is in the document up super wave yet

5  
00:00:21,809 --> 00:00:26,278  
officials and a super Vela and this goes

6  
00:00:24,239 --> 00:00:30,059  
out through the whole galaxy and affects

7  
00:00:26,278 --> 00:00:32,159  
all the star systems super velop right

there connects our galaxy is populated

11  
00:00:37,259 --> 00:00:42,058  
by many civilizations ones of a galaxy

12  
00:00:40,020 --> 00:00:43,950  
is from fee and series that's you own

13  
00:00:42,058 --> 00:00:46,439  
and be focused I'll show you later

14  
00:00:43,950 --> 00:00:49,350  
evidence of messages they're sending to

does diesel owns both shaft and chicken

17  
00:00:51,479 --> 00:00:56,878  
and they're talking about the galactic

18  
00:00:54,270 --> 00:00:59,850  
core explosion phenomenon on see

19  
00:00:56,878 --> 00:01:01,858  
community and Abu Musa I know comment a

20  
00:00:59,850 --> 00:01:04,290  
super vein it's it's the one thing that

21  
00:01:01,859 --> 00:01:05,159  
we have in common with all civilizations

22  
00:01:04,290 --> 00:01:08,100  
in the galaxy

23  
00:01:05,159 --> 00:01:10,560  
that's the inés activities at soon in

24  
00:01:08,099 --> 00:01:13,618  
the galaxy combines I'm happy and there

25  
00:01:10,560 --> 00:01:17,040  
is a concern for our safety to make us

26  
00:01:13,618 --> 00:01:20,969  
aware of this want seasoned Dom the

27  
00:01:17,040 --> 00:01:23,969  
mutants does the opposite isn't we we

28  
00:01:20,969 --> 00:01:26,310  
found three periods in the data one was

29

00:01:23,969 --> 00:01:30,450  
twenty eight thousand five hundred years

30  
00:01:26,310 --> 00:01:33,478  
yeah methyl chameleon fest Jane Curtin

31  
00:01:30,450 --> 00:01:35,879  
I never buy a thousand from funded on

32  
00:01:33,478 --> 00:01:38,658  
know there was eleven thousand five

33  
00:01:35,879 --> 00:01:42,269  
hundred which is about half as much I

34  
00:01:38,659 --> 00:01:45,570  
invited her side home by if tolls in

35  
00:01:42,269 --> 00:01:48,030  
fundo Java and there was one around

36  
00:01:45,569 --> 00:01:49,828  
fifty seven hundred plus or minus five

37  
00:01:48,030 --> 00:01:51,810  
hundred years one skipped I invited on

38  
00:01:49,828 --> 00:01:54,629  
sucrose elephant's equal to the other

39  
00:01:51,810 --> 00:01:55,549  
attribute this last one is interesting

40  
00:01:54,629 --> 00:01:59,129  
because it's

41  
00:01:55,549 --> 00:02:00,479  
overlaps the maein cycle these let's do

42  
00:01:59,129 --> 00:02:02,670  
closest into the Sun

43  
00:02:00,478 --> 00:02:04,590

diadiun helped sucrose developed the

44

00:02:02,670 --> 00:02:07,200

million cycle last five thousand one

45

00:02:04,590 --> 00:02:10,439

hundred and twenty six years in Maya

46

00:02:07,200 --> 00:02:13,590

sucrose the myasu close protects excuse

47

00:02:10,439 --> 00:02:18,750

me how much is how many years is 5100

48

00:02:13,590 --> 00:02:22,560

I know that second chances Yahoo and and

49

00:02:18,750 --> 00:02:25,439

this is within error very close to the

50

00:02:22,560 --> 00:02:27,750

main cycle when diesel exits new closest

51

00:02:25,439 --> 00:02:31,019

place to see Michigan out him my Otsu

52

00:02:27,750 --> 00:02:35,669

close so the maein cycle the last one

53

00:02:31,019 --> 00:02:38,849

the one we're in began 3114 BC according

54

00:02:35,669 --> 00:02:40,079

to the standard chronology da getting

55

00:02:38,848 --> 00:02:43,109

that occurred sooo close and Indians

56

00:02:40,080 --> 00:02:46,260

number finding the gun foot 5800 fits in

57

00:02:43,110 --> 00:02:49,230

for crystals inspiration tear of a giant

58  
00:02:46,259 --> 00:02:51,060  
site it ends in two months

59  
00:02:49,229 --> 00:02:54,509  
as you know and ended in spy mountain

60  
00:02:51,060 --> 00:02:56,939  
Visia Levison so here are some of the

61  
00:02:54,509 --> 00:02:59,039  
effects so we mentioned there were the

62  
00:02:56,939 --> 00:03:01,348  
super wave would raise the background

63  
00:02:59,039 --> 00:03:03,598  
radiation would cause increase of

64  
00:03:01,348 --> 00:03:05,429  
genetic mutation is enemy affected

65  
00:03:03,598 --> 00:03:07,199  
Liana SuperVeloce right the cosmos

66  
00:03:05,430 --> 00:03:10,170  
column with the D intercourse column

67  
00:03:07,199 --> 00:03:12,030  
want the guinea to show mutations hotter

68  
00:03:10,169 --> 00:03:15,079  
unstriped Glasson you would want to stay

69  
00:03:12,030 --> 00:03:17,430  
indoors for the first three days the STI

70  
00:03:15,080 --> 00:03:19,560  
targeted so house of lightning because

71  
00:03:17,430 --> 00:03:23,790  
that would be when the worst of it would

72

00:03:19,560 --> 00:03:26,549

here then indecent side home 50 close to

73

00:03:23,789 --> 00:03:28,319

me enough enough you know you would know

74

00:03:26,549 --> 00:03:30,390

there's a super wave because a

75

00:03:28,319 --> 00:03:32,818

blue-white star would appear in the sky

76

00:03:30,389 --> 00:03:34,858

and it wasn't there before as you've

77

00:03:32,818 --> 00:03:38,099

gotten all miss become that's - I know

78

00:03:34,859 --> 00:03:41,010

superval economist I'm him a line trail

79

00:03:38,099 --> 00:03:41,818

plow understand giant therefore Hernan

80

00:03:41,009 --> 00:03:45,328

estaba

81

00:03:41,818 --> 00:03:48,030

the Hopi Indians have a legend about the

82

00:03:45,329 --> 00:03:50,519

blue-white star the Hopi Indiana

83

00:03:48,030 --> 00:03:54,180

happened ina ligand about the in blow of

84

00:03:50,519 --> 00:03:57,030

ice and stem that it heralds the end of

85

00:03:54,180 --> 00:04:00,000

the world cycle yeah does ended a state

86

00:03:57,030 --> 00:04:03,449  
to close out psyched so the blue white

87  
00:04:00,000 --> 00:04:05,818  
color is because it's produced by cosmic

88  
00:04:03,449 --> 00:04:08,988  
ray electrons that are producing

89  
00:04:05,818 --> 00:04:11,669  
synchrotron radiation blue white de

90  
00:04:08,989 --> 00:04:13,829  
loyola spice a fee upon come to is

91  
00:04:11,669 --> 00:04:16,168  
cosmos a electrons so standard years

92  
00:04:13,829 --> 00:04:19,319  
soon Cortona it's kind of exciting

93  
00:04:16,168 --> 00:04:23,158  
so another thing is they it would

94  
00:04:19,319 --> 00:04:27,408  
destroy the ozone layer because cosmic

95  
00:04:23,158 --> 00:04:27,408  
rays these tend to destroy ozone

96  
00:04:27,449 --> 00:04:32,720  
super villain of the also insist

97  
00:04:29,759 --> 00:04:36,870  
cisterna and that would allow UV

98  
00:04:32,720 --> 00:04:41,070  
radiation solar ultraviolet to come in

99  
00:04:36,870 --> 00:04:43,199  
for Jewish Faust Harlan ow in the

100  
00:04:41,069 --> 00:04:46,259

unconscious so you wouldn't want to be

101

00:04:43,199 --> 00:04:48,389

out in the Sun without protection

102

00:04:46,259 --> 00:04:52,580

cease all consolation does honor of
