issue of opening the

17

00:00:52,790 --> 00:00:50,640

aperture on the radar so that they could

18

00:00:57,470 --> 00:00:52,800

pick up these different objects

19

00:00:59,750 --> 00:00:57,480

public safe disclosure so

20

00:01:02,270 --> 00:00:59,760

they're setting it up

21

00:01:05,509 --> 00:01:02,280

for a disclosure to happen National

22

00:01:09,230 --> 00:01:05,519

Security they're making it known UAP are

23

00:01:12,170 --> 00:01:09,240

a matter of National Security arrow is a

24

00:01:15,050 --> 00:01:12,180

combination of previous DOD UAB efforts

25

00:01:18,490 --> 00:01:15,060

my question is which one is he saying

26

00:01:21,830 --> 00:01:18,500

it's a combination of efforts

27

00:01:24,469 --> 00:01:21,840

compounding out from 1969 well what's he

28

00:01:28,130 --> 00:01:24,479

saying awesome atip

29

00:01:31,310 --> 00:01:28,140

what establishing safety across all

30

00:01:33,010 --> 00:01:31,320

domains is their number one issue so he

31

00:01:35,870 --> 00:01:33,020

pretty much just

32

00:01:37,609 --> 00:01:35,880

addressed the historic

33

00:01:39,710 --> 00:01:37,619

citing stuff

34

00:01:42,530 --> 00:01:39,720

by saying we can't answer all your

35

00:01:44,749 --> 00:01:42,540

questions in one day you know

36

00:01:46,789 --> 00:01:44,759

um but they

37

00:01:48,230 --> 00:01:46,799

you know intend to

38

00:01:50,510 --> 00:01:48,240

after

39

00:01:53,450 --> 00:01:50,520

they get the safety stuff down

40

00:01:58,010 --> 00:01:53,460

with all the different military branches

41

00:02:00,530 --> 00:01:58,020

so I think that's uh important

42

00:02:02,210 --> 00:02:00,540

as far as expectations that they have a

43

00:02:05,350 --> 00:02:02,220

lot of work to do before they even get

44

00:02:07,730 --> 00:02:05,360

to the historical aspect a lot of hands

45

00:02:09,290 --> 00:02:07,740

in the problem

46

00:02:12,530 --> 00:02:09,300

they have people from all different

47

00:02:14,449 --> 00:02:12,540

intelligence agencies and all across the

48

00:02:16,309 --> 00:02:14,459

place Department of energy who is

49

00:02:19,369 --> 00:02:16,319

supposed to be holding some of these

50

00:02:20,750 --> 00:02:19,379

secrets so there's a lot of uh hands in

51
00:02:23,030 --> 00:02:20,760
the pot here and when that happens

52
00:02:26,390 --> 00:02:23,040
things can go wrong if there is some

53
00:02:28,610 --> 00:02:26,400
deep secret or whatever you can be sure

54
00:02:30,110 --> 00:02:28,620
then on the program I just thought that

55
00:02:32,270 --> 00:02:30,120
was interesting that a lot of people are

56
00:02:34,190 --> 00:02:32,280
going to be involved it's a scientific

57
00:02:36,170 --> 00:02:34,200
issue more than an intelligence issue

58
00:02:38,390 --> 00:02:36,180
which is very interesting because they

59
00:02:40,550 --> 00:02:38,400
just got done saying UAP are a matter of

60
00:02:42,410 --> 00:02:40,560
National Security small percentage have

61
00:02:44,630 --> 00:02:42,420
anomalous signatures but half are

62
00:02:46,729 --> 00:02:44,640
anomalous apparently most without

63
00:02:49,250 --> 00:02:46,739

signatures so he said a couple different

64

00:02:51,650 --> 00:02:49,260

things here first he's saying only a

65

00:02:52,970 --> 00:02:51,660

small percentage show anomalous

66

00:02:57,470 --> 00:02:52,980

signatures

67

00:02:58,190 --> 00:02:57,480

but he also says that out of 650

68

00:03:01,910 --> 00:02:58,200

um

69

00:03:04,369 --> 00:03:01,920

cases that they're currently on half of

70

00:03:07,869 --> 00:03:04,379

them about

71

00:03:11,930 --> 00:03:09,530

characteristics

72

00:03:14,270 --> 00:03:11,940

so only thing I can think of is that he

73

00:03:17,449 --> 00:03:14,280

means only a small percentage show

74

00:03:19,910 --> 00:03:17,459

actual signatures electronic signatures

75

00:03:21,770 --> 00:03:19,920

but half of them

76
00:03:23,270 --> 00:03:21,780
seemed like they could have anomalous

77
00:03:25,970 --> 00:03:23,280
characteristics but they don't have

78
00:03:27,050 --> 00:03:25,980
enough data further we go on through

79
00:03:29,750 --> 00:03:27,060
this

80
00:03:31,729 --> 00:03:29,760
you know you'll realize that to me the

81
00:03:33,290 --> 00:03:31,739
picture becomes clear here that any

82
00:03:34,610 --> 00:03:33,300
possible disclosure won't come from

83
00:03:37,729 --> 00:03:34,620
Arrow

84
00:03:41,630 --> 00:03:40,070
that if he finds anything

85
00:03:43,610 --> 00:03:41,640
where the only explanation is

86
00:03:46,490 --> 00:03:43,620
extraterrestrial

87
00:03:49,729 --> 00:03:46,500
he's going to give it to NASA

88
00:03:51,530 --> 00:03:49,739

and if it's anomalous and winds up being

89

00:03:53,630 --> 00:03:51,540

like foreign like Chinese or something

90

00:03:55,910 --> 00:03:53,640

like that he's going to give it

91

00:03:58,490 --> 00:03:55,920

to the intelligence community

92

00:04:01,009 --> 00:03:58,500

so either way we're not going to find

93

00:04:04,009 --> 00:04:01,019

out the truth on this stuff from Arrow

94

00:04:06,350 --> 00:04:04,019

ET Discovery goes to NASA not to the

95

00:04:08,030 --> 00:04:06,360

public basically what it sounds like to

96

00:04:10,309 --> 00:04:08,040

any anybody who's trying to make a case

97

00:04:12,949 --> 00:04:10,319

on any of these UAP things what I take

98

00:04:16,430 --> 00:04:12,959

it as is gimbal Tic Tac

99

00:04:17,629 --> 00:04:16,440

go fast maybe the pyramid video all

100

00:04:20,210 --> 00:04:17,639

those people are trying to make

101

00:04:21,830 --> 00:04:20,220

Arguments for that he's saying

102

00:04:23,870 --> 00:04:21,840

um you know science runs by peer review

103

00:04:25,070 --> 00:04:23,880

so put together your idea and have it

104

00:04:26,689 --> 00:04:25,080

peer-reviewed

105

00:04:28,430 --> 00:04:26,699

you know and that's what he's saying

106

00:04:31,310 --> 00:04:28,440

that he's going to be doing but the

107

00:04:33,290 --> 00:04:31,320

interesting thing is that we don't have

108

00:04:34,730 --> 00:04:33,300

all the freaking data men so how are we

109

00:04:36,710 --> 00:04:34,740

supposed to put something together for

110

00:04:37,790 --> 00:04:36,720

peer review when we don't have all the

111

00:04:39,650 --> 00:04:37,800

data

112

00:04:41,570 --> 00:04:39,660

it's ridiculous

113

00:04:43,370 --> 00:04:41,580

so he's trying to take a cheap shot at

114

00:04:46,850 --> 00:04:43,380

people who have their ideas and what

115

00:04:48,530 --> 00:04:46,860

they think about the different cases

116

00:04:52,070 --> 00:04:48,540

tells them to do something with peer

117

00:04:54,350 --> 00:04:52,080

review when we don't have the data

118

00:04:56,510 --> 00:04:54,360

yeah tell whoever those people were that

119

00:04:58,969 --> 00:04:56,520

took the data bricks off the uh what was

120

00:05:02,270 --> 00:04:58,979

it the Princeton

121

00:05:04,969 --> 00:05:02,280

tell those guys to to help us out so we

122

00:05:06,650 --> 00:05:04,979

can't put a peer review paper together

123

00:05:09,230 --> 00:05:06,660

because they have the data apparently

124

00:05:11,270 --> 00:05:09,240

from the Tic Tac event so we've been

125

00:05:14,510 --> 00:05:11,280

through this Project Blue Book did the

126

00:05:16,969 --> 00:05:14,520

same thing probably or possibly balloon

127

00:05:19,310 --> 00:05:16,979

you know so they don't know for sure if

128

00:05:22,010 --> 00:05:19,320

it's a balloon

129

00:05:23,810 --> 00:05:22,020

let's just say if the object is moving

130

00:05:26,150 --> 00:05:23,820

with the Wind

131

00:05:28,370 --> 00:05:26,160

it was reported as a sphere they'll

132

00:05:30,890 --> 00:05:28,380

probably say

133

00:05:34,370 --> 00:05:30,900

it's a possible balloon he's got two

134

00:05:35,990 --> 00:05:34,380

groups in ic group and he's got his own

135

00:05:37,969 --> 00:05:36,000

intelligence group in a scientific group

136

00:05:40,670 --> 00:05:37,979

they look at it he looks at it and then

137

00:05:42,170 --> 00:05:40,680

it goes to these retired intelligence

138

00:05:45,409 --> 00:05:42,180

folks

139

00:05:46,249 --> 00:05:45,419

who do a final peer review who are these

140

00:05:49,010 --> 00:05:46,259

people

141

00:05:50,870 --> 00:05:49,020

why should we trust them

142

00:05:52,010 --> 00:05:50,880

there's so many people involved here

143

00:05:55,490 --> 00:05:52,020

like

144

00:05:58,370 --> 00:05:55,500

just more ways for things to go to go

145

00:06:01,310 --> 00:05:58,380

now once the dod approves this is how

146

00:06:03,890 --> 00:06:01,320

information will become public so

147

00:06:06,170 --> 00:06:03,900

what he just said is

148

00:06:09,409 --> 00:06:06,180

that once the dod approves his little

149

00:06:13,550 --> 00:06:09,419

portal online that's where he'll put his

150

00:06:16,749 --> 00:06:13,560

unclassified UAP information

151
00:06:20,330 --> 00:06:16,759
so 325 cases are of

152
00:06:23,090 --> 00:06:20,340
anomalous interesting value

153
00:06:25,189 --> 00:06:23,100
a couple things first of all is

154
00:06:26,930 --> 00:06:25,199
he said it's it's really hard to detect

155
00:06:29,090 --> 00:06:26,940
things when they don't have a you know a

156
00:06:31,909 --> 00:06:29,100
Chinese or Russian flag on it so what I

157
00:06:33,950 --> 00:06:31,919
took away from that is so that's your

158
00:06:35,870 --> 00:06:33,960
problem from identifying things meaning

159
00:06:38,510 --> 00:06:35,880
you have

160
00:06:41,330 --> 00:06:38,520
clear video to tell what it is

161
00:06:42,409 --> 00:06:41,340
but there's no flag on it otherwise you

162
00:06:45,469 --> 00:06:42,419
could tell

163
00:06:47,090 --> 00:06:45,479

so let's see those clear videos Josh

164

00:06:50,529 --> 00:06:47,100

said something pretty important he

165

00:06:53,510 --> 00:06:50,539

didn't he say Advanced Technic technical

166

00:06:55,909 --> 00:06:53,520

signatures not necessarily anomalous

167

00:07:00,590 --> 00:06:55,919

the wording is important yeah it is

168

00:07:06,230 --> 00:07:04,730

he did say Advanced but I then I think

169

00:07:09,409 --> 00:07:06,240

that's up to him

170

00:07:10,909 --> 00:07:09,419

to correctly categorize that for the

171

00:07:13,610 --> 00:07:10,919

audience what's the difference between

172

00:07:14,689 --> 00:07:13,620

anomalous and advanced anomalous I would

173

00:07:16,790 --> 00:07:14,699

think is something that you can't make

174

00:07:18,890 --> 00:07:16,800

sense of advanced is something you

175

00:07:20,089 --> 00:07:18,900

understand but it's just kind of beyond

176
00:07:21,770 --> 00:07:20,099
your Realm

177
00:07:24,589 --> 00:07:21,780
I don't know

178
00:07:27,830 --> 00:07:24,599
uh that's what OSAP did so basically

179
00:07:29,629 --> 00:07:27,840
what he's saying he's going to do is

180
00:07:32,150 --> 00:07:29,639
look at

181
00:07:34,309 --> 00:07:32,160
the technology 50 years down the road

182
00:07:36,950 --> 00:07:34,319
and what's beyond that those are exactly

183
00:07:38,330 --> 00:07:36,960
what the aseb Nerds were so that he's

184
00:07:40,850 --> 00:07:38,340
just gonna do that again apparently

185
00:07:43,550 --> 00:07:40,860
needs to help NORAD get their arms

186
00:07:46,309 --> 00:07:43,560
around this so that sounds like a

187
00:07:49,210 --> 00:07:46,319
problem to me I think it's statements

188
00:07:52,730 --> 00:07:49,220

like this that if anybody had any doubt

189

00:07:54,650 --> 00:07:52,740

the seriousness of of this and why it's

190

00:07:56,870 --> 00:07:54,660

happening I think that should be kind of

191

00:07:59,450 --> 00:07:56,880

put to bed right now if this Kirkpatrick

192

00:08:02,390 --> 00:07:59,460

is going to NORAD and helping them get

193

00:08:03,890 --> 00:08:02,400

their arms around this which means a

194

00:08:06,950 --> 00:08:03,900

problem

195

00:08:09,469 --> 00:08:06,960

um it's serious so whether you're a

196

00:08:11,930 --> 00:08:09,479

debunker or not I think there is

197

00:08:14,450 --> 00:08:11,940

something real going on and I think we

198

00:08:16,189 --> 00:08:14,460

got that uh through this hearing whether

199

00:08:19,790 --> 00:08:16,199

it's foreign

200

00:08:22,309 --> 00:08:19,800

or not is another question or if there's

201

00:08:25,070 --> 00:08:22,319

both but it's clear there is a serious

202

00:08:27,710 --> 00:08:25,080

issue so I think everybody should be on

203

00:08:30,589 --> 00:08:27,720

board with this no matter where you

204

00:08:32,810 --> 00:08:30,599

stand is he wants to have the ability to

205

00:08:35,990 --> 00:08:32,820

have private contractors activate more

206

00:08:38,269 --> 00:08:36,000

data collection when a citing comes in

207

00:08:41,029 --> 00:08:38,279

that's what he's saying so he wants to

208

00:08:43,269 --> 00:08:41,039

have the ability when a pilot or whoever

209

00:08:47,329 --> 00:08:43,279

Ryan Graves or whoever reports something

210

00:08:50,829 --> 00:08:47,339

that this other contractor can or

211

00:08:55,509 --> 00:08:50,839

private entity whatever can

212

00:09:00,610 --> 00:08:55,519

activate their other signature finding

213

00:09:05,690 --> 00:09:04,070

more Authority so he's I think it was

214

00:09:07,370 --> 00:09:05,700

title 10 or whatever and he needs to be

215

00:09:09,350 --> 00:09:07,380

title 50 I don't know I don't get into

216

00:09:10,850 --> 00:09:09,360

the weeds with that stuff but he doesn't

217

00:09:13,490 --> 00:09:10,860

have enough authority to do what he

218

00:09:15,290 --> 00:09:13,500

needs to do so

219

00:09:17,810 --> 00:09:15,300

um and that's basically collection

220

00:09:19,610 --> 00:09:17,820

tasking so what he would be doing I'm

221

00:09:22,670 --> 00:09:19,620

assuming is telling someone like I don't

222

00:09:24,850 --> 00:09:22,680

know nro hey can you do this with your

223

00:09:26,630 --> 00:09:24,860

satellites to try to pick up UAP

224

00:09:28,009 --> 00:09:26,640

counterintelligence I'm not sure what he

225

00:09:29,690 --> 00:09:28,019

would do with that counterintelligence

226

00:09:32,030 --> 00:09:29,700

always seems to be involved with UAP

227

00:09:35,030 --> 00:09:32,040

even going back to the the Blue Book

228

00:09:38,030 --> 00:09:35,040

days officially past legislation being

229

00:09:40,190 --> 00:09:38,040

stonewalled by DOD I think I counted

230

00:09:43,970 --> 00:09:40,200

like four different things that are

231

00:09:46,250 --> 00:09:43,980

waiting on other people DOD implementing

232

00:09:49,269 --> 00:09:46,260

the law the Department of Defense is not

233

00:09:51,769 --> 00:09:49,279

implementing the law

234

00:09:54,889 --> 00:09:51,779

doesn't even have

235

00:09:57,290 --> 00:09:54,899

any feedback for when the dod would be

236

00:10:00,710 --> 00:09:57,300

able to

237

00:10:05,509 --> 00:10:03,350

so who's who's who is the dod

238

00:10:08,030 --> 00:10:05,519

accountable to

239

00:10:09,650 --> 00:10:08,040

she tries to ask again he just

240

00:10:11,810 --> 00:10:09,660

completely

241

00:10:13,850 --> 00:10:11,820

doesn't answer and doesn't even

242

00:10:15,410 --> 00:10:13,860

acknowledge that he's not answering very

243

00:10:18,050 --> 00:10:15,420

much for

244

00:10:20,810 --> 00:10:18,060

um you know that's not what we asked

245

00:10:22,430 --> 00:10:20,820

he wants more witnesses from Congress so

246

00:10:24,110 --> 00:10:22,440

what does that tell me that tells me

247

00:10:25,910 --> 00:10:24,120

that they're of some value he didn't

248

00:10:28,370 --> 00:10:25,920

have to say that

249

00:10:30,050 --> 00:10:28,380

you know he didn't have to say thank you

250

00:10:31,910 --> 00:10:30,060

for the witnesses or keep sending him to

251
00:10:34,370 --> 00:10:31,920
me or whatever he didn't have to say any

252
00:10:36,650 --> 00:10:34,380
of that but he did so out of the two

253
00:10:38,690 --> 00:10:36,660
dozen Witnesses I'm guessing that he's

254
00:10:41,509 --> 00:10:38,700
gotten some things of value Here We Go

255
00:10:45,410 --> 00:10:41,519
Again public engagements probably mean

256
00:10:47,329 --> 00:10:45,420
using Twitter more for starters uh and

257
00:10:49,069 --> 00:10:47,339
again we're waiting on dod you notice

258
00:10:50,810 --> 00:10:49,079
that Arrow has had a Twitter for a long

259
00:10:53,269 --> 00:10:50,820
time and as far as their public

260
00:10:55,970 --> 00:10:53,279
engagement plans they're still waiting

261
00:10:58,310 --> 00:10:55,980
on the dod so whenever the dod wakes up

262
00:11:01,550 --> 00:10:58,320
from their nap apparently

263
00:11:04,910 --> 00:11:01,560

um public engagements might begin to

264

00:11:07,190 --> 00:11:04,920

happen he wants to develop protocols and

265

00:11:09,170 --> 00:11:07,200

split Hunt mission for the unknown so

266

00:11:12,590 --> 00:11:09,180

basically what he's saying is he wants

267

00:11:14,150 --> 00:11:12,600

to develop a process and a protocol that

268

00:11:16,670 --> 00:11:14,160

all the military branches or

269

00:11:19,610 --> 00:11:16,680

intelligence branches or agencies can

270

00:11:21,350 --> 00:11:19,620

use so that Arrow doesn't need to be in

271

00:11:23,990 --> 00:11:21,360

existence anymore

272

00:11:26,150 --> 00:11:24,000

his paper with Avi was about imaginary

273

00:11:29,990 --> 00:11:26,160

signatures of an ET craft so basically

274

00:11:32,630 --> 00:11:30,000

what he's trying to say there is

275

00:11:35,690 --> 00:11:32,640

what he's saying more than less is what

276

00:11:37,910 --> 00:11:35,700

he did with the Avi was try to come up

277

00:11:40,850 --> 00:11:37,920

with signatures or what it would look

278

00:11:45,230 --> 00:11:40,860

like if some of these fears really

279

00:11:47,090 --> 00:11:45,240

probably basically were E.T craft

280

00:11:48,949 --> 00:11:47,100

now this was kind of weird looking for

281

00:11:51,050 --> 00:11:48,959

objects that are typically one to four

282

00:11:52,850 --> 00:11:51,060

meters so why is that weird to me it's

283

00:11:55,670 --> 00:11:52,860

weird to me because

284

00:11:58,550 --> 00:11:55,680

if we're connecting any of this stuff to

285

00:12:01,730 --> 00:11:58,560

the past past cases I'm not saying we

286

00:12:03,730 --> 00:12:01,740

should or shouldn't I'm just saying if

287

00:12:07,250 --> 00:12:03,740

you study past cases

288

00:12:09,710 --> 00:12:07,260

these things aren't one to four meters

289

00:12:11,509 --> 00:12:09,720

you know so and I thought that when I

290

00:12:14,090 --> 00:12:11,519

saw some of the Navy videos and now we

291

00:12:16,490 --> 00:12:14,100

have like this orb stuff like these UFOs

292

00:12:18,230 --> 00:12:16,500

have become a lot smaller

293

00:12:20,690 --> 00:12:18,240

than they used to be I think we're

294

00:12:22,850 --> 00:12:20,700

getting a little clear picture possibly

295

00:12:25,970 --> 00:12:22,860

of the things that are really flying

296

00:12:28,550 --> 00:12:25,980

around which is or brand sphere or brown

297

00:12:31,610 --> 00:12:28,560

sphere one to four meters

298

00:12:33,889 --> 00:12:31,620

stationary to Mach 2 no exhaust we also

299

00:12:35,690 --> 00:12:33,899

kind of have the hot spots here but I

300

00:12:37,970 --> 00:12:35,700

don't know why he calls them hot spots

301
00:12:40,790 --> 00:12:37,980
because he also said that they're sensor

302
00:12:43,250 --> 00:12:40,800
bias so if there's sensor bias how can

303
00:12:45,110 --> 00:12:43,260
you call these hot spots and with this I

304
00:12:47,030 --> 00:12:45,120
should say that it's good that there's

305
00:12:50,509 --> 00:12:47,040
some transparency I mean maybe you're

306
00:12:52,610 --> 00:12:50,519
not getting the answers you want to get

307
00:12:55,190 --> 00:12:52,620
maybe we don't have all the information

308
00:12:59,389 --> 00:12:55,200
that went into this report and I agree

309
00:13:05,509 --> 00:13:03,590
we are getting some information here so

310
00:13:06,949 --> 00:13:05,519
hopefully we that we can just keep that
