

1  
00:00:15,890 --> 00:00:25,310  
when I side it wasn't the thing that I

2  
00:00:21,390 --> 00:00:32,969  
could see it was some lights flashing

3  
00:00:25,309 --> 00:00:36,089  
green amber blue and red and I was

4  
00:00:32,969 --> 00:00:41,100  
looking straight ahead and going through

5  
00:00:36,090 --> 00:00:45,350  
it toward it all of a sudden jumped out

6  
00:00:41,100 --> 00:00:49,530  
about 10 degrees to the right which I

7  
00:00:45,350 --> 00:00:53,609  
couldn't imagine how fast it was and i'm

8  
00:00:49,530 --> 00:01:01,350  
not thinking the acceleration of the

9  
00:00:53,609 --> 00:01:05,700  
movement and also the g was taking of

10  
00:01:01,350 --> 00:01:12,540  
that movement so all of this it's been

11  
00:01:05,700 --> 00:01:17,070  
all of this wondering i saw a wrong

12  
00:01:12,540 --> 00:01:24,229  
thing which was bright but half of the

13  
00:01:17,069 --> 00:01:28,500  
size of the moon and moving downward

14  
00:01:24,228 --> 00:01:34,890  
came glue the horizon and from the below

15  
00:01:28,500 --> 00:01:38,129  
the horizon start come toward me I was

16  
00:01:34,890 --> 00:01:43,228  
really scared at this time I talk to

17  
00:01:38,129 --> 00:01:46,590  
maybe this is going to be a missile or

18  
00:01:43,228 --> 00:01:49,560  
something that they launched toward me

19  
00:01:46,590 --> 00:01:54,478  
when the radar was locked on the main

20  
00:01:49,560 --> 00:01:55,079  
thing so it couldn't be used for this

21  
00:01:54,478 --> 00:01:58,349  
one

22  
00:01:55,079 --> 00:02:01,469  
because that could take a long time to

23  
00:01:58,349 --> 00:02:08,280  
bring lot from that fun to lock on this

24  
00:02:01,469 --> 00:02:11,550  
one and plus that if I think that it's a

25  
00:02:08,280 --> 00:02:15,860  
missile that was no use for it so the

26  
00:02:11,550 --> 00:02:19,850  
only thing I thought I said maybe I use

27  
00:02:15,860 --> 00:02:23,700  
another kind of the new side to shoot it

28  
00:02:19,849 --> 00:02:26,310  
so when I selected them inside by the

29

00:02:23,699 --> 00:02:34,709  
time it was coming from the globe right

30  
00:02:26,310 --> 00:02:38,099  
and toward me an awkward when I look to

31  
00:02:34,709 --> 00:02:41,129  
my missile panel to see if the mission

32  
00:02:38,099 --> 00:02:46,439  
is selected or not I saw all of the

33  
00:02:41,129 --> 00:02:51,740  
instruments are a flex rating and plus

34  
00:02:46,439 --> 00:02:57,000  
lots of statics in the radio hearing and

35  
00:02:51,740 --> 00:03:02,489  
there were no lights inside the inside

36  
00:02:57,000 --> 00:03:08,099  
panel thought I made a left turn to get

37  
00:03:02,489 --> 00:03:12,420  
away from the direct collusion and just

38  
00:03:08,099 --> 00:03:17,280  
as much bank that I could see the thing

39  
00:03:12,419 --> 00:03:21,000  
for Mike any people on my right side and

40  
00:03:17,280 --> 00:03:24,060  
the left and i left the power on the

41  
00:03:21,000 --> 00:03:27,000  
other person and tighten the version of

42  
00:03:24,060 --> 00:03:35,340  
and brought my left hand to the ejection

43  
00:03:27,000 --> 00:03:39,060

handle between the legs here and there

44

00:03:35,340 --> 00:03:43,080

it came forward and forward and I doubt

45

00:03:39,060 --> 00:03:46,830

if it comes somewhere around the closer

46

00:03:43,080 --> 00:03:53,060

than four or five miles there is no time

47

00:03:46,830 --> 00:03:53,060

to delay I have to jump out
