The amount of detail in these cases varies enormously. Some cases - frequently those which were well publicized at the time of the event - contain considerable information, while others are vague and seriously incomplete. Project Blue Book generally placed the blame for such incompleteness on the witnesses, but it should take its own share of the responsibility. 'In thousands of cases, there is no completed questionnaire in the Project files, nor even any indication that one was sent to the witness. And in most of the instances where a questionnaire was filled out, it was never followed up to get more complete answers to questions which the witnesses failed to deal with properly. For much of the life of Project Blue Book and its predecessors, there was no satisfactory questionnaire at all. And one of those used for a lengthy period was so badly organized that a witness should not be held to blame for giving incomplete answers.

Yet, despite all the roadblocks, many reports are sufficiently complete to tell a pretty clear story of a puzzling experience. With this data now available, anyone can look at Project Blue Book's "unidentified"

UFO reports and make up his own mind.

July 3, 1947; Harborside, Maine. 2:30 p.m. EDT. Witness: astronomer John Cole of South Brooksville, Me. Watched 10-15 seconds while ten very light objects, with two dark forms to their left, moved like a swarm of bees to the northwest. A loud roar was heard.

July 4, 1947; over Emmet, Idaho. 8:17 p.m. PDT. Witnesses: United Air Lines Capt. E.J. Smith, First Officer Ralph Stevens, Stewardess Marty Morrow. Watched for 12-15 minutes while four objects with flat bottoms and rough tops moved at varying speeds, with one high and to the right of the others.

July 6, 1947; Fairfield-Suisan Air Base, California. Daytime. Witnesses: Army Air Forces Capt. and Mrs. James Burniston. Watched for 1 minute while one object having no wings or tail rolled from side-to-side three times and then flew away very fast to the southeast.

July 8, 1947; Muroc Air Base, California. 9:30 a.m. PDT. Witnesses: lst Lt. Joseph McHenry, T/Sgt Ruvolo, S/Sgt Nauman, Miss Janette Scotte. Watched for an unstated length of time while two disc-shaped or spherical objects--silver and apparently metallic--flew a wide circular pattern, and then one of them later flew a tighter circle.

July 9, 1947; Meridian, Idaho. 12:17 p.m. PDT. Witness: Idaho statesman aviation editor and former (AAF) B-29 pilot Dave Johnson. Watched for more than 10 seconds from an Idaho Air National Guard AT-6 while a black disc, which stood out against the clouds, made a half-roll and then a stair-step climb.

July 10, 1947; Harmon Field, Newfoundland, Canada. Between 3 and 5 p.m. local time. Witnesses: three ground crewmen, including Mr. Leidy, for Pan American Airways. Watched briefly while one translucent disc- or wheel-shaped object flew very fast, leaving a dark blue trail and then ascended and cut a path through the clouds.

July 29, 1947; Hamilton Air Base, California. 2:50 p.m. PDT. Witnesses: Assistant Base Operations Officer Capt. William Rhyerd, ex-AAF B-29 pilot Ward Stewart. Watched for unknown length of time while two round, shiny, white objects with estimated 15-25 foot diameters, flew 3-4 times the apparent speed of a P-80, also in sight. One object flew straight and level; the other weaved from side-to-side like an escort fighter.

Sept. 3, 1947; Oswego, Oregon. 12:15 p.m. PDT. Witness: housewife Mrs. Raymond Dupui. Watched for unknown length of time as 12-15 round, silver objects flew an unstated pattern.

Oct., 1947; Dodgeville, Wisconsin. 11 unnamed civilian man. Watched for 1 hour while an undescribed object flew counterclockwise circles.

Oct. 14, 1947; 11 mi. NNE of Cave Creek, Arizona. Noon MDT. Witnesses: ex-AAF fighter pilot J.L. Clark, civilian pilot Anderson, third man. Watched 45-60 seconds while one 3-foot "flying wing"-shaped object, which looked black against the white clouds and red against the blue sky, flew straight at an estimated 380 m.p.h., at 8-10,000 feet, from NW to SE.

April 5, 1948; Holloman AFB, New Mexico. Afternoon. Witnesses: Geophysics Lab balloon observers Alsen, Johnson, Chance. Two irregular, round, white or golden objects. One made three loops then rose and disappeared rapidly; the other flew in a fast arc to the west during the 3O^second sighting.

July 29, 1948: Indianapolis, Indiana. 9:88 a.m. witness*: James Toney, Robert Huggins, both employees of a rug cleaning firm. One shiny aluminum object, shaped something like an airplane's propeller, with 10-12 small cups protruding from either blade. Estimated size 6-8' long, 1.5-2' wide. The object glided across the road a few hundred feet in front of their vehicle and apparently went down in a wooded area.

Sighting lasted a few seconds.

July 31, 1948; Indianapolis, Indiana. 8:25 a.m. Witnesses: Mr. and Mrs. Vernon Swigert; he was an electrician. Object was shaped like a cymbal, or domed disc; about 20' across and 6-8' thick, and was white without any shine. It flew straight and level from horizon to horizon in about 10 seconds, shimmering in the sun as if spinning.

July or August, 1948; vicinity of Marion, Virginia. Shortly after sunset. Witness: Max Abbott, flying a Bellanca Cruisair four-passenger private airplane. A single bright white light accelerated and turned up a valley.

Sept. 23, 1948; San Pablo, California. 12 noon. Witnesses: Sylvester Bentham and retired U.S. Army Col. Horace Eakins. Two objects: one, a buff or grey rectangle with vertical lines; the other a translucent "amoeba" with a dark spot near the center. The arms of the "amoeba" undulated. Both objects traveled very fast.

Oct. 15, 1948; Fusuoka, Japan. 11:05 p.m. Witnesses: pilot Halter and radar operator Hemphill of a P-61 "Black Widow" night fighter. Up to six objects tracked on radar, only one seen visually. Dull or dark object shaped like a dirigible with a flat bottom and clipped tail end. Six seen on radar separately Pilot attempted to close on visual object, but it dove away fast.

Dec. 3, 1948; Fairfield-Suisan AFB, California. 8:15 p.m. Witness: USAF Sgt., control tower operator. One round, white light flew for 25 seconds with varying speed, bouncing motion, and finally a rapid erratic climb.

Jan. 4, 1949; Hickam Field, Hawaii. 2 p.m. Witness: USAF pilot Capt. Paul Storey, on ground. one flat white, elliptical object with a matte top circled while oscillating to the right and left, and then sped away.

Jan. 27, 1949; Cortez-Bradenton, Florida. 10:20 p.m. Witnesses: Capt. Sames, acting chief of the Aircraft Branch, Eglin AFB, and Mrs. Sames. They watched for 25 minutes while a cigar-shaped object as long as two Pullman cars and having seven lighted square windows and throwing sparks, descended and then climbed with a bouncing motion at an estimated 400 m.p.h.

March 17, 1949; Camp Hood, Texas. 7:52 p.m. Witnesses: guards of the 2nd Armored Division. While awaiting the start of a flare firing, they watched, for an hour, while eight large, green, red and white flare-like objects flew in generally straight lines.

April 3, 1949; Dillon, Montana. 11:55 a.m. Witnesses: construction company owner Gosta Miller and three other unnamed persons. One object shaped like two plates attached face-to-face; matte bottom, bright aluminum top; 20' diameter, 4-5' thickness. It rocked or rotated in six cycles, descended, rocked, flew, rocked; all this was very fast.

April 4, 1949; Merced, California. 10:20 p.m. witness: William Parrott, former Air Force pilot and major. One generally round object with a curved bottom and dull coloring. The object gave off a clicking sound until overhead. Parrott's dog reacted. 35 seconds.

April 24, 1949; Arrey, New Mexico. l0:30 a.m. Witnesses: General Mills meteorologist and balloon expert C.B. Moore and others on a balloon launch crew. One white, round ellipsoid, about 2.5 times as long as wide.

April 28, 1949; Tucson, Arizona. 5:45 p.m. Witnesses: Howard Hann, Mr. Hubert, Tex Keahey. One bright, sausage-shaped object was observed for 40 minutes while it rolled and flew fast.

May 5, 1949; Ft. Bliss, Texas. 11:40 a.m. Witnesses: Army officers Maj. Day, Maj. Olhausen, Capt. Vaughn. Two oblong white discs, flying at an estimated 200-250 m.p.h., made a shallow turn during the 30-50 second observation.

May 6, 1949; Livermore, California. 9:35 a.m. Witness: C. G. Green. Two shiny, disc-like objects rotated around each other and banked. Then one shot upwards with a grey trail and rejoined the other. The sighting lasted 5 minutes.

May 9, 1949; Tucson, Arizona. 2:30 p.m. Witness: M/Sgt. Troy Putnam. Two round, flat silvery objects, estimated to be 25' in diameter, flew 750-1,000 m.p.h. in a banked but steady manner.

May 27, 1949; South-central Oregon. 2:25 p.m. Witness: Joseph Shell, ferrying SNJ trainer for North American Aviation, from Red Bluff, California, to Burns, Oregon. Five to eight oval objects, twice as long as wide, and 1/5 as thick. They flew in trail formation, with an interval equal to 3-4 times their length, except that the second and third were closer together.

July 24, 1949; Mountain Home, Idaho. 12 noon. Witness: Henry Clark, manager of a flying service, flying a Piper Clipper. Seven delta-shaped objects, 35-55' in span, 20-30' long, 2-5' thick; light colored except for a 12' diameter dark circle at the rear of each. They flew in a tight formation of twos with one behind, and made a perfect, but unbanked, turn. During the 10 minute sighting, they displayed decreasing smooth oscillations. Clark's engine ran rough during the sighting, and upon landing was found to have all its spark plugs burned out.

July 30, 1949; Mt. Hood, Oregon. 9 p.m. Witnesses: Northwest Airlines Capt. Thrush, two Portland control tower operators, and one flying instructor. One object with one white light and two red lights, maneuvered and hovered.

Feb 5, 1950; Teaticket, Massachusetts. 5:10 p.m. Witnesses: Marvin Odom, former U.S. Navy fighter pilot, USAF Lt. Philip Foushee, pilot from Otis AFB, and two others. Two thin, illuminated cylinders, one of which dropped a fireball, maneuvered together and then disappeared high and fast after 5 minutes.

Feb. 24, 1950; Albuquerque, New Mexico. 1:55 p.m. Witnesses: Municipal Airport Weather Observers Luther McDonald, Harrison Manson. One white, slightly elongated oval was watched for 1.5 minutes through a theodolite while it flew straight and level.

Feb. 25, 1950; Los Alamos, New Mexico. 3:55 p.m. Witnesses: Twelve Atomic Energy Commission security inspectors. One cylinder with tapered ends, silver and flashing, flew slow and hen fast, fluttered and oscillated, and changed course. observations by individuals varied from 3 seconds to 2 minutes.

arch 3, 1950; Selfridge AFB, Michigan. 11:05 p.m. Witness: st Lt Frank Mattson. One intense, dull yellowish light descended vertically, then flew straight and level very fast for 4 minutes.

March 20, 1950; Stuggart, Arkansas. 9:26 p.m. Witnesses: Chicago & Southern Airlines Capt. Jack Adams, First Officer G. W. Anderson, Jr. One 100' circular disc with 9-12 portholes along the lower side emitting a soft purple light, and a light at the top which flashed 3 times in 9 seconds, flew at not less than 1,000 m.p.h. It was seen for 25-35 seconds.

March 27, 1980; Motobo, Okinawa. 10:30 a.m. Witness: USAF radar operator Cpl. Bolfango. Tracked on radar for 2 minutes while it was stationary and then moved at 500 m.p.h.. Visual observation not detailed, only mentioned in summary.

March 28, 1950; Santiago, Chile. 3:15 p.m. Witness: M/Sgt. Patterson, of the office of the U.S. Air Attache. One white object observed for 5-10 seconds through binoculars while it flew high and fast,

crossing 30^ of sky.

March 29, 1950; Marrowbore Lake, Tennessee. 7 a.m. Witnesses: real estate salesmen Whiteside and Williams. Six-twelve dark objects shaped like 300-lb. bombs, estimated 5 feet long. Flew 500 m.p.h. and descended, making a noise like wind blowing through the trees.

April 8, 1950; Kokomo, Indiana. 2 a.m. Witness: Earl Baker. One grey metallic disc, 50' in diameter, 15' thick; top-shaped with a "conning tower" at the top and three ports on the rim giving off a blue light. It hovered for 2 minutes, then flew away. Baker aroused from sleep by his dog.

April 14, 1950; Ft. Monmouth, New Jersey. 2:30 p.m. Witness: Army M/Sgt. James. Four rectangular, amber objects, about 3' by 4'. changed speed and direction rapidly; the group of objects rose and fell during the 3-4 minute sighting.

May 7, 1950; Nine miles sough of Ely, Nevada. 6:45 p.m. Witnesses: Mr. and Mrs. George Smith and their grandson. One silvery white object hovered at 100' altitude, moved back and forth for 10 minutes and then flew up and away. Note in case file: "No investigation."

June 27, 1950; Texarkana, Texas. 7:50 a.m. Witnesses: Terrell and Yates, employees of Red River Arsenal. One object, bright, shaped like two dishpans face-to-face, flew straight and level, fast for 4-5 seconds.

July 13, 1950; Redstone Arsenal, Alabama. 5 p.m. Witnesses: two skilled Arsenal employees including Mr. Washburn. one object, shaped like a bowtie, and like polished aluminum. Flew straight and level, then one triangle rotated 1/4 turn in the opposite direction and returned to its original position. The object then made a right-angle turn and accelerated away after at least 30 seconds.

Aug. 4, 1950; approx. 100 mi. SE of New York City (39' 35' N., 72' 24.5' W.). 10 a.m. EDT. Witnesses: Master Nils Lewring, Chief Mate Jacob Koelwyn, Third Mate, of M/V Marcala. One 10' cylindrical object at 50-100' altitude, flying with a churning or rotary motion, accelerated at end of 15 second sighting.

Aug. 20, 1950; Nicosia, Cyprus. 1:30 p.m. Witnesses: USAF MATS liaison officer Lt. William Ghormley, Col. W. V. Brown, Lt. col. L.w. Brauer. One small, round, bright object flew fast, straight and level for 15-20 seconds.

Aug. 25, 1950; approx. 250 mi. SW of Bermuda (29' 40' N., 67* 28' W.). 8 p.m. Witness: B-29 radarman S/Sgt. William Shaffer. Radar observation, plus possible blue streak 3 minutes later. B-29 followed unidentified target, then passed it at l/4-mile distance, target followed for 5 minutes, then passed B-29 and sped away. Total time of tracking: 20 minutes.

Aug. 30, 1950; Sandy Point, Newfoundland, Canada. 1:30 p.m. Witnesses: three local employees, including Kaeel and Alexander, of the Air Force Base. A dark, barrel-shaped object with a pole down from it into the water, flew at 3-5 m.p.h. and 15-20' altitude for 5 minutes.

Sept. 3, 1950; Spokane, Washington. 2 p.m. Witnesses: Maj R.J. Gardiner, Mrs. Gardiner and neighbor (former saw three objects, others saw one). Metallic bronze discs, 20-30' long, 2-6' thick. Moved independently and erratically for 5 minutes.

Sept. 20, 1950; Kit Carson, Colorado. 10:49 a.m. Witness identified only as a "reliable source". Two large, round, glowing objects and three smaller, internally lit objects. Two hovered for 1 minute, moved, and three smaller ones came from behind or within the two larger objects, and all sped upward and away.

Sept. 21, 1950; Provincetown, Massachusetts. 9:52 a.m. Witness: M.I.T. research associate and Air National Guard Maj. M.H. Ligda. Radar tracking of one object during M.I.T tracking of USAF flight of F-84 or F-86 jet fighters. Object speed was 22 miles/minute (l,200 m.p.h.), made turn of 11-12 gs acceleration during 1 minute observation.

Oct. 15, 1950; Oak Ridge, Tennessee. 3:20 p.m. Atomic Energy Commission Trooper Rymer, J. Moneymaker, Capt. Zarzecki. Two shiny silver objects shaped like bullet or bladder. They dove with a smoke trail and one vanished. The other hovered at 5-6, altitude, 50' away, left and returned several times somewhat further away.

Oct. 15, 1950; Pope AFB, North Carolina. Witness: Daniel. Listed as "unidentified" in folder index, but no supporting data could be found.

Oct 15, 1950; Pope AFB, North Carolina. Witness: Woodward. Same as previous observation.

Oct. 23, 1950; Bonlee, North Carolina. 12:42 p.m. Witness: ex-USAF pilot Frank Risher. One aluminum object shaped like a dirigible or Convair C-99 cargo plane, with 3 portholes, arrived from southeast, hovered 3-5 seconds and flew away to the south- south-east at end of 40 second sighting.

Nov. 5, 1950, Oak Ridge, Tennessee. 11:55 a.m. Witness: Fairchild Aircraft illustrator Don Patrick. One translucent object, light grey with dark core, shaped like a pear or bean. Flew for 5-10 minutes with rapid, darting movements.

Dec. 2, 1950; Nanyika, Kenya. 10:50 a.m. Mr. and Mrs. L. Scott. One pearly, iridescent object with a flattened top, spun while hovering and made a sound like bees buzzing. Only data in files was from East African "Standard" newspaper.

Dec. 6, 1950; Ft. Myers, Florida. 5 p.m. Witnesses: former aircraft purchasing agent Harry Lamp and four boys, using lO-power binoculars. One 75' object, 3-4' thick, bubble on top, silver with a red rim having two white and two orange jets along it. The center revolved when the object hovered; then it flew away very fast.

Dec. 11, 1950; l0 mi. NW of Gulcana, Alaska. 10:13 p.m. Witnesses: crew of Northwest Air Lines flight 802. Two white flashes, followed by a dark cloud which rose and split in two.

Jan. 8, 1951; South of Ft. Worth, Texas. 10:45 p.m. Witnesses: Mr. and Mrs. W.J. Boggus, plus unidentified drivers and passengers in other cars stopped to watch. Two groups of red and green lights in triangular formations were stationary and then moved.

Jan. 12, 1951, Ft. Benning, Georgia. 10 p.m. Witness: U.S. Army 2nd Lt. A.C. Hale. One light with a fan-shaped wake remained motionless like a star about 20 minutes and then sped away.

Jan 16, 1951; Artesia, New Mexico. Time unknown. Witnesses: Two members of a balloon project from the General Mills . Aeronautical Research Laboratory, the manger of the Artesia Airport, and three pilots. The balloon crew was observing their 110' balloon at an altitude of 112,000' when a dull white, round object was spotted. It appeared larger than the balloon, but made no movement. Later, the balloon crew and the others saw two objects from the airport; flying side-by-side, they circled the balloon and flew away to the northeast. The second observation lasted about 40 seconds. Note: there is confusion over the date of this case, with some USAF records showing it as 1952; however, 1951 appears to be correct.

Feb. 1, 1951; Johnson Air Base, Japan. 5:10 p.m. Witnesses: pilot and radar operator of F-82 night fighter. One amber light made three or four 360* turns to the right, reversed toward the F-82 and then climbed out of sight.

Feb. 21, 1951; Durban, South Africa. 4:55 a.m. Witnesses: three men in a truck, several other persons, none named. A dark red, torpedo-shaped object with darker center, flew straight and level.

Feb. 26, 1951; Ladd AFB, Alaska. 7:10 a.m. Witness: USAF Sgt. J.B. Sells. One dull grey, metallic object, estimated to be 120' long and 10-12' thick, hovered, puffed smoke and sped away after 1-1.5 minutes. Note: may have been Feb. 25.

Mar. 10, 1951; Chinnampo, Korea. 9:51 a.m. Witnesses: crew of USAF B-29 bomber, including scanners and tail gunner. A large red-yellow glow burst and became blue-white. No further information in files.

Mar. 13, 1951; McClellan AFB, California. 3:20 p.m. Witnesses: USAF lst Lt. B.J. Hastie, Mrs. Rafferty. A cylinder with twin tails, 200' long and 90' wide, turned north and flew at incredible speed. Two minutes.

Mar. 15, 1951; New Delhi, India. 10:20 a.m. Witnesses: 25 members of a flying club, including the chief aerial engineer and his two assistants. One metallic cigar-shaped object with white exhaust which turned black when it accelerated to an estimated 1,000 m.p.h. and made a large loop. Seven minutes.

June 1, 1951; Niagara Falls, New York. 4:20 a.m. Witnesses: M/Sgt H.E. Sweeney, 2 enlisted men. One glowing yellow-orange, saucer-shaped object with arc-shaped wings, flew straight up. Seen for 30-40 seconds.

July 24, 1951; Portsmouth, New Hampshire. 7:10 Witnesses: Hanscom AFB Operations Officer Capt. Cobb, Cpl. Fein. One 100-200' tubular object, 5 times long as it was wide, with fins at one end, and colored greyish with many black spots. Flew 800-1,000 m.p.h. at 1-2,000' altitude, leaving a faint swath. 20 seconds.

Aug. 25, 1951; Albuquerque, New Mexico. 9:58 p.m. Witnesses: Sandia Base Security Guard Hugh Young and wife. A flying wing- shaped craft passed over their heads at an estimated 800-1,000' altitude with no sound. Size estimated at 1.5 times wingspan of B-36 bomber,or 350'. Dark, chordwise stripes on underside, and 6-8 pairs of soft, glowing lights on trailing edge of "wing". Speed estimated at 300-400 m.p.h., object seen for about 30 seconds.

Aug. 31, ; Matador, Texas. 12:45 p.m. Witnesses: Mrs. Tom Tilson, one or two other women, all apparently of excellent reputations. One pear-shaped object with a length of a B-29 fuselage (100'), aluminum or silver with a port or some type of aperture on the side. It moved with smaller end forward, drifting slowly at about 150' altitude, then headed up in a circular fashion and out of sight after a few seconds.

Sept. 6, 1951; Claremont, California. 7:20 p.m. (not really clear). Witnesses: S/Sgt W.T. Smith, M/Sgt L.L. Duel (?). Six orange lights in an irregular formation, flew straight and level into a coastal fog bank after 3-4 minutes.

Sept. 14, 1951; Goose Bay, Labrador, Canada. 9:30 p.m. Witnesses: T/Sgt W.B. Maupin, Cpl. J.W. Green. Three objects tracked on radar. Two were on a collision course, then one evaded to the right upon the request, by radio, of one of the radar operators! No aircraft were known to be in the area. A third unidentified track then joined the first two. More than 15 minutes.

Oct. 2, 1951; Columbus, Ohio. 6 p.m. Witness: Battelle Memorial Institute graduate physicist Howard Cross. One bright oval with a clipped tail flew straight and level, fading into the distance after 1 minute.

Oct. 3, 1951; Kadena, Okinawa. 10:27 p.m. Witnesses: radar operators Sgt. M.W. Watson and Pvt. Gonzales and one other Sergeant. One large, sausage-shaped blip tracked at an estimated 4,800 m.p.h.

Oct. 9, 1951; Terre Haute, Indiana. 1:42 p.m. Witness: CAA Chief Aircraft Communicator Roy Messmore at Hulman Municipal Airport. One round silver object flew directly overhead, reaching the horizon in 15 seconds. Note: a very similar incident happened 3 minutes later near Paris, Illinois (15 miles NW) and was also listed as "unidentified" for several years, but was eventually reclassified.

Oct. 11, 1951; Minneapolis, Minnesota. 6:30 a.m. Witnesses: General Mills balloon researchers, including aeronautical engineer J.J. Kaliszewski, aerologist C.B. Moore, pilot Dick Reilly in the air, and Doug Smith on the ground. The flight crew saw the first object, a brightly glowing one with a dark underside and a halo around it. The object arrived high and fast, then slowed and made slow climbing circles for about two minutes, and finally sped away to the east. Soon they saw another one, confirmed by ground observers using a theodolite, which sped across the sky. Total time first object was seen was 5 minutes, second was a few seconds.

Nov. 18, 1951; Washington, D.C. 3:20 a.m. Witnesses: Crew of Capital Airlines DC-4 Fliqht 610, Andrews AFB Senior air traffic controller Tom Selby. One object with several lights, followed the DC-4 for about 20 minutes and then turned back.

Nov. 24, 1951; Mankato, Minnesota. 33:53 p.m. Witnesses: USAF or ANG pilots W.H. Fairbrother and D.E. Stewart in P-51 Mustangs. One milky white object shaped like Northrop flying wing (broad, slightly swept-back wing with no fuselage or tail). Estimated 8' span. Flew straight and level for 5 seconds.

Dec. 7, 1951; Sunbury, Ohio. 4:30 p.m. Witness: amateur astronomer Carl Loar. One silvery sphere seen through telescope. Two specks sighted at sides, object seemed to explode and was replaced by a dark cloud and many specks. 30 minutes.

Dec. 7, 1951; Oak Ridge, Tennessee. 8:15 a.m. Witness: Atomic Energy Commission guard J.H. Collins. One 20' square object, white-grey but not shiny flew above ridge to clouds and back again twice, taking 30-40 seconds each time.

Feb. 11, 1952; Pittsburgh, Pennsylvania. 3 a.m. Witnesses: Capt. G.P. Arns and Maj. R.J. Gedson flying a Beech AT-ll trainer. One yellow-orange comet-shaped object pulsed flame for 1-2 seconds of a 1 minute straight and level flight.

Feb. 23, 1952; over North Korea. 11:15 p.m. Witness: Captain/B-29 navigator. One bluish cylinder, three times long as wide, with a tail and rapid pulsations, came in high and fast, made several turns and leveled out under B-29 which was evading mild antiaircraft fire. 45 second sighting.

March 20, 1952; Centreville, Maryland. 10:42 p.m. Witnesses: WWl/WW2 veteran A.D. Hutchinson and son. One dull orange-yellow saucer-shaped light flew straight and level very fast for 30 seconds.

March 23, 1952; Yakima, Washington. 6:56 and 7 p.m. Witnesses: pilot and radar operator of F-94 jet interceptor. On either occasion, a red fireball increased in brightness and then faded over 45 second span. Stationary both times. Note: Project Blue Book Status Report #7 (May 31, 1952) says target was also tracked by ground radar at 78 knots (90 m.p.h.) at 22,500' and 25,000' altitude.

Bluebook Part 2

March 24, 1952; 60 miles west of Pt. Concepcion, California. 8:45 a.m. Witnesses: B-29 navigator and radar operator. One target tracked for 20-30 seconds at estimated 3,000 m.p.h.

March 29, 1952; 20 miles north of Misawa AFB, Japan. 11:20 a.m. Witness: Brigham, pilot of AT-6

trainer. One small, very thin, shiny metallic disc flew alongside the AT-6, then made a pass at an F-84 jet fighter, flipped on edge, fluttered 20' from the F-84's fuselage and flipped in the slipstream...all in 10 seconds.

April 4, 1952; Duncanville, Texas. 7:30 p.m. Witnesses: two radar operators of the 147th AC&W Squadron. One object was tracked for one minute by radar at an estimated 2,160 m.p.h.

April 5, 1952; Phoenix, Arizona. l0:40 a.m. Witnesses: Mr. and Mrs. L.G. Ryan, R.L. Stokes, D. Schook. One large, dull grey circular object, followed by two more, flew straight and level at high speed.

April 5, 1952; Miami, Florida. 9:15 p.m. Witnesses: L.E. VanDercar and 9 year old son. Four dark circular objects with mostly fuzzy edges, crossed face of Moon; each was half the apparent diameter of Moon. 2:59 p.m. Witness: H.L. Russell.

April 6, 1952; Temple, Texas. 2:59 p. 50-75 grey-white discs changed position within formation continually, tilted in unison every 12-15 seconds during 3.8 minute sighting.

April 12, 1952; North Bay, Ontario, Canada. 9:30 p.m. Witnesses: Royal Canadian Air Force Warrant Officer E.H. Rossell, Flight Sgt. R. McRae. One round amber object flew fast, stopped, reversed direction, climbed away at 30' angle during a 2 minute observation.

April 14, 1952; LaCrosse, Wisconsin. 12:35 p.m. Witness: unidentified CAL airline pilot. Several light colored objects flew in V-formation. No further details in files.

April 14, 1952; Memphis, Tennessee. 6:34 p.m. Witnesses: U.S. Navy pilots Lt. jg. Blacky, Lt. jg. O'Neil. One inverted bowl, 3' long and 1' high, with vertical slots, flew fast, straight and level, 100 yards from observers' aircraft for 45-60 seconds.

April 15, 1952; Santa Cruz, California. 7:40 p.m. Witness: Mr. Hayes, brother of Master Sergeant. Two faint objects observed flying fast along the horizon for 6-8 seconds, using 20x spotting telescope.

April 17, 1952; Longmeadow, Massachusetts. 8:30 p.m. Witnesses: S.B. Brooks, chemical engineer J.A. Eaton. One round, deep orange object flew fast and erratic, occasionally emitting a shaft of light to the rear during a 40 minute sighting.

April 17, 1952; Yuma, Arizona. 3:05 p.m. Witnesses: group of Army weather observation students, including several graduate engineers. One flat-white, circular object flew with an irregular trajectory and a brief trail, for about 7 seconds.

April 18, 1952; Yuma, Arizona. Time unknown. Witnesses: two Army weather observation students. One flat-white circular object flew for 5-10 seconds in a very erratic manner.

April 18, 1952; Bethesda, Maryland. l1:30 a.m. Witnesses: R. Poerstal and three other men. Seven to nine circular, orange-yellow lights in a 40^ V-formation flew overhead silently for 4-8 seconds, from south to north.

April 18, 1952; Corner Brook, Newfoundland, Canada. l0:l0 p.m. Witness: reporter Chic Shave. One round, yellow-gold object flew south and returned during 1.5 minute sighting.

April 18, 1952; 50 miles northwest of Kyushu, Japan (129* 51' E., 34' 19' N.). Witness: one radar operator. Tracked unidentified target for 1 minute at 2,700 m.p.h.

April 18, 1952; Corner Brook, Newfoundland, Canada. 4 a.m. Witness: janitor C. Hamilton. One yellow-

gold object made a sharp turn and left a short, dark trail during l minute sighting.

April 22, 1952; Naha AFB, Okinawa. 99 p.m. Witnesses: crew of B-29 bomber, on ground. One elliptical object, followed by two and then another two, each with a white light that blinked every 1-2 seconds as they performed erratic maneuvers for 10 minutes.

April 24, 1952; Bellevue Hill, Vermont. 5 a.m. Witnesses: crew of USAF C-124 transport plane. Three circular, bluish objects in loose "fingertip" formation twice flew parallel to airplane during 3-4 minute period.

April 24, 1952; Milton, Massachusetts. 2:30 p.m. Witnesses: three Cambridge Research Center electronics engineers, one named Buruish. Two flat, red squares flew wobbly in level flight, climbed, leveled out during 1.5 minute observation.

April 24, 1952; Clovis, New Mexico. 8:10 p.m. Witness: USAF light Surgeon Maj. E.L. Ellis. Many orange-amber lights, sometimes separate, sometimes fused, behaved erratically. Speed varied from motionless to very fast during 5 minute sighting.

April 27, 1952; Roseville, Michigan. 4:15 p.m. Witnesses: H.A. Freytag and three male relatives, including a minister. One silver oval rolled, descended and stopped. Two silver cigar- shaped objects appeared, one departing to the east and one to the west. A third silver cigar-shaped object flew by at high speed. Sightings lasted 45 minutes.

April 27, 1952; Yuma, Arizona. 8:30 p.m. Witnesses: M/Sgt. and Mrs. G.S. Porter (he was off-duty control tower operator). Bright red or flame-colored discs, appearing as large as fighter planes. Seven sightings of one disc, one of two in formation during 2 hours. All seen below 11,000' overcast.

April 29, 1952; Marshall, Texas. 3:30 p.m. Witness: private pilot R.R. Weidman. One round, white object which flew straight, with a side-to-side oscillation for 1.5 minutes.

April 29, 1952; Goodland, Kansas. 100 p.m. Witness: B-29 bombardier Lt. R.H. Bauer. One white fan-shaped light pulsed 3-4 times per second for 2 seconds.

May 1, 1952; Moses Lake, Washington. 5:32 a.m. Witnesses: Two Atomic Energy Commission employees, Eggan and Shipley. One silver object without wings flew straight and level for 1.5 minutes.

May 1, 1952; George AFB, California. 10:50 a.m. Witnesses: three men on the arms range, plus one Lt. Colonel 4 miles away. Five flat-white discs about the diameter of a C-47's wingspan (95') flew fast, made a 90^ turn in a formation of three in front and two behind, and darted around, for 15-30 seconds.

May 5, 1952; Tenafly, New Jersey. 10:45 p.m. Witness: Mrs. M.M. Judson. Six or seven translucent, cream-yellow objects. One moved in an ellipse, while the others moved in and out.

May 7, 1952; Keesler AFB, Mississippi. 12:15 p.m. Witnesses: Capt. Morris, a Master Sergeant, a Staff Sergeant, and an Airman First Class. Ten times, an aluminum or silver cylindrical object was seen to dart in and out of the clouds during a 5-10 minute period.

May 9, 1952; George AFB, California. 5:20 p.m. Witness: A/lc G.C. Grindeland. One dull white, arrowhead-shaped object flew straight and level for 10 seconds.

May 10, 1952; Ellenton, South Carolina. 10:45 p.m. Witnesses: 4 Dupont employees at the Savannah River nuclear plant. Up to four yellow, disc-shaped objects were seen on five occasions between 10:45 and shortly after 11:15.

May 14, 1952; Mayaquez, Puerto Rico. 7 p.m. Witnesses: Attorney and ex-USAF pilot Mr. Stipes, Sr. Garcia-Mendez. Two shining orange spheres: one was stationary, while the other darted away and back for 30 minutes.

May 20, 1952; Houston, Texas. l0:l0 p.m. Witnesses: USAF pilots Capt. J. Spurgin and Capt. BB. Stephan. One bright or white oval object moved from side-to-side while making a gradual turn for 90 seconds.

May 25, 1952; Walnut Lake, Michigan. 9:15 p.m. Witnesses: seven persons, including John Hoffman, his family and friends. One large white circular object having dark sections on its rim, flew straight and level for 30 minutes, appearing red when behind a cloud.

May 28, 1952; Saigon, French Indo China. 10:30 a.m. Witnesses: many in crowd watching a ceremony. One white-silver disc-shaped object flew straight and fast for 2 minutes.

May 28, 1952; Albuquerque, New Mexico. 1:45-2:40 p.m. Witnesses: two city fire department employees. Two circular objects--one shiny silver and the other orange or light brown-- were seen three times performing fast maneuvers.

May 29, 1952; San Antonio, Texas. 7 p.m. Witness: USAF pilot Maj. D.W. Feuerstein, on ground. One bright tubular object tilted from horizontal to vertical for 8 minutes, then slowly returned to horizontal, again tilted vertical, accelerated, appeared to lengthen and turned red. The entire sighting lasted 14 minutes.

June 1, 1952; Rapid City, South Dakota. 6 p.m. Witnesses: A/lc Beatty and two civilians. At least five long silver objects flew in a neat box formation with a leader for 15-20 seconds.

June 1, 1952; Walla , Washington. 1 p.m. Witness: ex-military pilot Reserve Maj. W.C. Vollendorf. One oval object with a "definite airfoil" performed a fast climb for 7 seconds.

June l, 1952; Soap Lake, Washington. 3+ p.m. Witness: Ray Lottman. Three glimmering objects flew straight and level for 10 minutes.

June 2, 1952; Bayview, Washington. 5:02 p.m. Witness: Larry McWade. One purple object seen for unknown length of time. No further information in files.

June 2, 1952; Fulda, West Germany. Time unknown. Witness: lst Lt. John Hendry, photo-navigator on an RB-26C reconnaissance bomber. One porcelain-white object flew very fast for an unknown length of time.

June 5, 1952; Lubbock, Texas. 11 p.m. Witnesses: Dan Benson, Mr. Bacon. A total of eight yellow circular objects, like large stars, were seen during 45 minutes. The first two were in a trail formation, the others were seen singly.

June 5, 1952; Albuquerque, New Mexico. 6:45 p.m. Witness: S/Sgt T.H. Shorey. One shiny round object flew 5-6 times as fast as an F-86 jet fighter for 6 seconds.

June 5, 1952; Offutt AFB, Omaha, Nebraska. 11 p.m. Witnesses: 2nd Lt. W.R. Soper, a Strategic Air Command top secret control officer and former OSI agent; and two other persons. One bright red object remained stationary for 4.5 minutes before speeding away with a short tail.

June 6, 1952; Kimpo AFB, Korea. Case missing from official files.

June 7, 1952; Albuquerque, New Mexico. 11:18 a.m. Witnesses: crew of B-25 bomber #8840 at 11,500'. One rectangular aluminum object, about 6'x4', flew 250-300' below the B-25.

June 8, 1952; Albuquerque, New Mexico. 10:50 a.m. Witnesses: Mr. and Mrs. J.D. Markland. Four shiny objects flew straight and level in a diamond formation.

June 9, 1952; Minneapolis, Minnesota. Case missing from official files.

June 12, 1952; Ft. Smith, Arkansas. 7:30 p.m. Witnesses: U.S. Army Major and Lt. Colonel, using binoculars. One orange ball with a tail flew with a low angular velocity.

June 12, 1952; Marakesch, Morocco. 11:26 a.m. Witness: T/Sgt. H.D. Adams, operating an SCR-584 radar set. One unidentified blip tracked at 650 kts. (750 m.p.h.) at greater than 60,000' altitude.

June 13, 1952; Middletown, Pennsylvania. 8:45 p.m. Witness: R.S. Thomas, Olmstead AFB employee and former control tower operator. One round, orange object traveled south, stopped for 1 second, turned east, stopped 1 second, and went down.

June 15, 1952; Louisville, Kentucky. 11:50 p.m. Witness: Edward Duke, ex-U.S. Navy radar technician. One large, cigar- shaped object with a blunt front, lit sides and a red stern, maneuvered in a leisurely fashion for 15 minutes.

June 16, 1952; Walker AFB, New Mexico. 8:30 p.m. Witness: USAF maintenance specialist S/Sgt. Sparks. Five or six grayish discs, in a half-moon formation, flew at 500-600 m.p.h. for l minute.

June 17, 1952; McChord AFB, Washington. Between 7:30 and 10:20 p.m. Witnesses: many and varied. From one to five large silver-yellow objects flew erratically, stopped and started for about 15 minutes.

June 17, 1952; Cape Cod, Massachusetts. 1:28 a.m. Witness: pilot of USAF F-94 jet interceptor. A light like a bright star crossed the nose of the airplane while being observed for 15 seconds. No further information in the files.

June 18, 1952; Columbus, Wisconsin. 9 a.m. Witness: R.A. Finger. One crescent-shaped object hovered for several seconds and then sped away.

June 18, 1952; Walnut Lake, Michigan. 10 p.m. Witnesses: Marron Hoffman and four relatives, using 4x binoculars. One orange light was observed zigzagging and then hovering for an unspecified length of time.

June 19, 1952; Goose Bay, Labrador, Canada. 2:37 a.m. Witness: 2nd Lt. A'Gostino and unidentified radar operator. One red light turned white while wobbling. Radar tracked a stationary target during the 1 minute sighting.

June 19, 1952; Yuma, Arizona. 2 p.m. Witness: USAF pilot John Lane. One round, white object flew straight and level for 10 seconds.

June 20, 1952; Central Korea. 3:03 p.m. Witnesses: four Marine Corps Captains and pilots of F4U-4B Corsair fighter planes. One 10-20' white or silver oval object made a left-hand orbit at terrific speed for 60 seconds.

June 21, 1952; Kelly AFB, Texas. 12:30 p.m. Witness: T/Sgt. Howard Davis, flight engineer of B-29 bomber at 8,000' altitude. One flat object with a sharply pointed front and rounded rear; white with a dark blue center and red rim, trailed sparks as it dove past the B-29 at a distance of 500', in l second.

June 22, 1952; Pyungthek, Korea. 10:45 p.m. Witnesses: Two Marine Corps Sergeants. One 4 ft. diameter object dove at a runway shooting red flames, hovered briefly over a hill, turned 180 , flashed twice and was gone.

June 23, 1952; Spokane, Washington. 4:05 p.m. Witness: Airport weather observer Rex Thompson. One round disc with a metallic shine flashed, and fluttered like a flipped coin for 5-7 minutes.

June 23, 1952; McChord AFB, Washington. 9 p.m. Witness: 2nd Lt. K. Thompson. One very large light flew straight and level for 10 minutes. No further information.

June 23, 1952; Kirksville, Missouri. Case missing from official files.

June 23, 1952; Oak Ridge, Tennessee. 3:30 a.m. Witness: secretary Martha Milligan. One bullet-shaped object with burnt-orange exhaust flew straight and level for 30-60 seconds.

June 23, 1952; Owensboro, Kentucky. 10:00 a.m. Witness: National Guard Lt. Col. O. L. Depp. Two objects looking like "giant soap bubbles", reflecting yellow and lavender colors, flew in trail for 5 seconds.

June 23, 1952; Location unknown, but information came via Japan Hq. "CV 4359". 6:08 a.m. Witness: USAF pilot of the l8th Fighter-Bomber Group. One black coin-shaped object, 15-20' in diameter, made an irregular descent.

June 25, 1952; Chicago, Illinois. 8:30 p.m. Witnesses: Mrs. Norbury, Mr. Matheis. One bright yellow-white, egg-shaped object which sometimes had a red tail, made seven circles in 1 1/2 hours.

June 25, 1982; Japan-Korea area. Case missing from official files.

June 26, 1952; Terre Haute, Indiana. 2:45 a.m. Witness: USAF 2nd Lt. C. W. Povelites. Undescribed object flew at 600 m.p.h. and then stopped. No further information in files.

June 26, 1952; Pottstown, Pennsylvania. 11:50 p.m. Witness: assistant manager of airport. Three sightings of flashing lights: two lights separated by 2 miles, with the leader flashing steadily and the other irregularly; two similarly flashing lights, but with l mile separation; finally a single light. Speed estimated at 150-250 m.p.h.. Total of 1/2 hour.

June 27, 1952; Topeka, Kansas. 6:50 p.m. Witnesses: USAF pilot 2nd Lt. K. P. Kelly and wife. One pulsating red object which changed shape from a circular to a vertical oval as it pulsed. Was stationary for about 5 minutes, then went out.

June 28, 1952; Lake Kishkanoug, Wisconsin. 6 p.m. Witness: G. Metcalfe. One silver-white sphere became an ellipse as it turned and climbed away very fast. 10 seconds.

June 28, 1952; Nagoya, Japan. 4:10 p.m. Witness: Capt. T. W. Barger, USAF electronics countermeasures officer. One dark blue elliptical-shaped object with a pulsing border flew straight and level at 700-800 m.p.h..

June 29, 1952; O'Hare Airport, Chicago, Illinois. 5:45 p.m. witnesses: three USAF air policemen. One bright silver, flat oval object surrounded by a blue haze, hovered, then moved very fast to the right and to the left, and up and down for 45 minutes.

July 3, 1952; Selfridge AFB, Michigan. 4:15 a.m. Witnesses not identified. Two big lights, estimated at 20' diameter, flew straight and level at tremendous speed.

July 3, 1952; Chicago, Illinois. 11:50 p.m. Witness: Mrs. J. D. Arbuckle. Two bright pastel green discs flew straight and level very fast for 6 seconds.

July 5, 1952; Norman, Oklahoma. 7:58 p.m. Witness: Oklahoma State Patrolman Hamilton in State Patrol airplane. Three dark discs hovered and then flew away, silhouetted against a dark cloud. 15 seconds.

July 6-12, 1952; Elizabeth, New Jersey. 11:00 p.m. Witness: Charles Muhr. Four pictures taken of some indistinct light which was admittedly not seen visually, but which appeared on the negatives.

July 9, 1952; Colorado Springs, Colorado. 12:45 p.m. Witness: USAF pilot Maj. C. K. Griffin. One object shaped like an airfoil less its trailing edge, luminous white, moved slowly and erratically for 12 minutes.

July 9, 1952; Kutztown, Pennsylvania. 6:30 p.m. Witness: farmer John Mittl. One aluminum, oval-shaped object changed direction and attitude, finally tipping on end and departing after 20 seconds. Case file includes three vague photographs.

July 9, 1952; Rapid City AFB, South Dakota. 3:35 p.m. Witnesses: S/Sgt. D.P. Foster and three other persons. Three times, a single white, disc-shaped object sped by, straight and level, in 5 seconds.

July 12, 1952; Annapolis, Maryland. 3:30 p.m. Witness: insurance company president William Washburn. Four large, elliptical-shaped objects were seen to fly very fast, stop, turn 90* and fly away in 7-8 seconds. .

July 12, 1952; Kirksville, Missouri. 9 p.m. Witnesses: many radar controllers who were military officers. Several big blips tracked on radar at 1,500 kts. (1,700 m.p.h.). There was no visual sighting.

July 14, 1952; Norfolk, Virginia. 8:12 p.m. Witnesses: Pan American Airways First Officer William Nash, Second Officer William Fortenberry. Eight large, round, glowing red objects maneuvered below their airliner, in formation.

July 15, 1952; West Palm Beach, Florida. 10:10 p.m. Witnesses: J. Antoneff and two other persons. One discus-shaped object, grayish, except when hovering, when it appeared muddy. Hovered over Palm Beach International Airport, then followed an SA-l6 twin-engined amphibian and flew away after 40-60 seconds.

July 16, 1952; Beverly, Massachusetts. 9:35 a.m. Witness: U.S. Coast Guard photographer Shell Alpert. Four roughly elliptical blobs of light in formation photographed through window of photo lab.

July 17, 1952; White Plains, New York. 3:10 p.m. Witness: Mrs. Florence Daley. Two round objects, bluish-white with brighter rims, flew in formation, making a sound like bombers, only softer. Note: Later, the witness stated she heard many feminine voices coming from the objects.

July 17, 1952; Lockbourne, Ohio. 11 a.m. Witness: Air National Guard employees. One light like a big star was seen for 3 hours, but disappeared when an aircraft approached. Also seen the night of July 20, 22 and 23.

July 18, 1952; Lockbourne, Ohio. 9:10 p.m. Witnesses: T/Sgt. Mahone, A/3c Jennings. One amber-colored, elliptical-shaped object with a small flame at the rear, periodically increased in brightness. It moved very fast for l 1/2 minutes, giving off a resonant beat sound.

July 18, 1952; Miami, Florida. 11 a.m. Witnesses: E. R. Raymer and daughter. One opaque, silvery bubble flew very fast at a right-angle to the wind direction for 10 seconds.

July 18, 1952; Patrick AFB, Florida. 9:45 p.m. Witnesses: three USAF officers and four enlisted men. Over an hour period, a series of hovering and maneuvering red-orange lights were observed moving in a variety of directions.

July 19, 1952; Williston, North Dakota. 2:55 a.m. Witness: one experienced civilian pilot. One elliptical-shaped object with a light fringe, traveled down fast, made a 360* and then a 180* turn in 5 minutes.

July 19, 1952; Elkins Park, Pennsylvania. 11:35 p.m. Witnesses: USAF pilot Capt. C.J. powley and wife. Two star-like lights maneuvered, hovered and sped for 5-7 minutes.

July 20, 1952; Lavalette, New Jersey. 12:20 a.m. Witness: Seton Hall Univ. chemistry professor Dr. A.B. Spooner. Two large orange-yellow lights with some dull red coloring flew in trail, turned and circled for 5-6 minutes.

July 21, 1952; Weisbaden, West Germany. 6:30 p.m. Witnesses: USAF pilot Capt. E.E. Dougher, WAF Lt. J.J. Stong, situated miles apart. Four bright yellowish lights were seen by Dougher to separate, with two climbing and two flying away level in the opposite direction. Stong watched two reddish lights fly in opposite directions. Sightings lasted about 10-15 minutes.

July 21, 1952; San Marcos AFB, Texas. 10:40 p.m. Witnesses: one Lieutenant, two Staff Sergeants, three airmen. One blue circle with a blue trail was seen to hover and then accelerate to near-sonic speed (700+ m.p.h.) after 1 minute.

July 21, 1952; Converse, Texas. 4:30 p.m. Witness: wife of USAF Capt. J. B. Neal. One elongated, fuselage-shaped object flew straight and level, made a right-angle turn and went out of sight at more than 300 m.p.h., all in 3-5 seconds.

July 21, 1952; Rockville, Indiana. 8:10 p.m. Witnesses: one military officer, two enlisted men. One aluminum, delta-shaped object with a vertical fin, flew straight and level, and then hovered during a 3 minute sighting.

July 22, 1952; Holyoke, Massachusetts. After midnight. Witness: Mrs. A. Burgess. One round, yellow, flashing light went downward. No further information in files.

July 22, 1952; Los Alamos, New Mexico. 10:50 a.m. Witnesses: control tower operator Don Weins, and two pilots for Carco. Eight large, round, bright aluminum objects flew straight and level, then darted around erratically during 25 minutes.

July 22, 1952; Uvalde, Texas. 2:46 p.m. Witness: Don Epperly, Trans Texas Airlines station manager and weather observer. One large, round, silver object flew at more than 1,000 m.p.h. for 45 seconds, while gyrating.

July 22, 1952; between Boston and Provincetown, Massachusetts. 10:47 p.m. Witnesses: pilot and radar operator of USAF F-94 jet interceptor. One round blue light passed F-94, spinning.

July 22, 1952; Trenton, New Jersey. 10:50 p.m. t.o 12:45 a.m., July 23. Witnesses: crews of several USAF F-94 jet interceptors from Dover AFB, Del. Thirteen visual sightings and one radar tracking of blue-white lights during two hours.

July 23, 1952; Pottstown, Pennsylvania. 8:40 a.m. Witnesses: the two-man crews of three USAF F-94 jet interceptors. One large silver object, shaped like a long pear with two or three squares beneath it, flew at 150-180 kts. (170-210 m.p.h.), while a smaller object, delta-shaped or swept back, flew around it at

1,000-1,500 kts. (1,150-1,700 m.p.h.). Seen by crews for 1-4 minutes.

Bluebook Part 3

July 23, 1952; Altoona, Pennsylvania. 12:50 p.m. Witnesses: two-man crews of two USAF F-94 jet interceptors at 35-46,000' altitude. Three cylindrical objects in a vertical stack formation flew at an altitude of 50-80,000'. Seen for 20 minutes.

July 23, 1952; South Bend, Indiana. 11:35 p.m. Witness: USAF pilot Capt. H. W. Kloth. Two bright blue-white objects flew together, then the rear one veered off after about 9 minutes.

July 24, 1952; Carson Sink, Nevada. 3:40 p.m. Witnesses: two USAF Lt. Colonels McGinn and Barton in a B-25 bomber. Three silver, delta-shaped objects, each with a ridge along the top, crossed in front of and above the B-25 at high speed, in 3-4 seconds.

July 26, 1952; Washington, D.C. 8 p.m. until after midnight. Witnesses: radar operators at several airports, airline pilots. Many unidentified blips tracked by radar all over Washington area, at varying speeds. Pilots spotted unidentified lights.

July 26, 1952; Kansas City, Missouri. 12:15 a.m. Witnesses: USAF Capt. H. A. Stone, men in control towers at Fairfax Field and Municipal Airport. One greenish light with red-orange flashes was seen for 1 hour as it descended in the northwest from 40* elevation to 10* elevation.

July 26, 1952; Andrews AFB, Maryland. This was a continuation of the extensive sightings and radar tracking reports reported throughout the Washington, D.C. area, all night long.

July 26, 1952; Kirtland AFB, New Mexico. 12:05 a.m. Witness: Airman lst Class J.M. Donaldson. Eight to ten orange balls in a triangular or V-formation flew very fast for 3-4 seconds.

July 26, 1952; Williams, California. Case missing from official files.

July 27, 1952; Selfridge AFB, Michigan. 10:05 a.m. Witnesses: three B-29 bomber crewmen on ground. Many round, white objects flew straight and level, very fast. Two at 10:05, one at 10:10, one at 10:15, one at 10:20. Each was seen for about 30 seconds.

July 27, 1952; Wichita Falls, Texas. 8:30 p.m. Witnesses: Mr. and Mrs. Adrian Ellis. Two disc-shaped objects, illuminated by a phosphorus light, flew at an estimated l,000 m.p.h. for 15 seconds.

July 28, 1952; Heidelberg, West Germany. 10:20 p.m. Witnesses: Sgt. B.C. Grassmoen, WAC Pfc. A.P. Turner. One saucer-shaped object having an appearance of light metal and giving off shafts of white light, flew slow, made a 90^ turn and climbed away fast after 4-5 minutes.

July 28, 1952; McGuire AFB, New Jersey. 6 a.m. Witness: Ground Control Approach radar operator M/Sgt. W.F. Dees, and persons in the base control tower. Radar tracked a large cluster of very distinct blips. Visual observation was of oblong objects having neither wings nor tail, which made a very fast turn and at one time were in echelon formation. Entire episode lasted 55 minutes.

July 28, 1952; McChord AFB, Washington. 2:15 a.m. Witnesses: T/Sgt. Walstead, S/Sgt. Calkins of the 635th AC&W Squadron. One dull, glowing, blue-green ball,.the size of a dime at arms' length, flew very fast, straight and level.

July 29, 1952; Osceola, Wisconsin. 1:30 a.m. Witnesses: radar operators on ground, pilot of F-5l

Mustang in flight. Several clusters of up to 10 small radar targets and one large target. Small targets moved from southwest to east at 50-60 kts. (60-70 m.p.h.), following each other. The large one moved at 600 kts. (700 m.p.h.). One hour total time. Pilot confirmed one target.

July 29, 1952; Langley AFB, Virginia. 2:30 p.m. Witness: USAF Capt D.G. Moore, of military air traffic control system. One undescribed object flew at an estimated 2,600 m.p.h., below 5,000' altitude, toward the air base for about 2 minutes.

July 29, 1952; Langley AFB, Virginia. 2:50 p.m. Witnesses: Mr. Moore, Gilfillan electronics representative W. Yhope. One radar target tracked moving away, stopped for 2 minutes, again moved very, very fast. Four minutes.

July 29, 1952; Merced, California. 3:44 or 4:35 p.m. Witnesses: Herbert Mitchell and one employee. One dark, discus-shaped object, trailed by a silvery light 2 lengths behind, tipped on its side, dove, hesitated and then circled very fast during the 2 minute sighting.

July 29, 1952; Wichita, Kansas. 12:35 p.m. Witnesses: USAF shop employees Douglas and Hess at Municipal Airport. One bright white circular object with a flat bottom flew very fast, and then hovered 10-15 seconds over the Cessna Aircraft Co. plant, during the 5 minute sighting.

July 29, 1952; Ennis, Montana. 12:30 p.m. Witnesses: USAF persons, alerted that UFOs were coming from the direction of Seattle, Wash. Two to five flat disc-shaped objects: one hovered 3-4 minutes, while the others circled it. Sighting length of 30 minutes not explained further.

July 30, 1952; Albuquerque, New Mexico. 11:02 p.m. Witness: USAF lst Lt. George Funk. One orange light remained stationary for 10 minutes. No further details in files.

July 30, 1952; San Antonio, Texas. 10 a.m. Witnesses: E.E. Nye and one other person. One round, white object flew slow and then sped away after 20-30 minutes.

Aug. 1, 1952; Lancaster, California. 1:14 a.m. Witnesses: sheriff's deputies and other persons, one named Mallette. Two brilliant red lights hovered and maneuvered for 5 minutes.

Aug. 2, 1952; Lake Charles, Louisiana. 3 a.m. Witnesses: USAF lst Lt. W.A. Theil, one enlisted man. One red ball with a blue flame tail flew straight and level for 3-4 seconds.

Aug. 4, 1952; Phoenix, Arizona. 2:20 a.m. Witness: USAF A/3c W.F. Vain. One yellow ball which lengthened and narrowed to plate shape, flew straight and level for 5 minutes.

Aug. 4, 1952; Mt. Vernon, New York. 11:37 a.m. Witnesses: one woman, two children. One object, shaped like a lifesaver or donut, emitted black smoke from its top and made a 15' arc in 1.5 minutes. Observed for 2 hours.

Aug 5. 1952; Haneda AFB, Japan. 11:30 p.m. Witnesses: USAF F-94 jet interceptor pilots lst Lt. W.R. Holder and lst Lt. A.M. Jones, and Haneda control tower operators. Airborne radar tracked a target for 90 seconds. Control tower operators watched 50-60 minutes while a dark shape with a light flew as fast as 330 kts. (380 m.p.h.), hovered, flew curves and performed a variety of maneuvers.

Aug. 6, 1952; Tokyo, Japan. This is a continuation of the Haneda AFB sightings.

Aug. 6, 1952; Port Austin, Michigan. Case missing from official files.

Aug. 7. 1952; San Antonio, Texas. 9:08 a.m. Witness: Mrs. Susan Pfuhl. Four glowing white discs: one

made a 180* turn, one flew straight and level, one veered off, and one circled during the 70 minute sighting.

Aug. 9, 1952; Lake Charles, Louisiana. 10:50 a.m. Witness: USAF A/3c J.P. Raley. One disc-shaped object flew very fast and then hovered for 2 seconds during a 5-6 minute sighting.

Aug. 13, 1952; Tokyo, Japan. 9:45 p.m. Witness: USAF Marine Corps pilot Maj. D. McGough. One orange light flew a left orbit at 8,000' and 230 m.p.h., spiraled down to no more than 1,500', remained stationary for 2-3 minutes and went out. An attempted interception was unsuccessful.

Aug. 18, 1952; Fairfield, California. 12:50 a.m. Witnesses: three policemen. One object changed color like a diamond, and changed directions during the 30 minute sighting.

Aug. 19, 1952; Red Bluff, California. 2:38 p.m. Witness: Ground Observer Corps observer Albert Lathrop. Two objects, shaped like fat bullets, flew straight and level, very fast for 25 seconds.

Aug. 20, 1952; Neffesville, Pennsylvania. 3:10 a.m. Witnesses: Bill Ford and two others. An undescribed object flew at 500' altitude for several minutes. No further data in files.

Aug. 21, 1952; Dallas, Texas. 11:54 p.m. Witness: Jack Rossen, ex-artillery observer. Three blue-white lights hovered then descended; 1.5 minutes later, one of them descended more.

Aug. 23, 1952; Akron, Ohio. 4:10 a.m. Witnesses: USAF 2nd Lt. H.K. Funseth, a ground radar observer, and two U.S. Navy men. One pulsing amber light was seen to fly straight and level for 7 minutes.

Aug. 24, 1952; Hermanas, Mexico. 10:15 a.m. Witness: Georgia Air National Guard F-84G jet fighter pilot Col. G.W. Johnson. Two 6' silver balls in abreast formation, one turned grey rapidly, the other slowly. One changed to long grey shape during a turn. Sighting lasted about 10 minutes.

Aug. 24, 1952; Tucson, Arizona. 5:40 p.m. Witnesses: Mr. and Mrs. George White. One large round, metallic, white light with a vague lower surface, flew slowly, then fast With a dancing, wavering motion, for about 1 minute.

Aug. 24, 1952; Levelland, Texas. 9:30 p.m., 10:30 p.m. Witnesses: Mr. and Mrs. Elmer Sharp. One object, shaped like a spinning top, changing color from red to yellow to blue, and with a fiery tail, hovered for 20 minutes, whistling, then flew away. It, or another like it, returned an hour later.

Aug. 25, 1952; Pittsburg, Kansas. 5:35 a.m. Witness: radio station musician William Squyres. One dull aluminum object, shaped like two meat platters, face to face, estimated at 75' long, 45' wide, and 15' thick. Through a window in the front section shone a blue light; the head and shoulders of a man could be seen. The mid section had numerous windows through which could be seen some kind of regular movement. A series of small propellers were spaced close together along the outer edge of the object, revolving at high speed. The object was hovering about 10' above the ground, 100 yards off the road, with a slight rocking motion. It then ascended vertically with a sound like a large covey of quail starting to fly at the same time. Vegetation showed signs of having been disturbed under the object.

Aug. 25, 1952; Holloman AFB, New Mexico. 3:40 p.m. Witnesses: civilian supervisor Fred Lee, foreman L.A. Aquilar. One round silver object flew south, turned and flew north, made a 360 turn and flew away vertically after 3-5 minutes.

Aug. 26, 1952; Lathrop Wells, Nevada. 12:10 a.m. Witness: USAF Capt. D.A. Woods. One large, round, very bright object with a V-shaped contrail having a dark cone in the center, flew very fast, hovered, made an instantaneous 90 turn, followed by a gentle climb and finally sudden acceleration.

Aug. 28, 1952; Chickasaw and Brookley AFB, Alabama. 9:30 p.m. Witnesses: USAF control tower operators, officer from USAF Office of Special Investigations, and others. Six objects, varying from fiery red to sparkling diamond appearance, hovered, flew erratically up and down for 1 hour and l5minutes.

Aug. 29, 1952; Colorado Springs, Colorado. 8:35 p.m. Witness: pilot C.A. Magruder. Three objects, 50' in diameter, 10' high, aluminum with red-yellow exhaust, flew in trail at estimated 1,500 m.p.h. for 4-5 seconds.

Aug. 29, 1952; west of Thule, Greenland (77' N., 75* 15' W.) 10:50 a.m. Witnesses: two U.S. Navy pilots flying a P4Y-2 patrol plane. Three white disc-shaped or spherical objects hovered, then flew very fast in a triangular formation, in 2-3 minutes.

Sept. l, 1952; Marietta, Georgia. 10:50 p.m. Witness: ex-AAF B-25 gunner. Two large white disc-shaped objects with green vapor trails flew in trail formation, merged, flew away very fast.

Sept. 1, 1952; Marietta, Georgia. 10:30 p.m. Witness: one unidentified person using binoculars. Two large objects shaped like spinning tops and displaying red, blue and green colors, flew side by side, leaving a sparkling trail for 30 minutes.

Sept. 1, 1952; Atlanta, Georgia. 9:43 p.m. Witnesses: Mrs. William Davis and nine other persons. One light, similar to the evening star, moved up and down for a long period of time.

Sept. l, 1952; Marietta, Georgia. 10:30 p.m. Witnesses: Mr. Bowman (ex-artillery officer) and 24 others. A red, white, and blue-green object which spun and shot off sparks for 15 minutes.

Sept. 1, 1952; Yaak, Montana. 4:45 a.m. Witnesses: Visual sighting by two USAF enlisted men, radar tracking seen by three men using AN/FPS-3 radar set. Two small, varicolored lights became black silhouettes at dawn; flew erratically. One hour.

Sept. 2, 1952; Chicago, Illinois. 3 a.m. Witness: radar tracker Turason (ground controlled approach) at Midway Airport. 40 targets flew in miscellaneous directions, up to 175 m.p.h. Two seemed to fly in formation with DC-6 airliner. Total of 8 hours.

Sept. 3, 1952; Tucson, Arizona. 99 a.m. Witnesses: civilian pilots McCraven and Thomas. One shiny, dark ellipse made three broad, curving sweeps in 1.5 minutes.

Sept. 6, 1952; Lake Charles AFB, Louisiana. l:3O'a.m. Witnesses: T/Sgt. J.E. Wilson and two enlisted men. One bright star-like light moved about the sky for 2 hours.

Sept. 6, 1952; Tucson, Arizona. 4:55 p.m. Witnesses: ex- Congresswoman Mrs. Isabella King and Bill McClain. One orange teardrop-shaped object whirled on its vertical axis, descended very fast, stopped, retraced its path upwards, while whirling in the opposite direction. 1.5 minutes.

Sept. 7, 1952; San Antonio, Texas. 10:30 p.m. Witnesses: chemist J.W. Gibson and others. One orange object or light (the color of 2,000' F.) exploded into view. Seen for from 3-20 seconds by various observers.

Sept. 9, 1952; Rabat, French Morocco. 9 p.m. Witness: E.J. Colisimo, a civilian illustrator with USAF Intelligence. One disc with lights along part of its circumference, flew twice as fast as a T-33 jet trainer, in a slightly curved path for 5 seconds.

Sept. 12, 1952; Allen, Maryland. 9:30 p.m. Witnesses: Mr. and Mrs. David Kolb, of the Ground Observer

Corps, using binoculars. One white light with a red trim and streamers flew northeast for 35 minutes.

Sept. 13, 1952; Allentown, Pennsylvania. 7:40 p.m. Witness: private pilot W.A. Hobler, flying a Beech Bonanza. One object, shaped like a fat football, flaming orange-red color, descended and then pulled up in front of the witness' airplane. Seen for 2 seconds.

Sept. 14, 1952; Santa Barbara, California. 8:40 p.m. Witness: USAF C-54 transport pilot Tarbutton. One blue-white light travelled straight and level, then went up. Seen for 30 seconds.

Sept. 14, 1952; North Atlantic, between Ireland and Iceland. Witnesses: military persons from several countries aboard ships in the NATO "Operation Mainbrace" exercise. Among the sightings: one blue-green triangle was observed flying 1,500 m.p.h; three objects in a triangular formation gave off white light exhaust at 1,500 m.p.h.

Sept. 14, 1952; White Lake, South Dakota. 7 p.m. Witness: Ground Observer Corps observer L.W. Barnes, using binoculars. One red, cigar-shaped object, with three puffs behind it, flew west, then south, and then was gone. Seen 30-40 minutes.

Sept. 14, 1952; Ciudad Jaurez, Mexico. 11:30 p.m. to 1:20 a.m., Sept. 15. Witnesses: consulting engineer R. J. Portis and three others. Six groups of 12-15 luminous spheres or discs, which flew in formations varying from arcs to inverted-Y's, very fast.

Sept. 14, 1952; Olmstead AFB, Pennsylvania. Time not known. Witness: pilot of Flying Tiger Airlines airplane N67977. One blue light flew very fast on a collision course with the airliner. Note: the summary card attached to the file showed completely different information.

Sept. 16, 1952; Portland, Maine. 6:22 p.m. Witnesses: crew of U.S. Navy P2V Neptune patrol plane, visually and via radar. A group of five lights was seen at the same time a long, thin blip was being tracked on radar. Note: consideration was given to this being USAF KC-97 airplanes involved in a refueling operation. The sighting involved 20 minutes.

Sept. 16, 1952; Warner-Robbins AFB, Georgia. 7:30 p.m. Witnesses: three USAF officers, two civilians. Two white lights flew abreast, at 100 m.p.h., for 15 minutes.

Sept. 17, 1952; Tucson, Arizona. 11:40 a.m. Witnesses: Mr. and Mrs. Ted Hollingsworth. Two groups of three large, flat, shiny objects flew in tight formations: the first group slow, the second faster. Seen for 2 minutes.

Sept. 23, 1952; Gander Lake, Newfoundland, Canada. No time shown. Witnesses: Pepperell AFB operations officer and seven other campers. One bright white light, which reflected on the lake, flew straight and level at 100 m.p.h. for 10 minutes.

Sept. 24, 1952; Charleston, West Virginia. 3:30 p.m. Witnesses: crew of USAF B-29 bomber. A lot of bright, metallic particles or flashes, up to 3' in length, streamed past the B-29 for 15 minutes.

Sept. 26, 1952; 400 miles NNW of Azores Islands. 11:16 p.m. Witnesses: pilot, copilot, engineer and aircraft commander of USAF C-124 transport plane. Two distinct green lights were seen to the right and slightly above the C-124, and at one time seemed to turn toward it. The lights alternated leading each other during more than 1 hour of observation.

Sept. 27, 1952; Inyokern, California. 10 p.m. Witnesses: two couples, using a 5x telescope. One large, round object, which went through the color spectrum every 2 seconds, was seen to fly straight and level for 15 minutes.

Sept. 29, 1952; Rochester, England. 3:55 p.m. Witnesses unknown, but report came via the Rochester Police Dept. Two flat objects hovered for 3 minutes, and then sped away.

Sept. 29, 1952; Southern Pines, North Carolina. 8:15 p.m. Witnesses: U.S. Army Res. lst Lt. C.H. Stevens and two others. One green ellipse with a long tail orbited for 15 minutes.

Sept. 29, 1952; Aurora, Colorado. 3:15 p.m. Witness: USAF T/Sgt. B.R. Hughes. Five or six circular objects, bright white but not shiny, circled in trail formation for 5-6 minutes.

Oct. 1, 1952; Shaw AFB, South Carolina. 6:57 p.m. Witness: USAF lst Lt. T.J. Pointek, pilot of RF-8O reconnaissance jet. One bright white light flew straight, then vertical, then hovered, and then made an abrupt turn during a 23 minute attempted intercept.

Oct. 1, 1952; Pascagoula, Mississippi. 7:40 p.m. Witnesses: Mr. and Mrs. C.C. McLean and one other person. One round, milky-white object, shaped like a powder puff, hovered for 5-10 minutes then flew away very fast in an arc. A loud blast was heard at the start of the 22 minute sighting.

Oct. 7, 1952; Alamagordo, New Mexico. 8:30 p.m. Witness: USAF Lt. Bagnell. One pale blue oval, with its long axis vertical, flew straight and level for 4-5 seconds, covering 30 in that time.

Oct. 10, 1952; Otis AFB, Massachusetts. 6:30 p.m. Witnesses: USAF S/Sgt., two other enlisted men. One blinking white light moved like a pendulum for 20 minutes, and then shot straight up.

Oct. 17, 1952; Taos, New Mexico. 9:15 p.m. Witnesses: Four USAF officers One round, bright blue light moved from north to northeast at an elevation of 45* for 2-3 seconds and then burned out.

Oct. 17, 1952; Killeen, Texas. 10:15 p.m. Witnesses: Ministers Greenwalt and Kluck. Ten lights, or a rectangle of lights, moved more or less straight and level for 5 seconds.

Oct. 17, 1952; Tierra Amarilla, New Mexico. 11 p.m. Witness: one military person (no detail). One white streamer moved at an estimated 3,000 m.p.h. in an arc for 20 seconds. No further details in files.

Oct. 19, 1952; San Antonio, Texas. 1:30 p.m. Witness: one ex-USAF aircrewman Woolsey. Three circular aluminum objects, one of which was olive-drab colored on the side, flew in a rough V-formation. One object flipped slowly, another object stopped, during the 3-4 minute sighting.

Oct. 19. 1952; 500 miles south of Hawaii. 6:58 p.m. Witnesses: crew of USAF C-50 transport plane. One round yellow light, with a red glowing edge, estimated at 100' in diameter, flew at 300-400 kts. (350-450 m.p.h.) for 20 seconds.

Oct. 21, 1952; Knoxville, Tennessee. No time given. Witnesses: persons at airport weather station. Six white lights flew in a loose formation for 1-2 minutes, and made a shallow dive at a weather balloon.

Oct. 24, 1952; Elberton, Alabama. 8:26 p.m. Witnesses: USAF Lt. Rau, Capt. Marcinko, flying a Beech T-ll trainer. One object, shaped like a plate, with a brilliant front and vague trail, flew with its concave surface forward for 5 seconds.

Oct. 29, 1952; Erding Air Depot, West Germany. 7:50 a.m. Witnesses: USAF S/Sgt. Anderson, A/2c Max Handy. One round object, silhouetted against a cloud, flew straight and level and smooth at 400 m.p.h. for 20 seconds.

Oct. 31, 1952; Fayetteville, Georgia. 7:40 p.m. Witness: USAF Lt. James Allen. One orange, blimp-shaped object, 80' long and 20' high, flew at treetop level, crossed over Allen's car (at which time his

radio stopped playing), then climbed out at 45' and tremendous speed at the end of a 1 minute sighting.

Nov. 3, 1952; Laredo AFB, Texas. 66:29 p.m. Witnesses: two control tower operators, including Lemaster. One long, elliptical, white-grey light flew very fast, paused, and then increased speed during a 3-4 second observation.

Nov. 4, 1952; Vineland, New Jersey. 5:40 p.m. Witness: housewife Mrs. Sprague. Two groups of 2-3 whirling discs of light flew toward the southeast over a period of 30 seconds.

Nov. 12, 1952; Los Alamos, New Mexico. 10:23 p.m. Witness: security inspector. Four red-white-green lights flew slowly over a prohibited area for 15 minutes.

Nov. 13, 1952; Opheim, Montana. 2:20 a.m. Witness: radar tracking by USAF 779th AC&W station. An unexplained track was followed for 1 hour, 28 minutes, at 158,000' altitude (30 miles) and a speed of 240 m.p.h. Radar was FPS/3 (PPI).

Nov. 13, 1952; Glasgow, Montana. 2:43 a.m. Witness: U.S. Weather Bureau observer Earl Oksendahl. Five oval-shaped objects, with lights all around them, flew in a V-formation for about 20 seconds. Each object seemed to be changing position vertically by climbing or diving as if to hold formation. Formation came from the northwest, made a 90* overhead, and flew away to the southwest.

Nov. 15, 1952; Wichita, Kansas. 7:02 a.m. Witnesses: USAF Maj. R.L. Wallander, Capt. Belleman, A/3c Phipps. One orange object (a blue streak?) varied in shape, as it made jerky upward sweeps with 10-15 second pauses during a 3-5 minute sighting.

Nov. 24, 1952; Annandale, Virginia. 6:30 p.m. Witness: L.L' Brettner. One round, glowing object flew very fast, made right angle turns and reversed course during a 1 hour sighting.

Nov. 27, 1952; Albuquerque, New Mexico. 12:10 p.m. Witnesses: pilot and crew chief of UAAF B-26 bomber. A series of black smoke bursts (4-3-3-4-3), similar to antiaircraft fire, was seen over a 20 minute period.C. 12:30 a.m. Witnesses: radar

Nov. 30, 1952; Washington, D.C. l operators at Washington National Airport. Radar trackings similar to those of July 26, 1952.

Dec. 8, 1952; Ladd AFB, Alaska. 8:16 p.m. Witnesses: pilot lst Lt. D. Dickman and radar operator lst Lt. T. Davies in USAF F-94 jet interceptor (s/n 49-2522). One white, oval light which changed to red at higher altitude, flew straight and level for 2 minutes, then climbed at phenomenal speed on an erratic flight path. Sighting lasted 10 minutes.

Dec. 9, 1952; Madison, Wisconsin. 5:45 p.m. Witnesses: Capt. Bridges and lst Lt. Johneon in USAF T-33 jet trainer. Four bright lights, in diamond formation, flew at 400 m.p.h. and were passed by the T-33 at 450 m.p.h. during the 10 minute sighting.

Dec. 28, 1952; Marysville, California. Case missing from official files.

Bluebook Part 4

Jan. 1, 1953; Craig, Montana. 8:45 p.m. Witnesses: Warner Anderson and two women. A silver, saucer-shaped object with a red glowing bottom, flew low over a river and then climbed fast in a horizontal attitude. Ten second sighting.

Jan. 8, 1953; Larson AFB, Washington. 7:15 a.m. Witnesses: men from the 82nd Fighter-Interceptor Squadron, including the squadron commander; all were on the ground. One green, disc- shaped or round object flew southwest for 15 minutes, with a vertically bobbing motion and sideways movements, below clouds.

Jan. 10, 1953; Sonoma, California. 3:45 p.m. or 4 p.m. Witnesses: retired Col. Robert McNab, and Mr. Hunter of the Federal Security Agency. One flat object, like a pinhead, made three 360* right turns in 9 seconds, made abrupt 90* turns to the right and left, stopped, accelerated to original speed and finally flew out of sight vertically after 60-75 seconds.

Jan. 17, 1953; near Guatemala City, Guatemala. 3:55 p.m. Witness: geologist/salesman J.J. Sackett. One brilliant green-gold object, shaped like the Goodyear blimp with its length twice its height, flew 400 m.p.h. straight and level, stopped, then went straight up with one stop. Sighting lasted 22 seconds.

Jan. 28, 1953; Pt. Mugu, California. 1 p.m. Witness: R.W. Love, owner of Love Diving Co., engaged in retrieving radio- controlled drones. An 18-20' white, flat disc flew straight and level, overhead, for 6 minutes.

Jan. 28, 1953; Corona, California. 6:05 p.m. Witness: USAF T/Sgt. George Beyer. Five 25' green spheres flew in V-formation, then changed to trail formation at which time the end objects turned red. Sighting lasted 12 minutes.

Jan. 28, 1953; Albany, Georgia. No time given. Witnesses: radar maintenance personnel. Radar tracked one stationary target for 20 minutes. A visual sighting about the same time was explained. No further information in the files.

Feb. 3, 1953; Keflavik, Iceland. 5:25 p.m. Witnesses: radar operators. Four unidentified targets were tracked for 24 minutes. No further data.

Feb. 4, 1953; Yuma, Arizona. 1:50 p.m. Witness: U.S. Weather Bureau observer Stanley Brown, using a theodolite. One white, oblong object was tracked flying straight up, leveling off and being joined by a second, similar, object. The second twice flew away and returned to the first. After 5 minutes, both were lost to sight behind clouds.

Feb. 17, 1953; Port Austin. Michigan. 10:04 p.m. Witnesses: two officers and three airmen of USAF AC&W squadron, visually and by radar. Visual object appeared to larger and brighter than a star and changed color; it was seen to move slowly for 5 minutes until 10:09 p.m. Radar picked up a target at 10:08 p.m. moving in a similar direction for 17 minutes, at similar speed.

Feb. 20, 1953; Pittsburg-Stockton, California. #1 time unknown; #2, 10:30 p.m. Witnesses: USAF B-25 bomber pilots. #1 was a bright yellow light seen for 8 minutes. #2 was a bright light which flew on a collision course, dimmed and climbed away fast.

Feb. 24, 1953; Sherman, Texas. 7:43 p.m. Witnesses: Warrant Officer and Mrs. Alden. Two bright red, round objects with big halos flew in small circles, climbed and faded during a 3-7 second sighting.

Feb. 27, 1953; Shreveport, Louisiana. 11:58 a.m. Witness: USAF airman/private pilot. Five yellow discs made circular turns, fluttered, three of them vanished, the other two flew erratic square turns for a total of 4 minutes.

March 11, 1953; Hackettstown, New Jersey. 4 a.m. Witness: Mrs. Nina Cook, an experienced private pilot and wife of a Pan Am flight engineer. A large light, blinking at 10-15 times per minute, moved up and down along a mountain range.

March 14, 1953; north of Hiroshima, Japan. 11:45 p.m. Witnesses: radar and visual observation by 10 crew members of U.S. Navy P2V-5 patrol plane. Groups of 5-10 colored lights, totaling 90-100, slowly moved aft off the left side of the airplane, as detected visually and by airborne radar for 5 minutes.

March 21, 1953; Elmira, New York. 3:05 p.m. Witness: Ground Observer Corps observation post. Six discs in a group flew high and fast for a few seconds.

March 25, 1953; San Antonio, Texas. 3:05 p.m. Witnesses: USAF Capt. and Mrs. D.E. Cox. Several lights, some of which moved straight, others which made 360^ turns for 1.5 hours.

March 27, 1953; Mt. Taylor, New Mexico. 7:25 p.m. Witness: pilot of USAF F-86 jet fighter at 600 kts. (700 m.p.h.). One bright orange circle flew at 800 kts. (900 m.p.h.), and executed three fast rolls. Pilot chased object for 4 minutes.

March 29, 1953; Spooner, Wisconsin. 3:45 p.m. Witness: L.C. Gillette. One aluminum, circular object flew high and fast, twice reversing its course. Note: Mr. Gillette saw a similar object in 1938. Fifteen second sighting.

April 8, 1953; Fukuoka, Japan. 7:55 p.m. Witness: lst Lt. D.J. Pichon, pilot of USAF F-94B jet interceptor. One bright blue light descended, accelerated, flew parallel to the F-94, increased its speed and blinked out after 45 seconds.

April 15, 1953; Tucson, Arizona. 5:45 p.m. Witness: S/Sgt. V.A. Locey. Three orange lights were seen for: 3 minutes, 30 seconds, and a few seconds.

May 1, 1953; Goose AFB, Labrador, Canada. 11:35 p.m. Witnesses: pilot and radar operator of USAF F-94 jet interceptor, and control tower operator. One white light evaded interception attempt by F-94 during 30 minute sighting.

May 27, 1953; San Antonio, Texas. 8:30 p.m. Witnesses: many unidentified civilians, including Jacobson. Nine separate meandering lights were seen during 15 minute sighting.

June 21, 1953; Naha, Okinawa. 7 p.m. Witnesses: Nine Japanese and Okinawan weather observers. One unidentified light moved slowly for 20 minutes. No further data in files.

June 22, 1953; Goose AFB, Labrador, Canada. Z:lO a.m. Witnesses: pilot and radar operator of USAF F-94 jet interceptor. One red light, flying at an estimated 1,000 kts. (1,100 m.p.h.) eluded the chasing F-94 after 5 minutes.

June 24, 1953; Iwo Jima, Bonin Islands. 11:30 p.m. Witnesses: crew of USAF KB-29 aerial tanker plane. Radar tracked an unidentified target which twice approached to within .5 miles of the airplane, and once to within 6 miles, during a 2 minute observation.

June 24, 1953; Simiutak, Greenland. 11:30 a.m. Witness: weather observer A/2c R.A. Hill. One red triangle hovered and rotated for 15 seconds, then climbed for 5 minutes.

Aug. 3, 1953; Amarillo, Texas. 12:04 p.m. Witness: Airport control tower chief C.S. Brown. One round and reflective or translucent object flew straight, stopped for 7 seconds, sped along, stopped again, was joined by a similar object and they flew off in different directions, after a total of 56 minutes.

Aug. 20, 1953; near Castle AFB, California. 9:05 p.m. Witnesses: crew of TB-29 bomber/trainer plane. One grayish oval object made four passes at the airplane (three times at 10-20 miles distance), then

dived vertically as if two objects.

Aug. 27, 1953; Greenville, Mississippi. 9:45 p.m. Witnesses: USAF pilot, M/Sgt., others, all on the ground. One meandering light was observed for 50 minutes. No further details in file.

Sept. 2, 1953; Sidi Slimane AFB, French Morocco. 9:14 p.m. Witnesses: Lt. Col. William Moore and lst Lt. J.H. McInnis, Dec. 24, 1953; El Cajon, California. 8:04 a.m. Witnesses: U.S. Navy Lts. J.B. Howard and L.D. Linhard, flying F9F-2 jet fighters. Ten silver, oval objects flew at more than 400 kts. (450 m.p.h.), straight and level, for 5 minutes.

Dec. 28, 1953; Marysville, California. 11:55 a.m. Witness: Yuba County Airport Manager Dick Brandt. One saucer, with a brilliant blue light, reflecting on a nearby building, hovered briefly during the 1.5 minute observation.

Jan. 28, 1954; Rangeley, Maine. 110-10:15 a.m. Witness: Wilhelm Reich. Two bright lights moved into valley, and were seen against the mountain background, for 15 minutes.

Feb. 26, 1954; Newburyport, Massachusetts. 2:30 p.m. Witnesses: architect R.M. Pierce, marine engineer George Avery and one other person. One silver disc, with a white trail, made a loud roar for 30-60 seconds.

March 2, 1954; vicinity of Harrisburg, Pennsylvania. 10 p.m. Witness: research engineer R.C. Swengel. Three objects, each with two lights, flew straight and level at medium speed for an unknown length of time.

March 5, 1954; Nouasseur, French Morocco. 8 p.m. Witnesses: crews of USAF KC-97 aerial tanker planes. One object or light made passes at KC-97s, the other flew straight and level. Sighting duration unknown.

March 12, 1954; Nouasseur, French Morocco. 9:35 a.m. Witness: USAF lst Lt. Robert Johnson, flying an F-86 jet fighter. He chased an object at more than 530 m.p.h. for 30 seconds, but was unable to catch it. It appeared to be the size of a fighter plane but had neither tanks nor trails.

April 8, 1954; Chicago, Illinois. 4:30 p.m. Witness: Lelah Stoker. One white round-topped disc, with a humanoid suspended beneath it, skimmed over the water, landed, and an occupant in a green suit walked around. It then took off very, very fast. Sighting lasted 30 minutes.

April 23, 1954; Pittsfield, Maine. 9:30 a.m. Witnesses: Mr. and Mrs. F.E. Robinson. One silver dollar-shaped object with a dome and a flashing light made a sound like a swarm of bees. It hovered and tilted, flew horizontally, then rose vertically without tilting. Stones underneath it moved. Four minute sighting.

April 24, 1954; Hartland, Maine. 6:10 p.m. Witness: D. Robinson. One large, silver, oblong object with a dome and a flashing light flew straight and level and then straight up. Total of 15 minutes under observation.

April 26, 1954; Athens, Georgia. 7:35 p.m. Witnesses: C. Cartey, Mr. and Mrs. H. Hopkins and their daughter. Fifteen to twenty yellow objects in a V-formation, flew from south to north for 10 seconds.

May 10, 1954; Elsinore, California. 12:40 p.m. Witness: U.S. Marine Corps Squadron Leader D.R. Higgin, flying an F3D-2 jet fighter. One dark gunmetal delta-shaped object, 22' long and 10' wide, with a fin on the top, descended at a 25-30' angle under the lead airplane of a formation, and over the airplane of Higgin. Sighting lasted a few seconds.

May 11, 1954; Washington, D.C. 10:45 p.m. Witnesses: three USAF.air policemen at Washington National Airport. Two bright lights were seen on three occasions to fly straight and level, make 90* turns and fade. Each sighting lasted about 45 seconds.

May 22, 1954; LaPorte, Indiana. 9:15 p.m. Witnesses: highway engineer R.W. Dring, engineer Geert Tibma. One bright light made a shallow climb for 45 seconds.

May 31, 1954; Concord, New Hampshire. 10:15 a.m. Witness: Mrs. L.K. Stevens. One very white, elongated object flew very, very fast, and then blinked out after 8-10 seconds.

June 1, 1954; from 400 miles south to Minneapolis, Minnesota. 9 p.m. Witnesses: crew of USAF B-47 jet bomber at 34,000' altitude. One object with running lights flew at 24-44,000' altitude for 1 hour.

June 8, 1954; Texarkana, Texas. 1 a.m. or 2:30 a.m. (file not clear). Witness: L.T. Prewitt, employee of Red River Arsenal. One golden yellow light flew over his house, making a "shhh" or buzzing sound for 2 minutes. 9:09 p.m. Witness: USAF pilot

June 10, 1954; Estacado, Texas. 9:09 p.m. Witness: USAF pilot Capt. Bill McDonald, in flight. One white light descended at 45^ from great altitude, passed under his aircraft, made two 360' turns and went out after 30 seconds.

June 22, 1954; Miami Beach, Florida. 9 p.m. Witnesses: U.S. Marine Corps Maj. E. Buchser and Maj. J.V. Wilkins. One meteor- like object descended, stopped, and became extremely bright. Sighting lasted 7 minutes.

June 24, 1954; Danvers, Massachusetts. 12:45 p.m. Witness: R.B. Tomer, director of commercial engineering for CBS-Hytron. One white, elliptical-shaped object covered 45^ of sky in 30 seconds.

June 25, 1954; Indian Lake, Ohio. 5:05 p.m. Witnesses: experienced private pilot John Mark, flying Navion light plane; radar at Dayton, Ohio airport, tracked very fast target at same location. One silver or aluminum round object with a flat bottom, raised front edge, inverted cone on top, and a diameter of about 60'. Flew horizontally, hovered, made a high-G pull up and then a steep climb into an overcast. Sighting lasted 3-5 minutes.

July 18, ; Normandy, Missouri. 8:40 p.m. Witness: A.T. Chamblin. One greenish-white disc was seen for 30 minutes.

July 25, 1954; Middle Sister Island, on U.S.-Canadian border in western Lake Erie. 7:12 p.m. Witness: attorney L.B. Tussing. One black cylinder, 12 times long as wide, moved fast along the surface of the lake.

July 30, 1954; Los Angeles, California. 10:15 a.m. Witness: Hughes Aircraft test pilots Englert and Peterson, flying a B-25 bomber. One metallic, pencil-shaped object flew slowly or hovered for an unstated length of time.

Aug. 2, 1954; Westlake, Ohio. 5:17 p.m. Witness: ex-AAF B-17 gunner (19 missions) N.E. Schroeder. One thin, bright ellipse, like polished metal, hovered for 5-8 seconds, dropped down 3,000' in 3 seconds, hovered again and faded out after a total of 20 seconds in view.

Aug' 6, 1954; San Antonio, Texas. 6 p.m. Witness: mechanical engineer L.H. Hormer. One intensely white elliptical light changed to yellow, then orange, then pink, four or five times while flying straight and level for 5 minutes.

Aug. 11, 1954; Yoron Jima, near Okinawa. 8:55 p.m. Witness: P.L. Percharde, electrical engineer and assistant manager of Moeller Shipwrecker Co., of Okinawa. A line of blue lights, underneath. a blue circle with a black center. Flew over ship and climbed, illuminating and agitating the clouds.

Aug. 15, 1954; San Marcos, Texas. 10:20 p.m. Witnesses: USAF Maj. W.J. Davis, Capt. R.D. Sauers, flying a C-47 transport plane. One dark blue oblong object paced the C-47, veered away, then crossed in front of it. Five minute sighting.

Aug. 24, 1954; Egilstadir, Iceland. 8:30 p.m. Witness: one unnamed farmer. A cylinder, 2-2.5' long, 4-5' in diameter, made a loud whizzing sound, flew straight and level fast, then slow, then fell into sandbar.

Aug. 26, 1954; Danville, Virginia. 6:15 a.m. Witness: Rev. W.L. Shelton. Two domed ellipses, 20' long, 8' thick, 10' at ends; glowing silver or orange. Hovered, then climbed side-by- side while getting brighter. Observed for 2 minutes.

Aug. 27, 1954; Dorchester, Massachusetts. 1 p.m. Witness: E.A. Srazdes. Seven large, white, teardrop-shaped objects turned blue. Flew in line formation and increased speed during the 2 minute sighting.

Aug. 29, 1954; Prince Christian, Greenland. 11:05 a.m. Witnesses: lst Officer H.G. Gardner, engineer J.V.D. Whitisy, flying Royal Dutch Airlines DC-4 (PH-DBZ). Three or four dark, lens-shaped objects veered north and changed position in formation during the 10 minute sighting.

Sept. 4, 1954; Butler, Missouri. 3 a.m. Witness: J. Faltemeier, CAA communications specialist. Twenty-thirty lights, as if on a string, flew straight and level for 1.5 minutes.

Sept. 5, 1954; Butler, Missouri. 12:23 a.m. Witness: J. Faltemeier, CAA communications specialist. One silver or white object with a slightly swept-back leading edge and a following exhaust, flew straight and level, then veered southwest to south after 30 seconds.

Sept. 18, 1954; Kimpo Air Base, Japan. 5:55 a.m. Witnesses: two control tower operators, a weather forecaster and a weather observer. One round object, like polished aluminum, flew straight and level for 11-13 minutes.

Sept. 21, 1954; Barstow, California. 1 a.m. Witnesses: two local policemen, four U.S. Marine Corps police, one highway patrolman. One red-orange ball giving off sparks, and a smaller light, made a zigzag descent and then hovered. Total of 20 minutes.

Sept. 21, 1954; Santa Maria, Azores Islands. 9:45 p.m. Witness: airport guard. One 10'x5' light metallic blue, pecan-shaped object with a clear glass or plastic nose having a door, and with poles or aerials on the nose. Humming or whining, it hovered, landed vertically, 50' away. A blond man, 5' 10" tall appeared, spoke in a strange language, patted the guard on the shoulder, got in the object, hooked up his harness, pushed a button, took off with the object's nose pointed up, then leveled off and climbed vertically. Sighting lasted 2-3 minutes.

Sept. 22, 1954; Marshfield, Missouri. 9 a.m. Witnesses: private pilot J.N. Williams, E.J. Ash. A thin, translucent tan asymmetrical boomerang-shaped object revolved, then tumbled down behind some trees. Marks were found in the dirt. Sighting lasted 15 minute

Captain Edward J. Ruppelt

UFO Reports From His Book
The Ruppelt Record - Mock Congressional Hearing - By F. Ridge & J. Washington

A Book by Michael Hall

Origin of the UFO Phenomenon

By Michael Hall

Focusing on possibly the greatest saga of all time, *Origin of the UFO Phenomenon* documents many fascinating events long forgotten by today's sound bite generation. It is one of very few books that approaches the subject from a historical perspective. Casting the story in the aura of the past with the mystery already inherent in the phenomenon, Mr. Hall has produced a true to life science fiction thriller. It's chilling, it's mystifying, and it's amazing because it is a very real part of our history.

The stories comprising the book are taken from the best sources available. The first chapters deal with the period from 1896 to 1946 which contain interesting legends and lore. Those years, however, do produce descriptions of not just the classic image of the "flying saucer," but a whole host of strange aerial phenomena that continues to be seen to this day. When the reader comes to 1947, a very shocking and more contemporary story unfolds. That year started the first large "wave" of UFO sightings. The term UFO, however, was yet to be coined, and in the early years saucers or discs were the catch words after a very famous sighting by Kenneth Arnold on June 24th. The phenomena rocked not only the United States but also the world. Beginning in force by July 4th of that year, shiny discs were being seen by hundreds. During that long Independence Day weekend the sightings dramatically increased in frequency from day to day. By July 6th, saucer reports made the front page of the New York Times and would do so for the next three straight days as the military started flying special "saucer patrols" in an attempt to intercept one of the mysterious discs. Every major city and most small towns around North America had sightings which were followed by similar accounts in other countries. Military men, scientists, doctors, lawyers, politicians, engineers, airline pilots, and just everyday citizens were seeing the strange objects, but what were they? Hall's book takes no position, it simply documents the facts.

The reports climbed to as many as a hundred a day from July 6th until July 11th. Then after the 11th, they suddenly declined. As 1947 progressed, only a few sightings were made, but fortunately in the United States the military had laid the groundwork for a very serious investigation of the incidents. By 1948 UFO activity picked up and accounted for some spectacular "classic" cases with a great many reports coming close together in 1949. From that year through 1951 many notable accounts also came to light but unfortunately were not properly investigated. For some unexplainable reason the Air Force had purged its best aeronautical engineers from the project by that point.

By 1952, the most famous UFO wave unfolded. Incidents became so numerous in the United States that in July the Democratic National Convention had to fight for headline space with the flying saucers-especially after they appeared over the White House. Virtually every American newspaper carried the accounts. Where reporters had previously come to take the subject somewhat lightly, by 1952 serious stories made page one features and portrayed notable public figures expressing concern. Fortunately for historians, Air Force Intelligence was then documenting dozens of reports per day via a revived investigation under the very able administration of Captain Edward J. Ruppelt. Ruppelt popularized the term UFO and served as Chief of Air Force investigations on the phenomenon until mid 1953.

Shortly thereafter the UFO saga in the United States becomes much harder to follow. This came about after the 1952 wave scared the United States government into doing something about the situation. They couldn't stop the sightings, but they did think they could discourage interest in the subject and prevent a possible hysteria - a real concern during that very hot period of the Cold War. Thus the book concludes its survey with the end of 1953.

Michael David Hall has previously authored a biography on Indiana Senator Henry S. Lane. In The Road To Washington, Rise of an Indiana Politician, Hall traces the drama that took Lane from the

chairmanship of the first national Republican Convention in 1856 to his influence four years later in securing Abraham Lincoln with his party's nomination. Dozens of magazine articles on Indiana history followed that work. Several of those continued Mr. Hall's research on the former Indiana senator, taking him from a congressional legislator who worked with Daniel Webster and Henry Clay, to the founder of the Indiana Republican Party, and then on to a powerful Civil War era senator.

Hall holds a B.A. from Illinois College and an M.A. from Western Illinois University in American History. In 1984 he began a museum career at the Illinois State Museum and since 1987 has served as Executive Director of the Montgomery County Historical Society and its Henry S. Lane Historic Home in Crawfordsville, Indiana.

Currently the author is working on a new book, *A Time To Remember, The UFO Wave of 1952* and a co-authored article with researcher Wendy Connors for the *International UFO Reporter* dealing with legendary Project Sign figure, Alfred Loedding. Soon an expanded version of *Origin of the UFO Phenomenon* will be published, titled *UFOs, A Century of Sightings: The Truth Revealed* detailing the subject all the way up to present day.

As he pursues his research he finds diversion in aviation history as a part time guide at the United States Air Force Museum in Dayton, Ohio. Hall also has interest in the era of the great steam trains, serving as a director at the Linden, Indiana, Monon-Nickel Plate Railroad Museum and Historical Society. Residing in Lafayette, Indiana, with his wife Teresa and their collection of five pampered stray cats, both Mr. and Mrs. Hall developed interests in that area's rich heritage in transportation history spawned by technological influences from nearby Purdue University. In fact, Mr. Hall has taken advantage of his proximity to Purdue to further his studies in history and plans in the near future to complete his Ph. D. in American History.

Interest in the subject of UFOs began quite by accident while working at Purdue on a paper analyzing the effects of American daylight bombing raids on Germany. Mr. Hall then happened across some obscure UFO accounts filed by allied pilots. Called foo-fighters in those days, the stories he found fascinated him. As he came to realize what a huge volume of primary material existed on UFOs in the nation's archives, Hall knew he had an amazing story to tell.

MESSAGE SLIP

FI-4 PRELIMINARY REPORT

Date of sighting _____ Time _____ AM PM (Circle One)

City _____ State _____

DESCRIPTION:

Shape_____

Estimated size_____

How many witnesses? _____Sound_____

Distance _____ Altitude_____

How long did you watch it?_____

PHYSICAL CHARACTERISTICS: (Check appropriate boxes)

( ) Light form only
( ) Animal reaction
( ) Psychological event
( ) Electromagnetic event
( ) Humanoid or entity case
( ) Vehicle/device
( ) Physical trace
( ) Physiological event
( ) Landing/touchdown
( ) Time loss/memory loss

FLIGHT CHARACTERISTICS:

( ) Passed overhead
( ) Type 2, Under cloud ceiling
( ) Type 4, Continuous flight
( ) Type 1, Within 200' of ground
( ) Type 3, Change in motion
( ) Type 5, Stationary target

REPORTING PARTY:

Name_____

Address_____

City/State/Zip:_____

Age _____ Home phone _____ Office phone_____

Created by Francis Ridge.

Initial Form/Material Check List

Case ID/Date_____ Witness _____

Based on the Message Slip & preliminary report, this is the list of all forms/materials that is to be used in the investigation. The date and location of each action will be listed in the SIGHTING INVESTIGATION ACTIVITY LOG.

( ) Form 1, General Case

( ) Form 2, Computer Input Form

( ) Form 3, Electrical/Magnetic Case

( ) Form 4, Animal Effect Case

( ) Form 5, Psychological/Physiological Effects

( ) Form 6, Landing Trace Case

( ) Form 7, Entity Case

( ) Form 8, Photographic (or video) Case

( ) Form 9, Radar Case

( ) Form 10, Residual Radiation

( ) Form 11, Aerial Sighting Report

( ) Drawing of object (separate from on Form 1)

( ) Map of region

( ) News clippings

( ) Photos/videos

( ) Recording tape, audio

FINAL REPORT CHECKLIST

Date _____

The report of a claimed event (UFO sighting and/or abduction),

witnessed by _____ on _____ is attached. The current case record is considered complete. Included in this report are the following checked items:

( ) SIGHTING BACKGROUND. A description of the circumstances surrounding the receipt of the initial UFO sighting information or abduction report. Simply attach copy of initial report form or message slip

( ) SIGHTING ACCOUNT. Form 1, General Cases (or signed statement), should include witness notes or brief chronological composite or consolidation of the UFO sighting account. Other Forms needed depending on the type of report attached and noted on the Initial Form/Material Check List.

( ) SIGHTING INVESTIGATION. Activity Log. Simple chronological log by date, time, and place denoting the tasks the FI carried out during the investigation. (Actually, part of the FI Notes).

( ) INTERVIEW AND INTERROGATION. FI Notes. A description of the interview and interrogation. This should include where and how the interview took place (mail, telephone, or onsite).

( ) ADDITIONAL WITNESS CHECK. FI Notes. The circumstances surrounding how, when, and where additional witnesses were located and any subsequent interviews and interrogations including the FI's personal impressions of these witnesses and their home environment, interests, etc.

( ) SOURCE TESTS. A list of what natural or man-made objects were checked in an effort to identify the stimulus for the reported UFO is attached to this report. The reasons for rejecting or suspecting each, as being the stimulus should be clearly noted.

( ) WITNESS BACKGROUND CHECK. FI Notes. A list of the persons checked, their comments about the witness's character and their relationship to the witness. This section should include the FI's impressions of the witness personality, credibility, etc.

OTHER DATA NEEDED. Includes other forms, drawings, as needed for special evidence.
( ) Forms _____
( ) Drawings _____
( ) Other _____

( ) COMMENTS INTERROGATING Fl. (Fl Notes).

National Investigations Committee On Aerial Phenomena

Category 11
Sightings From Aircraft

NICAP Sighting Information Database - Sightings listed as Category 11

Updated: 12/16/2014
There are over 4,000 incidents involving sightings from aircraft which have been documented (Haines). And although this page is under construction, it contains many of the best and most important cases. The more recent events were taken from UFO Evidence II (Hall). Just a few. If you find an important case that is NOT listed, please email me at: nicap@insightbb.com

Incidents involving Distant Encounters (Cat 1), Close Encounters (Cat 2), E-M (Cat 3), Animal Effects (Cat 4), Medical Effects (Cat5), Trace Cases (Cat 6), Entities (Cat 7), Photographs (Cat 8), Radar (Cat 9), and Radiation Cases (Cat 10), are listed on their appropriate pages at Evidence By Categories.

National Investigations Committee On Aerial Phenomena

Category 3 - E-M Cases

Electromagnetic Effects

NICAP originally listed 81 primary cases in its June 1960 report. The UFO Evidence (1964) listed 106 cases of E-M Effects. Later, Mark Rodeghier (CUFOS) compiled a list of over 500 incidents. Dr. Richard Haines catalogued 185 involving aircraft, alone.

Other Categories, involving Distant Encounters (Cat 1), other Close Encounters (Cat 2), Animal Effects (Cat 4), Medical Effects (Cat 5), Trace Cases (Cat 6), Entities (Cat 7), Photographs (Cat 8), Radar (Cat 9), Radiation (Cat 10), or Sightings From Aircraft (Cat 11), are listed on their appropriate pages at Evidence by Categories. If you find an important E-M case that is NOT listed, please email me at: skyking42@gmx.com

National Investigations Committee On Aerial Phenomena

presents

18th Century
UFO Sighting Chronology

Popular Mechanics, September 1930, #3 depicts an 1897 craft
Credit: http://ufopop.org/ (Jim Klotz)

Released, Dec. 17, 2006; updated 14 Jan 2015
This 6-page report is derived primarily from the Magonia Database, sightings catalogued by Jacques Vallee and presented in his great work, Passport to Magonia. No doubt some of these came from Charles Fort. This report deals only with sightings prior to the 20th Century. Four entries, at the time of this writing that is, were taken from the UFO Evidence, 1964 (Hall). The illustration used above came from Jim Klotz' wonderful web site, ufopop.org/.

Our thanks for ALL these chronologies must go to our documentation team: Richard Hall (the original 1968 chronology from UFOE II), William Wise (Project Blue Book Archive), Dan Wilson (archive researcher), and Brad Sparks (Comprehensive Catalog of Project Blue Book Unknowns). Last, but not least, our thanks to Jean Waskiewicz who created the online NICAP DBase (NSID) that helped make it possible to link from the cases to the reports themselves. .

In regard to the "airship sightings" (particularly the 1897 incidents), on June 23 of this year (2006) I received an email from Thomas Eddie Bullard, the leading expert on these events. His email is presented in its entirety in the link given. To summarize, there are two sentences that say it all: "I've come to the conclusion that there are no genuine UFOs among the 1897 airships, though the matter is more complicated that just hoaxes."....."The reliable airship stories are not spectacular and the spectacular airship stories are not reliable. This pattern repeats throughout the two thousand or more reports until there is nothing left that I would want to stand up and defend as a genuine UFO. There are some impressive UFOs pre-1947, but they are not to be found in the various sightings waves of UFO prehistory."

In December of 2006 Dr. Eddie Bullard provided a report by a medical doctor/amateur astronomer that looks like the first incident that can be classified as an actual UFO. See Brad Sparks' report, April 15, 1897; St. Louis, MO.

NICAP Site Coordinator

Aug. 6, 1860; Norfolk, Virginia
Two objects, one red and one green, flew overhead together, moving with an undulating motion. (NICAP UFO Evidence, 1964, Hall)

July 1868; Copiago, Chile
A strange "aerial construction" bearing lights and making engine noises flew low over this town. Local people also described it as a giant bird covered with large scales producing a metallic noise. Although not an actual landing, this is the first instance of close observation of an unknown object at low altitude in the nineteenth century. (Magonia #1, Fort 638; Anatomy 11)

Dec. 7, 1872; Banbury, Great Britain
1:00 a.m. At King's Sutton an object resembling a haystack flew on an irregular course. Sometimes high, sometimes very low it was accompanied by fire and dense smoke. It produced the same effect as a tornado, felling trees and walls. It suddenly vanished. (Magonia #2, Fort 189)

1877; England
Three meteor-like objects moving together with "remarkable slowness" flew across the sky, visible about three minutes, "moving with the same velocity and grade of regularity. . [as] a flock of wild geese." [Credit: Charles Fort, from Report of the British Association, 1877-152]

1880; Aldershot, Great Britain
A strange being dressed in tight-fitting clothes and shining helmet soared over the heads of two sentries, who fired without result. The apparition stunned them with something described as "blue fire." (Magonia #3, FSR 61, 3; Magonia)

May 15, 1879; Persian Gulf
9:40 p.m. Two very large "wheels" were seen spinning in the air and slowly coming to the surface of the sea. Estimated diameter: 40 m. Distance between the objects: 150 m. Speed: 80 km/h/ Duration: 35 min. Witnesses aboard the ship "Vultur" (Magonia #4, Round up 17; Anatomy 12)

1880; Eastern Venezuela
A 14-year-old boy saw a luminous ball descending from the sky and hovering near him. He felt somehow "drawn" to it, but succeeded in backing away in spite of his terror. (Magonia #5, Lor. III 2O6)

March 26, 1880; Lamy, New Mexico
Evening. Four men walking near Galisteo Junction were surprised as they heard voices coming from a "strange balloon," which flew over them. It was shaped like a fish and seemed to be guided by a large fanlike device. There were eight to ten figures aboard. Their language was not understood. The object flew

low over Galisteo Junction and rose rapidly toward the east. (Magonia #6, FSR 65, 3)

June 11, 1881; Between Melbourne and Sydney at sea, Australia
4:00 a.m. The two sons of the Prince of Wales, one of them the future king of England, were cruising aboard "LaBacchante" when an object resembling a fully lighted ship was seen ("a phantom vessel all aglow"). (Magonia #7, Fort 637; Anatomy 12)

July 3, 1884; Norwood, N.Y.
Saturn-shaped UFO (globe with central ring) flew slowly overhead. [Credit: Charles Fort, from Science Monthly, 2-136]

Nov. 2, 1885; Scutari, Turkey
Dawn. A luminous object circled the harbor. Altitude: 5-6 m. Illuminated the whole town. Duration: 1 1/2 min, as a bluish-green flame. Then plunged into the sea. Made several circles above the ferry-boat pier. (Magonia #8, LDLN 48; Anatomy 14)

Oct. 24, 1886; Maracaibo, Venezuela
During the night, which was rainy and tempestuous, a family of nine persons, sleeping in a hut a few leagues from Maracaibo, were awakened by a loud humming noise and a vivid, dazzling light, which brilliantly illuminated the interior of the house. The occupants completely terror stricken, and believing, as they relate, that the end of the world had come, threw themselves on their knees and commenced to pray, but their devotions were almost immediately interrupted by violent vomiting, and extensive swellings commenced to appear in the upper part of their bodies, this being particularly noticeable about the face and lips. It is to be noted that the brilliant lights was not accompanied by a sensation of heat, although there was a smoky appearance and a peculiar smell. The next morning, the swellings had subsided, leaving upon the face and body large black blotches. No trace of lightning could afterward by observed in any part of the building, and all the sufferers unite in saying that there was no detonation, but only the loud humming already mentioned. Another curious attendant circumstance is that the trees around the house showed no signs of injury until the ninth day, when they suddenly withered. (From Warner Cowgill, U. S. Consulate, Maracaibo, Venezuela in a letter posted in Scientific American).

Nov. 12, 1887 Cape Race, Atlantic Ocean
Midnight. A huge sphere of fire was observed rising out of the ocean by witnesses aboard the "Siberian." It rose to an altitude of 16 m, flew against the wind, and came close to the ship, then "dashed oft" toward the southeast. Duration: 5 min. (Magonia #9, LDLN 48; Anatomy 14)

1896-1897--Mysterious "Airship" reported all across United States.

1896; Arolla, near Zermatt, Swiss Alps
Aleister Crowley was walking in the mountains when he suddenly saw two little men. He made a gesture to them, but they did not seem to pay attention and disappeared among the rocks. (Magonia #10, Magic Without Tears, by A. Crowley) (Note: Crowley was the notorious Satanist.)

March 26, 1897; Sioux City, Iowa
Approximate date. Robert Hibnight bard was caught by an anchor dropped from an unknown flying machine 22 km north of the town. He was dragged over 10 m and fell as his clothes were torn. (Magonia #11, FSR 66, 4)

March 28, 1897; Omaha, Nebraska
10:30 p.m. The majority of the population observed an object arriving from the southeast. It looked like a huge light, flew northwestward slowly, came to low altitude. A crowd gathered at a street corner to watch it. (Magonia #12, 185)

April 1, 1897; Everest, Kansas

9:00 p.m. The whole town saw an object fly under the cloud ceiling. It came down slowly, then flew away very fast to the southeast. When directly over the town it swept the ground with its powerful light. It was seen to rise up at fantastic speed until barely discernible, then to come down again and sweep low over the witnesses. At one point it remained stationary for 5 min at the edge of a low cloud, which it illuminated. All could clearly see the silhouette of the craft. (Magonia #13, FSR 66, 4)

April 12, 1897; Nilwood, Illinois
2:30 p.m. On the property of Z. Thacker, 19 km north of Carlinville, an unknown object landed. Before the three witnesses could reach it, the craft, which was shaped like a cigar with a dome, rose slowly and left majestically toward the north. Witnesses: Edward Teeples, William Street and Franklin Metcalf. (Magonia #14, 186; Anatomy 12)

Apr. 12, 1897 Girard, near Green Ridge, Illinois
6:00 p.m. A large crowd of miners saw an unknown object land 3 km north of Green Ridge and 4 km south of Girard. The night operator of the Chicago-and-Alton Railroad, Paul McCramer, stated that he came sufficiently close to the craft to see a man emerge from it to repair the machinery. Traces were found over a large area. The object itself was elongated like a ship with a roof and a double canopy. It left toward the north. (Magonia #15, 186,187)

April 14, 1897; Gas City, Indiana
3:00 p.m. An object landed 2 km south of Gas City on the property of John Roush, terrifying the farmers and causing the horses and cattle to stampede. Six occupants of the ship came out and seemed to make some repairs. Before the crowd could approach the object, it rose rapidly and flew toward the east. (Magonia #16, 188)

April 14, 1897; Cleveland, Ohio
Joseph Singler, captain of the "Sea Wing," was fishing with S. H. Davis, of Detroit, when they saw on the lake what they thought was a ship, about 13 m long, with a canopy. A man, about 25 years old, wearing a hunting jacket and a cap, was fishing from the deck of the object. Near him were a woman and a 10-year old child. When the "Sea Wing" came close to the craft, a large, colored balloon rose from the object, which flew up with it to an altitude of about 150 m and circled "like a hawk" before flying away. (Magonia #17, 189)

April 15, 1897; Linn Grove, Iowa
Morning. A large object was seen to fly slowly toward the north. It seemed ready to land and five men (F. G. Ellis, James Evans, David Evans, Joe Croaskey, Benjamin Buland) drove toward it. About 7 km north of Linn Grove, they found the craft on the ground, came within 700 m of it but it "spread its four giant wings and rose towards the North." Two strange figures aboard the craft made efforts to conceal themselves. Witnesses were surprised at the length of their hair. Most residents of Linn Grove saw the craft in flight. (Magonia #18, 190)

April 15, 1897; Howard-Artesian, South Dakota
Nightfall. A flying object coming closer and closer to the ground followed a train, as reported by the engineer, Joe Wright (Magonia #19, FSR 66,4)

April 15, 1897; St. Louis, MO
7:45 p.m. This is the first report from the entire period to be declared a possible UFO. Dr. Eddie Bullard provided this report to Brad Sparks in Dec. 2006. A Medical doctor/amateur astronomer observed a cigar shaped object with a telescope.

April 15, 1897; Perry Springs, Missouri
9:00 p.m. A passenger train on the Wabash line, going toward Quincy, was followed by a low-flying object for 15 min between Perry Springs and Hersman. All the passengers saw the craft, which had a red and white light. After Hersman it flew ahead of the train and disappeared rapidly, although the train was then running

at 65 km/h. (Magonia #20, 190)

April 15, 1897; Springfield, Illinois
Two farm workers, Adolph Winkle and John Hulle, saw a strange craft in a field. They had a discussion with its occupants, a woman and two men, and were told the ship-had flown from Quincy to Springfield in 30 min and that the crew was making electrical repairs. (Magonia #21, FSR 65,1)

April 16, 1897; Downs Township, Illinois
Approximate date. While working in his field, Haney Savidge saw an aerial craft land near him. Six people emerged from it and spoke to him for a few minutes before leaving again. (Magonia #22, 191)

April 16, 1897; Vincennes, IN
9:00 p.m. A mysterious airship passed over the city twice on the night of Friday, April 16. According to the Vincennes Morning Commercial, the airship first appeared about nine o'clock, traveling along the extreme eastern portion of the horizon: A sphere of golden light was first seen in the vicinity of the Union Depot, from down in the city. Those near the ship claimed they could clearly see the dark lines of its car, although no passengers were observed. (The Valley Advance, Vincennes, Indiana, March 18, 1980 Vol. 16, No. 28. Taken from Vincennes Morning Commercial April 16, 1897)

April 17, 1897; Williamston, Michigan
Morning. At least a dozen farmers saw an object maneuver in the sky for an hour before it landed. A strange man near 3 m tall, almost naked and suffering from the heat, was the pilot of the craft. "His talk, while musical, seemed to be a repetition of bellowings." One farmer went near him and received a blow that broke his hip. (Magonia #23; 196)

April 19, 1897; Leroy, Kansas
10:30 p.m. Alexander Hamilton was awakened by a noise among the cattle and went out with his son and his tenant. They saw an elongated cigar-shaped object, about 100 m long with a transparent cabin underneath showing narrow reddish bands, hovering 10 m above ground. They approached within 50 m of it. It was illuminated and equipped with a searchlight. Inside it were "six of the strangest beings" the witness had seen, also described as "hideous." They spoke a language no witness could understand. A cow was dragged away by the object with the help of a strong red cable; it was found butchered in a field the next day. (Magonia #24, Anatomy 16)

April 20, 1897; Homan, Arkansas
6:00 p.m. Capt. James Hooton was hunting in the vicinity of Homan when he heard the noise of a steam engine and found an object in a clearing. It looked like a cylinder with pointed ends, lateral wheels, and horizontal blade over it. Hooton spoke with a man who wore dark glasses and walked behind the craft. There were three or four occupants. The witness was told this was indeed "The Airship" and that it used compressed air for propulsion. Hooton saw the wheels spin as the craft rose and flew away. (Magonia #25, FSR 66, 4)

April 22, 1897; Rockland, Texas
John M. Barclay was intrigued when his dog barked furiously and a high-pitched noise was heard. He went out, saw a flying object circling 5 m above ground. Elongated with protrusions and blinding lights, it went dark when it landed. Barclay was met by a man who told him his purpose was peaceful and requested some common hardware items to repair the craft. He paid with a ten-dollar bill and took off "like a bullet out of a gun." (Magonia #26, 192)

April 22, 1897; Josserand, Texas
Midnight. Frank Nichols, who lived 3 km east of Josserand and was one of its most respected citizens, was awakened by a machine noise. Looking outside, he saw a heavy, lighted object land in his wheat field. He walked toward it, was stopped by two men who asked permission to draw water from his well. He then had a discussion with a half-dozen men, the crew of the strange machine. He was told how it worked but could

not follow the explanation. (Magonia #27, 193)

April 23, 1897; McKinney Bayou, Arkansas
Judge Lawrence A. Byrne of Texarkana, Arkansas, was surveying a tract of land when he saw a peculiar object anchored on the ground. "It was manned by three men who spoke a foreign language, but judging from their looks one would take them to be Japs." (Farish, in Allende Letters (Magonia #28, Award Special, 1968))

April 25, 1897; Merkel, Texas
Evening. People returning from church observed a heavy object being dragged along the ground by a rope attached to a flying craft. The rope got caught in a railroad track. The craft was too high for its structure to be visible but protrusions and a light could be distinguished. After about 10 min a man came down along the rope cut the end free, and went back aboard the craft, which flew away toward the northeast. The man was small and dressed in a light-blue uniform. (Magonia #29, 194)

April 26, 1897; Aquila-Hillsboro, Texas
Approximate date. A lawyer was surprised to see a lighted object fly over. His horse was scared and nearly toppled the carriage. When the main light was turned off, a number of smaller lights became visible on the underside of the dark object, which supported an elongated canopy. It went down toward a hill to the south, 5 km from Aquila. When the witness was on his way back one hour later he saw the object rising. It reached the altitude of the cloud ceiling and flew to the northeast at a fantastic speed with periodic flashes of light. (Magonia #30, 195)

May. 6, 1897; Hot Springs, Arkansas
Two policemen, Sumpter and McLenore, were riding northwest of Hot Springs when they saw a bright light in the sky. About 7 km farther they saw the light again coming down to the ground. One km farther the horses refused to walk. Two men were seen carrying lights. The lawmen took their rifles, called the strangers, and were told that they crossed the country with a flying craft. The silhouette of the machine, about 20 m long, could be seen in the clearing. There was a woman with an umbrella nearby. It was raining, and the younger of the men was filling a large container with water. The elder man had a beard and suggested that the policemen fly with them "to a place where it does not rain." The same witness went back through the same spot 40 min later and found nothing. (Magonia #31, FSR 66, 4)

"U.F.O." REVISITED

"Unidentified Flying Objects", 1956

Part Two: The Other Players

Major Dewey J. Fournet Jr.

Dewey J. Fournet Jr. is presently employed as a member of management in a large international chemical company. Like Chop, he stays quite busy with his job, and he isn't a publicity-seeker in any sense. As a matter of fact, when it comes to UFOs these days, Fournet stays very "low key." He offered me some rather profound dialogue, however, dealing with his involvement in the Air force UFO project in the early fifties. He, Chop and Ruppelt worked closely together on the official UFO investigation. And, like many other knowledgeable contributors, Fournet provided technical experience during the making of "U.F.O."

Fournet's role in the Air Force was intelligence. He served in the Army nearly four years in World War II, and for the last three years of that period he performed intelligence work in the Army Air Force. The Air Force became a separate operation soon after the war, and Fournet's reserve commission was transferred from the Army to the Air Force. In April 1951, Fournet found himself recalled to active Air Force duty and he was sent to Air Command and Staff School until August. He was soon assigned to Intelligence at the Pentagon.

"Shortly afterwards," he recalls, "I was assigned official Headquarters responsibility for the UFO program, serving as Monitor for Project Bluebook and handling UFO-related intelligence matters."

Major Fournet left active service - and the UFO project - in January 1953, having racked up five-and-a-half years with the military during the two periods.

"I was indeed a UFO skeptic when I was assigned to the program," Fournet states. "At some point during the first few months of my assignment - probably during early 1952 - I became convinced that the subject deserved serious attention.

"This change," he indicates, "occurred as a result of my exposure to the project files and the study of the steadily increasing volume of sighting reports. "I didn't become a 'believer' in the popular sense," he cautions, "I simply changed my posture from complete disdain of the subject to one of conviction that it needed serious study."

Fournet, whose comments typify an intelligence officer who treated his work seriously, explained that the USAF had to learn as much as it could about the UFO phenomenon, "if for no other reason than to be able to discern a potential Soviet attack through the background 'static' created by the deluge of UFO reports in 1952."

Nowadays, admitting that scientific curiosity had to remain subordinated during his active USAF participation, Fournet hopes that science will take a major role in identifying UFOs. In the movie "U.F.O.," Fournet (who did not play himself, though he approved every line of his part in the script) shows Al Chop the Montana and Utah UFO films. In reality he, like Chop, found the films very

curious. Following lab tests and witness interviews involving the Utah film, Fournet turned out to be one of the people responsible for classifying Delbert Newhouse's filmed UFOs as "unknowns."

Dewey Fournet has played a mostly silent role as a member of NICAP's Board of Governors since 1957. He recently attended the well-attended UFO conference held at Fort Smith, Arkansas (where, in fact, the Lorenzens of APRO kindly told him of my interest in interviewing him).

Again, thinking back, he summed up his views on the government's efforts to explain UFOs.

"Personally, I regret the fact that the government no longer associates itself with this subject, although I feel no remorse whatsoever over the burial of the USAF project because of the extremely negative path that it generally followed after 1953. "Captain Ruppelt confided to me that he could see the negativism developing following the report by the CIA Scientific Panel in early 1953, and this was the main reason for his request to be reassigned from the project."

Fournet is keen, probably with justification, in emphasizing that the Air Force was mainly concerned with whether UFOs were a threat to national security. However, "when the CIA Scientific Panel concluded in 1953 that no threat was evident, the Air Force philosophy seems to have undergone drastic modification with minor variations until the project was disbanded following the infamous Condon report."

If a government agency with a less limited mission had been funded to study UFOs, according to Fournet, we might have had some of the answers to UFOs. "Since this has never been done, I feel that it was proper for privately funded organizations to move into the vacuum." But there are problems.

"For example." Fournet concedes, "there are few totally serious organizations. Too many have sprung up on the fringe element, either to promote preconceived philosophies and/or 'solutions' or to realize monetary windfalls. Then, the few sound organizations represent a fragmentation of resources and overlapping efforts, as a consequence of which no one is able to bring to bear all the available talent in one coordinated attack on the problem."

Dewey Fournet - via Major Fournet - was portrayed in "U.F.O." in several scenes. Like Al Chop, he was present during the famous Washington National sightings in 1952.

"My involvement in the Washington incidents did entail hectic days and nights, although these sightings were merely a small part of an unbelievable hectic period of eight or nine months in 1952." The advantage during the National sightings was that Fournet didn't have to depend on eyewitness accounts. He was on the scene, observing the UFOs on radar.

"My attention to what was going on, however, was far from undivided - long distance phone calls to handle, fighter interceptor requests to make, reporters outside to be satisfied, etc."

At this point in reality, there arises another conflict in what "U.F.O." portrays. "In fact, I wasn't even present when a fighter pilot reported that he was surrounded by UFOs," Fournet explains. "In reviewing the movie script, I had taken issue with Al Chop over this, and only after considerable discussion and reflection did I finally conclude that this occurred when I was on the phone, talking to Bob Ginna of 'Life' [magazine]."

Discussing "U.F.O.," Fournet is careful to assert that the events in the movie are depicted as they are seen through the eyes of a public information officer (Chop). "Although the facts depicted are accurate," Fournet said, "actual operations in Intelligence were materially different in many respects from the impressions the movie can leave. Al happened to be a privileged recipient of considerable information because I had convinced my superiors in 1952 that all non-sensitive UFO information should be made available to the public.

"Because of this," Fournet points out, "I tried to keep Al informed of all developments that I thought would provoke queries from the press and members of the public.

"This was the only 'open' period that I know of in the entire existence of the UFO project."

The written interview with Dewey Fournet included a final question. Do you feel a lot of important UFO information has been and/or is still being censored by certain government agencies?

"To the best of my knowledge," he replied in conclusion, "there has never been any censoring per se, with the exception of deleting names of witnesses and any data pertaining to radar or intercept procedures.

"On the other hand, I'm positive that the public was frequently fed misleading statistics and examples of reports that were atypical, intended only to make the subject appear to be entirely asinine."

Straight talk from Dewey J. Fournet Jr., another important figure in UFO history who helped to add accuracy to "U.F.O."

Clarence Greene was well on his way to making his planned documentary a celluloid reality in late 1955.

Al Chop had given the okay to basing the film on his experiences with the official UFO investigation. Dewey Fournet had offered to lend technical advice. Arrangements were under way for Edward Ruppelt to play his own role as well as give advice. Delbert Newhouse and Nicholas Mariana were available to be interviewed on film about the unexplained UFO films they had made.

In addition, Greene had enlisted the aid of electronics engineer and radar specialist Wendell V. Swanson. Swanson had built our first radar installation at Okinawa, and later analyzed many radar-confirmed UFO reports at Wright Field during the years the movie depicts. By 1954, he was a leading engineer in the missile guidance division of a West Coast aircraft plant. Like Ruppelt, Swanson played himself in "U.F.O."

The production staff was being readied as well. Exhaustive research by screenwriter Francis Martin was being put into script form and undergoing revision. Winston Jones, a Hollywood prop man, was about to assume a more strategic position as the director of "U.F.O."

Amidst all the organizing, documenting and double-checking, however, there was still a key position to be filled. Someone had to play the role of Al Chop. That someone was found in the City Room of the now defunct "Los Angeles Examiner." His name was Tom Towers, a writer who was then a senior member of the Aviation Writers association. Towers recently recounted the events surrounding his selection for the part:

"When 'U.F.O.' came about, Al Chop recommended me to Greene-Rouse Productions as an active newspaperman who would fill the part he played as a member of Project Bluebook. Chop was then working in the public relations department of the Douglas Aircraft Company and I knew him through my aviation writing duties. So, after a few meetings with Greene-Rouse - and a check with my editors at the 'Examiner' - I was able to get a 21-day leave to make the picture.

'The picture was low-budget - under $200,000 I believe - and I furnished almost all my own wardrobe. I also furnished my own car for scenes requiring a vehicle, and the film was made in a small hideaway studio on the outskirts of Hollywood." Towers emphasizes that production was carried out under strict secrecy for fear that other companies might try to rush a competing film into print. Or perhaps to keep reporters away from the studio: "I recall that my dressing room in this 'studio' was the men's room. What a put-down!"

Tom Towers is very opinionated about his role in "U.F.O." He regrets that he wasn't able to give the form of portrayal he had in mind. "This was because I was under the direction of a director who was following the script and taking orders from producers who were genuinely interested in presenting the facts. I do not offer this as a criticism, but only as my own feeling. I felt the film was

too damn factual. It attracted two kinds of people: those who believed and those who did not. The broad middle mass could not have cared less - and you need that market to make a film successful at the box office."

Tom Towers. He admits that as the highest paid performer in "U.F.O.," he only grossed $1,500.

In attempting to reach his goal of making "U.F.O." a documentary of the highest standards, Clarence Greene sought out people and events that had the means to lend authenticity. For instance, even though the Newhouse (Utah) and Mariana (Montana) films had been shot in color - and "U.F.O." was filmed in glorious black and white - Greene insisted on showing the UFO movies in their original color. Therefore, every point of "U.F.O." contains color sections just to accommodate these films.

It might be argued that Clarence Greene left very little to chance in his selection of convincing UFO events. What better form of documentation could there be than to include an interview with a commercial airlines pilot who, with crew and passengers aboard, actually encountered a UFO while in flight? Greene located an American Airlines pilot who was still on duty with the company. His name was Capt. Willis T. Sperry ("Doc" Sperry, as he is known to his friends).

Sperry had made an important UFO sighting on May 29, 1950, at about 9:30 in the evening. There was unlimited visibility, and Sperry's American Airlines flight was 60 miles southwest of Washington, DC, headed for Nashville, Tennessee. His aircraft was flying at 7,500 feet. Sperry (who retired from American in April, 1971, after 32 years of service) was about to make UFO history. A UFO came into view.

"I was turned around in my seat at the moment it appeared, getting a map out of a briefcase. My copilot called out, 'What is that - look out - it's coming right at us.'" Sperry outlined what happened next.

"I made an immediate right turn from a heading of approximately 230 degrees to 320 degrees.

"The object was a very bright shimmering blue light. We were very interested in ascertaining its distance from us."

As Sperry leveled off in flight, the UFO appeared to stop in the sky.

"As I look back on this incident, I recall that, at the time, it did not occur to me that I was seeing an object called a UFO. It was a very puzzling sight." By the time the UFO appeared to stop, the stewardess and eight passengers had seen the light, along with Sperry, the copilot and the flight engineer. The object remained stationary for about 30 seconds before it began moving again. "At this time," continued Sperry, "I started a left turn to keep it in view."

"There was a full moon in the eastern sky; the object passed between us and the moon, and I got a definite silhouette of it. It appeared cigar-shaped, with no external (characteristics) protruding from it.

"It circled around behind us and appeared on our right, where it again came to an apparent stop. How far was it from us? I will take a guess that it was five miles away. We really had no way of judging its distance.

"After about 20 to 30 seconds," Sperry relates, "it started moving eastbound, climbing at about a 30 degree angle. We watched it until it disappeared."

For this interview, "Doc" Sperry surprised this writer with further information on his sighting - data that is not known even to veteran researchers.

"An eastbound American Airlines DC6 between Nashville and Knoxville at 19,000 feet, headed for Washington and flown by Capt. Henry Myers, observed what appeared to be a brilliant shooting star falling eastward from the zenith.

"When it got to the horizon it stopped. They watched it for seconds as it seemed to move horizontally, then it disappeared.

"I talked to Myers after the incident and we correlated the time of my sighting with his, and it was exactly the same time."

Myers told Sperry that what was most interesting was the fact that "shooting stars" don't stop and change direction!

"His aircraft was 450 nautical miles to the southwest of us," Sperry continued.

"I have been reluctant to report this, as he asked me at the time to please keep his sighting out of the news. He is now deceased. Capt. Henry Myers was the pilot of the Sacred Cow, which flew President Roosevelt during World War II," Sperry added. (I double-checked with Sperry to make sure he wanted this information released now; he did, and I'm glad.) Thus, Clarence Greene invited Sperry to tell his story in "U.F.O." The interview took place at L.A. International Airport. Now, twenty years later, Willis Sperry is in partnership with another man, and he's still in the "flying business," though from a different point of view. Instead of just piloting assorted aircraft, Sperry now sells them, at his Orion Aircraft Sales Company (Van Nuys, California).

Sperry was asked if he recalls receiving any public reaction or any reaction from American Airlines after his interview in "U.F.O." appeared across the nation. "The public reaction at that time," he indicates, "and from American Airlines, was genuine interest."

Sperry confirms that no particular physical effects resulted among anybody on the plane during or after the UFO sighting.

"I had no idea that this sighting would generate so much interest," he confesses. "Almost everyone seemed genuinely interested in what I saw. I had several interviews with Air Force Intelligence personnel from Washington.

"American Airlines expressed only interest in what I saw and never issued any censorship orders to me."

In the Greene-Rouse movie, Sperry was asked, "Have you ever seen any similar object, Captain?" He replies, "Never before or since." He feels the same today.

"Although I observe probably more than the average layman for any unusual phenomena, I have never seen anything since then."

Willis Sperry. Like so many pilots, he believes UFOs are more than products of the imagination. What is your opinion of UFOs in 1976? I asked in conclusion.

"I am very much of the opinion that there is some extraterrestrial phenomenon that has not been explained," he advises. He believes that the findings of Erich von Daniken ("Chariots of the Gods?") are very convincing.

But Sperry bases his belief on other events - like sightings by people who know about things that fly - on the Earth and beyond.

"The sightings by Apollo flights to the moon should convince most skeptics that this old Earth has been visited in the past as well as the present."

Willis Sperry. In many ways, he unintentionally acts as a spokesman for many pilots whose views on UFOs are similar to his own. Willis Sperry. Another reason why "U.F.O." can truly be classified a documentary.

All the good, sincere people - all the documentation - all the time and all the planning came to fruition in May 1956, when "U.F.O." Was released by theaters around the world. Movie reviews were generally kind, often ecstatic. Columnist Louella Parsons wrote: "Hollywood is talking about the

incredible interest expressed by fans and those in the industry over the flying saucer film made by Clarence Greene and Russell Rouse with our government's knowledge. It actually shows pictures of the saucers and is attracting front page and editorial attention although what the saucers are is still a mystery."

From "Variety": "An authentic beat! Interesting, informing and important! Gripping climax! Should register well!"

And the movie did register well, but not as well as it should have. The documentary approach just didn't go over as attractively as the producers had planned. Why not, is anybody's guess, and the whole question is irrelevant at this point, anyway.

Greene-Rouse went to great lengths to support their motion picture with facts. Every document that would back up the story line was placed in the custody of a Los Angeles insurance company and made available for public inspection.

Among the documents on file was a weather chart which reported atmospheric conditions over Washington, DC during the July 1952 sightings. The chart reportedly proved that the radar pickup of UFOs could not be attributed to temperature inversions. Also on file was a transcript of General Samford's Pentagon press conference held after the July 26 sightings.

A wire from Al Chop was likewise on display in which he said: "I AM TELLING THE TRUE FACTS TO THE PUBLIC FOR THE FIRST TIME IN YOUR MOTION PICTURE_"

Capt. Edward Ruppelt, USAF Reserve, also had a wire on file, and he stated: "I HEREWITH CONFIRM THE AUTHENTICITY OF THE FACTS AND INCIDENTS DRAMATIZED IN YOUR SCREENPLAY_"

Maj. Dewey Fournet submitted a statement to Greene-Rouse, also kept on file: He certified that the part of the script dealing with his role was "_factually correct and true to the best of my knowledge_"

Delbert C. Newhouse and Nicholas Mariana each placed statements on file regarding their UFO films. The Newhouse film contained up to 12 unknowns; the Mariana film, two.

Some of the documents on file were as much of an anomaly as the UFOs. Part of an official press statement prepared by Albert Chop and Colonel Wendell Smith (Current Intelligence Office Branch, Deputy Chief of Staff, Intelligence USAF) stated that the Newhouse Utah UFO film "could not be produced under simulated conditions."

At the same time, this press statement "was cleared by Col. Adams, Chief of Current Intelligence, and also by the Air Force Office of Information Services." Then, the puzzler: "At the last moment," the statement continued, "this press statement was killed by Col. Teaburg of Air Force Intelligence." Assuredly, the military works in strange ways.

However, Col. Adams sent a letter to Newhouse, telling him that his UFO film "still remains one of the most interesting incidents we have investigated."

The full reports of Thomas Mantell's death while chasing a UFO was also placed on view.

The Gorman case of October 1948, dramatized in "U.F.O.," Was on file, containing information on a blinking, white light that made a pass at the Fargo, North Dakota, Air Base tower. Lt. Gorman, coming in for a landing, dove at the light and chased it for 27 minutes while several observers watched the "dogfight." Substantiating witness reports were on file.

Another official report, from January 1951, was in the hands of the insurance company. A Mid-Continent Airlines DC3 had taken off from Sioux City (Iowa) Airport. As it climbed for altitude, an unidentified light closed in. The object made a head-on pass at the DC3, which swerved to avoid a collision. The incident was observed by several passengers - including a colonel from Military

Intelligence. The chaos ended when the UFO suddenly zoomed straight up in the air and disappeared. This event was also portrayed in the movie.

Capt. Willis Sperry's report, in affidavit form, was the final document kept on file. "Since my experience," he clearly pointed out, "I have talked to many airline pilots who have seen similar objects that absolutely cannot be identified in any known type of aircraft category due to the speed, maneuverability and shape of the object."

Any discussions of "U.F.O." should also make mention of the theme music. The lively, often beautiful score heard throughout the movie was written by Ernest Gold (conducted by Emil Newman) and is entitled "U.F.O.," according to the files of the musical society, A.S.C.A.P. It's one of those scores that, if put into an LP album (as so many movie scores are these days), might be very successful.

Where can "U.F.O." be found these days? Actually, the motion picture can be obtained for special showings (or by TV stations when purchased in a "package"). Write the following for information, and don't fear the price of rental - group showings can be arranged for around $70.00 per viewing: UA Sixteen, 729 Seventh Avenue, New York, N.Y. 10019. "Unidentified Flying Objects."/Clarence Greene.

Maybe if the two of them had made acquaintances today, instead of 1956, the movie would have the same shattering effect on audiences that recent films like "Chariots of the Gods" have had.

Strange, really. Way back in December '75, I wrote Clarence Greene and asked a question that was special to me. Considering how public interest in UFOs has become more heightened and sophisticated over the years, would you ever consider making another UFO film documentary? Green's reply consisted of just one word: "Possibly."

One contemplates what wonders Clarence Greene might work with an updated documentary on the UFO mystery. UFO research owes him a great debt. Unfortunately, he does not owe UFO research another great film documentary.

"U.F.O." Could there ever be another like it?

"Possibly," the sound of the word makes me more hopeful. "Possibly."

INTRODUCTION

At the termination of WW II, intelligence information was plentiful. It was then possible to accurately assess the effectiveness of our weapons. Documents containing valuable technical data were abundant. Persons having knowledge of a multitude of pertinent subjects were available for interrogation. Inventions of all stages of development were awaiting investigation. Prisoners of War were returning from areas of interest. All this and much more was at our disposal for intelligence exploitation.

An enormous opportunity and challenge existed for military intelligence, and many military programs were initiated to gather as much information as possible. These programs constituted a commendable effort. Reports containing valuable intelligence of all types were evaluated and collated. They clearly showed the potential, but only a minute portion of intelligence information available was being collected.

The CIC, later redesigned by USAF as the OSI, was doing its best to service the intelligence requirements in both Europe and the Far East, but the two-fold mission of collecting counter and positive intelligence precluded any concentrated effort toward the collection of positive air intelligence. Criminal investigation, black market activities, and security investigations were receiving priority while air intelligence exploitation went begging.

==========
==========

{Page 2}

SECRET
2

Realizing the need for an organization comparable to the OSI for the collection of positive air intelligence, D/I, USAF gathered a group of linguists to service the D/I of the United States Air Force in Europe with interpreters, translators, and interrogators. In November, 1948, this group was designated the 7001st Air Intelligence Service Squadron.

As relations with the USSR became increasingly strained and the Iron Curtain closed around Russia and the Satellites, the Director of Intelligence, USAF, established "Project Wringer" to exploit, for air intelligence, former prisoners of war repatriated from the USSR and its satellites. The returnees had been scattered in PW camps throughout the "Iron Curtain" countries performing a variety of tasks in semi-skilled and hard labor capacities. In some cases PoW's had worked as specialists in key industries, and a small group of PoW had enjoyed limited freedom of movement in certain areas of USAF interest. Through interrogation of these returnees, the Air Force was able to begin forming a picture of the USSR's air offensive and defensive capabilities, and the extent and vulnerability of the USSR's industry and war making potential.

The results of the intelligence collection efforts proved sufficient to indicate the need for further expansion. The original 7001st AISS of 15 officers and 45 airmen grew into the 7050th Air Intelligence Service Wing with personnel skilled in all phases of intelligence. recognizing the success of this type of unit, the Director of Intelligence, USAF, took action in August, 1950 to develop

additional 7050th Air Intelligence Service Organizations for certain selected major air commands and areas to intensify the collection of air intelligence in the field. The 6004th AISS in the Far East proved beyond a doubt the value of an AISO during hostilities through overt collection activities. This unit has recently been enlarged and redesignated the 6002d Air Intelligence Service group. the 5004th, activated in Alaska in 1951, although a much smaller unit, is nevertheless producing valuable positive intelligence. The 4602d AISS, activated in March 1952, is the newest AISO, but has the greatest geographical coverage per individual assigned.

Operations Section has been reorganized to comply more closely to actual functional needs and to the organizational T/D. Under the new set up there are three major sections in Operations: Training, Critique and Analysis (formerly Editing and Evaluation) and Operational Control. Training is broken down into two sections, Language Training and Specialized Training. Operational Control is broken down into Field Coordination (formerly Field Units) and Documents and Dissemination. Personnel assigned to the various sections and the AFSC slots they are occupying are as follows:

OIC Operations	- Lt Colonel Jones 2016
AOIC Operations	- Major Romanoff 2074
Airborne Operations Officer	- Vacant 2064
OIC Operational Control	- Vacant 2064
AOIC Operational Control	- Vacant 2074
OIC Field Coordination	- Lt Hammond 2054
OIC D & D	- Lt Stockstill
OIC Training	- Captain Ivanow 2074
OIC Language Training	- Vacant 2074
OIC Specialized Training	- Lt Jacobs 2054
OIC Evaluation and Editing	- Capt Schottloutner [1]

UFOB Program

On 4 December 1953 Colonel White, Captain Cybulski and Captain Bellovin attended a conference with General Burgess fort he purpose of discussing the role of the 4602d AISS in the Unidentified Flying

Object (UFOB) Program, and an ATI course for the 4602d. It was proposed that in the future the 4602d will be the agency responsible to ATIC for the investigation of FLYOBRPTS in the ZI. Captain Cybulski was appointed FLYOBRPT officer and departed on 5 December 1953 for Wright-Patterson AFB for the purpose of (1. Establishing the role of the 4602d in the collection of and reporting of FLYOBRPT data and (2. Developing an ATI course to meet 4602d requirements. The course will be designed primarily to instruct our personnel in the latest technological developments in SLRA, ECM, and A-Bomb and Guided Missile techniques as applicable to our responsibilities. UNIDENTIFIED FLYING OBJECTS (UFOB)

First I wish to caution you that the regulation on UFOB reporting is only in draft form and that we are waiting for approval to go ahead from Headquarters USAF.

No Flight or Detachment personnel will be authorized to arrange with local Air Defense units for interception action. The 4602d is an investigating agency. We are not operations. Colonel Walton, Intelligence, at the Pentagon asked that we be permitted to go into this, before the regulation becomes final, but so far I have not heard any report on it. The primary reason for our participation in this program is to solve a very perplexing problem for the Air Force and the country as a whole. To the Air Force the investigations of the UFOB is very important. In all but a few cases a satisfactory solution has been reached and the Air Force feels that adequate, thorough investigative procedures can solve the small percentage of unsolved sightings. This is where we come into the picture.

Due to our strategic locations throughout the country, we can be available at a moments notice, to investigate any legitimate sightings. However, before any flight or detachment embarks on an investigation, it should accomplish two major steps: (1) determine the reliability of the reported sighting, (2) obtain permission to investigate from this headquarters by TWX or MARS. It is possible, under some circumstances, to obtain permission by placing a phone call to our headquarters. As a matter of fact that may be necessary in some cases.

For example: If the information indicates that the sighting will be around for some time, it may pay off to obtain permission by telephone, because you want to go out there immediately. Several factors will determine that of course. Distance will be a factor. If you have to go some place 250, 300 miles away and you feel that you should, the time that you have spent placing the phone call would not matter. However, if it was 15 or 20 miles away, and someone calls, reporting an object still in sight, you may want to go immediately. Many factors will have to be taken into consideration when a sighting is reported to one of the flights, or detachments. To better understand the elements and procedures involved in the investigation of UFOB I would like to cover this draft of the regulation. Now you are going to be faced with many, many new problems that you haven't had to face to date, and it will call for and require a great deal of common sense. Determine first how legitimate it is, how serious it is, if there really is something, or if it is a letter from some crackpot. If it is the letter, you'll have to ignore it. Above all, the Air Force is sincere in its attempt to obtain proof one way or the other. When I went to Dayton, the scientist and the astronomer they had hired, were ready to quit. But before they were permitted to say anything I was introduced and told them what I was there for and what I was going to do. They threw their resignations away and decided to stay. Because as the astronomer said - "put yourself in my

==========

{Page 84}

position, I am being ridiculed by members of my profession for chasing those imaginary objects, and when I went into this ,I went into it sincerely, because I thought that both from the astronomical standpoint and also from the scientific value, I could disprove these things. In so doing I would be rendering my profession and my country some service. However, in the past, I have not been able to get support from the Air Force. It seems that they all think this is a hot subject, and they want to drop it. They don't want to have anything to do with it. No one wants to be quoted.

Now that the 4602d has entered the picture, we are assuming quite a serious role. The feeling is, both at Wright_Patterson and Washington, that we could be very very instrumental in bringing this thing to a head, once and for all. They feel that it can be done by personal contact, where a piece of paper fails, because in the past if they had a sighting somewhere, the people looking into it were the people at Wright-Patterson where there was only one officer, and one airman available. So they get a sighting in South Dakota. They send out a form of about 6 or 8 pages, Lt Ledher is quite familiar with it, as probably all of you are. The man takes one look at it, depending on the intelligence level of the person, and he more or less decides that he didn't see anything. Or he'll answer it hastily in a haphazard way, and it doesn't give anyone anything to work with. And that is where we hope to rectify the situation because you will fill out this form if you go out. Let's say that there is a sighting in Kansas City. You go and you look into it and you fill out the form and there's sufficient evidence that it should be looked into, and you've made all efforts to investigate it, it would be turned over from there to ATIC and they would take over. In many cases they would come up with a solution, whereas now it's dropped dead. They don't do anything about it. It just comes to a blank wall, because of insufficient

information. The biggest files at ATIC, are complied of materials that stated insufficient evidence. Of course some of it you can't help. Obviously if somebody calls in and says that he saw an object for 5 seconds, he or she would have to have some very conclusive evidence to substantiate, maybe a picture, maybe some other factor, before you could put any value on it. What can you prove in 5 seconds? But if at La Cross, Wisconsin, where apparently a number of people had seen it for several hours, that's another story. There you could really make something out of it, Then there are cases, like that near Great Falls, Montana where a Warrant Officer shot 40 feet of film. After you blow it up and look at it, you see it's a formation of high-flying geese. Powerful telescopes like those in California or the East, can analyze some of the sightings as stars.

I'd like to say a few words on the analysis portion of this AF Reg. (See Par 4b) After we have gone as far as we can, and we have

==========

{Page 85}

HQ 4602D AISS, ENT AFB, COLO.
3RD COMDRS' CONF

exhausted all efforts to identify a sighting, we will turn it over to ATIC, with a recommendation that it be investigated. You will send it in to us here at Headquarters. I will review it, AND WE WILL PUT AN INDORSEMENT, a cover letter on it and send it on to ATIC. They will investigate from both the astronomical and the scientific standpoint. They will come up with some answer and will notify us. We here in Headquarters will keep a complete file on all the sightings. That's why we want the information copied. We will file them under separate headings, such as the type of personnel involved, military or civilian, or air-lines. We will record it under the type of object it was eventually determined to be.

Cooperation: When requested by ATIC, the 4602d will conduct investigations, within our capability, and furnish air and ground transportation, to ATIC, and 4602d representatives when feasible. Direct communication is authorized between us and ATIC.

Area of Responsibility; All portions of this regulation are equally applicable to us and to ATIC under the following conditions: When the 4602d AISS exhausts all efforts to identify the object, we will turn it over to ATIC. That is one time when the ATIC comes into the picture and the second is when it is actually in their area, and we will be responsible for telling them that. Bear in mind that their military facilities are practically nil. As I cited earlier, they have only one officer. The airman (assigned to this project) was discharged the 31st of December, leaving only the officer and a typist.

Guidance: The thoroughness and quality of the reports and investigations is entirely up to you., It's up to the individual. He can make it or break it. The steps you should take to identify the object are (1) the theodolite measurements, (2) the possibility of interception, (3) contact which is your biggest factor. If it happened in this area, who would you check with? Pueblo Airport? Albuquerque? Denver? Determine if they had any aircraft in the area at that time. Contact AC&W people and find out if they had any information on it. Check with weather people and find out if any balloons had been released at that time and in that area. All these steps you would have to take before you could feel that you had exhausted all efforts. now, consult astronomers in the area to determine if any astronomical body or phenomena could account for it, or have any bearing on the observation. This is optional. if you are fortunate in having an astronomer, or their facilities in your area, go to them, and see if they can help you. However, there cannot be any expense involved, because the astronomer in Dayton is under contract to the Air Force for all investigation, astronomically speaking and he receives funds to contact other people. If you were in the Albuquerque area and had exhausted all efforts, and we turned it over to ATIC, their astronomer would undoubtedly call the local astronomer whom he probably knows, and asks him to look into it.

==========

{Page 86}

HQ 4602D AISS, ENT AFB, COLO.
3RD COMDRS CONF

However you could save time and money if you happened to have that contact yourself. not all people will have that. Originally we were trying to work out something where we could take care of that end of it, but it would entail the task of lining up 18 different astronomers with 18 different contracts. Besides the man at ATIC is getting quite a sum of money for this and they feel that it should be his business. In case you can do it, go ahead. Contact military and civilian tower operators, that, of course, goes without saying. You would almost automatically do that. Contact persons who might have knowledge of experimental aircraft, and so on. Lt. Ledher ran into that. They have firms up there that do experimental work at Niagra Falls. Bell Aircraft does much experimental work with supersonic aircraft and things like that.

Reports: Information relating to UFOB will be reported without delay to the nearest 4602d unit. It will eventually end up at an Air Force Base or an Air Force Channel, regardless of who reports it, whether it's a civilian or the police. The method and priority of the dispatch will be selected in accordance with the apparent value of the material. There's nothing classified about this. We want to make this as unclassified as possible. Unless, and this I rather doubt, unless it happens to be the real thing. In that case additional data will be necessary, and we will have to come back to you to follow it up and you would have to give us the additional information that we need. The only time I can see that coming up is when we turn it over to ATIC and they get together with their astronomer and scientists, and decide that they need more information. They would come directly to you, the people who investigated it. We want to give them every assistance possible. That's where the program has been falling down. All written reports will be prepared on the Form 112, short title, "UFOB". I won't go into the report format because its outlined for you, and is also on this form.

Security: Reports should be unclassified, unless data included necessitates a higher classification.

Evidence: If anyone ever looked up AFR 95-6 and 95-7 as to what you have to do to send photographs forward, the way to mark them, the way to identify them, measurements etc., you'll know its complicated. These regulations outline where you have to send them. The photographs go to Washington. In addition one copy of each print will b forwarded to ATIC, and one to us here at headquarters. Fortunately there will not be too much of that. In almost every case where gun cameras or aircraft cameras have been used, the thing has been too small for identification and the photographs haven't been of too much value.

Material: In case of any physical evidence of UFOB, you're to safeguard it and notify us. We will tell you what to do with it.

==========

{Page 87}

HQ 4602D AISS, ENT AFB, COLO.
3RD COMDRS CONF

10. Release of Information:

a. Inquiries concerning specific local sightings will be referred to the activity information officer. The reporting officer may furnish the latter all raw information except names of principals, Air Force comments, details of intercept procedures involved and classified radar data. Examples of the type of information which may be released are:

(1) The location, time and date
(2) Description of the object
(3) Maneuvers reported
(4) Type of physical evidence
(If requester knows that such evidence exists)
(5) Intercept or other identification attempt made
(6) The fact that the object has been conclusively identified by ATIC or 4602d AISS as a conventional aerial device or other familiar object and no further evaluation is contemplated.

b. general information, such as periodic news releases, summaries of investigations, and status of the program, will be released by Headquarters USAF. ATIC and Headquarters 4602d AISS, will furnish this news release material to Headquarters USAF.

DOCUMENTS AND DISSEMINATION

I. INTRODUCTION

The Documents and Dissemination folder that was passed out to all Officers-in-Charge included all the forms used between D&D and the field units. The sample forms were filled out in a correct manner and contained complete instructions. The few problems that D&D has had with the field units were in the nature of administrative errors in filling out the forms. The D&D folder will guide the personnel that maintain the field unit libraries and classified sections. In addition to standard form, the D&D folder contained the directives that revised the AFR 205-1 and directives that upgraded and downgraded restricted documents. The security directives will be effective pending revision of AFR 205-1, ADCR 205-2, and SR 205-1 and 205-2.

II. REGISTERED DOCUMENTS

The Officer-in-Charge of each field unit will be designated on orders as Custodian of Registered Documents. The as Custodian of Registered Documents is the only officer that can sign Air Force Forms 163, 164, 165, and flyleaf receipts (certificate of entry and destruction) that come with the AIB, AIB #2, and CEI's (Communication-Electronics Instructions which only detachments have). All Registered Document forms with the exception of CEI's will be sent to this headquarters. The office of record for the AIBs is Hq, USAF, Air Adjutant General, ATTN: Custodian of Registered Documents. ADCR 205-2b states that the Custodian of Registered Documents will have at least an interim Top Secret clearance.

III CLASSIFIED DOCUMENTS

JANAPs and ACPs were discussed. The detachments have a letter of authority which will authorize them to order the necessary documents from the Cheli Depot and the Shelby Depot (JANAP - Joint Army-Navy-Air Force Procedures) (ACP -Allied Command Procedures). These publications contain directives covering standard communication format and procedures. All field units will receive the WAF AID as soon as Hq USAF, changes their distribution list. This is done quarterly. All units are receiving CONAC Intelligence Training Bulletin, ADC WIR, ADC Mission Intelligence and SAC Survival Trends.

The ICGM, AFM 200 series, has been upgraded along with the old AIG. The ATIC Studies, Reports, and Bulletins have been requested for all units. The ATIC publications with the AFM-200 series will be the documents used in the new

technical training program being established.

IV. TARGET MATERIALS

Squadron coverage of WACs and classified materials were discussed. A "WAC Bible" composed of WACs annotated in such a manner as to show coverage within the WAC area, was demonstrated. A squadron regulation cov-

==========

{Page 115}

HQ 4602D AISS, ENT AFB, COLO.
3RD COMDRS CONF LT R M STOCKSTILL

ering the filing by numerical order of all target material is being prepared by this Headquarters. A consolidated inventory of all target materials sent to the field units before Jan 54 is being compiled by D&D sections. This type of inventory will be accomplished semi-annually and will incorporate all Form 104Cs issued in the period concerned.

V. CONTROL OF CLASSIFIED DOCUMENTS

The AGO Form 996, until replaced with DD 646, will be used in the transmission of all classified materials to this Headquarters. Certificates of Destruction are to arrive at this Headquarters in two copies. Inventory and Transfer Reports of Classified Documents must be submitted to this Headquarters upon a change of the Officer-in-Charge in accordance with SR 205-2. Classified documents originating in the field must note:

(a) Authority and Reason; par 22 and 23, AFR 205-1
(b) Pages and inclosures numbered in series of total pages
(c) Copy number of total copies produced

The 104C forms that accompany the target material are to be kept as receipts and will be reflected on inventories by the registry number found on each shipment.

13 UNIDENTIFIED FLYING OBJECTS

When the UFOB program becomes active, Headquarters will issue implementing instructions. I don't want you to implement anything until those instructions become final. Adhere completely to the instructions you received on public

information releases. We are currently reviewing all directives in the Squadron, and we are going to set the example in preparation. We will try to give you the best directives that we can give you, and you've got to apply common sense to see whether these directives are sufficient to answer your needs. If, after a normal study of them, you are still unable to obtain exactly what you need, then let us know. Most of the time I think you'll find that some regulations may be improved as operational conditions change.

INTRODUCTION

As time passes and new technological advances are made, the prospect of future war looms more ominous and foreboding; into this atmosphere the 4602d AISS was projected. The increased tempo of activity in all phases of the squadron operations gave rise to new problems and required refinement of procedures already in existence and the reevaluation of the progress made in certain activities. The way in which the 4602d has attempted to solve its problems is in effect the history of the organization.

Time is the most significant factor in solving these problems. War does not wait for the unprepared; therefore, the 4602d has increased its training, liaison, logistical and administrative efforts.

New regulations were issued and old ones revised. A total of twenty-eight (28) were published during the reporting period. Administrative work was simplified, enabling field units to concentrate on peacetime training.

Communications, parachute, interrogation, language and technical training was intensified.

Unwieldy supply procedures were simplified, resulting in greater flexibility and reduced effort.

Issues with the FBI which had temporarily halted liaison activities with law enforcement agencies were resolved. The liaison effort produced proportionately greater pledges of assistance
during the reporting period than in any previous period. Pledges of communication assistance from non-military agencies and increased familiarity with portable communications equipment resulted in some improvement in the communications capability of the squadron. The printing and distribution of 300,000 copies of the new Squadron Brochure provided a new medium for solicitation of assistance.

There was steady advancement in combat readiness at the end of the reporting period.

There was more assurance that the field units of the squadron would be notified in the event of downed enemy aircraft or aircrewmen. The squadron had greater capability to move rapidly to the scene of an enemy crash.

The squadron's intelligence teams were more capable of exploitation of intelligence sources.

While still the weakest phase of squadron operations, there was some increase in the ability of the squadron to transmit intelligence information rapidly into Air Defense Command channels.

The period was characterized by an evaluation of previous efforts. This evaluation was expressed in new and refined procedures and directives. The squadron is more mature and better able to take its place in the Air Defense structure.

SECRET

SURVEY OF PERIOD

I. Organization

a. A change occurred in the organization of the 4602d AISS with the issuance of Air Defense Command General Orders #16 [1], dated 21 May 1954. These orders amended Headquarters Air Defense Command General Orders #47 [2], dated 17 October 1952 in the following manner:

(1) So much of General Orders #47 as pertains to organization of Flight 3-B and Flight 3-I was deleted.

(2) Flight 3-B was reorganized and activated effective 24 May 1954. General Orders #16 further assigned Flight 3-B to the Air Materiel Command, Wright-Patterson Air Force Base, Ohio, for administrative and logistical support.

b. A revision of Squadron Regulation 24-1 [3], Organization of the 4602d AISS, dated 29 July 52 was effected on 4 June 54. This new regulation reorganized the headquarters staff. It divided the staff into four departments; Command, Personnel & Administration, Operations, and Materiel & Services. The major revisions took place in the Operations Section. All sub-sections concerned with direct control of peacetime and combat operations of the squadron were placed under the Operations Officer. Control of classified material including all intelligence reference documents was returned to the Officer-in-Charge of Personnel & Administration (Adjutant).

c. The mission, function and responsibilities of field units and Headquarters Staff of the 4602d AISS were described on Squadron Regulation 24-2 [4], dated 16 June 54. It set forth in detail the peacetime mission of training and liaison to prepare the intelligence teams of the squadron for the wartime mission of overt collecting of intelligence from "people,

paper and hardware". This regulation defined duties of field units in respect to the two aspects of the mission.

Chapter 17

This is the first serious book about UFOs to be written by anyone actively connected with the official investigation of these phenomena. As chief of the Air Force project assigned to the investigation and analysis of UFOs, Mr. Ruppelt and his staff studied over 4,500 reports and discussed them with everyone from out-and-out crackpots to top-level scientists and generals

All reports received were subjected to military intelligence analysis procedures. Astronomers, physicists, aerodynamic engineers, and psychologists were consulted in the course of the Air Force's exhaustive investigations. The official Air Technical Intelligence Center reports of their findings, many details from which are revealed for the first time in this book, contain some completely baffling detailed accounts of UFO sightings by thoroughly reliable witnesses.

Here are the complete official accounts of the classic cases - the Lubbock Lights, the Utah Movies, the Florida Scoutmaster, the Washington Sightings - as well as a wealth of less-publicized but equally amazing incidents.

While others who have written books and articles on UFOs imply that they were conferring with officials in the inner sanctum, Mr. Ruppelt, as this fascinating book makes clear, *was* the inner sanctum.

About the Author

From early 1951 until September 1953, Edward J Ruppelt was chief of the United States Air Force's Project Blue Book, an operation of the Air Technical Intelligence Center. Since 1953 the author has been in close contact with the present project staff and recently made a trip across the country to check current developments. Mr. Ruppelt is now a research engineer for the Northrop Aircraft Company. - 1956

This online book was produced by NICAP Site Coordinator, Francis L. Ridge, and authorized by the Center for UFO Studies

The Project Blue Book Research Center presents

Figures Associated With Project Blue Book

Captain Edward J. Ruppelt notes:

Ackerman, Brig. Gen. John B.
General Ackerman was Chief of the Collection Division of the D/I all during the big UFO Flap of l952. He had no direct connection with the project but he was very much interested. I used to stop in to see him and he always had definite ideas as to what we had and what we should be doing. He would tend to get all excited about individual sightings. He got copies of the UFO reports and several times he was on the phone wanting to know what I planned to do even before I had time to digest what was in the report. Ackerman had a "direct channel" to the top, to the Secretary of the Air Force and people in the Department of Defense, and every once in awhile he would quote some top dog in the government and what he thought that I should be doing.

Adams, Col. W.A.
Col Adams was the chief of the Topical Intelligence Branch of the D/I and Col. (Weldon H.S.) Smith and Major Dewey Fournet worked for him. He was pretty much sold on the whole thing. I think that Dewey Fournet influenced his thinking to a great extent and he really went to bat for all of Dewey's ideas. He pushed Fournet's study of the motions of the UFO's and he is the one who used to be the most vocal in briefings and at meetings in regard to Blue Book's taking a "negative" attitude. He is the one who became irked in one briefing and asked me if it wasn't true that if we made a few positive assumptions we could prove that the UFO's were real

Alvarez, Louis Dr.
Dr. Louis Alvarez, a physics professor from the University or California in Berkley, developer of MEW radar at the beginning of World War II and one of the "fathers" of the H-bomb. He sat on the panel that met in Washington in January 1953. Alavarz was only lukewarm to the idea that the UFO's might be real.

Burgess, Brig. Gen. Woodbury
General Burgess was the D/I of the Air Defense Command under General Chidlaw. He wasn't a believer in UFOs but he was firmly convinced that we, meaning the Air Force, should make every effort to find out what they were, even if they were all explainable. He bent over backwards to give us all the cooperation that we needed. I would say that his ideas reflected those of General Chidlaw.

Major General John B. Cabell
General Cabell was the Director of Intelligence for the Air Force during the 1947-1951 UFO era. He is the one who ordered Project Grudge reorganized in the summer of 1951. I didn't know him too well because he left to become number two man in the CIA shortly after I got on the project. He is the man who held the initial meeting in the Pentagon that Lt. Jerry Cummings and Col Rosengarten attended. He raised all kinds of hell when he found out that Col Watson and ATIC hadn't been doing anything about the UFO project in 1950. According to what Cummings said, he was pretty much a believer in the UFO's. General Samord replaced Cabell in the summer of1951.

Chapman, ??
This man was in charge of one of the photo labs at Wright Air Development Center and he did all of our work on UFO photos. He was a firm believer. He did do a good job of making unbiased analyses of our photos, however.

Deyarmond, Col. Albert B.
Al Deyarnond was an old hand with the UFO's, he'd been in on the first of Project Sign. From the old memo's I found, signed by him, he was once a firm believer along with Al Loeding, "Red"

Honnacker and the rest of the veterans or Project Sign. But by the time I got into the picture was, at least on the surface, lined up with the scoffers. But once, when I began to knock the UFO's, he raised the devil and chewed me out for not keeping an open mind." I would guess that he was a "scoffer" because he was a deciple of Col. Watson's. Deyarmond is now chief of structures at Ryan Aircraft Company.

Erickson, Col. J.G.
Col Erickson was head of the Policy and Management Branch of the Directorate of Intelligence and in some way he got in on all of the UFO business. He was sort of power behind the throne on what the official policy would be. I gave him quite a few briefings and he seemed to be a "lone wolf" in that he wanted to get the picture for himself. He got a little hacked at Fournet quite often, because he thought that Fournet was pushing his ideas, that the UF0's were real, too hard. I think that Erickson tended to put a lot of faith in the UFO's but he was one of those who was afraid to stick his neck out.

Fournet, Dewey J., Major, USAF
Dewey was Blue Book's liaison man in the D.I. He took over in early 1952 or late 1951 from a Lt. Col. whose name I've forgotten. The Lt. Col. was a completely worthless jerk. Dewey got hot on the subject right away and helped us a great deal in getting things straightened out in the Pentagon. His job was just supposed to be part time, but within a matter of months he was working on it full time. Fournet was the most confirmed believer that I ran into in the Pentagon. He had access to all of our reports, read them all over very carefully, and he was still absolutely convinced. He and I used to argue by the hour and I must say that he had some good arguments. All of his conclusions were based on the "race value" of the reports. If a person said that they saw something and had a good description of it, Dewey took this as the last word. He and I disagreed when I didn't buy the reports lock, stock and barrel. I didn't think that the person was using or having hallucinations, I was sure that they reported what they saw, but I wasn't convinced that what they saw was actually what happened. In other words I played it heavy on the "optical illusion" side and I backed this up with experience. I'd investigated too many reports and found that something that starts out to seem real mysterious can many times prove to be something very simple. No matter how much I talked, however, I never convinced Fournet that I had a point. Dewey is now (1955) a civilian engineer with the Ethyl Corporation in Baton Rouge, La.

Garland, Brig Gen, W. M.
General Garland was my boss at ATIC from the Fall of 1952 until I left. He was a moderately confirmed believer. He had seen a UFO while he was stationed in Sacramento, California. He was Gen. Samford's assistant in the Pentagon before he came to ATIC and he was the inspiration behind the Life article by Ginna. He gave Ginna his ideas and prompted Life to stick their necks out. Gen. Garland is now out of the Air Force and is a consultant to Rand.

Gittings, Homer
Homer Gittings was my contact in Los Alamos. He was a charter member of the group that was trying to correlate recorded radiation from an unknown source with UFO reports. He worked closely with a Ph.D. but I've forgotten the Ph.D.'s name. Gittings, the Ph.D. and several other scientists would fly down to Albuquerque and we'd meet with Col Methaney at Air Defense Headquarters. If I remember correctly, Gittings had an MS degree in Physics and was an instrumentation specialist.

Goudsmidt, Samuel
This man, from AEC's Brookhaven Lab on Long Island, sat on the Panel that met in Washington in January 1953. Goudsmidt was probably the most violent anti-saucer man at the panel meeting. Everything was a big joke to him which brought down the wrath of the other panel members on numerous occasions.

Hardin, Capt Charles
Chuck Hardin is running Project Blue Book at the present time. Since the operation of the project has changed and the 4602nd has taken over the leg work, he doesn't have much to do. By his own admission, he has a good deal at ATIC and is playing it for all it is worth. General Watson doesn't like UFO's so Hardin is keeping things just as quiet as possible and staying out from under everyone's feet. In other words, being a regular Air Force, he is just doing as little as possible because he knows how controversial the subject is and his philosophy is that if you don't do anything you won't get hurt. He definitely doesn't believe in UFO's, in fact he thinks that anyone who is even interested is crazy. They bore him. He has been the one big bottleneck in my getting anything from the Air Force because he is afraid that my book will stir things up too much.

Hayden, Father
Father Hayden was head of the astronomy department at Georgetown University. I never met him but Dr. Steve Possony was always going to him with our UFO problems. Father Hayden seemed to be very much interested in our problems and couldn't at all be classed as a scoffer.

Hynek, Dr. J. Allen
Dr. Hynek has been the consultant astronomer to Projects Sign, Grudge and Blue Book. I won't say that he's a "believer" but he's darn interested. He has devoted a great deal of his valuable time to the project. He has read almost every UFO report in the Air Force files. In the summer of 1952 he debated with Menzel at the American Optical Society meeting in Boston and blasted Menzel right out of the hall. He sat on the panel in Washington in January 1952 and was very much pro-UFO. Dr. Hynek is Head of the Ohio State Univ. Astronomy Department, Director of the Perkins Observatory and Assistant Dean of the USU Graduate School. He is still working for Blue Book.

Kalizewski, J.J.
This was one of the people that I talked to at General Mills. He was one of the members of the original Skyhook balloon launching crew. He had a BS degree in aeronautical engineering and was considered to be a sharp lad. All of the people at General Mills were convinced that the UFO's were real, as they said, they had all seen the UFO's. The boss, Chas. Moore, whom I talked to for only a few minutes, was very put out at the way the Air Force had handled many of the UFO reports and was very indignant. In the summer of 1952, Kalezewski was quoted in the Minneapolis paper as saying that the Air Force should put forth more effort because he was convinced that the UFO's were real.

Kaplan, Dr. Joseph.
"Joe" Kaplan is a physics professor at UCLA. His main UFO interest was the Green Fireballs. He put a lot of stock in Dr. La Paz's theory that the GFB's were man-made, although at one time he thought that they were auroral patches. Dr. Kaplan originated the grid camera idea. Dr. Kaplan is presently "ram rodding" the satellite program for the International Geophysical Year.

Lipp, Dr. James
"Jimmy" Lipp was the Rand Corporations guided missile expert and he was violently anti-saucer. He wrote an analysis of the possibility that other planets were inhabited for the Grudge report. Early in 1953 Col. Don Bower and I tried to enlist Rand's aid, on a contract basis, to try to develop some way of getting more positive answers but, at the recommendation of Lipp, Rand refused to touch it. "Too hot," was their reason. I think controversial would have been a better word than "hot."

Col. Methaney
Col Methaney was the CO of the 34th Air Defense Division in Albuquerque. He is now a Brig General. He was firmly convinced that the UFO's were real and that they were interplanetary space ships. He wrote up a plan that called for a special squadron of stripped down F-94C's to chase the UFO's. The plan went through Western Air Defense Headquarters and to Air Defense Command Headquarters but it was rejected because of the non-availability of the aircraft. It was in the 34th that

the F-86 pilot claimed that he shot at the UFO.

Paige, Thornton
Thornton Paige of John Hopkin's Operations Research Office, editor of the Operations Research Journal, and an astronomer, sat on the panel in Washington D.C. in January 1952. He tended to line up with Hynek against Louis Alvarez and Goudsmidt to stick up for the UFO's. He actually didn't know too much about the subject but, like Hynek, he didn't go along with the idea of being so definite about the UFO's not existing.

Parrish, Lt. Glenn.
This officer fits into the UFO picture because he was the Intelligence Officer at the 34th Air Defense Division at Albuquerque where Col. Methany was the CO. Parrish sent in some of the best reports that we had and he is the man who showed me the report on the pilot who shot at the UFO. With all of the good reports that Parrish sent in, he wasn't a confirmed believer. But he did think that the reports were important enough to warrant careful investigations. In addition to the above, Parrish was the middle man for the reports from the people who were doing the radiation work in Los Alamos. We had most of our meetings in Parrish's, or Col Methaney's office at Kirtland AFB. Parrish didn't have much to do with Dr. Lincoln La Paz in Albuquerque. Again he was the middle man, so to speak. A special agent in the CSI office at Kirtland was the man who did most of our contact work with La Paz. This agent, whose name I've forgotten, was convinced that the Green Fireballs were the real thing and he and La Paz were always out investigating something. Since the Air Force didn't recognize the fireballs as any threat, he did all of this on his own time, but he was tapping Air Force contacts and equipment.

Porter, Col J.J.
Col Porter was the Deputy Director for Estimate of the D/I. He was violently anti-UFO. He was Fournet's boss. At every briefing or meeting he always got his two cents worth in and he minced no words. But he never had a decent argument; he didn't know what was being reported nor did he care, he just didn't believe that there was anything to it. General Cabell is reported to have climbed all over him and Col Hal Watson for conspiring to get rid of the UFO project in 1950.

Possony, Dr. Stephen T.
Steve Possony was the acting chief of the Directorate of Intelligence Special Study Group and he had a direct channel to Samford. Steve was pretty much sold on the whole thing. He did a lot of investigating on his own book and he had Father Hayden, the astonomer, as his special consultant. Steve and his crew used to cruise all over the U.S. and Europe and during these travels they picked up a lot of UFO data. Steve was behind Fournet 100% and tended to push him. He was smart enough to know that the UFO situation was hot so he used Fournet, who was a reserve and didn't plan to stay in the Air Force any longer than he had to, to try out his ideas. Possony didn't much care what he said, however, and he used to go to battle with any or all of the more vocal skeptics. He really got teed off at Menzell and went to all ends to find out everything about the man. It turned out to be very interesting. Possony had a good reputation in the Air Force. Besides being a fairly sharp intelligence man, he is a professor at Georgetown University and he has written quite a bit on the strategy and concepts of airpower. He is considered one the of the world's experts on this subject.

Robertson, Bob
Bob Robertson is now chief scientific advisor to the Commander-in-Chief of NATO. He first came out to ATIC in November 1952, with a group of other scientists, to review our UFO material. He and his party stayed two days and then went back to Washington and suggested to the National Security Council that a group of top scientists get together to look over the reports. At that time, at least, he... (missing page here?) no more info on this man in original typed letter

Rosenzweig, Leslie
Les Rosenzweig worked for Possony. He was sort of a dull tool and whenever Possony said or did

anything Les took it as the gospel. When it came to UFO's there was no difference. Les made quite a few studies on how the UFO's could be powered, how they could be contacted, etc. He pushed the idea of using a huge horizontal movie screen to flash messages to the UFO's. He, or possibly it was Possony himself, made a lot of contacts with Willy Ley. They dropped him fast however, when good old commercial Willy began to try to push himself into the act a little too fast. It is interesting to note that those people in the U.S. who are actually considered to be tops in the fields of interplanetary travel have no use for Willy Ley or Von Braun.

Samford, Major General John
General Samford never committed himself one way or the other on the subject of UFO's. He was always very much interested and gave me the utmost in cooperation, but he never said much. He used to ask many of the other people at meetings what they thought and there were a lot of "pro" answers but he never agreed or disagreed with anyone. The only time that I ever heard him say anything was when Col Porter got real nasty about the whole thing one day and began to knock ATIC, UFO's, me and everything associated with the project. Then the General said something to the effect that as far as he could see, I was the first person in the history of the Air Force's investigation that had taken a serious approach to the investigation and that he didn't see how anyone could decide until I'd collected more data. At the present time the General is the one who is so rabid on the fact that nothing will be released. He got "burned" real bad on the press conference in July 1952. His statements were twisted around and newsreel shots of him were "cut and pieced" to get him saying things that he didn't. He wanted to play along with the writers but they misquoted him so badly that now he is saying absolutely nothing. Donald Keyhoe keeps writing about the "silence group" in the Air Force, those who want to clamp down on UFO news. Gen Sanford is the silence group and friend Keyhoe can take all of the credit for making him that way.

Smith, Weldon H.S. Col
This man was Dewey Fournet's boss. He wasn't quite as sold on the UFO's as Col Bill Adams but he was pretty well sold. He also "brought" Fournet's ideas and studies. I remember specifically the case of the Burned Scoutmaster: Col Smith was "sold" that this was the real thing. He was following the whole show from the Pentagon, through my calls to Fournet and from the wires that I was sending back. Just as soon as I got back from the first trip to Florida I went in to see him and he got quite irked when I said that something about this scoutmaster just didn't ring true. He said that I was biased and wasn't giving the man a chance. According to Keyhoe, he is the person from the D/I that wrote the anonymous letter that Keyhoe quotes in his book. I don't believe it, however, I think that Fournet wrote it.

Thompson, James
When I knew Jim Thompson he was an astronomer working for RAND in Santa Monica. He used to stop in at ATIC quite frequently and spend a day or two reading reports. Whenever I got out to California he used to arrange an unofficial bull session with a dozen or so of the "believers" AND and we'd talk UFO's.

Watson, Col. H.E.
Col Watson, now a Brig Gen and once again Chief of ATIC, was chief of ATIC when I arrived. (He later went to Europe for three years.) He was violently anti-saucer but he crossed himself up too many times trying to constantly grab publicity. He was the one who made the famous remark about all UFO observers being nuts or "fatigued airline pilots". He continually hauled in writers who would plug him and debunk the UFO's. I've overheard him tell how he completely snowed Bob Considine.

White, Major General
I think that this man's name was White. He was from some branch of research and development in the Pentagon. He and his staff religiously attended every one of my briefings and were sold that the UFO's were real. He had Gen Samford's ear but I don't think he quite convinced Samford that the

UFO’s were real.

Zimmerman, Charles
Charley Zimmerman was the technical advisor to the chief of the Analysis Branch at ATIC. I never could figure out exactly where he stood on the subject of UFO’s but I think he was a bit of a believer. Several times I tried to put through an explanation that a UFO was a balloon or other known object and he’d argue like mad against it. Many times he’d come running into my office to show me “a new, red hot report”.

Air Force Figures Tell Real Story: 88.79% Unexplained

To: News Media

Captain Edward Ruppelt, in his 1956 book, "The Report on Unidentified Flying Objects", gave some interesting statistics on the Air Force's Project Blue Book findings. Ruppelt's tenure was at a time when the Air Force was putting its best foot forward and the figures presented were based on 1,593 sightings. Less than 20 years later, in 1969 when Blue Book closed down, there were over 12,618 sightings on the books with 741 Unknowns. That equates to to only 5.8%. I later found out that these figures were derived from the Battelle Institude study which produced Project Blue Book Special Report 14. Let's look at those figures a little closer, the one's Ruppelt quoted in his book.

	Known	Probable	Possible	Total
Balloons	1.57	4.99	11.95	18.51
Aircraft	0.98	7.74	3.04	11.76
Astro	2.79	4.01	7.40	14.20
Other	4.21			4.21*
Hoaxes	1.66			1.66*
Insuff. Data				22.72
Unknowns				26.94
	11.21	16.74	22.39	
				100.00

According to Ruppelt the percentage of Unknowns was 26.94%. A scientific approach to these figures shows that only 11.21% were actually proven explained (total of column 1 which represents 179 cases) leaving, in actuality, 88.79% unexplained! These Blue Book figures (during the most serious time of it's life) were based on the then 1,593 sightings the Air Force had studied.

Actually it's worse! They only "studied" 1,593 sightings, but had "received" over 4,400 with only 179 explained!!! That's less than 4% "explained"! If we were to state that a certain percentage of UFOs were "possible" or "probable" ET, the debunkers would remind us that, "scientifically", only the "proven" could be used in such an analysis. Using the Air Forces's actual numbers11.21% were proven explained, leaving over 88% without a proven explanation.

With something like that going on in U.S. air space, somebody in the Air Force should have been more

concerned. This was a matter of national security and/or scientific interest.

The Project Blue Book Research Center presents

Perspectives On The Environment In Which Blue Book Operated During 1952 series:

The Air Defense Command

By Michael Hall

June marked the real start of the 1952 wave or as Ruppelt put it, flap. Dozens of reports came in per day and while researchers often talk about ten to twenty good reports for a particular year, June alone had over 100. One such case developed on this Sunday morning in Los Angeles when Hughes Aircraft Company technicians were conducting a test of a new experimental radar. The set worked well all morning, tracking civilian and military aircraft in the Los Angeles area. Near the end of their testing the set picked up what they assumed to be a DC-3 coming across the San Gabriel Mountains north of Los Angeles at 11,000 feet. As the scientist monitored the blip they thought it might be the last good airliner target for the morning. It did prove to be one of the last radar targets they would have until the afternoon, but no other aircraft would perform the way this would-be DC-3 did. Soon their instruments tracked it in a 35,000 feet per minute climb traveling at 550 miles per hour! The object then dove until it leveled out at 55,000 feet, heading southeast near Riverside, California. After checking with Edwards AFB, the technicians confirmed that no high performance aircraft had been in the area. The radar set was checked and rechecked, yet Hughes engineers felt confident that the radar recorded the information accurately.

That same day UFO reports came in from Africa, Korea, Rapid City, Iowa; Indianapolis, Indiana; and Walla Walla, Washington. Not since 1947 had as many cases been recorded per day as would be in these summer months. But unlike the ’47 wave, this surge of sightings would last well into the fall.

Central to an understanding of the UFO wave of 1952 is a knowledge of the way in which the military then monitored the skies. UFOs, even by 1952, did not necessarily infer spacecraft from another world. UFOs were considered to be any object flying through the air space of the United States that could not be identified. Then, as now, the military is interested in any “unidentified” air traffic. This is of greatest relevance when realizing that from 1949 to 1989, the threat of a Soviet air attack was perceived to be quite real. Today we take it for granted with our vast technology that the skies are constantly being scanned with satellite and sophisticated radar networks of the United States Space Command — formerly known only as NORAD. But in 1952 no satellite systems existed and very few modern ground radar units were in operation.

There were only three basic means available to the Air Force’s air defense system by 1952. The first consisted of a few large radar stations that had been put in place to scan for attacking Soviet bomber fleets. Although the famous DEW network of northern radar defense was still on the drawing board, installations were already in place, mainly in Alaska and Canada, to scan for a Soviet threat coming out of Siberia. In the lower continental U.S., radar stations dotted various states—designed to follow possible enemy aircraft and direct fighters from Air Defense Command bases. These were basically an outgrowth of about 75 radar stations already in place at the end of the Second World War—known as Ground Control Intercept sites or GCI. Most of these were near major Eastern cities and in the Western regions around nuclear facilities with a few stations in Canada and Mexico. The GCI sites consisted of one or two search radars, a height-finder radar, ground-to-air and air-to-ground communications. The operators at each station worked on shifts but not necessarily on a round-the-clock basis. Each operator filled his hours by watching a small round radar “scope” or screen. When an aircraft was detected it would appear as a “blip” of light on the screen. Each radar site was connected by telephone so a target could be tracked by multiple stations. Information from the radar sights was tied into control centers which had a large illuminated Plexiglas board with geographic features of the local countryside imposed on its surface. Men would stand on ladders behind these

huge clear boards and mark the trajectory of significant targets as reports came in from the various radar stations.

Unfortunately, ever since 1950 the Air Force had been severely stretching its radar resources because of the war in Korea. As a result, experienced radar operators became greatly diluted among the total number of bases. Still more of the experienced personnel were reassigned to serve at the growing number of bomber bases built for the Strategic Air Command or SAC. These units operated their own powerful radar defense equipment. Yet even though most large civilian airports were installing radar, vast areas of the country and sea-side approaches still lay blind by 1952 to aerial intrusions. And even in areas of complete radar coverage, no technology then existed to track very low flying aircraft.

It is apparent from declassified documents that the Air Force was thus very concerned about air defense. One part of a top secret project had evolved from the work of top scientists at the wartime Radiation Laboratory at MIT. Actually a continuation of their work, “Project Charles” and then known as “Project Lincoln,” analyzed possible points of weakness—mainly in America, but also NATO defenses. Jointly sponsored by the Air Force, Army, and Navy, Lincoln (which evolved into the Lincoln labs in July of 1951) described these problems in terms of “chaos.” Uppermost in the minds of military officials was the development of a comprehensive system of early warning air defense.

This brings us to the third important type of defense network relied upon by 1952—known as the Ground Observer Corps. The GOC utilized thousands of civilian volunteers to man government stations to visually spot unknown aircraft. The GOC first began on an experimental basis in September of 1949—then called Operation Lookout. (Actually a very similar operation existed during the Second World War when the same need arose to guard against possible Axis air and submarine attacks.) The goal of the GOC was to eventually have a 24-hour surveillance of the sky by one million volunteers at 24,000 observation posts. The Air Force trained these volunteers and designed procedures for filing reports. Although GOC personnel were administered by civilian authorities under each state government’s civil defense structure, the reports of GOC observation posts came into “filter centers”—run both by the military and state civil defense. Each filter center had an Air Force officer in charge.

Most GOC posts were short staffed. Rarely were they operating on a 24-hour basis. As the Cold War reached a severe state of tension by the summer of 1952, the Air Force initiated a campaign to beef-up the GOC. Operation Skywatch became a direct result of this plan. President Truman even made a personal call for volunteers to man Skywatch. Yet despite agreat deal of publicity, most GOC posts remained severely undermanned during the nighttime hours when even the most dedicated volunteers had to sleep so they could go to their regular jobs. As a result, some researchers have suggested that the Air Force intentionally played-up UFO reports to interest people in the project. Even if this was true, it must be noted that something truly phenomenal was flying through the skies that summer because many Skywatch personnel reported UFOs.

The Project Blue Book Research Center presents

By Michael Hall

Following are a few very good news articles from the time that reflect the public's perception of Operation Skywatch:

OPERATION 'SKYWATCH' OPENS MONDAY
Washington [July 12, 1952]—President Truman made a bid Saturday for more volunteers to man lookout stations which will go on a round-the-clock watch Monday against air invaders.Without saying directly that his aim was recruitments for "Operation Skywatch" around America's air frontiers, the President still put over the point in a statement saying the project is "a common sense precaution in which Americans can serve proudly." He added that the watchers will be helping to prevent war. The first shifts of some 150,000 volunteers will take their posts early Monday at about 6,000 stations in 27 states to scan the skies for any raiders who might slip through the radar screen for a sneak attack that could set off World War III. The Air Defense Command is announcing the delayed start of the need for at least 350,000 more observers. The president pointed out the need for every possible second of warning in the event of attack, both to speed counter-action and to save lives and vital facilities. "Our greatest hopes for peace lie in being so strong and well prepared that our enemies will not dare attack." Mr. Truman said, "Every citizen who cooperates in "Operation Skywatch" as well as in other defense activities, is helping prevent the war none of us wants to happen." The Air Force wanted to start the watch in May, because the experts said weather conditions are most favorable for a long distance air assault from May through September. The Federal Air Defense Organization was forced to postpone start of the operation because not enough civilians had volunteered to make possible a round-the-clock operation. The Air Force has pressed for the start of the continuous ground observation because Russia now has the atomic bomb and long distance bombers capable of attacking the United States. The start of "Operation Skywatch" follows by a few weeks an Army announcement that antiaircraft men and their guns are now on continuous duty around key target areas across the nation. Despite great advances in electronics development, defense experts stress the essential need for human eyes and brains to spot and report aircraft in areas where natural obstacles, such as mountains, and the earth's curvature, create blind spots for the radar screen that already is operating along the country's coasts, northern borders and around vital areas such as atomic plants. All the New England states and all those in the northern third of the country are taking part in the sky watching. Along the East Coast, civilian observers will take their posts in the states extending southward through Virginia. The three Pacific Coast states are also tied into the observer network."

AIR FORCE DENIES 'SAUCER' REPORTS 'SKYWATCH' CAUSE
Washington-July 24—An Air Force spokesman "emphatically" denied last night the new crop of "flying saucer" reports had anything to do with putting volunteer aircraft spotters on 24-hour duty. The civilian ground observer corps began standing a round-the-clock watch this month in coastal and northern border states, the most likely avenues of enemy plane approach. The spokesman noted that saucer reports come from every direction.

He said the sole function of the ground observers is to supplement the radar network of the Air Defense Command by watching for unidentified low-flying planes. Any flying saucers they see will be strictly incidental.

The Air Force denial followed reports from two New England "Operation Skywatch" stations that

"silver discs" had been spotted in the sky Tuesday night and early today.

Charles Buck, an observer at Westfield, Me., said he saw three discs of different sizes flying at high altitude and heading southwest. Coast Guard Seaman Henry Armpriester said two disc-like objects circled the Nahant, Mass., Coast Guard station at about 2,000 feet and then headed out to sea. Other airborne objects of the flying saucer variety were sighted over Boston, Springfield, Mass. and over several New Jersey points."

NEED MORE VOLUNTEERS FOR AIR SPOTTERS POST
Although no flying saucers, blips, discs, or whatever their name is, have been reported from the Austin Town Hall skywatch station, Lake and Central, volunteers there would know just what to do should any of the nocturnal apparitions show up.

This is the word of Fred. W. Bosserman, boss of the operation, and Town Hall director, who told The Austinite this week that he could use some more help.

He first explained how the station works by telling of a recent "dry run". In this instance, a passing commercial plane was the guinea pig. Sighting it, one of the volunteers noted its position, altitude, type and direction. He then grabbed a telephone and asked for "aircraft flash," was promptly connected with the Air Defense Filter Center in the Museum of Science and Industry, and gave the operator there the information.

The Austin station, known as "Charles Mike 15 Black," is one of 15 in the city and suburbs and is part of a 27-state network designated as "Operation Skywatch."

Bosserman says he can use about 25 more persons for the 8 a. m. to 11 p. m. schedule on which the post is open. They are asked to stand watch only one day a week on one or the other of the following shifts:

8 to 10:30 a.m.
10:30 a.m. to 1 p.m.
1 p.m. to 3:30 p.m.
3:30 p.m. to 6 p.m.
6 p.m. to 8:30 p.m.
8:30 p.m. to 11 p.m.

Heretofore, he added, it has been necessary for those wishing to volunteer to do so by filing applications at the Chicago Civil Defense Corps at 140 South Dearborn. Now they need only phone the Town Hall, Estebrook, 8-0126, or call in person.

Two persons are required for each shift and at the present time, a watcher can just about choose one suiting his convenience. Both men and women, 18 years and over, may volunteer, Bosserman declared. He said that no previous training is necessary. Austin residents, who may be in the prescribed area, were warned this week that an air raid siren test will be conducted Thursday."

Perspectives On The Environment In Which Blue Book Operated During 1952

series

Newsclippings

By Michael Hall

All during the summer wave of 1952, Blue Book received huge numbers of news accounts dealing with the flying saucer phenomenon. Detailed via the Romeike clippings service subscription Ruppelt initiated—literally thousands of sightings became available that otherwise would have never been reported to ATIC. Unfortunately, due to staff shortages, these accounts could not even be cataloged. In fact, it is doubtful the clippings were ever reviewed. Eventually they were microfilmed, but in the 1960s a later Blue Book director effectively disposed of them by giving the microfilm to a civilian researcher. From that point on, they have remained in private hands. Thus the Romeike clippings are not now part of the National Archives' Blue Book collection. But thanks to UFO researcher Jan Aldrich, this author has been allowed to view and make personal copies of all of the thousands and thousands of clippings. Working in close connection with Aldrich, this author has begun an analysis.

A remarkable series of clippings, for example, come from Friday, August 15, 1952. They all speak of a bright green oval-shaped UFO traversing over the central United States. The sightings began in Dallas, Texas, at 7:59 P.M. describing a "round light" heading north-east. Far to the northeast of Dallas at 9:00 P.M., East St. Louis news accounts talk of a "bright green oval object," but no trajectory is given. By 9:15 P.M., however, many news accounts have Taylorville, Illinois, residents seeing a "bright green disk," placing it on a due north heading. Just a few miles north of there, at 9:30 P.M., the object appeared over Springfield, Illinois.

The Springfield paper reported hundreds seeing an "oval green ball" high over the fair grounds. Approximately 200 calls flooded into the Sangamon County Sheriff's Office from all over the area reporting the same phenomenon. By then the UFO was confirmed as heading east. The Galesburg, Illinois, newspaper also had a "blue-green rocket of some sort" heading east. Then, fifty-one miles due east of Springfield, a UFO appeared over Urbana, Illinois, at 9:32 P.M. (This was the only Illinois sighting that made it into the Blue Book files.) That case contained a report from a Lieutenant Colonel from Chanute AFB. He and his wife told of their observation which took place that night from a drive-in theater. Each described the UFO they saw as a green oval-shaped object very high in the sky that came from the west and made an abrupt right angle turn to the north. Thirty-four miles west of there a Danville, Illinois, paper had five people seeing that same strange "green round object." Two motorists on the road between those two cities saw it too. Then, due north of both Urbana and Danville, news accounts place a strange green oval object over Chicago by midnight or later and jets were scrambled in relation to that UFO.

These August 15th sightings may have just been due to a lighted weather balloon. But the important point is that without the Romeike news clippings, all we would have is one Blue Book sighting in Texas and the one much later in Urbana, Illinois. It is a shame that Blue Book did not have greater staff resources to follow-up on this important source of sightings provided by the clipping service. Thankfully, at least Ruppelt's trusted assistant, Max Futch, conscientiously placed these clippings into file folders although few made it into the official index.

Florida Scoutmaster Case

August 19, 1952.

Captain Edward J. Ruppelt:
Just as Fournet's theory came under discussion and sightings such as those from Japan were providing better data, a report hit ATIC that seemed to provide some real proof. The case involved a scoutmaster in West Palm Beach, Florida, who had been close enough to a flying saucer to reach out and touch it. In fact, he probably would have if it hadn't stunned him first with a heat ray!

The incident must have really shook up someone in the Air Force, because unlike the Washington sightings, Ruppelt received all the assistance he needed to investigate. Colonel Weldon Smith in particular expressed great interest in the case. An Air Force B-25 came to Blue Book's disposal to give Ruppelt and his assistant, 2nd Lieutenant Robert M. Olsson, personal and speedy transportation from Dayton, Ohio, to Florida. In addition, Ruppelt was under no time constraints. He even received special assistance from two other Air Force Captains, Hoey and Davis, who flew down with them and remained to assist.

Upon arrival, the ATIC team heard an interesting story from the witness. He was a curious character. A Marine during the war and supposedly a widely respected man around town, he was also scoutmaster of Troop 33. Because the incident took place right after a meeting ofthe troop and involved some of the boys, it has ever since been referred to as the Florida Scoutmaster Case.

According to the scoutmaster, D.S. "Sonny" DesVergers, it all began while he was driving three scouts home that night. He turned off the coastal highway and down an inland blacktop to go where one of the boys lived. After traveling about ten miles inland he noticed a bright lightin the palmetto thickets. At first he passed by it, but then stopped some way down the road and turned the car around to go back. He hesitated in doing this, but could not help feeling that the light mighthave been a fire, perhaps indicating a crashed airplane.

Despite the pleas from the scouts who did not want to be left alone, DesVergers got out of the car and headed into the thickets—a very dangerous thing to do in the snake infested south Florida swamps. About50 yards off the road he entered the dense thickets and pushed through waist-high brush. Suddenly a sharp pungent odor came across him. The
temperature also seemed a little warmer as he pushed 30 yards further through the undergrowth. Chopping the brush with a machete that he had taken from the car, DesVergers lit his way with one of two flashlight she had on him. From the car the boys could see the flashlight beam and tracked his progress from its reflection. Knowing this, DesVergers periodically paused and shined the light up on the tree canopy.

After moving near an opening, he stopped again to signal his location. Suddenly at that very moment DesVergers felt overcome by a suffocating moist heat. He paused, wondering if the supposed clearing was actually a quicksand-like bog or a pond. Luckily the ground was quite solid, but by this time he had become a little more concerned about his location. He cast the beam of the flashlight down so he could look up at the stars to try to figure out what direction he was facing. But to his great surprise, the stars were gone. Moments ago there were hundreds—now none. Then he realized they weren't all gone, just the ones directly above him. "This just couldn't be," he thought—unless. Unless something was above him!

As his eyes slowly adjusted he realized there was a large oval object hovering only about 30 feet overhead. Slowly stepping back from this frightening situation, he shined his light up on it. Now he could clearly see a concave bottom beneath a smooth gray circular-craft. Stepping back some more

he could see a dome on top of the object. The edge of this “saucer” looked like it had evenly spaced veins every foot, with a type of nozzle between them. The former Marine was, to say the least, humbled by this sight and continued to give the craft further space. Suddenly, however, he froze in his tracks. A horrifying sound came from the craft. It was the sound of a door, just like a heavy metal safe makes when opened. Feeling as angry as he was scared, he then found himself helplessly enveloped in a red mist. It seemed to originate from a ball of red fire slowly being expelled from the craft. This overwhelmed him, causing DesVergers to lose consciousness.

In the car the boys, Bobby Ruffing, Chuck Stevens, and David Rowan, claimed they saw their leader become surrounded by a big red ball of fire. Severely shaken by the sight, the boys piled out and ran down the road as fast as they could to the nearest house. They found a farmer who called the State Police who were soon on the scene with a deputy sheriff, Mott Partin, to pick them up. Partin then drove the scouts to the sight of the occurrence to find DesVergers running out of the woods. He stated that the scoutmaster appeared sincerely frightened, more so than he had ever witnessed anyone to be in all his years of law
enforcement. The officers went into the thicket and found one of DesVergers’ flashlights still burning near some flattened grass where he had apparently collapsed. His second flashlight was never found. Once they got him to police headquarters, officers noticed that DesVergers’ hands, arms, face, and cap were all burnt. Although the police may have been somewhat doubtful of the heat ray story, they decided to call the Air Force and thus initiated the investigation.

Ruppelt personally questioned DesVergers upon arriving in Florida. He did so at regular intervals, determining that he remembered details well, but did not repeat them in a rehearsed or exact manner. Ruppelt’s experience with hoaxers indicated to him that this testimony stood in great contrast, showing sincere answers. An Air Force flight surgeon then examined his wounds and likened them to a mild sunburn withindications of singed hairs, suggesting in his words “a flash heat source.” The scoutmaster’s nostrils also showed signs of burns.

Ruppelt examined the sight of the encounter and found nothing to contradict the story. Neither, however, were there signs of scorched earth or grass, or residual radiation. But curiously (although not revealed until after laboratory tests were conducted in Dayton) the roots of the samples of grass extracted at the scene were charred. This puzzled Ruppelt because his team personally collected them. They were from undisturbed ground and while they didn’t pay any attention to the roots at the time, the grass blades were certainly not burnt. The scorched hat also fell under lab scrutiny which suggested it had been damaged by sparks of some sort, possibly electrical in nature. Ruppelt felt satisfied it had not been burnt prior to the incident, as the boys had handled it earlier that night at the scout meeting. In fact, Ruppelt personally questioned the boys, even dressing in civilian clothes during the questioning so as not to intimidate them. His impression was that the boys were sincere even though they did not all give the exact same details.

It started to look like one of the better cases, perhaps the best case yet, but then things fell apart. In those early days of Blue Book investigations, background checks were still conducted. The checks revealed DesVergers had been a Marine, but not a decorated hero as he often bragged. His records only had a dishonorable discharge to show for his war service. Nor was DesVergers a widely respected citizen as he claimed—just widely known.

Local area citizens stated that he was a likable enough fellow, but all agreed they wouldn't believe him if he told them the sun was shining on a bright Florida afternoon. Another complication arose when Ruppelt later returned to the area of the sighting and determined the scouts could not have possibly seen DesVergers overcome by the mysterious flame, even if they were standing on top of the car looking for it. The foliage was just too dense. And although Ruppelt interviewed the scouts again, he did not feel they were part of a hoax. Yet he did file it as such in the official report.

Describing the incident in his 1956 book, he indicated that he still felt it had to have been a hoax,

although he did suggest if so, it was the best in UFO history. Other authors and researchers have tried to sensationalize the Florida Scoutmaster Case. Even good books on thesubject claim that the case was so fantastic that the files were never entered into the Blue Book records and that the case does not even appear in the index.

Not true. The case is in the index and Ruppelt's extensive report can also be found in the National Archives. The material is somewhat misplaced but is all there. And any researcher who has the patience and time to study the files will piece together the same story this author has. Unfortunately, no records will ever tell us if DesVergers really saw a UFO or not. What an irony, if the one time in his life he may have been telling the truth—and no one bothered to believe him**.**

Case Directory
NICAP Home Page

Some People I (Ruppelt) Knew

Ackerman, Brig. Gen. John B.

General Ackerman was Chief of the Collection Division of the D/I all during the big UFO Flap of l952. He had no direct connection with the project but he was very much interested. I used to stop in to see him and he always had definite ideas as to what we had and what we should be doing. He would tend to get all excited about individual sightings. He got copies of the UFO reports and several times he was on the phone wanting to know what I planned to do even before I had time to digest what was in the report. Ackerman had a "direct channel" to the top, to the Secretary of the Air Force and people in the Department of Defense, and every once in awhile he would quote some top dog in the government and what he thought that I should be doing.

Adams, Col. W.A.

Col Adams was the chief of the Topical Intelligence Branch of the D/I and Col. (Weldon H.S.) Smith and Major Dewey Fournet worked for him. He was pretty much sold on the whole thing. I think that Dewey Fournet influenced his thinking to a great extent and he really went to bat for all of Dewey's ideas. He pushed Fournet's study of the motions of the UFO's and he is the one who used to be the most vocal in briefings and at meetings in regard to Blue Book's taking a "negative" attitude. He is the one who became irked in one briefing and asked me if it wasn't true that if we made a few positive assumptions we could prove that the UFO's were real

Alvarez, Louis Dr.

Dr. Louis Alvarez, a physics professor from the University or California in Berkley, developer of MEW radar at the beginning of World War II and one of the "fathers" of the H-bomb. He sat on the panel that met in Washington in January 1953. Alavarz was only lukewarm to the idea that the UFO's might be real.

Burgess, Brig. Gen. Woodbury

General Burgess was the D/I of the Air Defense Command under General Chidlaw. He wasn't a believer in UFOs but he was firmly convinced that we, meaning the Air Force, should make every effort to find out what they were, even if they were all explainable. He bent over backwards to give us all the cooperation that we needed. I would say that his ideas reflected those of General Chidlaw.

Major General John B. Cabell

General Cabell was the Director of Intelligence for the Air Force during the 1947-1951 UFO era. He is the one who ordered Project Grudge reorganized in the summer of 1951. I didn't know him too well because he left to become number two man in the CIA shortly after I got on the project. He is the man who held the initial meeting in the Pentagon that Lt. Jerry Cummings and Col Rosengarten attended. He raised all kinds of hell when he found out that Col Watson and ATIC hadn't been doing anything about the UFO project in 1950. According to what Cummings said, he was pretty much a believer in the UFO's. General Samord replaced Cabell in the summer of1951.

Chapman, ??

This man was in charge of one of the photo labs at Wright Air Development Center and he did all of our work on UFO photos. He was a firm believer. He did do a good job of making unbiased analyses of our photos, however.

Deyarmond, Col. Albert B.

Al Deyarnond was an old hand with the UFO's, he'd been in on the first of Project Sign. From the old memo's I found, signed by him, he was once a firm believer along with Al Loeding, "Red" Honnacker and the rest of the veterans or Project Sign. But by the time I got into the picture was, at least on the surface, lined up with the scoffers. But once, when I began to knock the UFO's, he raised

the devil and chewed me out for not keeping an open mind." I would guess that he was a "scoffer" because he was a disciple of Col. Watson's. Deyarmond is now chief of structures at Ryan Aircraft Company.

Erickson, Col. J.G.

Col Erickson was head of the Policy and Management Branch of the Directorate of Intelligence and in some way he got in on all of the UFO business. He was sort of power behind the throne on what the official policy would be. I gave him quite a few briefings and he seemed to be a "lone wolf" in that he wanted to get the picture for himself. He got a little hacked at Fournet quite often, because he thought that Fournet was pushing his ideas, that the UF0's were real, too hard. I think that Erickson tended to put a lot of faith in the UFO's but he was one of those who was afraid to stick his neck out.

Fournet, Dewey J., Major, USAF

Dewey was Blue Book's liaison man in the D.I. He took over in early 1952 or late 1951 from a Lt. Col. whose name I've forgotten. The Lt. Col. was a completely worthless jerk. Dewey got hot on the subject right away and helped us a great deal in getting things straightened out in the Pentagon. His job was just supposed to be part time, but within a matter of months he was working on it full time. Fournet was the most confirmed believer that I ran into in the Pentagon. He had access to all of our reports, read them all over very carefully, and he was still absolutely convinced. He and I used to argue by the hour and I must say that he had some good arguments. All of his conclusions were based on the "race value" of the reports. If a person said that they saw something and had a good description of it, Dewey took this as the last word. He and I disagreed when I didn't buy the reports lock, stock and barrel. I didn't think that the person was using or having hallucinations, I was sure that they reported what they saw, but I wasn't convinced that what they saw was actually what happened. In other words I played it heavy on the "optical illusion" side and I backed this up with experience. I'd investigated too many reports and found that something that starts out to seem real mysterious can many times prove to be something very simple. No matter how much I talked, however, I never convinced Fournet that I had a point. Dewey is now (1955) a civilian engineer with the Ethyl Corporation in Baton Rouge, La.

Garland, Brig Gen, W. M.

General Garland was my boss at ATIC from the Fall of 1952 until I left. He was a moderately confirmed believer. He had seen a UFO while he was stationed in Sacramento, California. He was Gen. Samford's assistant in the Pentagon before he came to ATIC and he was the inspiration behind the Life article by Ginna. He gave Ginna his ideas and prompted Life to stick their necks out. Gen. Garland is now out of the Air Force and is a consultant to Rand.

Gittings, Homer

Homer Gittings was my contact in Los Alamos. He was a charter member of the group that was trying to correlate recorded radiation from an unknown source with UFO reports. He worked closely with a Ph.D. but I've forgotten the Ph.D.'s name. Gittings, the Ph.D. and several other scientists would fly down to Albuquerque and we'd meet with Col Methaney at Air Defense Headquarters. If I remember correctly, Gittings had an MS degree in Physics and was an instrumentation specialist.

Goudsmidt, Samuel

This man, from AEC's Brookhaven Lab on Long Island, sat on the Panel that met in Washington in January 1953. Goudsmidt was probably the most violent anti-saucer man at the panel meeting. Everything was a big joke to him which brought down the wrath of the other panel members on numerous occasions.

Hardin, Capt Charles

Chuck Hardin is running Project Blue Book at the present time. Since the operation of the project has changed and the 4602nd has taken over the leg work, he doesn't have much to do. By his own

admission, he has a good deal at ATIC and is playing it for all it is worth. General Watson doesn't like UFO's so Hardin is keeping things just as quiet as possible and staying out from under everyone's feet. In other words, being a regular Air Force, he is just doing as little as possible because he knows how controversial the subject is and his philosophy is that if you don't do anything you won't get hurt. He definitely doesn't believe in UFO's, in fact he thinks that anyone who is even interested is crazy. They bore him. He has been the one big bottleneck in my getting anything from the Air Force because he is afraid that my book will stir things up too much.

Hayden, Father

Father Hayden was head of the astronomy department at Georgetown University. I never met him but Dr. Steve Possony was always going to him with our UFO problems. Father Hayden seemed to be very much interested in our problems and couldn't at all be classed as a scoffer.

Hynek, Dr. J. Allen

Dr. Hynek has been the consultant astronomer to Projects Sign, Grudge and Blue Book. I won't say that he's a "believer" but he's darn interested. He has devoted a great deal of his valuable time to the project. He has read almost every UFO report in the Air Force files. In the summer of 1952 he debated with Menzel at the American Optical Society meeting in Boston and blasted Menzel right out of the hall. He sat on the panel in Washington in January 1952 and was very much pro-UFO. Dr. Hynek is Head of the Ohio State Univ. Astronomy Department, Director of the Perkins Observatory and Assistant Dean of the USU Graduate School. He is still working for Blue Book.

Kalizewski, J.J.

This was one of the people that I talked to at General Mills. He was one of the members of the original Skyhook balloon launching crew. He had a BS degree in aeronautical engineering and was considered to be a sharp lad. All of the people at General Mills were convinced that the UFO's were real, as they said, they had all seen the UFO's. The boss, Chas. Moore, whom I talked to for only a few minutes, was very put out at the way the Air Force had handled many of the UFO reports and was very indignant. In the summer of 1952, Kalezewski was quoted in the Minneapolis paper as saying that the Air Force should put forth more effort because he was convinced that the UFO's were real.

Kaplan, Dr. Joseph.

"Joe" Kaplan is a physics professor at UCLA. His main UFO interest was the Green Fireballs. He put a lot of stock in Dr. La Paz's theory that the GFB's were man-made, although at one time he thought that they were auroral patches. Dr. Kaplan originated the grid camera idea. Dr. Kaplan is presently "ram rodding" the satellite program for the International Geophysical Year.

Lipp, Dr. James

"Jimmy" Lipp was the Rand Corporations guided missile expert and he was violently anti-saucer. He wrote an analysis of the possibility that other planets were inhabited for the Grudge report. Early in 1953 Col. Don Bower and I tried to enlist Rand's aid, on a contract basis, to try to develop some way of getting more positive answers but, at the recommendation of Lipp, Rand refused to touch it. "Too hot," was their reason. I think controversial would have been a better word than "hot."

Col. Methaney

Col Methaney was the CO of the 34th Air Defense Division in Albuquerque. He is now a Brig General. He was firmly convinced that the UFO's were real and that they were interplanetary space ships. He wrote up a plan that called for a special squadron of stripped down F-94C's to chase the UFO's. The plan went through Western Air Defense Headquarters and to Air Defense Command Headquarters but it was rejected because of the non-availability of the aircraft. It was in the 34th that the F-86 pilot claimed that he shot at the UFO.

Paige, Thornton

Thornton Paige of John Hopkin's Operations Research Office, editor of the Operations Research Journal, and an astronomer, sat on the panel in Washington D.C. in January 1952. He tended to line up with Hynek against Louis Alvarez and Goudsmidt to stick up for the UFO's. He actually didn't know too much about the subject but, like Hynek, he didn't go along with the idea of being so definite about the UFO's not existing.

Parrish, Lt. Glenn.

This officer fits into the UFO picture because he was the Intelligence Officer at the 34th Air Defense Division at Albuquerque where Col. Methany was the CO. Parrish sent in some of the best reports that we had and he is the man who showed me the report on the pilot who shot at the UFO. With all of the good reports that Parrish sent in, he wasn't a confirmed believer. But he did think that the reports were important enough to warrant careful investigations. In addition to the above, Parrish was the middle man for the reports from the people who were doing the radiation work in Los Alamos. We had most of our meetings in Parrish's, or Col Methaney's office at Kirtland AFB. Parrish didn't have much to do with Dr. Lincoln La Paz in Albuquerque. Again he was the middle man, so to speak. A special agent in the CSI office at Kirtland was the man who did most of our contact work with La Paz. This agent, whose name I've forgotten, was convinced that the Green Fireballs were the real thing and he and La Paz were always out investigating something. Since the Air Force didn't recognize the fireballs as any threat, he did all of this on his own time, but he was tapping Air Force contacts and equipment.

Porter, Col J.J.

Col Porter was the Deputy Director for Estimate of the D/I. He was violently anti-UFO. He was Fournet's boss. At every briefing or meeting he always got his two cents worth in and he minced no words. But he never had a decent argument; he didn't know what was being reported nor did he care, he just didn't believe that there was anything to it. General Cabell is reported to have climbed all over him and Col Hal Watson for conspiring to get rid of the UFO project in 1950.

Possony, Dr. Stephen T.

Steve Possony was the acting chief of the Directorate of Intelligence Special Study Group and he had a direct channel to Samford. Steve was pretty much sold on the whole thing. He did a lot of investigating on his own book and he had Father Hayden, the astronomer, as his special consultant. Steve and his crew used to cruise all over the U.S. and Europe and during these travels they picked up a lot of UFO data. Steve was behind Fournet 100% and tended to push him. He was smart enough to know that the UFO situation was hot so he used Fournet, who was a reserve and didn't plan to stay in the Air Force any longer than he had to, to try out his ideas. Possony didn't much care what he said, however, and he used to go to battle with any or all of the more vocal skeptics. He really got teed off at Menzell and went to all ends to find out everything about the man. It turned out to be very interesting. Possony had a good reputation in the Air Force. Besides being a fairly sharp intelligence man, he is a professor at Georgetown University and he has written quite a bit on the strategy and concepts of airpower. He is considered one the of the world's experts on this subject.

Robertson, Bob

Bob Robertson is now chief scientific advisor to the Commander-in-Chief of NATO. He first came out to ATIC in November 1952, with a group of other scientists, to review our UFO material. He and his party stayed two days and then went back to Washington and suggested to the National Security Council that a group of top scientists get together to look over the reports. At that time, at least, he... (missing page here?) no more info on this man in original typed letter

Rosenzweig, Leslie

Les Rosenzweig worked for Possony. He was sort of a dull tool and whenever Possony said or did anything Les took it as the gospel. When it came to UFO's there was no difference. Les made quite a

few studies on how the UFO's could be powered, how they could be contacted, etc. He pushed the idea of using a huge horizontal movie screen to flash messages to the UFO's. He, or possibly it was Possony himself, made a lot of contacts with Willy Ley. They dropped him fast however, when good old commercial Willy began to try to push himself into the act a little too fast. It is interesting to note that those people in the U.S. who are actually considered to be tops in the fields of interplanetary travel have no use for Willy Ley or Von Braun.

Samford, Major General John

General Samford never committed himself one way or t>

Transfer interrupted!

was always very much interested and gave me the utmost in cooperation, but he never said much. He used to ask many of the other people at meetings what they thought and there were a lot of "pro" answers but he never agreed or disagreed with anyone. The only time that I ever heard him say anything was when Col Porter got real nasty about the whole thing one day and began to knock ATIC, UFO's, me and everything associated with the project. Then the General said something to the effect that as far as he could see, I was the first person in the history of the Air Force's investigation that had taken a serious approach to the investigation and that he didn't see how anyone could decide until I'd collected more data. At the present time the General is the one who is so rabid on the fact that nothing will be released. He got "burned" real bad on the press conference in July 1952. His statements were twisted around and newsreel shots of him were "cut and pieced" to get him saying things that he didn't. He wanted to play along with the writers but they misquoted him so badly that now he is saying absolutely nothing. Donald Keyhoe keeps writing about the "silence group" in the Air Force, those who want to clamp down on UFO news. Gen Sanford is the silence group and friend Keyhoe can take all of the credit for making him that way.

Smith, Weldon H.S. Col

This man was Dewey Fournet's boss. He wasn't quite as sold on the UFO's as Col Bill Adams but he was pretty well sold. He also "brought" Fournet's ideas and studies. I remember specifically the case of the Burned Scoutmaster: Col Smith was "sold" that this was the real thing. He was following the whole show from the Pentagon, through my calls to Fournet and from the wires that I was sending back. Just as soon as I got back from the first trip to Florida I went in to see him and he got quite irked when I said that something about this scoutmaster just didn't ring true. He said that I was biased and wasn't giving the man a chance. According to Keyhoe, he is the person from the D/I that wrote the anonymous letter that Keyhoe quotes in his book. I don't believe it, however, I think that Fournet wrote it.

Thompson, James

When I knew Jim Thompson he was an astronomer working for RAND in Santa Monica. He used to stop in at ATIC quite frequently and spend a day or two reading reports. Whenever I got out to California he used to arrange an unofficial bull session with a dozen or so of the "believers" AND and we'd talk UFO's.

Watson, Col. H.E.

Col Watson, now a Brig Gen and once again Chief of ATIC, was chief of ATIC when I arrived. (He later went to Europe for three years.) He was violently anti-saucer but he crossed himself up too many times trying to constantly grab publicity. He was the one who made the famous remark about all UFO observers being nuts or "fatigued airline pilots". He continually hauled in writers who would plug him and debunk the UFO's. I've overheard him tell how he completely snowed Bob Considine.

White, Major General

I think that this man's name was White. He was from some branch of research and development in the Pentagon. He and his staff religiously attended every one of my briefings and were sold that the UFO's were real. He had Gen Samford's ear but I don't think he quite convinced Samford that the UFO's were real.

Zimmerman, Charles

Charley Zimmerman was the technical advisor to the chief of the Analysis Branch at ATIC. I never could figure out exactly where he stood on the subject of UFO's but I think he was a bit of a believer. Several times I tried to put through an explanation that a UFO was a balloon or other known object and he'd argue like mad against it. Many times he'd come running into my office to show me "a new, red hot report".

NICAP Home Page

UFO REPORTS

From

The Report on Unidentified Flying Objects.

November 18, 1948 - Andrews AFB T-6 Chases UFO - Washington, DC
November 23, 1948 - F-80 Radar/Visual - Munich, Germany
April 24, 1949 - The McLaughlin Crew - White Sands, NM (C.B. Moore)
March 8, 1950 - Radar/Visual Over ATIC
January 22, 1952 - Nenana, AK Radar Case (UT)
June 21, 1952 - RV Near Oak Ridge AEC Plant
The Summer of 1952 - Air Force F-86 Shot At A Flying Saucer - Albuquerque, NM
July 24, 1952 - The Carson, NV, Sink Case
December 10, 1952 - RV Near Hanford AEC Plant
August 12, 1953 - R/V - Ellsworth Air Force Base, E. of Rapid City, SD

Date	City	State or Country	Cat	Code	Rating	BB	NC flag	LC	Description
19160131	Rochford, Essex	UK	11	A	5				British A/c Encounters Object With Row of Illuminated Windows
260100	Witicha	KS	11	A	5				Several Circular Objects Surrounded Plane
260900	Salt Lake City (near)	UT	11						11:00 PM. An air mail pilot was repeatedly buzzed by a long, cylindrical object. Each time the object came within about 50 yards, the aircraft engine would begin to sputter and misfire, until the pilot was forced to make an emergency landing in a pasture.
420325	Zuider Zee	Holland	11						An RAF bomber returning from a raid on Essen, Germany, was followed by a luminous orange disc or sphere. As it came closer the tail gunner opened fire on it, to no apparent effect. Finally it sped away at an estimated 1,000 m.p.h. (Ref. 3; Flying Saucer Review, March-April 1962.)
430405	Long Beach	CA	11						Flight instructor and student pilot saw a glowing orange disc dive at their aircraft and hover alongside, then accelerate and climb away out of sight. (Ref. 3; Witness report to Jan Aldrich, Project 1947.)
431014	Schweinfurt	Germany	11						During a bombing run a B-17 crews of the 384th Group noticed, as fighter attacks suddenly fell off, they encountered a cluster of small discs, described as 3" wide by 1" thick. (Martin Caiden/Andy Roberts)
431024	Schweinfurt	Germany	11	A	5				Discs Put Up Protective Shield Around B-17 Formation ???
440129	Location Unknown	Unknown	11						Red ball; yellow/red flames followed aircraft through evasive action. (Page 56 Ref.1)
440200	Bass Strait	AU	11						At 2:30 a.m. a bomber crew at 4,500 feet altitude saw a dark shape pull alongside the plane and pace it at a distance of about 100 feet for about 18-20 minutes. (Ref. 3; Bill Chalker, The Oz Files, 1996, pp. 35-36.)
440300	Carlsbad	NM	11						Air Force pilot saw fast-moving UFO speed out of sight over horizon. [NICAP UFO Evidence, 1964, Hall, III]
440600	Adriatic Sea	At Sea	11						At 11:00 a.m. a flight of three P-38 fighters at 33,000 feet saw above them, at an estimated altitude of 50,000 feet, a silver disc. The object descended to about 40,000 feet and paced the fighters for 3 minutes, then accelerated and sped away. (Ref. 3; Jan Aldrich, Project ACUFOE, from CUFOS report form.)
440810	Unknown City	Sumatra	11						Sighting of maneuvering UFO which paced B-29 (Reida case) during mission. [NICAP UFO Evidence, 1964, Hall, III]
440810-11	Palembang	Sumatra	11						Reida Case (M) Reddish orange balls, about the size of a baseball; spherical object, probably 5 or 6 feet in diameter, of a very bright and intense red or orange in color. (Page 71-74 Ref.1)
441100	Unknown City	France	11						415th Night Fighter Squadron pilot saw formation of round objects. [NICAP UFO Evidence, 1964, Hall, III]
441200	Austria	Austria	11						B-17 pilot (William D. Leet) and crew, on a lone wolf mission, were followed by an amber-colored disc. [NICAP UFO Evidence, 1964, Hall, III]

441226-27	Unknown City	Germany	11						Multiple sightings: red balls of fire; two yellow streaks of flame & disappeared from view; the crew thought they felt prop wash; a group of lights that made distinct lines, somewhat like arrows; row of vertical white lights. (Page 103,131 Ref.1)
450100	Unknown City	Germany	11						Another 415th Night Fighter Squadron pilot was followed by three red and white lighted objects over Germany. [NICAP UFO Evidence, 1964, Hall, III]
450101-02	Strasbourg (north of)	France	11						Foo fighters. (Page 131 Ref.1)
450110	Iwo Jima	Japan	11						An amber light pass parallel and at same altitude. (Page 125 Ref.1)
450200	Chemnitz	Germany	11						Flying wing, giving off a yellowish-red intermittent glow. (Page 149 Ref.1)
450213-14	Rastatt and Bishwiller bt.	Germany	11						Two sets of lights; separated after being attacked and then returned to original position. (Page 136 Ref.1)
450215-16	Viareggio	Italy	11						Alleged jet; multiple spurts of flame; no radar return. (Page 136 Ref.1)
450216	La Spezia	Italy	11						Possible jet: dropped what looked like white flares; no radar contact. (Page 136-137 Ref.1)
450217	Po Valley (Central)	Italy	11						Observed two very bright lights appear directly in front of aircraft; fired upon without result. (Page 137 Ref.1)
450217	Massa and Po Valley (Central)	Italy	11						Red ball of fire that did not appear to be Jet A/C. (Page 137 Ref.1)
450217-18	La Spezia	Italy	11						Multiple sightings:(1) blinking light; (2) reddish white light going off and on in spurts, faded out during chase; (3) light, a glow alternating between weak and bright was chased several times, never caught. (Page 138-139 Ref.1)
450221	Piacenza	Italy	11						Two large red balls of fire; hovering. (Page 140 Ref.1)
450227	Bologna	Italy	11						Chased three lights in shape of triangle observed; no radar contact. (Page 141-142 Ref.1)
450309	North Fresian Islands	Germany	11						Three lights; had the appearance of white flares dropped in air; called foo fighters. (Page 145-146 Ref.1)
450313	Bologna	Italy	11						Two sightings: (1) 100 hundred balls of orange fire; (2) two balls of foo fire. (Page 147 Ref.1)
450318	Florence	Italy	11						Chased light, no radar contact, then light disappeared. (Page 148 Ref.1)
450319-20	Speyer	Germany	11						Saw 2 Foo fighters; one orange and one greenballl. (Page 148 Ref.1)
450323	Bergamo/Ghedi	Italy	11						2 balls of foo fire. (Page 150 Ref.1)
450403	Kawasaki	Japan	11						The records of the 20th Air Force reveal that as early as this date, flying from the Marianas on a night incendiary mission, some crews reported "Balls of Fire followed our aircraft."
450403-04	Honshu	Japan	11						Multiple balls of fire sightings: size of basketball; streamer of light behind the ball of fire; ball of fire emitting a steady phosphorescent glow; wing in connection with ball of fire &; amber colored searchlight; stream of fire emanating from object, twelve inches in diameter, followed through evasive action. (Page 157-158 Ref.1)
450502	Fala Island	Truk Atoll	11						Two airborne objects & red circles of light
450525	Atlantic Ocean	At Sea	11						In early morning on a sunny day with intermittent clouds, a B-17 bomber was en route from Morocco to Dakar, Senegal. A silvery disc or ellipse was observed opposite the sun position, estimated to be 5 to 10 miles distant. The object paced the aircraft, hovering at times. (Ref. 3; Harley D. Rutledge, Project Identification, 1981, p. 251.)

450525-26	Tokyo	Japan	11						Fireball follows a B-29 of the 39th Bombardment Group for 50 miles
450619	Unknown City	Japan	11						B-29 followed by strong white light. (Page 180 Ref.1)
450704	Yokohama (near)	Japan	11						"After coming away from our bomb drop, we saw the UFO's. I especially recall seeing two groups of them in single file. One group of six were lower than we were and coming towards us from the front, their heading taking them off to or left. The other group was more distant and headed in the opposite direction, but were at about our level.
450707	Sasebo	Japan	11						Foo fighter; a big ball of fuzzy orange-red light; B-29 fired on object, appearing to hit with no affect. (Page 186 Ref.1)
450712	Honshu	Japan	11						Light Phenomenon.Spotted enemy aircraft apparently trailed by large orange light traveling with it at same speed. (Page 186-187 Ref.1)
460801	Unknown City	FL	11						Observation of cigar-shaped UFO by Air Corps transport pilot. [NICAP UFO Evidence, 1964, Hall, III]
46July/Aug	Unknown City	Sweden	11						"Ghost rocket" sightings. [NICAP UFO Evidence, 1964, Hall, X]
460801	Tampa (near)	FL	11						Puckett Case (M)
460814	Bt. Malingsbo and Krylbo	Sweden	11						10:02 a.m. Two witnesses flying a SAAB B-18 bomber on a navigational training flight at 200 meter altitude observed a cigar-shaped object described as 1 meter wide by 15 meters long.
470602	Rehoboth Beach	DE	11	A	5	BBU			Pilot in aircraft saw a silvery jar-shaped object (Project 1947; McDonald list; FOIA; Bloecher 1967)
470624	Mt. Ranier	WA	11	A	5				Arnold Case (P)
470628	Fort Mead (30 miles NW of)	NV	11	A	5	BBU			3:15 [1:15 PST?] p.m. Pilot saw a tight formation of 5-6 white circular 3 ft objects (Ruppelt p. 19; FOIA; FUFOR Index; Bloecher 1967).
470630	Grand Canyon (Near S rim of)	AZ	11	A	5	BBU			9:10 a.m. (MST?). 2 gray, circular objects about 8 or 10 ft diameter
470704	Emmett	ID	11	A	5	34			5 disc-shaped objects with flat bottoms and rough tops. Smith/Stevens Case (AL)
470706	Clay Center	KS	11	A	5	BBU			30-50' Circular Object Paces B-25, Accelerates
470707	Shreveport (7 miles N of)	LA	11			BBU			Military aircraft pilot Harston saw a bright silver object
470708	Los Angeles (near)	CA	11						F-51 pilot (M)
470709	Boise (Bet. Meridian and)	ID	11	A	5	BBU			a black disc, standing out against the clouds (Johnson Case (P))
470728	Bt. Mountain Home & Boise	ID	11	A	5				DC-3 Crew Observes Disc
470800	Media	PA	11						Boyce Case, (M)
470804	Bethel	AK	11	A	5	BBU			smooth surfaced black object larger than a DC-3
470804	Everett	MA	11	A	5	BBU			a bright orange or deep-gold colored cigarette-shaped (Project 1947; McDonald list; FOIA; FUFOR Index)
470814	Harmon Field, Newfoundland	CAN	11			BBU			2 small crescent-shaped objects pass over them on a zigzag path
470818	Mountain Home (near)	ID	11			BBU			2 "skeet target" shaped objects flying under the plane
470913	Midway Island to Oahu, Hawaii	in airspace	11	A	5	BBU			a bright light with no blue or red tinge split in 2
471115	Wichita	KS	11			2224			Man watched an orange object varied in shape, as it made jerky upward sweeps with 10-15 sec pauses. 3-5 mins. (Berliner)
471115	Wichita	KS	11			BBU			8:25 p.m. USAF B¬47 crew and passengers saw an elliptical blue-white object with orange or red tail, moving erratically. (BB Status Rpt?) [Same case as above??]
471230	Pilot Hill (1 mile W of)	CA	11			BBU			high speed low altitude object trailing red, green and other colored flames
471230	Sawtooth National Forest	ID	11			BBU			a high speed object trailing green and blue flames

480107	Fort Knox	KY	11	A	5				Mantell Case (M)
480107	Columbus (Lockbourne AFB)	OH	11	A	5	BBU			Object Circles Base At High Speed / Touches Down
480109	Cartersville (near)	GA	11	A	5	BBU			a blue circular flame pass the plane, turn, then blink [out?]
480111	Hartford	CT	11	A	5	BBU			Transport Crew Sees Diving Disc
480401	Luzon Island	Philippines	11			BBU			pilot saw a half-moon shaped "flying wing" about 30 ft wide 20 ft long
480409	Montgomery	AL	11	A	5	BBU			a silver parachute-shaped 8 ft disc with a 5 ft long cable
480430	Anacostia NAS	MD	11	A	5	BBU			yellow sphere in opposite course S to N at constant altitude
480528	Monroe	MI	11						3 objects seen - 300 to 400 feet in size, silvery-gold in color, and traveling at well over 500 MPH
480709	Unknown City	AK	11						Two Air Force officers reported approximately 20 discs or spheres milling around in formation and making a jet-like sound. (Fund Report * C-7; 2 pp.)
480724	btn Blackstone, Va and Greensboro, N.C.	Various	11						aircraft observed what they thought was an unusual meteor traveling in a southerly direction
480724	Robbins AFB	GA	11						Massey, a member of civilian alert, observed a squash-shaped object with flaming exhaust
480724	Montgomery (near)	AL	11	A	5	BBU			Chiles/Whitted Case (AL)
480731	Marion	VA	11	A	5	191			Light Spotted By Pilot
480922	Albany (near Turner AFB)	GA	11	A	5	BBU			Co-Pilot in C-47 Sees Wingless Metallic Object
481001	Fargo	ND	11			BBU			small 6-8-inch round white ball of light with a flat, no-depth disc-like appearance Gorman "Dogfight" (M)
481118	Camp Springs	MD	11	A	5	BBU			The Lt. Combs / T-6 Encounter
481205	Las Vegas (W of)	NM	11	A	5	BBU	NC	LC	AFOSI Case 8; AF C-47 Pilot Observes UFO Similar To Green Flare
481205	Albuquerque	NM	11	A	5	BBU	NC	LC	AFOSI Case 9; Commercial Pilot Reports Green Flare
481208	Las Vegas (20 miles E of)	NM	11	A	5	BBU	NC	LC	AFOSI Case 11; Agents In T-7 Observe Intense Green Fireball At 13,000'
481209	Pittsburgh (near)	PA	11			BBU			USAF officers saw round object tothe N on converging course
490101	Jackson	MS	11	A	5	BBU			Cigar-shaped object cross the sky in front of his plane (Project 1947; McDonald list; FUFOR Index)
490124	Bermuda (About 250 miles SW of)	At Sea	11			BBU			pilots saw a red glow on the ocean 1 mile in size emitting beams of light. (Project 1947)
490210	Dayton (North of)	OH	11	A	1				Meteor or UFO Observed By Air Crew
490223	Sanberg Pass	CA	11	A	5	BBU			"Sausage" Circles T-11 At High Speed
490329	Shemya AFB - Aleutian Islands	AK	11			BBU			bombers see a dull-yellowish light flying at 2,400 ft
490407	March AFB, Riverside	CA	11	A	5	BBU			Four Dome-Shaped Objects Separate From Tank-Shape
490527	Hart Mtn (near)	OR	11	A	5	404			Pilot Encounters 5-8 Egg-Shaped Metallic Objects
490531	Misawa AFB, Honshu	Japan	11	A	5	BBU			F-80 Pilot Sees Circular Object At High Speed
490610	Boston (20 miles SW of)	MA	11	A	5	BBU			T-6 Chases / Loses 100' Tubular UFO
490610	White Sands	NM	11						Two round white UFOs maneuvered around a missile in flight. (Confirmed by Capt. R. B. McLaughlin, USN) [II]
490721	Mount Pleasant	UT	11	A	5	BBU			Two Silver Objects On Headon Course
490724	Mountain Home	ID	11	A	5	483			Piper Clipper Encounters Seven Delta-Shaped Objects
490905	Lebec	CA	11	A	5	BBU			2 USAF pilots flying military aircraft saw an oval object climb at tremendous speed to the S. (Project 1947)
490909	Goose Bay AFB, Labrador	CAN	11	A	5	BBU			High-Speed Egg-Shaped Object Goes Into Clouds
491001	Jackson	MS	11						Rush Case (P)

491103	Baja (near)	CA	11						Donnelly Case, (M)
491204	Hammond (bet Covington and)	LA	11	A	5	BBU			C-47 Crew Encounters 600 MPH+ Silver Sphere
491229	Greenwood (Bet Hamlet and)	NC	11			BBU			blimp-shaped object outdistance the [4?] planes at high speed. (Project 1947; FUFOR Index)
500106	Howard (near)	KS	11	A	5	BBU			crew of C-47 transport saw a 30-60 ft silver football-shaped object flying in straight level flight. (Project 1947; FUFOR Index)
500118	Denver	CO	11	A	5	BBU			T-6 Crews Encounter Object At 15,000'
500122	Kodiak NAS (near)	AK	11			BBU			maneuvering red exhaust-like or orange ball of fire circle
500124	Blackstone (near)	VA	11	A	5	BBU			C-45 Transport Crew Encounters Object

660116	El Paso	TX	11						10:00 p.m. CST. An American Airlines flight from San Francisco to Houston, Texas, was paced by a bright object just after take-off from El Paso en route to Houston via San Antonio.
660420	Over	PA	11						Early morning. An airline pilot observed an unidentified bright orange object. (Project 1947 reports, Aldrich fit Greenwood; cited in Weinstein, 1999, p. 34)
660425	Ocala	FL	11	A	5				Governor's plane paced by globes
660430	Pasadena	CA	11	A	5				Three objects near airplane
660504	Charleston	WV	11			BBU			Braniff Airlines Flt. 42 (AL)
660517	New Orleans	LA	11						Day. A Boeing engineer was among the witnesses who saw two discs flying off each wingtip of an airliner. The outer discs lagged briefly during a turn by the airliner. (NICAP report form.)
660521	Willow Grove	PA	11	A	5				Domed Disc Observed By Pilot & Passenger (Powell Case)
660623	Placitas	NM	11						3:42 a.m. MDT. Julian Sandoval, a NASA contract flight engineer, also an experienced pilot and navigator, and two independent witnesses saw a glowing elongated object with ablunt end. lt had a series of four body lights varying from brilliant green to a bluish tinge, and was hovering at an estimated 12,000 feet. When the object moved, its glow brightened and it appeared to be a powered craft (luminosity/motion correlation). The witness watched the object for an hour and a half, after which it climbed vertically, accelerated to a high velocity and disappeared to the northeast in about 12 seconds. In a report to NICAP, Sandoval estimated the departure speed at "Mach 6 or better." (Christian Science Monitor, July 11, 1966; I/. P.O. Investigator, Vol. Ill, No. 9, Aug.-Sept. 1966, p. 3.)
660815	Regina, Saskatchewan	CAN	11	A	5				Elongated Sphere Encountered By C-130
660920	Sebring	FL	11	A	5				Giant Cone Shadows Private Aircraft
660930	New Kingston	PA	11	A	5				Disc hovered near Cessna
661011	Jonesboro	TN	11						7:10 p.m. EDT. Several people sighted a cigar-shaped object which, after about 2 minutes, lit up brightly and moved quickly to the north. A short while later two round objects appeared. Each had a "bulge" (dome?) on top and bright light shining from the bottom.
661130	New Kingston	PA	11						Time not reported. A private pilot watched a disc with a blinking red light hover alongside his Cessna 150, then : shoot straight up and out of sight. (Pittsburgh NICAP Subcommittee report.)

661230	Peruvian Coast (near)	At Sea	11	A	5				Pair Of Luminous Objects Hover Near DC-8
670113	Winslow (near)	AZ	11			BBU			Lear/Nat'l Airlines (P, AL)
670120	Over Lake Ontario	in air space	11						10:15 p.m. EST A pilot and his three passengers saw a round, glowing white object the size of a large apartment building, with a ring of red lights around it that blinked off and on. The object was above the plane at about 2,000 feet. (Letter to APRO dated April 2, 1967, posted on NICAP web site.)
670202	Lima	Peru	11						Cone paced airliner (E-M)
670300	NE of Cuba	Cuba	11	A	0				The 1967 Cuban Jet Incident
670311	Taranaki (off coast of)	NZ	11						10:20 p.m. LT. A pilot, copilot, and hostess of an airliner flying at 17,000 feet saw a cluster of 10-12 soft-glowing, amber-colored lights approach their aircraft at a lower altitude, passing below and out of sight. (Witness reports in NICAP files; U.F.O. Investigator, Vol. IV, No. 3, Nov.-Dec. 1967, p. 1; Weinstein, 1999, p. 35.)
670314	Southeast Asia	Asia	11						Daytime. A U.S. Air Force flight surgeon aboard and the pilot and crew of a KC-135 flving at 15,000 feet observed a vertically inclined, huge, black metallic cylinder an estimated 2 miles from the plane. (Jacksonville Daily News, Arkansas, 3/27/69, copy in NICAP files; phone conversation with surgeon's wife 5/12/69, notes in : NICAP files.)
670324	Atlantic Ocean	in air space	11						2134Z (4:34 p.m. EST). An Irish Airlines flight crew saw an object that was as bright as Venus, but that also was being tracked on ground radar. (Weinstein, 1999, p. 35.)
670400	Tortuguero, Islagrande	PR	11						11:15 a.m. A flight instructor and student in a U.S. Navy Cessna aircraft saw a flat oval object, which appeared to be a metallic dull white in color, that followed the aircraft. (Weinstein, 1999, p. 35.)
670406	Edmonton, Alberta	CAN	11						Object paced airliner (radar)
670417	Saigon, Vo Than	Viet Nam	11						Time not given. Five white oval objects, oriented vertically, moved across the sky in 5 seconds, periodically passing behind small scattered clouds. Five minutes later jet aircraft at high altitude flew in the same direction as the objects. (Haines, 1994, pp. 88-89; Smith 1997, UNICAT #371).
670418	Point Pleasant	WV	11						8:00 p.m. EST. A pilot and ground observers reported an anomalous "light-bearing object." The pilot attempted to close in on the object and flashed his landing lights, but there was no response and the object disappeared. (West Virginia Register, 4/1/67,(??) copy in NICAP files.)
670418	Athens	OH	11						At 8:05 p.m. About 40 miles north of Point Pleasant, a Ph.D. professor at Ohio University, who is also a private pilot, and four others saw an unidentified light source that alternated between yellow and pink as it moved over a wide arc of sky at moderate speed. It was observed for 10 minutes. (NICAP report form.)
670428	Shelley	ID	11						9:35 p.m. MDT (11:35 p.m. EDT). A private pilot and his family saw a flattened ellipse with a superstructure and a large orange light. (Ricks-Carter report dated 5/24/67, NICAP files; U.F.O. Investigator, Vol. IV, No. 1, May-June 1967, p. 3)

670513	Colorado Springs	CA	11						At 1640 MDT, at the Colorado Springs airport an object was picked up on radar. During this time a Braniff flight was coming in for a landing on runway 35. The track of the object behaved like a ghost echo, perhaps a ground return being reflected from the Braniff aircraft.
670517	Rural Hall	NC	11			11744			round, orange-colored obj. zigzag back and forth over jet
67Mid-Year	Manchester	UK	11						Daytime. The co-pilot of a BEA Vanguard Airliner saw a fast-moving, disc-shaped object estimated to be nearly 100 feet in diameter flying to the right of the aircraft. (Weinstein, 1999, p. 35, from Good, 1996.)
670603	Extremadura	Spain	11						Two Spanish Air Force fighter pilots chased UFO, radios failed. Cat and mouse pursuit. Object shot straight up and disappeared (section II).
670606	Extremadura	Spain	11						Time not reported. A Spanish Air Force jet trainer flying at 1,200 meters altitude encountered an unidentified object that played "cat and mouse" with the plane. The object speeded up and slowed down, and moved above and below the T-33. The aircraft's radio emitted static and ceased to function (EM effects) when the object was close to the plane. (Good, 1987, p. 149; from Flying Saucer Review, Vol. 14, No. 3, 1968, p. 26.)
670611	Da Nang	Vietnam	11						Two F-102's chased silver cylinder
670719	Enderby, B.C.	CAN	11						Object zigzagged near aircraft
670727	Alexandria-Leesville	LA	11						2:00 a.m. EDT. Throughout several states, distress calls were heard on Citizen's Band radio from a pilot whose plane reportedly crashed. The pilot said that a red glowing object with a bright glow toward the tail approached the side of the aircraft and then the tail, forcing the aircraft down. (Shreveport Times, LA., 7/28/67, copy in NICAP files.)
670824	Cape Perry, Northwest Territories	CAN	11						Time not reported. (Beauford Sea) - Officials at Cape Perry Distant Early Warning radar site saw a large, translucent spherical object moving so slowly it was in the vicinity for 10 hours. It did not register on radar.
670829	Toledo	OH	11						Evening, EDT. A pilot was requested by Toledo airport control tower to check out an unidentified light. He saw a large, bright orange light at 6,000 feet and estimated its diameter as 50-60 feet. The pilot chased the light but it eluded him over Lake Erie. (Phone call to NICAP from Walter Stroud, Toledo, 8/30/67, NICAP files.) ,
670910	Barcelona	Spain	11	A	3				Aircraft Encounter Near Barcelona
670914	Western part of State	VA	11						4:00 p.m. EDT. A man onboard a plane enroute from Atlanta to Pittsburgh saw a flat object that appeared orange at long range and white when closer. The object moved past the plane in the same direction of travel, but at much greater speed. (Report from Colorado NICAP Subcommittee, 9/26/67, NICAP files.)
671027	Jacksonville (Over Atlantic Ocean NE of)	FL	11						3:00 a.m. EDT. The pilot of a Piper-Twin Comanche, plus two pilots and a passenger on board, saw a " bright light, then visible as six huge, round, bright-white lights in a horizontal row on a darker object (body lights). (Haines, 2000, pp. 58-59.)

671115	Florence	Italy	11						2:30 p.m. LT. The pilot and crew of a British European Airways plane flying at 27,000 feet had a 10-minute encounter with an object that passed over them at about 50,000 feet. (Roth Volunteer Flight Officers Network report, NICAP files; U.F.O. Investigator, Vol. IV, No. 4, Jan.-Feb. 1968, p. 3.)
68Summer	Unknown City	Viet Nam	11						In 1968, when I was an Intelligence Officer, I briefed General George S. Brown, at 7th Air Force Headquarters in Saigon, Vietnam about UFOs near the DMZ. General Brown states in a Department of Defense transcript of press conference in Illinois, October 16, 1973. "I don't know whether this story has ever been told or not. They weren't called UFOs." (George Filer)
680604	Punta Arenas	Chile	11						Cylinder above airliner
680707	Seattle	WA	11						Eight ovals near Cherokee-6
680708	Warren	OH	11						Object darted back & forth near Cessna 172
680822	Kalgoorlie	AU	11						Object emitted 6 "cigars" near Piper Navajo
680930	Louisville	KY	11						1:00 a.m. Commercial pilot, Dogie Stockmar, and four passengers observed a light source with 2-3 beams toward ground. One beam was longer than the others. Lights pulsated. (Phone call to NICAP)
681126	Bismarck	ND	11						Pilots, FAA, radar confirm UFOs
681126	Lake Cyprus	FL	11						Two pilots report four ovals in echelon
690314	Thailand	Thailand	11						KC-135 crew reported hovering cylinder, scramble
690314	in air space	Thailand	11			BBU			crew of KC-135 tanker saw a cylindrical object larger than the plane
690317	Lake Havasu	AZ	11						Cessna 150 encountered 15-20 ovals
710809	Uberaba (near)	Brazil	11						Glowing disc startles veteran Brazilian
711229	San Martin de Los Andes	Arg	11						B-727 crew
730202	Ohura Beacon (area)	NZ	11						Sphere illum. cabin, E-M
730214	McAlester	OK	11						Disc Cavorts Near Airliner / Confirmed By Radar
730412	Piedmont (SE of)	MO	11						10:30 p.m. Orange ball of light observed from Cessna 150 at 2500'.
730412	Farmington	MO	11						10:30 p.m. OBOL was chased by Piper Cherokee, same night as Piedmont incident. (PID,18)
730716	Between Palamo and Playa de Oro	Spain	11						6:30 p.m. Miguel Romera Fernandez de Cordoba was flying a forest fire aircraft he saw a strange object which looked like a rugby ball cut on lower part.
730919	Teheran	Iran	11						F-4 Phantom radar/E-M Case
731000	Red Bud	IL	11						2:30 p.m. Four-engine prop plane took evasive action to avoid collision with strange, horseshoe-shaped object.
731018	Rosewood	OH	11						7:30 p.m. American Airlines Flight 21, a Boeing 747 at 33,000' encountered apparently the same UFO witnessed by Capt. Coyne and his crew over Mansfield, OH
731018	Mansfield (near)	OH	11						Coyne Case (M) E-M
731019	Indianapolis	IN	11						Cessna pilot, object on radar
731108	La Paz	Bolivia	11						Top-shaped object with windows moved with "incredible speed," darted behind jet interceptor, shot straight up in sky (UFOE II, Section II).
731111	La Paz	Bolivia	11						Airlines crew & interceptor pilot
731130	Turin	Italy	11	A	5				UFO Darts To & Fro, Observed From 3 Aircraft & Gnd Radar
740126	Lisbon	Portugal	11						B-727 crew rep v-form of 10-15 objects

740126	Santa Ana	CA	11						Pilots report 5 objects circling plane
740309	Milan	Italy	11						Pilot reports chasing object (radar)
740313	Cordoba	Arg	11						Airline crew flanked by objects
740317	Taiwan	Taiwan	11						Airline pilot reported cigar and five smaller objects
740502	Guerrero state	Mexico	11						Morning. Carlos Antonio de los Santos Montiel was flying en route from Guerrero state to Mexico city in his Piper Aztec 24, he became aware of three objects positioned extremely close around the plane. (APRO Bulletin, Vol. 24 No. 2, Aug 1975)
741010	Central Newfoundland	CAN	11	A	5				Cessna 150 Encounters UFO / UFO Drops Below Radar
741024	Northern area	IN	11						Incident similar to "Disappearance of Flight 412". UFO incident date coincides with emergency landing of two jet interceptors with one crashing and the pilot ejecting somewhere in Indiana. (Source: UFOFC)
741111	Pensacola	FL	11	A	5				Red Sphere Paces Training Jet
741128	Between Dekalk & Mendota	IL	11	A	5				Pilot Says Compass Affected
741128	Shabonna	IL	11						Pilot reported object and E-M effects on compass
750317	Gander, Newfoundland	CAN	11						11:02 p.m. NDT . Air Canada Flight 872 reported a green pulsating object at 35,000 feet, crossing his flight path from north to south. Luftansa Flight 401, 120 miles south of of Air Canada 872, reported a solid green object at 31,000 feet crossing his flight path north to south. Current time zone offset: UTC/GMT -2:30 hours (National Research Council of Canada Record Group 77, Vol. 308, reel number 1742, N75/033)
750410	Carman, Manitoba	CAN	11						9:35 p.m. Mr. Robert Diemert sighted a UFO. Diemert was at his airfield, Friendship Field, when the object was sighted. The object was flying in a north-westerly direction at an approximate altitude of 300 feet. The UFO was described as being approximately 50 feet in length. (Reference: Royal Canadian Mounted Police report, April, 11, 1975, Carman, Manitoba, Carman Detachment, National Research Council of Canada Record Group 77, Vol. 308, reel number 1742 N/039)
750503	Tequesquitengo Lake	Mexico	11	A	5				UFOs 'Escort' Mexican Aircraft / Radar Confirmed
750611	Quebec City, Quebec	CAN	11	A	5				Shiny Triangular Object Encountered By Two Jets
750704	Fairfield	NJ	11						Cessna 150 pilot & large oval object
750706	Wilkes-Barre	PA	11						BAC-111 crew encountered daylight disc
750720	Williams AFB	AZ	11						An orange-red metallic disc flew past a plane flying near Williams Air Force Base. The plane was being flown by a man named Royce. It disappeared at great speed. (Source: Dominique Weinstein, Aircraft UFO Encounters, p. 39; Saga UFO Report, July 1977, p. 37).
750814	Stockton	CA	11						ANG helo pilot & ATC's reported disc
750923	Cambrai, Nord	France	11						10:30 p.m. An elongated fuselage-shaped object 15 meters long with several big, lighted portholes appeared. It moved rapidly and vanished instantaneously when chased by a French Air Force Mirage III jet. (Source: Dominique Weinstein, Aircraft UFO Encounters, p. 39).
751028	Belgrade	Yugo	11						DC-9 pilot followed by UFOs, E-M, radar
751030	Wurtsmith AFB	MI	11	A	5		**NC**		Shiny Disc Hovers Over Restricted Area (Cat 2,9,10,11)
751122	Savannah	GA	11	A	5		**NC**		Pilots observe UFO near nuclear plant

760303	Tours, Indre-et-Loire	France	11						Night. French AF T-33, object illuminates aircraft. Testimony of French fighter pilot Colonel Claude Bosc. On night training flight in a T-33, Bosc saw a bright light approach at high speed on a collision course. His jet was then enveloped in green phosphorescent light for several seconds. Radar showed nothing, but two other pilots saw the encounter from a distance.
760311	Palma de Majorca	Spain	11						Object paced airliner
760622	Central India	India	11						DC-10 encountered object with windows
760919	Teheran	Iran	11						F-4 chase (M), R/V with E-M
761017	Akita Airport	Japan	11	A	5				Disc Hovers Near Japanese Airport
770121	Bogota	Columbia	11						Airliner, R/V, reaction to landing lites
770307	Chaumont, Haute-Marne	France	11						Object made passes at Mirage IV
770312	Syracuse (south of)	NY	11						9:05 PM. The pilot and first officer of an United Airlines DC-10 observed a round bright white object. The object had strong effects on the autopilot and the three compasses. (Reference: Catalog of Military, Airline, Private Pilots Sightings from 1916 to 2000 Dominique F. Weinstein)
770321	Los Angeles	CA	11						8:50 PM. Two witnesses on a flight at 1500', two UFOs at 1/2-mile range,15 seconds duration. (Haines printout)
770414	Luxembourg	Germany	11						2:00 AM. Three witnesses on board a flight at 31,000'. Seen briefly four times. Radar and E-M. (Haines printout)
770526	Dowagiac	MI	11						4:10 PM. An ovoid object followed an airliner for 30 seconds according to one of the passengers aboard. The witness, a radio announcer, reported that the object was larger than the airliner and flew away toward the east. (Source: Allan Hendry, International UFO Reporter, July 1977, p. 3).
770701	Timaru, South Canterbury	NZ	11						2:10 PM. A Piper Cherokee pilot observed a black cigar-shaped object enveloped in a "heat of haze" flying at 1,800 to 2,000 feet. (Reference: UNIDENTIFIED AERIAL PHENOMENA EIGHTY YEARS OF PILOT SIGHTINGS Catalog of Military, Airline, Private Pilots Sightings from 1916 to 2000 Dominique F. Weinstein)
770807	Cairo	Egypt	11						3:43 AM. Two witnesses on a flight, one UFO. (Haines printout)
770904	Billings	MT	11						Airlines pilot encountered object
770922	El Paso	TX	11						Object w/row of lights overtook DC-10
771026	In Air Space	Japan	11						5:20 PM. Flight with two witnesses observed 4-5 UFOs. Very brief. (Haines printout)
771026	Dallas	TX	11						Private pilot & T-38 pilot enc object, E-M
771027	In Air Space	Sardinia	11						5:35 PM. Flight with 5 witnesses observed UFO, unknown altitude, range, 1,000', 5-mins. (Haines printout)
771118	Troy	MO	11						Light a/c paced for three minutes, E-M
771208	Los Angeles	CA	11						R/V involving airline crew
771209	Kunanurra, N. Territory	AU	11						Oval passed Cessna 206
771212	In Air Space	TN	11						2:25 PM. Two witnesses on flight at 37,000', range unknown, three UFOs, 4-mins 45 sec. (Haines printout)

771215	Saint Ciers du Taillon	France	11						A domed disc illuminated the area of Saint Ciers du Taillon like day, then flew away. It came back again the same site 20 minutes later. That same night a blindingly bright light came up close to a French Navy Nord-262 transport plane with three crew members aboard and followed it, circling it for five minutes.
771222	N. Atlantic	At Sea	11						Circular object paced TWA for 20 minutess
771227	In Air Space	NC	11						10:54 PM. Two witnesses, two UFOs on flight at 2,000'. E-M effects. 6-10 min. duration of sighting. (Haines printout)
780101	Santa Monica	CA	11	A	5				Cessna Encounters Disc With Dome & Windows
780105	Klamath Falls	OR	11						V-formation of 10 lights passed plane
780111	Los Angeles	CA	11						Sphere flew below Cessna 150
780115	Washinton County	IN	11						A single engine Sundowner flying from Evansville, Indiana to Cincinnati, Ohio, encountered a UFO flying a collision course approximately 22 miles north of Louisville, Kentucky. The pilot accompanied by his instructor and girlfriend, related that he was flying at 5,500' when he spotted two bright lights at eye level at some unknown distance ahead.
780611	Los Angeles	CA	11						Cessna pilot observed small silvery oval that maneuvered near his plane (section III).
780624	Madison	WI	11						Oval w/red lights circled airliner
780704	Santa Paula	CA	11						A small domed disc-shaped object, about 3-4 feet in diameter with rotating parts on top, made a head-on pass at two witnesses in an airplane.
780704	Los Angeles	CA	11						3:15 PM. US private aircraft at 2800', two witnesses, 1 minute (Haines printout)
780716	In air space	Iran	11						A Lufthansa airliner flying over the northern part of Iran encountered a glowing UFO floating in the sky. The presence of the object caused electrical interference with the aircraft's instruments.
780822	Perth	AU	11						Large object w/satellite objects near a/c. E-M
780827	Provincetown	MA	11						A private plane flying over Massachusetts Bay, 10 miles north-northwest of Provincetown had a near collision at 2500' with a 18-foot diameter silver disc. Ground radar confirmed the presence of the unknown craft.
781021	Bass Strait	AU	11	A	5				Famous "Valentich" Cessna 182 case
781030	Santiago	Chile	11						Pilots, ATC's rep object near airport
781121	Newfoundland	CAN	11						Domed disc w/legs encountered by TWA
781216	Calama	Chile	11						Shortly after Midnight. Near the city of Antofagasta in northern Chile a Chilean Air Force jet sighted and tried to intercept a huge luminous rectangular flying object.
781216	Las Vegas	NV	11						At McCarran Airport a married couple and a child saw a disc-shaped object with glowing white lights. An airline pilot flying in the vicinity also reported that a UFO streaked by his airliner although the UFO did not appear on radar.
781230	In air space	NZ	11						12:12 AM. Foreign commercial aircraft, 4 witnesses at 10-14,000', 53 minutes. (Haines printout)

790209	Baleares Islands (near)	Mediterranean Sea	11						Over 50 UFOs surrounded the butane freighter "Tamames" in the Mediterranean Sea as it approached the Escombreras refinery in the Baleares Islands. The radar of a second ship also reported the presence of the UFOs, but not ground radar.
790215	Fano	Italy	11						A 15 meter in diameter luminous domed disc was seen over the Metauro River in Fano, Italy during a rainstorm. It shot out "black rays" or beams.
790526	Hailey	ID	11						Pilots enc string of objects, R/V
790809	Hayford	CA	11						Two discs below plane
791111	Mediterranean Isle of Majorca	At Sea	11	A	2				Spanish Radar Visual Case? Probably Not.
791111	Ibiza	Canary Islands	11						The pilot of a Spanish jetliner that made an emergency landing after being pursued by 2 UFOs at 14,000 feet.
800614	Santiago	Chile	11						An LAN Chile airline pilot reported that a UFO made a head-on pass at his plane at 50,000 feet altitude. The glowing yellow object was moving faster than his aircraft.
800620	In air space	Kuwait	11						While descending through 15,000 feet for a landing, a senior Kuwait Airways pilot and crew observed a huge, brightly illuminated hemispherical object with a flat base moving steadily eastward at a slightly lower speed than his aircraft.
800922	Caribbean Sea (south of)	Haiti	11						Another air collision nearly occured over the Caribbean Sea south of Haiti between Pan Am flight 440 and an unidentified bluish-green cigar-shaped object. The UFO had a horizontal row of 5-6 steady lights, which the flight crew presumed were windows.
800928	Boca Raton	FL	11						Two discs circle Aerostar PA60
810209	San Jose	CA	11						Red object buzzed Cessna 150
810225	Tallinn (northwest of)	Estonia	11						An Aeroflot YAK-40 airliner flying northwest of Tallinn, Estonia was paced by two orange, elongated objects at 9:24 p.m. The UFOs flew parallel to the plane and then approached from 70 degrees to the right
810404	San Luis Reservoir, Merced County	CA	11						The complete failure of an aircraft's electronics, including the transponder, DME, navigation equipment, and two-way radios, occurred when a bullet-shaped UFO passed within 500 feet of an airplane being flown by Mr. Dennis,
810420	Reno	NV	11						3-5' object hovered below Cessna 210
810704	Lake Huron	MI	11	A	5				L-1011 Encounters Disc
810725	between Valencia and Barcelona	Spain	11						A bright silver disc with six round portholes was seen by the crew of an Iberia B-727 airliner as it flew between Valencia and Barcelona, Spain. It appeared to be reflecting sunlight in the dawn sky.
810808	San Jose	CA	11						A teardrop shaped UFO with a spinning ring paced an airplane off its left wing over San Jose, California on this day. Instruments onboard the plane experienced failures, but the effects ended when the object departed upwards. The aircraft briefly disappeared from FAA radar during the encounter.
811031	Marcos-Juarez	Arg	11						2 airliners report object
820208	near Petrolina to Rio de Janeiro	Brazil	11						3:11 AM. A large, multicolored flying object paced a commercial aircraft for 82 minutes.
820308	Metter (near)	GA	11						Three former Air Force pilots flying in a private corporate jet saw a ten foot diameter silver disc that flew within 25 feet of their left wingtip.

820627	Launceston, Tasmania (NW of)	AU	11						A mechanical engineer on an airliner flying northwest of Launceston, Tasmania watched a metallic sphere pace the Boeing 737 aircraft for two minutes, then ascend, flying off toward the north.
821024	Lowell	IN	11						Pilot & student enc dbl globular object
821102	Maxial	Portugal	11						Round object made pass at AF trainer
830706	In air space	Poland	11						Daytime. Sighting of a Polish Air Force pilot and co-pilot of a near collision with 2 cylindrical objects that were 6 meters long and a diameter of 2 meters.
830826	Ventspils	Russia	11						Russian Jets Blasted Out of the Sky
840122	Toledo (30 miles east of)	OH	11						7:25 AM. The cabin crew of United Airlines flight 729, flying westbound at 43,000 feet, observed a blurry bright red object about the size of a DC-9 airliner move from northeast to southwest.
840424	Chimayo	NM	11						7:10 PM. Radar visual confirmation. A 1000 foot long cigar-shaped object followed a KC-135 USAF tanker aircraft through a U-turn over the mountains of Chimayo, New Mexico while separate nocturnal lights cavorted about in the sky.
840923	Cordoba to Resistensia	Argentina	11						8:00 PM. A large disc-shaped UFO followed a Piper airplane from Cordoba to Resistensia, Argentina. It reportedly maneuvered at great speed, and changed color from silver to orange. The plane's compass oscillated between 0.5 and 270 degrees, and there were several other variations noted in other onboard instruments.
860511	Sedona	AZ	11						Head-on pass of object below Cessna 172
860519	Rio de Janeiro Sao Paulo	Brazil	11	A	5				Brazilian Aircraft / UFO Encounter / Radar-Visual
880211	Beira, Mozambique	Africa	11						Airliner encounters huge object with lights
890722	Blue Hill Bay	ME	11						Obj hov/darted around Beechcraft
900321	Pereslavl-Zalesskiy	USSR	11						Interceptor pilot enc, R/V
910113	Pittsburgh	PA	11						U.S. Air flight crew saw a rectangular, light-reflective object that flew into clouds (section 111).
910306	Kingston, Ontario	CAN	11						Cigar stopped ahead of Flight 866
910318	Kunshan	China	11						Airliner encounters ring-shaped object, 2 rect
910421	London	UK	11						Missile crossed path of MD-80, RV
910608	Concepcion	Paraguay	11						Paced Cessna 210 & airliner, R/V, E-M.

940127	Kazakhstan Republic	USSR	11	A	3				B-747 encounters maneuvering object
950525	Bovina	TX	11						America West crew sees cigar shaped object at 39,000 feet.
951117	Long Island	NY	11	A	5				Lufthansa 405 / Boc Flight 226
970809	Kennedy Airport (near)	NY	11	A	5				Near miss with object
020726	Waldorf	MD	11						UFO Sighting Over Waldorf, MD, radar, scramble mission

On the NICAP site, sightings of UFOs have been categorized by type of evidence. Below, the left column is the link to the specific category page where information and sources are filed. The right column, besides describing each category briefly, has links to the sightings themselves as listed in the NICAP Sighting Information Database (NSID).

Category 01 - Distant Encounters: Daylight Discs & Nocturnal Lights
Category 02 - Close Encounters: Objects within 500 feet of the witness
Category 03 - E-M (Electro-Magnetic) Cases
Category 04 - Animal Effects Cases
Category 05 - Psychological/Physiological Cases
Category 06 - Physical Evidence - Trace Cases
Category 07 - Entity Cases Humanoid Reports, CE-III Reports
Category 08 - Photographic Evidence, Stills, Motion Pictures & Videos
Category 09 - Radar Cases
Category 10 - Radiation & Nuclear Connection Cases
Category 11 - Sightings From Aircraft

NICAP Home Page

A REVIEW OF SELECTED SIGHTINGS FROM AIRCRAFT

FROM 1973 TO 1978

RICHARD F. HAINES **Copyright 1979**

Introduction

There are five major reasons for reviewing sightings of anomalous phenomena from aircraft. First, pilots and other crew members tend to be educated, stable people who are taught to recognize a wide variety of meteorological and other aerial phenomena; they are also trained to be observant - to see and be seen during flight. As pilots accumulate more and more flight time they also have an opportunity to see and identify unusual illusory effects in nature (Minnaert, 1954*;* Wood, 1968). These factors tend to enhance their reliability as witnesses This is not to say that pilots are not as subject to certain motion- induced (and other) visual illusions as observers on the ground but, rather, that pilots are more likely than not, to be good eye witnesses.

The second reason is the unique vantage point from which the sighting can take place. Aircraft flying high above the earth make it possible to view the aerial phenomenon below them, seen against the earth background. This is important in helping to establish the maximum distance to the phenomenon, a far more difficult task when the phenomenon is seen against a sky background. Not only this but pilots usually have available a wide field of view and they can quickly maneuver their aircraft to see in other directions as well.

Third, almost all commercial, military, and research aircraft and even some private aircraft are equipped with a wide range of on-board equipment helpful in detecting, reporting, and even analyzing certain characteristics of the phenomenon encountered. Radar transmitters and receivers, UHF and VHF radios, radio-magnetic and gyro-compasses, automatic direction finders, air temperature and pressure sensors, and other standard equipment can become important during aerial sightings. The rapid use of the aircraft's radio can also alert ground monitoring facilities to search the skies for the phenomenon over a broad geographic region and can request the visual search assistance of other pilots flying in the vicinity. The pilot can also request detailed weather information via the radio so as to determine if the phenomenon might somehow be associated with a particular weather pattern.

The fourth reason is namely that, particularly for commercial aircraft flying at high altitudes, the possibility that the phenomenon is a bird, prank balloon, or other deliberately contrived hoax launched from the air becomes smaller and smaller with increasing altitude.

The fifth reason for studying sightings by pilots is the fact that professional pilots have reputations at stake. What is the basis of this statement? It is that most commercial airlines conduct specially prepared screening programs for candidate air crews in order to try to eliminate those individuals who are psychologically unstable, those who are unable to cope with stress in an appropriate manner, those who can not assume a leadership role as their professional career continues, and those who cannot demonstrate an ability to make rapid, sound judgments in emergencies. And thus, by predisposition, selection, and training, pilots tend to possess such traits as leadership, dominance, alertness, achievement, and consistency of behavior to mention a few. Maintenance of such a public and corporate image is very important. Therefore, if pilots do come forward with details of an airborne sighting it is reasonable to believe that they have, indeed, seen something very strange to them, strange enough to file a report and risk some degree of ridicule.

Certainly, the above is not to suggest that pilots are less (or more) likely to perceive illusory effects or misinterpret a natural phenomenon about which they may know little. Rather, it is reasonable to assume that pilots will be more likely to test a wide variety of hypotheses concerning

the sighting before making their report and, if a particular hypothesis is reasonable they will probably not make a formal report.

To help improve the chances of obtaining reliable sighting details of truly anomalous aerial phenomena only sightings by two or more persons on-board the aircraft were analyzed here. And, to help reduce the chances that the phenomenon (or object) was a weather or research balloon, a bird, or meteor, the duration of the sighting was taken into account. In general, the lower the sighting altitude (i.e., the altitude of the phenomenon) the longer the duration had to be to be included here.

Troy Challenger and the author reviewed a total of more than 300 sightings from the air for the period 1947 to 1959 (1979). The present review is meant as a continuation of this earlier review. The interested reader should also consult the following articles involving pilot sightings from the air (Greenawald, 1977; Ruppelt, 1956; Shanklin, 1955; Wichman, 1971; Wilkins, 1954; Zeidman, 1978; Zigel, 1968).

The objective of this paper is to present the results of a review of aerial sightings predominately by pilots for the period 1 January 1973 through 31 December 1978.

(NICAP site note: The following is a partial text file (first few columns: Date, Time, Location) created for use with the Global Sighting Information Database search engine on the NICAP site. The full and correct page representations of Table 1, pages 116, 117, & 118 can be found as large GIFS on the active links provided at the beginning of each page chart below.)

Notes:

1. The following abbreviations are used: F = foreign; U = USA (registration); C = commercial; P = private; M = military.

2. Altitude/range are in feet unless otherwise noted (e.g., ft feet). k = one thousand. The term "near" simply indicates that the original report stated directly or implied that the phenomenon was estimated to be relatively near the aircraft.

3. The value before the slash represents by Y = yes or N = no whether ground radar made contact with the UFO. The value after the slash indicates whether radar on board the aircraft made contact.

4. A ? indicates that the report did not contain this information. Use of the term indicates that the author's estimate of the encounter was less than 15 seconds.

5. This sighting was reported by the same pilot who reported the November 16, 1974 event, presumably following the same flight path.

6. An asterisk indicates that the value is only approximate. The value supplied is derived from details available in the original report.

7. This period of multiple sightings extended until 2130 (for a total of 5.5 hours).

6. This sighting of December 12, 1977 occurred in three parts, taking place at approximately 1425 (duration - 2.5 min); 1526 (duration -0.25 min); and 1527 (duration - 2 min).

TABLE 2
Summary of Cases Involving Electromagnetic Effects

Date **Details of E-M Effect(s)**
02-02-73 "About thirty yards from the aircraft was a ball of intense bluish-white light, much like a welding arc, that was twenty to forty feet in diameter, and stayed with his aircraft for about twenty to twenty-five seconds. The Automatic Direction Finding Compass, and both the gyroscopic compass and magnetic one, went haywire and spun at a speed of about twelve revolutions per minute. All directional equipment remained non-functional until he passed over the Wanganui area.

07-14-54 A foreign military pilot flying at 35,000 feet altitude over the Charlevoix region, N.E. of Quebec city reported sighting a triangular shaped object about 5,000 feet above his altitude. "He reported having lost radio contact and experienced troubles with his navigation equipment while flying ...close to the "Balloon." (Note: The story had been circulating during the event that the object was a balloon, however the National Research Council in Ottawa placed the case in "Non-Meteorite Sighting File No. 74- 052.").

07-00-75 American 747 aircraft crew near Indonesia reported temporary electrical failure as a UFO came along side the aircraft.

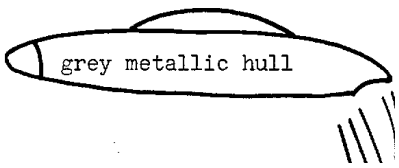
10-28-75 Foreign DC-9 aircraft were followed by "glowing UFOs" between Zagreb and Belgrade, Yugoslavia. "...some disturbances in the functioning of some instruments on (the) jets" was reported.

09-19-76 Foreign military jets (F-4 Phantom) weapons systems jammed during approaches to the UFO, a commercial aircraft's radio was also "jammed." The military aircraft malfunctions occurred within a 15 to 20 mile range. During an interview with Lt. Gen. Azarbarzin, Deputy Commander in Chief of Operations, Imperial Iranian Air Force, Thran on 1-4-77 he is quoted as saying, "...this technology they were using for jamming was something we haven't had before and we don't have it. It doesn't exist because it was a very wide band and this jammer could jam different bands, different frequencies at the same time. It's very unusual."

Figure 1
Appearances of Phenomena
(ordered by common features)
Pages 119-128

Category: Angularly Large, Sources with Definite Shape

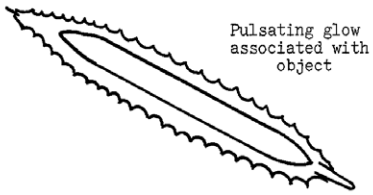
10-18-73. Drawing by pilot (L.C.). Constant red light on front, green light on rear moves as a spotlight does.



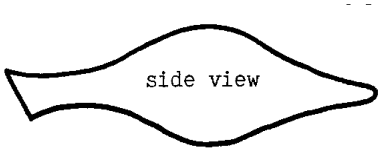
Drawing by crew chief (R.Y.).

06-08-75. Drawing by pilot (L.A.G.). Object disappeared in "cloud of smoke"

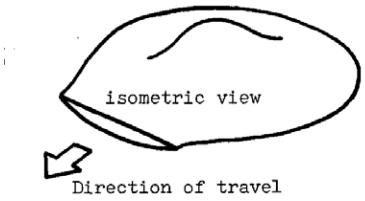
12-12-77. Drawing by passenger (R.S.). Object No.3. Pulsating glow associated with object.



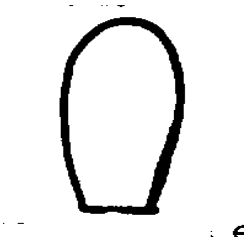
12-22-77. Drawing by UFO investigator (D.R. Tucker, Project VISIT).



Estimated width: 60'. Thickness: 20'.



07-16-73. Drawing by artist after pilot's description. Looked like a rugby ball in a vertical position with its lower end cut off, top half was greenish; bottom half shaded from orange to reddish; light emitted from bottom.



Estimated height: 20m, width: 10m

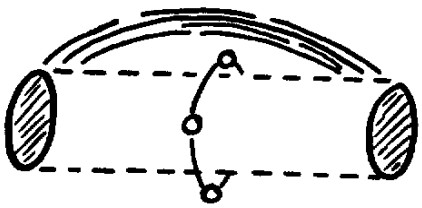
10-19-73. (No drawing available) Private pilot reported seeing a "huge (size of two story house) glowing green glob of light in a rough pyramid shape" which "swooped alongside his plane from nowhere." This object "changed shape and would pulsate; as it dimmed, radar contact was lost, as it brightened, radar contact was re-established."

11-08-73. (No drawing available) Foreign commercial pilot reported seeing a small, luminous top-shaped object with small window openings.

07-22-76. (No drawing available) Foreign commercial pilot reported seeing an object at his altitude of 35,000 feet which resembled a "dirigible gondola, with four very large windows, each about 25 feet apart." It was estimated as being "... much larger than (their) DC-10." Intense illumination was seen inside the "windows."

09-22-77. (No drawing available) American commercial pilot reported seeing "no distinct shape...but it appeared to be elongated with a row of brightly illuminated "windows" running front to rear."

09-19-76. Drawing by Mehrabad (Tehran) airport control tower, night shift supervisor (H.P.) from the ground.



Object 1. Hazy-yellow-blue arc. Elliptical disc of pulsating whitish-blue light (at ends) Estimated length: 8m, thickness: 2m.

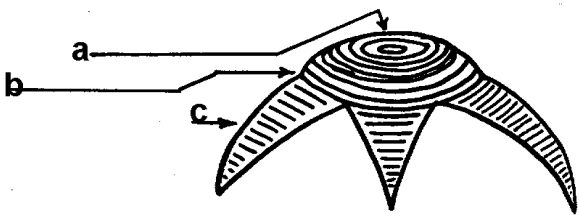
Main body invisible.

One round red light circling the main body, and pausing very briefly every quarter-turn. "...it took about a second or two to make a full circle."

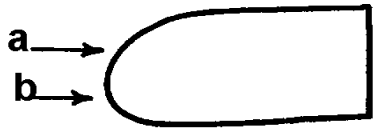
The entire object "oscillated like a see-saw--with the two ends describing 20 degree arcs." (viewed for 5 mm).

Object 2. Same witness (H.P.) then saw about two miles farther south a "circle of blue color - probably about six meters in diameter ." (viewed for about 3 mm)

Object 3. Same witness (H.P.) then saw object change shape to appear ".. like a fan with sometimes three, sometimes four, drooping and tapered blades." Glowing red core ("a"); Green ring ("b"). Dark orange extension ("c") as though flowing out of the green area. Became more yellow than orange toward each tip. Witness is certain that there was only one such extension which kept revolving to create an illusion of four and sometimes three different extensions, each extension was estimated to be about 2m long. Extension outlines were fuzzy.

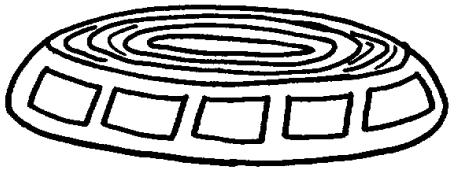


Object 4. The same witness (H.P.) and many others at control tower also witnessed seeing a fourth object or change in shape of the same object. Main part was orange-red ("a"). Corner glowed red ("b"). "While stationary, the UFO seemed like a beehive of activity: rhythmically glowing oscillating, and emanating lights that rotated around it."

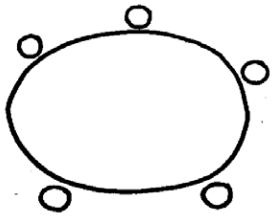


"Every few minutes the UFO would also change positions- seemingly disappearing from the observers at the control tower, and almost instantaneously reappearing at another spot in the sky miles away."

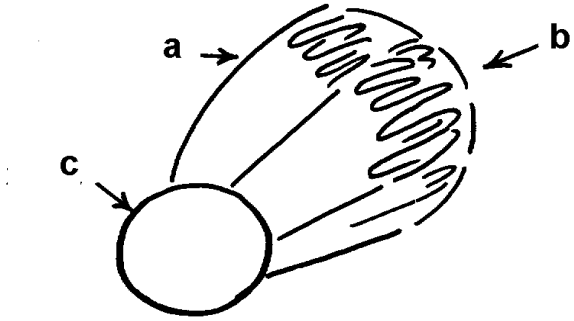
9-19-76. Drawing by first officer (A.P.) An intensely white, fluorescent light was emitted by the object. It left a non-continuous, sparkling trail.



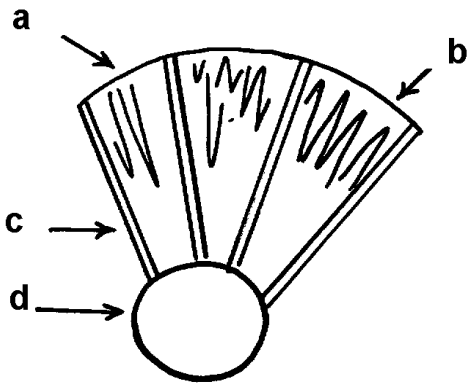
Drawing by pilot (Anon.). Horizontal oval of primarily white light but with a "constant blend of different shades of colors appearing across the surface." Outline was diffuse. Estimated width: 15'. Apparent angular diameter: 0.25 deg. Five small, distinct red lights located at edge.



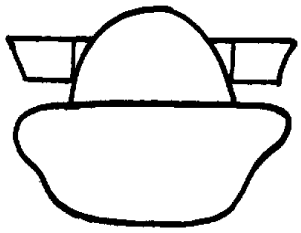
12-27-77. Drawing by pilot (R.A.). Curved edge ("a"); silver ("b"), white light ("c").



Drawing by observer on board helicopter (H.D.). Rounded top ("a"); silver ("b"); four ribs (maybe more) ("c"); white light ("d").



7-4-78. Drawing by pilot (F.P.H.). Hemispheric dome was bright chrome. Base was dull gray. Protrusions from dome rotated "back and forth" rapidly - the eyes could see the motion. "UFO was very close and clearly defined in clear air and skies." Estimated width of base: 36". Total height: 36"



6-11-78. Drawing ny pilot (F.W.W.) "...solid metallic aircraft of ovoid shape having a definite axis about which it moved... symmetrical in shape with a continuous highly reflective surface with no visible seams, markings, bolts, rivets, lights or protrusions of any kind." Estimated width: 2' to 3'. Thickness: 1.5' to 2.5'.

5-20-73. (No drawing available) Foreign commercial pilot reported seeing a "...silver oblong body, hanging vertically.

2-2-73. (No drawing available) Foreign commercial pilot reported seeing a ".... ball of intense bluish-white light, much like a welding arc.. .twenty to forty feet in diameter." It stayed with his aircraft for about 20 to 25 seconds.

4-12-73. (No drawing available) American private pilot (and passenger) reported seeing a "circular-shaped UFO that was bright white which became tinged with orange at times and "seemed to give off heat waves."

12-30-78. (No drawing available; l6mm color film 10 fps obtained for approx. 7 minutes) Film image shapes vary from circular. to oblate spheroid to thick streaks (both curved and straight) to complex closed polygons.

Colors on color film are typically yellow-white with occasional small areas of green and red.

9-4-77. (No drawing available) American commercial pilot reported seeing an oval UFO "...about 150 feet in diameter, flying at an altitude of 15,000 to 18,000 feet.... It was pulsating from a circular shape toward oblong, and giving off a reddish-green glow speckled by throbbing white, green and red lights on its side."

10-27-77. (No drawing available) Foreign military pilots in three separate aircraft reported seeing an orange circular UFO within 1000 ft. of one aircraft.

12-22-77. (No drawing available) American commercial pilot and co-pilot reported seeing a circular UFO with predominantly white lights. "There was a red blinking light on top of the thing with all those twinkling, silvery-white lights on around the middle... there was darkness between the red light on top and the white lights around the middle, and then darkness below the lights again.... and there was another red blinking light on the bottom of it. About every dozen or so lights around the middle, there was a reddish-purple one, and in between THEM, (sic) there was a blue one. But they were all blinking off and on intermittently."

This UFO then emitted a neon-green smoke ring from its bottom side which descended to the ocean's surface and "submerged! We saw the glowing green circle of water where it went in, and then the glow disappeared!.... Seconds later, two more green rings dropped out. The second one dropped away and submerged like the first one, but the third one dropped down and then shot straight ahead to disappear toward the coast."

"**...** the big UFO paced us for about twenty minutes, then all of a sudden the lights around the middle began going out in clusters -- not in banks of say, six or eight in a row, but six or eight separate individual lights at the same time..." "The top and bottom blinking red lights went out too with only scattered blue lights around the middle still blinking."

Finally, "... we could faintly see the silhouette of... like two inverted shallow soup bowls put together. Then very faintly just above the mid-lateral line we could see a soft subdued green glow emanating (sic) from what appeared to be trapezoidal shaped windows.. you know... wider at the bottom than at the top.

"Just about the time our eyes got focused on the windows, the thing assumed an overall bluish corona. Then it took off straight ahead like a cut cat, leaving nothing in front of us but a blue streak in the sky."

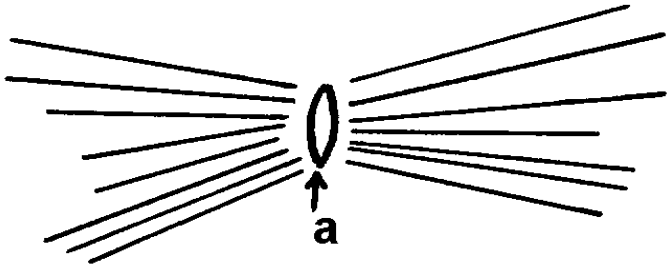
7-6-75. (No drawing available) American commercial pilot and co-pilot reported seeing a "...very dark rust" colored disc that at times appeared "almost black."

3-11-76. (No drawing available) Foreign commercial pilot reported seeing "an object which emitted a strange, intense light which seemed to come out from windows or similar openings, for to each luminous spot corresponded a dark one," It disappeared immediately after becoming intensely white.

8-20-76. Drawing by commercial aircraft passenger (J.S.). Object was seen near the ground, "reflecting sunlight brightly." A round shadow was seen on the ground beneath the object... the shadow then merged with the object. Reddish-brown spot ("a"), silvery, shiny disc ("b").

5-19-73. Drawing by pilot (E.M.). Bright light at center ("a"); a trail of paler light ("b"). Glare (as seen on horizon).

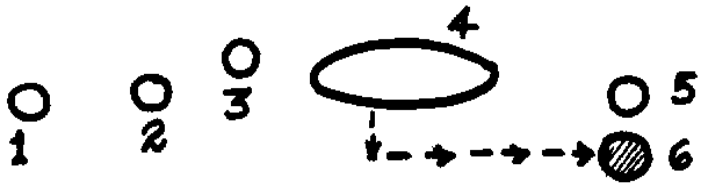
As seen on at Zenith. Bright light at "a".



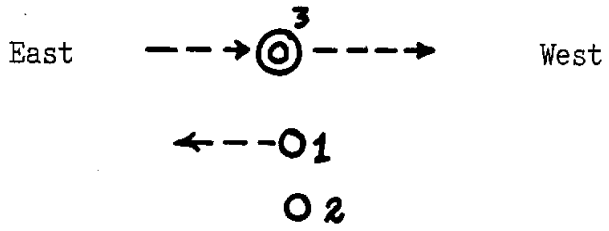
7-4-75. (No drawing available) Private pilot and passenger reported seeing the outline of a craft of light coloration and oval or cigar shape that appeared "...quite large." As it accelerated out of sight it "...changed brightness slightly."

Category: More Than One Object with Finite Angular Size

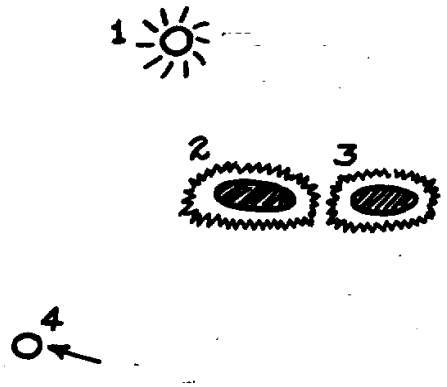
3-17-74. Drawing by pilot (W.K.) "While I was watching objects 3, 4, and 5.. with my binoculars (along with two other crew members)" another object (number 6) dropped out the bottom of number 4. Object number 6 dropped down "...approx. 2,000 feet and then shot out to join up with no. 5." They all disappeared since we passed under them in about the opposite direction. The objects were sharply outlined and reflected the daylight.



8-28-78. Drawing by pilot (P.C.). Two small, round objects 1 & 2 were seen motionless ahead and above the aircraft. The captain "then noticed a circular halo-shaped object 3 approach from the East." It passed "very close" to the two round objects and continued. "As it passed, one of the round objects (number 1) accelerated to the East very rapidly and was soon lost to sight. "All these objects were very high up, but quite clear. They all shown white.".



7-30-76. Drawing by pilot (D.W.) Pilot reported seeing light 1 for 8 minutes, object 2 appeared 2 min later and 3rd at same time. Object 1 was "incredibly bright." As we were looking a long cigar shaped object or sausage shaped brown affair appeared below it and to the starboard side of it, it just materialized...and then another one appeared next to it. 1: "Very large bright headlamp". 2 & 3: First object appeared. Second object (30-sec later).



: Second smaller bright object appeared about here.

First officer (C.T.) said that, "...its shape (number 1) was very difficult to discern. Rather like an enormous headlamp in the sky. It was not a star, planet or satellite." "Whilst watching this light an incredible occurrence was witnessed. At a much lower level, a large rectangular object suddenly materialized. It had the appearance of a thick, foreshortened condensation trail. The periphery was of a vapor appearance and colored, probably by the setting sun. The center was very dark, solid looking, somewhat cigar like and appeared stationary." About 30 sec later object 3 appeared "...just behind the first....I was under the impression that a third one appeared underneath the second (object 3) but couldn't swear to it. Another light then appeared (object 4); seven o'clock to the headlamp, but was lower on the horizon, not so intense and may be unrelated to this situation."

Category: Miscellaneous Descriptions Involving Perceived Shape

1-26-78. (No drawing available) Foreign commercial pilot and crew reported seeing from 10 to 15 orange glowing saucer-shaped objects flying in precise formation. The separation distances were maintained throughout the approx. 60 second-long sighting.

4-2-74. (No drawing available) Foreign commercial pilot and four other crew members reported

seeing an extremely bright round, somewhat flat object. An estimated 70 passengers on board also saw it.

7-14-74. (No drawing available) Foreign commercial pilot reported seeing a luminous triangle while at an altitude of 33,000 feet.

7-15-74. (No drawing available) Foreign commercial pilot and other passengers reported seeing a bright, silver-white cigar or triangular-shaped object above their aircraft. The object appeared to change from red to orange and yellow to blue.

10-??-74. (No drawing available) American commercial pilot and passenger reported seeing a bright white rectangular object seen against the clear blue sky. It finally accelerated upward out of sight after remaining visible for about eight minutes.

8-27-78. (No drawing available) American private pilot and passenger reported seeing a bright, reflective silvery-white oval or sphere, partly translucent, with no protrusions. Object appeared to darken as it neared the aircraft.

Category: Continuously Visible Single Point Sources - White

05-18-73	11-24-74	07-30-76
11-12-73	04-13-75	01-21-77
03-13-74	09-??- 75	04-14-77
11-16-74	09-28-75	04-23-77
11-23-74	11-22-75	

Category: Continuously Visible Single Point Sources - Colored

05-17-73 Very bright, blue-white with a red tail.

10-10-74 Greenish light, followed aircraft for 25 minutes.

11-22-75 Greenish-white light and orange sparks trail - changed to ragged patch of orange - changed to flowing orange "embers"- changed to darkness over 4.5 minute duration.

06-24-76 White light with a greenish tint traveling at about Mach 1.

07-31-76 Orange object seen "low on NW horizon."

10-26-77 Four or five "fireballs" seen falling into Pacific Ocean.

12-21-78 Brilliant white with intermittent reddish tinge. Two or three lights followed aircraft for about10 minutes.

03-21-77 Bright orange with blue flames trailing behind.

Category: Flashing Point Sources - White and Colored

02-12-73 Two white flashing lights, one on top of the other, accelerated vertically out of sight.

10-11-74 Object had red and white flashing lights. Object "pulled along side the aircraft for about 5 miles as aircraft descended 5,000 feet."

01-?? -75 Dull white source flashed on and off "sharply" for three minutes. Disappeared suddenly.

02-25-76 White light with a tint of red, hazy outline, flashed at 5 second intervals. (FP)

02-25-76 Brilliant white, rapidly flashing, sharply defined. (FC)

Data Base

A total of 72 sighting reports of 69 separate cases or an average of 11.5 sightings per year involving relatively long durations and two or more eye witnesses of the UFO were found in my own files and in reports sent to me by numerous foreign and domestic investigators. Of these, 72.2 percent involved commercial, *19.5* percent involved private and 8.3 percent involved military pilots. Table 1 summarizes these cases which includes the basic "objective" sighting data, i.e., radar (ground sites on-board) and electromagnetic (E-M) effects on-board the aircraft. (1)

Six cases were found involving some type of electromagnetic effect on-board the aircraft. The basic details of these six cases are given in Table 2. One report (4-13-75) was too abbreviated and in Spanish to afford enough details to include here.

A number of subjectively determined characteristics were also reported for these sightings. Both verbal descriptions as well as drawings of the phenomena were available in some instances. The many hundreds of pages of original documents have been abbreviated and grouped by common features in Figure 1 (pages a - j) for cross comparison.

Data Analysis

The distribution of sightings by year and foreign or domestic aircraft registry is given in Figure 2. The total number of sightings appears to be relatively constant except for 1978. Perhaps this is because not all of the available reports for 1978 have yet been submitted. There also appears to be a small increase in the number of American aircraft involved.

That there tends to be a small increase in the total number of sightings from the air as the year progresses with a dominant peak occurring in July is illustrated in Figure 3. These monthly frequencies may be compared with those given on pages 33 - 38 of Hall's (1964) review of military, commercial, and private pilot sightings for the period August 1944 to March 1963 (224 months). A total of 112 sightings are listed (2) in Hall's review for an average of two sightings per month in comparison to an average of one sighting for each of the 72 months covered in the present review. The numbers in parentheses for each month in Figure 2 represent the percentage of all 112 sightings in Hall's review for comparison purposes. The peak (i.e., maximum) frequency of sightings in July is evident in both sets of data as it was in the U.S. Air Force's Project Blue Book, Special Report No. 14 (Davidson, 1971) covering the period June 1947 through December 1952 and including about 4,000 UFO sighting reports. While the relatively large sample size represented

in the Air Force graph indicates a more symmetrical distribution of sightings around the July - August peak months, the criterion that was used to place sightings into the "in sufficient information" category in the first place is open to question for reasons that are beyond the scope of the present paper.

Figure 2. Number of Sightings By Year & Registration Classification
Figure 3. Number of Sightings by Month & Registration Classification

The present data were also analyzed by duration of the sighting. Figure 4 presents these findings by year. The top of each bar is the maximum and the bottom the minimum duration in minutes with the mean shown by a short horizontal line and number (in minutes). While the means are relatively long and may surprise some readers, comparison may be made to other research on the same subject by Davidson (1971) and Vallee and Vallee (1966, pg. 178) which indicates roughly comparable durations for sightings predominantly from the ground. A direct comparison among these three sets of duration data is not possible since each investigator used a different method of compiling data. It is valid to say that the present sighting durations tend to be of shorter duration than either those of the Air Force's Special Report 14 or those presented by Vallee and Vallee. These comparative duration graphs are given in Figure 5.

What time of the day did the present group of sightings occur? The answer is illustrated in Figure 6 using a 24 hour clock and plotting the frequency of the sightings' local time within one-hour intervals. It may be seen that the largest proportion of sightings occurred between 2100 and 2500 hours with a second "peak" occurring between 0200 and 0300 hours.

The major "peak" extending between 2100 and 2500 hours local time in Figure 6 corresponds to the major peak cited by Vallee and Vallee (1966) for Type III cases, namely, "...an unusual object of spherical, discoidal or elliptical shape stationary in the sky." However, no secondary "peak" is found for the 0200 to 0300 hours period in the data presented by Vallee and Vallee. In addition, a peak in the number of object sightings was found to occur between 2000 and 2300 hours in the U.S. Air Force study (Davidson, 1971; Fig. 41) and a much smaller peak at 1400 to 1500 hours. Thus, the present data appears to fall within the same general frequency of occurrence and time of day patterns as previously reported sighting data (primarily sightings from the ground). A previous analysis of aerial sightings (Challenger and Haines, 1979) has shown that these two frequency "peaks" are influenced by season of the year and by the latitude at which the sighting is made. Interested readers may also wish to consult other "time of day" data reported elsewhere (Ballester-Olmos and Vallee, 1971; Hynek and Vallee, 1975; Phillips, 1975) which include predominately sightings from the ground.

It is also instructive to compare the distribution of the various types of "objective' data with the subjective date. Objective data is any automatically or instrumentally derived data that occurs *without* the direct, continuous involvement of the human being. This is done in Figure 7 in the form of a Ven diagram. Numbers in parentheses represent the percentage of the total 72 sighting reports for each type of data indicated. These data were extracted from the "Radar" and "E-M" columns of Table 1 for each sighting for which there was a "Y" (yes). Referring to Figure 7 it may be seen that some form of objective data was found to occur on 21 (29 percent) of the 72 total sightings. Also, seven percent involved both on-board and ground radar of the aerial phenomenon and one percent involved both on-board radar contact and some type of E-M effect. Interestingly, in no instance was there the situation where an objective indication of a phenomenon was obtained without a visual sighting. These data may be considered as a continuation of other reported E-M effects accompanying UFO phenomenon reported elsewhere (Hall, 1964, Section 8) in which aircraft pilots reported such effects as engine failure, jammed radar, blocked radio transmission on various frequencies, "strange" radio signals received, ADF burnt out, etc. In the majority of such cases a high energy field seems implicated. Determination of the exact nature of the phenomenon would depend upon a careful study of extremely well documented cases where on-board sensing

systems are affected in a way that may be "recalibrated" after the fact. For Instance, if an ADF coil is shorted out it is possible to trace each circuit segment to find out where the break occurred and the likely current density that would have been required to cause the damage. A detailed analysis of various E-M data associated with the New Zealand sighting of 12-30-78 is currently underway.

Figure 4. Sighting Duration (minimum, mean, maximum) by Year
Figure 5. Cumulative Percentage Distribution of Sighting Duration
Figure 6. Time Distribution of Sightings (1973-1978)
Figure 7. Diagram of the Quantitative Distribution of Subjective & Objective Data

Some general observations are in order concerning the shapes and other reported "subjective" features of these objects: (1) Of the 18 drawings analyzed, ten (55.5 percent) were symmetrical. This value is close to the 59.7 percent of symmetrical UFO drawings by 139 participants in a special UFO drawing test who indicated that they had seen a UFO (Haines, 1979 (b)), (2) The majority of these drawings were oriented with the long axis parallel to the earth's surface (assuming that the paper used for the sketch was oriented long dimension vertically), (3) In most of these verbal descriptions the object or source of light was clearly defined, and (4) Numerous descriptions involve one or more:

(a) Luminous rays emanating from the object: (10-18-73; 12-12-77; 9-19-76 Object 1, Object 3; 5-19-73; 7-16-73)

(b) Either steady or pulsating homogeneous luminance over the entire surface of the object; (2-2-73; 4-12-73; 10-19-73; 1-26-74; 4-2-74; 7-14-74; 7-15-74; 10-??-74; 7-30-76; 9-19-76 Object 2, Object 4; 9-19-76; 10-27-77; 12-30-78)

(c) Highly complex colored lights accompanying a main object: (2-12-73; 10-11-74; 9-19-76 Object 1, Object 4; 9-4-77; 12-22-77; 6-24-78)

(d) Passively reflecting object(s): (5-20-73; 3-17-74; 7-6-75: 8-20-76; 6-11-78; 7-4-78; 8-27-78; 8-28-78)

(e) Some variation of "windows" and/or internal illumination seen within the object(s): (11-8-73; 3-11-76; 7-22-76; 9-22-77; 12-22-77)

Referring to the descriptions of the phenomena given in Figure 1, it can be seen that these descriptions could be placed into one of six basic classifications: 3

(1) Angularly large sources with a definite shape (27 cases)

(2) More than one object with finite angular size (3 cases)

(3) Miscellaneous descriptions involving perceived shape (6 cases)

(4) Continuously visible single point source(s) - white (14 cases)

(5) Continuously visible single point source(s) - colored (8 cases)

(6) Flashing point source(s) - white and colored (5 cases)

It did not appear warranted to develop more categories than these.

Some General Observations

Perhaps the most general observation to be drawn from this review is that there are some patterns that emerge. As discussed, they are the same kinds of time of day and month of the year patterns that have been reported previously and which derive mainly from observers on the ground. Certainly, there is no particular reason why details of sightings from the air should differ significantly from sightings from the earth's surface. Another general conclusion is that private, military, and commercial pilots and passengers continue to see and report bizarre phenomena while flying; this occurs in many foreign countries as well as in America. Also, while some of the present sightings seem to involve passive, free-floating objects like balloons (e.g., 7-6-75 and 6-11-78) the majority do not. The appearance of the phenomena seems to fall within approximately the same broad range of perceived shapes as are cited in the UFO literature (e.g., Vallee and Vallee, 1966). This occurs in spite of the supposedly high observational capabilities of pilots outlined briefly in the introduction; this observation raises some intriguing questions concerning the validity of the sighting details. If one assumes that pilots are seeing and reporting the same phenomena as ground observers are seeing and reporting then one would expect the subjective and objective data obtained from the two observer groups to be similar (and with comparable range of features). Apparently this is what is occurring. If one assumes, on the other hand, that pilots are seeing and reporting a different sub-set of phenomena than are seen by ground observers one would expect some qualitative (and quantitative?) differences in the reports from the two observer groups. While a statistically reliable test of the similarity and differences of these two observer groups' reports must await a larger sample size made up of more valid data, it now appears reasonable to suggest that the aerial phenomena reported by pilots and passengers flying is very similar to the aerial phenomena seen from the ground.

A REVIEW OF SELECTED AERIAL PHENOMENON SIGHTINGS

FROM AIRCRAFT FROM 1942 TO 1952

Richard F. Haines, Ph.D.

Copyright 1985

ABSTRACT

Sightings of so-called anomalous phenomena made from the air have the same fundamental features as phenomena reported by ground witnesses. This conclusion is based on a previous review of 69 cases from aircraft for the period 1975 to 1978 (reference 1). It is significant in that several prosaic explanations offered are either totally or partially eliminated because of it (e.g., radio controlled models, birds, balloons). The present review of an earlier period seeks patterns in the data that may be diagnostic in understanding something about the core identity of UFO phenomena. A total of 285 aircrew reports are reviewed for the period 1 January 1942 to 31 December 1952. It was found that 93 percent involved American and 7 percent foreign aircraft. Of the total 68 percent were military, 20 percent commercial, 11 percent private, and 1 percent unspecified. Twenty-nine cases (10.2 per cent) involved some form of electro-magnetic effect; they are reviewed in some detail. General statistics on temporal, spatial, and other factors are provided.

INTRODUCTION

A previous MUFON symposium paper (reference 1) gives five reasons for the author's continuing interest in the analysis of unidentified aerial phenomena reported by aircrew during flight. The present review is a continuation of an attempt to find pattern(s) of characteristics predictive and/or diagnostic of the phenomenon's basic nature. A total of 72 reports of 69 separate cases from 1975 to 1978 involving two or more aircrew witnesses in flight was presented at the 1969 annual MUFON convention in San Francisco. There it was concluded that the basic nature of the phenomenon (phenomena?) seen by aircrew was remarkably similar to that reported by ground witnesses representing an extremely wide range of occupations. Because many of the aircrew sightings took place at high altitudes, over extended periods of time, and during (airplane) travel at high velocities, a number of prosaic explanations could be readily eliminated. Among these explanations are birds, balloons, radio-controlled flying models, and kites. Meteors, and rocket launches and re-entries also are generally precluded because of the relatively long viewing durations and sometimes violent flight maneuvers displayed. It should be remembered that the space age did not begin in earnest until October 4, 1957 with the launch of Sputnik 1.

Of particular interest from the earlier MUFON paper were five cases of the 69 (7 percent) that involved some kind of electro-magnetic (EM) effect. They included: (1) abnormal deviations of a gyro - and a magnetic-compass in addition to a burnt-out automatic direction finding compass, (2) navigation and radio equipment malfunction, (5) temporary failure of the electrical system, (4) malfunctions in cockpit instruments, and (5) temporary but total failure of the weapons firing system on an American built F-4 Phantom jet aircraft with wide frequency band jamming. Each of these events occurred when an unidentified phenomenon flew in the vicinity of the airplane. Other EM cases are presented elsewhere (references 2 - 6). All of the aircraft flying during the period reviewed here had some kinds of sensors, emitters, or other passive instrumentation on-board that could give clues as to the frequencies, magnetic field strengths, and power densities on the airplane allegedly produced by the phenomenon. It is the author's belief that a systematic search of the spectral frequency plot(s) of the aerial phenomena will be particularly helpful in understanding what

the phenomenon is and also in enlisting the assistance of other professionals in such studies.

Finally, since almost all of the information reviewed here is historical and not particularly complete (obtained largely from USAF Project Blue Book files), the earlier restrictions of requiring two or more eyewitnesses and a combination of high altitude and low air speed or lower altitudes but higher air speeds were not applied. It is finally becoming an accepted truth in UFO studies that the validity and scientific usefulness of the evidence obtained is only as high as the reliability of the observer(s) and the care with which the data is dealt by the investigator(s). Witness reliability is influenced by many external (environmental) and internal (socio-psychological) factors each of which can contribute to the final perception and memory reconstruction of what took place (references 7,8,12). Unfortunately, much early UFO research was carried out by untrained people; much of the early U.S. Air Force "research" conducted under Project Sign and Grudge was haphazard in terms of both its quality and quantity. Because the present review covers this early period the data base is not as complete or useful as it otherwise might have been. Nevertheless, it is better than nothing and does form a base upon which to build explanatory models.

THE DATA BASE

Appendix 1 presents a listing of the 285 cases found in the open literature for the period in question. A blank or question mark indicates that data was missing in the original report. An "L" in the column labeled "Time" stands for local time while a "Z" stands for Greenwich Mean time (also called "Z" or zulu time). "Loc" stands for the general location of the sighting (also refer to the latitude and longitude columns). "Flt." stands for the flight registration of the airplane where "U" = USA, "F" = foreign, "M" = military, "C" = commercial, and "P" = private. A "yes" in the EM column indicates the cases where some kind of EM effect was reported. Duration of the sighting is given in minutes (m) or seconds (s). A hyphen indicates a range of values. "Brief" and "few" is assumed to represent two.

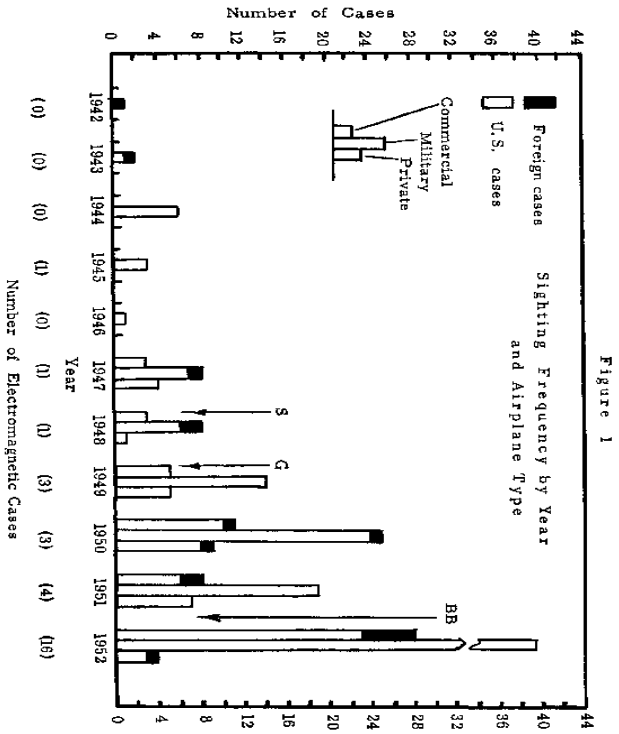
Page 6

RESULTS OF THE ANALYSIS

Sighting Frequency by Year and Airplane Type

How do the present 285 cases distribute themselves over this 11- year period? Figure 1 illustrates the answer. The now well publicized "flap" of 1952 took place within a longer period of activity which extended several years previously.



Better Version of Figure 1, Number of Electromagnetic Cases (Click Here)

The filled bars represent foreign aircraft and the clear bars American. Each year has as many as three vertical bars. They are: (left) = commercial, (center) military, (right) private. It may be noted that while the number of U.S. sighting reports tended to rise over this period no such rise is seen for the foreign aircrew data. A Chi square analysis (footnote 1) showed that there were significantly more domestic sightings than foreign

$$x^2 = 24;\ df = 10;\ p<0.01$$

The proportion of foreign to U.S. sighting reports switched to a more equitable balance for the 1975 to 1978 period (reference 1, page 131).

Project Sign was officially created on 22 January 1948 (see point "S" in Figure l). It was the first USAF study of UFO phenomena conducted by the Air Technical Intelligence Center of the Air Material Command located at Wright-Patterson AFB, Ohio. It was replaced in both name and (most) personnel on 16 December 1948 by Project Grudge (see point "G" in Figure 1). As Jacobs (reference 9) points out, many personnel in Project Sign who "...leaned toward the extraterrestrial hypothesis" were replaced by others with no such bent. Jacobs continues, "Instead of seeking the origin of a possibly unique phenomenon, as Sign had done, Grudge usually denied the objective reality of that phenomenon. In this way Grudge shifted the focus of its investigation from the phenomenon to the people who reported it." Despite the fact that reporting a UFO was not made mandatory until 29 April 1952 when AF 200-5 was issued, there was a continual rise in the number of sighting reports from US aircrew during both Project Sign and Grudge. No doubt the increased publicity surrounding the Air Force's involvement in the subject contributed to the rise as did the often spectacular nature of the phenomenon.

A comparison of the number of "unidentifieds" from a Project Blue Book official press release of February 1966 (reference 10) for the period 1947 to 1952 is given in Table 1 with the number of cases uncovered during the present review. Clearly, the author included more cases in the unidentified category than did Project Blue Book officials for 1947 through

1951. A non significant Product-Moment correlation of r = 0.71 was found between the present distribution of six frequencies for 1947 to 1952 and the corresponding distribution for 1973 to 1978 (reference 1). These two distributions were statistically different from each other

$$x^2 = 5.1; df = 11; p<0.05.$$

Table 1
Comparison of Number of "Unidentifieds"
from Project Blue Book and the Present Review

Year	Project Blue Book Total No. Reports	No. UFOs (%)	Present Review
1942			1
1943			2
1944			6
1945			3
1946			1
1947	122	12 (9.8)	17
1948	156	7 (4.5)	13
1949	186	22 (11.8)	24
1950	210	27 (12.8)	45
1951	169	22 (13.0)	34
1952	1,501	303 (20.2)	137
Totals	2,344	393	283

Sighting Frequency by Month and Year

Several previous reviews have suggested a consistent "month" effect with certain months producing more sightings than others. No such pattern was found in a previous analysis of pilot sightings for the period 1947 to 1959 (reference 11). A sighting shift phenomenon was found, however, such that during summer months most sightings occurred in northerly latitudes (37-degrees to 49-degrees) and during winter months most occurred in southerly latitudes (25-degrees to 36-degrees). But what about the present data base?

Figure 2 provides a month by month frequency plot of the number of sighting reports over this eleven-year period. The monthly totals added across all eleven years are: (Jan) = 19, (Feb) = 13, (Mar) = 18, (Apr) = 13, (May) = 24, (Jun) = 29, (Jul) = 46, (Aug) = 28, (Sep) = 17, (Oct) = 20, (Nov) = 23, (Dec) = 27, (no month cited) = 6. The sighting report frequency appears to be fairly consistent over the twelve months of the year with but a small increase in the May - June period.

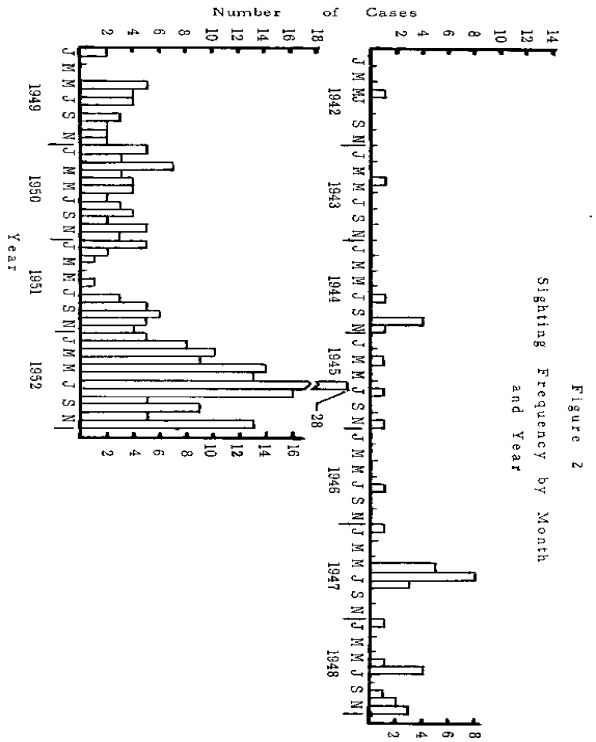


Figure 2, Sighting Frequency by Month and Year (Better Version)

Sighting Duration

Another parameter of interest is the maximum, minimum, and mean duration sighti g. Of course many things can influence this parameter in both directi e reference 12, chapter 10). It was assumed here that the number of temporal eswhich were longer than the actual event would tend to average out the number which were shorter than the actual event; i.e., the mean ought to be fairly representative of its "actual" value. Figure 3 presents these data. The top and bottom of each bar represents the maximum and minimum sighting duration, respectively with the mean shown by the short horizontal line and numeric value (in minutes). The grand mean duration of 7.3 minutes is less than the grand mean duration of 8.5 minutes found for the 1973 to 1978 period (reference 1).

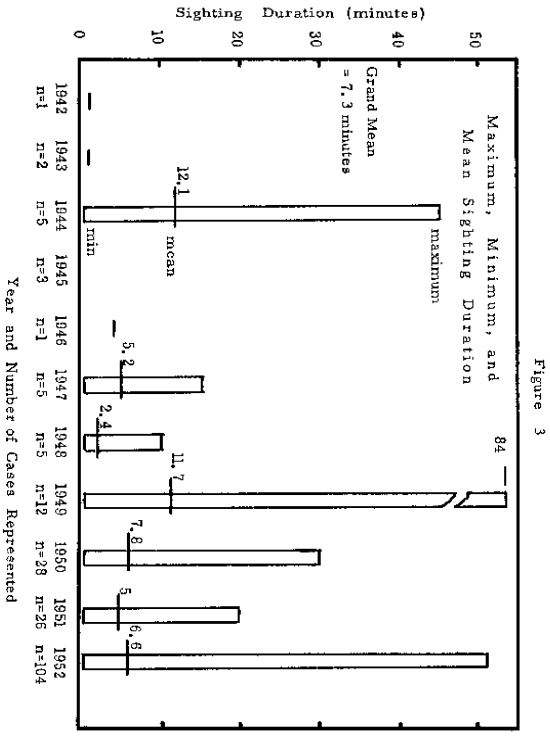

Figure 3

Figure 3, Year and Number of Cases Represented (Better Version)

For an airplane traveling at 150 miles per hour a period of 7.3 minutes corresponds to more than 18 miles of travel in straight, level flight (neglecting winds). Of course not all airplanes included here continued flying straight and/or level. Many pilots turned to be able to keep the phenomenon in sight or follow it (them). Various so-called "natural" phenomenon such as ball lightning and meteoritic passage through the atmosphere normally do not last even half as long as 7.3 minutes! These relatively long viewing durations make possible careful observation of the phenomenon by the aircrew.

The frequency distribution of measured or estimated sighting duration has been re-plotted in Figure 4 as a histogram (along with comparable duration data from reference 1. Dashed bars are for the present review and solid for the 1973 to 1978 review period. These two data sets differ significantly at the $p < 0.001$ level of confidence according to a

X^2 value of 37 (df = 13).

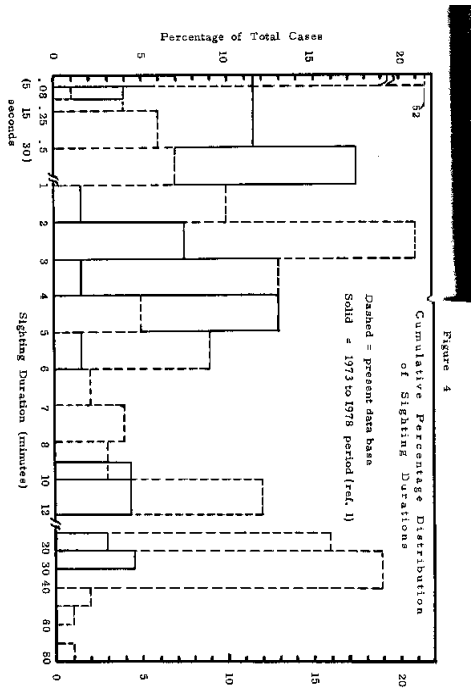

Figure 4, Sighting Duration (minutes) (Better Version)

Number of Eye Witnesses

It is instructive to know how many eye witnesses were involved if for no other reason than to gain an idea of the approximate reliability of the overall data base. In general, the more eye witnesses involved the more potentially useful information is available to the investigator, particularly when the eye witnesses are pilots and other highly trained and motivated air crew members. Figure 5 presents a histogram giving the number of cases (vertical axis) involving the number of eye witnesses shown along the horizontal axis. The large numbers of cases involving two or more witnesses is (largely) due to the high proportion of cases involving commercial and military airplanes. Numbers in parentheses beneath each eye witness number category are the corresponding number of cases from the 1973 to 1978 period review out of a total of 69. (Note: three cases in the previous review were unspecified in terms of duration)

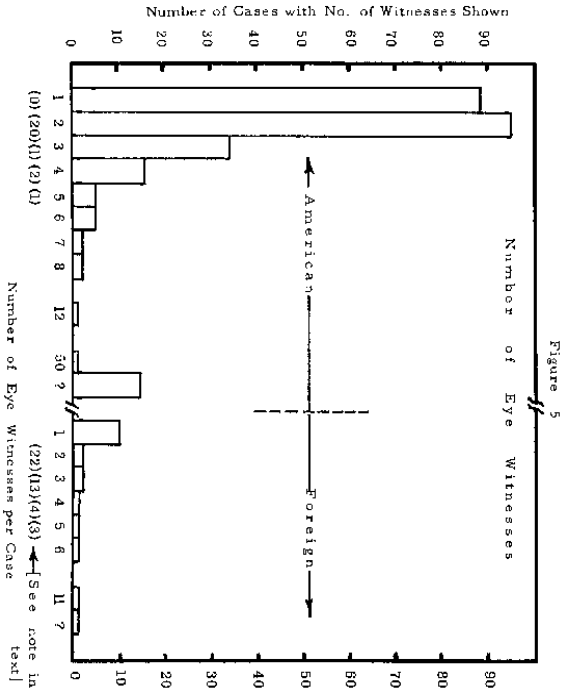

Figure 5, Number of Eyewitnesses per Case (Better Version)

Local Time Frequency Distribution

What time of day did these sightings occur? Figure 6 gives the answer using a 24-hour clock notation, that is, all 24 hours of the day are shown around the circumference of an imaginary circle. Midnight is at the top and noon at the bottom. The number of tick marks measured outward from the center of the figure give the number of cases that occurred within each hour. The largest number of cases in the present review took place between 8:00 and 9:00 pm and the second largest between 9:00 and 10:00 pm local time. A two-hour long peak frequency was also found for the 1973 to 1978 period but was shifted one hour later. In addition, a secondary peak (involving 6 cases) was found between 2:00 and 3:00 am local time for the 1973 to 1978 period but not here. All six of them were reported by foreign aircrews. It is possible that flight schedules of commercial aircraft may well have changed between the present and earlier reviews.

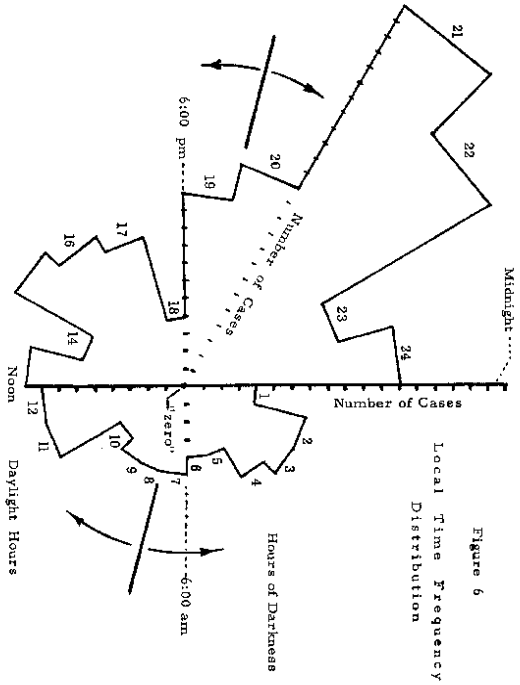

Figure 6, Local Time Frequency Distribution (Better version)

A Chi square analysis was performed on the present hourly frequency data compared with the corresponding hourly frequency data for the 1973 to 1978 period. They did not differ significantly

$$X^2 = 25; df = 23$$

Another analysis showed that there is no statistically significant difference between the number of sightings reported during am hours as with pm hours

$$X^2 = 13; df = 11.$$

Finally, an analysis of the number of sightings occurring during predominately daylight hours (i.e., 8:00 am to 7:00 pm) with predominately nighttime (darkness) hours (i.e., 8:00 pm to 7:00 am) showed that significantly more sightings occurred during nighttime

$$X^2 = 40; df = 11; p < 0.001.$$

Electro-Magnetic Effect Cases

Among the 283 cases reviewed were 24 (8.5 percent) that involved some form of EM disturbance, malfunction, or other effect. Table 2 summarizes these interesting cases by category.

Table 2

Summary of Electro-Magnetic Cases

EM Effect Reported	Date	No. Cases	(Percent)
Aircraft Radar Contact only (no visual)	1-12-50 1-21-51 3-24-52 12-24-52	4	15.4
Aircraft and Ground Radar Contact only (no visual)	1-22-52 8-6-52	2	7.6
Aircraft Radar Contact and Visual Contact by Aircrew	9- -50 9-17-51 10-18-51 3-26-52 12-10-52	5	19.2
Ground Radar and Visual Contact by Aircrew	6-16-48 3-23-52 5-26-52 7-20-52 Summer 1952 8-9-52 Autumn 1952 12-6-52 12-15-52	9	34.6
Aircraft Engine Stopped while in-flight	7-23-47 6-16-48 6- -49	3	11.5
Aircraft Engine Trouble	8-28-45 7-24-49	2	7.6
Aircraft Radio Transmission Jamming	9- -50	1	3.8
	Total =	26*	99.7

Note: Two cases fall into two different categories, viz., 6-16-48; 9- -50.

Click Here for Readable Copy of Table 2, Summary of Electro-Magnetic Cases

Following is a synopsis of each of these 24 cases grouped by general category.

Aircraft Radar Contact Only (no visual)

12 January 1950 2325 Hrs (local) $24^{0}00'$N $85^{0}20'$W Gulf of Mexico

A USAF B-29 was flying at 10,000 ft altitude when three radar paints were made. The radar screen "blips" orbited the B-29 with velocities estimated up to 3,000 mph. One blip traveled across the screen in 15 to 20 seconds (100 mile range setting). Two more blips then appeared and joined the first. A blip would enter the screen on one side, pass through the center (where it was lost temporarily) and then emerge on the opposite side, Blips were also seen on the 20 and 50 mile range settings. The main blip would hover in one location for from 5 to 15 seconds. The total sighting lasted about 30 minutes. The radar was jammed for about 10 minutes while in the vicinity of the Texas border.

21 January 1951 1620 Hrs (local) $36^{0}00'$ N $84^{0}22'$ W Oak Ridge, Tenn.

A USAF F-82 jet fighter flying at 7,000 ft. altitude established a radar contact over the Oak Ridge X-10 Atomic energy project plant. Initial contact was at about 10 miles, One of two aircraft made a lock-on approach at 4.5 miles where the unidentified EM source descended below the aircraft's beam. When the nose was dropped the target was once more acquired. Two other passes were made over the plant area. (Note: On 16 January 1951 at 1645 Hrs five people driving in the control zone security area reported seeing an "unusually brilliant object.")

The Air Force Material Command analysis of this incident concluded that the radar return was probably due to refraction to the ground (and back) of the airplane's radar beam by a temperature and/or moisture duct which was located at about the same altitude as the jet interceptor. Weather records for 21 January 1951 at 2100 Hrs showed a 6-degree inversion between 2,000 and 5,000 ft altitude (below the aircraft flying at about 7,000 ft) and another 3-degree inversion existing between 8,000 and 11,000 feet altitude. Air temperature near the ground was 58-degrees F and dew point of 19-degrees. Winds were very low.

March 1952 0845 Hrs (local) $34^{0}30'$N $121^{0}30'$W off California coast.

A U.S. Air Force B-29 navigator and radar operator viewed a radar return from an unidentified source for from 20 to 30 seconds while flying at 25,000 ft altitude and 200 mph, at a point 60 miles west of Point Conception, California. The radar return was calculated to be moving at about 3,000 mph on the APQ 13 set and was at about 25,000 feet altitude. Although visibility was unlimited nothing was seen.

The official USAF conclusion was "unidentified" even though some conjecture was given to radar reflections off a part of the aircraft and/or machine gun bullets which were fired for practice during the sighting.

December 1952 1215 Hrs (local) $33^{0}00'$N $96^{0}15'$W Dallas, Texas

The crew of a USAF B-36 reported radar contact with an unidentified EM source while flying at 40,000 ft altitude about 80 miles northeast of Dallas, Texas. The return occurred intermittently over 30 minutes at a range of from 2,000 to 4,000 yards within +/- 30-degree azimuth and -5 to -15-degree elevation angle (relative to level). Indicated air speed was 180 mph. The radar set was type AN/APG-41. The returns were photographed with a type ANO/15 camera and C-15 type film.

This event occurred during and after practice intercepts were made on the bomber by two F-84 interceptors (made to check out a new type of gun radar). Both radar sets on the B-36 showed the return at the same location. Radar interference was experienced for 30 minutes after the two jets had left the area. When the B-36 changed heading or climbed or dove the radar return remained in the same location.

Aircraft and Ground Radar Contact (no visual)

22 January 1952 0020 Hrs (local) $64^{0}30'$N 149000'W Alaska

An Alaskan ground radar site first detected an unknown object traveling away from their location at about 1350 to 1500 knots. An Air Force F-94 jet interceptor was scrambled to investigate and its on-board (type AN/APG-33) radar also locked on. The unknown reversed its course, returning toward the ground site. The ground radar tracked the F-94 near Nenana (near Fairbanks). The first airborne contact was of two returns ahead and about 500 feet below the aircraft's altitude of 30,000 feet**.** One return was bright and the other faint. Contact was lost at 200 yards range. About 60 minutes later the aircraft made a second contact dead ahead and at the same altitude as the aircraft; rate of closure was 100 knots. The pilot did not see anything during either pass. The aircraft was checked for radiation on 23 January 1952 with negative results. The ground site used a pulse repetition rate (PRR) of 600 and was set to MTI operation (a mode that cancels out fixed ground clutter from being displayed on the screen).

The F-94 radar observer said, "All during this flight, I had picked up an occasional mutual inductance line on the scope, but it would appear at different positions in azimuth and for only one sweep. I attributed this to a possible malfunction of the set and ignored it."

Since contact was lost each time the ground radar unit switched to short range, an Air Force radar expert said the return was probably caused by some kind of "freak weather." Note case: 21 January 1951 near Oak Ridge, Tennessee.

6 August 1952 0025 Hrs (local) $35^{0}48'$N $139^{0}54'$E Japan

An F-94B jet interceptor was scrambled from Johnson AFB, Japan because of an unidentified contact with an airborne object from ground radar (type AN/CPS-1; AN/CPS-4) of the 528th AC & W Group. The unidentified aerial return was tracked making a right-hand (circling) orbit over Tokyo Bay. No height information was available. The unknown was also detected on the APQ-33 on-board radar, however, nothing was seen visually. All radar sets were (later) checked and found to be in working order. The weather was exceptionally good at the time with winds at 5,000 feet altitude at 20 knots at 2000. Cloud cover was 3/l0ths at 14,000 feet.

Aircraft Radar Contact and Visual Contact by Aircrew

? September 1950 0700 Hrs (local) 40^0N 127^0E Korea

The pilot of a U.S. Navy night combat fighter aircraft reported seeing two huge shadows traveling over the ground below him at a high rate of speed. He was flying at 10,000 feet altitude just before sunrise and estimated the shadows were moving about 1,000 mph. Then they both stopped suddenly and backed up and appeared to vibrate or jitter. He looked up and saw two apparently solid objects with a silver, mirror surface above him. He readied his guns and his radar screen bloomed (became very bright) indicating some form of jamming. Turning down the set's sensitivity had no effect. when he tried to radio his ship a strange buzzing noise was heard. He stated, "Each time I switched frequencies the band was clear for a moment then the buzzing began." Using the radar screen's initial image size and indicated range as indicators, he judged their diameters to be at least 600 or 700 feet. Both were described as looking like a coolie's hat with oblong ports emitting copper-green light which gradually shifted to pale pastel colors. A shimmering red ring encircled the top portion of each object. A jet black circle was also seen on the bottom of each object. During the entire period when the objects seemed to jitter the black circle appeared to remain stationary.

Note. It may be significant to point out a closely similar sighting investigated by the author which took place on 4 July 1981 at l645 Hrs (local) over Lake Michigan, USA by a commercial aircrew. The main eyewitness was an ex-Navy combat fighter pilot in Korea.' (Reference 13).

17 September 1951 0420 (Z) $61^0$30'N $68^0$50' W West of So. Greenland tip

A USAF B-36 crew flying at 18 000 feet altitude over the Atlantic ocean d radar (jammi g) interference on their APQ-24 set. The alleged source of inte e was an "unidentified aircraft" at 28 miles away. The anti-jamming system was act..but there was no change in the jamming pattern on the radar scope." Fif nutes later radar interference was received c ming from the right side of the a through a horizontal arc of 1200. The unknown source was tr cked at a vel f 238 knots. Several aircrew members had seen running lights which wer "...not rd...all were white with twin white tail lights." The electronic counterme (ECM) officer picked up carrier waves on 867, 849, 822, 991, 730, 715, and 730 megaHertz. "Frequencies in the 700-800 and 900 megacycle group are unexplainable since no radar stations, U.S. or Canadian, are known to exist in the area within range of the B-36... .there are no aircraft assigned to the NEAC area that have night lights as described...or (that) fly at the altitude and airspeed indicated."

One day later two other B-36 aircraft left Goose Air Base (Labrador) enroute to Resolute, NWT. The first aircraft was flying at an altitude of 18,000 feet and 210 knots airspeed. Its

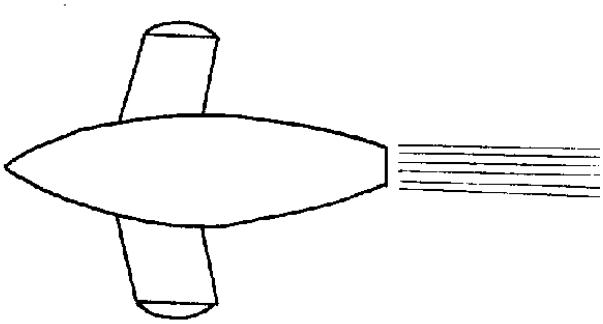
ECM operator detected a shifting carrier wave and identified it on each of the following frequencies: 867, 849, 822, 991, 730, 715, and 730 megaHertz. Nine minutes later "...very powerful signals were picked up on (the) 38 to 42 and the 48 to 57 megaHertz" band. The second aircraft was flying 20 minutes behind the first. Its ECM operator reported detecting a signal of 240 megaHertz with a one microsecond pulse duration. At 0000 Hrs (Z) a continuous signal of the "tracking" type was picked up on 53 megaHertz. Its pulse duration was 1 microsecond. From 0000 Hrs to 0100 Hrs signals were picked up on 37.5, 43.5, 44 to 58, 58.5 to 63, and 89.5 to 92 megaHertz. At 0100 Hrs (Z) an "image signal" was identified on a frequency of 180 megaHertz.

The official Air Force conclusion was "aircraft" and "Not a UFO report."

18 October 1951 0333 (Z) $35^0$48'N $123^0$16'E Tsingtao, China

The waist gunner and rest of the crew of a Navy PBM-Mariner type BD-5 aircraft reported sighting a "...long conically shaped flame." They were flying at 5,000 feet altitude 140 miles from Tsingtao, China over the Yellow Sea. The length of the flame varied during the 16 to 22 minutes-long sighting. On board radar also detected the phenomenon. When the pilot turned toward the phenomenon it veered away, maintaining an almost constant separation. The flame was an orange-red hue. When it grew longer it changed to a white-orange hue. The crew could still see it after radar contact was lost "...until the estimated range became three or four miles." Its "hull" was estimated to be 60 feet long with a "wing" shape (as viewed through binoculars) with a dihedral at the tips. It flew at a high (25-degree) angle of attack. It accelerated slowly at first and then more rapidly, finally being lost to radar at 22 miles range. Its calculated velocity near the end of the encounter was 530 knots.

Witness sketch of object:



26 March 1952 2030 Hrs (local) $31^0$10'N $103^0$30'W Texas

A flight of four USAF B-5OD aircraft were flying from Ft. Stockton to Pecos, Texas at 8:30 pm at 27,800 feet altitude. Aircraft no. 9299 of the 509th Bomb Group was maintaining its rearward relative position to the lead aircraft by means or its radar (set on 2 mile range). The radar observer picked up a return for five minutes on a reciprocal scope face position as the lead aircraft which then suddenly disappeared from its one mile range position. Nothing was seen visually at this time. At 10:13 pm the radar observer saw the return "move rapidly" toward the lead aircraft. He quickly called the right (side) scanner who subsequently saw something like red and green running lights during a 10 - 15 minute-long period of observation. The object was also seen by the crews of the lead and number 4 aircraft visually and on radar.

10 December 1952 1915 Hrs (local) $47^0$20'N $118^0$40'W Washington state

Both crew members of an Air Force F-94 interceptor flying near Odessa, Washington

between 26,000 and 27,000 feet altitude reported seeing six round, reddish-white objects with 2 "windows" traveling at about 240 knots. They flew in formation and then suddenly reversed direction. They dipped instantaneously as they headed almost head-on toward the aircraft. They were detected on the ARC-33 radar during the 15 minute sighting. At first they hovered and appeared as dim reddish-white lights in the clear, moonless, dark night sky. They disappeared suddenly at one point.

The official Air Force conclusion was "possibly research balloon."

Ground Radar and Visual Contact by Aircrew

16 June 1948 time not known location not known within Soviet Union

A Soviet Air Force aircraft allegedly experienced engine failure and electrical system failure when a light beam struck him. It seemed to come from a "mysterious apparatus" at an estimated range of 5.6 miles. The pilot was temporarily blinded by the conical ray of light. Ground radar first sighted the unidentified object which was described as a cucumber shape by the pilot.

23 March 1952 1805 Hrs (local) $46^0$20'N $120^0$25'W Washington state

A U.S. Air Defense Command Alert F-94 aircraft was scrambled at 6:33 pm as a result of the ground radar contact of an airborne object some 20 miles south of Yakima, Washington. The radar operator on the aircraft first detected the unknown at 22,500 feet altitude and a second contact was made at 10-degrees above a level line of sight when they were at 25,000 feet. The pilot reported seeing a large "ball of fire" on two occasions which would "...build up and then fade out" over a 45-second long period. Its size and shape were not discernible. It was red with no tail or exhaust. The F-94 was traveling at 360 knots while the unknown was tracked during one eight-minute period traveling at 78 knots toward the SE. Winds were to the SE at 80 to 100 knots.

The official USAF conclusion was "unidentified." This is interesting in that they might well have relied upon a balloon explanation in light of the data on local winds.

26 May 1952 0320 Hrs (local) location not known exactly North Korea

(Incident a)

The crew of an F-94 interceptor was informed by ground radar of an unidentified on its tail. After making a 180-degree turn the radar operator locked onto an object at 7,000 yards range. As the separation range diminished both crew members saw a "brilliant white light straight ahead." It then performed a steady climbing turn and "accelerated at a tremendous speed drawing away from the F-94 which now had cut in its after-burner." Radar contact was lost after 15 seconds. A later equipment check found the radar system to be in perfect condition.

(Incident b)

The same aircrew (later) reported making seven passes on a UFO with very similar features as in incident a (above) except that nothing was seen visually. The F-94 was traveling at about 250 knots when the object quickly and constantly accelerated away. The object traveled from 6,000 to 25,000 yards in about 14 seconds (calculated velocity of 2,777 mph). The radar was set to long range so it was not possible to gauge the size of the object accurately. A slight image fading occurred as the radar lock was broken. Page 4 of USAF Report 52-85 indicated that the calculated distance covered by the object is (sic)

approximately 68,500 feet. Acceleration is 650 ft/sec or approximately 20 "G" acceleration (which is far more than the human body can stand for more than a fraction of a second). Its final velocity was 9,450 ft/sec or about 5,580 knots (6,420 mph).

The official USAF conclusion was "Possible malfunction of airborne radar set."

20 July 1952 0100 Hrs (local) $39^0$25'N $78^0$00'W West Virginia

An Airway Traffic Control Center (ATCC) controller at Washington, D.C. National airport radioed the crew of a Capital Airlines flight soon after its takeoff. At an altitude of about 4,000 feet the crew witnessed two or three unidentified objects traveling at a high rate of speed about nine miles ahead of their DC-4. ATCC requested them to investigate. From three to five minutes later the objects were about five miles ahead of the aircraft and were on radar. From one to three seconds later another DC-4 aircraft passed them in the opposite direction. From four to five minutes later the copilot saw one bluish-white object moving in a steep 25-degree dive moving from NE to SW at a "tremendous rate of speed." The DC-4 was then at 6,000 feet altitude over Charlestown, West Virginia. Both pilots then saw a "brilliant bluish white flash" pass them at a tremendous speed. They then saw another brilliant bluish white light appear where the previous light had disappeared. It moved rapidly from their right side to their left along an arc 30-degrees above the horizon.

Note. This incident took place during a six hour-long period of very intense UFO activity in the vicinity of the nations' Capital. A TV electrical engineer in Cumberland, Maryland reported unusual TV interference within a few hours of this case.

Summer 1952 night exact location not known Florida

The crew of a U.S. Strategic Air Command B-29 aircraft of the 809th Air Base Group, MacDill AFB, Florida was asked by field radar to investigate a ground radar contact at 40,000 feet altitude and traveling at 400 knots. At about midnight the captain sighted a "glowing white light shaped like a football" while flying at 20,000 feet. As the aircraft was turned to chase it, it accelerated quickly out of sight. No other data was available. The weather was clear and calm with no temperature inversions.

9 August 1952 2057 Hrs (local) 38^0W 127^0E Korea

A pilot in the First Marine Air Wing was flying at 15,000 feet altitude near grid position K-3 Korea when he reported sighting a "moving ball of fire with a stream of flame." It was at an estimated altitude of about l0,500 feet. Ground radar sweep time was ten seconds. The unidentified screen image length was equivalent to about two miles and was curved. Its calculated velocity would have been about 1,600 knots on the controller's Plan 12 scope.

The official USAF conclusion was a "meteorite." Note, a meteor was seen at about this time and locale by ground personnel.

Autumn 1952 2200 Hrs (local) $40^0$12'N $74^0$45'W New Jersey

The crew of an Eastern Airlines Martin 404 commercial aircraft were flying over Trenton, New Jersey at from 7,000 to 9,000 feet altitude at about 10:00 pm when they reported sighting a yellowish navigation-type light at about ten miles away. They asked ground radar for confirmation of any unscheduled traffic and ground radar locked on to it. Both the aircraft and the unknown were traveling at about 260 mph. As it approached them it looked like an incandescent yellow elliptical shape; it passed across their nose within about one mile and then suddenly began a 30-degree climb toward the SE gradually accelerating and

changing color to a blue-white. Long Island radar confirmed its ascent and acceleration. The total sighting from the cockpit was from three to four minutes. No red or green navigation lights were seen.

6 December 1952 2325 Hrs (local) $20^0$18'N $92^0$4'W Gulf of Mexico

Six members of a USAF B-29 bomber flying at 18,000 feet altitude over the Gulf of Mexico 100 miles south of the Louisiana coast at 5:24 am sighted a series of blue streaks passing them in groups, generally front to rear. The sky was clear and visibility was unlimited. At 5:25 am one of the aircraft radar picked up a single return moving very fast. A second return was noticed at the edge of the screen. At about 5:32 am a third group of returns was picked up. One group had (apparently) taken up a pacing position about 40 miles behind the aircraft. This group suddenly changed direction and accelerated directly toward the aircraft (from behind). At an unspecified range they slowed and kept pace for about ten seconds. Then they suddenly accelerated off to one side. As the pilot looked at his radar screen an unidentified image 0.5 inch diameter was seen. A group of smaller objects merged into the larger image. Then they all flew off at over 9,000 mph. Contact was broken off at 5:35 am. There were from 20 to 25 objects in all passing within about 20 miles of the aircraft.

The official USAF conclusion was "unknown."

15 December 1952 2315 Hrs (local) $53^0$00'N $60^0$40'W Labrador

Pilots of a USAF T-33 and an F-94B reported sighting a bright red and white light after being vectored to a given location by ground control approach (GCA) personnel. The light had no definite shape and was seen during a 25 minute period. The F-94B attempted an intercept without success traveling at 375 mph. Ground radar tracked the unknown for 40 miles at an altitude of from 1,500 to 2,000 feet. The unknown was within 15 miles west of Goose Air Base, Labrador.

The official USAF conclusion was "unknown."

Aircraft Engine Stopped While In-Flight

23 July 1947 daytime exact location not known Eastern USA

A private pilot flying at 6,000 feet altitude reported first sighting a very bright ray of light coming from above his altitude. Then his engine began to "...perform peculiarly. It coughed and sputtered spasmodically." He administered carburetor heat without success. His engine stopped but, much to his utter amazement, he claimed that his aircraft maintained its level attitude. When he checked his air speed it was at zero He felt "...an odd prickling, electric-like sensation coursing through my body." Then he saw an object above him and to his left; a strange "wraith-like craft." It had a projecting flanged rim; either side had "streamer-like portholes." It hung motionless about 1/4-mile away and appeared a metallic hue. He then switched both magnetos to on and his engine came to life. Then the aircraft nosed into a stall and picked up speed. (Reference 14).

16 June 1948 time not known location not known within Soviet Union

(Note. This case has been reviewed (above) in the section dealing with "Ground Radar and Visual Contact by Aircrew").

June 1949 time not known 20^0N 90^0W Mexico

The crew of a four engine USAF transport reported encountering an unusual hovering at abo ut 8,000 feet altitude above the Yucatan peninsula near the Tierras Calientes hills. The captain and others saw a "...light layer of vapor or whitish smoke hovering around it." It oscillated a number of times around its vertical axis and then suddenly began to move directly toward the aircraft. It seemed to narrowly miss the left wing and then circled the aircraft. The pilot nosed into a dive to an altitude of 3,000 feet and the object repeated its passes around the plane, "gleaming like a mirror in the sunlight." Then all four engines began to fire irregularly and "...the ailerons and the tail began to show signs of weakening." The pilot commanded his crew to bail out and as they did so they watched the object ascend vertically to its original altitude. The aircraft crashed into the swamp. (Reference 15)

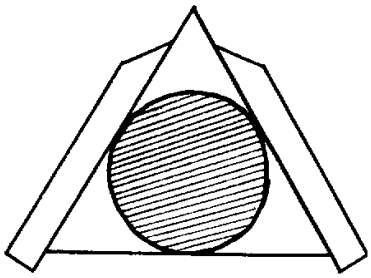
Aircraft Engine Trouble

28 August 1945 time not known exact location not known Iwo Jima, Pacific

A U.S. Army Air Corp C-46, two engine aircraft experienced engine trouble and lost altitude during the period when three unidentified objects were seen nearby.

24 July 1949 1203 Hrs (local) $43^0$10'N $115^0$35'W Mt. Home, Idaho

The pilot of an American Piper Clipper aircraft flying at 19,000 feet altitude reported being passed by two rows of three objects each flying in perfect formation with a seventh object slightly to the rear of the others. When they passed they turned right about 1,500 feet ahead and 500 feet below his aircraft. Then they turned right again and passed his right side at a velocity estimated to be from 450 to 500 mph. They were all the same shape (see sketch below) with a delta shaped wing and a dark colored circle about 12 feet in diameter located midway between the tips of the object. Its top surface was perfectly flat and a shallow dome was seen on top about 2 to 5 feet high. Each object had a needle sharp nose and a flat tail. Some type of outer panels seemed to oscillate. They disappeared from full view suddenly. The wing to wing span was 35 to 55 feet. They had



no visible means of propulsion and the trailing edge of the wings were flat (not tapered).

As the pilot flew through the objects' flight path he expected some turbulence but there was none. His Lycoming 4 cylinder opposed engine was brand new but began to malfunction at this time. Upon landing a mechanic found all four spark plugs to have been shorted and burned out.

September 1950 0700 Hrs (local) 40^0N 127^0E Korea

A U.S. Navy night combat fighter was flying just before sunrise at 1,000 feet altitude over Korea. The primary details of this case have been presented above. When he attempted to radio his ship about sighting two huge unidentified aerial objects it was blocked by a "strange bussing noise." Each time he switched frequencies the band was clear for a moment and then the buzzing began again. No specific information is given concerning the

frequencies used, output power, or other technical details.

Electro-magnetic effects on board aircraft due to the presence of some unknown airborne phenomenon nearby continues to be a challenge to the serious investigator. The above cases are to be added to the growing lists of such cases (References 1 - 6). A highly technically trained team of scientists and engineers must assess the best documented cases in terms of the most probable cause(s) of the effects reported. It must not be presumed that the Air Force has done this for the present set of cases. A great deal of detailed knowledge is now available concerning the electrodynamics of the Earth's atmosphere and near volume of space. Atmospheric and plasma physicists are needed to deduce the possibility that microwave and shorter wavelength emissions from the Earth are playing some role in exciting on board sensors (cf. References 16 - 17). It seems reasonable to say that the state of technology in radiative transfer between 1942 and 1952 was not sufficiently advanced as to be able to produce all of the effects noted here, particularly engine malfunction. Of course another source of such interference lies on board the aircraft itself due to various electrical system static discharge problems, however, the rather precisely timed and frequency selective interference or jamming in some instances makes this explanation difficult to hold.

GENERAL CONCLUSIONS

The present review of aircrew sightings has shown that there are a relatively large number of reports by highly credible and trained observers who have under their control, sensitive, tunable sensors of various kinds. It was shown that there was a rapid increase in the number of sightings up to 1952 by U.S. aircrew but not foreign. No particular month of the year stands out in terms of having more sightings represented. The distribution of sighting durations showed a tri-modal distribution with one peak at less than five seconds, a second peak at between two and three minutes and a third at between 20 and 40 minutes. It might be suggested that the longer modes probably represent fundamentally different phenomena than the shortest mode which are more likely misidentifications of some well known object which, with longer observation time, would be correctly identified. When an observer has two or more minutes to view something, however, this explanation is significantly more tenuous. With regard to the number of eye witnesses, well over half of the cases involved two or more witnesses which makes the well known hallucination hypothesis impossible.

Considering the fact that both this and the previous review (Reference 1) found that a predominant number of sightings occurred well after sunset raises interesting questions that are not related to sun- illuminated objects seen against the darkening sky background (see Reference 10, pp. 72 - 88). Future reviews should attempt to take into account air traffic density at different hours of the day; this was not possible here due to a lack of such records. The present distribution of sightings by time of day suggests that sky darkness may play a role in the increased frequency of sightings since the human eye will continue to increase in sensitivity for about an hour (or more) after entering darkness after which it will maintain a fairly stable sensitivity level. Of course this fact cannot then explain the rapid drop in sightings just after midnight when the sky brightness is still very dark.

The author requests that readers with further information on these and other aircrew sightings contact him directly.

FOOTNOTES

1. The Chi Square tests the probability (p) that two data distributions are drawn from the same population. It is expressed in terms of a probability that there is no difference in the frequency distribution of the two groups. In this first use of the x^2 statistic one group is the foreign cases and the other is the U.S. group. A p value less than 0.05 indicatos that one would not expect to obtain the same results more than five times out of one hundred purely on the basis of chance.

FIFTY-SIX AIRCRAFT PILOT SIGHTINGS INVOLVING ELECTROMAGNETIC EFFECTS

Richard F. Haines, Ph.D.

Copyright 1992

ABSTRACT

Reports of anomalous aerial objects (AAO) appearing in the atmosphere continue to be made by pilots of almost every airline and air force of the world in addition to private and experimental test pilots. This paper presents a review of 56 reports of AAO in which electromagnetic effects (E-M) take place on-board the aircraft when the phenomenon is located nearby but not before it appeared or after it had departed. These effects are not related to the altitude or airspeed of the aircraft. The average duration of these sightings was 17.5 minutes in the 37 cases in which duration was noted. There were between one and 40 eye witnesses (average = 2.71) on the aircraft. Reported E-M effects included radio interference or total failure, radar contact with and without simultaneous visual contact, magnetic and/or gyro-compass deviations, automatic direction finder failure or interference, engine stopping or interruption, dimming cabin lights, transponder failure, and military aircraft weapon system failure. There appears to be a reduction of the E-M energy effect with the square of increasing distance to the AAO. These events and their relationships are discussed. This area of research should be concentrated on by other investigators because of the wealth of information it yields and the physical nature of AAO including wavelength/frequency and power density emissions.

INTRODUCTION

The subject of pilot reports of anomalous aerial phenomena has been of deep interest to me for over 15 years for several reasons. (1) Pilots possess a high level of training and personal motivation for making careful observations. (2) Their (usually) high level of experience in flight helps them make rapid and accurate assessments of often ambiguous situations. (3) Their capability to radio for immediate assistance or confirmation of events (e.g., ground radar, etc.) often provides corollary data. (4) Their ability to fly in different directions and altitudes provides them an opportunity to gain a better view of the anomalous phenomena or objects (5) Maintenance of their professional reputations is important to them so that they will usually consider all of the alternative explanations before making a final report of an unknown object. Finally, (6) Their aircraft often possess sensitive electronic equipment that sometimes detect various aspects of the phenomenon. In short, pilots are usually very good observers whose reports contain valuable information for the investigator.

I have prepared several review articles of pilot sightings for the periods 1942 to 1952 (Haines, 1983), 1950 to 1954 from the Korean War (Haines, 1990), and from 1973 to 1979 (Haines, 1979). In the first of these reviews, 283 cases were covered and in the second and third, 40 and 72 reports, respectively. More than 300 pilot cases were summarized by Challenger and Haines (1980). Other reviews of individual pilot sightings have been published by Del Giudice (1987), Haines (1980, 1982(a), 1982(b), NICAP (1980), Shanklin (1955), Stacy (1987-88), Wichman (1971), and Zeidman (1979).

In addition, Gillmor (1968), Greenawald (1971), Ruppelt (1956), Wilkins (1954), and Zigel (1968), to mention a few, have published books or articles that include pilot sightings, some of which involve electromagnetic effects on board the aircraft. Perhaps the broadest conclusions that can be drawn from this large body of information are: (1) AAO seen from the air possess the same physical

characteristics as do those that are reported from the ground; (2) some AAO are clearly capable of out-flying any aerial device mankind has yet built, (3) some AAO possess electromagnetic radiation characteristics which can interact with and interfere with man-made avionic systems at a distance. This report deals with this third matter in particular.

Several UFO investigators have reviewed E-M and ignition-interference cases including Hall (1964), on behalf of the National Investigations Committee on Aerial Phenomena (NICAP) who listed 106 cases. Johnson (1983, 1988), McCampbell (1973), and Rodeghier (1988) also reviewed such incidents. Johnson (1983) reviewed 276 reports involving motorized land vehicles whose electrical systems and/or ignition systems were interfered with by the presence of one or more UFO. He analyzed the influence of UFO position and distance upon strength of the interference on the electrical system and reported, "The likelihood of a vehicle stalling out consistently increases as the distance between the vehicle and the UFO becomes small." In his 1988 paper Johnson expanded this review by adding the influence of UFO size and event duration. He found 78 relatively complete cases involving UFO size, distance, and duration.

In his 1988 paper Rodeghier catalogued 441 cases of UFO-caused vehicle interference including (engine and electrical system; engine only, radios only; power reduced to engine; headlights only; radio and lights). It has been speculated that ionized air near an engine's distributor can lead to reciprocating engine failure through a change in shape of the generated spark (Klass, 1968, pg. 97), however no supporting evidence for this presumption is given. Hall's 1964 review of 106 perhaps controlled explosions which incidentally interfere with electrical circuits under certain conditions." Falla (1979) also summarized 420 EM cases. More recently, Smith (1991) provided me with a listing of 126 cases from his UNICAT computer file in which the parameter electromagnetic (EM) was included. These cases include 113 from surface vehicles and technology and 13 (10.3 percent) from aircraft and related technology. Only three of these are included in the present listing.

THE DATA BASE

The following 56 cases involving E-M effects on board aircraft were drawn from my personal collection of almost 3,600 pilot sightings going back to 1926 when cockpits didn't have much more instrumentation than a simple barometer to indicate air pressure (altitude) change. These 56 cases represent 1.5 percent of all pilot sighting reports. Interested readers may contact me for a copy of the abbreviated list of cases analyzed here.

The following topics are summarized below from these tables:

(a) Year distribution

(b) Time of day

(c) Geographic location

(d) Aircraft registration (Class)

(e) Type of aircraft

(f) Number of witnesses

(g) Sighting duration

(h) Number of AAO

(i) Shape of AAO

(j) AAO Motion Characteristics

(k) E-M effects upon aircraft systems

(a) **Yearly distribution**. These E-M cases cover a period of 45 years (1945 to 1990). No cases were found for 15 of these years. The highest number of reports were made in 1952, the well-known "flap" year of UFOlogy in America. No apparent patterns are found in these data.

(b) **Time of day.** Figure 1 presents the (local) time at which these events took place. The now-familiar bimodal distribution was found peaking with six cases between 8 to 9 p.m. and midnight to 1 a.m. local time. I found a somewhat similar double peak in the 1942 - 1952 sample of 283 cases (Haines, 1983). Except for possible disruption of VHF radio transmission at night due to ionization in the upper atmosphere one would not expect to see any particular temporal distribution of E-M cases on a natural basis. Very few aircraft can fly at altitudes high enough to experience this kind of radio disruption.

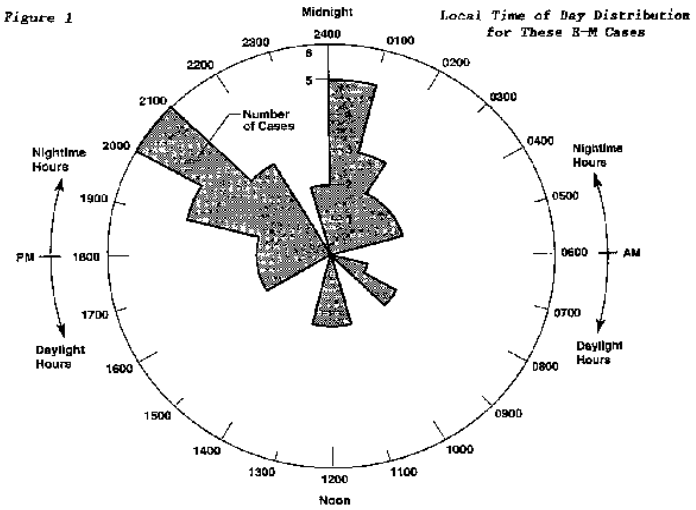

Figure 1 - Local Time-of-Day Distribution for E-M Cases
92-figure1L.gif

The time of day at which EM interference occurred in the 126 ground and aircraft cases from a recent UNICAT analysis (Smith, 1991) found that most took place at 2300 - 2400 hours local time (23 cases; 18.2 percent). The number of EM cases fell rapidly to five cases during the one hour after midnight (1200 - 0100L), rose to nine cases (7.1 percent) (0100 - 0200L). Before midnight the number of EM cases was four cases (1800 - 1900L), four cases (1900 - 2000L), eight cases (2000 - 2100L), 10 cases (8 percent) (2100 - 2200L), 15 cases (12 percent) (2200 - 2300L), 14 cases (11 percent) (2300 - 2400L).

(c) **Geographic location.** The present 56 cases occurred in 24 countries and in 19 American states as well as over the following major bodies of water of the world (Antarctica; Bering Sea; Gulf of Mexico; Sea of Japan). Fifty of the 56 cases (89 percent) took place in the northern hemisphere and only six (11 percent) in the southern hemisphere. Concerning longitude, 34 cases (61 percent) took place in the western hemisphere and 22 (39 percent) in the eastern hemisphere. These findings are a result of the location of the flight paths flown by these aircraft. Unfortunately, it is not feasible to normalize these data against actual flight path locations. Localized concentrations of (iron-bearing) magnetized rock can produce fairly slow compass needle deviations. These areas are well known and are marked on aviation charts in addition to the earth's global magnetic fields. None of the compass deviation events reported here were the result of these well known phenomena.

(d) **Aircraft registration (Class)**. Table 1 summarizes the different types of aircraft registration involved in this set of data. Most of the cases associated with U.S. military aircraft took place before 1960. In general private aircraft do not have as much advanced electronic equipment on-board to be affected by AAO radiation.

Table 1

Aircraft Class Distribution

	(Number of Cases) Foreign	American
Private	2	6
Commercial	15	2
Military	6	25

(e) **Type of aircraft.** Table 2 lists all of the aircraft types involved in these cases. Of the 41 different aircraft types involved here 17 (41 percent) were propeller driven with internal combustion engines.

Table 2

Types of Aircraft

Private		Cessna 150	Piper-Clipper
		Cessna 170	Piper-Navajo
		Cessna 182	Piper-Cub
		Seneca	
Commercial		DC-4	B-737
		DC-9	B-747
		DC-10	Caravelle
		Beaver	Bristol 170MK31
		Aero-commander	IL-14
Military	C-46	B-29	F-4
	C-47	B-36	F-15C
	C-130	RB-47H	F-16
	Transport	B-50D	F-82
			F-86
		T-33	F-86D,K
			F-89D
		BD-5	F-89J
		P2V-5F	F-94
			F-94B
		UH-1H	F-104

(f) **Number of witnesses**. The number of witnesses either of the E-M effect or the AAO itself ranged from one to more than forty (see the case dated 11-16-67 that lasted over an hour!). There was an average of 2.7 eye witnesses per case.

(g) **Sighting duration**. Figure 2 presents the distribution of sighting durations for these cases. They range from seconds to three hours. The longer durations (and higher altitudes) tend to eliminate most prosaic explanations for AAO including meteorites, balloons, model planes, gliders, kites, and remotely piloted vehicles. This distribution is similar to what I found in my review of all pilot sightings for the period 1973 through 1978 (Haines, 1979).

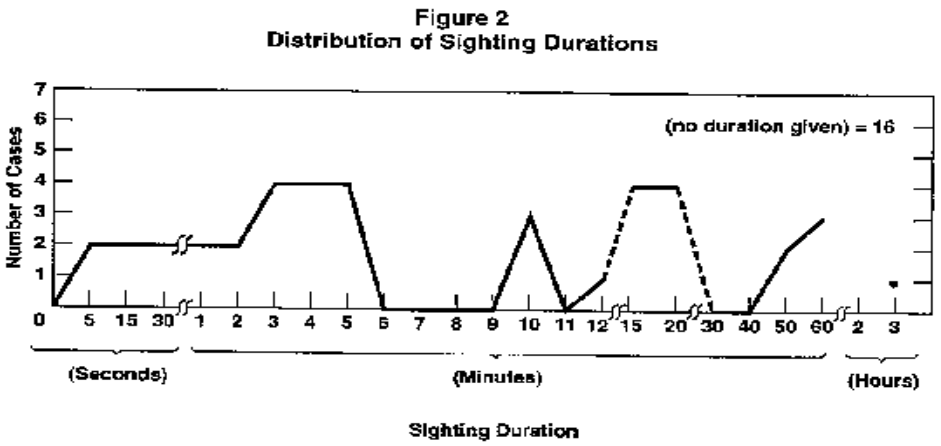

Figure 2 - Distribution of Sighting Durations
92-figure2L.gif

(h) **Number of AAO**. The number of AAO in each case was counted in relation to the type of aircraft registration involved. These findings are presented in Figure 3. Note that there were from one to thirteen separate AAO in any given case and that there does not appear to be any particular distribution in the number of AAO by private, commercial, or military aircraft type which might occur if the AAO could detect, in advance, what classification of aircraft was present and then arrange to bring a particular number of their own vehicles near the aircraft. In three cases the pilot wasn't sure about the number of objects.

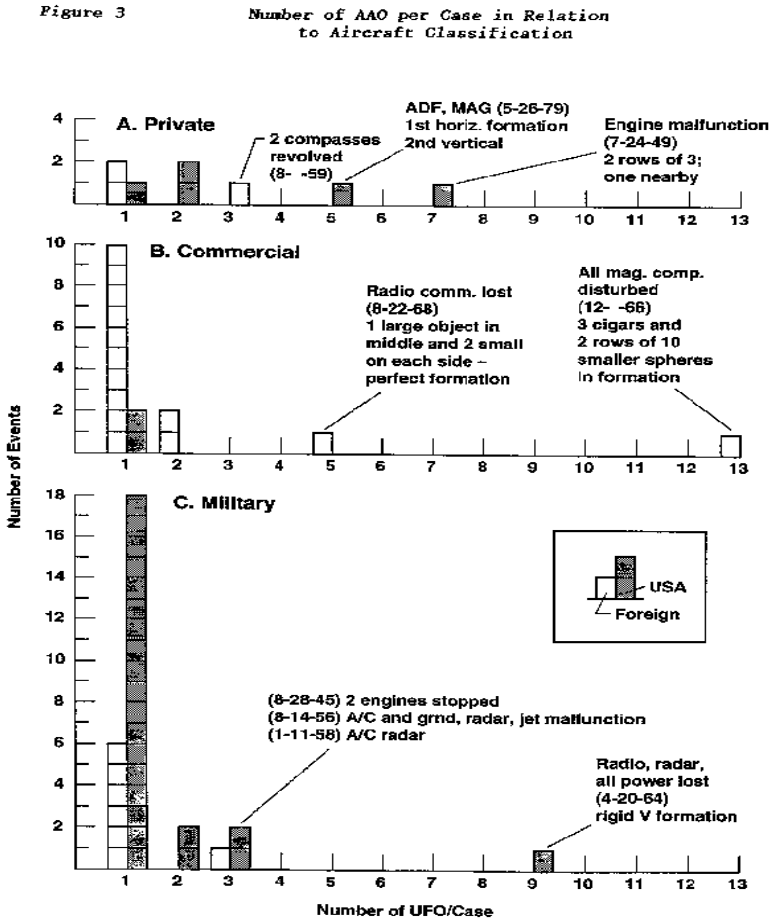

Figure 3- Number of AAO Per Case in Relation to Aircraft Classification
92-figure3L.gif

In the December 1966 case from Finland both pilots reported seeing a "formation of odd lights" flying in formation (see Figure 4 for an artist's rendition). Three were cigar shaped objects which kept a rigid formation relative to one another. There was a straight row of ten dark and ten light colored round objects. Flight crews on four other commercial flights reported seeing the same formation. The two compass systems on the Caravelle jet aircraft showed different readings. As the formation moved on ahead of the aircraft both compasses returned smoothly to normal (accurate) orientation.

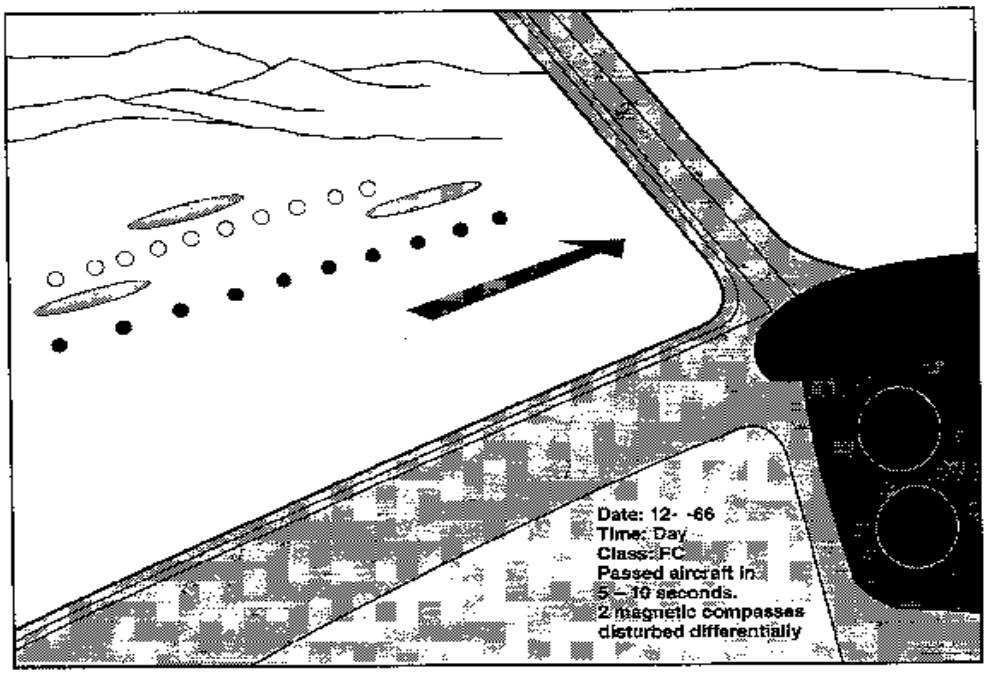

Figure 4.
92-figure4L.gif

Figure 5 is an artist's rendering of another highly interesting multiple UFO sighting of (8-22-68) from Australia which lasted more than ten minutes. The lines labeled (A), (B), and (C) merely represent passage of time, not three parallel flight paths. The larger objects appeared to divide into two sections and rejoin and also to change shape as shown. The smaller spherical objects would fly in rigid formation with the larger objects and then move away and return to it. Radio transmission interference occurred only when these objects were near the aircraft. It isn't known whether the intensity of timing of interference occurred during any of the particular AAO activity shown here.

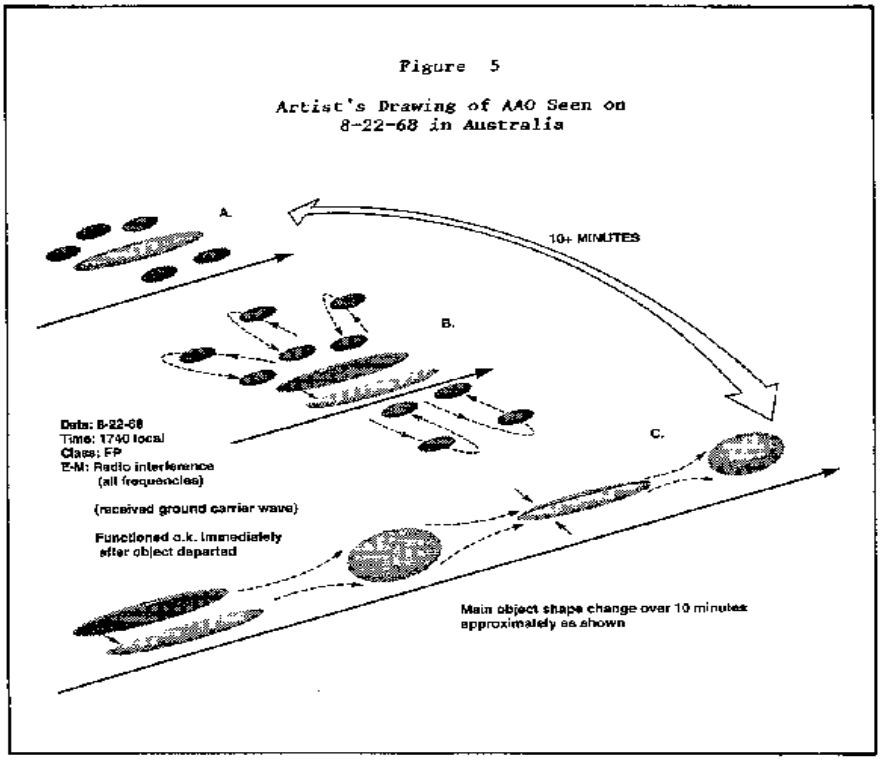

Figure 5
92-figure5L.gif

I suggest that the larger is the number of closely spaced AAO near an aircraft the stronger will be their integrated E-M "field" produced at the aircraft's location. This seems to be supported by the private and commercial aircraft class data in Figure 3. In part A of Figure 3 the formations of five and seven AAO produced ADF and magnetic compass deviations and engine malfunction, respectively. In part B of this figure the formations of five and thirteen AAO yielded blocked radio communication and magnetic compass disturbances, respectively. In part C three and nine AAO interfered with engines, and radio/electrical power, respectively.

(i) **Shape of AAO**. Table 3 presents a summary of verbal descriptions of the various AAO observed. They have been grouped by angular size and apparently self-emitting versus passively reflecting. It is impossible to be certain whether an entry in any category may not also be part of another category at a difference time.

Table 3

Summary of AAO Shapes, Size, and Luminance*

	Self-emitting	Passively reflecting
	white(1)	
	white-2 red dim red windows(1)	
	orange(1)	no shape (polished metal)(1)
Angular Point	white & red(1)	
	white, red & green(1)	
	red & green(1)	
	red(1)	
	no color cited(1)	
	Sphere-greenish(1)	Cigar-grey (2)
	Sphere-amber(1)	Egg (1)
Angularly Large**	Sphere-white(1)	Cone (red flames(1)
	Sphere-white-yellow-Red(2)	Oblate spheroid(1)
	Oval-grey(1)	Bullet (1)
	Top-green/red mid-band(1)	Triangle, flattop (4)
	Top-red & blue flashing(1)	Domed disk, flat bottom(2)
		Domed disk, grey-blue(1)
		Wreath & flanged rim (1)

Notes: * Seventeen cases (55%) involved only a radar screen image spot and eight cases involved "not available" or "not indicated."

** Larger than about 30 minutes of arc.

(j) **AAO Motion Characteristics**. Are there patterns of relationships between different AAO shapes/luminance and AAO motions? The answers are found in Tables 4 and 5 which list the motion codes of 39 cases (70%) of the total in which both shape and motion characteristics are given. Table 4-A and B probably represent the same objects and phenomena but seen from different distances rather than representing differences in the physical size of the AAO.

Table 4-A

AAO Motion(s) Relative to Nine Cases of Self-Luminous (Small) Point Sources*

Date	Shape	Motion				Type				
11-18-77	White light			H	J					T
9-19-57	White light	A	C				N	P	S	
9- 7-58	White, red & green			H						V
3-26-52	Red & green	high speed travel								
11- 4-57	Red	A						P		
5-26-79	Orange	A	C					P		
1- 3-63	None (projected white beam							P		
	Total =	3	2	2	1		1	4	1 1	1
	Pct. =	19	13	13	6		6	25	6 6	6

* These sixteen motions represent 20.5% of all those reported.

Table 4-B

AAO Motion(s) Relative to Nine Cases of Self Luminous Angularly Large Sources*

Date	Shape	Motion			Type			
3- 1-86	Amber sphere (Sp)	A				P		T
2- 2-73	Blue-white Sp					P		
6- 4-55	White, yellow & Red Sp				H			
3-12-77	Bright white Sp				H	P		
5-31-52	Intense Sp 450 kts.							
8- -59	Grey oval 250 mph							
2- 3-54	Top (green-top; Red mid-band)		D	E				
11-16-67	Top (red & blue flashing lights)	A					S	
11- -68	Pale blue disk & 12 windows	A						T
	Totals =	3	1	1	2	3	1	2
	Pct. =	23	8	8	15	23	8	15

* These thirteen motions represent 16.4% of all those reported.

Table 4-C

Motion Coding Explanations
(Letters are Included in Following Tables)

A	Approached aircraft on a straight path and/or collision course
B	Circled behind aircraft quickly
C	Flew in curved path
D	Descended vertically
E	Revolved about an axis
F	Multiple objects flew in rigid formation
G	Flew in straight path cross aircraft path
H	Hovered or appeared almost motionless
J	Flew parallel with aircraft
K	Sudden stop in mid-air
L	Flew on straight flight path
M	Jumps invisibly from place to place
N	Made a right angle (or very sharp) turn
O	Oscillated about its vertical axis
P	Paced aircraft at close distance
R	Sudden reversal of flight direction
S	Flew in one or more circles around aircraft
T	Accelerated away from aircraft
U	Sudden disappearance
V	Ascended vertically

Table 5-A

AAO Motion(s) Relative to Two Cases of Reflecting Point Sources*

(See Table 2)

Date	Shape	Motion Type				
6- -49	None (polished metal)	A	O		S	V
9-26-67	None	A		P		
	Total =	2	1	1	1	1
	Pct. =		17	17	17	17

* These six motions represent 7.5% of all those reported.

Table 5-B

AAO Motion(s) Relative to Nineteen Cases of Angularly Extended Reflecting Sources*

Date	Shape	Motion Type												
12- -66	Cigar							P		T				
10-18-73	Grey cigar 600 kts	A						P		T				
7-16-73	Egg											V		
10-18-51	Cone (red flames) 530 kts													
7-23-47	Wreath & flanged rim							P						
12-10-52	Oblate Spheroid, white				H				R					
1-29-62	Oblate Sp.				H							V		
4-20-64	Oblate Sp., white	A						P						
3-21-65	Oblate Sp., greenish	A						P		S	T			
9-19-76	Oblate Sp.,	A						P	R					
3- -71	Bullet			G				P			T	U		
12-17-56	Domed disk, flat bottom 1500kts				H						T			
6-18-68	Domed disk, grey-blue	A									T			
9- -50	Coolie hat 1000 mph													
7-24-49	Triangle, flat top & shallow bottom	A					N							
7-14-74	Triangle				H									
3-30-90	Triangle 1800 kts		D		H	K			R			U	V	
8-22-68	None given			F				P						
2- 4-90	None given				H	K					T		V	
	Total =	6	1	1	1	6	2	1	8	3	1	7	2	4
	Pct. =	14	2	2	2	14	5	2	19	7	2	16	7	9

* These 43 motions represent 55.1% of all those reported.

The rank order of AAO motions from most to least frequent occurrence (with percentage of the total 95 cases) is given in Table 6. Note that the first four categories account for more than 60 percent of all reported AAO motions. The first three items typically require both a sufficiently long viewing duration and relatively near distance to the AAO in order for the pilot to be able to visually discriminate these features.

Let us only consider those types of motion where the aircraft appears to be the center of focus or attention of the AAO. Only two of the present 20 motion types (viz., A and P) together account for almost 35 percent of all of these types of cases! When three other (similar) motion types (B, J, and S) are added the total rises to 42.1 percent! If AAO are nothing but natural atmospheric phenomena why would they be attracted in these particular ways to the aircraft and remain nearby for such a long time? Indeed, this is strong evidence for some kind of intelligence associated with AAO.

Table 6

Ranked Frequency of AAO Motions

	AAO Motion	Percentage	Mean Alt. (x1000')	Mean Dur. (min.)
P	Paced aircraft at close distance	20.0	16.9	13.5
A	Approached aircraft on straight path and/or collision course	14.7	16.7	18.9
H	Hovered or appeared almost motionless	13.7	23.1	25.0
T	Accelerated away from aircraft	11.7	9.7	6.3
V	Ascended vertically	7.4		
D	Descended vertically	4.3		
R	Sudden reversal of direction of flight	4.3		
S	Flew in 1 or more circles around aircraft	4.3		
K	Sudden stop in mid-air	3.1		
U	Sudden disappearance	3.1		
C	Flew in curved path	2.1		
J	Flew parallel with aircraft	2.1		
N	Right angle (very sharp) turn	2.1		
B	Circled behind aircraft (quickly)	1.0		
E	Revolved (about an axis)	1.0		
F	Multiple objects flew in rigid formation	1.0		
G	Flew in straight path across A/C path	1.0		
L	Straight flight path	1.0		
M	Jumps invisibly from place to place	1.0		
O	Oscillation (about vertical axis)	1.0		
	Total =	99.9%		

An analysis was made to discover whether the four types of AAO sizes and luminance's were differentially related to AAO motions when the distance between the AAO and the aircraft was decreasing, increasing, or remaining at about the same distances during the sighting. The results of this analysis are presented in Table 7. These motion categories are not mutually exclusive and several could apply equally well to the other categories depending on the direction of the AAO relative to the aircraft

Table 7

Frequency of Occurrence Between
AAO Sizes-Luminance and Motions

	Type of Motion	AAO Size-Luminance Category			
1.	Distance Decreases	Self-lumin.	Self-lumin Refl.	Refl.	
A	Approached aircraft	3	3	2	1
C	Curved path	2	0	0	0
G	Straight path across aircraft's path	0	0	0	1
H	Hovered	2	2	0	6
K	Sudden stop	0	0	0	1
L	Straight path	0	0	0	0
N	Right angle turn	1	0	0	1
R	Sudden reversal of direction	0	0	0	3
	Total =	8	5	2	13
	Pct. =	28.6	17.8	7.1	46.4
2.	Distance Increases	Self-lumin.	Self-lumin. Refl.	Refl.	
T	Accel. away from aircraft	2	0	0	0
C	Curved path	2	0	0	0
D	Descended vertically	0	1	0	1
G	Straight path across aircraft's path	0	0	0	1
H	Hovered	2	2	0	6
K	Sudden stop in mid air	0	0	0	2
L	Straight flight path	0	0	0	0
N	Right angle turn	1	0	0	3
R	Sudden reversal	0	0	0	3
V	Ascended vertically	1	0	1	4
	Total =	7	5	1	25
	Pct. =	18.4	13.1	2.6	65.7
3.	Distance Change	Self-lumin.	Self-lumin. Refl.	Refl.	
P	Paced aircraft at close distance	4	3	1	8
B	Circled behind A/C	0	0	0	0
J	Parallel with A/C	1	0	0	0
L	Straight flight path	0	0	0	0
S	Circled aircraft	1	1	1	1
	Total =	6	4	2	9
	Pct. =	28.6	19	9.5	42.8

Table 7

Note that the relative percentage of cases for the four AAO size luminance categories is approximately the same across these three categories of approach-recede-no change.

Table 8 presents the AAO motions associated with radar contact cases

Table 8

AAO Motions Associated with
Radar Contact Cases

Date	Shape	Motion Type
1-12-50	Radar spot	3,000 mph
1-21-51	Radar spot	D
9-17-51	Radar spot	238 kts
1-22-52	Radar spot	1,350 mph & 1,500 mph
3-24-52	Radar spot	3,000 mph
5-26-52	Radar spot	20g acceleration
8- 6-52	Radar spot	none cited
12-24-52	Radar spot	180 mph
5-13-55	Radar spot	1000 kts P T
8-14-56	Radar spot	B H R U
10-18-56	Radar spot	D
1-11-58	Radar spot	900 kts
10-28-75	Radar spot	H P
?- -82	Radar spot	700 kts H K M
5-16-87	Radar spot	5000 mph J

Total =	1	2	3	1	1	1	2	1	1	1
Pct. =	7	14	21	7	7	7	14	7	7	7

Table 8

A great majority of these particular cases represent very high speed AAO.

(k) **E-M effect upon aircraft systems**. Now that various aspects of the surrounding flight conditions and related events of these sightings have been reviewed we turn to the main subject of this paper. For each physical system we seek the failure point that is common to the most instruments. For example, since many cockpit instruments are operated electrically an interruption to the electrical power distribution system can temporarily affect many different instruments. If the ammeter indicates a slow battery discharge the electrically driven instruments and displays will cease functioning in well known ways. But if only one or two electrically driven instruments are affected by the AAO this suggests either that: (1) the E-M radiation from the AAO wasn't strong enough to cripple the entire electrical system (but only the few instruments), (2) its radiation was tuned only to the instruments affected, or (3) the affected instruments were not adequately shielded from the radiation. The following topics are treated here: (1) electrically driven systems, (2) magnetically actuated systems, (3) engine malfunctions, and (4) hydraulic aircraft systems.

Figure 6 illustrates, by area of circles, the basic categories of E-M effects reviewed here and the relative proportion of each one. Three circles lie partially outside the main circle because these systems were either on the ground (e.g., radar) or could have involved mechanical problems (e.g., engine malfunction) as well as electrical problems.

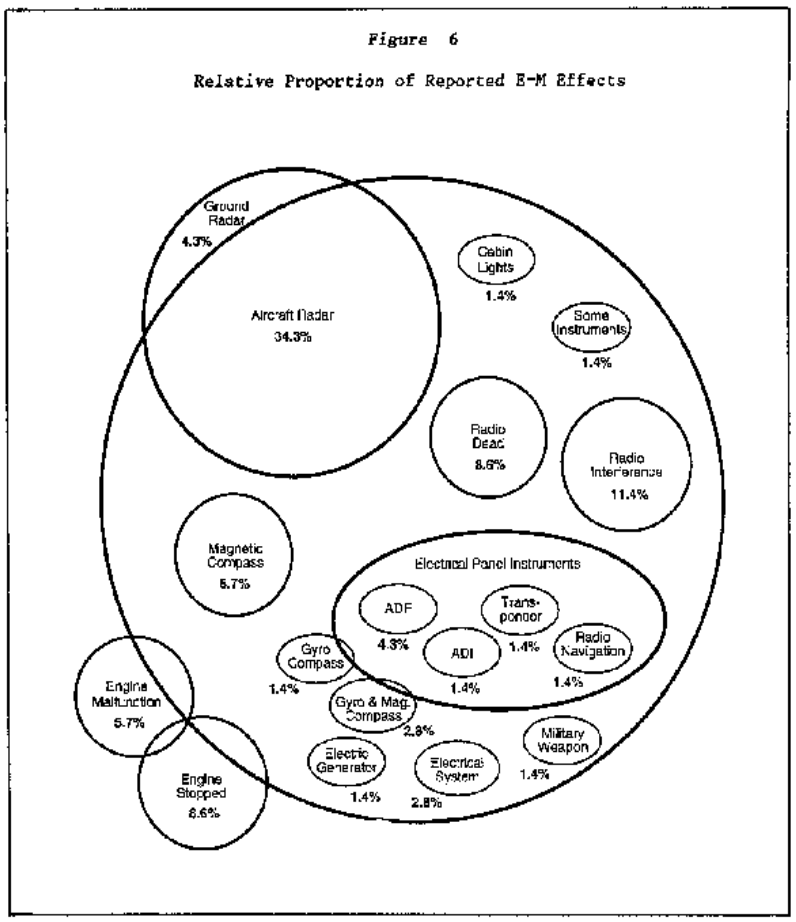

Figure 6
92-figure6L.gif

1. **Electrically Driven Systems.** Modern aircraft have a large number of displays and controls that are electrically controlled and powered. Only a few have emergency battery backup systems. In addition, modern aircraft have highly efficient electrical shielding around each bundle of cables to prevent various kinds of malfunctions.

Of the 65 total E-M effects reviewed here, 51 (78%) involved the electrical system in one way or another (including the 21 radar cases which require electrical energy and which involved positive

contact with the object by 27 different ground and aircraft sets). Table 9 summarizes these effects; radar cases are omitted. It is not known whether the individual instrument or system failed by itself or because of temporary or permanent loss of input electrical power.

Table 9

Direct or Indirect E-M Effects Involving Aircraft Electrical Systems

	Cases	Date
1. Electrical System Power Lost (unknown cause)	2	
all power lost		4-20-64
system failed only when AAO was nearby		7- -75
2. Electrical Generator burnt out (right side)	1	11- 4-57
3. Automatic Direcction Finder (ADF) "interference"	4	
"violent reaction"		11- 4-57
needle rotated "aimlessly long after event		3-21-65
Spun at AAO passed A/C		2- 2-73
		5-26-79
4. Cabin lights dimmed to "dull glow" when AAO approached and returned to normal as it departed		11-16-67
5. Radio communication (permanently dead)	2	2- 3-54
		11-16-67
6. Radio transmission complete failure	5	
Failed only when AAO was nearby		3-21-65
Failed only during AAO encounter		6- 1-68
Failed at all available frequencies		8-22-68
Failed as AAO passed aircraft		7-16-73
Failed only when AAO was near aircraft		7-14-74
7. Radio interference (static, buzzing)	7	
Buzz heard soon after freq. changed many times/many frequencies		9- -50
Interference occurred only when AAO nearby		11- 4-57
Interference occurred only when AAO nearby		4-20-64
VHF interference when AAO paced aircraft at est. distance of about 5 meters		6-18-68
Interference occurred only when AAO nearby		11- -68
Static occurred as AOO passed aircraft		5-26-79
Static occurred when AAO was nearby		3- 1-86
8. Radio navigation equipment	1	
Problem developed only when AAO was nearby		7-14-74
9. Electric (Magnesyn) gyro compass	3	
Needle precessed at 20 deg per 12 miles (with large magnetic compass variations)		6- 4-55
Revolved and pointed at AAO as it circled the Cessna 170		8- -59
All 3 systems pointed in different directions for 3-4 minutes		3-12-77
10. Military weapon system (Sidewinder Missile) control panel ceased functioning	1	9-19-76
11. Transponder stopped working	1	11-18-77
Total Cases =	28	

For a relatively small area source of E-M radiation its strength decreases inversely with the square of the distance to the source as illustrated in Figure 7. Thus, if the aircraft is 2D units from the AAO the radiation strength at that location is one-fourth of what it would be at distance D. By increasing the distance to 3D the strength decreases to one-sixteenth, etc. The grey curved line shows that as D decreases E-M strength increases toward infinity very very rapidly. What are some consequences of

this fact with regard to these particular sightings? If the AAO radiates a constant field strength and it approaches the aircraft we would expect increasingly more powerful effects on aircraft systems and vice versa. In fact, there were 14 different E-M effects noted for the A motion category (Approached the Aircraft) and only two for motion category T (Accelerated Away from the Aircraft). The H (Hovered nearby) category had 10 E-M effects and P (Paced the Aircraft) had 16 E-M effects. These and other findings are consistent with the expected effects of E-M radiation upon physical systems and also show that the phenomena are not optical in nature but possess some form of electromagnetic radiation.

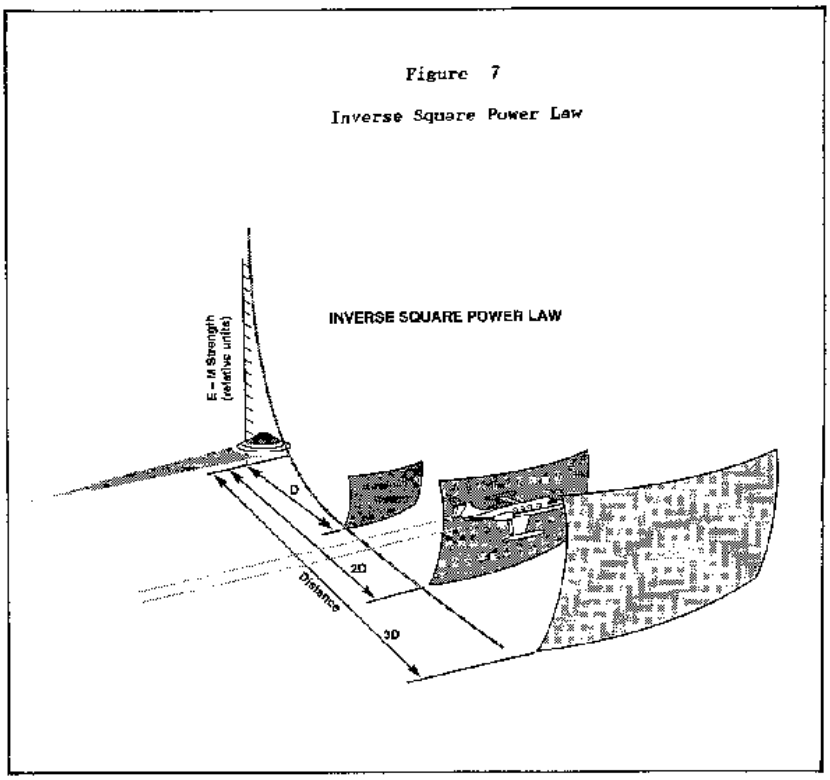

Figure7
92-figure7L.gif

McCampbell (1973; pg. 51) reviewed published E-M cases involving UFO and stated, ". . . the (automobile) engines, radios, and lights appear to be roughly equal in their sensitivity to UFOs . . the mechanism of UFO interference is something other than low frequency, electromagnetic radiation." Yet this assessment may be premature as shown by the following data.

2. **Magnetically Actuated Systems**. The magnetic compass is a navigational system almost as old as mankind, indeed its basic design has not changed in thousands of years. There are many documented instances of spinning compasses on both ships and aircraft (Berlitz, 1977; pg. 43) including the famous case of the disappearance of Flight 19 on December 5, 1945 and another on March 25, 1945 when a U.S. Navy PBM pilot reported that his ".... radio compass started to circle. The magnetic compass was also spinning. Our radio became useless because of static. All our flight instruments went out." However, these cases did not (apparently) involve the simultaneous presence of anomalous aerial objects nearby the aircraft arid so are not included here.

Clark and Corbitt (1942) point out that deflection of a magnetic (compass) needle is produced by two primary causes: (1) proximity of ferro-magnetic metals inside the aircraft structure, and/or (2) the presence of varying electromagnetic fields in the area of the compass produced by the flow of relatively large electric currents in the region of the cockpit. Since great effort is taken to remove ferro-magnetic metals inside aircraft compass deflections in flight must be due to an imposed magnetic field(s). It is the DC or AC nature and strength of such fields that are of primary

importance.

Thanks to experimental work by McCampbell (1991) some of the dynamic parameters of the relationship between time-varying strength of a magnetic field and spin rate of various types of compasses are known. He used both a liquid filled and a "card or rose movement" compass and a powerful nickle steel permanent bar magnet (1" x 0.63" x 4.75") He brought the magnet's north end radially toward and away from each compass (normal to the needle) at different approach/recede "pumping" rates as well as different closest approach distances. He found that: (1) Spinning, i.e., complete needle rotation, began (and continued) at about 0.07 gauss (peak power) at 33 RPM rotation rate. This field strength is about 35 percent of the earth's magnetic field strength of approximately 0.2 gauss, (2) Increasing the peak field strength drives the compasses to a relatively high RPM as long as the pulses are kept in proper synchronization. If field strength is greater than some undetermined value the needle begins to move erratically. (3) The liquid filled compass exhibited spin rates ranging from 4 to 20 RPM. This corresponds to pulses of 0.13 to 0.33 pulses per second (i.e., 7.7 to 3.0 seconds per pulse. (4) The card compass exhibited higher spin rates ranging from 33 to 126 RPM. (5) Field strength had to be about two to three times greater for the liquid filled compass than for the card compass to achieve the same rate of spin due to viscous friction effects, (6) The relationship between spin rate and closest approach distance of the magnet to the compass is approximately linear (between 8 - 13 cm).

It is interesting to calculate the strength of the magnetic field that would exist D distance (feet) from the aircraft at its source if its field strength was 0.07 gauss at the aircraft. Table 10 provides several calculated values.

Table 10

Calculated Magnetic Field Strength With Distance from an Aircraft (Assumes 0.07 gauss at aircraft and no effective shielding)

Distance (Ft.)	g (gauss)
100	700
250	4,375
500	17,500
1,000	70,000
5,280 (st. mile)	1,951,488
2 st. miles	7,805,952

If AAO possess magnetic fields of millions of gauss or more then we can also expect to see various optical effects such as Faraday rings in the atmosphere surrounding the AAO (when viewed through polarizing lenses). Such reports have been made by observers from the ground and so cannot be treated here.

There were seven cases of the total (10.7%) that involved the magnetic and/or gyro-compass(es) on the aircraft. These cases are listed in Table 11.

Table 11

E-M Effects Involving Magnetic and/or Gyro Compasses

	Cases	Date
1. Single magnetic compass deviations	3	
Rotated at several rpm		2- 2-73
Rotated clockwise at about 4 rpm		10-18-73
Rotated as AAO passed by		5-26-79
2. Multiple magnetic compass deviations	1	
Each disturbed differently when AO nearby		12- -66
3. Multiple gyro compass deviations	1	
All three pointed in different directions for 3-4 minutes while AAO was pacing the aircraft		3-12-77
4. Magnetic and Gyro compass deviations	2	
Precessed at 20 deg. per 12 miles		6- 4-58
Revolved and pointed at AAO as it circled the Cessna model 170		8- -58
Total =	7	

The 2-2-73 and 10-18-73 cases appear consistent with a magnetic field of about 0.02 gauss that is pumping the needle at something less than 0.3 pulses per second (18 pulses per minute). The 5-26-79 and 8-58 cases both are consistent with a DC magnetic field. The 3-12-77 case is very puzzling because it implies both a DC magnetic field effect and an inertial effect.

Modern aircraft have the compass sensors mounted remotely from the cockpit display, usually on the external skin of the airplane. This is done to help avoid artifacts that can be produced through electrostatic charge accumulation in flight, lightning strikes, etc. Based upon the above data it is likely that the emitting field(s) of AAO are, in some cases, of a magnetic character, either AC, DC, or both.

3. **Engine Malfunction.** There was a total of nine cases (16%) in which reciprocating aircraft engines either stopped completely in flight or lost power. These events are listed in Table 12.

Table 12

E-M Effects Involving Aircraft Engine Malfunction

	Cases	Date
Single Engine Reciprocating Engine stopped	1	3- -71
One of Multiple Reciprocating Engine stopped	2	7-23-47
		1- 3-63
Two Reciprocating Engines stopped	2	8-28-45
AAO within 800m, restarted as it departed		9-29-67
Reciprocating Engine Malfunction	4	6- -49
Four cylinders involved, all plugs burnt out		7-24-49
Single engine (Piper Cub) increased RPM		8-31-58
Engine ran "rough"		5-26-79
Turbojet Engine Malfunction	1	8-14-56
Total =	10	

Aircraft engines are known to fail in flight more often than many people realize so that such instances must be shown to be extraordinary and clearly unrelated to more common explanations as fuel starvation. All of the events cited above took place when one or more aerial objects were in close (visual) proximity to the aircraft Still it is possible that the pilot was so fascinated by the

unexpected phenomenon that he forgot to switch fuel tanks or to take other required action.

An operating engine can be disrupted either by air, spark, and/or fuel supply. However, as long as the engine and aircraft are moving through the air, the carburetion system is functioning correctly, and the pistons are pumping up and down, the flow of fuel and air are drawn into the cylinders regardless of whether the engine is delivering power. "The only way to stop a running engine, therefore, is to disrupt the electrical system." (McCampbell, 1973, pg. 51) What can interrupt an electrical system?

It is known that a strong magnetic DC field by itself is not likely to cause key electrical system components of a reciprocating engine to fail. A national U.S. testing laboratory used an electromagnetic which could produce a field strength up to 10 kilogauss (kg) across an area nine inches in diameter. They found insignificant effects on a spark plug at atmospheric pressure (gap = 0.025") oriented both coaxially and normal to the field. A tungsten filament light bulb did not change in brightness or current (resistance) for field strengths up to 20 kg. In addition, the voltage of a lead acid battery (with resistive load of 1 amp current) oriented with the magnetic field parallel to the plates decreased in voltage from 12.3 at zero field to 12.0 volts at 20 kg. Gillutor (1968) also reported that a typical steel-encased coil placed in a 20 kg magnetic field interrupted the spark only occasionally. When the coil was encased in an aluminum container the spark plug (attached to the coil) started missing at about 4 kg and ceased altogether at 17 kg. Since aircraft reciprocating engines use a (rotating electromagnet) magneto system and not a coil and distributor electrical system one would **not** expect the above cited result to apply directly.

High frequency E-M radiation could affect the electrical system of an automobile by inducing high voltage surges in the secondary windings of the coil leading to incorrect timing of the ignition system.

4. **Hydraulic Aircraft Systems**. It is interesting to note that no incidences of malfunction or failure of aircraft hydraulic systems were reported due to AAO proximity. The nature of fluid dynamics would probably preclude most hydraulic system failures (brakes, aileron control, etc.) from occurring due to imposed E-M radiation.

DISCUSSION

Normalizing the Database. Given sufficient statistical data concerning the number of aircraft flying at any hour of the day, day of the week, or in specific geographic locales, etc., it is possible to normalize data such as these. Unfortunately, it was not possible to achieve such normalization. This was done by Rodeghier (1988) for surface vehicles for time of day effects; the surprising result found was that the peak hour for E-M effects to occur was between 0300 and 0400 local time with a secondary peak from 0100 to 0200 local time! This is important, according to Rodeghier, in that the hourly distribution of thunderstorms over the United States is highly skewed toward the late afternoon hours. His data apparently were not related to thunder- storms. Unfortunately, such statistical data is almost impossible to obtain for military and private type airplanes and very difficult to interpret for commercial airplanes. Given sufficient manpower and computer power it would be possible to normalize part of the present data.

Concerning surface vehicle ignition interference cases Johnson's (1988) analyses suggested that ignition failure is **not** the result of natural causes such as sand, dust, damp weather, etc. as suggested by Sharp (1977) and Menzel and Boyd (1963). Such simple minded explanations do not explain the present aircraft engine interference or failure cases either.

Operator-Caused Effect. We cannot overlook the possibility that in some cases the pilots themselves caused the effects that were reported but were not aware of their behavior or forgot about it in the confusion of the encounter due to his or her emotional state. This explanation is not tenable in those cases where there are multiple pilots present who cross-check each other and who

can calm one another in emotional conditions.

Piezo-electric Effects. Persinger has postulated in many papers that intense E-M field generated by the stress of tectonic plate movements in the Earth's crust can produce plasmoid luminous balls of varying color, size, and brief duration (typically under 15-20 seconds) (1976, 1979). Klass (1968) has proposed a somewhat less precise but similar hypothesis for the UFO phenomena involving ball lightning. Both gentlemen have failed to explain how such a phenomenon can travel high into the atmosphere (as is reported by many airplane pilots) or how the contained plasma can sustain itself for periods of time as long as those reported here (conservatively up to 20 minutes). And, as Rodeghier (1988) has stated, ". . . there is no a priori reason to expect anything but a random distribution of piezo-electric events by hour of the day. in direct contrast with the bimodal distribution shown in Figure 1. Until such explanations are forthcoming and are supported by field observations and laboratory research the piezo-electric effect should be placed near the bottom of any list of credible explanations of the present high altitude E-M events.

Plasma Sheath Interference. A plasma is a particular region within a gas discharge containing very nearly equal number of positive and negative ions. Apparently, its neutral charge affords it some stability of character over time. It's form is thought to result from magnetic fields which establish a reasonably defined interface with surrounding air. It is well known that radio transmission can be disrupted or blocked altogether by atmospheric ionization. This occurred during the re-entry of manned spacecraft into the Earth's atmosphere as the plasma sheath surrounding the space capsule blocked radio communication. The charged particles of a natural plasma move at random and would be expected to produce an apparently random interference pattern known as white noise or static in radio and television transmissions. Klass (1968; pg. 95) has suggested that most UFO phenomena are explained by natural atmospheric plasmas without ever considering the possibility that such plasmas are not a natural phenomenon at all but a by-product of the UFO phenomenon itself! Of course a contained ball of plasma could not reach beneath the hood of a car without being dissipated by the metal hood of an automobile or the engine cowling of an airplane, or could it? There are numerous verified accounts of ball lightning contacting a commercial aircraft in flight and somehow finding its way inside the passenger and crew compartment(s), sometimes to exit silently at some point or other times to explode with a loud clap. How the plasma enters the fully enclosed volume has never been explained but it does! It is a scientific fact that a magnetic field will be generated by the electrically charged particles within a plasma.

Power Interruption and AAO. This topic has received some attention over the years mainly because of its broad social implications. Smith (pg. 272, 1980) compared the number of UFO reports in the U.S. Air Force Project Blue Book project and the number of U.S. Federal Power Commission reports of power failure for the period 1954 through 1969. He noted that the two curves "are in phase and track each other from year to year. Out of phase conditions do exist, however, for the years of 1956 and 1967."

SUMMARY AND CONCLUSIONS

This paper has reviewed some of the details surrounding 56 E-M cases reported by pilots in flight. In the great majority of these cases the cockpit instruments, cabin lights, weapon systems, radar contact, engine(s), and other electromechanical devices on board each evidenced behavior consistent with known laws of physics. In only a few (e.g., 6-4-55; 8-31-58; 3-12-77) were there truly anomalous effects from the point of view of modern-day physics. These data deserve further scrutiny

Date	City	State or Country	Cat	Code	Rating	BB	NC flag	LC	Description
18970412	Girard (near Green Ridge)	IL	6						6:00 p.m. A large crowd of miners saw an unknown object land 3 km north of Green Ridge and 4 km south of Girard. The night operator of the Chicago-and-Alton Railroad, Paul McCramer, stated that he came sufficiently close to the craft to see a man emerge from it to repair the machinery. Traces were found over a large area. The object itself was elongated like a ship with a roof and a double canopy.
19090518	Caerphilly, Wales	UK	6						11:00 p.m. Mr. Lethbridge was walking along a road near the mountains when he saw on the grass a large tubelike machine. Aboard were two men wearing furs and talking excitedly in a language the witness could not understand. The grass was found depressed at the site after the object had flown off.
220222	Hubbell	NE	6						5:00 a.m. William C. Lamb was following strange tracks when he heard a high-pitched sound and saw a circular object intercepting starlight. It became brilliantly lighted and landed in a hollow. Soon afterword, a creature over 2.4 m tall was seen flying from the direction where the object had landed. It left tracks in the snow, which Lamb followed without results.
4206-Late	Cussey-sur-l'Ognon, Doubs	France	6						Several witnesses heard a motor-like sound and saw a blue-gray oval object with a dome on top hovering just above the ground in a wooded area. (Ref. 3; Michel Bougard, Des Soucoupes Volantes aux OVNI, 1977.)
421000	Radway Green, Cheshire	UK	6						In the evening two witnesses saw an elongated object with a dome on top and lights at either end descend toward the ground. At the apparent landing site a circular burned area and footprints were found. (Ref. 3; Bougard, 1977.)
430900	Oncativo	Argentina	6						4:00 a.m. Navarro Ocampo, driving between Rosario and Cordoba, saw a large, saucer-shaped object on the ground 500 m to the left of the road. It glowed with a bluish-green light, made a whistling sound, rose to 100 m altitude, then left at fantastic speed. A strange metal block is said to have been found at the spot. (Magonia #50, GEPA Dec., 68)
431200	Oslo	Norway	6						At 10:30 p.m. four women in a car saw an orange bell-shaped object ascending. Three automobiles in the vicinity experienced EM effects and the engines stalled. A 1.5-meter diameter area of melted snow was found on the ground. (Ref. 3; Australian Flying Saucer Review, No. 7, 1967; cited by Project 1947.)
460500	Angelholm	Sweden	6						At twilight while walking home, a prominent industrialist saw a light in the woods and went to investigate. He saw a disc with dome and oval windows on the ground. Around it were about 11 beings with transparent helmets and uniform-like clothing apparently working on the craft. Later he saw the craft take off emitting bright red light, then speed away. Burned grass and other trace marks were found at the site. (Ref. 3; Flying Saucer Review, March-April 1972.)
470621	Maury Island	WA	6						Maury Island Incident
470703	Roswell	NM	6				NC		Famous alleged UFO crash

470703	St. Maries (near)	ID	6						landing, seen by a family of ten in Northern Idaho, of eight huge objects (Bloecher)
470800	Danforth	IL	6						Specimens of an alleged “Flying Saucer” were brought to AMC by Col. H. M. McCoy
520818	West Palm Beach (near)	FL	6						August 18, 1852; near West Palm Beach, FL. "Desvergers Case", "Scoutmaster Case".
530319	New Haven	CT	6						A small round object -- flaming like red-hot iron -- plunged from the sky
541022	Marysville	OH	6						School principal, teacher, 60 students saw silver cigar-shaped UFO with "portholes" hover over school, then speed away; "angel's hair" fell. [UFOE, VIII]
570914	Ubatuba	Brazil	6						UFO explodes and leaves fragments
571106	Montville	OH	6	T	5	BBU			Olden Moore Case / Close Encounter /
600524	Ocumare del Tuy	Venezuela	6						Several doctors, a topographer and policemen saw three UFOs, in-line formation, which landed in a heavily wooded area on a hilltop; diamond-shaped scorched marking found at landing site. [NICAP UFOE, VIII]
600928	Sheppard AFB, Wichita Falls	TX	6						OSI document says crash reported and mention of "Moon Dust", asks ATIC to come to the scene.
610110	Wichita Falls	TX	6	T	5	BBU			A/c Sees Object Maneuver and Land
631021	Trancas	Arg	6						Disc, EM, occupants, numerous traces
640505	Comstock	MN	6						Object landed in field, physical traces (UFOE Section VII).
640629	Lavonia (near)	GA	6						Vehicle encounter, top-shaped UFO, strange effects
6406Late	Rome	IN	6						Mysterious Markings in Field Baffle Perry County Farm Family. A five foot circular burned circle, with three intensely burned circles arranged in a triangular shape as though made by table legs were discovered in the alfalfa field.
640716	Conklin	NY	6						Humanoid with dark suit and helmet, climbed on top of craft. Physical traces found at site (UFOE Section XII).
650524	Mackay	AU	6						Circular UFO with three legs on or near the ground, trees illuminated. Departed rapidly with buzzing sound. Circular ring impression found at site (UFOE II, Section VII).
650819	Cherry Creek	NY	6	T	5	9806			Cherry Creek (Butcher) Trace Case
650916	Silverton	S. Africa	6						Multiple police, landing, traces. (#214)
660119	Tully	AU	6						January 19, 1966; Tully, Australia. Daylight sighting, single witness, HS (#223).
660206	Madrid	Spain	6						8:00 p.m. LT. Several civilians and soldiers saw a glowing orange disc with three legs landing and taking off again. Rectangular imprints of the legs (15 cm x 30 cm) and scorch marks were found at the site. Electromagnetic (EM) effects occurred in the area at the time of the sighting. (Ballester-Olmos, 1976, p. 9; Flying Saucer Review, 12:3, 1966:28-31, Flying Saucer Review, 15:5, 1969:3-4.)

660225	Quipapa	Brazil	6						10:15 p.m. LT. Two young female factory workers while walking home saw lights in the road, then saw that it was a large disc with two bright lights (body lights) and three small beings about the size of 9-year-old children standing alongside, along with one being over 6 feet tall. The object rose, then landed in a new location. The girls ran home with the object following. It circled the area near their house, then flew away. No sound was heard. One of the girls suffered unspecified "effects" for a period of time. Grass was found depressed (imprints) at the landing spot. (Phillips, 1975. p. 40; from Flying Saucer Review, March 1971 .)
660324	Cook	MN	6						6:50 p.m. CST. A trapper and guide saw an oval object with glass dome on the front approach angling downward, flashing lights visible around its center, and emitting a loud generator-like humming sound. The object was rotating clockwise around a horizontal axis. It appeared to land in the distance. Next day a large melted oval area about 35 feet by 100 feet and apparent landing gear or skid marks (physical traces) were found in the snow at the landing site. (NICAP report.)
660329	Hampton (area)	NH	6						Box like object landed in woods
660423	Yorktown	IA	6						2:10 a.m. CDT. A farm family saw a cigar-shaped object with lights at each end illuminating the ground with red light. The object had two blue lights extending above the left end, a red light at the right end, and an amber glow emanating from its underside. A loud roaring sound was heard as it settled onto the ground. Then they heard loud crackling sounds like gunshots, and their cattle bolted. An odor of ozone was in the air. Later they found imprints in the field where the object had landed, apparently caused by the undercarriage. (Keyhoe & Lore, 1969a, p. 22.)
660500	Whiteman AFB	MO	6						Multi witness, daylight landing, (#234) occupants
660619	Mt. Mitchell	NC	6						12:05 a.m. EDT. A group of Boy Scouts while camping out, saw three red pulsating lights in a triangular pattern approaching (body lights), then hovering from about midnight to 5:00 am. At sunrise the object lifted up, appearing red and bell-shaped through binoculars, Six smaller objects were hovering nearby on either side of the larger object, changing formations, and then the group disappeared behind a mountain. When the Scouts started to explore in the direction of the objects, about 60 feet from their camp they discovered trees with broken branches and some crushed undergrowth, plus three holes in the ground forming an equilateral triangle (physical traces). (Report to Center for UFO Studies.)
660627	Cistella	Spain	6						4:00 a.m. LT. A farm woman and farm hands saw a large disc-shaped object with bright green, red, yellow and blue body lights descend behind some woods about 500 meters away. A few minutes later two cylindrical objects also with body lights appeared, and the disc reappeared, taking up position between the two cylinders, which closed in on the disc, turned, and all three as a unit shot up at terrific speed and disappeared in less than a second.

660815	Wood Green, London	UK	6						2:00 a.m. LT. A couple saw an intensely bright glowing disc approach and hover about 1 50 yards from their house above an old tree. Some apparent damage to foliage, circular holes in the ground, and a large depression with flattened grass were found beneath the area where the object had hovered. (Flying Saucer Review, Vol. 12, No. 6, Nov.-Dec. 1966, pp. 4-5.)
661122	Roaring River	MO	6						Multiple witness, daylight, (#253) photos
670125	South Ashburnham	MA	6						Betty Andreassen abduction case. Craft described as oval with a rim around its circumference, and resting on three legs. (Hall, 2001, pp. 529-30, from Fowler, 1979, 1982, 1990, 1995, section XIII).
670210-11	Cincinnati	OH	6						11:45 p.m. EST. A number of independent sightings were reported of a reddish, glowing cigar- or football-shaped object either hovering or moving slowly overhead. At about 1:45 a.m. the following morning, in Milford (eastern suburb of Cincinnati), a railroad employee and companion were driving when they noticed a white glowing light in the woods. (McDonald, 1967, Case 8, reprinted in Vaughan, 1995, p. 206; Keyhoe and Lore, 1969a, p. 21, and 1969b, p. 54; Ridge, 1994, p. 21.)
670214	Hannon, Ontario	CA	6						Time not reported. A saucer-shaped object (disc) with blinking red lights (body lights) forced a car off the road. It returned and hovered in view of many witnesses, landing in a nearby field. Marks were found in the snow (physical traces) at the landing spot next day. (Letter dated 2/23/67 in NICAP files.)
670320	Tuscumbia	MO	6						Daylight landing, (#1014), occupants, close approach
670321	New Baden	IL	6						Multiple witnesses, landing, (#268).
670426	Kitchener, Ontario	CAN	6						9:30 p.m. EDT. A witness saw a small cylinder, estimated 3 feet in diameter and 5 feet tall, with flashing lights. The object landed, deploying six legs when it was about 4 feet from the ground. A whirring sound during landing stopped once the object was at rest. Ground impressions (physical traces) were found at the landing site. (NICAP report form and unidentified newspaper clipping dated 9/8/67 in NICAP files.)
670506	Schirmeck, Bas-Rhein	Germany	6						7:00 p.m. LT. Seven lenticular (disc-shaped) black objects, aligned diagonally, each with a diameter estimated as 50 feet or more, were seen above a grove of trees about 2 km away. Each had a "smoky halo" around it. The objects suddenly vanished, then reappeared and vanished again, leaving traces in the forest. Truncated light beams ("solid light") were emitted from three of the objects, one white and two greenish. (Haines, 1994, pp. 91-92, from UNICAT catalogue #403.)
670507	Edmonton, Alberta	CAN	6						2:00 a.m. MST. A 14-year-old boy and four others saw a spherical object with spinning top and bottom and with red and green lights (body lights) which they followed and observed for 4 hours. Black streaks were found on the charred road surface (physical traces). (Edmonton Journal, 5/8/67, copy in Donald E. Keyhoe Archives files; L/.F.O. Investigator, Vol. IV, No. 1, May-June 1967, p. 3; APRO Bulletin, May-June 1967, p. 7; Phillips, 1975, p. 48.)

670531	Beausejour, Manitoba	CAN	6						11:30 p.m. CDT. A woman reported a luminous red, saucer-shaped object with blue light that approached from the south and hovered about 125 yards away. The object landed and left physical traces, including a burned area and radioactive soil. (Winnipeg Free Press, Manitoba, 7/21/67, copy in NICAP files; APRO Bulletin, May-June 1967, p. 2.)
670601	Santa Monico, Madrid	Spain	6						Time not reported. A yellow-orange disc with windows and three less (tripod landing gear) landed , leaving three holes and burned grass (physical traces) at the landing site. (BallesterOlmos, 1976, p. 11.)
670613	Caledonia, Ontario	CAN	6						2:30 a.m. Three 3 to 4' tall beings, light colored clothing, helmets, moved around beneath cigar-shaped craft with windows. Physical traces found at site. (Hall, 1964-1967, pages 474-482, Vol. II, The UFO Evidence)
670615	Caledonia, Ontario	CAN	6						2:35 a.m. EDT. Two people saw two stationary objects, one disc-shaped and the other cigar-shaped, on or near the ground in the vicinity of a factory for about 20 minutes. Three occupants less than 4 feet tall, in light colored uniforms, and wearing "helmets" with four lights, were observed scurrying around outside the cigar. Physical traces found at the site included a burned area, disturbed grass, and an oily substance. (Cuneo letter, 6/19/67, NICAP files; APRO Bulletin, Nov. - Dec. 1967, p. 4.)
670618	Falcon Lake	CAN	6						Evening. A family crossing the lake by boat saw a shiny, metallic-appearing oval object with a slight rise on top. Trees with wilted leaves on top were later noted (physical effects). (Bondarchuk, 1979, p. 31-34.)
670621	Mechanicsville	VA	6						3:00 a.m. EDT. A woman saw a large lighted object with a rounded bottom and domed top that rose straight up from the woods into the sky with a roar like a jet. Trees in the woods reportedly were bent and broken (physical traces), all at the same height. (Heath letter 6/26/67, NICAP files.)
670806	San Bernadino	Venezuela	6						Approx. 2:00 a.m. LT. Two sleeping witnesses were awakened by a small being with a large head (humanoid) wearing a "rubber suit." The being jumped out a window toward an object outside that had blinding, multicolored lights. Investigators found scrape marks and footprints (physical traces) at the site. (El Universal, 8/8/67, and El Mundo, 8/9/67, copies in NICAP files.)
670823	Joyceville, Ontario	CAN	6						4:00 a.m. EDT. A man drove down a side road to investigate a green light he saw in a field. His headlights illuminated a large, metallic-appearing disc on or near the ground. It was shaped like an inverted bowl and had three legs. Burn marks and impressions (physical traces) were found at the site. (Hall, 2001, p. 480; MUFON UFO Journal, August 1987, p. 19.)
670823	Hamilton County	IN	6						Landing report. Source and details unknown.
670905	Port Townsend	WA	6						2:00 a.m. PDT. Four witnesses saw a white, dome-shaped object come from behind a hill and appear to land on a golf course. A burned ring (physical traces) was found on the golf course next day. (Port Townsend Leader, 9/7/67, copy in NICAP files.)

670917	Belo Horizonte, Minas Gerais State	Brazil	6						Time not given. Two witnesses reported that a saucer with portholes landed on a soccer field. Physical traces were left by the object. (Baltimore Morning Sun, Maryland, 9/25/67, copy in NICAP files.)
671004	Shag Harbour, Nova Scotia	CAN	6						Evening, ADT. From early evening until 11:30 pm, numerous independent witnesses observed unexplained aerial activity. Near Sambro at 9:00 pm, the captain and crew of a fishing boat saw four brilliant red lights in a box formation that appeared to be on or just above the water. (Ledger and Styles, 2001, pp. 14-17, 21-44.)
680300	Berezovsky (near)	Russia	6						Alleged crash/retrieval on the web, and earlier shown on the History Channel. Shows footage of the alleged crashed UFO near Berezovsky (Sverdlovsk region) in 1968 and related alleged KGB documents.
680700	Southlands	TN	6						Crash/retrieval report by one witness. (Source: RUEGG, unknown)
680812	Mercedes	Argentina	6						8:00 p.m. A woman staying by herself at a house on the outskirts of Mercedes heard a buzzing sound and her dogs began barking. The next day several ground traces were found in the same area where the objects were seen. (Albert S. Rosales, Humanoid Contact Database 1968, case #6, citing Richard Heiden, quoting R. Banchs).
680920	Wichita Falls	TX	6						Police officer saw a huge ball of fire falling directly downward. Other officers said the ball appeared to be 20' in diameter. NARA document mentions UFO "crash" and references "Moon Dust".
690713	Van Horne	IA	6						Multiple witnesses, HS traces. (#390)
700830	Itatiaia	Brazil	6						2145, close approach, human effects, traces. (#441)
710516	Chesterton	IN	6						9:30 p.m. Four witnesses observed an object after power failed in their house. Saturn type UFO, high frequency sound, 20 Mins. House size silver ball illuminated brilliant red, green, blue,and white lights around it on rim. Moved at tractor speed, hovered over hog farmyard setting off pandamonium in dogs, chickens, pigs, and parrott. (Ted Phillips)
711102	Delphos	KS	6						(#494) confirming witnesses
720626	Fort Beufort	S. Africa	6						Daylight, multi witness, (#526) long duration
720817	Norton Sound	AK	6						Multi witness, long duration (#533) landing
720914	Houston	MO	6						Multi witness, two events, animal (#537), EM effects
730313	Salta Province	Arg	6						Jorge Roberto Herrera humanoid encounter, landing with physical traces
730628	Columbia	MO	6						Multi witness, (#585) human reaction, EM effects
730930	Columbus	OH	6						9:30 p.m. Franklin County man found landing site of object he saw hovering near his home.
740228	Hirson (Aisne)	France	6						5:30 a.m. The witness was riding his motorcycle to work, when suddenly he found himself face to face with two humanoid beings and having no memory of having stopped the motorcycle. It was still dark at this hour. In an adjacent field he saw a dark circular object. Physical traces were found at the landing site.
740901	Langenburg, Saskatchewan	CAN	6						Close approach, (#746) daylight
75Jan-Mar	Algeria	Africa	6						The UFOs in this report were seen by multiple witnesses. The objects landed and took off. They were also spotted on radar and seen visually simultaneously. Message sent to Henry Kissinger, from the American embassy in Algiers, Algeria.

750210	Annandale	NY	6						7:00 p.m. Two 15-year-old teenagers saw a low-level, 20-meter diameter disc for ten minutes, then watched it shrink away to nothing. At the site there were snapped tree branches and scorched earth. (Sources: CUFOS files, report dated February 27, 1975; NICAP UFO Investigator, April 1975; Skylook, December 1975, p. 16; Margaret Sachs, Celestial Passengers, p. 108).
750612	Big Chimney	WV	6						Shortly before 10:00 p.m. A diamond shaped object landed on a gravel road in a mountainous area. It was witnessed by four members of the Crichfield family. Four landing gear imprints were found at the site. (Sources: Center for UFO Studies case files, letter dated August 3, 1975; Larry Hatch, U computer database, citing Alan Landsburg, In Search of Extraterrestrials, p. 8)
750706	Mount Pleasant, Ontario	CAN	6						5:00 p.m. A shiny metallic domed disc was seen in a tobacco field. A thirty-foot diameter area of plants was flattened, the tobacco plants were wilted and burned, and an oily residue was found. (Sources: NICAP UFO Investigator, October 1975; Canadian UFO Report, Summer 1976, p. 1; Center for UFO Studies, on-site investigation, report dated September 13, 1975; Richard Hall, The UFO Evidence, Volume II: A Thirty-Year Report, pp. 122 & 264).
751224	Cotes-du-Nord	France	6						10:00 p.m. Power circuit breakers were tripped four times when a glowing ball of light came down near the ground in Ploubazlanec, Cotes-du-Nord, France. A 0.2 meter area of burnt grass was found at the site were it apparently touched down. (Source: Jean-F. Boedec, Les OVNI en Bretagne: Anatomie d'un Phenomene, p. 75).
770307	Gatchelville	PA	6						7:30 PM. Nine independent witnesses watched a red ball of light maneuver against the wind. Holes were found burnt in the ground at a possible landing site. (Sources: Allan Hendry, The UFO Handbook, p. 120; Larry Hatch, U computer database, case 11471).
770323	Farmland	IN	6						5:40 AM. Snowy morning. Blue lights were ahead which lady thought was a snow plough. One blinking light of unknown shape flew across in; front of her then suddenly 6 to 12 blue lights took up position 2 to 3 feet in front of her slowly traveling car. Next day at spot in road her car radio went dead. (Worley files)
770408	Cedar Springs	MI	6						2:00 AM. A domed disc-shaped object flew around two witnesses, hovering and flashing over some nearby trees. Ring ground marks were found on the ground. (Source: CUFOS files, report dated April 10, 1977).
770419	Little Haven, Pembrokeshire	Wales	6						2:00 AM. The radio of hotel owner Rosa Gremville suddenly went dead. Moments later she heard a loud humming noise outside and looking out she was dazzled by a "huge moon lighting up the area, moving about like a seesaw." It descended and landed in a field 100 yards behind the hotel. Burn marks were found on the ground at the site the next day. (Sources: David F. Webb and Ted Bloecher, HUMCAT: Catalogue of Humanoid Reports, case 1977-18; Randall Jones Pugh, FSR, August 1977, p. 6 for BUFORA).

771025	Asbygda Ringerike	Norway	6						5:30 PM. Three witnesses, including two deaf 14 year olds, Johny Myhr and Frank Sverre Mandt, sighted a disc-shaped object some ten meters in diameter that hovered and then descended behind some bushes. Tracks were later found in the newly plowed field.
771213	Leitchville, Victoria	AU	6						An orange-red, disc-shaped object descended over a paddock. It then emitted three smaller objects that operated independently. One of these zigzagged, abruptly shot up to higher elevation, then descended again. The UFOs appeared to signal back and forth. Soil and grass samples collected from a circle of burnt grass found on the ground reveal the burn marks were caused by an electrical discharge.
780604	Bellaria	Italy	6						Motorists observed flashing lights in the woods, stopped to investigate and saw a bright red, revolving hemispherical object about 10 meters above the ground. It was approximately 10-12 meters in diameter. Next morning physical traces including a deep imprint were found at the site and separate witnesses were located.
780708	Lempdes, Puy-de-Dome	France	6						A motorist saw a sharp white gleam of light some 300 meters ahead on the road. As he came to the curve, he saw that the gleam came from a mass approximately 5 meters in height. He can not observe the base of the object, which is below the side of the road. The top was rounded in the form of a dome, surmounted by a white light. As he drove by he saw through a transparent wall in the UFO numerous human like figures wearing helmets and tight-fitting suits. Ground traces were found at the site.
780708	Katta-Kurgan	Uzbekistan	6						An 80 meter long ovoid object flew over toward the southeast, then landed in a vineyard at 11:45 p.m. Ground marks were later found on the ground, and the vegetation (grape vines) were effected.
780711	Can Cifre, Ibiza	Spain	6						Two young boys were playing in a tree and heard a loud noise coming from the nearby woods. They were confronted by a strange robot-like being. As they ran to town they were chased by a bright blue light most of the way. Strange tracks were later found at the site of the encounter.
780717	Castanheira de Pera	Portugal	6						A one-meter diameter sphere was seen spinning 1.5 meters above the ground. At the site witnesses found scorched earth and burnt rocks.
780902	San Michele	Italy	6						A man heard a hissing sound and saw a metallic-looking cigar-shaped object about 10 meters long rising from a maize field. An area about 3 x 7 meters was found in the field where plants were bent and dehydrated.
780925	Greenfield	IN	6						Three woman observed an object coming down from the sky into the field. Dog barked. UFO was oblong, very, very huge with a kind of greenish-gray color. It had three lights, one red and two white. No sound and it moved flying sideways behind the barn and then took off flying frontways. 140' imprint left in soybean field.
781008	Jenkins	MO	6						Multiple witnesses, daylight, two objects, (#1320).

781215	Catania	Italy	6						Two young boys were playing in a yard on the island of Sicily, near a large TV antenna. The sky darkened and then a large disc-shaped craft approached and tilted at an angle, just above the TV antenna. A bright beam of light shot out of the opening and a strange, 1.5 meter tall monster descended within the beam. The being was described as "ugly" with two large eyes and two antenna-like protrusions on its head. A second similar being reportedly descended carrying a "laser" type gun and shot at a rock causing it to burn and explode
790222	Meanwood	UK	6						In Meanwood, near Leeds an eight-foot long ovoid object landed for three minutes. It left behind landing traces. (Source: Timmothy Good, Above Top Secret, p. 72).
790226	Serodino, Santa Fe province	Argentina	6						Ernaldo Camusoni, age 49, was clearing an overgrown field at the entrance to a farm in Serodino late in the evening when everything became illuminated behind him, turning the darkness into day. When he turned around he saw an approaching object land 40 meters away from him. As he approached the object, he saw a strange luminous figure emerge from the rear of the craft. The whole encounter lasted five minutes. Ground traces were found the next day.
790327	Isere	France	6						An oval-shaped or saucer-shaped UFO flew over the Tabouret Reservoir in Isere, France and then landed on the ground, leaving ground marks. A man was seen outside the craft, according to the police report.
790407	Bigand	Argentina	6						Several cars experienced electrical system failures on highway 33 in Bigand, Argentina. Mr. Celotto, a farmer, saw an eight meter wide disc land, and circular ground traces were found later in a soybean field.
790827	Marshall County	MN	6	T	5				Val Johnson Case
790902	Petushka	Russia	6						witness was out picking mushrooms and saw a landed UFO which effected the ground
800706	Bear River, Nova Scotia	CAN	6						A silent, fifteen-meter diameter round object hovered only 500 feet away. A dog hid in fear. A six-meter long indentation was discovered on the ground.
800930	Rosedale, Victoria	AU	6						Object with whistling noise lands on farm
801229	Huffman	TX	6	T	5				Cash/Landrum Case
810108	Trans en Provence	France	6						Object descends onto a nearby hill. Update
810128	Colle Maddalena	Italy	6						A disc was sighted maneuvering over some woods and landing behind some trees in Colle Maddalena, Italy. A burnt circle of grass and some charred tree branches were found at the landing site.
810213	Fuentecen	Spain	6						The witness observed several golden lights on a nearby field. He approached the lights but these suddenly rose up, circled, and landed again, this time closer to his home. At the same time his dogs were going berserk. Later he heard footsteps and his dog attracted him to a "figure" standing by the fence. The figure was a meter and a half tall, square in shape and metallic almost robotic in nature; it lacked a head, arms or feet. A scorched area was found on the ground by government authorities.
810504	Minas Gerais state	Brazil	6						a bright disc landed on the ground in Belo Horizonte, Minas Gerais state, Brazil and then vanished. A witness felt pulled toward the spot. Burnt grass was found at the site.

820720	Vejer de la Frontera, Cadiz	Spain	6						A a local cattleman walked to what he thought was a tanker truck a hundred meters away, but when he got to about 30 meters away from it he saw two huge human-like figures standing in the middle of the road. The beings then walked back to the object as if in slow motion. They entered the object through an open hatch, which took off silently towards the north. Ground traces were reportedly found at the site.
830000	Puebla	MX	6						A handful of mysterious seeds have been delivered to Earth by space aliens
830410	Ross	OH	6						Object lands in field near a house

The Roswell Incident

July 2, 1947
Roswell, New Mexico

April 30, 2009; Updated March 29, 2015
Fran Ridge:
July 2, 1947; Roswell, New Mexico
I have always held that something extremely unusual happened at Roswell, something that was recognized as such by people in the know in July of 1947. I cannot believe for one minute that this was a balloon or cluster of balloons. A five-year-old may have wondered what the alleged balloons were used for, but would not have mistaken the materials, all off-the-shelf items of the day. There is a lot more to the story than I can mention at present, but the NICAP site will provide the reader with all the material and links that are worth mentioning and possible to list at this time.

Category 3 - E-M Cases

Electromagnetic Effects

The NICAP UFO Evidence (1964) listed 106 cases of E-M Effects. Later, CUFOS compiled a list of over 500 incidents. Dr. Richard Haines catalogued 185 involving aircraft, alone. Other Categories, involving Distant Encounters (Cat 1), other Close Encounters (Cat 2), Animal Effects (Cat 4), Medical Effects (Cat 5), Trace Cases (Cat 6), Entities (Cat 7), Photographs (Cat 8), Radar (Cat 9), Radiation (Cat 10), or Sightings From Aircraft (Cat 11), are listed on their appropriate pages at Evidence by Categories. If you find an important E-M case that is NOT listed, please email me at: slk@evansville.net

UFO INTERFERENCE WITH VEHICLES AND SELF-STARTING ENGINES

James M. McCampbell

ABSTRACT

Disruption of automobile engines by UFOs is a familiar phenomenon. Less well known are instances where an engine that had been killed comes back to life again when the UFO departs, that is, the engine restarts itself without assistance from the driver. Twenty- seven such cases are summarized. A key observation by a mechanic whose engine had been stopped by a UFO suggests a mechanism by which self-starting might be understood. Should a non-firing engine come to rest with one cylinder past top-dead-center, it would entrap a suitable mixture of fuel and air to be ignited by the next arriving spark thereby cranking the engine. Such an event might result from collapse of a gaseous discharge across open breaker points in the distributor. If the discharge had been sustained by ionization of the atmospheric gases caused by the UFO, it would collapse shortly after departure of the UFO.

INTRODUCTION

Unidentified flying objects are frequently reported to have exerted some influence upon the physical environment. All of these events are full of technical implications. One category in particular draws attention because of the promise that much scientific knowledge may be gained from it. A large number of UFO sightings have been made at the same time that a vehicle being driven by the witness suffered some sort of malfunction. UFOs appear to exploit a technology in advance of our own. But there is no reason to assume that the mechanisms by which vehicle interferences take place are beyond the capacity of contemporary science. On the contrary, design of internal combustion engines is a sophisticated endeavor. Engineers who design engines or others who understand them should be able to analyze any phenomenon that causes their failure. At least, every prospect encompassed by existing knowledge should be explored before appealing to esoteric theories.

Progress in understanding very complex subjects sometimes proceeds upon recognizing a basic structure, or pattern, that is inherent in the problem. Most students of UFOlogy fully appreciate the variety of details relating to vehicle interferences. But most of them fall conveniently into the following categories:

1. Engine Disruption And Failure. A normally operating engine begins to run roughly and loses power, with accompanying reduction in speed. It may shortly resume normal operation. Either following the disruption, or occurring suddenly, the engine simply stops running altogether.

2. Failure To Restart. Efforts of the operator to start the engine are unavailing in the presence of a UFO. Usually, it can be turned over, but does not catch. After the UFO has departed, however, starting is again normal. In a few instances, permanent damage has been suffered.

3. Self-Starts. Without any assistance from the operator, the engine starts by itself at the time the UFO flies away or very shortly thereafter.

HYPOTHESIS TO BE INVESTIGATED

Scientific progress is frequently achieved by a single hypothesis having a wide range of implications. A number of different suggestions intended to resolve separate elements of the overall

problem, known as ad hoc hypotheses, is an offense to science. They are eventually supplanted by a more comprehensive and useful concept. The hypothesis to be investigated here is that -

> The proximate cause of engine interferences in the above categories is ionization of the atmosphere. (Reference 1) (Ionization is the process by which electrons become detached from their parent atoms, leaving as separate particles the electron itself and the positively charged remnant of the atom that is called an ion.

ENGINE DISRUPTION AND FAILURE

UFOs evidently ionize the atmosphere. Luminous, colored halos sometimes surrounding them must be produced by the recombination of free electrons with ions of the atmospheric gases. (Reference 2) At other times UFOs are reported to be buried inside a dazzling white cloud that is clearly a plasma, a highly dissociated state of electrons and ions. Beyond the luminous boundary one would expect that gases are also being ionized but to a lesser degree. Witnesses repeatedly tell of feeling electricity in the air, hair standing up, prickly sensations, or electrical shocks. Such expressions point directly to electrical phenomena. They are well enough understood, but investigators may have no mental framework into which the message can be fitted, so they may be ignored or forgotten.

Until recently it has been nearly impossible to deal with engine interference cases properly because the mass of data was so widely scattered throughout the literature. It would have required a monumental effort to collect the cases, summarize them, perform statistical analyses, and publish a reference document. But two such documents have now become available. One by the British UFO Research Association (BUFORA) in 1979 (Reference 3) and the other by the Center for UFO Studies (CUFOS) in 1981 (Reference 4). Their respective authors, Geoffrey Falla and Mark Rodeghier, deserve admiration and gratitude for these outstanding contributions. It is now relatively easy to scan the worldwide record of vehicle interferences.

Where was the witness when his engine failed? -- In the driver's seat. What could he see when looking under the hood at a dead engine? -- Nothing. Where was he when attempting to re-start the car? -- Back in the driver's seat. These circumstances contrive to prevent the witness from observing anything significant, except in one crucial case. (Reference 5) Relevant details of that case are extracted from the British summary. As a very bright light approached a car it mimicked several series of flashlight signals. "....The car radio started to be affected and the engine faltered, the interior of the car became very hot, then the engine failed completely. The driver got out of the car, noted that the object was directly overhead and felt a *prickling sensation like small electric shocks*. He lifted the car hood and *asked his wife to try to start the engine*. The engine turned over, but *sparks were seen to jump from the plug leads across the coil to the metal side of the car* and back again. The man was a master mechanic and had never seen such an effect before. As another vehicle approached the *object moved away at high speed. The car engine could then be started immediately...."* (Emphasis supplied by the present author.) It is fortuitous that this event took place at 10 o'clock at night as the sparks may not have been noticed in daylight. So of several hundred cases of engine interference, we have one in which the cause was actually observed. And by a mechanic at that:

What does this mean? Very strong electrical surges of 15,000 to 20,000 volts are delivered to the spark plugs through heavily insulated wires. These wires fan out from the distributor to each plug, lying rather snugly to the engine block and grounded components. In normal operation, rubber insulation plus that provided by spatial separation assures that the electrical surge is delivered to the plugs. The insulating properties of air are impressive. It can sustain an electrical tension without breakdown of about 76,000 volts per inch. For a wire carrying a charge of 15,000 volts only half an

inch from the engine block, the electric field strength would be roughly 30,000 volts per inch; so the margin for preventing the charge from shorting out is not great. Now comes a UFO that ionizes the air. Free electrons in such a strong electrical gradient will be accelerated. They will quickly acquire sufficient speed and kinetic energy to knock electrons off of other atoms. These, in turn, produce grandchildren, etc. The net result is an avalanche of charge as the atmosphere breaks down in a spark. By this method, Geiger counters register the passage of a single ionizing particle. Once the charge has been dissipated to ground, the conducting path heals itself. This mechanism would prevent the high-voltage surge from reaching the spark plugs. The onset of this condition would first be observed as a disruption of the engine when one or a few cylinders was starved, because their wires were closer to ground or their insulation had deteriorated. When a sufficient number of cylinders do not receive a spark, the engine will fail.

FAILURE TO RESTART

Having reached a possible understanding of how UFOs could interfere with internal combustion engines, it is relatively simple to see why the engine might not restart as long as the UFO is present. Turning the ignition switch will crank the engine, but it could not be started as long as high-voltage pulses intended for the spark plugs are shorted to ground by the breakdown of ionized air. There is another sub-category of this phenomenon, namely, cases in which the starting motor reportedly refuses to crank the engine at all. This problem, focusing upon the starter solenoid, is extremely complex, and since it is apparently unrelated to ionization, it must be set aside for the present .

SELF- STARTS

The most exasperating aspect of engine interference cases is the claim that an engine started by itself when the UFO departed, even though the driver's efforts were futile while it was nearby. This is such a ridiculous notion that even trained mechanics scoff at it. Others find it an impossible concept. (Reference 6) Yet it has happened, if witnesses are to be believed at all. Appendix A gives 27 abstracts of cases taken from the Rodegheir catalogue. Obvious push-starts are not included and the list may not be comprehensive.

Rodeghier found a total of 268 engine failures not including, of course, instances of mere rough running or loss of power. Comparing this number with the 27 self starts, one sees that the latter phenomenon is rare, amounting to only about 10% of the time. At any rate, these cases are adequate to establish some essential factors for self starting. The presence of a UFO is obviously required, usually at rather short range. (No mysterious engine failures followed by self starts are known to the author to have been reported apart from a UFO sighting.) Self- starts occur only in conjunction with departure of the UFO, either simultaneously, within seconds, or a few minutes at most. Cars, trucks, vans, and motorcycles are subject to the phenomenon. All are presumed to have had internal combustion engines using spark plugs as none of the available summaries indicated diesel engines. Based upon conditions within the engines that are necessary for self starting, the rarity of these events will become explicable.

Most people have a pretty clear, if not detailed, idea of how car engines work. Electric current from the battery flows through the primary circuit of the coil until it is broken by the opening of the breaker points. The resulting collapse of a magnetic field in the coil induces a high-voltage surge in the secondary windings that is distributed in a certain order to the spark plugs. A fuel-air mixture is then ignited to create high pressure within the cylinder. Not so well known is the fact that the spark is normally timed somewhat early because the propagation of the flame front in the cylinder and the build up of pressure are relatively sluggish. At idling speed, the spark is ignited while the cylinder is still approaching top-dead-center (TDC) on the compression stroke. It is usually set at about 5 degrees of crankshaft rotation ahead of TDC, but automatic devices advance it much farther in proportion to the engine speed.

There is a natural threat of sparking across the opening points that would rapidly erode the point surfaces. To offset this problem, a small condenser is included in the circuit to take up the current temporarily when the points open. Thus sparking is prevented. If the air around the points was ionized, however, an electrical breakdown between the points would be likely. Fairly high electrical field strengths exist at the instant of point separation. With a supply of free electrons and ions around the points, a spark over could easily occur and persist while the points continued to recede to their maximum spacing. Such a current is technically known as an arc discharge. These arcs, having a negative resistance characteristic, produce a runaway current unless it is limited by resistance in the circuit itself. As the current under normal conditions is limited by the resistance in the primary circuit, it will be limited in the arc to exactly the design value. Only when the UFO leaves the scene would the ionization be reduced until the arc could no longer be sustained. It would then extinguish itself instantly. As far as the electrical behavior of the primary circuit is concerned, this event would not be distinguishable from normal opening of the points, that is, a sudden breaking of the circuit. A strong surge must then be induced in the secondary circuit. It could then reach the spark plugs if departure of the UFO has removed the cause of such surges being shorted to ground. So a cylinder in a warm engine, being fully charged with a fuel-air mixture is ignited. If it had come to rest somewhat past TDC, the force due to firing will crank the engine gingerly. One need only remember how push-starts were done in manual shift cars. One cylinder firing and off you went:

Cranking of the engine would be effective from a cylinder position between a few degrees past TDC to 1200 or so. But the crankshaft rotates twice for each power stroke of a cylinder in a 4-cycle engine. So, as a first approximation, one could estimate the favorable circumstances for a given cylinder to be about (120/2x360) x 100 16.4%, if the rest position was purely random. However, it is not. Cylinders act in pairs with one in the compression stroke being balanced by another in the power stroke. If the valves opened and closed at exactly O and 180-degrees, the trapped gases in a non-firing engine would merely act as efficient springs, balancing out the net torque on the shaft. Again, because of the relatively sluggish movement of the gases into and out of the cylinders, valves are timed to operate in anticipation of these two angles. A net torque causes a coasting and stopping engine to approach, then slightly back away from TDC. Its companion would correspondingly approach and slightly back away from its bottom position at 180-degrees, an unfavorable location for self starting. Hence the probability of favorable circumstances for a given cylinder should be much less than 16%. Furthermore, if the engine remained dead for a long time, the fuel-air mixture would leak out past the rings, making self starts impossible. The duration of engine failure is seldom reported, but it must be limited to a matter of minutes, or even to several seconds. While calculating the probability of self starts seems to be impossible, these conditions illustrate why it is so small in the case histories.

One would expect stronger influences upon automobiles from UFOs that are quite close. This question was subjected to statistical analysis by Johnson who found that the distance factor was strongly related to engine disruptions and failures. (Reference 8) Fifty-six cases were subdivided into three groups according to whether the UFO was closer than 30 meters, between 30 and 120 meters, or beyond 120 meters. This corresponded to a grouping of the data and changes in the selected cut offs had no effect. Of a total of 43 failures, the number of events in the three categories were 16, 18, and 9, respectively. In other words, 79% of the failures were produced at distances less than 120 meters. The maximum recorded distance for engine failure was not given.

Additional data on this point is available from Rodeghier in the form of a bar chart. (Reference 9) Distances were broken down generally into increments of 200 feet, but intervals of 50 feet were used in the first 200 feet. By estimating from the scale and suitably combining the first four categories, one obtains the following results:

Range (ft)	Number of Events
0-100	64
100-200	28
200-300	14
300-400	15
400-500	6
500-600	7
600-700	3
700-800	5

From 800 to 2,000 feet the distances were clustered in four intervals of 200 feet, then one of 400 feet, and finally, one for all distances beyond 2,000 feet. Therefore, the above table cannot be extended further. Let it suffice to observe that the remaining data give a fair approximation to an exponential tail. A surprising total of 15 cases were greater than 2,000 feet. The importance of UFO proximity is clearly evidenced by the large number of cases within 100 feet and the steady fall- off out to 800 feet. The above table certainly suggests a decrease in the influence from UFOs according to the inverse square of the distance, as would be the case for isotropic radiation. The data are somewhat contaminated, however, by a few instances where beams of "light" were directed at the vehicles.

Many cases in the record do not give information on the distances of the UFO possibly because the size was not known and no distance could be judged, or the event took place at night so reference points were missing, or the investigator didn't ask. So it is with the record of self starts. Of the 27 such cases under review, estimated distances are available for only 10, but they are instructive. The distance figures are 12, 25, 45, 60, 200, 300, 600, 1000, and greater than 2000 feet. Four cases are within 100 feet, but others range to beyond 2000 feet. It seems that the previous table of general interference and these self starts are consistent; proximity increases the likelihood of the effect. There is no threshold distance within which it takes place, and interference may take place up to a half mile or more.

CAUSE OF IONIZATION

What possible means could cause ionization in the engine compartment and inside the distributor housing? One prospect would be the photoelectric effect that pries electrons out of material surfaces up on absorption of a photon. As iron is in great abundance under the hood, it should be suspect. The energy required to pull an electron out of iron, called the work function, is 4.4 volts. Electromagnetic radiation having photons of that energy or greater would have to have wavelengths of

$$2.76 \times 10^{-5} \text{ cm}$$

or shorter, which lie in the ultraviolet region of the spectrum near the visible. This is the radiation used in psychedelic displays and because it is invisible it is called black light. It could enter the engine compartment through the air passages in the radiator or by scattering through the open areas around the bottom of the engine. As both the steel distributor housing and the phenolic cap are opaque to ultraviolet, it could not be responsible for ionization inside the housing. Therefore, this potential source of free electrons must be ruled out. Another possibility would be direct photoionization of the air molecules. But again, the photons would have to be in the ultraviolet. Many natural materials exhibit florescence, but none has been reported in the vicinity of UFOs. It is unlikely that UFOs emit ultraviolet radiation, because there is no evidence indicating that they do.

On the other hand, radiation in the microwave region has long been suspected as contributing to

UFO effects. Wavelengths in the range from 0.5 cm. down to 0.5 mm. are resonantly absorbed by oxygen molecules and water vapor. (Reference 10) The absorption throws the absorbing molecules into higher states of rotation, but that energy is instantly transferred to neighboring molecules by collision. The increased kinetic motion of some receiving molecules should become vigorous enough to dislodge electrons. Considering what is suspected about other aspects of such radiation near UFOs, microwave radiation should be considered as a candidate means of ionization.

CONCLUSIONS

The hypothesis that ionization of the atmospheric gases by UFOs appears to have some merit. It has pinpointed physical processes that can clarify the malfunctioning and killing of engines and, in particular, the hitherto incredible claims that engines restarted themselves. It teaches us that credence should be lent to sighting reports no matter how bizarre their content. The success of the hypothesis also implies that some UFOs are probably physical machines because their reported influence upon motor vehicles is physical. Radiation from UFOs is apparently associated with their propulsion system and every effort should be made to determine all the electromagnetic parameters. In doing so, one would expect to find, not a group of accidental quantities, but an integrated design optimization by those who manufacture UFOs.

Concepts discussed here are subject to experimental verification. Although the equipment required may not be available to an independent researcher, it could easily be assembled by a substantial laboratory. A research program is envisioned in three stages:

1. Investigate individual components of the electrical system in a *simulated* environment to establish the level of ionization required to produce high-voltage sparks and low-voltage arcs.

2. Attempt to disrupt running engines with *simulated* sources of ionization such as a radioactive source lowered into the engine compartment and, particularly, near the distributor.

3. Measure the ionization produced by microwave radiation over a broad range of wavelengths and intensities. Then flood a running engine with ionizing microwaves, measuring the level of ionization and microwave intensity. Determine the values required to produce engine malfunction and stoppage. Test the present hypothesis concerning selfstarts and measure the relevant factors.

This program, while modest, could go far toward elucidating the observed phenomena and, more importantly, quantifying the radiation that may be emanating from UFOs. Should results prove to be unproductive, then research can be redirected away from microwave radiation in continuing efforts to understand the numerous puzzling details of UFO reports.

APPENDIX B. HISTORICAL MUSING

The only reported self-start prior to 1957 occurred in the spring of 1944 or 1945 in Auberry, California. As this predated the wave of 1947 by 2 or 3 years the case may be suspect, but it is provisionally accepted at face value. (Reference 11) As there were a great many UFO sightings in the decade from 1947 to 1957, one wonders about the paucity of self-start reports in that period. Whether witnesses were reluctant to report them or UFOs were keeping greater distances from automobiles will never be known, but the timing is curious. It is possible that the onset of self-start reports began in 1957 because of design changes about that time in the electrical system of automobiles. In 1953 the luxury cars (Buick, Cadillac, Chrysler, and Oldsmobile) converted from 6-volt to 12-volt electrical systems. Other manufacturers followed suit and by 1957 all new American cars (except Willys) had adopted the 12-volt system. (Reference 12) European manufacturers made a similar transition with a delay of about 5 years. Of course, in 1957 the majority of cars on the road still were 6-volt.

In the new designs, the 6-volt coil was retained, but a resistor was added to the primary circuit to limit voltage at the points to 6 volts. Various methods were developed to switch this resistor out of the circuit when the engine was dead to allow for easier starts with the full 12 volts across the points. It is then switched into the circuit during operation, since the use of 12 volts for extended periods would erode the points. So automobiles began in 1953 to have 12 volts across the points,

whereas prior to that year they all had 6-volt systems. The question is whether the arc discharge herein postulated is substantially easier to generate and sustain in the newer systems. Applying a large voltage across a gap of air produces a weak trickle of current that increases as the voltage is increased. At the time of electrical breakdown of the air, the current rises to very high values and the voltage drops across the gap to about the ionization potential of the gases in it. (Reference 13) Ionization potential is the energy required to remove an electron from a molecule or an atom. For the principal constituents of air, molecular nitrogen and oxygen, the ionization potentials are respectively 15.8 ev and 11.2 ev. (An electron volt, ev, is the kinetic energy acquired by an electron being accelerated through an electrical potential difference of one volt.) For trace gases the ionization potentials are higher. So a potential difference of 12 volts across the gap would accelerate electrons to energies sufficient to ionize oxygen. This additional source of free charges would certainly improve the chances of sustaining an arc. The mechanism would probably by ineffective in a 6-volt gap because the accelerated electrons would not acquire sufficient energy to ionize the gases.

5. Originally published as an apparent series of articles by Bill Chalker, Road Hazard, Conclusion, *AFRO Bulletin*, Vol. 25, No. 2, pp 1 and 3. This case was summarized by Falla, then independently by Rodeghier. Extracts of key elements from the Falla summary, verified by consulting the original report, are used as the details relating to electrical phenomena and were omitted in the Rodeghier version. This deficiency illustrates the problem of producing summaries, namely, the absence of guidelines for assuring preservation of significant details.

6. Rodeghier, op cit, p. 128, well expresses a widely held opinion as follows regarding "...the act of disappearing and re-starting of a vehicle's engine by itself. These last two characteristics are positively associated, not surprisingly, because both are nonsensical, extraordinary, unphysical events. Things do not disappear, nor machines start themselves, at least in this world." And again on p. 131, "It is true that the engine was reported to have started by itself, but that only confirms the messy nature of the EM data and the need for statistical methods to sort out patterns." The messy nature of the data is readily acknowledged, but statistical methods, while powerful and revealing in the larger view of things, must give way to the perspectives of engineering and science in the analysis of details.

He also presented a paper at an international conference sponsored by CUFOS, "Size, Distance, and Duration Parameters of the Ignition Interference Effect," Proceedings of the 1981 CUFOS Conference, Evanston, Illinois, CUFOS 1981, (in press). Three variables found to be significant were (a) duration of the event, (b) size of the UFO, and (c) distance to the UFO. Sophisticated statistical methods showed that disruption cases were associated with brief encounters with small objects. Also, that complete stalling was associated with the observation or contact with strange creatures. This cannot do justice to the work that is eagerly awaited in the open literature.

THE EFFECTS OF POSITION AND DISTANCE IN UFO IGNITION-INTERFERENCE CASES

Donald A. Johnson

Abstract

Some reports of UFO sightings involve events in which motorized land vehicles experience ignition or electrical system interference in the presence of a UFO; 276 such reports were collected from the UFO literature. These events were analyzed to determine the role played by position of UFO and distance from UFO to vehicle in the severity of the reported electrical system interference. A highly significant relationship (p .001) was found between position of UFO and severity of effect. A substantial majority of the cases experiencing complete engine failures (stalls) occurred when the UFO was reported either directly in front of or above the witness' vehicle. A significant inverse relationship (p .03) was found between reported distance from the UFO and severity of effect. A significant interaction between position and distance was discovered (p .04). UFOs appearing in front of or above the witness' vehicle were reported as being closer than those observed behind or off to one side. It was hypothesized that this interaction may be responsible for the correlation between position and severity of effect. Constructing a multidimensional contingency model to test for relative effects was not possible due to incomplete data. It was recommended that investigators of future events make a special effort to obtain distance and position estimates.

The analysis of close encounter cases of the second kind (CE-IIs), *i.e.,* UFO cases involving reported physical effects, offer the potential of the richest rewards to scientific inquiry. Such cases offer the greatest promise for instrumental, quantitative data (Hynek, 1972)**.** Even in cases where there are no lasting physical effects, it may still be possible to sort out physically meaningful information from the qualitative and general testimony of the UFO witnesses (McCampbell, 1976b).

Reports of motor vehicle electrical system interference during a UFO encounter usually involve no lasting physical effects or damage. However, there is one major advantage these reports have to reports involving simple close UFO observations: the presence of a physical device capable of serving as a measuring instrument, namely, the motor vehicle. McCampbell presents this argument in the following way:

> A common lament in ufology is the lack of so-called hard, or instrumental, data. Such information is generally lacking in the sighting report. But it should bc observed that an automobile is merely an assemblage of components and circuitry that is reportedly responding to changes in the environment. In other words, the automobile functions as an instrument notwithstanding its design for other purposes. (1976, p. 164)

Viewed in this manner, the reported effect on the motor vehicle could provide us with the means to test certain hypotheses about the physical nature of the interference effect. An essential step is to notice the elements that are common to a large number of independent sightings.

The purpose of this paper is to investigate the role two variables -- position of UFO and distance from UFO -- play in the severity of the reported electrical system interference. These two variables were selected because they appear to have a role in the literature and because they relate to

questions of physical causality of the reported effect.

Hall (1960) and McCampbell (1976b) both point to the same pattern in UFO ignition interference reports. The UFOs are reported as being directly ahead of the automobiles and at a low altitude at the time of electrical interference. McCampbell believes that this positioning plays a crucial role in headlight failures, and postulates that intense microwave radiation may be the cause. The radiation would collect on the headlight filament which would increase the resistivity of the tungsten in the filament, thereby reducing the flow of current and extinguishing the lights when the flow of the current becomes too low to keep the filament incandescent (McCampbell, 1976a)**.** Position of the UFO would play an important role because the UFO would need to be within a narrow region directly ahead of the headlights in order for the microwave radiation to be focused by the parabola of the headlamp on the filament (McCampbell, 1976a).

Other hypotheses involving the possible effect of microwave radiation on the timing of the sparks in a standard ignition system vehicle and the resistivity of the tungsten alloy in the distributor points, are offered in explanation for the engine failures. Whether position would have any effect on the cause of these engine failures was not discussed by McCampbell. Nevertheless, there are a great many cases mentioned in the literature where engine failure alone is correlated with the UFO being directly in front or above the vehicle. We can hypothesize that a possible shielding effect occurs whenever too much shielding material (in the form of the roof, trunk, and passengers of the car) is positioned between the UFO and the engine of the motor vehicle.

This is only one hypothesis; other causal explanations could equally well be advanced. The intent of this paper is only to establish whether a statistically significant relationship exists, not to prove its causes.

If the cause of the interference effect is high frequency electromagnetic radiation, as McCampbell and some others contend (McCampbell, 1976a, then one should expect to observe an inverse relationship between distance and intensity of effect. This expectation would correspond to known physical parameters, such as the inverse-square law. McCampbell argues that such a relationship exists, and mentions some of the better documented cases which appear to reveal a graddational distance effect (1976a). On the other hand, Rodeghier (1978) could find no such relationship between distance and intensity of the interference effect in his analysis of automobile electromagnetic interference data. The lack of such a relationship could argue against a physical basis for the phenomenon, or it could be used to argue that the physical force involved is transient or only applied selectively. It is not clear, however, what type of statistical test Rodeghier applied to his data, or the number of cases on which he based his conclusion. An additional intent of this paper, therefore, is to determine whether proximity to the UFO at the time of the ignition interference plays a statistically important role in the severity of the effect noted.

A final intent of this paper is to shed light on the relative effects of these two factors by examining whether any interaction exists between position and distance, and what the strength of that relationship might be.

Method

A computer-generated listing of all possible cases involving electromagnetic effects in the vicinity of a UFO and also involving a motor vehicle was obtained from the Center for UFO Studies' (CUFOS) computerized catalogue of UFO reports (UFOCAT) in November 1978. This listing contained 570 cases. Working from this and other sources, an eventual file of 276 cases was compiled that involved confirmed reports of motor vehicle ignition or electrical system interference attributable by the witnesses to a close UFO encounter.

These cases involved headlights and engine near failure and complete failure, but were limited to cases involving land vehicles and did not include reports of car radio interference. Because

interference cannot be directly linked to a vehicle's electrical system, because it frequently results from a wide variety of mundane causes, and because the reports themselves were sometimes vague about the nature of the radio interference, it was felt it would be better to exclude these more ambiguous cases from the study.

Of the 276 cases, 154 were obtained from books or catalogues published by UFO researchers. The remaining 122 came from periodicals, newspaper accounts, and private investigators' files. Over 100 separate sources were consulted in compiling this file, and for the majority of cases, multiple references existed on the same report to check and compare. Table 1 breaks down the reports by their principal source.

Table 1

Principle Source for 276 UFO Events

books		periodicals	
Vallee	47	FSR	46
Hall	29	APRO	34
Lorenzens	17	ACOS(Australia)	15

Ballester-Olmos	11	NICAP	3
Michel	9	other	11
Hynek	4		
other	25	Newspapers	7
	154	Files	2
			122

While making no pretensions about this list being totally exhaustive, nevertheless it would be safe to say that due to the extensive nature of the search and the powerful bibliographic assistance provided by UFOCAT, this compilation contains the great majority of cases ever reported.

No discussion or exemplification of particular cases will be presented in this paper. For such a presentation, the reader is referred to Chapter 9 of J. Allen Hynek's book, The UFO Experience (1972).

Description of the Reports

The earliest reported case occurred in 1909 and the latest added to the file occurred in December 1978. Only seven cases occurred before 1954. Reports have been associated with every region of the world with the exception of Japan and the Far East.

Table 2 presents the number of reports for each major region of the world.

Table 2
UFO Vehicle Electrical System
Interference Reports
by Region of World

US and Canada	145	E. Europe & USSR	2
Latin America	40	Africa	4
Great Britain	13	Australia & N.Z.	22
Western Europe	50		

All cases were coded in terms of the nature of the effect on the motor vehicle and the type of vehicle involved. Categories of vehicle included 219 (79%) involving automobiles, 36 involving trucks or vans, 12 involving motorcycles, 8 involving farm vehicles, and 1 incident with a snowmobile.

These cases involved collectively over 500 witnesses. Perhaps surprisingly, over 60% of the cases involved multiple witnesses. The number- of-witnesses per incident data can be broken down as: single witness, 112 cases; two witnesses, 73 cases; three witnesses, 28 cases; four or more witnesses, 32 cases; information not given, 31 cases.

For types of electrical interference noted there were 83 incidents where both the engine and headlights of the vehicle died, 124 cases where only the engine was reported stalled, 9 cases where the vehicle had not been in operation but could not be started, 31 cases where the engine faltered and lost power but did not stall completely, and 29 cases where only the headlights failed while the engine performance was unaffected. With the exception of only 16 cases, all of these effects were apparently temporary and in some cases, power returned spontaneously once the UFO had left the area. In many cases, multiple vehicles were involved in the same incident. In particular, on two separate occasions a diesel-powered and a standard-ignition-powered motor vehicle were involved together. (The two cases referred to are the Forli, Italy case, occurring November 14, 1954**,** and involving two farm tractors, and the Fordingbridge, England case, occurring November 5, 1967**,** involving a diesel-powered Leyland truck and a Jaguar sports car.) In both instances, the ignition-system-powered vehicle stalled while the diesel-powered vehicle continued to run. For the record, no case involving the failure of a diesel-powered engine has ever been recorded, although at least two more cases involving diesel-powered trucks had reports of head light failures.

Results

Of the 276 cases of ignition or electrical system interference reported in the UFO literature, a total of 176 contain some mention of the position of the UFO relative to the witnesses' vehicle. For these 176cases, the evidence reveals 86 cases (48.9%) where the UFO was reported directly in front of the vehicle at the time of ignition interference, 51 cases (29.0%) where the UFO was reported as hovering above the vehicle, and 39 cases (22.2%) where the UFO was reported as positioned behind or off to one side of the vehicle. Of 18 cases involving headlight failure alone, only 5 occurred when the UFO was directly in front of the automobile. This seems to contradict McCampbell's contention that "UFOs hovering directly overhead, standing or maneuvering off to the side, or chasing cars seldom, if ever, have killed the lights . . ." (McCampbell, p. 168).

A 3X3 contingency table was constructed comparing position of UFO with effect on vehicle's electrical or ignition system. Interference effects were categorized in decreasing degree of severity as (1) incidents where both engine and headlights failure were reported, (2) incidents where only engine failure was reported (obviously encompassing all daytime reports), and (3) incidents where the engine missed or slowed but did not stall completely or where headlights failure was reported.

The results are presented in Table 3.

Table 3
Vehicle Interference Effect by Position of UFO

	In front	Above	Behind or Alongside	
Engine and headlights died	36	13	11	60
Engine stalled	39	28	10	77
Engine missed or headlights only affected	11	10	18	39
	86	51	39	176

Pearson's chi-square = 21.14 $p < .001$
Degrees of freedom = 4

Position 39

Clearly, a highly significant relationship exists between the reported position of the UFO at the time of the ignition interference and the severity of the effect. The strength of the reported effect appears to be greatly enhanced when the UFO is either directly in front or directly above the motor vehicle. This relationship is even more clearly shown by reducing the number of categories to a 2x2 contingency table. Effect is then categorized as "stall" or "no stall," and position categorized as "in front or above" or "other." This new categorization is shown in Table 4.

Table 4
Effect (Stall/No Stall) by Position
Above or In front/Other

	Position: Above or In front	Position: Behind or Alongside	
Stall	116	21	137
No stall	21	18	39
	137	39	176

Pearson's chi-square = 14.98 $p < .001$
Degrees of freedom = 1

With one degree of freedom, the chi-square value is 14.98**,** indicating a highly significant relationship ($p < .ooi$). In terms of measures of association, the phi coefficient, which for 2x2 tables is directly translatable into a correlation coefficient, is equal to .31. This indicates a moderately positive relationship between position and effect, with approximately 10% of the variance observed in the ignition interference effect (whether the vehicle stalls or not) attributable to the position of the UFO vis-à-vis the witnesses' automobile, truck, or motorcycle.

We next turn our attention to the role that distance from the UFO plays in the severity of the ignition interference effect reported. It is well known among perceptual psychologists and other

experts that humans are poor judges of distance, and our ability to estimate distances at night - when most of these incidents occur-is especially poor (Haines, 1979**.** Even under the best conditions, such estimates must be viewed as only rough approximations and not precise statements.

The difficulty in obtaining meaningful distance estimates probably discourages some witnesses from making any estimate at all, and probably further discourages investigators from recording and transmitting them. Only 56 cases contain an estimate (in feet or meters) of the distance from the observer to the UFO. This paucity of data is understandable.

However, estimates of distances, while only crude at best and certainly varying in accuracy from one observer to the next, can nevertheless provide some ballpark notion of whether the presence of the UFO was close by or far away. For this reason, reported distance in this study is treated as an ordinal variable with only three categories: close, intermediate, and far.

Close refers to all reported distances of less than 30 meters. In such instances, the observer should be able to rely on such distance cues as size and features of the UFO, as well as inter- positional cues, for instance, if the UFO was observed between the witness and a nearby tall tree. Such encounters are usually regarded emotionally by the witnesses as close and immediate, and very impressive.

An intermediate distance would be from 30 meters to 120 meters. More cases fall into this category than any other. The observer perceives the UFO to be a close but not overpowering presence, usually no more than a stone's throw away. Interpositional or size cues allow the witness to approximate the distance to be within the length of a large soccer field. A "far" distance would refer to anything beyond 120 meters.

The cutpoints for these categories were derived in part experientially as described above, and in part by looking at the data to derive categories of approximately equal size. To check for any spurious effects caused by the choice of cutpoints in the results reported below, the data were recalculated at cutpoints of 15 meters and 200 meters. Practically identical results were obtained. The ignition interference effects were dichotomized as either a complete engine stall or not. The results arc presented in Table 5.

Table 5
Distance as an Ordinal Variable Affecting Ignition Failure

	Distance			
	Close	Intermediate	Far	
Stall	16	18	9	43
No stall	2	5	6	13
	18	23	15	56

Jonckheere's S = 185
z = 1.92
p < .03 (one-tailed)

An appropriate test of significance, more powerful than the chi-square test which makes rank order distance from close to far, is the nonparametic statistic called the Jonckheere test with tics (Leach, 1979)**.** For our data, we will regard our explanatory variable (distance) as having the three ordinal values we discussed. We will treat every observation within a category as a tie. The test statistic, S, is the same as used in the Wilcoxon Rank-Sum test, and it is evaluated-- after a continuity

correction is made--by approximation to the normal curve. Since our alternative hypothesis is that the data should conform to the "inverse square law" of effect over distance common to all physical forces, this will properly be a one-tailed test.

Our results show a significant relationship ($p < .03$) between severity of the ignition interference effect and the distance to the UFO. The likelihood of a vehicle stalling out consistently increases as the distance between the vehicle and the UFO becomes small.

As a measure of association, Goodman and Kruskal's gamma statistic was found to equal .48. This can be given a probabilistic interpretation by noting that the probability of a vehicle not stalling, given that it is further away from the UFO, is .74, while the probability that it would stall is 26**.** Gamma is then the difference of these two probabilities (Leach, 1979)**.**

The logical next step in the analysis is to look for any interaction between position and distance which might further account for the association of both variables with severity of ignition interference effect. if no interaction is found, then we can conclude that each variable contributes to the interference effect independent of the other. If, on the other hand, a positive association between position and distance is found--"positive" defined in terms of close proximity being associated with advantageous positioning--then we must allow for the possibility that the position effect may only be an artifact caused by the proximity effect, or vice versa.

The test to use in this situation is again the Jonckheere test with ties. Since we are only interested in the alternative hypothesis that position and distance are positively associated, our test will legitimately be in the one-tailed direction only. The results are presented in Table 6 and we find that the relationship between position and distance is significant at the .04 level.

Table 6

The Interaction of Distance with Position

	Close	Intermediate	Far	
Directly in front or above	8	16	16	40
Behind or alongside	2	4	6	12
	18	20	14	52

Jonckheere's S = 176
Z = 1.83 $p < .04$ (one-tailed)

At this point we have conducted tests for all two-way interactions by summing over the third variable. Unfortunately, this method is not sufficient to allow any statements about the relative effects of position and distance on severity of effect. Indeed, to base our analysis solely on two-dimensional tables is risky, as situations of partial or conditional independence may arise where a two-dimensional treatment of the data alone could be misleading (Everitt, 1977).

The preferred course of analysis would have been to have developed a three-dimensional table of position x distance x effect. Such a multidimensional table would have allowed for testing the relative contributions of position and distance to severity of effect as well as testing for the possibility of a second order or three-way interaction. Unfortunately, due to a great lack in the number of distance estimates reported in the literature, the number of cases remaining in the analysis (N=52) is too few to perform such an analysis. With a 3X2X2 table, a chi-square test of mutual independence, with seven degrees of freedom, fails to achieve significance (Pearson's chi-square = 10.66, $p < .20$). One concludes that further analysis of the table would be unfruitful.

Discussion

In reviewing the evidence for headlight failures only, we find that 13 out of i8 cases occurred when the UFO was situated somewhere other than in front of the car. It appears that we need to provide another causal model for these 13 cases, as McCampbell's tungsten resistivity hypothesis is not sufficient to explain all the evidence.

On the other hand, position of UFO seems in extricably linked to the phenomenon of vehicle electrical system failure. One hundred sixteen cases, or nearly two-thirds of those cases describing the position of the UFO, list it as directly in front or directly above the automobile. The criteria applied in coding these observations was quite strict and refers to a very limited area around the automobile: "directly in front" of the vehicle refers to exactly that, usually on or hovering low over the roadway and barring the way; "directly above" refers to the situation when the UFO hovers or passes directly over the hood or the roof of the car. Hall (1960) and McCampbell appear to have correctly alerted our attention to this relationship. Whether there exists a causal relationship between position and effect is difficult to assess, particularly since the position variable is confounded with proximity to the UFO. The position variable, however, might help explain those cases where a UFO passes in close proximity to a motor vehicle and no interference effect is noticed.

Distance and severity of ignition interference effect appear to have an established relationship in a manner compatible with what would be expected from a high frequency, electromagnetic force. The closer the UFO, the more likely the vehicle responds with complete engine failure. These conclusions are compatible with those observations of MeCampbell (1976a) but contradict those of Rodeghier (1981). A possible reason for Rodeghier's conclusions could be that his test simply lacked statistical power due to inappropriate design, small sample size, or the choice of the wrong test statistic.

The most attractive interpretation of the interaction found to exist between position of UFO and distance to UFO, from the point of view of someone who would like to show that a physical force is responsible for the engine and headlights failures, is the viewpoint that ascribes all of the interference effect to the close proximity of the UFO. The position effect is seen simply as an artifact of proximity and of no real importance. This argument would hold that since UFOs appearing in front of cars are actually closer, there is no great mystery in why more of these cars are stalling.

This view would be in accord with the results. It should be pointed out that the distance effect might still someday be accounted for by the position effect (or another variable not even considered here). Or, as is usually the case, the truth may be somewhere in the middle.

One criticism that might be made of the data and of UFO reports in general is that the events are not independent. Put another way, the possibility exists that the witnesses fabricated their reports or colored their own testimony so that it would be in line with the commonly "known" description of how a UFO should look and behave. Lack of independence violates a critical assumption of the statistical tests we have employed.

At least two considerations argue against this type of interpretation. First, I had hoped to show by including the data on region-of-world that the phenomenon is global in nature. Reports were contributed by witnesses from a wide variety of educational and professional backgrounds from just about every major cultural language group in the world. It is unlikely that witnesses in one culture would be familiar with testimony of similar events in other areas of the world, particularly when the news has to cross language barriers. Surprising as it may seem to those unfamiliar with the field of UFO research, the details of these events are simply not considered newsworthy by the international press. One must also keep in mind that it appears there is little that could be gained from fabricating

a UFO encounter.

Second, a wide range of descriptions are obtained about such variables as color, size, shape, number of objects, the lack or presence of noise, as well as such subjective assessments as inferred intent on the part of the UFO. This seems to argue against the assumption that the witnesses are adopting a conventional story line.

An obvious direction for future research would be to compare ignition interference UFO events to other events involving UFOs with witnesses in automobiles where no electrical system interference is noted. Data for the variables position and distance would be compared.

In view of the findings of this report, it is recommended that all investigators conducting investigations of similar cases in the future make a special effort to obtain position and distance estimates.

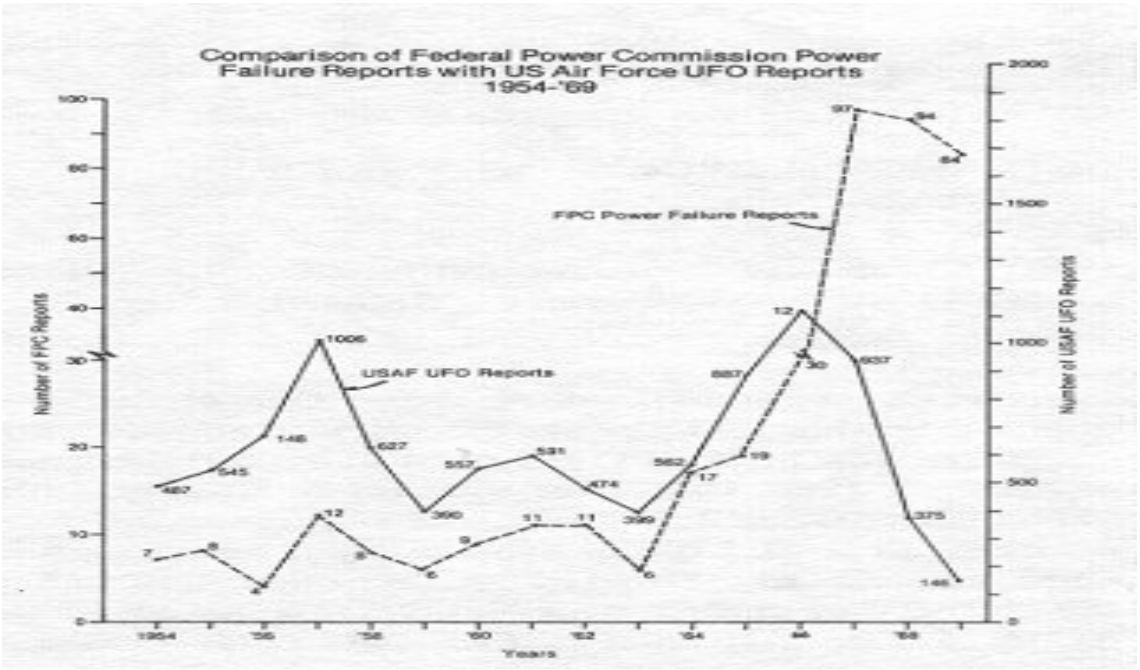
Power Outages & UFOS



"The graph above is a comparison of the Federal Power Commission's power failure reports with U.S. Air Force records of UFO reports from 1954-1969. Using this data, one can plot two curves as shown on the graph. It can be seen from the graph PF and UFO reports are in phase and track each other from year to year. Out of phase conditions do exist, however, for the years 1956 and 1967." - Paul C. Smith.

Below is the part of the testimony by Dr. James E. McDonald before the House Committee on Science & Astronautics, July 29, 1968:

Mr. Ryan:
Let me ask a further question: In the course of your investigation and your study of UFO sightings, have you found any cases where contemporaneously with the sighting of UFO's allegedly, there were any other events which took place, which might or might not be related to the UFO's?

Dr. McDonald.
Yes. Certainly there are many physical effects. For instance, in Mr. Pettis' district, several people found the fillings in their mouth hurting while this object was nearby, but there are many cases probably on record of car ignition failure. One famous case was at Levelland, Tex., in 1957. Ten vehicles were stopped within a short area, all independently in a 2-hour period, near Levelland, Tex. There was no lightning or thunder storm, and only a trace of rain. There is another which I don't know whether to bring to the committee's attention or not. The evidence is not as conclusive as the car stopping phenomenon, hut there are too many instances for me to ignore. UFO's have often been seen hovering near power facilities. There are a small number but still a little too many to seem pure fortuitous chance, of system outages, coincident with the UFO sighting. One of the cases was Tamaroa, Ill. Another was a case in Shelbyville, Ky., early last year.

Even the famous one, the New York blackout (Nov 9 1965), involved UFO sightings. Dr. Hynek probably would be the most appropriate man to describe the Manhattan sighting, since he interviewed several witnesses involved. I interviewed a woman in Seacliff, N.Y.

She saw a disk hovering and going up and down. And then shooting away from New York just after the power failure. I went to the FPC for data, they didn't take them seriously although they had many dozens of sighting reports for that famous evening. There were reports all over New England in the midst of that blackout, and five witnesses near Syracuse, N.Y., saw a glowing object ascending within about a minute of the blackout. First they thought it was a dump burning right at the moment the lights went out. It is rather puzzling that the pulse of current that tripped the relay at the Ontario Hydro Commission plant has never been identified, but initially the tentative suspicion was centered on the Clay Substation of the Niagara Mohawk network right there in the Syracuse area, where unidentified aerial phenomenon has been seen by some of the witnesses.

This extends down to the limit of single houses losing their power when a UFO is near. The hypothesis in the case of car stopping is that there might be high magnetic fields, d.c. fields, which saturate the core and thus prevent the pulses going through the system to the other side. Just how a UFO could trigger an outage on a large power network is however not yet clear. But this is a disturbing series of coincidences that I think warrant much more attention than they have so far received.

Mr. Ryan.
As far as you know, has any agency investigated the New York blackout in relation to UFO?

Dr. McDonald.
None at all. when I spoke to the FPC people, I was dissatisfied with the amount of information I could gain. I am saying there is a puzzling and slightly disturbing coincidence here. I'm not going on record as saying, yes, these are clear-cut cause and effect relations. I'm saying it ought to be looked at. There is no one looking at this relation between UFO's and outages.

Mr. Roush:
Our time is really running short, Mr. Ryan.

Mr. Ryan:
One final question. Do you think it is imperative that the Federal Power Commission, or Federal Communications Commission, investigate the relation if any between the sightings and the blackout?

Dr. McDonald:
My position would call for a somewhat weaker adjective. I'd say extremely desirable.

Mr. Roush:
Thank you. Thank you, Dr. McDonald.

(Dr. McDonald's testimony is noteworthy because of its directness and force. He considers the extraterrestrial hypothesis the most likely explanation of the phenomena. On examining the *best* UFO evidence, it is certainly possible to rule out practically every other hypothesis, and it is on this basis that Dr. McDonald and others lean toward the theory that we are undergoing surveillance from intelligently guided craft from extraterrestrial sources.)

On Wednesday, July 15, 1998, Joel Carpenter wrote:
"In 1992 "Time" magazine published an article called "The Doomsday Blueprints," an expose of Cold War secrets. The article contained an interview with J. Leo Bourassa, an Air Force officer (I don't think they gave his rank but I would guess he was a Colonel - he supposedly delivered the news of the 1960 U-2 shoot down to Eisenhower) who was the former commander of "High Point" - a bomb shelter complex for the President and

executive branch officials. It's better known as Mt. Weather, and is located in West Virginia. The complex was built in the late 1950s. Bourassa had been the commander of the complex for its whole active lifetime - presumably until shortly before the 1992 article was written. He said that during the entire time he had been in charge of the base, he had put it on alert exactly one time. Remember what happened between around 1957 and 1992 - the Berlin crisis, the Cuban missile crisis, several Mideast wars, the KAL shoot down, etc. The one single alert was called on November 9, 1965, the day of the Northeast blackout - because Bourassa thought a surgical nuclear attack was under way. I wonder if some nuclear sensors somewhere were giving false alarms, or if he just made the assumption on his own." - Joel Carpenter

Nov.65: Power failure and faulty bomb alarms.
"Special bomb alarms were installed near military facilities and near cities in U.S.A. so that news of a nuclear attack would be transmitted before the expected communication failure. The alarm circuits were set up to display a red signal at command posts the instant that the flash of a nuclear detonation reached the sensor and before the blast could put it out of action. Normally the display would show a green signal, and yellow if the sensor was not operating or was out of communication for any other reason. During the commercial power failure in NE United States in November 1965, displays from all the bomb alarms for the area should have shown yellow. In fact two of them from different cities showed red because of circuit errors. The effect was consistent with the power failure being due to nuclear weapon explosions, and the Command Center of the Office of Emergency Planning went on full alert. Apparently the military did not.".

Frequently asked questions about UFOs -- a UFO FAQ

Is radar used to monitor UFOs?

Although there are cases in which UFOs are tracked by radar (Radar-Visual sightings), radar is not considered a practical surveillance technique for ufology. Radar, including the sophisticated systems of the FAA and NORAD, has many shortcomings that limit its value to UFO research. A UFO may be too low for it to be detected or too fast to appear on the radar screen for more than a few sweeps of the antenna. UFOs that hover or move erratically may be filtered out by a radar's sophisticated computer system as ground scatter or noise. Also, planes with transponders return stronger radar signals than targets not so equipped, and radars are often tuned only to transponder signals. It is also possible that UFOs might not return radar signals at all.

In spite of the inadequacies of radar in the search for UFOs, FAA supervisors do report "unusual air traffic" in their operational logs, and radar confirmation of a UFO sighting can help verify a report and details of a UFO's physical characteristics. A serious problem for ufologists, however, is that the FAA keeps radarscope tapes of air traffic for only two weeks, and computer printouts of this information can be very expensive. As a result, radar data is only available for cases reported immediately.

Although rare, one Radar-Visual case is more significant than dozens of nocturnal light reports for increasing our understanding of the UFO phenomenon.

Meteorological Factors in Unidentified Radar

The University of Arizona, Tucson, Arizona

Meteorological Factors in Unidentified Radar Returns

14th Radar Meteorology Conference
American Meteorological Society

November 17-20, 1970

James E. McDonald

1. Introduction:

Radar meteorology might be said to have its earliest roots in attempts to account for unexplained echoes detected with Navy shipboard CXAM radar on the U.S.S. Yorktown 450 miles off the southern California coast in the summer of 1940 (Page, 1962). The echoes were demonstrated to be multiple-sweep returns from the distant San Diego coastal area, seen via the now notorious anomalous propagation (AP) conditions prevalent in that area.

Similarly, productive research on what ultimately proved to be a wide variety of types of "radar angels" stemmed from efforts to account for peculiar echoes not identifiable as aircraft or precipitation or ground returns. Lightning echoes went through a similar period of existence as unidentified returns, as did those caused by intense tornado vortices, sea breeze fronts, etc. Clearly, unidentified radar returns, and the meteorological factors contributing to them, have provided a fruitful source of stimulating new problems in radar meteorology over the past three decades. Perhaps the most recent example thereof is found in current studies of the meteorological implications of the astonishing breaking-wave echoes seen on certain ultrasensitive, ultra-high-resolution radars, such as the new CW/FM vertically-pointing set developed at the Naval Electronics Laboratory. The curious scalloped and braided echo-patterns went unidentified for a time after being first noted some years back, but are now reliably attributed to index discontinuities whose shear-generated undulations and refractivity variance must come as a distinct surprise to every meteorologist on first seeing graphic records of these phenomena. In these and other cases of initially unidentified radar returns, experience has shown that close attention to recurrent features of the patterns of puzzling returns has paid off in new and important understanding of the atmosphere and its electromagnetic propagation characteristics.

The present paper will comment upon and cite some examples of a category of unidentified radar returns that do not seem to be well-known to investigators in radar meteorology, despite the fact that the phenomena have frequently been attributed to anomalous propagation and other weather effects. These are a type of returns observed on operational radars, chiefly military and air traffic radars, intermittently over a period of about twenty years, yet never subjected to any very careful, systematic, and extended scientific scrutiny, as near as I have been able to ascertain.

2. Past Studies:

It is to be understood that I exclude from this discussion (a) all really extensive layer-type returns of the sort now fairly familiar to radar meteorologists from many studies, (b) dot-angels of both wind-independent (insects, birds) and wind-dependent (atmospheric refractive anomalies) types, (c) ring angels, and (d) intense but generally really extensive and only slowly changing ground returns due to AP. After that elimination, there still remains a class of wind-independent returns, often highly localized and often exhibiting apparent speeds of propagation well above ambient wind speeds and sometimes even well above known aircraft speeds. In Plank's (1956) review of angel phenomena, he appears to have been cognizant of such a residual class, which he labeled Type III Angels ("Echoes, frequently erratic-moving, from localized, non-wind carried sources"). That he had in mind returns of the category here under consideration seems further confirmed by his subsequent treatment (Plank, 1959, p. 23) of what he termed "a

type of non-aircraft echo that suddenly appears, moves for a matter of minutes in a semi-straight line path at velocities of some 600-2000 mph, and then disappears." Echoes of this nature were discussed earlier by Borden and Vickers (1953) following two widely publicized episodes at Washington National Airport on July 19 and 26, 1952. (See also Air Weather Service, 1954.) Plank (1958) has also briefly discussed those two episodes and described the prevailing conditions as "exceedingly super-refractive." However, my own computations of the relevant N-gradients in the weak surface-inversion layer present showed a value of only about half the ducting value, and subsequent checks by Plank (personal communication) revealed that a factor of two had been inadvertently omitted from his earlier computations when his estimated gradients were in error by a factor of two, on the high side. Thayer's gradient computations confirm this (he does show a thin duct on 7/26/52, but its elevation of 1 km essentially rules out trapping), yet he too attributes the episode to AP, which is difficult to understand. To my present knowledge, the only discussion of any substantial number of cases in the category of unusual radar returns to be considered here is that of Thayer (1969), presented as part of the University of Colorado's study of unidentified flying objects (UFOs). Since Thayer attributes many of his cases to AP, his analyses are of present interest. Blackmer et al. (1965) ostensibly addressed themselves to the present category, but in fact do not discuss a single specific instance that falls in the class of interest here; they merely review known propagation anomalies. Hardy (1969) has also described unusual radar echoes in a symposium whose context was that of the long-puzzling UFO problem; but all of his examples, like those touched on by Blackmer et al., were drawn from categories of known types of angels and gravity-wave effects and none from the category here under discussion, In the same symposium, I discussed in considerable detail (McDonald, 1969) four specific cases in the category of present interest, two of which cases Thayer (1969) had attributed to AP effects. I gave reasons for rejecting such an interpretation (McDonald 1969). For brevity, the category of present interest will be referred to as "radar UFOs" in the remainder of these remarks.

3. Some Illustrative Examples of Radar UFOs Attributed to Atmospheric Effects:

We do face a semantic problem here as to what shall be understood by the term "radar UFO." I would emphasize, first, as did Plank in describing his "Type III angels", that they must be discrete echoes (often as intense as or more intense than, conventional aircraft at corresponding ranges); and, second, they must exhibit motions whose kinematic characteristics are quite distinct from those of conventional aircraft or of familiar ground-return effects. I would also add a third stipulation that they must be unlike any of the familiar interference and ECM effects (spoking, running-rabbits, blanking, etc.). Those three stipulations may at least be suggestive of relevant elimination criteria, even if each calls for much more careful specification than is possible within present space-limitations. Plank stressed "erratic" motion; but in many instances of radar UFOs, strong targets have moved in straight-line paths from one side of an operational scope to the other at speeds far in excess of aircraft speeds (i.e., several thousands of miles per hour) without any change of apparent course. In other instances, high-speed tracks have exhibited sharp direction-changes, stops, closed one-sweep course-reversals, or closed orbits at extreme g-levels, in fashion quite inexplicable in terms of known aeronautical devices. Plank's term "erratic" is thus somewhat misleading, although there certainly are cases on record where that description would fit rather well. His speed range, 600-2000 mph, is not acceptable here, at either its lower or upper limit. Cases that I have looked into include targets whose speeds have, within a single tracking episode, varied from zero to several times his suggested upper limit. However, I believe that, for initial purposes of discussion, there is probably rough correspondence between what Plank referred to as "Type III angels" and what I shall here term "radar UFOs", though his omission of specific details of cases he had in mind renders that conclusion a bit uncertain. Thayer was definitely concerned with the same general category that I wish to discuss, as will be seen in examples below; Hardy (1969) and Blackmer et al. (1969), to repeat, simply were not, in my opinion, treating the present problem.

3.1 Case 1: Kincheloe AFB, Sept. 11-12, 1967:

Between 2242E, Sept. 11 and 0001E, Sept. 11-12, 1967, targets were observed with an MPN-14 radar (S-band, 60- mile range, 20 rpm scan, beam tilt-range 0-10 degrees) at the Rapcon Site, Kincheloe AFB, Michigan. The phenomena to be described below were officially explained as "probable anomalous propagation" by Air Force Project Blue Book; and Thayer (1969), p. 164) concludes that this is a "case of observations of moving AP- echoes produced by unusually well-stratified atmospheric conditions." Thus we confront here a case of some unusual echoes that have been attributed to atmospheric effects by two investigations.

My examination of the episode is based on study of file material in Air Force archives and on direct interviews with Sgt M. Y. Burns, the senior radar operator on duty during the episode. It is relevant to remark that Burns, at that time, had 7 years' experience in radar, 3 of them at Kincheloe AFB working with the equipment involved in this case. Useful information on the case has also been provided by Dr. Norman E. Levine, who was one of two investigators representing the University of Colorado UFO Project in an on-site check carried out approximately three weeks after the incident. Thayer was not at the site, nor did he interview personnel involved. Like most other cases of interest in the category of radar UFOs, this one is too involved to describe in full detail here; but salient futures will be noted, in order to suggest the kind of problems that I regard as still unsolved.

A total of 17 targets were followed during the roughly 80 minutes' duration of this episode. On only two occasions were two targets painting on the scope at the same time; the other 13 were singles. At the time of the appearance of the first target, a B-52 which was outbound about 30 mi west was being followed routinely (recounted to me by Levine, confirmed to me by Burns in direct interview, and confirmed in Blue Book case-file in archives), when a second blip was noted heading N to S on a potential collision course with the B-52. The pilot was alerted but never saw any other aircraft or object. He was asked if he was "playing with radar" but no ECM was involved. Burns estimates that the target's initial speed was somewhat faster than that of the bomber; but then it suddenly slowed to roughly half its initial apparent speed and the B-52 cleared it, the target seeming to pass southward behind the aircraft. The blip then abruptly turned eastward and accelerated to a speed that Burns and other duty personnel estimated at approximately 2000 mph (1.5 mi/sweep, roughly). Burns could not recall if this first target crossed the scope; all of his original notes were given to Levine and hence are presumably in the University of Colorado archives. Burns told me that this target, like most of the subsequent targets, was stronger than the B-52 return, and that he had MTI on and it was taking out all ground clutter. In response to my query, he stated that he had looked for AP all that night but saw none at any time. He contacted Minneapolis ARTC and the ADC SAGE center, but they had nothing on such a target.

Eight minutes later a second target appeared. (Following data from official case-file, and only rather sketchy information is given on most of the targets; but, on directly querying TSgt Burns, I learned that all were hard targets, not diffuse echoes of the sort typical of small elements of ground-return from AP.) This second target was seen at 250 degrees azimuth, heading towards 50=F8 azimuth, speed not specified in case file. Then between 2250E and 2330E "nine other UFOs" were observed on the MPN-14: (1) at 270 degrees tracking towards 90 degrees; (2) at 230 degrees, tracking 30 degrees; (3) at 380 degrees, tracking 100 degrees; (4) at 270 degrees, tracking 90 degrees; (5) at 230 degrees, tracking 30 degrees for 20 miles, then changed course, heading 360 degrees; (6) at 280 degrees tracking 100 degrees for 20 miles, then turned to 180 degrees. Then these last two targets (5 and 6) "joined at 30 miles due west of Kincheloe AFB and both went eastbound at 2000 mph," passing overhead but not visually observed. (Quote from original TWX from Kincheloe to Project Blue Book, in case-file.) The remaining three UFOs were: (7) at 160 degrees, tracki ng 360 degrees; (8) at 30 degrees, tracking 200 degrees; and (9) at 30 degrres, tracking 270 degrees. Then, at 2338E another target was picked up at 200 degrees, tracking 360 degrees. At 2358E, another at 280 degrees, tracking 120 degrees from 60 miles out until 20 miles out then

turned and headed towards 270 degrees.

At 0000E (on the 12th), Burns logged the second of two instances in which two unidentified targets were on-scope concurrently. One was at azimuth 200 degrees, tracking 90 degrees but then turned to a heading of 360 degrees, slowed down over an interval of 8 miles, turned to a 270 degrees heading, and "disappeared from scope" (sic). The second of the two was at 250 degrees initially, and tracking 90 degrees, but then turned towards a heading of 360 degrees and left the scope.

Finally, the seventeenth observed anomalous target, detected at 0001E, was first picked up at 270 degrees, tracking 30 degrees, but turned to a 360 degrees heading, slowed down, turned to 270 degrees, then turned again to a 360 degrees heading, and speeded up again.

The case-file includes further comments and clarifications Lt. T. E. Leaman at Kincheloe and Lt. W. B. Stoecker, ADC (SAGE) Duluth, as well as by Blue Book officers. These include the statement noting that the sergeant who reported the sighting "is very experienced and would probably know what it was if it was anomalous propagation," and statements that no interceptor scramble from Kincheloe was called because no scramble capability existed there, while none was called from SAGE Duluth because their remoted scopes did not show the unknowns (with single exception of a strobe seen from the 753rd AC&Wron near Sault Ste. Marie). Stoecker suggested that the objects may have been too low over Kincheloe to be seen from the SAGE sites; on the other hand, as the file states (and as Burns stressed to me), tower personnel at Kincheloe saw nothing visually despite good visibility and only scattered high clouds, which is puzzling, though by no means unprecedented. Burns tried beam-tilting and tended to get stronger returns at high than at low tilt. No RHI equipment was locally available, unfortunately. The case-file states that Sgt. Burns tried switching channels, as a cross-check against possible ECM, but got no change in target intensity, tending to discount that possibility. I asked Burns if he tried IFF, and he said he did but got no IFF, just skin-return. He pointed out that the 752d AC&Wron at Empire, Mich., queried him at one point during this episode, asking if he was getting a retum at about 100 mi SE, heading his way. But his MPN-14 had only 60-mi range and could not then detect it; nor did a target subsequently enter his scope from that sector. The only target that he carried which he knew to be concurrently carried by another radar was one at a bearing of about 250 degrees from Kincheloe that was also seen at least briefly by radar at the 753d at Sault Ste. Marie. Burns recalled that the 753d had a height on that target, but they did not release it to him. There is no indication in the casefile that this important point was checked by anyone.

Because targets in the radar UFO category have often been reported to stop for variable periods of time, I asked Burns what he felt the slowest speed had been. He replied that in several instances some of these targets hovered motionless for a time of the order of 10-15 seconds (3-5 scans). The MTI was set to function out to approximately 15 miles; whether the hovering targets lay within or beyond the MTI limit is not now clear. What interpretation is to be put on a radar episode such as the above? At Project Blue Book, the considerable experience of the senior man on duty and his specific yet unsuccessful search for AP symptoms were rather casually ignored in the following evaluative comment by V. D. Bryant, dated 15 January 1968 and included in the official case-file: "The obvious 'excuse' or 'explanation' for the sightings appears to be temperature inversion. The erratic courses taken by the 'objects', their wide variations in speed (150 to 2000 mph), and the fact that no noise was heard, even at the low altitudes assumed, all point toward anomalous propagation due to temperature inversions." And, on that basis, the Kincheloe sighting is so carried in the official files. This is a representative Blue Book radar evaluation, I have found.

Thayer (1969), reviewing this case in the Condon Report, states: "This is a good example of moving radar targets that cannot be seen visually, where there is a 'forbidden cone' over the radar site. Some of the returns were even seen to approach within 5-15 mi of the radar and disappear, apparently subsequently reappearing on the other side of the radar scope at about the same range that they disappeared. This sort of behavior is

symptomatic of AP-echoes." [That gross misinterpretation of the blind spot over-head in all search-type radars is made by Thayer in other cases he analyzes in the Condon Report, including the extremely significant Lakenheath case of 1956 in England (Thayer, 1969, p. 163).]

Thayer displays refractivity profiles for the time and general vicinity of the Kincheloe episode and, on the basis of an elevated duct in the 300-500m layer, suggests that "strong partial reflection should be expected," and that "moving AP-echoes, produced in the manner described by Borders and Vickers (1953), could be expected to appear at apparent heights of between 2000-3000 ft and 7000-9000 ft." Confusingly, those heights do not match either of the diagrams he displays, one of which is, in fact, labeled 9 Nov. 1967, a month and a half after this episode. Also, Thayer systematically plots his index profiles on A-Z coordinates, yet always labels the super-refractive layers in terms of the vertical N-gradient, not the A-gradient. This is more than merely confusing; it promotes the misinterpretation that ducting is present in cases (numerical value between about -115 km^-1 and -157 km^-1), where it really is not.

A basic difficulty in examining the validity of Thayer's assertion concerning "strong partial reflection" is that he does not define his usage of that term. In usual practice, it has acquired two distinct meanings: (1) Partial direct reflection, i.e., back-scatter, to put it more precisely, or (2) partial forward-scatter. Neither of those interpretations offers any hope of accounting for the kinematics of the reported Kincheloe targets, and certainly the former could not conceivably yield apparent radar cross-sections rather greater than that of a B-52, as Sgt. Burns characterized the intensities of these unidentified returns.

Nor does Thayer clarify his position by seeming to equate "strong partial reflections" with the ideas proposed by Borden and Vickers (1953). Their discussion postulates essentially specular reflection from moving waves on an inversion surface, the propagation speeds being of the order of the wind speed and the apparent targets thus being assigned roughly twice the speed at inversion level, for reasons of simple relfection-geometry. First, it must be remarked that, although the Borden and Vickers report has often been cited as if it settled the July, 1952 Washington radar UFO episodes, I find that view unsupported by the very sketchy and entirely qualitative mode they propose. Secondly, the upper-level winds at Kincheloe that night were less than 10 kts up to the 850 mb level (below which lay the only index gradients of any significance), which would scarcely account for the reported target speeds on anything remotely like the Borden-Vickers hypothesis. And third, the Borden-Vickers hypothesis of "glint" reflections from favorably disposed undulations on an inversion surface could scarcely be invoked to account for apparent target movements, whose directional variability matched that seen on the Kincheloe MPN-14 during this episode; nor could it possibly account for sudden turns, hovering, and accelerations described in the official case-file. Other slightly subtler objections could easily be raised, but those simple ones seem sufficient to reject Thayer's loose explanation (let alone the still less meaningful one contained in the official case file).

One might ask how Thayer would suggest that any form of propagation anomaly or "partial reflection" could explain the complex kinematics reported by the Kincheloe Rapcon Site for this night. One partial answer may be that he offers that suggestion in a mere 4-paragraph account of this intriguing case, an account that gives the reader no hint that 17 distinct targets were seen, that says nothing about turns, hovering periods, or accelerations, that omits any mention of speeds of the order of 2000 mph, and that gives no suggestion that in one instance two such targets converged from opposite directions, turned eastward together, and then moved across the scope side-by-side at about Mach 3, passing over and beyond Kincheloe AFB. Unfortunately, I must add that my detailed checking of the discussions of the 35 "optical and radar analyses" in the Condon Report has established that such omissions of crucial sighting details are typical, not exceptional in that Report.

Plank (1958, 1959) has suggested that perhaps some of the "erratically moving angels" (his Type III) might be caused by

"shock waves, echo being the product of direct back scatter or diversion of energy to the ground." He then notes that shock waves are thin, on the order of microns, yet can have refractive index differences across them of "several hundred N-units." The high speeds exhibited by some of the targets in this Kincheloe episode (and in many others of interest) might vaguely suggest shock phenomena, so perhaps a few remarks negating that hypothesis are in order. First, Plank really does not offer any geometric model to support the kind of kinematics found in interesting radar UFO cases. (Quite possibly he is unaware of the content of most such cases.) Only extremely simple paths would be possible; certainly his emphasis upon erratic movement goes wholly unexplained on any such model. But the greater objections are the quantitative objections. He mentions N-changes of several hundred units; but this is quite unreasonable. First, only temperature jumps and not humidity jumps could accompany shockwave passage.

Secondly, in the lower atmosphere, one N-unit change is associated with approximately 1 degree C of temperature change. Third, the Rankine-Hugoniot equations permit one to relate shock-front temperature changes to concomitant peak overpressures; and an over-pressure of, say, 5 psi, is found to lead to a transient shock-heating of only about 30 degrees C (hence about 30 N-units jump across shock-front), yet this is an overpressure not only great enough to take out all nearby windows but to level weak structures and collapse roofs. In brief, the only shock waves capable of giving significant radar-reflecting characteristics would be of rather severely damaging nature, would leave unmistakable after-effects, and yet could influence a radar beam for only fractions of a second. The shock-wave suggestion seems unpromising for explaining radar UFOs, in general, and the Kincheloe targets in particular. Indeed, one of the characteristic puzzles of high-speed radar UFOs (and the Kincheloe UFOs in particular) is that no discernible sonic boom is associated with cases where the radar-deduced speeds are markedly supersonic.

In summary, it is by no means clear that one can accept any known kind of anomalous propagation for targets in the class exemplified by the Kincheloe targets. However, we are doubtless still unaware of certain types of propagation anomalies in our atmosphere, and the breaking-wave echoes may attest to interesting surprises yet to come. But there seems to exist so large a margin of separation between any of the now-suspected atmospheric effects and the characteristics of what I am terming radar UFOs that I do find it difficult to understand how AP and "weather effects" have so long been casually employed to explain radar unidentified targets within Project Blue Book, and how they have more recently been invoked in the Condon Report by Thayer in essentially similar manner.

Perhaps a clue to the latter is found in a curious introductory definition of what Thayer (1969, p.117) terms "blip-like" radar returns: "Cases where the radar target (or targets shared characteristics similar to the return from a solid object (such as an aircraft, etc.) and where the target did not display erratic or discontinuous behavior. Acceleration or velocity in excess of known aircraft capabilities, or periods of immobility were not considered to be contrary to normal target behavior." I fear that this definition be paraphrased fairly by saying that Thayer adopted at the outset explicatory rules by which completely abnormal radar returns were agreed to be quite normal. Many examples in support of such a paraphrase have come to my attention in follow-up investigations of the Condon Report, whose handling of the radar UFO cases I find almost wholly uncritical, generally tendentious, and often absurd -- and, more than that, disturbingly incomplete with respect to the scientifically most puzzling features of many of the cases (cf. McDonald, 1969). If we are to learn anything meteorologically interesting from radar UFOs, it will come only from much more discriminating and more thorough analyses than any now at hand.

3.2 Case 2: U. S. Naval Air Station, North Island, San Diego, Calif., Oct. 14 1957:

As another illustration of past radar UFO cases that have been officially explained in terms of meteorological effects, we might consider one that, unlike the preceding case, involves visual as well as radar observations, and for which the radar

observations were made from the air rather than from the ground. Cases of both the latter types are scattered through the Air Force archives, and some, like this one, emanated from another service. I have not interviewed any of the observers in this particular case, so, in order to fulfill written agreements with the Air Force, I cannot cite witness-names. Instead, I shall be forced to use merely initials of the Navy personnel involved. (I am currently challenging Air Force structures against citation of names of military and government-agency witnesses in past UFO cases, contending that they are blocking full and credible scientific discussion of case details and arguing that these strictures stand in violation of P.L. 552. It is the present Air Force position (SAFOI letter, 7 Aug 1970) that scientific citation of witness names would constitute an "invasion of privacy", despite the fact that these were personnel of the military, FAA, USWB, etc,, whose observations and official reports were made in regular line of duty. At this writing, my efforts to get the Air Force to rescind these strictures have not yet proved successful, so unfortunately I am obliged to omit all names from this account of my checks on this scientifically significant case.

No strictures against citation of names of investigative and evaluative personnel have ever been imposed in the course of my investigations, so I do cite certain names in those categories, since they, too, are of obvious documentational relevance.)

Slightly before 1900 PST, on October 14, 1957, at NAS North Island, AC/3 VEE (initials of enlisted Navy tower controller) noted "a bright, round, white light, about the size of a dime, bearing 210 degrees T from the tower and approximately 300 ft above the Point Loma land mass," according to a 17 October 1957 report to the Air Force Office of Special Investigations from the District Intelligence Officer, Eleventh Naval District. VEE observed the object remain stationary for about 2 minutes and then fade out. One or two minutes later a similar light, presumably the same, suddenly reappeared slightly farther north and a bit lower than before, and now somewhat brighter. After remaining stationary about two minutes, it again faded away, the report notes. Somewhere in this sequence, VEE alerted two other enlisted personnel, DC and MD, also on duty in the tower; and all used binoculars in the later portions of the visual observations, according to the intelligence summary. It soon reappeared once more, again farther north and again lower; it seemed now to wobble slightly and exhibited a half-halo on its upper portion, with a bluish tint on one side. No angular estimate is given.

Concurrently, a Navy S2F tracker (anti-sub-marine search aircraft), attached to VS-21 at NAS North Island, moved into position for takeoff, and AC/3 VEE had to divide his attentions between the unexplained light over Pt. Loma and the S2F ready for takeoff. In the process of controlling the takeoff and vectoring the aircraft to attempt a search, VEE lost the object, the reasons becoming clearer below.

According to Air Intelligence Information Report 01-03-57, dated 23 October 1957, prepared by Maj. L. W. Bruner, 27th Air Division, Norton AFB, Calif., based on a signed summary statement by the S2F pilot, Lt. ALR (initials), the aircrew, during engine warmup, had heard the tower operator take three radio calls to an "unidentified aircraft", requesting identity and intentions, but getting no reply. On requesting and getting takeoff clearance, Lt. ALR was asked by the tower operator to maintain 200 ft altitude after liftoff and proceed to Pt. Loma to identify a stationary light source apparently hovering at that estimated altitude. Lt. ALR notes that both the copilot, Lt.(jg) GTC, and he observed the light, while still on the runway before starting their run.

"After take-off, I turned outbound over the channel," Lt. ALR wrote in VS-21 msg 152348Z of Oct 1957, "and climbed to 200 feet, all the while keeping the light in view. My intentions were to proceed seaward of the light so as to silhouette its airframe against the lights of San Diego. However, when we drew abreast of it off our right wingtip, we observed it undergoing a rapid acceleration away from us and to the west. I noted relative motion between it and the lights of San Diego. As our range opened the light began to alternately vary in color and intensity. The extremes were bright red and a blue white, with

no regular period of change from one to the other."

"I turned West and assumed a heading of 230 mag. with the light then dead ahead. In about four or five minutes (warm-up time) our radar operator reported a target dead ahead at seventeen miles and above us. The weather was clear ahead and above, with a discernable horizon and low clouds 30 miles west. The stars were bright and clear but small and dim compared with the light we were following. During the chase there was always evident a relative motion between this object and the background of stars."

"From Pt. Loma on out the object climbed steadily and I followed in a gradual ascent at 240 knots IAS, closing irregularly. At 4500 ft the object leveled off 12 miles ahead, and then drifted right 10 degrees in about five seconds. I turned right to 240 mag., leveled off and increased speed to 160 knots. The range closed to 10 miles and stabilized. After following for about three minutes at 10 miles I decreased speed to 120 knots but observed no range-rate on radar. I then advanced speed to 180 knots IAS and still observed no range-rate."

"The object in the meantime drifted 20 degrees to the left (220 mag.) in no more than 10 seconds, and then closed range to 8 miles in one rotation of the radar antenna (7.5 seconds). The range stabilized again at 8 miles and we began another gradual climb. At 8000 ft and about 40 miles from Pt. Loma the object leveled off and shortly after disappeared visually and on radar. Fifteen seconds later it reappeared visually but not on radar although the operator switched to sector-scan and searched continuously."

Lt. ALR concluded his summary with the comment that they maintained visual contact until the S2F was 50 miles from Pt. Loma, at which time they lost visual contact, too (fadeout), terminating the incident. His statement notes that all four aircrewmen saw it and can substantiate his descriptions. (The two enlisted men aboard were WES and WPC.)

This is only one more of many radar UFO cases I have recently been studying as a result of extensive searches through the Air Force archives and only one of many hundreds of UFO cases I have checked during the past four years. Each case has certain unique features, but many have the common feature that it is exceedingly difficult to propose for them conventional explanations. Yet, here as in almost all the rest that have received the Project Blue Book evaluations, a conventional explanation has been assigned by Blue Book.

I quote from that explanation, extracted from Air Force archives, since it invokes atmospheric phenomena of potential interest to radar meteorologists and atmospheric physicists:

"Distortion of light and changing colors attributed to probable inversion off coast. That Arcturus was the object is ... indicated by the fact that the pilots could not close on the object. Its jumping around and the spurious radar returns caused by inversion or other weather conditions conclusive to distortion of atmospheric optics. Sighting was of short duration and Arcturus set at about the time of object's disappearance."

(Actually, I must note that there is a slight confusion on the official evaluation of this case, Although the above case-summary explains the sighting in terms of Arcturus and some form of anomalous propagation, the casecard in the archives shows it as "Possible Balloon." There is no evidence of any real analysis of either hypothesis, no weather data, no computations of positions, or other quantitative assessment; but the original teletype message from AIRASRON-21 to Wright-Patterson AFB, which notes how the object "drifted across chase plane's course at speeds estimated by pilot to be in excess of 1000 mph," has a pencil-sketch of a top-view of an aircraft flying past a sphere, with arrows and lines evidently intended to depict the viewpoint contained in evaluating annotations that nearly obliterate parts of the TWX: "Tests have shown that when a/c slipstream from wing tip hits balloons it sends it rapidly sideways." The sketch and pencilled evaluative comments, typical of many documents in the UFO archives, are signed by Capt. George T. Gregory, who was

Project Blue Book officer in the 1957-59 period. Many of such UFO reports were processed in about this way over the years.

But this one has the alternative (and evidently officially preferred) explanation of suggested inversion effects on Arcturus and the S2F's radar. Consider certain difficulties with that explanation: (1) The tower observers reported to Navy intelligence interrogators that the light shifted three times, from its azimuth of first appearance at 210 degrees T. At about 1900 PST on this date, Arcturus was nearing the horizon at about 290 degrees T. This light over Pt. Loma was seen by the cockpit crew from the runway and held in sight until they drew nearly abreast of it, viewing it off the right wingtip, whereupon it suddenly accelerated westward and started climbing. (2) The subsequent air chase involved a sequence of pursuit headings stated to be 230 degrees mag, then 240 degrees mag, then 220 degrees mag, the source finally pulling away and fading out at 230 degrees mag, after an approximately 20-minute visual-radar chase, at about 230 degrees mag. The magnetic variation off the San Diego coast is about 15 degrees E, whence the bearing to Arcturus would have been about 275 degrees mag, some 35 to 50 degrees from the luminous object's reported azimuth, far in excess of uncertainties that would affect observations under these conditions. (3) Viewed from the S2F, the object appeared to climb, then level out, on two occasions. And it executed fast lateral shifts to both left and right, through arcs stated by the Navy pilot to approximate 10 degrees and 20 degrees of relative azimuth. (4) The aircraft was flying, after the first few minutes, at altitudes well above the coastal subsidence inversion whose refractive effects are adduced in the official explanation to account for angular image-excursions whose amplitudes dwarf the 10's of seconds of arc displacement associated with stellar scintillation effects, even under unfavorable viewing conditions at the surface, let alone at 4-8000 ft level. (5) Nor does the official explanation that the "inversion and weather conditions" were responsible make better sense of the reported radar behavior. Ranges opened and closed, angular altitude varied, and azimuths shifted, all this during a 40-mile pursuit, at altitudes ultimately near 8000 ft. (6) The estimated lateral speeds (order of 1000 mph) came from rough calculations based on radar ranges, plus compass-based angular estimates. A target at 10-mile radar range that moves 20 degrees in 10 seconds has exhibited an apparent velocity near 1200 mph.

To suggest that optical refraction effects plus anomalous propagation could cause such extreme behavior, and to suggest it without the slightest supporting argument, is simply not reasonable.

Could there be some truly phenomenal optical and radar-propagational anomalies of the atmosphere that might be capable of yielding visual and radar indications of this sort? The archives have many more such anomalies that will require at least equal extensions of present scientific knowledge if we are to account for them along the lines of application of atmospheric physics that I have found typical of Project Blue Book UFO explanations over the past two decades.

3.3 Case 3: Gulf of Mexico, B-29, Dec. 6, 1952:

With so large a number of previously unknown cases that I could discuss and so little space available here, it is difficult to select a final example. But because of my strong concern over the serious inadequacies of the radar-optical UFO case-analyses in the Condon Report, I choose a last one that exhibits some of those deficiencies, that is explained in terms of alleged atmospheric effects, and that happens to be a rather famous case in UFO annals. I believe that the ad hoc panel that reviewed and endorsed the Condon Report (NAS, 1969) could not possibly have scrutinized carefully the level of analysis of cases such as this in that Report, a point that I have elaborated elsewhere (McDonald, 1969b).

In the early morning hours of December 6, 1952, a B-29, on the return leg of a training flight out of Randolph AFB had turned around over Tampa and taken up a generally westbound course across the Gulf. When about 100 miles south of the Louisiana coast at an altitude of 20,000 ft, visual sighting of oilwell flares on the coast led the Instructor Navigator, 1/Lt WN, to request a student radar operator to turn on his set and try to pick up the coastline on 100 mile range. After the student

operator's failure to detect the coast, WN confirmed that no coastline echo was discernible, so called for a set calibration. Some time later he was alerted to presence of some four blips ahead and in rapid closure with the B-29. [Air Intelligence Information Report No. IR-86-52, filed from Randolph AFB by Maj. J. R. Sheffield, Wing Operations Officer, 3510th Flying Training Wing, includes a summary of the events, the sightings, a map, and signed statements by three officers and two enlisted men who figure in the incident. These items, plus the original TWX and other materials in the archived case-file indicate that the B-29 had turned to a heading of 320 degrees at some earlier time, after the unsuccessful search for the coastline on the navigational radar, and had reached coordinates of 28 degrees 10'N, 92 degrees 04'W when the sightings began. I cite these points because they are quite relevant to a point that Thayer (1969) regards as crucial, yet seem to me to be a misinterpretation of the intelligence report. I infer from coordinates and times that inability to pick up the coastline occurred while the B-29 was still just over 100 miles offshore, beyond the set's 100-mile range. Furthermore, the set was then uncalibrated, as the Instructor Navigator makes clear in his signed statement.]

The first 4 targets were sighted at 0525 CST, "with no specific grouping such as a radar beacon transmits apparent on the scope at 330 degrees," Lt. WN stated. The radar had azimuth stabilization; its scan rate was 25 rpm. The navigator, 2/Lt RKE, verified WN's assertion that these first blips advanced southeastward about 5 mi/scan, and MSgt BRP, the aircraft performance technician, using 1/Lt NK's stopwatch data and the indicated displacements per scan, informed the crew that the computed target speed was about 5000 mph. These targets, viewed on three repeater scopes, passed to the right of the B-29 and moved offscope at a bearing of about 70 degrees.

Then, immediately after a calibration-check, a second group of blips was seen coming in along a similar path. This time the pilot called off relative bearings from his repeater scope, with instructions for the crew to watch on the starboard. SSgt WJD states: "I immediately looked in that position (3 o' clock bearing called out from cockpit) and saw two flashes of approximately 3 seconds, which did not alter course whatsoever. The flash was of a blue-white nature and did not change brilliance... when it disappeared." Two objects were also seen by MSgt BRP, and he was evidently forward for he saw them move rearward and disappear under the wing. In 1/Lt WN's accounc, he confirms that these flashes were seen to "go from front to rear under our wing "

The interrogating officer, Maj. J. R. Sheffield, in his intelligence report from Randolph AFB, gives 18,000 ft as the approximate altitude of the objects and 20,000 ft as the B-29's altitude, accepting the crew's statements that the objects came in below the B-29. Despite this, Sheffield states in his report that: "Visual sightings are indecisive an of little confirmatory value," but no explanation of why he discounts the two crewmen's observations is given. Like many other Blue Book reports, this case-file leaves unanswered a number of pertinent questions. The total number of objects followed on radar is not clearly specified. 1/Lt NK says he observed: "about twenty objects in all, sometimes as many as two and three on the scope at one time." Crewmen refer to one radar-observed event involving a merger of targets (a feature that I have now found in a number of reports of radar UFOs). As WN described it: "Contact was broken off at 0535 after a group of blips merged into a half-inch curved arc about 30 miles from our a/c at 320 degrees and proceeded across the scope and off it at a computed speed of over 9000 mph." WN also stresses one other significant target-movement: "One group of blips, after the scope was calibrated, were noted, after moving from 330 degrees to 150 degrees across the scope, to arc about and swing in behind us at approximately 30 miles and maintain speed and distance for approximately 10 seconds and then disappear." Given that summary, consider Thayer's (1969) explanation of this case (which Blue Book has carried as "unidentified" since 1953): "The visual sightings were probably Geminid meteors," he writes. No supporting discussion; just that assertion. In fact, one finds that the radiant of this December shower lay at about 280 degrees azimuth and about 55 degrees elevation angle at 0535C on this date. Hence, any Geminids seen to the starboard of an aircraft on 315-320 degrees heading at 0530C would have been descending almost

perpendicular to the NE horizon, a 90 degrees direct mismatch with Thayer's explanation.

The above-described multiple radar target events Thayer explains in terms of a ducting layer that showed on the 0900C Burwood radar. "The strange moving targets seen on the radar were probably caused by imperfections in the atmospheric layer forming the radio duct allowing radio energy to enter the ducting layer at various points. This would create sporadic returns." The failure to pick up the coastline just prior to the UFO episode he explains as follows: "A transmitter located above a radio duct and emitting a high enough frequency to be affected, as the radar undoubtedly was, does not excite propagation within the duct. This implies that the coastline below the duct would not be visible to the radar located above the duct." Thayer's argument is, of course, quite erroneous; he has his argument upside down. And casual suggestion that the complex target behavior reported in this case was the result of "a series of gravity waves running along the duct" is mere verbalism.

Thus were radar UFOs discounted in the Condon Report. Perhaps the above examples will give at least some indication that there remains an unsolved scientific problem here, that there exist unidentified radar returns of a category for which atmospheric effects have been proposed as explanations, but on ground that are to date less than satisfactory.

Lake Titicaca from space, May 1985.

The origin of the name Titicaca is unknown. It has been translated as "Rock Puma", allegedly because of its resemblance to the shape of a puma hunting a rabbit, combining words from the local languages Quechua and Aymara, and as "Crag of Lead". Locally, the lake goes by several names.

Because the southeast quarter of the lake is separated from the main body by the Strait of Tiquina, the Bolivians call this smaller part *Lago Huiñaymarca* and the larger part *Lago Chucuito*. In Peru, these smaller and larger parts are referred to as *Lago Pequeño* and *Lago Grande*, respectively.

Centuries' Old UFO Coin Remains Mystery

Fri Jan 28, 2005 4:24 pm

An unidentified flying object on a 17th century French coin continues to mystify rare coin experts.

Colorado Springs, CO (PRWEB) January 28, 2005 -- After decades of seeking possible answers about a mysterious UFO-like design on a 17th century French copper coin, a prominent numismatic expert says it remains just that: an unidentified flying object. After a half-century of research, the design has defied positive identification by the numismatic community.

"It was made in the 1680s in France and the design on one side certainly looks like it could be a flying saucer in the clouds over the countryside," said Kenneth E. Bressett of Colorado Springs, Colorado, a former President of the 32,000-member American Numismatic Association and owner of the curious coin.

"Is it supposed to be a UFO of some sort, or a symbolic representation of the Biblical Ezekiel's wheel? After 50 years of searching, I've heard of only one other example of it, and nothing to explain the unusual design."

Bressett said the mysterious piece is not really a coin, but a "jeton," a coin-like educational tool that was commonly used to help people count money, or sometimes used as a money substitute for playing games. It is about the size of a U.S. quarter-dollar and similar to thousands of other jetons with different religious and educational designs that were produced and used in Europe during the 16th and 17th centuries.

"The design on this particular piece could be interpreted as showing either a UFO or Ezekiel's wheel, but little else. Some people think the Old Testament reference to Ezekiel's wheel may actually be a description of a long-ago UFO," he explained.

"The legend written in Latin around the rim is also mystifying. 'OPPORTUNUS ADEST' translates as 'It is here at an opportune time.' Is the object in the sky symbolic of needed rainfall, or a Biblical reference or visitors from beyond? We probably will never know for certain," said Bressett.

"It is part of the lure of numismatics that makes coin collecting so intriguing."

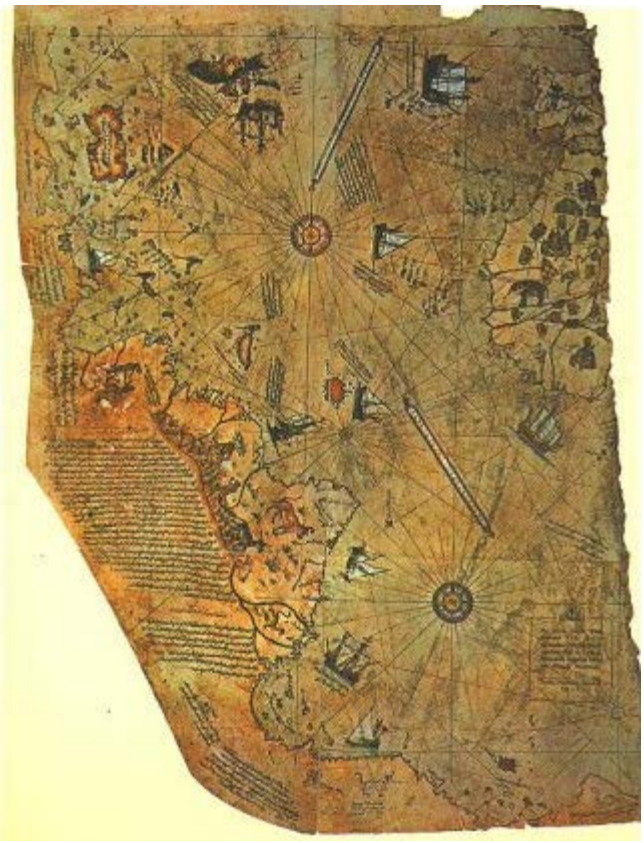
THE PIRI REIS MAP



Piri Reis was a famous Turkish admiral in the sixteenth century who had a passionate interest in his collection of old maps. When the admiral's flagship tied up in some new port, Piri Reis and his aides scoured the bazaars for ancient charts and maps. During a now-forgotten sea battle, the admiral captured several enemy sailors. One of the captives boasted of sailing with Columbus on his three voyages to the new world.

Reis, ever on the lookout for new information and maps, questioned the man, who turned out to be one of Columbus's pilots. Reis asked if Columbus was mad, or if he knew that there was land across the ocean. The pilot said he knew, that he had maps, and that the pilot still had the maps!

The admiral's eyes scanned the yellowed charts. The tracings on the parchment were precise. Using his collection of antique charts, Admiral Piri Reis compiled a world map in 1513. In 1929, a group of historians, poking around in the harem section of the Palace of Topkapi in Constantinople, found the Piri Reis map in a pile of rubble. These scholars were astonished to discover that the map showed the coastal outlines of South and North America. It also included precise data on the southern polar continent, Antarctica, supposedly not discovered until 1818.

Arlington T. Mallerey, an authority on ancient maps, eventually came into possession of these documents. He was puzzled to find that the geographical data on the map was not in the correct position. Assisted by the U.S. Navy Hydrographic Bureau, Mallerey made a grid and transferred the Piri Reis map onto a globe. The map was totally accurate.

Later, studies by Professor Charles H. Hapgood and Richard W. Strachan revealed that the originals of the Piri Reis charts may have been aerial pictures snapped at a great height. The rivers, mountain ranges, islands, desserts, and plateaus, were drawn with unusual accuracy. As an example, Greenland was represented as being two separate islands. This was confirmed just recently by a French polar expedition; their seismic soundings beneath the surface indicated ice covers the space between the two islands.

In Antarctica, an exploratory profile was made by seismic soundings. It revealed mountains and valleys beneath the ice cap that matched the markings on the Piri Reis map. In the January, 1966, issue of Fate magazine, Professor Charles H. Hapgood explained the sensational discovery.

"Now this was extraordinary. In the first place, nobody is supposed to have discovered Antarctica until 1818, three hundred years after Piri Reis, and it is regarded as unthinkable that the Greeks, Romans, Babylonians or Phoenicians could have sailed that far. In the second place, the ice cap in Antarctica is supposed to be millions of years old, and therefore to have been in existence long before man evolved on earth. Mallerey's suggestion (that someone had mapped the south polar continent before the ice cap originated) appeared outrageous and scientists in general refused to concern themselves with it."

It seems incredible that ancient cartographers had maps that were more accurate than the best charts produced today. Yet, Captain Mallerey stated that "it was evident that there was very little ice then, at either pole. But, secondly, they had a record, for example, of every mountain range in Northern Canada and Alaska, including some ranges that the Army Map Service did not have. The U.S. Army has since found them! Just how they were able to do it, we do not know. But, you will probably recall that the Greeks had the legend of an airplane. We don't know how they could map so accurately without an airplane. But, map it they did. Not only that, but they knew their longitude correctly, something we could not do until two hundred years ago."

FRESCO IN TURKEY HINTS AT PILOTED CRAFT

The fresco is on the wall behind an alter in a church in Turkey, I believe. The 'pilot' is looking back and around the curved painting to the other side where another craft with a different being in it is looking at the occupant of the craft in the picture.

Unfortunately my UFO Library is in storage at the moment as Sue and I separated a couple of months ago and my current space is too small for most of my 'stuff' and I don't have access to the book to get a scan of the other craft.

Subject: No Genuine Airships in 1897

To: Francis Ridge <nicap@insightbb.com>

Hi Fran,

Good to hear from you again. I've come to the conclusion that there are no genuine UFOs among the 1897 airships, though the matter is more complicated that just hoaxes. Many honest and reliable people reported a light in the sky, but their description of how the light sank slowly toward the horizon makes it clear that they were looking at Venus or some other heavenly body. Other honest people reported a structured object with lights, moving in a manner and direction no heavenly body could manage, but these people were the victims of a hoax. What they saw was a fire balloon (hot air), a sort of device popular as a form of 4th of July "firework" but available in drug stores (the Targets and Wal-Marts of the day) all year 'round. A follow-up of airship sightings in a town often revealed who the jokesters were, or reported the burnt-out carcass of the fire balloon had landed in some farmer's field, now and then starting a fire. Then we have the out-and-out hoaxes. Fakery was an accepted form of newspaper entertainment in those days, with snake stories and ghosts being popular and credited to the "snake editor." Airships opened a new opportunity and the newspapers welcomed it. The local correspondent, paid by the column inch, could buy the groceries by cranking out an elaborate airship story. One town could play a joke on a neighboring town by attributing airship sightings to it and then commenting on its lapse from temperance. Tall-tale tellers could regale their audiences with a good airship yarn, and practical jokers could contrive wood-and-sheet-metal contraptions and claim that it crashed. In a day when people knew their neighbors face to face, affidavits meant little and airship lies left no blemish on a man's reputation--witness Alexander Hamilton's calfnapping airship and support of him by the prominent people of the county, all of whom were in on the joke as members of a local liars' club.

I was sorry to see the Aurora crash come back to life recently, since it was effectively killed off long ago. In the first place, only one newspaper story reported it. The Dallas Morning News account was repeated in other newspapers, but no other reporter went to the scene for independent confirmation. This contrasts with a Waterloo, Iowa, hoax where the jokers left a model airship in a field and many papers covered the story, also many people came to town or took a look while passing through, then commented on what they had seen when they returned home. None of this happened with Aurora. Local histories, one of them written only ten years or so after 1897, fail to mention the crash even though it would have been the most sensational event in the history of the town. Most old residents knew nothing of the crash when it became popular in the mid-1970s, and those who claimed that the story was true had ulterior motives or a fanciful disposition. The real motive behind the story seems to have been an attempt to attract some attention to a town that had suffered the recent disappointment of being bypassed by the railroad. In any case, for a long list of reasons, Aurora was a hoax.

And so it goes: The reliable airship stories are not spectacular and the spectacular airship stories are not reliable. This pattern repeats throughout the two thousand or more reports until there is nothing left that I would want to stand up and defend as a genuine UFO. There are some impressive UFOs pre-1947, but they are not to be found in the various sightings waves of UFO prehistory.

Best regards,
Eddie Bullard

Form: Analysis
Date: 24 Dec 2006
From: Brad Sparks
Subject: Analysis: Amateur Astronomer (Medical Doctor) Sighting, April 15, 1897 St Louis, MO

St. Louis Post-Dispatch of April 16, 1897, pp.1-2 [Credit: Thomas Bullard.]

Airship Viewed by Telescope /
Dr. Leo Caplan Watched the Aerial Visitor /
Distinctly Saw the Car....

The airship visited St. Louis again Thursday night. This time the bright searchlight was not only seen by thousands but the object was observed through a telescope and the outlines of the craft were seen.

[The observer was a medical doctor.]

Dr. Caplan is a dabbler in astronomy and frequently gazes at the heavenly bodies. He knows that he did not see a star....

"I was walking to my home on Washington avenue last night about 7:45...when I saw a bright light almost overhead. It was northwest of the zenith...

"But the moment I saw this light I realized it was something unusual and I hastened home, ran to the roof and brought my telescope to bear on the object. Before taking a sight I noticed the light was swaying from side to side. The effect was exactly that of a searchlight that was being manipulated.

"The moment I looked through the glass I discovered a long black body behind the light. It was exactly the cigar shape that has been described.

"I thought something must be the matter with the lens and I turned the telescope on different stars and planets. There was no unnatural effect evident and I brought the glass to bear again on the mysterious visitor. At first I could not locate the light, then I found that it had moved several degrees to the north. When I caught it again I once more made out the cigar-shaped craft.

"The airship...moved over considerable space in five minutes, and I followed it all the time. It took a northwesterly course, then veered to the West and finally to North. Then it darted off in that direction and was lost to sight. I had the light in view fully ten minutes from the time I first saw it on the street....

"It could not have been a star?"

"No sir. I looked at Venus, at Sirius and other bright stars several times, then back at the mysterious object. Besides, through my glass the object behind the light was distinctly visible."

ANALYSIS

This is a fairly impressive sighting by someone who was obviously technically trained, as an MD and familiar with astronomy and astronomical terms and concepts (zenith, degrees, etc.), equipped with a telescope actually used in the sighting. Dr. Caplan has time, date, duration, location, directional data, and states he did control checks of stars and planets, naming Sirius and Venus and excluding them. The UFO he saw was NW of Zenith when first seen, moved several degrees to the N, then seemed to head NW then W then N when it "darted off" to the N out of sight after a total of 10 minutes. In the telescope he saw a "cigar shape" "long black body behind the light" that had been "swaying" like a searchlight.

In fact Sirius was indeed up in the SW sky at azimuth 222 degs elevation 23 degs at 7:45 PM in St Louis that night of April 15, 1897. Venus was low on the horizon in the WNW at 294 degs azimuth, elevation 7 degs, dropping to 5 degs by the end of the sighting at 7:55 PM. Venus was nowhere near the Zenith (which is 90 degs elevation) and did not set until about 8:30 PM, still in the WNW (now at 301 degs azimuth).

Is there any reason to doubt this account? This would seem to go a long ways towards establishing the reality of a UFO phenomenon in the 1897 wave, including "cigar shape" dark body behind a brilliant white light. I would definitely like to see more amateur astronomer accounts.

I am having real trouble seeing how Dr Caplan's sighting can possibly be explained by a fire balloon carrying a Japanese lantern, as has been suggested. The fundamental characteristic of a "fire balloon" is FIRE. Caplan did not report 2 lights (fire balloon and Japanese lantern), only one light. If the Japanese lantern suspended below the fire balloon was what was "swaying" like a searchlight then Caplan should have seen the fire in the fire balloon as well. Moreover he reports no color let alone multicolors of a Japanese lantern, evidently it was white light.

Caplan reported a "cigar-shaped" "long black body behind the light" when viewing through his telescope, which does not at all seem like a Japanese lantern, designed to be lit up ("lantern") not be dark. He should have been able to resolve the fine details of the Japanese lantern construction through his telescope. He did not report seeing flames or flame coloration to the one and only light, which should have been obvious when viewed through his telescope, to say nothing of seeing an obvious Japanese lantern shape in the scope had it been such.

Subject: Early Airship in Vincennes Sky, April 16, 1897

Source: The Valley Advance, Vincennes, Indiana, March 18, 1980 Vol. 16, No. 28,
Cat: 1

UFOs and the Media
Vincennes Morning Commercial
April 16, 1897

Unidentified flying objects are nothing new for the people of Vincennes. In 1897 a mysterious airship passed over the city twice on the night of Friday, April 16. According to the Vincennes Morning Commercial, the airship first appeared about nine oclock, traveling along the extreme eastern portion of the horizon: A sphere of golden light was first seen in the vicinity of the Union Depot, from down in the city. Those near the ship claimed they could clearly see the dark lines of its car, although no passengers were observed.

Many reputable citizens witnessed the flight. From his home on Burnetts Heights, Sam Judah said he could plainly see the ship with its fluttering wings, its movements resembling a side wheeler steam-boat, sailing through the air with incredible velocity.

From his doorway, where he had gone to look at his thermometer, Col. Ewing saw the light, which he at first thought was a falling star, but as it moved so slowly, soon became convinced that it was the inevitable airship. Ewing watched it for about four minutes.

Anton Simon noticed a ball of fire, moving in a north-westerly to southeasterly course, which he later realized was an airship.

Victor Schonfeld, somewhat of an expert observer, having made airships and balloons, a life-long study, and having even made several ascensions in his time, testified that this was a genuine airship.

Among many others who saw the airship were Col. M.P. Ghee, Thomas Eastham, Judge DeWolf, Will Mason, Scott Emison, Jesse Foulks, all highly reputable witnesses.

The airship first passed rapidly overhead in a southwesterly direction. An hour and a half later, it was seen again, passing over the northern portion of the city, traveling in a northwesterly direction:

The last time it seemed to pass directly over the fairgrounds (present-day Gregg Park) and traveled more slowly than in its first swift passage straight over the city.

It is thought that the navigator turned his flying machine around and started back, or that the ship landed near the city and started back.

Some say voices could be heard in the airship, and one gentleman, who saw it from Burnetts Heights says he could see a man moving about in the ship and that he appeared to be adjusting the machinery.

The Commercial concluded: Other cities have seen the airship and now Vincennes is strictly up to date'.

In fact, the Vincennes encounter was only one of some 200 sightings made by thousands of people in 19 states, during our nations first UFO flap of 1896-1897.

In his article, Close Encounters of the Earliest Kind, in the December, 1979 issue of American Heritage magazine, Ron Genini described the beginning of the flap in (where else?) California, in November of 1896. There were elements of hoax in some of the accounts, but many people believed they saw something. Many of the eyewitness accounts agreed that a traveling light or airship moved against the wind at an altitude of from 50 to 2,000 feet. It was cigar- or egg-shaped, with wing-like propellers or fan-like wheels revolving rapidly . . . and a doubly powerful arc light at its bottom center.

Soon, hoaxters got into the act, claiming to have ridden the flying machine, or to have talked with its crew, or even to have invented it. When some of these hoaxes were exposed, newspapers became skeptical, questioning the veracity or sobriety of witnesses, and making the airship the butt of jokes. After the excitement died down on the West Coast, the airship reappeared in the skies of the Midwest and South in April, 1897. In the first chapter of his book The UFO Controversy in America, David Michael Jacobs details the many sightings over Chicago, St. Louis, Milwaukee, Omaha, Kansas City, Dallas, and many other cities and towns.

Colored or intensely bright white lights were the most characteristic feature of the airship descriptions; in many other particulars the descriptions agreed with those from California--a cylindrical, or cigar-shaped body with a propeller or propellers.

As Jacobs points out, the first modern airship or dirigible was built in France in 1898, but there is no record of any American inventor producing an airship at this time. And the speeds attributed to the mysterious airship--estimated at up to 200 miles per hour--far exceeded anything possible at the time. Again, there were some hoaxters, and again the newspapers were skeptical.

In Vincennes, the evening Western Sun, having been scooped by the morning paper, wrote a kind of tongue-in-cheek parody:

The Air Ship Sails the Azure Depths like a Tongue of Light; It Floats through Space Leaving Multitudes of Worshipping People on the Earth Beneath-- Supposed to Contain Five Passengers and to be Enroute to Jacksonville, Fla.
The Sun described the effects upon the supposed superstitious inhabitants of that aristocratic colored suburb known as Idaho,who were scared to death.

A few days later the airship lent itself to advertising:

The airship seems to be an assured fact. But it is not attracting so much attention as the slashing prices that are being made on hardware and bicycles at Scott & Sons. Millers Drug Store on Main Street used the airship to draw attention to its ice cream and sodas.

There was not another sighting flap until 1946.

The chief difference was that while people in 1896-7 thought that the UFOs were man-made objects, in the modern ear the tendency is to believe that they are not of this earth.

A winged ship in the sky was how the San Francisco Call described a mysterious airship seen at Sacramento on Nov. 17, 1896. The illustration closely matches the description of one seen over Vincennes in April, 1897.

FLYING MATTRESS? -- With wings like mattress ticking, a California airship is depicted shining its light earthward. Also shown is a four-man crew in a canopied cockpit. Singing to the accompaniment of a phonograph supposedly could be heard coming from the craft.

SQUADRON REGULATION 26 June 1954
NUMBER 55-6

OPERATIONS

Combat Intelligence Team

Paragraph	
Purpose.	1
Scope	2
References	3
Responsibility	4
Definition	5

1. Purpose. To define and establish the concept of the 4602d AISS Combat Intelligence Team.

2. Scope. This regulation is applicable to all units of the 4602d Air Intelligence Service Squadron.

3. References. Squadron Regulation 50-3, 56-1, 200-2

4. Responsibility. It is the responsibility of OIC's of 4602d AISS field units to insure compliance with provisions of this regulation.

5. Definition.

a. Combat Intelligence Team: The smallest operational unit of 4602d AISS which functions as a team in the investigation of downed enemy aircraft or interrogation of enemy crewmen or in training for the performance of the combat mission. The team will consist of one officer or noncommissioned officer and two airmen. At least one of the three team members must have a technical intelligence skill. If one team member has two or more of the required skills, that advantage will not obviate the necessity for the teams to have three members, each of whom will have a minimum of one of the three required skills.

b. Team Commander: The one officer or noncommissioned officer in charge of the Intelligence Team will be designated the Team Commander.

HEADQUARTERS

AIR DEFENSE COMMAND
Colorado Springs, Colorado

20 January 1954
Mr. Norman Philcox
Liaison Section
Federal Bureau OF Investigation
9th and Pennsylvania
Washington, D.C.

Dear Mr. Philcox:

Colonel White recently held his semi-annual Commanders' Conference for Flights and Detachments of the 4602nd Air Intelligence Service Squadron. I addressed the conference at its start and covered among other things the need for establishing effective liaison and working relationships with pertinent elements of the FBI. As background. I covered the nature and wherefore of relations and business with local law enforcement agencies. I stated my understanding of the agreement reached at the conference in your offices which I attended during December.

All present at the 4602nd Commanders' Conference were apparently in full understanding and agreement and reported excellent progress in field relationships with local FBI agents.

Last Friday, 15 January, I was informed in a telephone conversation with Colonel George Perry in Washington, that certain incidents had been reported which seemed to indicate either a different interpretation or a misunderstanding by 4602nd personnel or by FBI agents or both in three different parts of the country.

This was further clarified on 18 January in another conversation with Colonel Perry. There is undoubtedly some basic difference in our previous interpretation of agreements reached at the Washington conference in December. As a result of my 18 January conversation with Colonel Perry, I believe I am fully aware of the Bureau's interpretation and wishes. As a result, I have had Colonel White clarify his directives and my advice to his conference by sending new TWX instructions to the field.

Because understanding is even more difficult at a distance, I am inclosing a copy of these latest instructions for the perusal and comment of the Bureau. I would appreciate early advice if there is any disagreement with or suggested addition to these instructions.

==========
==========

{ Page 2}

Mr. Norman Philcox, FBI - 20 Jan 1954

I feel certain I correctly assessed the governing spirit of our conference and agreement in Washington. The basic mission of the 4602nd was recognized together with the need for an understanding of that mission and assistance to it where practical by law enforcement agencies throughout the country. I believe we recognized the need for this assistance and the prior preparation therefore as being a basic part of one of the vital elements of our national air defense.

On the other hand, we recognized the basic legal and traditional relationship of the FBI to all law enforcement agencies. Because of the necessity to avoid any possible confusion in the minds of anyone, and especially of law enforcement agencies, it was agreed that the manner and amount of 4602nd liaison and assistance arrangements with law enforcement agencies were legally and properly the responsibility of the FBI. Only in the actual manner of how the FBI proposed to exercise that responsibility was there any misunderstanding on the part of myself or my representatives. We are glad to correct any wrong interpretations we have had. I sincerely hope that the enclosure meets FBI approval and understanding. If not it will be amended accordingly. At the risk of repetition, we feel that effective and smooth arrangements for law enforcement agencies to assist the 4602nd as practical, are an essential and important aspect of preparing foe the air defense of our country. Hence we greatly appreciate the past and continuing efforts of the FBI to this end.

Sincerely yours,

W.M. BURGESS

I. SURVEY OF PERIOD

...

The beginning of this period marked a new phase of squadron development. The activation phase was over. Reassessment and standardization of directives and policies was completed early in this historical period. The squadron entered into a period of determining the best solutions to problems and procedures of training, liaison, personnel,

records maintenance and supply and administration. Refinement of squadron policies and directives was the keynote of this period.

Unidentified Flying Object (UFOB) Program

With the publication of AFR 200-2 [3] in August 1954, ADC was given the responsibility of conducting all field investigations within the Zone of the Interior to determine the identity of any UFOB. Further, AFR 200-2 noted that the 4602d AISS had the capability to investigate these reports for ADC, and stipulated that Air Force activities should establish and maintain liaison with the nearest element of the 4602d. Thus the 4602d AISS was indirectly designated as ADC investigating and collection agency of UFOB reports. The Air Technical Intelligence Center (ATIC), Wright-Patterson AFB, Ohio was responsible for analyzing and evaluating the reports. The 4602d, therefore, worked directly with ATIC in formalizing agreements, plans and policies, and in the actual conduct of the UFOB program. On the 17th and 18th of November, 1954, the Commander, 4602d AISS and his staff met with ATIC representative, Captain Charles Hardin, and Doctor Allen Hynek, USAF Contract Astronomer, to discuss ATIC-4602d AISS relationships in the investigation and processing of Unidentified Flying Object reports. During the course of the conference, general information was exchanged relative to the UFOB program, procedures were developed relative to the handling of UFOB reports and the criteria for the evaluation of reports and conducting investigations were discussed. This meeting resulted in a report being drawn up and submitted to ATIC [4] wherein were recommended certain agreements and

SECRET

procedures relative to the UFOB program. ATIC, in a 1st endorsement to this letter report, concurred in the agreements and procedures recommended. [5] Following the above agreement, ATIC sent to the 4602d a UFOB Guide [6] designed for use in determining the feasibility of follow-up investigation of Unidentified Flying Object reports and in identifying the objects or phenomena concerned. At the close of this period the squadron was in the process of compiling a detailed UFOB Guide of its own. The squadron was also in receipt of U.S. Air Force Technical Information Forms [7] for use in questioning observers of unidentified flying phenomena.

In an effort to establish firm Squadron and ADC policies regarding the UFOB program, the 4602d submitted to ADC, for comments and approval, draft copies of the following Regulations and Memoranda: [8]

Proposed ADCR, Subj: UFOB's
Proposed ADC Staff memorandum, Subj: UFOB's
Proposed 4602d Squadron Regulation, Subj: UFOB's

Since the receipt of AFR 200-2 (UFOB), dtd 12 August, 1954, to 31 December, 1954, the 4602d AISS had received 112 preliminary UFOB reports. Out of these, twenty-five (25) follow-up field investigations were conducted by 4602d personnel. Although the 4602d was responsible for only for follow-up field investigation and reporting and not the final analysis and identification of UFOB's, nevertheless, seventy-seven (77) reports were resolved by analysis at this squadron.

CONAD INTELLIGENCE CONFERENCE

1 - 3 November 1954

GUIDE FOR 4602D AISS COMMITTEE DISCUSSIONS

I. INTRODUCTION: There are two problems for consideration by this committee which are related. The first part of the problem is to determine who shall exercise operational control over the field units of the 4602d AISS. The second problem pertains to the difficulties experienced by our field units in obtaining sufficient logistical support from the base support organization. the problems attendant to the tenant status of 4602d field units will in some degree be affected by the recommendations of the committee with respect to the first problem. Namely, that of who will exercise operational control. Therefore, the problem of operational control will be considered first.

AIR FORCE REGULATION DEPARTMENT OF THE AIR FORCE
No. 200-2 WASHINGTON, 12 AUGUST 1954

INTELLIGENCE

Unidentified Flying Objects Reporting (Short Title: FLYOBRPT)

Paragraph

Purpose and Scope 1

Definitions 2

Objectives. 3

Responsibility 4

Guidance 5
.
ZI Collection 6
Reporting 7
Evidence 8
.
Release of Facts. 9

1. Purpose and Scope: This Regulation establishes procedures for information and evidence materiel pertaining to unidentified flying objects and sets forth the responsibility of Air Force activities in this regard. It applies to all Air Force Activities.

2. Definitions:

a. Unidentified Flying Objects (UFOB) relates to any airborne object which by performance, aerodynamic characteristics, or unusual features, does not conform to any presently known aircraft or missile type, or which cannot be positively identified as a familiar object.

b. Familiar Objects - Include balloons, astronomical bodies, birds, and so forth.

3. Objectives: Air Force interest in unidentified flying objects is twofold: First as a possible threat to the security of the United States and its forces, and secondly, to determine technical aspects involved.

a. Air Defense. To date the flying objects reported have imposed no threat to the security of the United States and its Possessions. However, the possibility that new air vehicles, hostile aircraft or missiles may first be regarded as flying objects by the initial observer is real. This requires that sightings be reported as rapidly and as completely as information permits.

b. Technical Analysis thus far has failed to provide a satisfactory explanation for a number of sightings reported. The Air Force will continue to collect and analyze reports until all sightings can be satisfactorily explained., bearing in mind that:

(1) To measure scientific advances, the Air Force must be informed on experimentation and development of new air vehicles.

(2) The possibility exists that an air vehicle of revolutionary configuration may be developed.

(3) The reporting of all pertinent factors will have a direct bearing on the success of the technical analysis.

4. Responsibility:

a. Reporting. Commanders of all Air Force activities will report all information and evidence that may come to their attention, including that received from adjacent commands of the other services and from civilians.

b. Investigation. Air Defense Command will conduct all field investigations within the ZI, to determine the identity of any UFOB.

c. Analysis. The Air Technical Intelligence Center (ATIC), Wright-Patterson Air Force Base, Ohio, will analyze and evaluate: All information and evidence reported within the ZI after the Air Defense Command has exhausted all efforts to identify the UFOB; and all information and evidence collected in overseas areas.

d. Cooperation. All activities will cooperate with Air Defense Command representatives to insure the economical and prompt success of an investigation, including the furnishing of air and ground transportation, when feasible.

5. Guidance. The thoroughness and quality of a report or investigation into incidents of unidentified flying objects are limited only by the resourcefulness and imagination of the person responsible for preparing the report. Guidance set forth below is based on experience and has been found helpful in evaluating incidents.

a. Theodolite measurements of changes of azimuth and elevation and angular size.

b. Interception, identification, or air search

_____
*This Regulation supersedes AFR 200-2, 26 August 1953,
Including Change 200-2A, 2 November 1953.

==========

{Page 2}

AFL 200-5
5-7

action. these actions may be taken if appropriate and within the scope of existing air defense regulations.

c. Contact with local aircraft control and Warning (AC&W) units, ground observer corps (GOC) posts and filter centers, pilots and crews of aircraft aloft at the time and place of sighting whenever feasible, and any other persons or organizations which may have factual data bearing on the UFOB or may be able to offer corroborating evidence, electronic or otherwise.

d. Consultation with military and civilian weather forecasters to obtain data on: Tracks of weather balloons released in the area, since these often are responsible for sightings; and any unusual meteorological activity which may have a bearing on the UFOB.

e. Consultation with astronomers in the area to determine whether any astronomical body or phenomenon would account for or have bearing on the observation.

f. Contact with military and civilian tower operators, air operations offices, and so forth, to determine whether the sighting could be the result of misidentification of known aircraft.

g. Contact with persons who might have knowledge of experimental aircraft of unusual configuration, rocket and guided missile firings, and so forth in the area.

6. ZI Collection. The Air Defense Command has a direct interest in the facts pertaining to UFOB's reported within the ZI and has, in the 4602d Air Intelligence Service Squadron (AISS), the capability to investigate these reports. The 4602d AISS is composed of specialists trained for field collection and investigation of matters of air intelligence interest which occur within the zone of the ZI. This squadron is highly mobile and deployed throughout the ZI as follows: Flights are attached to air defense divisions, detachments are attached to each of the defense forces, and the squadron headquarters is located at Peterson Field, Colorado, adjacent to Headquarters, Air Defense Command. Air Force activities, therefore, should establish and maintain liaison with the nearest element of this squadron. This can be accomplished by contacting the appropriate echelon of the Air Defense Command as outlined above.

a. All Air Force activities are authorized to conduct such preliminary investigation as may be required for reporting purposes; however, investigations should not be carried beyond this

point, unless such action is requested by the 4602d AISS.

b. On occasions - after initial reports submitted -additional data is required which can be developed more economically by the nearest Air Force activity, such as narrative statements, sketches, marked maps, charts, and so forth. Under such circumstances, appropriate commanders will be contacted by the 4602d AISS.

c. Direct communication between echelons of the 4602d AISS and Air Force activities is authorized.

7. Reporting. Information relating to unidentified flying objects will be reported promptly. The method (electrical or written) and priority of the dispatch will be selected in accordance with the apparent intelligence value of the information. In most instances, reports will be made by electrical means: Information over 24 hours old will be given a "deferred" precedence. reports over 3 days old will be made by written report prepared on AF Form 112, Air Intelligence Information report, and AF Form 112a, Supplement to AF Form 112,

a. Addressees:

(1) Electrical Reports. All electrical reports will be multiple addressed to:

(a) Commander, Air Defense Command, Ent Air Force Base, Colorado Springs, Colorado.

(b) Nearest Air Division (Defense) (For ZI only.)

(c) Commander, Air Technical Intelligence Center, Wright-Patterson Air Force Base, Ohio.

(d) Director of Intelligence, Headquarters, USAF, Washington 25, D.C.

(2) Written Reports:

(a) Within the ZI, reports will be submitted direct to the Air Defense Command. Air Defense Command will reproduce the report and distribute it to interested ZI intelligence agencies. The original report together with the notation of the distribution effected then will be forwarded to the Director of Intelligence, Headquarters, USAF, Washington 25, D.C.

(b) Outside the ZI, reports will be submitted direct to the Director of Intelligence, Headquarters, USAF, Washington 25, D.C. as prescribed in "Intelligence Collection Instructions" (ICI), June 1954.

b. Short Title. "UFOB" will appear at the beginning of the text of electrical messages and in the subject of written reports.

c. Negative Data. The word "negative"

==========

in reply to any numbered item of the report format will indicate that all logical leads were developed without success. The phrase "not applicable" (N/A) will indicate that the question does not apply to the sighting being investigated.

d. Report Format Reports will include the following numbered items:

(1) Description of the object(s):

(a) Shape

(b) Size compared to known object (use one of the following terms: Head of a pin, pea, dime, nickel, quarter, half dollar, silver dollar, baseball, grapefruit, or basketball) held in the hand at about arms length.

(c) Color.

(d) Number.

(e) Formation, if more than one.

(f) Any discernible features or details.

(g) Tail, trail, or exhaust, including size of same compared to size of object(s).

(h) Sound. If heard, describe sound.

(i) Other pertinent or unusual features.

(2) Description of course of object(s):

(a) What first called the attention of the observer(s) to the object(s)?

(b) Angle of elevation and azimuth of the objects when first observed.

(c) Angle of elevation and azimuth of the objects upon disappearance.

(d) Description of flight path and maneuvers of object(s).

(e) Manner of disappearance of objects(s)

(f) Length of time in sight

(3) Manner of observation:

(a) Use one or a combination of the following items: Ground-visual, ground-electronic, air-electronic. (If electronic, specify type of radar.)

(b) Statement as to optical aids (telescopes, binoculars, and so forth) used and description thereof.

(c) If the sighting is made while airborne, give type of aircraft, identification number, altitude, heading, speed and home station.

(4) Time and date of sighting:

(a) Zulu time-date group of sighting.

(b) Light conditions (use one of the following terms): Night, day, dawn, dusk.

(5) Locations of observer(s). Exact latitude and longitude of each observer or Georef position,

or position with reference to a known landmark.

(6) Identifying information of all observer(s):

(a) Civilian - Name, age, mailing address, occupation.

(b) Military - Name, grade, organization, duty, and estimate of reliability.

(7) Weather and winds-aloft conditions at time and place of sightings:

(a) Observer(s) account of weather conditions.

(b) Report from nearest AWS or U.S. Weather Bureau Office of wind direction and velocity in degrees and knots at surface, 6,000', 10,000', 16,000', 20,000', 30,000', 50,000', and 80,000', if available.

(c) ceiling.

(d) Visibility.

(e) Amount of cloud cover.

(f) Thunderstorms in area and quadrant in which located.

(8) Any other unusual activity or condition, meteorological, astronomical, or otherwise, which might account for the sighting.

(9) Interception and identification action taken. (Such action may be taken whenever feasible, complying with existing air defense directives.)

(10) Location of any air traffic in the general area at the time of the sighting.

(11) Position title and comments of the preparing officer, including his preliminary analysis of the possible cause of the sighting(s).

e. Security. Reports should be unclassified unless inclusion of data required by c and d below mandates a higher classification.

8. Evidence. The existence of physical evidence (photographs or materiel) will be promptly reported.

a. Photographic:

(1) Visual: the negative and two prints will be forwarded, all original film, including wherever possible both prints and negatives, will be titled or otherwise properly identified as to place, time, and date of the incident

==========

{Page 4 (Unnumbered)}

AFL 200-5
8-9

(see "Intelligence Collection Instructions" (ICI), June 1954)

(2) Radar: Two copies of each print will be forwarded. Prints of radarscope photography will be titled in accordance with AFR 95-7 and forwarded in accordance with AFR 95-6.

b. Materiel Suspected or actual items of materiel which come into the possession of any Air Force Echelon will be safeguarded in such manner as to prevent any defacing or alteration which might reduce its value for intelligence examination and analysis.

9. Release of Facts: Headquarters USAF will release summaries of evaluated data which will inform the public on this subject. In response to local inquiries, it is permissible to in form news media representatives on UFOB's when the object is positively identified as a familiar object (see paragraph 2b), except that the following type of data warrants protection and should not be revealed: Names of principles, intercept and investigation procedures, and classified radar data. For those objects which are not explainable, only the fact that ATIC will analyze the data is worthy of release, due to many unknowns involved.

HEADQUARTERS
4602D AIR INTELLIGENCE SERVICE SQUADRON
Ent Air Force Base
Colorado Springs, Colorado

AISOP
23 November 1954

SUBJECT: Report of Visit of ATIC Representatives

TO: Commander
Air technical Intelligence Center
Wright-Patterson Air Force Base
Dayton, Ohio

1. On 17 and 18 November 1954, the Commander, 4602dAISS and his staff met with Captain Charles Hardin, ATIC and Doctor Allen Hynek, USAF Contract Astronomer, for the purpose of discussing ATIC-4602d AISS relationships in the investigation and processing of Unidentified Flying Object reports. During the course of the conference general information was exchanged relative to the UFOB program, procedures were developed relative to the handling of UFOB reports and the criteria for the evaluation of reports and conducting investigations were discussed.

2. The evaluation of all UFOB reports as well as the lines of inquiry of investigations, will be governed by the application of certain hypotheses to the data available. In the majority of cases, provided the information concerning the sightings is sufficiently complete, the data will suggest that the sighting was probably some known object or natural

phenomena. For example, the data available might suggest to the investigator the hypothesis that the object was an aircraft. A check list will then be applied to the data using the hypothesis that the sighting was an aircraft. the check list will contain those items which, in combination, characterize aircraft from other possible objects or phenomena. For example, if the object was an aircraft, then there should have been noise, there should have been radar observation I certain areas, etc. The application of these check lists will suggest the lines of a follow-up investigation in the event the data is insufficient to satisfy the elements of proof necessary to identification. ATIC will furnish the 4602d AISS with the check lists referred to above which will assist in the identification of UFOB's and will cover, for example, aircraft, balloons, astronomical phenomena, guided missiles, etc. In addition a special evaluation of preliminary UFOB reports must be made to determine whether follow-up investigations can reasonably be expected to result in additional reliable and usable data.

3. Evaluation of Preliminary reports

a. ATIC will furnish the 4602d AISS with "rule of thumb" criteria to be used by the Squadron Headquarters in determining the necessity for

==========

{Page 2}

Hq, 4602D AISS, Ent AFB, Colorado Springs, Colo. subj:
Report of Visit of ATIC Representatives

a follow-up, field investigation of a UFOB report. These criteria will cover, among others, the following subjects:

(1) Duration of sighting

(2) Number of persons reporting the sighting.

(3) Distance from location of sighting to nearest 4602D AISS field unit.

(4) Reliability of person or persons reporting the sighting.

(5) Number of independent sightings reported.

(6) The value in obtaining additional information immediately.

(7) Existence of physical evidence (photographs, material, hardware).

b. It was noted that a single extraordinary circumstance might require follow-up, field investigation even though the general application of the criteria furnished by ATIC indicates that further investigation would probably yield little additional information.

c. In general follow-up field investigation of a preliminary UFOB report will not be warranted when the hypothesis suggested by the preliminary report of the incident cannot be tested by facilities available.

4. Exhaustion of Effort in the Investigation of UFOB's: Effort will be considered as exhaustive when every logical, physical hypothesis suggested by a qualified report of the incident has been tested by the facilities available.

a. Qualified preliminary reports shall be considered to be those which merit further investigation under the criteria set forth in paragraph 3 above.

5. Unsolved Cases: A case shall be considered unsolved after every suggested hypothesis has been tested by available facilities and a large percentage of the data in the report does not correlate with the characteristics of known objects or

natural phenomena.

2

==========

{Page 3}

Hq, 4602D AISS, Ent AFB, Colorado Springs, Colo. subj:
Report of Visit of ATIC Representatives

6. The following procedures were agreed upon:

a. In case a UFOB sighting is reported initially by non-Air Force sources in letter form to either ATIC or the 4602d AISS, the file card will be made in duplicate by the recipient, and one copy forwarded to the other agency. This card will indicate that the UFOB was reported by letter and will show the action taken.

b. ATIC will be forwarded a file card indicating the action taken by the 4602d AISS on preliminary reports transmitted to the 4602d by electrical means.

c. The results of follow-up field investigations made by the 4602d AISS and reported on AF Form 112 will, in all cases, be sent to ATIC, DI USAF, and such other agencies as the Commander, 4602d AISS, deems necessary.

d. ATIC may require specific information for aid in analyzing a reported UFOB sighting which can be furnished by a field unit of the 4602d AISS. provided travel is not involved, ATIC may contact the appropriate unit directly. In case ATIC desires detailed investigation or action which would necessitate travel, request will be made by ATIC to the Commander, 4602d AISS.

e. File card reflecting action taken or conclusions reached by ATIC on either a preliminary or follow-up UFOB report will be sent to Commander, 4602d AISS under the following circumstances.

(1) When conclusions of ATIC relative to identification of the sighting are at variance with those reached by 4602d AISS.

(2) When additional action is initiated by ATIC following the completion of action by the 4602d AISS.

7. Exchange of information: As a result of the ATIC experience in the field of investigations of UFOB reports, information of a general interest was discussed during the visit of ATIC representatives and will be furnished to the 4602d AISS on a continuing basis. Examples of such information follow:

a. Grid cameras. Information relative to the present distribution of grid cameras and changes in the current distribution.

b. Statistics. Consolidation of statistics reflecting trends.

3

Report of Visit of ATIC Representatives

total reports and studies conducted by contract agencies.

c. Examples of proper and improper UFOB reporting.

d. List of standard replies to letters requesting action or information concerning reported sightings.

8. It is requested that the guides for evaluation of reports referred to in paragraphs 2 and 3 above be furnished at the earliest practicable date. Concurrence or comments relative to the procedures and agreements contained herein are solicited.

UFOB GUIDE

This guide is designed for use in determining the feasibility of follow-up investigation of Unidentified Flying Object reports and in identifying the objects or phenomena concerned.

AIR TECHNICAL INTELLIGENCE CENTER

WRIGHT-PATTERSON AIR FORCE BASE, OHIO

encl #1

==========

{Unnumbered Page 1}

PART I

FOLLOW-UP INVESTIGATIONS

GENERAL

An UFOB report is worthy of follow-up investigation when it contains information to suggest that a positive identification with a well known phenomenon may be made or when it characterizes an unusual phenomenon. The report should suggest almost immediately, largely by the coherency and clarity of the data, that there is something of identification value and/or scientific value.

In general, reports which should be given consideration are those which involve several reliable observers, together or separately, and which concern sightings of greater duration than one quarter minute. Exception should be made to this when circumstances attending the report are considered to be extraordinary.

Special attention should be given to reports which give promise of a "fix" on the position and to those reports involving trajectories.

RULES OF THUMB

Every UFOB case should be judged individually but there are a number of "rules of thumb," under each of the following headings, which should prove helpful in determining the necessity for follow-up investigation.

1. Duration of Sighting

When the duration of a sighting is less than 15 seconds, the probabilities are great that it is not worthy of follow-up. As a word of caution, however, should a large number of individual observers concur

==========

{Page 2}

on an unusual sighting of a few seconds duration, it should not be dismissed.

When a sighting has covered just a few seconds, the incident, when followed-up in the past, has almost always proved to be meteor or a gross misidentification of a common object owing to the lack of time in which to observe.

2. Number of Persons Reporting the Sighting

Short duration sightings by single individuals are seldom worthy of follow-up.

Two or three competent independent observations carry the weight of 10 or more simultaneous individual observations. As an example, 25 people at one spot may observe a strange light in the sky. This, however, has less weight than two reliable people observing the same light from different locations. In the later case a position-fix is indicated.

3. Distance from Location of Sighting to Nearest Field Unit

Reports which meet the preliminary criterion stated above should all be investigated if their occurrence is in the

immediate operating vicinity of the squadron concerned.

For reports involving greater distances, follow-up necessity might be judged as being inversely proportional to the square of the distances concerned. For example, an occurrence 150 miles away might be considered to have four times the importance (other things being equal) than one that is 300 miles away.

==========

{Page 3}

4. Reliability of Person or Persons reporting

In establishing the necessity of follow-up investigation only "short term" reliability of individuals can be employed. Short term reliability is judged from the logic and coherency of the original report and by the age and occupation of the person. Particular attention should be given to whether the occupation involves observation reporting or technical knowledge.

5. Number of Individual Sightings Reported

Two completely individual sightings, especially when separated by a mile or more constitutes sufficient cause for follow-up, assuming previous criterion have not been violated.

6. The Value of Obtaining Additional Information Immediately.

If the information cannot be obtained within seven days, the value of such information is greatly decreased.

It is of great value to obtain additional information immediately if previously stated criteria have been met. Often, if gathered quickly, two or three items (weather conditions, angular speed, changes in trajectory, duration, etc.) are sufficient for immediate evaluation.

If investigation is undertaken after weeks or months the original observers cease to be of value as far as additional new information is concerned. Generally, later interrogation yields only bare repetition of facts originally reported plus an inability on the part of the observer to be objective.

7. Existence of Evidence (Photographs, Material, Hardware)

In cases where any physical evidence exists, a follow-up should

==========

{Page 4}

be made if some of the above criteria have not been met.

CONCLUSION - Part I

It is understood that all above criteria must be evaluated in terms of "common sense." The original report, from its wording and clarity will almost always suggest to the reader whether there is any "paydirt" in the report.

==========

{Page 5}

PART II

IDENTIFICATION CRITERIA

GENERAL

When a UFO report meets, in large measure, the criteria projected in Part I and a follow-up investigation is instituted, then the interrogator should ask what physical object or objects might have served as the original stimulus for the report. The word "object" here includes optical phenomena such as reflections from clouds, sundogs, etc.

Frequently one or perhaps two solutions will be immediately suggested by the nature of the report. The word "solution" cannot be used here in the scientific sense. A solution in UFOB work means that a hypothesis has been arrived at which appears to have the greatest probability of having given rise to the given report.

Following is a group of hypotheses or examples which should prove helpful in arriving at solutions. A check should be made to see how many of the items are satisfied by the report and how many are missing. An effort should be made to obtain any missing items as soon as possible.

Each typical hypothesis is listed on a separate page.

==========

{Page 6}

AIRCRAFT

1. Shape: From conventional to circular or elliptical.

2. Size: Pinpoint to actual.

3. Color: Silver to bright yellow (night - black or color of lights).

4. Speed: Generally only angular speeds can be observed. This depends on distance but small objects crossing major portion of the sky in a minute can be ruled out. Aircraft will nor cross a major portion of the sky in less than a minute whereas a meteor certainly will.

5. Formation: Two to twenty. numbers greater than 20 more likely birds than aircraft.

6. Tails: May or may not have (vapor and exhaust).

7. Sound: Zero to loud shrill or low depending on altitude.

8. Course: Steady, straight or gently curving (not erratic - may appear still if approaching head-on). Right angle turns and sudden reversals, changes in altitude ruled out. Note: Although report may indicate erratic course, if other items check, follow-up should proceed on basis of aircraft because of psychological tendencies of excited people to exaggerate course changes.
9. Time In Sight: More than 15 seconds, generally of the order of a minute or two.

10. Lighting conditions: Night or Day.

11. Radar: Should show normal aircraft returns.

==========

{Page 7}

BALLOONS

1. Shape: Round to cigar or pinpoint

2. Size: Balloons up to a hundred feet will generally appear from pinpoint to size of a pea held at armslength

3. Color: Silver, white or many tints. It may possibly appear dark as when projected against the clouds.

4. Speed: Large scale erratic speed ruled out. In general hovering to slow apparent speed.

5. Formation: Single to cluster.

6. Trails: None.

7. Sound: None.

8. Course: Straight with a gradual ascent, unless falling.

9. Time In Sight: Generally long. Note: Balloon may suddenly burst and disappear.

10. Lighting conditions: Night or day but especially at sunset.

11. Radar: No return except when carrying sonde equipment.

==========

{Page 8}

METEOR

1. Shape: Round to elongated.

2. Size: Pinpoint to size of moon.

3. Color: Flaming yellow with red, green or blue possible.

4. Speed: Crosses major portion of sky in few seconds except if coming head-on.

5. Formation: Generally single - can break into shower at end of trajectory. Occasionally (but rare) small groups.

6. Trails: At night almost always a luminous train which can persist as long as half an hour (rarely). daytime meteors are much less frequently observed. In daytime, leaves a whitish to dark smoke trail.

7. Sound: None, although occasionally reported (believed psychological).

8. Course: Generally streaking downward, but not necessarily sharply downward. Can on rare occasion give impression of slight rise.

9. Time In Sight: Longest reported about 30 seconds, generally less than 10.

10. Lighting conditions: Day or night. Mostly night.

11. Radar: Return from meteor itself is highly improbable, however, the train left by a meteor, is a good radar reflector.

12. Other: An exceptionally bright meteor is called a fireball. These are rare but extremely spectacular and on occasion have been known to light surroundings to the brightness of daylight.

==========

{Page 9}

STARS OR PLANETS

GENERAL

The planets, Venus, Mars, Jupiter, and Saturn are generally brighter than any star, but they twinkle much less (unless very close to the horizon). Stars twinkle a great deal and when near the horizon can give impression of flashing light in many colors.

1. Shape: Pinpoint - starlike.

2. Size: Never appreciable.

3. Color: Yellow with rainbow variations.

4. Speed: Stars apparent speed carries them from east to west in the course of the night but they are often reported as erratic. The effect is psychological, most people being unable to consider a point as being stationary. Occasionally turbulence in the upper atmosphere can cause a star to appear to jump (rare) but somehow twinkling stars give the impression of movement to many people. Note: Just because the report says the light moves does not rule out the possibility of it being a star unless motion is from one part of the sky to another in relatively short time.

5. Formation: There are no clusters of very bright stars but faint stars are grouped in their familiar constellations. Note: A report of 4 or 5 bright clustering lights would rule out stars.

6. Trails: None.

==========

{Page 10}

7. Sound: None.

8. Course: Always describe a 24 hour circle around pole of sky from east to west.

9. Time In Sight: When clear, stars are always visible. most stars rise or set during the course of the night. Stars low in western sky set within an hour or two. Stars in east, always go higher in the sky.

10. Lighting conditions: Night - Twilight.

11. Radar: None.

==========

{Page 11}

OPTICAL PHENOMENA

GENERAL

This can cover a multitude of things. Original scanning of the report should be made to attempt to determine whether it more likely describes a material object or an optical illusion.

Optical phenomena which have been reported as UFOBs run from reflections on clouds and layers of ice crystals (sundogs) to the many types of mirages. No one set of optical phenomena can be set down as representation for the whole class.

There is no limit to the speed of optical phenomena. Reflections can travel from incredible speed , as in the case of a search-beacon on high clouds, to stationary.

These cases if well reported will almost always warrant follow-up. Their variety and connection with upper atmospheric conditions make these observations especially valuable scientifically.

1. Shape: Generally round but can be elliptical or linear.

2. Size: Starlike to large luminous glow.

3. Color: Generally yellow.

4. Speed: Stationary to fantastic.

5. Formation: Any.

6. Trails: None.

7. Sound: None.

8. Course: Any.

9. Time In Sight: Any

==========

{Page 12}

10. Lighting conditions: Day and night.

11. Radar: No return. In special cases radar response will occasionally have to do with unusual clouds, and meteorological phenomena such as described in Minnaert's book "Light and Color in the Open Air."

12. Other: One of the standard types is the "sundog." In this a large luminous halo is seen around the sun with one to four images of the sun placed along the halo at intervals of 90 degrees. Another report often has to do with a bright planet or even the moon shining through a light overcast. Mirages reflections are said to occur frequently when temperature inversions exist in the atmosphere. If an optical phenomena is suspected, routine check of the

meteorological records should be made to establish whether such inversions existed.

FOREWORD

This is a book about unidentified flying objects - UFO's - flying saucers." It is actually more than a book; it is a report because it is the first time that anyone, either military or civilian, has brought together in one document all the facts about this fascinating subject. With the exception of the style, this report is written exactly the way I would have written it had I been officially asked to do so while I was chief of the Air Force's project for investigating UFO reports - Project Blue Book.

In many instances I have left out the names of the people who reported seeing UFO's, or the names of certain people who were associated with the project, just as I would have done in an official report. For the same reason I have changed the locale in which some of the UFO sightings occurred. This is especially true in CHAPTER FIFTEEN, the story of how some of our atomic scientists detected radiation whenever UFO's were reported near their "UFO detection stations." This policy of not identifying the "source," to borrow a term from military intelligence, is insisted on by the Air Force so that the people who have co-operated with them will not get any unwanted publicity. Names are considered to be "classified information."

But the greatest care has been taken to make sure that the omission of names and changes in locale has in no way altered the basic facts because this report is based on the facts - all of the facts - nothing of significance has been left out.

It was only after considerable deliberation that I put this report together, because it had to be told accurately, with no holds barred. I finally decided to do it for two reasons. First, there is world-wide interest in flying saucers; people want to know the facts. But more often than not these facts have been obscured by secrecy and confusion, a situation that has led to wild speculation on one end of the scale and an almost dangerously blasé'
attitude on the other. It is only when all of the facts are laid out that a correct evaluation can be made.

Second, after spending two years investigating and analyzing UFO reports, after talking to the people who have seen UFO's - industrialists, pilots, engineers, generals, and just the plain man-on-the-street, and after discussing the subject with many very capable scientists, I felt that I was in a position to be able to put together the complete account of the Air Force's struggle with the flying saucer.

The report has been difficult to write because it involves something that doesn't officially exist. It is well known that ever since the first flying saucer was reported in June 1947 the Air Force has officially said that there is no proof that such a thing as an interplanetary spaceship exists. But what is not well known is that this conclusion is far from being unanimous among the military and their scientific advisers because of the one word, proof; so the UFO investigations continue.

The hassle over the word "proof" boils down to one question: What constitutes proof? Does a UFO have to land at the River Entrance to the Pentagon, near the Joint Chiefs of Staff offices? Or is it proof when a ground radar station detects a UFO, sends a jet to intercept it, the jet pilot sees it, and locks on with his radar, only to have the UFO streak away at a phenomenal speed? Is it proof when a jet pilot fires at a UFO and sticks to his story even under the threat of court-martial? Does this constitute proof?

The at times hotly debated answer to this question may be the answer to the question, "Do the UFO's really exist?"

I'll give you the facts - all of the facts - you decide.

July 1955 E. J. RUPPELT

Chapter 1, Project Blue Book & the UFO Story, 1

CHAPTER ONE

Project Blue Book and the UFO Story

In the summer of 1952 a United States Air Force F-86 jet interceptor shot at a flying saucer.

This fact, like so many others that make up the full flying saucer story has never before been told.

I know the full story about flying saucers and I know that it has never before been told because I organized and was chief of the Air Force Project Blue Book, the special project set up to investigate and analyze unidentified flying object, or UFO reports. (UFO is the official term that I created to replace the words 'flying saucers.")

There is a fighter base in the United States which I used to visit frequently because, during 1951, 1952, and 1953, it got more than its share of good UFO reports.

The commanding officer of the fighter group, a full colonel and command pilot, believed that UFO's were real. The colonel believed in UFO's because he had a lot of faith in his pilots - and they had chased UFO's in their F-86's. He had seen UFO's on the scopes of his radar sets, and he knew radar.

The colonel's intelligence officer, a captain, didn't exactly believe that UFO's were real, but he did think that they warranted careful investigation. The logic the intelligence officer used in investigating UFO reports - and in getting answers to many of them - made me wish many times that he worked for me on Project Blue Book.

One day the intelligence officer called me at my base in Dayton, Ohio. He wanted to know if I was planning to make a trip his way soon. When I told him I expected to be in his area in about a week, he asked me to be sure to look him up. There was no special hurry, he added, but he had something very interesting to show me.

When we got wind of a good story, Project Blue Book liked to start working on it at once, so I asked the intelligence officer to tell me what

---

he had. But nothing doing. He didn't want to discuss it over the phone. He even vetoed the idea of putting it into a secret wire. Such extreme caution really stopped me, because anything can be coded and put in a wire.

When I left Dayton about a week later I decided to go straight to the fighter base, planning to arrive there in midmorning. But while I was changing airlines my reservations got fouled up, and I was faced with waiting until evening to get to the base. I called the intelligence officer and told him about the mix-up. He told me to hang on right there and he would fly over and pick me up in a T-33 jet.

As soon as we were in the air, on the return trip, I called the intelligence officer on the interphone and asked him what was going on. What did he have? Why all the mystery? He tried to tell me, but the interphone wasn't working too well and I couldn't understand what he was saying. Finally he told me to wait until we returned to his office and I could read the report myself.

Report! If he had a UFO report why hadn't he sent it in to Project Blue Book as he usually did?

We landed at the fighter base, checked in our parachutes, Mae West's, and helmets, and drove over to his office. There were several other people in the office, and they greeted me with the usual question, "What's new on the flying saucer front?" I talked with them for a while, but was getting impatient to

find out what was on the intelligence officer's mind. I was just about to ask him about the mysterious report when he took me to one side and quietly asked me not to mention it until everybody had gone.

Once we were alone, the intelligence officer shut the door, went over to his safe, and dug out a big, thick report. It was the standard Air Force reporting form that is used for all intelligence reports, including UFO reports. The intelligence officer told me that this was the only existing copy. He said that he had been told to destroy all copies, but had saved one for me to read.

With great curiosity, I took the report and started to read. What had happened at this fighter base?

About ten o'clock in the morning, one day a few weeks before, a radar near the base had picked up an unidentified target. It was an odd target in that it came in very fast - about 700 miles per hour - and then slowed down to about 100 miles per hour. The radar showed that it was located northeast of the airfield, over a sparsely settled area.

Unfortunately the radar station didn't have any height finding equipment. The operators knew the direction of the target and its distance from the station but they didn't know its altitude. They reported the target, and two F-86's were scrambled.

Project Blue Book and the UFO Story.3

The radar picked up the F-86's soon after they were airborne, and had begun to direct them into the target when the target started to fade on the radarscope. At the time several of the operators thought that this fade was caused by the target's losing altitude rapidly and getting below the radar's beam. Some of the other operators thought that it was a high flying target and that it was fading just because it was so high.

In the debate which followed, the proponents of the high flying theory won out, and the F-86's were told to go up to 40,000 feet. But before the aircraft could get to that altitude, the target had been completely lost on the radarscope.

The F-86's continued to search the area at 40,000 feet, but could see nothing. After a few minutes the aircraft ground controller called the F-86's and told one to come down to 20,000 feet, the other to 5,000 feet, and continue the search, The two jets made a quick letdown, with one pilot stopping at 20,000 feet and the other heading for the deck.

The second pilot, who was going down to 5,000 feet, was just beginning to pull out when he noticed a flash below and ahead of him. He flattened out his dive a little and headed toward the spot where he had seen the light. As he closed on the spot he suddenly noticed what he first thought was a weather balloon. A few seconds later be realized that it couldn't be a balloon because it was staying ahead of him. Quite an achievement for a balloon, since he had built up a lot of speed in his dive and now was flying almost straight and level at 3,000 feet and was traveling "at the Mach."

Again the pilot pushed the nose of the F-86 down and started after the object. He closed fairly fast, until he came to within an estimated 1,000 yards. Now he could get a good look at the object. Although it had looked like a balloon from above, a closer view showed that it was definitely round and flat saucer shaped. The pilot described it as being "like a doughnut without a hole."

As his rate of closure began to drop off, the pilot knew that the object was picking up speed. But he pulled in behind it and started to follow. Now he was right on the deck.

About this time the pilot began to get a little worried. What should he do? He tried to call his buddy, who was flying above him somewhere in the area at 20,000 feet. He called two or three times but could get no answer. Next he tried to call the ground controller but he was too low for his radio to

carry that far. Once more he tried his buddy at 20,000 feet, but again no luck.

By now he had been following the object for about two minutes and during this time had closed the gap between them to approximately 500

---

yards. But this was only momentary. Suddenly the object began to pull away, slowly at first, then faster. The pilot, realizing that he couldn't catch it, wondered what to do next.

When the object traveled out about 1,000 yards, the pilot suddenly made up his mind - he did the only thing that he could do to stop the UFO. It was like a David about to do battle with a Goliath, but he had to take a chance. Quickly charging his guns, he started shooting. . . . A moment later the object pulled up into a climb and in a few seconds it was gone. The pilot climbed to 10,000 feet, called the other F-86, and now was able to contact his buddy. They joined up and went back to their base.

As soon as he had landed and parked, the F-86 pilot went into operations to tell his story to his squadron commander. The mere fact that he had fired his guns was enough to require a detailed report, as a matter of routine. But the circumstances under which the guns actually were fired created a major disturbance at the fighter base that day.

After the squadron commander had heard his pilot's story, he called the group commander, the colonel, and the intelligence officer. They heard the pilot's story.

For some obscure reason there was a "personality clash," the intelligence officer's term, between the pilot and the squadron commander. This was obvious, according to the report I was reading, because the squadron commander immediately began to tear the story apart and accuse the pilot of "cracking up," or of just "shooting his guns for the hell of it and using the wild story as a cover-up."

Other pilots in the squadron, friends of the accused pilot - including the intelligence officer and a flight surgeon - were called in to "testify." All of these men were aware of the fact that in certain instances a pilot can "flip" for no good reason, but none of them said that he had noticed any symptoms of mental crack-up in the unhappy pilot.

None, except the squadron commander. He kept pounding home has idea - that the pilot was "psycho" - and used a few examples of what the report called "minor incidents" to justify his stand.

Finally the pilot who had been flying with the "accused" man was called in. He said that he had been monitoring the tactical radio channel but that he hadn't heard any calls from his buddy's low flying F-86. The squadron commander triumphantly jumped on this point, but the accused pilot tended to refute it by admitting he was so jumpy that he might not have been on the right channel. But when he was asked if he had checked or changed channels after he had lost the object and before he had finally contacted the other F-86, he couldn't remember.

So ended the pilot's story and his interrogation.

The intelligence officer wrote up his report of a UFO sighting, but at the last minute, just before sending it, he was told to hold it back. He was a little unhappy about this turn of events, so he went in to see why the group commander had decided to delay sending the report to Project Blue Book.

They talked over the possible reactions to the report. If it went out it would cause a lot of excitement, maybe unnecessarily. Yet, if the pilot actually had seen what he claimed, it was vitally important to get the report in to ATIC immediately. The group commander said that he would make his decision after a talk with his executive officer. They decided not to send the report and ordered it destroyed.

When I finished reading, the intelligence officer's first comment was, "What do you think?"

Since the evaluation of the report seemed to hinge upon conflicts between personalities I didn't know, I could venture no opinion, except that the incident made up the most fascinating UFO report I'd ever seen. So I batted the intelligence officer's question back to him.

"I know the people involved," he replied, "and I don't think the pilot was nuts. I can't give you the report, because Colonel told me to destroy it. But I did think you should know about it." Later he burned the report.

The problems involved in this report are typical. There are certain definite facts that can be gleaned from it; the pilot did see something and he did shoot at something, but no matter how thoroughly you investigate the incident that something can never be positively identified. It might have been a hallucination or it might have been some vehicle from outer space; no one will ever know. It was a UFO.

The UFO story started soon after June 24, 1947, when newspapers all over the United States carried the first flying saucer report. The story told how nine very bright, disk shaped objects were seen by Kenneth Arnold, a Boise, Idaho, businessman, while he was flying his private plane near Mount Rainier, in the state of Washington. With journalistic license, reporters converted Arnold's description of the individual motion of each of the objects like "a saucer skipping across water"- into "flying saucer," a name for the objects themselves. In the eight years that have passed since Arnold's memorable sighting, the term has become so common that it is now in Webster's Dictionary and is known today in most languages in the world.

For a while after the Arnold sighting the term "flying saucer" was used to describe all disk shaped objects that were seen flashing through the

---

sky at fantastic speeds. Before long, reports were made of objects other than disks, and these were also called flying saucers. Today the words are popularly applied to anything seen in the sky that cannot be identified as a common, everyday object.

Thus a flying saucer can be a formation of lights, a single light, a sphere, or any other shape; and it can be any color. Performance wise, flying saucers can hover, go fast or slow, go high or low, turn 90 degree corners, or disappear almost instantaneously.

Obviously the term "flying saucer" is misleading when applied to objects of every conceivable shape and performance. For this reason the military prefers the more general, if less colorful, name: unidentified flying objects. UFO (pronounced Yoo-foe) for short.

Officially the military uses the term "flying saucer" on only two occasions. First in an explanatory sense, as when briefing people who are unacquainted with the term "UFO": "UFO - you know- flying saucers." And second in a derogatory sense, for purposes of ridicule, as when it is observed, "He says he saw a flying saucer."

This second form of usage is the exclusive property of those persons who positively know that all UFO's are nonsense. Fortunately, for the sake of good manners if for no other reason, the ranks of

this knowing category are constantly dwindling. One by one these people drop out, starting with the instant they see their first UFO.

Some weeks after the first UFO was seen on June 24, 1947, the Air Force established a project to investigate and analyze all UFO reports. The attitude toward this task varied from a state of near panic, early in the life of the project, to that of complete contempt for anyone who even mentioned the words "flying saucer."

This contemptuous attitude toward "flying saucer nuts" prevailed from mid 1949 to mid 1950. During that interval many of the people who were, or had been, associated with the project believed that the public was suffering from "war nerves."

Early in 1950 the project, for all practical purposes, was closed out; at least it rated only minimum effort. Those in power now reasoned that if you didn't mention the words "flying saucers" the people would forget them and the saucers would go away. But this reasoning was false, for instead of vanishing, the UFO reports got better and better.

Airline pilots, military pilots, generals, scientists, and dozens of other people were reporting UFO's, and in greater detail than in reports of the past. Radars, which were being built for air defense, began to pick up some very unusual targets, thus lending technical corroboration to the unsubstantiated claims of human observers.

Project Blue Book and the UFO Story.7

As a result of the continuing accumulation of more impressive UFO reports, official interest stirred. Early in 1951 verbal orders came down from Major General Charles P. Cabell, then Director of Intelligence for Headquarters, U.S. Air Force, to make a study reviewing the UFO situation for Air Force Headquarters.

I had been back in the Air Force about six months when this happened. During the second world war I had been a B-29 bombardier and radar operator. I went to India, China, and later to the Pacific, with the original B-29 wing. I flew two DCF's, and some Air Medals' worth of missions, got out of the Air Force after the war, and went back to college. To keep my reserve status while I was in school, I flew as a navigator in an Air Force Reserve Troop Carrier Wing.

Not long after I received my degree in aeronautical engineering, the Korean War started, and I went back on active duty. I was assigned to the Air Technical Intelligence Center at Wright-Patterson Air Force Base, in Dayton, Ohio. ATIC is responsible for keeping track of all foreign aircraft and guided missiles. ATIC also had the UFO project.

I had just finished organizing a new intelligence group when General Cabell's order to review past UFO reports came down. Lieutenant Colonel Rosengarten, who received the order at ATIC, called me in and wanted to know if I'd take the job of making the review. I accepted.

When the review was finished, I went to the Pentagon and presented my findings to Major General Samford, who had replaced General Cabell as Director of Intelligence.

ATIC soon got the word to set up a completely new project for the investigation and analysis of UFO reports. Since I had made the review of past UFO reports I was the expert, and I got the new job. It was given the code name Project Blue Book, and I was in charge of it until late in 1953. During this time members of my staff and I traveled close to half a million miles. We investigated dozens of UFO reports, and read and analyzed several thousand more. These included every report ever received by the Air Force.

For the size of the task involved Project Blue Book was always under- staffed, even though I did have ten people on my regular staff plus many paid consultants representing every field of science. All of us on Project Blue Book had Top Secret security clearances so that security was no block in our investigations. Behind this organization was a reporting network made up of every Air Force base intelligence officer and every Air Force radar station in the world, and the Air Defense Command's Ground Observer Corps. This reporting net sent Project Blue Book reports on every conceivable type of UFO, by every conceivable type of person.

8.The Report on Unidentified Flying Objects

What did these people actually see when they reported that they had observed a UFO? Putting aside truly unidentifiable flying objects for the present, this question has several answers.

In many instances it has been positively proved that people have reported balloons, airplanes, stars, and many other common objects as UFO's. The people who make such reports don't recognize these common objects because something in their surroundings temporarily assumes an unfamiliar appearance.

Unusual lighting conditions are a common cause of such illusions. A balloon will glow like a "ball of fire" just at sunset. Or an airplane that is not visible to the naked eye suddenly starts to reflect the sun's rays and appears to be a "silver ball." Pilots in F-94 jet interceptors chase Venus in the daytime and fight with balloons at night, and people in Los Angeles see weird lights.

On October 8, 1954, many Los Angeles newspapers and newscasters carried an item about a group of flying saucers, bright lights, flying in a V formation. The lights had been seen from many locations over Southern California. Pilots saw them while bringing their airplanes into Los Angeles International Airport, Air Force pilots flying out of Long Beach saw them, two CBS reporters in Hollywood gave an eyewitness account, and countless people called police and civil defense officials. All of them excitedly reported lights they could not identify. The next day the Air Force identified the UFO's; they were Air Force airplanes, KC-97 aerial tankers, refueling B-47 jet bombers in flight. The reason for the weird effect that startled so many Southern Californians was that when the refueling is taking place a floodlight on the bottom of the tanker airplane lights up the bomber that is being refueled. The airplanes were flying high, and slowly, so no sound was heard; only the bright floodlights could be seen. Since most people, even other pilots, have never seen a night aerial refueling operation and could not identify the odd lights they saw, the lights became UFO's.

In other instances common everyday objects look like UFO's because of some odd quirk in the human mind. A star or planet that has been in the sky every day of the observer's life suddenly "takes off at high speed on a highly erratic flight path." Or a vapor trail from a high flying jet - seen a hundred times before by the observer - becomes a flying saucer.

Some psychologists explain such aberrations as being akin to the crowd behavior mechanism at work in the "bobby sox craze." Teen-agers don't know why they squeal and swoon when their current fetish sways and croons. Yet everybody else is squealing, so they squeal too. Maybe that great comedian, Jimmy Durante, has the answer: "Everybody wants to

---

Project Blue Book and the UFO Story.9

get into the act." I am convinced that a certain percentage of UFO reports come from people who see flying saucers because others report seeing them.

But this "will to see" may have deeper roots, almost religious implications, for some people.

Consciously or unconsciously, they want UFO's to be real and to come from outer space. These individuals, frightened perhaps by threats of atomic destruction, or lesser fears - who knows what - act as if nothing that men can do can save the earth. Instead, they seek salvation from outer space, on the forlorn premise that flying saucer men, by their very existence, are wiser and more advanced than we. Such people may reason that a race of men capable of interplanetary travel have lived well into, or through, an atomic age. They have survived and they can tell us their secret of survival. Maybe the threat of an atomic war unified their planet and allowed them to divert their war effort to one of social and technical advancement. To such people a searchlight on a cloud or a bright star is an interplanetary spaceship.

If all the UFO reports that the Air Force has received in the past eight years could be put in this "psychological quirk" category, Project Blue Book would never have been organized. It is another class of reports that causes the Air Force to remain interested in UFO's. This class of reports are called "Unknowns."

In determining the identity of a UFO, the project based its method of operation on a well known psychological premise. This premise is that to get a reaction from one of the senses there must be a stimulus. If you think you see a UFO you must have seen something. Pure hallucinations are extremely rare.

For anything flying in the air the stimulus could be anything that is normally seen in the air. Balloons, airplanes, and astronomical bodies are the commoner stimuli. Birds and insects are common also, but usually are seen at such close range that they are nearly always recognized. Infrequently observed things, such as sundogs, mirages, huge fireballs, and a host of other unusual flying objects, are also known stimuli.

On Project Blue Book our problem was to identify these stimuli. We had methods for checking the location, at any time, of every balloon launched anywhere in the United States. To a certain degree the same was true for airplanes. The UFO observer's estimate of where the object was located in the sky helped us to identify astronomical bodies. Huge files of UFO characteristics, along with up-to-the-minute weather data, and advice from specialists, permitted us to identify such things as sun dogs, paper caught in updrafts, huge meteors, etc.

This determination of the stimuli that triggered UFO sightings, while

---

not an insurmountable task, was a long, tedious process. The identification of known objects was routine, and caused no excitement. The excitement and serious interest occurred when we received UFO reports in which the observer was reliable and the stimuli could not be identified. These were the reports that challenged the project and caused me to spend hours briefing top U.S. officials. These were the reports that we called "Unknowns."

Of the several thousand UFO reports that the Air Force has received since 1947, some 15 to 20 per cent fall into this category called unknown. This means that the observer was not affected by any determinable psychological quirks and that after exhaustive investigation the object that was reported could not be identified. To be classed as an unknown, a UFO report also had to be "good", meaning that it had to come from a competent observer and had to contain a reasonable amount of data.

Reports are often seen in the newspapers that say: "Mrs. Henry Jones, of 5464 South Elm, said that 10:00 A.M. she was shaking her dust mop out of the bedroom window when she saw a flying saucer"; or "Henry Armstrong was driving between Grundy Center and Rienbeck last night when he saw a light. Henry thinks it was a flying saucer." This is not a good UFO report.

This type of UFO report, if it was received by Project Blue Book, was stamped "Insufficient Data for Evaluation" and dropped into the dead file, where it became a mere statistic.

Next to the "Insufficient Data" file was a file marked "C.P." This meant crackpot. Into this file went all reports from people who had talked with flying saucer crews, who had inspected flying saucers that had landed in the United States, who had ridden in flying saucers, or who were members of flying saucer crews. By Project Blue Book standards, these were not "good" UFO reports either.

But here is a "good" UFO report with an "unknown" conclusion:

On July 24, 1952, two Air Force colonels, flying a B-25, took off from Hamilton Air Force Base, near San Francisco, for Colorado Springs, Colorado. The day was clear, not a cloud in the sky.

The colonels had crossed the Sierra Nevada between Sacramento and Reno and were flying east at 11,000 feet on "Green 3," the aerial highway to Salt Lake City. At 3:40 P.M. they were over the Carson Sink area of Nevada, when one of the colonels noticed three objects ahead of them and a little to their right. The objects looked like three F-86's flying a tight V formation. If they were F-86's they should have been lower, according to civil air regulations, but on a clear day some pilots don't watch their altitude too closely.

In a matter of seconds the three aircraft were close enough to the B-25

---

to be clearly seen. They were not F-86's. They were three bright silver, delta wing craft with no tails and no pilot's canopies. The only thing that broke the sharply defined, clean upper surface of the triangular wing was a definite ridge that ran from the nose to the tail.

In another second the three deltas made a slight left bank and shot by the B-25 at terrific speed. The colonels estimated that the speed was at least three times that of an F-86. They got a good look at the three deltas as the unusual craft passed within 400 to 800 yards of the B-25.

When they landed at Colorado Springs, the two colonels called the intelligence at Air Defense Comman d Headquarters to make a UFO report. The suggestion was offered that they might have seen three F-86's. The colonels promptly replied that if the objects had been F-86's they would have easily been recognized as such. The colonels knew what F-86's looked like.

Air Defense Command relayed the report to Project Blue Book. An investigation was started at once.

Flight Service, which clears all military aircraft flights, was contacted and asked about the location of aircraft near the Carson Sink area at 3:40 P.M. They had no record of the presence of aircraft in that area.

Since the colonels had mentioned delta wing aircraft, and both the Air Force and the Navy had a few of this type, we double-checked. The Navy's deltas were all on the east coast, at least all of the silver ones were. A few deltas painted the traditional navy blue were on the west coast, but not near Carson Sink. The Air Force's one delta was temporarily grounded.

Since balloons once in a while can appear to have an odd shape, all balloon flights were checked for both standard weather balloons and the big 100 foot diameter research balloons. Nothing was found.

A quick check on the two colonels revealed that both of them were command pilots and that each had several thousand hours of flying time. They were stationed at the Pentagon. Their highly classified assignments were such that they would be in a position to recognize anything that the

United States knows to be flying anywhere in the world.

Both men had friends who had "seen flying saucers" at some time, but both had openly voiced their skepticism. Now, from what the colonels said when they were interviewed after landing at Colorado Springs, they had changed their opinions.

Nobody knows what the two colonels saw over Carson Sink. However, it is always possible to speculate. Maybe they just thought they were close enough to the three objects to see them plainly. The objects might have been three F-86's: maybe Flight Service lost the records. It could be that the three F-86's had taken off to fly in the local area of their base

---

but had decided to do some illegal sight-seeing. Flight Service would have no record of a flight like this. Maybe both of the colonels had hallucinations.

There is a certain mathematical probability that any one of the above speculative answers is correct - correct for this one case. If you try this type of speculation on hundreds of sightings with "unknown" answers, the probability that the speculative answers are correct rapidly approaches zero.

Maybe the colonels actually did see what they thought they did, a type of craft completely foreign to them.

Another good UFO report provides an incident in which there is hardly room for any speculation of this type. The conclusion is more simply, "Unknown," period.

On January 20, 1952, at seven twenty in the evening, two master sergeants, both intelligence specialists, were walking down a street on the Fairchild Air Force Base, close to Spokane, Washington.

Suddenly both men noticed a large, bluish white, spherical shaped object approaching from the east. They stopped and watched the object carefully, because several of these UFO's had been reported by pilots from the air base over the past few months. The sergeants had written up the reports on these earlier sightings.

The object was traveling at a moderately fast speed on a horizontal path. As it passed to the north of their position and disappeared in the west, the sergeants noted that it had a long blue tail. At no time did they hear any sound. They noted certain landmarks that the object had crossed and estimated the time taken in passing these landmarks. The next day they went out and measured the angles between these landmarks in order to include them in their report.

When we got the report at ATIC, our first reaction was that the master sergeants had seen a large meteor. From the evidence I had written off, as meteors, all previous similar UFO reports from this air base.

The sergeants' report, however, contained one bit of information that completely changed the previous picture. At the time of the sighting there had been a solid 6,000-foot-thick overcast at 4,700 feet. And meteors don't go that low.

A few quick calculations gave a rather fantastic answer. If the object was just at the base of the clouds it would have been 10,000 feet from the two observers and traveling 1,400 miles per hour.

But regardless of the speed, the story was still fantastic. The object was no jet airplane because there was no sound. It was not a searchlight because there were none on the air base. It was not an

automobile spotlight

Project Blue Book and the UFO Story.13

because a spotlight will not produce the type of light the sergeants described. As a double check, however, both men were questioned on this point. They stated firmly that they had seen hundreds of searchlights and spotlights playing on clouds, and that this was not what they saw.

Beyond these limited possibilities the sergeants' UFO discourages fruitful speculation. The object remains unidentified.

The UFO reports made by the two colonels and the two master sergeants are typical of hundreds of other good UFO reports which carry the verdict, "Conclusion unknown."

Some of these UFO reports have been publicized, but many have not. Very little information pertaining to UFO's was withheld from the press - if the press knew of the occurrence of specific sightings. Our policy on releasing information was to answer only direct questions from the press. If the press didn't know about a given UFO incident, they naturally couldn't ask questions about it. Consequently such stories were never released. In other instances, when the particulars of a UFO sighting were released, they were only the bare facts about what was reported. Any additional information that might have been developed during later investigations and analyses was not released.

There is a great deal of interest in UFO's and the interest shows no signs of diminishing. Since the first flying saucer skipped across the sky in the summer of 1947, thousands of words on this subject have appeared in every newspaper and most magazines in the United States. During a six-month period in 1952 alone 148 of the nation's leading newspapers carried a total of over 16,000 items about flying saucers.

During July 1952 reports of flying saucers sighted over Washington, D.C., cheated the Democratic National Convention out of precious head- line space.

The subject of flying saucers, which has generated more unscientific behavior than any other topic of modern times, has been debated at the meetings of professional scientific societies, causing scientific tempers to flare where unemotional objectivity is supposed to reign supreme.

Yet these thousands of written words and millions of spoken words - all attesting to the general interest - have generated more heat than light. Out of this avalanche of print and talk, the full, factual, true story of UFO's has emerged only on rare occasions. The general public, for its interest in UFO's, has been paid off in misinformation.

Many civilian groups must have sensed this, for while I was chief of Project Blue Book I had dozens of requests to speak on the subject of UFO's. These civilian requests had to be turned down because of security regulations.

14.The Report on Unidentified Flying Objects

I did give many official briefings, however, behind closed doors, to certain groups associated with the government - all of them upon request.

The subject of UFO's was added to a regular series of intelligence briefings given to students at the Air Force's Command and Staff School, and to classes at the Air Force's Intelligence School.

I gave briefings to the technical staff at the Atomic Energy Commission's Los Alamos laboratory, where the first atomic bomb was built. The theater where this briefing took place wouldn't hold all of the people who tried to get in, so the briefing was recorded and replayed many times. The same thing happened at AEC's Sandia Base, near Albuquerque.

Many groups in the Pentagon and the Office of Naval Research requested UFO briefings. Civilian groups, made up of some of the nation's top scientists and industrialists, and formed to study special military problems, worked in a UFO briefing. Top Air Force commanders were given periodic briefings.

Every briefing I gave was followed by a discussion that lasted anywhere from one to four hours.

In addition to these, Project Blue Book published a classified monthly report on UFO activity. Requests to be put on distribution for this report were so numerous that the distribution had to be restricted to major Air Force Command Headquarters.

This interest was not caused by any revolutionary information that was revealed in the briefings or reports. It stemmed only from a desire to get the facts about an interesting subject.

Many aspects of the UFO problem were covered in these official briefings. I would give details of many of the better reports we received, our conclusions about them, and how those conclusions were reached. If we had identified a UFO, the audience was told how the identification was made. If we concluded that the answer to a UFO sighting was "Unknown," the audience learned why we were convinced it was unknown.

Among the better sightings that were described fully to interested government groups were: the complete story of the Lubbock Lights, including the possible sighting of the same V-shaped light formations at other locations on the same night; the story of a group of scientists who detected mysterious nuclear radiation when UFO's were sighted; and all of the facts behind such famous cases as the Mantell Incident, the Florida scoutmaster who was burned by a "flying saucer," and headline capturing sightings at Washington, D.C.

I showed them what few photographs we had, the majority of which everyone has seen, since they have been widely published in magazines and newspapers. Our collection of photographs was always a disappointment as far as positive proof was concerned because, in a sense, if you've

---

seen one you've seen them all. We had no clear pictures of a saucer, just an assortment of blurs, blotches, and streaks of light.

The briefings included a description of how Project Blue Book operated and a survey of the results of the many studies that were made of the mass of UFO data we had collected. Also covered were our interviews with a dozen North American astronomers, the story of the unexplained green fireballs of New Mexico, and an account of how a committee of six distinguished United States scientists spent many hours attempting to answer the question, "Are the UFO's from outer space?"

Unfortunately the general public was never able to hear these briefings. For a long time, contrary to present thinking in military circles, I have believed that the public also is entitled to know the details of what was covered in these briefings (less, of course, the few items pertaining to radar that were classified "Secret," and the names of certain people). But withholding these will not alter the facts in any way.

A lot has already been written on the subject of UFO's, but none of it presents the true, complete

story. Previous forays into the UFO field have been based on inadequate information and have been warped to fit the personal biases of the individual writers. Well-meaning though these authors may be, the degree to which their books have misinformed the public is incalculable.

It is high time that we let the people know.

The following chapters present the true and complete UFO story, based on what I learned about UFO's while I was chief of Project Blue Book, the Air Force's project for the investigation and analysis of UFO reports. Here is the same information that I gave to Secretary of the Air Force, Thomas K. Finletter, to the Air Force commanders, to scientists and industrialists. This is what the Air Force knows about unidentified flying objects.

You may not agree with some of the official ideas or conclusions - neither did a lot of people I briefed - but this is the story.

Chapter 2: The Era of Confusion Begins, Page 15

NICAP Home Page

CHAPTER TWO

The Era of Confusion Begins

On September 23, 1947, the chief of the Air Technical Intelligence Center, one of the Air Force's most highly specialized intelligence units, sent a letter to the Commanding General of the then Army Air Forces. The letter was in answer to the Commanding General's verbal request to make a preliminary study of the reports of unidentified flying objects. The letter said that after a preliminary study of UFO reports, ATIC concluded that, to quote from the letter, "the reported phenomena were real." The letter strongly urged that a permanent project be established at ATIC to investigate and analyze future UFO reports. It requested a priority for the project, a registered code name, and an over-all security classification. ATIC's request was granted and Project Sign, the forerunner of Project Grudge and Project Blue Book, was launched. It was given a 2A priority, lA being the highest priority an Air Force project could have. With this the Air Force dipped into the most prolonged and widespread controversy it has ever, or may ever, encounter. The Air Force grabbed the proverbial bear by the tail and to this day it hasn't been able to let loose.

16.The Report on Unidentified Flying Objects

The letter to the Commanding General of the Army Air Forces from the chief of ATIC had used the word "phenomena." History has shown that this was not a too well chosen word. But on September 23, 1947, when the letter was written, ATIC's intelligence specialists were confident that within a few months or a year they would have the answer to the question, "What are UFO's?" The question, "Do UFO's exist?" was never mentioned. The only problem that confronted the people at ATIC was, "Were the UFO's of Russian or interplanetary origin?" Either case called for a serious, secrecy shrouded project. Only top people at ATIC were assigned to Project Sign.

Although a formal project for UFO investigation wasn't set up until September 1947, the Air Force had been vitally interested in UFO reports ever since June 24, 1947, the day Kenneth Arnold made the original UFO report.

As Arnold's story of what he saw that day has been handed down by the bards of saucerism, the true facts have been warped, twisted, and changed. Even some points in Arnold's own account of his sighting as published in his book, The Coming 0f The Saucers, do not jibe with what the official files say he told the Air Force in 1947. Since this incident was the original UFO sighting, I used to get many inquiries about it from the press and at briefings. To get the true and accurate story of what did happen to Kenneth Arnold on June 24, 1947, I had to go back through old newspaper files, official reports, and talk to people who had worked on Project Sign. By cross-checking these data and talking to people who had heard Arnold tell about his UFO sighting soon after it happened, I finally came up with what I believe is the accurate story.

Arnold had taken off from Chehalis, Washington, intending to fly to Yakima, Washington. About 3:00 P.M. he arrived in the vicinity of

---

The Era of Confusion Begins.17

Mount Rainier. There was a Marine Corps C-46 transport plane lost in the Mount Rainier area, so Arnold decided to fly around awhile and look for it. He was looking down at the ground when suddenly he noticed a series of bright flashes off to his left. He looked for the source of the flashes and saw a string of nine very bright disk shaped objects, which he estimated to be 45 to 50 feet in length. They were traveling from north to south across the nose of his airplane. They were flying in a reversed echelon (i.e., lead object high with the rest stepped down), and as they flew along they

weaved in and out between the mountain peaks, once passing behind one of the peaks. Each individual object had a skipping motion described by Arnold as a "saucer skipping across water."

During the time that the objects were in sight, Arnold had clocked their speed. He had marked his position and their position on the map and again noted the time. When he landed he sketched in the flight path that the objects had flown and computed their speed, almost 1,700 miles per hour. He estimated that they had been 20 to 25 miles away and had traveled 47 miles in 102 seconds.

I found that there was a lot of speculation on this report. Two factions at ATIC had joined up behind two lines of reasoning. One side said that Arnold had seen plain, everyday jet airplanes flying in formation. This side's argument was based on the physical limitations of the human eye, visual acuity, the eye's ability to see a small, distant object. Tests, they showed, had proved that a person with normal vision can't "see" an object that subtends an angle of less than 0.2 second of arc. For example, a basketball can't be seen at a distance of several miles but if you move the basketball closer and closer, at some point you will be able to see it. At this point the angle between the top and bottom of the ball and your eye will be about 0.2 of a second of arc. This was applied to Arnold's sighting. The "Arnold-saw-airplanes" faction maintained that since Arnold said that the objects were 45 to 50 feet long they would have had to be much closer than he had estimated or he couldn't even have seen them at all. Since they were much closer than he estimated, Arnold's timed speed was all wrong and instead of going 1,700 miles per hour the objects were traveling at a speed closer to 400 miles per hour, the speed of a jet. There was no reason to believe they weren't jets. The jets appeared to have a skipping motion because Arnold had looked at them through layers of warm and cold air, like heat waves coming from a hot pavement that cause an object to shimmer.

The other side didn't buy this idea at all. They based their argument on the fact that Arnold knew where the objects were when he timed them.

After all, he was an old mountain pilot and was as familiar with the area around the Cascade Mountains as he was with his own living room. To cinch this point the fact that the objects had passed behind a mountain peak was brought up. This positively established the distance the objects were from Arnold and confirmed his calculated 1,700-miles-per-hour speed. Besides, no airplane can weave in and out between mountain peaks in the short time that Arnold was watching them. The visual acuity factor only strengthened the "Arnold-saw-a-flying-saucer" faction's theory that what he'd seen was a spaceship. If he could see the objects 20 to 25 miles away, they must have been about 210 feet long instead of the poorly estimated 45 to 50 feet.

In 1947 this was a fantastic story, but now it is just another UFO report marked "Unknown." It is typical in that if the facts are accurate, if Arnold actually did see the UFO's go behind a mountain peak, and if he knew his exact position at the time, the UFO problem cannot be lightly sloughed off; but there are always "ifs" in UFO reports. This is the type of report that led Major General John A. Samford, Director of Intelligence for Headquarters, Air Force, to make the following comment during a press conference in July 1952: "However, there have remained a percentage of this total [of all UFO reports received by the Air Force], about 20 per cent of the reports, that have come from credible observers of relatively incredible things. We keep on being concerned about them."

In warping, twisting, and changing the Arnold incident, the writers of saucer lore haven't been content to confine themselves to the incident itself; they have dragged in the crashed Marine Corps' C-46. They intimate that the same flying saucers that Arnold saw shot down the C-46, grabbed up the bodies of the passengers and crew, and now have them pickled at the University of Venus Medical School. As proof they apply the same illogical reasoning that they apply to most everything. The military never released photos of the bodies of the dead men, therefore there were no bodies.

There were photographs and there were bodies. In consideration of the families of air crewmen and passengers, photos of air crashes showing dead bodies are never released.

Arnold himself seems to be the reason for a lot of the excitement that heralded flying saucers. Stories of odd incidents that occur in this world are continually being reported by newspapers, but never on the scale of the first UFO report. Occasional stories of the "Himalayan snowmen," or the "Malayan monsters," rate only a few inches or a column on the back pages of newspapers. Arnold's story, if it didn't make the headlines, at least made the front page. I had the reason for this explained to me one day when I was investigating a series of UFO reports in California in the spring of 1952.

The Era of Confusion Begins.19

I was making my headquarters at an air base where a fighter bomber wing was stationed. Through a mutual friend I met one of the fighter- bomber pilots who had known Arnold. In civilian life the pilot was a news paper reporter and had worked on the original Arnold story. He told me that when the story first broke all the newspaper editors in the area were thoroughly convinced that the incident was a hoax, and that they intended to write the story as such. The more they dug into the facts, however, and into Arnold's reputation, the more it appeared that he was telling the truth. Besides having an unquestionable character, he was an excellent mountain pilot, and mountain pilots are a breed of men who know every nook and cranny of the mountains in their area. The most fantastic part of Arnold's story had been the 1,700-miles-per-hour speed computed from Arnold's timing the objects between two landmarks. "When Arnold told us how he computed the speed," my chance acquaintance told me, "we all put a lot of faith in his story." He went on to say that when the editors found out that they were wrong about the hoax, they did a complete about-face, and were very much impressed by the story. This enthusiasm spread, and since the Air Force so quickly denied ownership of the objects, all of the facts built up into a story so unique that papers all over the world gave it front-page space.

There was an old theory that maybe Arnold had seen wind whipping snow along the mountain ridges, so I asked about this. I got a flat "Impossible." My expert on the early Arnold era said, "I've lived in the Pacific Northwest many years and have flown in the area for hundreds of hours. It's impossible to get powder snow low in the mountains in June. Personally, I believe Arnold saw some kind of aircraft and they weren't from this earth." He went on to tell me about two other very similar sightings that had happened the day after Arnold saw the nine disks. He knew the people who made these sightings and said that they weren't the kind to go off "half cocked." He offered to get a T-6 and fly me up to Boise to talk to them since they had never made a report to the military, but I had to return to Dayton so I declined.

Within a few days of Arnold's sighting, others began to come m. On June 28 an Air Force pilot in an F-51 was flying near Lake Mead, Nevada, when he saw a formation of five or six circular objects off his right wing. The time was about three fifteen in the afternoon.

That night at nine twenty, four Air Force officers, two pilots, and two intelligence officers from Maxwell AFB in Montgomery, Alabama, saw a bright light traveling across the sky. It was first seen just above the horizon, and as it traveled toward the observers it "zigzagged," with bursts of high speed. When it was directly overhead it made a sharp 90 degree turn and was lost from view as it traveled south.

20.The Report on Unidentified Flying Objects

Other reports came in. In Milwaukee a lady saw ten go over her house "like blue blazes," heading south. A school bus driver in Clarion, Iowa, saw an object streak across the sky. In a few seconds twelve more followed the first one. White Sands Proving Ground in New Mexico chalked up the first

of the many sightings that this location would produce when several people riding in an automobile saw a pulsating light travel from horizon to horizon in thirty seconds. A Chicago housewife saw one "with legs."

The week of July 4, 1947, set a record for reports that was not broken 952. The center of activi y was the Portland, Oregon, area. At 11:00 A.M. aof people driving near Redmond saw four disk shaped objects streaking past Jefferson. At 1:05 P.M. a policeman was in the parking lot behind t e Portla Police Headquarters when he noticed some pigeons suddenly began to flutter ar if they were scared. He looked up and saw five large disk shaped objects, ng south and three going east. The were traveling at a high rate of spee eemed to be oscillating about their lateral axis. Minutes la er two other polic oth ex-pilots, reported three of the same things flying in trail. Before long th r pat ol called into headquarters. A crew of four patrolmen had seen three tha the disks, "shaped like chrom hub caps," traveling very fast. They also oscillat hey flew. Then the citizens of Portland began to se e them. A man saw one going east and two going north. At four thirty a woman called in and had just seen one that looked like "a new dime flipping around." Another man reported two, one going southeast, one northeast. From Milwaukee, Oregon, three were reported going northwest. In Vancouver, Washington, sheriff's deputies saw twenty to thirty.

The first photo was taken on July 4 in Seattle. After much publicity it turned out to be a weather balloon.

That night a United Airlines crew flying near Emmett, Idaho, saw five. The pilot's report read:

Five "somethings," which were thin and smooth on the bottom and rough appearing on top, were seen silhouetted against the sunset shortly after the plane took off from Boise at 8:04 P.M. We saw them clearly. We followed them in a northeasterly direction for about 45 miles. They finally disappeared. We were unable to tell whether they out sped us or disintegrated. We can't say whether they were "smear like," oval, or anything else but whatever they were they were not aircraft, clouds or smoke.

Civilians did not have a corner on the market. On July 6 a staff sergeant in Birmingham, Alabama, saw several "dim, glowing lights" speeding across the sky and photographed one of them. Also on the sixth the crew

---

of an Air Force B-25 saw a bright, disk shaped object "low at nine o'clock." This is one of the few reports of an object lower than the aircraft. At Fairfield-Suisun AFB in California a pilot saw something travel three quarters of the way across the sky in a few seconds. It, too, was oscillating on its lateral axis.

According to the old hands at ATIC, the first sighting that really made the Air Force take a deep interest in UFO's occurred on July 8 at Muroc Air Base (now Edwards AFB), the super secret Air Force test center in the Mojave Desert of California. At 10:10 A.M. a test pilot was running up the engine of the then new XP-84 in preparation for a test flight. He happened to look up and to the north he saw what first appeared to be a weather balloon traveling in a westerly direction. After watching it a few seconds, he changed his mind. He had been briefed on the high altitude winds, and the object he saw was going against the wind. Had it been the size of a normal aircraft, the test pilot estimated that it would have been at 10,000 to 12,000 feet and traveling 200 to 225 miles per hour. He described the object as being spherically shaped and yellowish white in color.

Ten minutes before this several other officers and airmen had seen three objects. They were similar except they had more of a silver color. They were also heading in a westerly direction.

Two hours later a crew of technicians on Rogers Dry Lake, adjacent to Muroc Air Base, observed another UFO. Their report went as follows:

On the 8 July 1947 at 11:50 we were sitting in an observation truck located in Area #3, Rogers Dry Lake. We were gazing upward toward a formation of two P-82's and an A-26 aircraft flying at 20,000 feet. They were preparing to carry out a seat ejection experiment. We observed a round object, white aluminum color, which at first resembled a parachute canopy. Our first impression was that a premature ejection of the seat and dummy had occurred but this was not the case. The object was lower than 20,000 feet, and was falling at three times the rate observed for the test parachute, which ejected thirty seconds after we first saw the object. As the object fell it drifted slightly north of due west against the prevailing wind. The speed, horizontal motion, could not be determined, but it appeared to be slower than the maximum velocity F-80 aircraft.

As this object descended through a low enough level to permit observation of its lateral silhouette, it presented a distinct oval shaped outline, with two projections on the upper surface which might have been thick fins or knobs. These crossed each other at intervals, suggesting either rotation or oscillation of slow type.

No smoke, flames, propeller arcs, engine noise, or other plausible or visible means of propulsion were noted. The color was silver, resembling an aluminum painted fabric, and did not appear as dense as a parachute canopy.

When the object dropped to a level such that it came into line of vision of the mountain tops, it was lost to the vision of the observers.

It is estimated that the object was in sight about 90 seconds. Of the five people sitting in the observation truck, four observed this object.

The following is our opinion about this object: It was man-made, as evidenced by the outline and functional appearance. Seeing this was not a hallucination or other fancies of sense.

Exactly four hours later the pilot of an F-51 was flying at 20,000 feet about 40 miles south of Muroc Air Base when he sighted a "flat object of a light reflecting nature." He reported that it had no vertical fin or wings. When he first saw it, the object was above him and he tried to climb up to it, but his F-51 would not climb high enough. All air bases in the area were contacted but they had no aircraft in the area.

By the end of July 1947 the UFO security lid was down tight. The few members of the press who did inquire about what the Air Force was doing got the same treatment that you would get today if you inquired about the number of thermonuclear weapons stock-piled in the U.S.'s atomic arsenal. No one, outside of a few high-ranking officers in the Pentagon, knew what the people in the barbed wire enclosed Quonset huts that housed the Air Technical Intelligence Center were thinking or doing.

The memos and correspondence that Project Blue Book inherited from the old UFO projects told the story of the early flying saucer era. These memos and pieces of correspondence showed that the UFO situation was considered to be serious; in fact, very serious. The paper work of that period also indicated the confusion that surrounded the investigation; confusion almost to the point of panic. The brass wanted an answer, quickly, and people were taking off in all directions. Everyone's theory was as good as the next and each person with any weight at ATIC was plugging and investigating his own theory. The ideas as to the origin of the UFO's fell into two main categories, earthly and non earthly. In the earthly category the Russians led, with the U.S. Navy and their XF-5-U-l, the "Flying Flapjack," pulling a not too close second. The desire to cover all leads was graphically pointed up to be a personal handwritten note I found in a file. It was from ATIC's chief to a civilian intelligence specialist. It said, "Are you positive that the Navy junked the XF-5-U-1 project?" The non earthly category ran the gamut of theories, with space animals trailing interplanetary craft about the same distance the Navy was behind the Russians.

This confused speculating lasted only a few weeks. Then the investigation narrowed down to the Soviets and took off on a much more methodical course of action.

The Era of Confusion Begins.23

When World War II ended, the Germans had several radical types of aircraft and guided missiles under development. The majority of these projects were in the most preliminary stages but they were the only known craft that could even approach the performance of the objects reported by UFO observers. Like the Allies, after World War II the Soviets had obtained complete sets of data on the latest German developments. This, coupled with rumors that the Soviets were frantically developing the German ideas, caused no small degree of alarm. As more UFO's were observed near the Air Force's Muroc Test Center, the Army's White Sands Proving Ground, and atomic bomb plants, ATIC's efforts became more concentrated.

Wires were sent to intelligence agents in Germany requesting that they find out exactly how much progress had been made on the various German projects.

The last possibility, of course, was that the Soviets had discovered some completely new aerodynamic concept that would give saucer performance.

While ATIC technical analysts were scouring the United States for data on the German projects and the intelligence agents in Germany were seeking out the data they had been asked for, UFO reports continued to flood the country. The Pacific Northwest still led with the most sightings, but every state in the Union was reporting a few flying saucers.

At first there was no coordinated effort to collect data on the UFO reports. Leads would come from radio reports or newspaper items. Military intelligence agencies outside of ATIC were hesitant to investigate on their own initiative because, as is so typical of the military, they lacked specific orders. When no orders were forthcoming, they took this to mean that the military had no interest in the UFO's. But before long this placid attitude changed, and changed drastically. Classified orders came down to investigate all UFO sightings. Get every detail and send it direct to ATIC at Wright Field. The order carried no explanation as to why the information was wanted. This lack of an explanation and the fact that the information was to be sent directly to a high-powered intelligence group within Air Force Headquarters stirred the imagination of every potential cloak- and- dagger man in the military intelligence system. Intelligence people in the field who had previously been free with opinions now clammed up tight.

The era of confusion was progressing.

Early statements to the press, which shaped the opinion of the public, didn't reduce the confusion factor. While ATIC was grimly expending maximum effort in a serious study, "certain high placed officials" were officially chuckling at the mention of UFO's.

24.The Report on Unidentified Flying Objects

In July 1947 an International News Service wire story quoted the public relations officer at Wright Field as saying, "So far we haven't found anything to confirm that saucers exist. We don't think they are guided missiles." He went on to say, "As things are now, they appear to be either a phenomenon or a figment of somebody's imagination."

A few weeks later a lieutenant colonel who was Assistant to the Chief of Staff of the Fourth Air Force was widely quoted as saying, "There is no basis for belief in flying saucers in the Tacoma area [referring to a UFO sighting in the area of Tacoma, Washington], or any other area."

The "experts," in their stories of saucer lore, have said that these brush offs of the UFO sightings were intentional smoke screens to cover the facts by adding confusion. This is not true; it was merely a lack of coordination. But had the Air Force tried to throw up a screen of confusion, they couldn't

have done a better job.

When the lieutenant colonel from the Fourth Air Force made his widely publicized denunciation of saucer believers he specifically mentioned a UFO report from the Tacoma, Washington, area.

The report of the investigation of this incident, the Maury Island Mystery, was one of the most detailed reports of the early UFO era. The report that we had in our files had been pieced together by Air Force Intelligence and other agencies because the two intelligence officers who started the investigation couldn't finish it. They were dead.

For the Air Force the story started on July 31, 1947, when Lieutenant Frank Brown, an intelligence agent at Hamilton AFB, California, received a long-distance phone call. The caller was a man whom I'll call Simpson, who had met Brown when Brown investigated an earlier UFO sighting, and he had a hot lead on another UFO incident. He had just talked to two Tacoma Harbor patrolmen. One of them had seen six UFO's hover over his patrol boat and spew out chunks of odd metal. Simpson had some of the pieces of the metal.

The story sounded good to Lieutenant Brown, so he reported it to his chief. His chief OK'd a trip and within an hour Lieutenant Brown and Captain Davidson were flying to Tacoma in an Air Force B-25. When they arrived they met Simpson and an airline pilot friend of his in Simpson's hotel room. After the usual round of introductions Simpson told Brown and Davidson that he had received a letter from a Chicago publisher asking him, Simpson, to investigate this case. The publisher had paid him $200 and wanted an exclusive on the story, but things were getting too hot, Simpson wanted the military to take over.

Simpson went on to say that he had heard about the experience off Maury Island but that he wanted Brown and Davidson to hear it firsthand.

He had called the two harbor patrolmen and they were on their way to the hotel. They arrived and they told their story.

I'll call these two men Jackson and Richards although these aren't their real names. In June 1947, Jackson said, his crew, his son, and the son's dog were on his patrol boat patrolling near Maury Island, an island in Puget Sound, about 3 miles from Tacoma. It was a gray day, with a solid cloud deck down at about 2,500 feet. Suddenly everyone on the boat noticed six "doughnut shaped" objects, just under the clouds, headed toward the boat. They came closer and closer, and when they were about 500 feet over the boat they stopped. One of the doughnut shaped objects seemed to be in trouble as the other five were hovering around it. They were close, and everybody got a good look. The UFO's were about 100 feet in diameter, with the "hole in the doughnut" being about 25 feet in diameter. They were a silver color and made absolutely no noise. Each object had large portholes around the edge.

As the five UFO's circled the sixth, Jackson recalled, one of them came appeared to make contac with the disabled craft. The two objects maintained contactfew minutes, then began to separate. Whi le this was going on, Jackson was taking photos. Just as they began to separate, there was a dull "thud" and the next second the UFO began to spew out sheets of very light metal from the hole in the center. As these were fluttering to the water, the UFO began to throw out a harder, rocklike material. Some of it landed on the beach of Maury Island. Jackson took his crew and headed toward the beach of Maury Island, but not before the boat was damaged, his son's arm had been injured, and the dog killed. As they reached the island they looked up and saw that the UFO's were leaving the area at high speed. The harbor patrolman went on to tell how he scooped up several chunks of the metal from the beach and boarded the patrol boat. He tried to use his radio to summon aid, but for some

unusual reason the interference was so bad he couldn't even call the three miles to his headquarters in Tacoma. When they docked at Tacoma, Jackson got first aid for his son and then reported to his superior officer, Richards, who, Jackson added to his story, didn't believe the tale. He didn't believe it until he went out to the island himself and saw the metal.

Jackson's trouble wasn't over. The next morning a mysterious visitor told Jackson to forget what he'd seen.

Later that same day the photos were developed. They showed the six objects, but the film was badly spotted and fogged, as if the film had been exposed to some kind of radiation.

Then Simpson told about his brush with mysterious callers. He said that Jackson was not alone as far as mysterious callers were concerned, the

---

26.The Report on Unidentified Flying Objects

Tacoma newspapers had been getting calls from an anonymous tipster telling exactly what was going on in Simpson's hotel room. This was a very curious situation because no one except Simpson, the airline pilot, and the two harbor patrolmen knew what was taking place. The room had even been thoroughly searched for hidden microphones.

That is the way the story stood a few hours after Lieutenant Brown and Captain Davidson arrived in Tacoma.

After asking Jackson and Richards a few questions, the two intelligence agents left, reluctant even to take any of the fragments. As some writers who have since written about this incident have said, Brown and Davidson seemed to be anxious to leave and afraid to touch the fragments of the UFO, as if they knew something more about them. The two officers went to McChord AFB, near Tacoma, where their B-25 was parked, held a conference with the intelligence officer at McChord, and took off for their home base, Hamilton. When they left McChord they had a good idea as to the identity of the UFO's. Fortunately they told the McChord intelligence officer what they had determined from their interview.

In a few hours the two officers were dead. The B-25 crashed near Kelso, Washington. The crew chief and a passenger had parachuted to safety. The newspapers hinted that the airplane was sabotaged and that it was carrying highly classified material. Authorities at McChord AFB confirmed this latter point, the airplane was carrying classified material.

In a few days the newspaper publicity on the crash died down, and the Maury Island Mystery was never publicly solved.

Later reports say that the two harbor patrolmen mysteriously disappeared soon after the fatal crash.

They should have disappeared, into Puget Sound. The whole Maury Island Mystery was a hoax. The first, possibly the second-best, and the dirtiest hoax in the UFO history. One passage in the detailed official report of the Maury Island Mystery says:

> Both _____ (the two harbor patrolmen) admitted that the rock fragments had nothing to do with flying saucers. The whole thing was a hoax. They had sent in the rock fragments [to a magazine publisher] as a joke. _____ One of the patrolmen wrote to _____ [the publisher] stating that the rock could have been part of a flying saucer. He had said the rock came from a flying saucer because that's what [the publisher] wanted him to say.

The publisher, mentioned above, who, one of the two hoaxers said, wanted him to say that the rock fragments had come from a flying saucer, is the same one who paid the man I called Simpson $200 to investigate the case.

The Era of Confusion Begins.27

The report goes on to explain more details of the incident. Neither one of the two men could ever produce the photos. They "misplaced" them, they said. One of them, I forget which, was the mysterious informer who called the newspapers to report the conversations that were going on in the hotel room. Jackson's mysterious visitor didn't exist. Neither of the men was a harbor patrolman, they merely owned a couple of beat-up old boats that they used to salvage floating lumber from Puget Sound. The airplane crash was one of those unfortunate things. An engine caught on fire, burned off, and just before the two pilots could get out, the wing and tail tore off, making it impossible for them to escape. The two dead officers from Hamilton AFB smelled a hoax, accounting for their short interview and hesitancy in bothering to take the "fragments." They confirmed their convictions when they talked to the intelligence officer at McChord. It had already been established, through an informer, that the fragments were what Brown and Davidson thought, slag. The classified material on the B-25 was a file of reports the two officers offered to take back to Hamilton and had nothing to do with the Maury Island Mystery, or better, the Maury Island Hoax.

Simpson and his airline pilot friend weren't told about the hoax for one reason. As soon as it was discovered that they had been "taken," thoroughly, and were not a party to the hoax, no one wanted to embarrass them.

The majority of the writers of saucer lore have played this sighting to the hilt, pointing out as their main premise the fact that the story must be true because the government never openly exposed or prosecuted either of the two hoaxers. This is a logical premise, but a false one. The reason for the thorough investigation of the Maury Island Hoax was that the government had thought seriously of prosecuting the men. At the last minute it was decided, after talking to the two men, that the hoax was a harmless joke that had mushroomed, and that the loss of two lives and a B-25 could not be directly blamed on the two men. The story wasn't even printed because at the time of the incident, even though in this case the press knew about it, the facts were classed as evidence. By the time the facts were released they were yesterday's news. And nothing is deader than yesterday's news.

As 1947 drew to a close, the Air Force's Project Sign had outgrown its initial panic and had settled down to a routine operation. Every intelligence report dealing with the Germans' World War II aeronautical research had been studied to find out if the Russians could have developed any of the late German designs into flying saucers. Aerodynamicists at ATIC and at Wright Field's Aircraft Laboratory computed the maximum performance

28.The Report on Unidentified Flying Objects

that could be expected from the German designs. The designers of the aircraft themselves were contacted. "Could the Russians develop a flying saucer from their designs?" The answer was, "No, there was no conceivable way any aircraft could perform that would match the reported maneuvers of the UFO's." The Air Force's Aeromedical Laboratory concurred. If the aircraft could be built, the human body couldn't stand the violent maneuvers that were reported. The aircraft structures people seconded this, no material known could stand the loads of the reported maneuvers and heat of the high speeds.

Still convinced that the UFO's were real objects, the people at ATIC began to change their thinking. Those who were convinced that the UFO's were of Soviet origin now began to eye outer space, not because there was any evidence that the UFO's did come from outer space but because they were convinced that UFO's existed and only some unknown race with a highly developed state of technology could build such vehicles. As far as the effect on the human body was concerned, why couldn't these people, whoever they might be, stand these horrible maneuver forces? Why judge

them by earthly standards? I found a memo to this effect was in the old Project Sign files.

Project Sign ended 1947 with a new problem. How do you collect interplanetary intelligence? During World War II the organization that was ATIC's forerunner, the Air Materiel Command's secret "T-2" had developed highly effective means of wringing out every possible bit of information about the technical aspects of enemy aircraft. ATIC knew these methods, but how could this be applied to spaceships? The problem was tackled with organized confusion.

If the confusion in the minds of Air Force people was organized the confusion in the minds of the public was not. Publicized statements regarding the UFO were conflicting.

A widely printed newspaper release, quoting an unnamed Air Force official in the Pentagon, said:

The "flying saucers" are one of three things:
1. Solar reflections on low hanging clouds.
2. Small meteors that break up, their crystals catching the rays of the sun.
3. Icing conditions could have formed large hailstones and they might have flattened out and glided.

A follow-up, which quoted several scientists, said in essence that the unnamed Air Force official was crazy. Nobody even heard of crystallized meteors, or huge, flat hailstones, and the solar reflection theory was absurd.

Life, Time, Newsweek, and many other news magazines carried articles

---

The Classics.29

about the UFO's. Some were written with tongue in cheek, others were not. All the articles mentioned the Air Force's mass hysterical induced hallucinations. But a Veterans' Administration psychiatrist publicly pooh-poohed this. "Too many people are seeing things," he said.

It was widely suggested that all the UFO's were meteors. Two Chicago astronomers queered this. Dr. Gerard Kuiper, director of the University of Chicago observatory, was quoted as flatly saying the UFO's couldn't be meteors. "They are probably man-made," he told the Associated Press. Dr. Oliver Lee, director of Northwestern University's observatory, agreed with Dr. Kuiper and he threw in an additional confusion factor that had been in the back of many people's minds. Maybe they were our own aircraft.

The government had been denying that UFO's belonged to the U.S. from the first, but Dr. Vannevar Bush, the world-famous scientist, and Dr. Merle Tuve, inventor of the proximity fuse, added their weight. "Impossible," they said.

All of this time unnamed Air Force officials were disclaiming serious interest in the UFO subject. Yet every time a newspaper reporter went out to interview a person who had seen a UFO, intelligence agents had already been flown in, gotten the detailed story complete with sketches of the UFO, and sped back to their base to send the report to Project Sign. Many people had supposedly been "warned" not to talk too much. The Air Force was mighty interested in hallucinations.

Thus 1947 ended with various sized question marks in the mind of the public. If you followed flying saucers closely the question mark was big, if you just noted the UFO story titles in the papers it was smaller, but it was there and it was growing. Probably none of the people, military or civilian, who had made the public statements were at all qualified to do so but they had done it, their comments had been printed, and their comments had been read. Their comments formed the question mark.

CHAPTER THREE

The Classics

1948 was only one hour and twenty-five minutes old when a gentleman from Abilene, Texas, made the first UFO report of the year. What he saw, "a fan shaped glow" in the sky, was insignificant as far as UFO

---

reports go, but it ushered in a year that was to bring feverish activity to Project Sign.

With the Soviets practically eliminated as a UFO source, the idea of interplanetary spaceships was becoming more popular. During 1948 the people in ATIC were openly discussing the possibility of interplanetary visitors without others tapping their heads and looking smug. During 1948 the novelty of UFO's had worn off for the press and every John and Jane Doe who saw one didn't make the front pages as in 1947. Editors were becoming hardened, only a few of the best reports got any space. Only the "Classics" rated headlines. "The Classics" were three historic reports that were the highlights of 1948. They are called "The Classics," a name given them by the Project Blue Book staff, because: (1) they are classic examples of how the true facts of a UFO report can be twisted and warped by some writers to prove their point, (2) they are the most highly publicized reports of this early era of the UFO's, and (3) they "proved" to ATIC's intelligence specialists that UFO's were real.

The apparent lack of interest in UFO reports by the press was not a true indication of the situation. I later found out, from talking to writers, that all during 1948 the interest in UFO's was running high. The Air Force Press Desk in the Pentagon was continually being asked what progress was being made in the UFO investigation. The answer was, "Give us time. This job can't be done in a week." The press respected this and was giving them time. But every writer worth his salt has contacts, those "usually reliable sources" you read about, and these contacts were talking. All during 1948 contacts in the Pentagon were telling how UFO reports were rolling in at the rate of several per day and how ATIC UFO investigation teams were flying out of Dayton to investigate them. They were telling how another Air Force investigative organization had been called in to lighten ATIC's load and allow ATIC to concentrate on the analysis of the reports. The writers knew this was true because they had crossed paths with these men whom they had mistakenly identified as FBI agents. The FBI was never officially interested in UFO sightings. The writers' contacts in the airline industry told about the UFO talk from V.P.'s down to the ramp boys. Dozens of good, solid, reliable, experienced airline pilots were seeing UFO's. All of this led to one conclusion: whatever the Air Force had to say, when it was ready to talk, would be newsworthy. But the Air Force wasn't ready to talk.

Project Sign personnel were just getting settled down to work after the New Year's holiday when the "ghost rockets" came back to the Scandinavian countries of Europe. Air attaché's in Sweden, Denmark, and

---

Norway fired wires to ATIC telling about the reports. Wires went back asking for more information.

The "ghost rockets," so tagged by the newspapers, had first been seen in the summer of 1946, a year before the first UFO sighting in the U.S. There were many different descriptions for the reported objects. They were usually seen in the hours of darkness and almost always traveling at extremely high speeds. They were shaped like a ball or projectile, were a bright green, white, red, or yellow and

sometimes made sounds. Like their American cousins, they were always so far away that no details could be seen. For no good reason, other than speculation and circulation, the newspapers had soon begun to refer authoritatively to these "ghost rockets" as guided missiles, and implied that they were from Russia. Peenemunde, the great German missile development center and birthplace of the V-2 and V-2 guided missiles, came in for its share of suspicion since it was held by the Russians. By the end of the summer of 1946 the reports were widespread, coming from Denmark, Norway, Spain, Greece, French Morocco, Portugal, and Turkey. In 1947, after no definite conclusions as to identity of the "rockets" had been established, the reports died out. Now in early January 1948 they broke out again. But Project Sign personnel were too busy to worry about European UFO reports, they were busy at home. A National Guard pilot had just been killed chasing a UFO.

On January 7 all of the late papers in the U.S. carried headlines similar to those in the Louisville Courier: "F-51 and Capt. Mantell Destroyed Chasing Flying Saucer." This was Volume I of "The Classics," the Mantell Incident.

At one fifteen on that afternoon the control tower operators at Godman AFB, outside Louisville, Kentucky, received a telephone call from the Kentucky State Highway Patrol. The patrol wanted to know if Godman Tower knew anything about any unusual aircraft in the vicinity. Several people from Maysville, Kentucky, a small town 80 miles east of Louisville, had reported seeing a strange aircraft. Godman knew that they had nothing in the vicinity so they called Flight Service at Wright-Patterson AFB. In a few minutes Flight Service called back. Their air Traffic control board showed no flights in the area. About twenty minutes later the state police called again. This time people from the towns of Owensboro and Irvington, Kentucky, west of Louisville, were reporting a strange craft. The report from these two towns was a little more complete. The towns people had described the object to the state police as being "circular, about 250 to 300 feet in diameter," and moving westward at a "pretty good

---

clip." Godman Tower checked Flight Service again. Nothing. All this time the tower operators had been looking for the reported object. They theorized that since the UFO had had to pass north of Godman to get from Maysville to Owensboro it might come back.

At one forty-five they saw it, or something like it. Later, in his official report, the assistant tower operator said that he had seen the object for several minutes before he called his chiefs attention to it. He said that he had been reluctant to "make a flying saucer report." As soon as the two men in the tower had assured themselves that the UFO they saw was not an airplane or a weather balloon, they called Flight Operations. They wanted the operations officer to see the UFO. Before long word of the sighting had gotten around to key personnel on the base, and several officers, besides the base operations officer and the base intelligence officer, were in the tower. All of them looked at the UFO through the tower's 6 x 50 binoculars and decided they couldn't identify it. About this time Colonel Hix, the base commander, arrived. He looked and he was baffled. At two thirty, they reported, they were discussing what should be done when four F-51's came into view, approaching the base from the south.

The tower called the flight leader, Captain Mantell, and asked him to take a look at the object and try to identify it. One F-51 in the flight was running low on fuel, so he asked permission to go on to his base. Mantell took his two remaining wing men, made a turn, and started after the UFO. The people in Godman Tower were directing him as none of the pilots could see the object at this time. They gave Mantell an initial heading toward the south and the flight was last seen heading in the general direction of the UFO.

By the time the F-51's had climbed to 10,000 feet, the two wing men later reported, Mantell had

pulled out ahead of them and they could just barely see him. At two forty-five Mantell called the tower and said, "I see something above and ahead of me and I'm still climbing." All the people in the tower heard Mantell say this and they heard one of the wing men call back and ask, "What the hell are we looking for?" The tower immediately called Mantell and asked him for a description of what he saw. Odd as it may seem, no one can remember exactly what he answered. Saucer historians have credited him with saying, "I've sighted the thing. It looks metallic and it's tremendous in size.... Now it's starting to climb." Then in a few seconds he is supposed to have called and said, "It's above me and I'm gaining on it. I'm going to 20,000 feet." Everyone in the tower agreed on this one last bit of the transmission, "I'm going to 20,000 feet," but didn't agree on the first part, about the UFO's being metallic and tremendous.

The two wing men were now at 15,000 feet and trying frantically to call Mantell. He had climbed far above them by this time and was out of sight. Since none of them had any oxygen they were worried about Mantell. Their calls were not answered. Mantell never talked to anyone again. The two wing men leveled off at 15,000 feet, made another fruitless effort to call Mantell, and started to come back down. As they passed Godman Tower on their way to their base, one of them said something to the effect that all he had seen was a reflection on his canopy.

When they landed at their base, Standiford Field, just north of Godman, one pilot had his F-51 refueled and serviced with oxygen, and took off to search the area again. He didn't see anything.

At three fifty the tower lost sight of the UFO. A few minutes later they got word that Mantell had crashed and was dead.

Several hours later, at 7:20 P.M., airfield towers all over the Midwest sent in frantic reports of another UFO. In all about a dozen airfield towers reported the UFO as being low on the southwestern horizon and disappearing after about twenty minutes. The writers of saucer lore say this UFO was what Mantell was chasing when he died; the Air Force says this UFO was Venus.

The people on Project Sign worked fast on the Mantell Incident. Contemplating a flood of queries from the press as soon as they heard about the crash, they realized that they had to get a quick answer. Venus had been the target of a chase by an Air Force F-51 several weeks before and there were similarities between this sighting and the Mantell Incident. So almost before the rescue crews had reached the crash, the word "Venus" went out. This satisfied the editors, and so it stood for about a year; Mantell had unfortunately been killed trying to reach the planet Venus.

To the press, the nonchalant, offhand manner with which the sighting was written off by the Air Force public relations officer showed great confidence in the conclusion, Venus, but behind the barbed wire fence that encircled ATIC the nonchalant attitude didn't exist among the intelligence analysts. One man had already left for Louisville and the rest were doing some tall speculating. The story about the tower-to-air talk, "It looks metallic and it's tremendous in size," spread fast. Rumor had it that the tower had carried on a running conversation with the pilots and that there was more information than was so far known. Rumor also had it that this conversation had been recorded. Unfortunately neither of these rumors was true.

Over a period of several weeks the file on the Mantell Incident grew

---

in size until it was the most thoroughly investigated sighting of that time, at least the file was the thickest.

About a year later the Air Force released its official report on the incident. To use a trite term, it was a masterpiece in the art of "weasel wording." It said that the UFO might have been Venus or it could have been a balloon. Maybe two balloons. It probably was Venus except that this is doubtful because Venus was too dim to be seen in the afternoon. This jolted writers who had been following the UFO story. Only a few weeks before, The Saturday Evening Post had published a two-part story entitled "What You Can Believe About flying Saucers." The story had official sanction and had quoted the Venus theory as a positive solution. To clear up the situation, several writers were allowed to interview a major in the Pentagon, who was the Air Force's Pentagon "expert" on UFO's. The major was asked directly about the conclusion of the Mantell Incident, and he flatly stated that it was Venus. The writers pointed out the official Air Force analysis. The major's answer was, "They checked again and it was Venus." He didn't know who "they" were, where they had checked, or what they had checked, but it was Venus. The writers then asked, "If there was a later report they had made why wasn't it used as a conclusion?" "Was it available?" The answer to the last question was "No," and the lid snapped back down This interview gave the definite impression that the Air Force was unsuccessfully trying to cover up some very important information, using Venus as a front. Nothing excites a newspaper or magazine writer more than to think he has stumbled onto a big story and that someone is trying to cover it up. Many writers thought this after the interview with the major, and many still think it. You can't really blame them either.

In early 1952 I got a telephone call on ATIC's direct line to the Pentagon. It was a colonel in the Director of Intelligence's office. The Office of Public Information had been getting a number of queries about all of the confusion over the Mantell Incident. What was the answer?

I dug out the file. In 1949 all of the original material on the incident had been microfilmed, but something had been spilled on the film. Many sections were so badly faded they were illegible. As I had to do with many of the older sightings that were now history, I collected what I could from the file, filling in the blanks by talking to people who had been at ATIC during the early UFO era. Many of these people were still around, "Red" Honnacker, George Towles, Al Deyarmond, Nick Post, and many others. Most of them were civilians, the military had been transferred out by this time.

Some of the press clippings in the file mentioned the Pentagon major

---

and his concrete proof of Venus. I couldn't find this concrete proof in the file so I asked around about the major. The major, I found, was an officer in the Pentagon who had at one time written a short intelligence summary about UFO's. He had never been stationed at ATIC, nor was he especially well versed on the UFO problem. When the word of the press conference regarding the Mantell Incident came down, a UFO expert was needed. The major, because of his short intelligence summary on UFO's, became the "expert." He had evidently conjured up "they" and "their later report" to support his Venus answer because the writers at the press conference had him in a corner. I looked farther.

Fortunately the man who had done the most extensive work on the incident, Dr. J. Allen Hynek, head of the Ohio State University Astronomy Department, could be contacted. I called Dr. Hynek and arranged to meet him the next day.

Dr. Hynek was one of the most impressive scientists I met while working on the UFO project, and I met a good many. He didn't do two things that some of them did: give you the answer before he knew the question; or immediately begin to expound on his accomplishments in the field of science. I arrived at Ohio State just before lunch, and Dr. Hynek invited me to eat with him at the faculty club. He wanted to refer to some notes he had on the Mantell Incident and they were in his office, so we discussed UFO's in general during lunch.

Back in his office he started to review the Mantell Incident. He had been responsible for the weasel worded report that the Air Force released in late 1949, and he apologized for it. Had he known that it was going to cause so much confusion, he said, he would have been more specific. He thought the incident was a dead issue. The reason that Venus had been such a strong suspect was that it was in almost the same spot in the sky as the UFO. Dr. Hynek referred to his notes and told me that at 3:00 P.M., Venus had been south southwest of Godman and 33 degrees above the southern horizon. At 3:00 P.M. the people in the tower estimated the UFO to be southwest of Godman and at an elevation of about 45 degrees. Allowing for human error in estimating directions and angles, this was close. I agreed. There was one big flaw in the theory, however. Venus wasn't bright enough to be seen. He had computed the brilliance of the planet, and on the day in question it was only six times as bright as the surrounding sky. Then he explained what this meant. Six times may sound like a lot, but it isn't. When you start looking for a pinpoint of light only six times as bright as the surrounding sky, it's almost impossible to find it, even on a clear day.

Dr. Hynek said that he didn't think that the UFO was Venus.

I later found out that although it was a relatively clear day there was considerable haze.

I asked him about some of the other possibilities. He repeated the balloon, canopy reflection, and sundog theories but he refused to comment on them since, as he said, he was an astrophysicist and would care to comment only on the astrophysical aspects of the sightings.

I drove back to Dayton convinced that the UFO wasn't Venus. Dr. Hynek had said Venus would have been a pinpoint of light. The people in the tower had been positive of their descriptions, their statements brought that out. They couldn't agree on a description, they called the UFO "a parachute, an ice cream cone tipped with red," "round and white," "huge and silver or metallic," "a small white object," "one fourth the size of the full moon," but all the descriptions plainly indicated a large object. None of the descriptions could even vaguely be called a pinpoint of light.

This aspect of a definite shape seemed to eliminate the sundog theory too. Sundogs, or perihelia, as they are technically known, are caused by ice particles reflecting a diffused light. This would not give a sharp outline. I also recalled two instances where Air Force pilots had chased sundogs. In both instances when the aircraft began to climb, the sundog disappeared. This was because the angle of reflection changed as the airplane climbed several thousand feet. These sundog-caused UFO's also had fuzzy edges.

I had always heard a lot of wild speculation about the condition of Mantell's crashed F-51, so I wired for a copy of the accident report. It arrived several days after my visit with Dr. Hynek. The report said that the F-51 had lost a wing due to excessive speed in a dive after Mantell had "blacked out" due to the lack of oxygen. Mantell's body had not burned, not disintegrated, and was not full of holes; the wreck was not radioactive, nor was it magnetized.

One very important and pertinent question remained. Why did Mantell, an experienced pilot, try to go to 20,000 feet when he didn't even have an oxygen mask? If he had run out of oxygen, it would have been different. Every pilot and crewman has it pounded into him, "Do not, under any circumstances, go above 15,000 feet without oxygen." In high altitude indoctrination during World War II, I made several trips up to 30,000 feet in a pressure chamber. To demonstrate anoxia we would leave our oxygen masks off until we became dizzy. A few of the more hardy souls could get to 15,000 feet, but nobody ever got over 17,000. Possibly Mantell thought he could climb up to 20,000 in a hurry and get back down before he got anoxia and blacked out, but this would be a foolish

chance. This point was covered in the sighting report. A long-time friend of Mantell's went on record as saying that he'd flown with him several years and knew him personally. He couldn't conceive of Mantell's even thinking about disregarding his lack of oxygen. Mantell was one of the most cautious pilots he knew. "The only thing I can think," he commented, "was that he was after something that he believed to be more important than his life or his family."

My next step was to try to find out what Mantell's wing men had seen or thought but this was a blind alley. All of this evidence was in the ruined portion of the microfilm, even their names were missing. The only reference I could find to them was a vague passage indicating they hadn't seen anything.

I concentrated on the canopy reflection theory. It is widely believed that many flying saucers appear to pilots who are actually chasing a reflection on their canopy. I checked over all the reports we had on file. I couldn't find one that had been written off for this reason. I dug back into my own flying experience and talked to a dozen pilots. All of us had momentarily been startled by a reflection on the aircraft's canopy or wing, but in a second or two it had been obvious that it was a reflection. Mantell chased the object for at least fifteen to twenty minutes, and it is inconceivable that he wouldn't realize in that length of time that he was chasing a reflection.

About the only theory left to check was that the object might have been one of the big, 100-foot-diameter, "skyhook" balloons. I rechecked the descriptions of the UFO made by the people in the tower. The first man to sight the object called it a parachute; others said ice cream cone, round, etc. All of these descriptions fit a balloon. Buried deep in the file were two more references to balloons that I had previously missed. Not long after the object had disappeared from view at Godman AFB, a man from Madisonville, Kentucky, called Flight Service in Dayton. He had seen an object traveling southeast. He had looked at it through a telescope and it was a balloon. At four forty five an astronomer living north of Nashville, Tennessee, called in. He had also seen a UFO, looked at it through a telescope, and it was a balloon.

In the thousands of words of testimony and evidence taken on the Mantell Incident this was the only reference to balloons. I had purposely not paid too much attention to this possibility because I was sure that it had been thoroughly checked back in 1948. Now I wasn't sure.

I talked with one of the people who had been in on the Mantell investigation. The possibility of a balloon's causing the sighting had been mentioned but hadn't been followed up for two reasons. Number one

was that everybody at ATIC was convinced that the object Mantell was after was a spaceship and that this was the only course they had pursued. When the sighting grew older and no spaceship proof could be found, everybody jumped on the Venus band wagon, as this theory had "already been established." It was an easy way out. The second reason was that a quick check had been made on weather balloons and none were in the area. The big skyhook balloon project was highly classified at that time, and since they were all convinced that the object was of interplanetary origin (a minority wanted to give the Russians credit), they didn't want to bother to buck the red tape of security to get data on skyhook flights.

The group who supervise the contracts for all the skyhook research flights for the Air Force are located at Wright Field, so I called them. They had no records on flights in 1948 but they did think that the big balloons were being launched from Clinton County AFB in southern Ohio at that time. They offered to get the records of the winds on January 7 and see what flight path a balloon launched

in southwestern Ohio would have taken. In a few days they had the data for me.

Unfortunately the times of the first sightings, from the towns outside Louisville, were not exact but it was possible to partially reconstruct the sequence of events. The winds were such that a skyhook balloon launched from Clinton County AFB could be seen from the town east of Godman AFB, the town from which the first UFO was reported to the Kentucky State Police. It is not unusual to be able to see a large balloon for 50 to 60 miles. The balloon could have traveled west for a while, climbing as it moved with the strong east winds that were blowing that day and picking up speed as the winds got stronger at altitude. In twenty minutes it could have been in a position where it could be seen from Owensboro and Irvington, Kentucky, the two towns west of Godman. The second reports to the state police had come from these two towns. Still climbing, the balloon would have reached a level where a strong wind was blowing in a southerly direction. The jet stream winds were not being plotted in 1948 but the weather chart shows strong indications of a southerly bend in the jet stream for this day. Jet stream or not, the balloon would have moved rapidly south, still climbing. At a point somewhere south or southwest of Godman it would have climbed through the southerly moving winds to a calm belt at about 60,000 feet. At this level it would slowly drift south or southeast. A skyhook balloon can be seen at 60,000.

When first seen by the people in Godinan Tower, the UFO was south of the air base. It was relatively close and looked "like a parachute," which a balloon does. During the two hours that it was in sight, the observers reported that it seemed to hover, yet each observer estimated the time

---

he looked at the object through the binoculars and time wise the descriptions ran "huge," "small," "one fourth the size of a full moon," "one tenth the size of a full moon." Whatever the UFO was, it was slowly moving away. As the balloon continued to drift in a southerly direction it would have picked up stronger winds, and could have easily been seen by the astronomers in Madisonville, Kentucky, and north of Nashville an hour after it disappeared from view at Godman.

Somewhere in the archives of the Air Force or the Navy there are records that will show whether or not a balloon was launched from Clinton County AFB, Ohio, on January 7, 1948. I never could find these records. People who were working with the early skyhook projects "remember" operating out of Clinton County AFB in 1947 but refuse to be pinned down to a January 7 flight. Maybe, they said.

The Mantell Incident is the same old UFO jigsaw puzzle. By assuming the shape of one piece, a balloon launched from southwestern Ohio, the whole picture neatly falls together. It shows a huge balloon that Captain Thomas Mantell died trying to reach. He didn't know that he was chasing a balloon because he had never heard of a huge, 100-foot-diameter skyhook balloon, let alone seen one. Leave out the one piece of the jigsaw puzzle and the picture is a UFO, "metallic and tremendous in size."

It could have been a balloon. This is the answer I phoned back to the Pentagon.

During January and February of 1948 the reports of "ghost rockets" continued to come from air attaches in foreign countries near the Baltic Sea. People in North Jutland, Norway, Denmark, Sweden, and Germany reported "balls of fire traveling slowly across the sky." The reports were very sketchy and incomplete, most of them accounts from newspapers. In a few days the UFO's were being seen all over Europe and South America. Foreign reports hit a peak in the latter part of February and U.S. newspapers began to pick up the stories.

The Swedish Defense Staff supposedly conducted a comprehensive study of idents and conclu ed that they were all explainable in terms of astronomical phenome e this was UFO history, I ma de several attempts to get some detailed and official information on this report and the sightings, but

I was never successful.

The ghost rockets left in March, as mysteriously as they had arrived.

All during the spring of 1948 good reports continued to come in. Some were just run-of-the-mill but a large percentage of them were good, coming from people whose reliability couldn't be questioned. For example, three scientists reported that for thirty seconds they had watched a round object streak across the sky in a highly erratic flight path near the Army's secret

---

White Sands Proving Ground. And on May 28 the crew of an Air Force C-47 had three UFO's barrel in from "twelve o'clock high" to buzz their transport,

On July 21 a curious report was received from the Netherlands, The day before several persons reported seeing a UFO through high broken clouds over The Hague. The object was rocket shaped, with two rows of windows along the side. It was a poor report, very sketchy and incomplete, and it probably would have been forgotten except that four nights later a similar UFO almost collided with an Eastern Airlines DC-3. This near collision is Volume II of "The Classics."

On the evening of July 24, 1948, an Eastern Airlines DC-3 took off from Houston, Texas. It was on a scheduled trip to Atlanta, with intermediate stops in between. The pilots were Clarence S. Chiles and John B. Whitted. At about 2:45 A.M., when the flight was 20 miles southwest of Montgomery, the captain, Chiles, saw a light dead ahead and closing fast. His first reaction, he later reported to an ATIC investigation team, was that it was a jet, but in an instant he realized that even a jet couldn't close as fast as this light was closing. Chiles said he reached over, gave Whitted, the other pilot, a quick tap on the arm, and pointed. The UFO was now almost on top of them. Chiles racked the DC-3 into a tight left turn. Just as the UFO flashed by about 700 feet to the right, the DC-3 hit turbulent air. Whitted looked back just as the UFO pulled up in a steep climb.

Both the pilots had gotten a good look at the UFO and were able to give a good description to the Air Force intelligence people. It was a B-29 fuselage. The underside had a "deep blue glow." There were "two rows of windows from which bright lights glowed," and a "bright trail of orange red flame" shot out the back.

Only one passenger was looking out of the window at the time. The ATIC investigators talked to him. He said he saw a "strange, eerie streak of light, very intense," but that was all, no details. He said that it all happened before he could adjust his eyes to the darkness.

Minutes later a crew chief at Robins Air Force Base in Macon, Georgia, reported seeing an extremely bright light pass overhead, traveling at a high speed. A few days later another report from the night of July 24 came in. A pilot, flying near the Virginia North Carolina state line, reported that he had seen a "bright shooting star" in the direction of Montgomery, Alabama, at about the exact time the Eastern Airlines DC-3 was "buzzed."

According to the old timers at ATIC, this report shook them worse than the Mantell Incident. This was the first time two reliable sources had been really close enough to anything resembling a UFO to get a good

---

look and live to tell about it. A quick check on a map showed that the UFO that nearly collided with the airliner would have passed almost over Macon, Georgia, after passing the DC-3. It had been

turning toward Macon when last seen. The story of the crew chief at Robins AFB, 200 miles away, seemed to confirm the sighting, not to mention the report from near the Virginia North Carolina state line.

In intelligence, if you have something to say about some vital problem you write a report that is known as an "Estimate of the Situation." A few days after the DC-3 was buzzed, the people at ATIC decided that the time had arrived to make an Estimate of the Situation. The situation was the UFO's; the estimate was that they were interplanetary!

It was a rather thick document with a black cover and it was printed on legal sized paper. Stamped across the front were the words TOP SECRET.

It contained the Air Force's analysis of many of the incidents I have told you about plus many similar ones. All of them had come from scientists, pilots, and other equally credible observers, and each one was an unknown.

The document pointed out that the reports hadn't actually started with the Arnold Incident. Belated reports from a weather observer in Richmond, Virginia, who observed a "silver disk" through his theodolite telescope; an F47 pilot and three pilots in his formation who saw a "silver flying wing," and the English "ghost airplanes" that had been picked up on radar early in 1947 proved this point. Although reports on them were not received until after the Arnold sighting, these incidents all had taken place earlier.

When the estimate was completed, typed, and approved, it started up through channels to higher command echelons. It drew considerable comment but no one stopped it on its way up.

A matter of days after the Estimate of the Situation was signed, sealed, and sent on its way, the third big sighting of 1948, Volume III of "The Classics," took place. The date was October 1, and the place was Fargo, North Dakota; it was the famous Gorman Incident, in which a pilot fought a "duel of death" with a UFO.

The pilot was George F. Gorman, a twenty-five-year-old second lieutenant in the North Dakota Air National Guard.

It was eight thirty in the evening and Gorman was coming into Fargo from a cross-country flight. He flew around Fargo for a while and about nine o'clock decided to land. He called the control tower for landing instructions and was told that a Piper Cub was in the area. He saw the Cub below him. All of a sudden what appeared to be the taillight of

---

another airplane passed him on his right. He called the tower and complained but they assured him that no other aircraft except the Cub were in the area. Gorman could still see the light so he decided to find out what it was. He pushed the F-51 over into a turn and cut in toward the light. He could plainly see the Cub outlined against the city lights below, but he could see no outline of a body near the mysterious light. He gave the '51 more power and closed to within a 1,000 yards, close enough to estimate that the light was 6 to 8 inches in diameter, was sharply outlined, and was blinking on and off. Suddenly the light became steady as it apparently put on power; it pulled into a sharp left bank and made a pass at the tower. The light zoomed up with the F-51 in hot pursuit. At 7,000 feet it made a turn. Gorman followed and tried to cut inside the light's turn to get closer to it but he couldn't do it. The light made another turn, and this time the '51 closed on a collision course. The UFO appeared to try to ram the '51, and Gorman had to dive to get out of the way. The UFO passed over the '51's canopy with only a few feet to spare. Again both the F-51 and the object turned and closed on each other head on, and again the pilot had to dive out to prevent a collision. All of a sudden the light

began to climb and disappeared.

"I had the distinct impression that its maneuvers were controlled by thought or reason," Gorman later told ATIC investigators.

Four other observers at Fargo partially corroborated his story, an oculist, Dr. A. D. Cannon, the Cub's pilot, and his passenger, Einar Neilson. They saw a light "moving fast," but did not witness all the maneuvers that Gorman reported. Two CAA employees on the ground saw a light move over the field once.

Project Sign investigators rushed to Fargo. They had wired ahead to ground the plane. They wanted to check it over before it flew again. When they arrived, only a matter of hours after the incident, they went over the airplane, from the prop spinner to the rudder trim tab, with a Geiger counter. A chart in the official report shows where every Geiger counter reading was taken. For comparison they took readings on a similar airplane that hadn't been flown for several days. Gorman's airplane was more radioactive. They rushed around, got sworn statements from the tower operators and oculist, and flew back to Dayton.

In the file on the Gorman Incident I found an old memo reporting the meeting that was held upon the ATIC team's return from Fargo. The memo concluded that some weird things were taking place.

The historians of the UFO agree. Donald Keyhoe, a retired Marine Corps major and a professional writer, author of The Flying Saucers Are Real and Flying Saucers from Outer Space, needles the Air Force about

---

the Gorman Incident, pointing out how, after feebly hinting that the light could have been a lighted weather balloon, they dropped it like a hot UFO. Some person by the name of Wilkins, in an equally authoritative book, says that the Gorman Incident "stumped" the Air Force. Other assorted historians point out that normally the UFO's are peaceful, Gorman and Mantell just got too inquisitive, "they" just weren't ready to be observed closely. If the Air Force hadn't slapped down the security lid, these writers might not have reached this conclusion. There have been other and more lurid "duels of death."

On June 21, 1952, at 10:58 P.M., a Ground Observer Corps spotter reported that a slow moving craft was nearing the AEC's Oak Ridge Laboratory, an area so secret that it is prohibited to aircraft. The spotter called the light into his filter center and the filter center relayed the message to the ground control intercept radar. They had a target. But before they could do more than confirm the GOC spotter's report, the target faded from the radarscope.

An F-47 aircraft on combat air patrol in the area was vectored in visually, spotted a light, and closed on it. They "fought" from 10,000 to 27,000 feet, and several times the object made what seemed to be ramming attacks. The light was described as white, 6 to 8 inches in diameter, and blinking until it put on power. The pilot could see no silhouette around the light. The similarity to the Fargo case was striking.

On the night of December 10, 1952, near another atomic installation, the Hanford plant in Washington, the pilot and radar observer of a patrolling F-94 spotted a light while flying at 26,000 feet. The crew called their ground control station and were told that no planes were known to be in the area. They closed on the object and saw a large, round, white "thing" with a dim reddish light coming from two "windows." They lost visual contact, but got a radar lock-on. They reported that when they attempted to close on it again it would reverse direction and dive away. Several times the plane altered course itself because collision seemed imminent.

In each of these instances, as well as in the case narrated next, the sources of the stories were trained airmen with excellent reputations. They were sincerely baffled by what they had seen. They had no conceivable motive for falsifying or "dressing up" their reports.

The other dogfight occurred September 24, 1952, between a Navy pilot of a TBM and a light over Cuba.

The pilot had just finished making some practice passes for night fighters when he spotted an orange light to the east of his plane. He checked on aircraft in the area, learned that the object was unidentified,

---

and started after it. Here is his report, written immediately after he landed:

As it [the light] approached the city from the east it started a left turn. I started to intercept. During the first part of the chase the closest I got to the light was 8 to 10 miles. At this time it appeared to be as large as an SNJ and had a greenish tail that looked to be five to six times as long as the light's diameter. This tail was seen several times in the next 10 minutes in periods of from 5 to 30 seconds each. As I reached 10,000 feet it appeared to be at 15,000 feet and in a left turn. It took 40 degrees of bank to keep the nose of my plane on the light. At this time I estimated the light to be in a 10-to-l 5 mile orbit.

At 12,000 feet I stopped climbing, but the light was still climbing faster than I was. I then reversed my turn from left to right and the light also reversed. As I was not gaining distance, I held a steady course south trying to estimate a perpendicular between the light and myself. The light was moving north, so I turned north. As I turned, the light appeared to move west, then south over the base. I again tried to intercept but the light appeared to climb rapidly at a 60 degree angle. It climbed to 35,000 feet, then started a rapid descent.

Prior to this, while the light was still at approximately 15,000 feet, I deliberately placed it between the moon and myself three times to try to identify a solid body. I and my two crewmen all had a good view of the light as it passed the moon. We could see no solid body. We considered the fact that it might be an aerologist's balloon, but we did not see a silhouette. Also, we would have rapidly caught up with and passed a balloon.

During its descent, the light appeared to slow down at about 10,000 feet, at which time I made three runs on it. Two were on a 90 degree collision course, and the light traveled at tremendous speed across my bow. On the third run I was so close that the light blanked out the airfield below me. Suddenly it started a dive and I followed, losing it at 1,500 feet.

In this incident the UFO was a balloon.

The following night a lighted balloon was sent up and the pilot was ordered up to compare his experiences. He duplicated his dogfight - illusions and all. The Navy furnished us with a long analysis of the affair, explaining how the pilot had been fooled.

In the case involving the ground observer and the F-47 near the atomic installation, we plotted the winds and calculated that a lighted balloon was right at the spot where the pilot encountered the light.

In the other instance, the "white object with two windows," we found that a skyhook balloon had been plotted at the exact site of the "battle."

Gorman fought a lighted balloon too. An analysis of the sighting by the Air Weather Service sent to ATIC in a letter dated January 24, 1949, proved it. The radioactive F-51 was decontaminated by a memo from a Wright Field laboratory explaining that a recently flown airplane will be

---

more radioactive than one that has been on the ground for several days. An airplane at 20,000 to 30,000 feet picks up more cosmic rays than one shielded by the earth's ever present haze.

Why can't experienced pilots recognize a balloon when they see one? If they are flying at night, odd things can happen to their vision. There is the problem of vertigo as well as disorientation brought on by flying without points of reference. Night fighters have told dozens of stories of being fooled by lights.

One night during World War II we had just dumped a load of bombs on a target when a "night fighter" started to make a pass at us. Everyone in the cockpit saw the fighter's red-hot exhaust stack as he bore down on us. I cut loose with six caliber-.50 machine guns. Fortunately I missed the "night fighter" - if I'd have shot it I'd have fouled up the astronomers but good because the "night fighter" was Venus.

While the people on Project Sign were pondering over Lieutenant Gorman's dogfight with the UFO - at the time they weren't even considering the balloon angle - the Top Secret Estimate of the Situation was working its way up into the higher echelons of the Air Force. It got to the late General Hoyt S. Vandenberg, then Chief of Staff, before it was batted back down. The general wouldn't buy interplanetary vehicles. The report lacked proof. A group from ATIC went to the Pentagon to bolster their position but had no luck, the Chief of Staff just couldn't be convinced.

The estimate died a quick death. Some months later it was completely declassified and relegated to the incinerator. A few copies, one of which I saw, were kept as mementos of the golden days of the UFO's.

The top Air Force command's refusal to buy the interplanetary theory didn't have any immediate effect upon the morale of Project Sign because the reports were getting better.

A belated report that is more of a collectors' item than a good UFO sighting came into ATIC in the fall of 1948. It was from Moscow. Someone, I could never find out exactly who, reported a huge "smudge like" object in the sky.

Then radar came into the picture. For months the anti saucer factions had been pointing their fingers at the lack of radar reports, saying, "If they exist, why don't they show up on radarscopes?" When they showed up on radarscopes, the UFO won some converts.

On October 15 an F-61, a World War II "Black Widow" night fighter was on patrol over Japan when it picked up an unidentified target on its radar. The target was flying between 5,000 and 6,000 feet and traveling about 200 miles per hour. When the F-61 tried to intercept it would get to within 12,000 feet of the UFO only to have it accelerate to an estimated

---

1,200 miles per hour, leaving the F-61 far behind before slowing down again. The F-61 crew made six attempts to close on the UFO. On one pass, the crew said, they did get close enough to see its silhouette. It was 20 to 30 feet long and looked "like a rifle bullet."

Toward the end of November a wire came into Project Sign from Germany. It was the first report where a UFO was seen and simultaneously picked up on radar. This type of report, the first of many to come, is one of the better types of UFO reports. The wire said:

At 2200 hours, local time, 23 November 1948, Capt. saw an object in the air directly east of this base. It was at an unknown altitude. It looked like a reddish star and was moving in a southerly direction across Munich, turning slightly to the southwest then the southeast. The speed could have been between 200 to 600 mph, the actual speed could not be estimated,

not knowing the height. Capt. called base operations and they called the radar station. Radar reported that they had seen nothing on their scope but would check again. Radar then called operations to report that they did have a target at 27,000 feet, some 30 miles south of Munich, traveling at 900 mph. Capt. reported that the object that he saw was now in that area. A few minutes later radar called again to say that the target had climbed to 50,000 feet, and was circling 40 miles south of Munich.

Capt. - is an experienced pilot now flying F-80's and is considered to be completely reliable. The sighting was verified by Capt. , also an F-80 pilot.

The possibility that this was a balloon was checked but the answer from Air Weather Service was "not a balloon." No aircraft were in the area. Nothing we know of, except possibly experimental aircraft, which are not in Germany, can climb 23,000 feet in a matter of minutes and travel 900 miles per hour.

By the end of 1948, Project Sign had received several hundred UFO reports. Of these, 167 had been saved as good reports. About three dozen were "Unknown." Even though the UFO reports were getting better and more numerous, the enthusiasm over the interplanetary idea was cooling off. The same people who had fought to go to Godman AFB to talk to Colonel Hix and his UFO observers in January now had to be prodded when a sighting needed investigating. More and more work was being pushed off onto the other investigative organization that was helping ATIC. The kickback on the Top Secret Estimate of the Situation was beginning to dampen a lot of enthusiasms. It was definitely a bear market for UFO's.

A bull market was on the way, however. Early 1949 was to bring "little lights" and green fireballs.

The "little lights" were UFO's, but the green fireballs were real.

Chapter 4. Green Fireballs, Project Twinkle, Little Lights, and Grudge, Page 47

CHAPTER FOUR

Green Fireballs, Project Twinkle, Little Lights, and Grudge

At exactly midnight on September 18, 1954, my telephone rang. It was Jim Phalen, a friend of mine from the Long Beach Press-Telegram, and he had a "good flying saucer report," hot off the wires. He read it to me. The lead line was: "Thousands of people saw a huge fireball light up dark New Mexico skies tonight."

The story went on to tell about how a "blinding green" fireball the size of a full moon had silently streaked southeast across Colorado and northern New Mexico at eight forty that night. Thousands of people had seen the fireball. It had passed right over a crowded football stadium at Santa Fe, New Mexico, and people in Denver said it "turned night into day." The crew of a TWA airliner flying into Albuquerque from Amarillo, Texas, saw it. Every police and newspaper switchboard in the two state area was jammed with calls.

One of the calls was from a man inquiring if anything unusual had happened recently. When he was informed about the mysterious fireball he heaved an audible sigh of relief, "Thanks," he said, "I was afraid I'd gotten some bad bourbon." And he hung up.

Dr. Lincoln La Paz, world-famous authority on meteorites and head of the University of New Mexico's Institute of Meteoritics, apparently took the occurrence calmly. The wire story said he had told a reporter that he would plot its course, try to determine where it landed, and go out and try to find it. "But," he said, "I don't expect to find anything."

When Jim Phalen had read the rest of the report he asked, "What was it?"

"It sounds to me like the green fireballs are back," I answered.

"What the devil are green fireballs?"

What the devil are green fireballs? I'd like to know. So would a lot of other people.

The green fireballs streaked into UFO history late in November 1948, when people around Albuquerque, New Mexico, began to report seeing mysterious "green flares" at night. The first reports mentioned only a

---

"green streak in the sky," low on the horizon. From the description the Air Force Intelligence people at Kirtland AFB in Albuquerque and the Project Sign people at ATIC wrote the objects off as flares. After all, thousands of GI's had probably been discharged with a duffel bag full of "liberated" Very pistols and flares.

But as days passed the reports got better. They seemed to indicate that the "flares" were getting larger and more people were reporting seeing them. It was doubtful if this "growth" was psychological because there had been no publicity - so the Air Force decided to reconsider the "flare" answer. They were in the process of doing this on the night of December 5, 1948, a memorable night in the green fireball chapter of UFO history.

At 9:27 P.M. on December 5, an Air Force C-47 transport was flying at 18,000 feet 10 miles east of Albuquerque. The pilot was a Captain Goede. Suddenly the crew, Captain Goede, his co-pilot, and his engineer were startled by a green ball of fire flashing across the sky ahead of them. It looked

something like a huge meteor except that it was a bright green color and it didn't arch downward, as meteors usually do. The green- colored ball of fire had started low, from near the eastern slopes of the Sandia Mountains, arched upward a little, then seemed to level out. And it was too big for a meteor, at least it was larger than any meteor that anyone in the C-47 had ever seen before. After a hasty discussion the crew decided that they'd better tell somebody about it, especially since they had seen an identical object twenty-two minutes before near Las Vegas, New Mexico.

Captain Goede picked up his microphone and called the control tower at Kirtland AFB and reported what he and his crew had seen. The tower relayed the message to the local intelligence people.

A few minutes later the captain of Pioneer Airlines Flight 63 called Kirtland Tower. At 9:35 P.M. he had also seen a green ball of fire just east of Las Vegas, New Mexico. He was on his way to Albuquerque and would make a full report when he landed.

When he taxied his DC-3 up to the passenger ramp at Kirtland a few minutes later, several intelligence officers were waiting for him. He reported that at 9:35 P.M. he was on a westerly heading, approaching Las Vegas from the east, when he and his co-pilot saw what they first thought was a "shooting star." It was ahead and a little above them. But, the captain said, it took them only a split second to realize that whatever they saw was too low and had too flat a trajectory to be a meteor. As they watched, the object seemed to approach their airplane head on, changing color from orange red to green. As it became bigger and bigger, the captain said, he thought sure it was going to collide with them so he

---

racked the DC-3 up in a tight turn. As the green ball of fire got abreast of them it began to fall toward the ground, getting dimmer and dimmer until it disappeared. Just before he swerved the DC-3, the fireball was as big, or bigger, than a full moon.

The intelligence officers asked a few more questions and went back to their office. More reports, which had been phoned in from all over northern New Mexico, were waiting for them. By morning a full-fledged investigation was under way.

No matter what these green fireballs were, the military was getting a little edgy. They might be common meteorites, psychologically enlarged flares, or true UFO's, but whatever they were they were playing around in one of the most sensitive security areas in the United States. Within 100 miles of Albuquerque were two installations that were the backbone of the atomic bomb program, Los Alamos and Sandia Base. Scattered throughout the countryside were other installations vital to the defense of the U.S.: radar stations, fighter interceptor bases, and the other mysterious areas that had been blocked off by high chain link fences.

Since the green fireballs bore some resemblance to meteors or meteorites, the Kirtland intelligence officers called in Dr. Lincoln La Paz.

Dr. La Paz said that he would be glad to help, so the officers explained the strange series of events to him. True, he said, the description of the fireballs did sound as if they might be meteorites - except for a few points. One way to be sure was to try to plot the flight path of the green fireballs the same way he had so successfully plotted the flight path of meteorites in the past. From this flight path he could determine where they would have hit the earth - if they were meteorites. They would search this area, and if they found parts of a meteorite they would have the answer to the green fireball riddle.

The fireball activity on the night of December 5 was made to order for plotting flight paths. The good reports of that night included carefully noted locations, the directions in which the green

objects were seen, their heights above the horizon, and the times when they were observed. So early the next morning Dr. La Paz and a crew of intelligence officers were scouring northern New Mexico. They started out by talking to the people who had made reports but soon found out that dozens of other people had also seen the fireballs. By closely checking the time of the observations, they determined that eight separate fireballs had been seen. One was evidently more spectacular and was seen by the most people. Everyone in northern New Mexico had seen it going from west to east, so Dr. La Paz and his crew worked eastward across New Mexico to the west border of Texas, talking to dozens of people. After many sleepless hours

---

50.The Report on Unidentified Flying Objects

they finally plotted where it should have struck the earth. They searched the area but found nothing. They went back over the area time and time again-nothing. As Dr. La Paz later told me, this was the first time that he seriously doubted the green fireballs were meteorites.

Within a few more days the fireballs were appearing almost nightly. The intelligence officers from Kirtland decided that maybe they could get a good look at one of them, so on the night of December 8 two officers took off in an airplane just before dark and began to cruise around north of Albuquerque. They had a carefully worked out plan where each man would observe certain details if they saw one of the green fireballs. At 6:33 P.M. they saw one. This is their report:

At 6:33 P.M. while flying at an indicated altitude of 11,500 feet, a strange phenomenon was observed. Exact position of the aircraft at time of the observation was 20 miles east of the Las Vegas, N.M., radio range station. The aircraft was on a compass course of 90 degrees. Capt. was pilot and I was acting as copilot. I first observed the object and a split second later the pilot saw it. It was 2,000 feet higher than the plane, and was approaching the plane at a rapid rate of speed from 30 degrees to the left of our course. The object was similar in appearance to a burning green flare, the kind that is commonly used in the Air Force. However, the light was much more intense and the object appeared considerably larger than a normal flare. The trajectory of the object, when first sighted, was almost flat and parallel to the earth. The phenomenon lasted about 2 seconds. At the end of this time the object seemed to begin to burn out and the trajectory then dropped off rapidly. The phenomenon was of such intensity as to be visible from the very moment it ignited.

Back at Wright-Patterson AFB, ATIC was getting a blow-by-blow account of the fireball activity but they were taking no direct part in the investigation. Their main interest was to review all incoming UFO reports and see if the green fireball reports were actually unique to the Albuquerque area. They were. Although a good many UFO reports were coming in from other parts of the U.S., none fit the description of the green fireballs.

All during December 1948 and January 1949 the green fireballs continued to invade the New Mexico skies. Everyone, including the intelligence officers at Kirtland AFB, Air Defense Command people, Dr. La Paz, and some of the most distinguished scientists at Los Alamos had seen at least one.

In mid February 1949 a conference was called at Los Alamos to determine what should be done to further pursue the investigation. The Air Force, Project Sign, the intelligence people at Kirtland, and other interested parties had done everything they could think of and still no answer.

Green Fireballs, Project Twinkle, Little Lights, and Grudge.51

Such notable scientists as Dr. Joseph Kaplan, a world-renowned authority on the physics of the upper atmosphere, Dr. Edward Teller, of H-bomb fame, and of course Dr. La Paz, attended, along with a lot of military brass and scientists from Los Alamos.

This was one conference where there was no need to discuss whether or not this special type of UFO, the green fireball, existed. Almost everyone at the meeting had seen one. The purpose of the conference was to decide whether the fireballs were natural or man-made and how to find out more

about them.

As happens in any conference, opinions were divided. Some people thought the green fireballs were natural fireballs. The proponents of the natural meteor, or meteorite, theory presented facts that they had dug out of astronomical journals. Greenish colored meteors, although not common, had been observed on many occasions. The flat trajectory, which seemed to be so important in proving that the green fireballs were extraterrestrial, was also nothing new. When viewed from certain angles, a meteor can appear to have a flat trajectory. The reason that so many had been seen during December of 1948 and January of 1949 was that the weather had been unusually clear all over the Southwest during this period.

Dr. La Paz led the group who believed that the green fireballs were not meteors or meteorites. His argument was derived from the facts that he had gained after many days of research and working with Air Force intelligence teams. He stuck to the points that (1) the trajectory was too flat, (2) the color was too green, and (3) he couldn't locate any fragments even though he had found the spots where they should have hit the earth if they were meteorites.

People who were at that meeting have told me that Dr. La Paz's theory was very interesting and that each point was carefully considered. But evidently it wasn't conclusive enough because when the conference broke up, after two days, it was decided that the green fireballs were a natural phenomenon of some kind. It was recommended that this phase of the UFO investigation be given to the Air Force's Cambridge Research Laboratory, since it is the function of this group to study natural phenomena, and that Cambridge set up a project to attempt to photograph the green fireballs and measure their speed, altitude, and size.

In the late summer of 1949, Cambridge established Project Twinkle to solve the mystery. The project called for establishing three cinetheodolite stations near White Sands, New Mexico. A cinetheodolite is similar to a 35 mm. movie camera except when you take a photograph of an object you also get a photograph of three dials that show the time the photo was taken, the azimuth angle, and the elevation angle of the camera.

52.The Report on Unidentified Flying Objects

If two or more cameras photograph the same object, it is possible to obtain a very accurate measurement of the photographed object's altitude, speed, and size.

Project Twinkle was a bust. Absolutely nothing was photographed. Of the three cameras that were planned for the project, only one was available. This one camera was continually being moved from place to place. If several reports came from a certain area, the camera crew would load up their equipment and move to that area, always arriving too late. Any duck hunter can tell you that this is the wrong tactic; if you want to shoot any ducks pick a good place and stay put, let the ducks come to you.

The people trying to operate Project Twinkle were having financial and morale trouble. To do a good job they needed more and better equipment and more people, but Air Force budget cuts precluded this. Moral support was free but they didn't get this either.

When the Korean War started, Project Twinkle silently died, along with official interest in green fireballs.

When I organized Project Blue Book in the summer of 1951 I'd never heard of a green fireball. We had a few files marked "Los Alamos Conference," "Fireballs," "Project Twinkle," etc., but I didn't pay any attention to them.

Then one day I was at a meeting in Los Angeles with several other officers from ATIC, and was introduced to Dr. Joseph Kaplan. When he found we were from ATIC, his first question was, "What ever happened to the green fireballs?" None of us had ever heard of them, so he quickly gave us the story. He and I ended up discussing green fireballs. He mentioned Dr. La Paz and his opinion that the green fireballs might be man-made, and although he respected La Paz's professional ability, he just wasn't convinced. But he did strongly urge me to get in touch with Dr. La Paz and hear his side of the story.

When I returned to ATIC I spent several days digging into our collection of green fireball reports. All of these reports covered a period from early December 1948 to 1949. As far as Blue Book's files were concerned, there hadn't been a green fireball report for a year and a half.

I read over the report on Project Twinkle and the few notes we had on the Los Alamos Conference, and decided that the next time I went to Albuquerque I'd contact Dr. La Paz. I did go to Albuquerque several times but my visits were always short and I was always in a hurry so I didn't get to see him.

It was six or eight months later before the subject of green fireballs came up again. I was eating lunch with a group of people at the AEC's Los Alamos Laboratory when one of the group mentioned the mysterious

---

kelly-green balls of fire. The strictly unofficial bull-session-type discussion that followed took up the entire lunch hour and several hours of the afternoon. It was an interesting discussion because these people, all scientists and technicians from the lab, had a few educated guesses as to what they might be. All of them had seen a green fireball, some of them had seen several.

One of the men, a private pilot, had encountered a fireball one night while he was flying his Navion north of Santa Fe and he had a vivid way of explaining what he'd seen. "Take a soft ball and paint it with some kind of fluorescent paint that will glow a bright green in the dark," I remember his saying, "then have someone take the ball out about 100 feet in front of you and about 10 feet above you. Have him throw the ball right at your face, as hard as he can throw it. That's what a green fireball looks like."

The speculation about what the green fireballs were ran through the usual spectrum of answers, a new type of natural phenomenon, a secret U.S. development, and psychologically enlarged meteors. When the possibility of the green fireballs' being associated with interplanetary vehicles came up, the whole group got serious. They had been doing a lot of thinking about this, they said, and they had a theory.

The green fireballs, they theorized, could be some type of unmanned test vehicle that was being projected into our atmosphere from a "spaceship" hovering several hundred miles above the earth. Two years ago I would have been amazed to hear a group of reputable scientists make such a startling statement. Now, however, I took it as a matter of course. I'd heard the same type of statement many times before from equally qualified groups.

Turn the tables, they said, suppose that we are going to try to go to a far planet. There would be three phases to the trip: out through the earth's atmosphere, through space, and the re-entry into the atmosphere of the planet we're planning to land on. The first two phases would admittedly present formidable problems, but the last phase, the re-entry phase, would be the most critical. Coming in from outer space, the craft would, for all practical purposes, be similar to a meteorite except that it would be powered and not free falling. You would have myriad problems associated with aerodynamic heating, high aerodynamic loadings, and very probably a host of other problems that no one can now conceive of. Certain of these problems could be partially solved by laboratory

experimentation, but nothing can replace flight testing, and the results obtained by flight tests in our atmosphere would not be valid in another type of atmosphere. The most logical way to overcome this difficulty would be

---

to build our interplanetary vehicle, go to the planet that we were interested in landing on, and hover several hundred miles up. From this altitude we could send instrumented test vehicles down to the planet. If we didn't want the inhabitants of the planet, if it were inhabited, to know what we were doing we could put destruction devices in the test vehicle, or arrange the test so that the test vehicles would just plain burn up at a certain point due to aerodynamic heating.

They continued, each man injecting his ideas.

Maybe the green fireballs are test vehicles-somebody else's. The regular UFO reports might be explained by the fact that the manned vehicles were venturing down to within 100,000 or 200,000 feet of the earth, or to the altitude at which atmosphere re-entry begins to get critical.

I had to go down to the airstrip to get a CARGO Airlines plane back to Albuquerque so I didn't have time to ask a lot of questions that came into my mind. I did get to make one comment. From the conversations, I assumed that these people didn't think the green fireballs were any kind of a natural phenomenon. Not exactly, they said, but so far the evidence that said they were a natural phenomenon was vastly outweighed by the evidence that said they weren't.

During the kidney jolting trip down the valley from Los Alamos to Albuquerque in one of the CARGO Airlines' Bonanzas, I decided that I'd stay over an extra day and talk to Dr. La Paz.

He knew every detail there was to know about the green fireballs. He confirmed my findings, that the genuine green fireballs were no longer being seen. He said that he'd received hundreds of reports, especially after he'd written several articles about the mysterious fireballs, but that all of the reported objects were just greenish colored, common, everyday meteors.

Dr. La Paz said that some people, including Dr. Joseph Kaplan and Dr. Edward Teller, thought that the green fireballs were natural meteors. He didn't think so, however, for several reasons. First the color was so much different. To illustrate his point, Dr. La Paz opened his desk drawer and took out a well worn chart of the color spectrum. He checked off two shades of green; one a pale, almost yellowish green and the other a much more distinct vivid green. He pointed to the bright green and told me that this was the color of the green fireballs. He'd taken this chart with him when he went out to talk to people who had seen the green fireballs and everyone had picked this one color. The pale green, he explained, was the color reported in the cases of documented green meteors.

Then there were other points of dissimilarity between a meteor and the green fireballs. The trajectory of the fireballs was too flat. Dr. La Paz

---

explained that a meteor doesn't necessarily have to arch down across the sky, its trajectory can appear to be flat, but not as flat as that of the green fireballs. Then there was the size. Almost always such descriptive words as "terrifying," "as big as the moon," and "blinding" had been used to describe the fireballs. Meteors just aren't this big and bright.

No ---Dr. La Paz didn't think that they were meteors.

Dr. La Paz didn't believe that they were meteorites either.

A meteorite is accompanied by sound and shock waves that break windows and stampede cattle. Yet in every case of a green fireball sighting the observers reported that they did not hear any sound.

But the biggest mystery of all was the fact that no particles of a green fireball had ever been found. If they were meteorites, Dr. La Paz was positive that he would have found one. He'd missed very few times in the cases of known meteorites. He pulled a map out of his file to show me what he meant. It was a map that he had used to plot the spot where a meteorite had hit the earth. I believe it was in Kansas. The map had been prepared from information he had obtained from dozens of people who had seen the meteorite come flaming toward the earth. At each spot where an observer was standing he'd drawn in the observer's line of sight to the meteorite. From the dozens of observers he had obtained dozens of lines of sight. The lines all converged to give Dr. La Paz a plot of the meteorite's downward trajectory. Then he had been able to plot the spot where it had struck the earth. He and his crew went to the marked area, probed the ground with long steel poles, and found the meteorite.

Of all the successful expeditions in his file this was just one case that he showed me. He had records of many more similar expeditions.

Then he showed me some other maps. The plotted lines looked identical to the ones on the map I'd just seen. Dr. La Paz had used the same techniques on these plots and had marked an area where he wanted to search. He had searched the area many times but he had never found anything.

These were plots of the path of a green fireball.

When Dr. La Paz had finished, I had one last question, "What do you think they are?"

He weighed the question for a few seconds then he said that all he cared to say was that he didn't think that they were a natural phenomenon. He thought that maybe someday one would hit the earth and the mystery would be solved. He hoped that they were a natural phenomenon.

After my talk with Dr. La Paz I can well understand his apparent calmness on the night of September 18, 1954, when the newspaper reporter called him to find out if he planned to investigate this latest green fireball

---

report. He was speaking from experience, not indifference, when he said, "But I don't expect to find anything."

If the green fireballs are back, I hope that Dr. La Paz gets an answer this time.

The story of the UFO now goes back to late January 1949, the time when the Air Force was in the midst of the green fireball mystery. In another part of the country another odd series of events was taking place. The center of activity was a highly secret area that can't be named, and the recipient of the UFO's, which were formations of little lights, was the U.S. Army.

The series of incidents started when military patrols who were protecting the area began to report seeing formations of lights flying through the night sky. At first the lights were reported every three or four nights, but inside of two weeks the frequency had stepped up. Before long they were a nightly occurrence. Some patrols reported that they had seen three or four formations in one night. The sightings weren't restricted to the men on patrol. One night, just at dusk, during retreat, the entire garrison watched a formation pass directly over the post parade ground.

As usual with UFO reports, the descriptions of the lights varied but the majority of the observers reported a V formation of three lights. As the formation moved through the sky, the lights changed in color from a bluish white to orange and back to bluish white. This color cycle took about two seconds. The lights usually traveled from west to east and made no sound. They didn't streak across the sky like a meteor, but they were "going faster than a jet." The lights were "a little bigger than the biggest star." Once in a while the GI's would get binoculars on them but they couldn't see any more details. The lights just looked bigger.

From the time of the first sighting, reports of the little lights were being sent to the Air Force through Army Intelligence channels. The reports were getting to ATIC, but the green fireball activity was taking top billing and no comments went back to the Army about their little lights. According to an Army G-2 major to whom I talked in the Pentagon, this silence was taken to mean that no action, other than sending in reports, was necessary on the part of the Army.

But after about two weeks of nightly sightings and no apparent action by the Air Force, the commander of the installation decided to take the initiative and set a trap. His staff worked out a plan in record time. Special UFO patrols would be sent out into the security area and they would be furnished with sighting equipment. This could be the equipment that they normally used for fire control. Each patrol would be sent to a specific location and would set up a command post. Operating out of the command

---

post, at points where the sky could be observed, would be sighting teams. Each team had sighting equipment to measure the elevation and azimuth angle of the UFO. Four men were to be on each team, an instrument man, a timer, a recorder, and a radio operator. All the UFO patrols would be assigned special radio frequencies.

The operating procedure would be that when one sighting team spotted a UFO the radio operator would call out his team's location, the location of the UFO in the sky, and the direction it was going. All of the other teams from his patrol would thus know when to look for the UFO and begin to sight on it. While the radio man was reporting, the instrument man on the team would line up the UFO and begin to call out the angles of elevation and azimuth. The timer would call out the time; the recorder would write all of this down. The command post, upon hearing the report of the UFO, would call the next patrol and tell them. They too would try to pick it up.

Here was an excellent opportunity to get some concrete data on at least one type of UFO. It was something that should have been done from the start. Speeds, altitudes, and sizes that are estimated just by looking at a UFO are miserably inaccurate. But if you could accurately establish that some type of object was traveling 30,000 miles an hour, even 3,000 miles an hour - through our atmosphere, the UFO story would be the biggest story since the Creation.

The plan seemed foolproof and had the full support of every man who was to participate. For the first time in history every GI wanted to get on the patrols. The plan was quickly written up as a field order, approved, and mimeographed. Since the Air Force had the prime responsibility for the UFO investigation, it was decided that the plan should be quickly coordinated with the Air Force, so a copy was rushed to them. Time was critical because every group of nightly reports might be the last. Everything was ready to roll the minute the Air Force said "Go."

The Air Force didn't O.K. the plan. I don't know where the plan was killed, or who killed it, but it was killed. Its death caused two reactions.

Many people thought that the plan was killed so that too many people wouldn't find out the truth about UFO's. Others thought somebody was just plain stupid. Neither was true. The answer was

simply that the official attitude toward UFO's had drastically changed in the past few months. They didn't exist, they couldn't exist. It was the belief at ATIC that the one last mystery, the green fireballs, had been solved a few days before at Los Alamos. The fireballs were meteors and Project Twinkle would prove it. Any further investigation by the Army would be a waste of time and effort.

---

58. The Report on Unidentified Flying Objects

This drastic change in official attitude is as difficult to explain as it was difficult for many people who knew what was going on inside Project Sign to believe. I use the words "official attitude" because at this time UFO's had become as controversial a subject as they are today. All through intelligence circles people had chosen sides and the two UFO factions that exist today were born.

On one side was the faction that still believed in flying saucers. These people, come hell or high water, were hanging on to their original ideas. Some thought that the UFO's were interplanetary spaceships. Others weren't quite as bold and just believed that a good deal more should be known about the UFO's before they were so completely written off. These people weren't a bunch of nuts or crackpots either. They ranged down through the ranks from generals and top grade civilians. On the outside their views were backed up by civilian scientists.

On the other side were those who didn't believe in flying saucers. At one time many of them had been believers. When the UFO reports were pouring in back in 1947 and 1948, they were just as sure that the UFO's were real as the people they were now scoffing at. But they had changed their minds. Some of them had changed their minds because they had seriously studied the UFO reports and just couldn't see any evidence that the UFO's were real. But many of them could see the "I don't believe" band wagon pulling out in front and just jumped on.

This change in the operating policy of the UFO project was so pronounced that I, like so many other people, wondered if there was a hidden reason for the change. Was it actually an attempt to go underground - to make the project more secretive? Was it an effort to cover up the fact that UFO's were proven to be interplanetary and that this should be withheld from the public at all cost to prevent a mass panic? The UFO files are full of references to the near mass panic of October 30, 1938, when Orson Welles presented his now famous "The War of the Worlds" broadcast.

This period of "mind changing" bothered me. Here were people deciding that there was nothing to this UFO business right at a time when the reports seemed to be getting better. From what I could see, if there was any mind changing to be done it should have been the other way, skeptics should have been changing to believers.

Maybe I was just playing the front man to a big cover-up. I didn't like it because if somebody up above me knew that UFO's were really space craft, I could make a big fool out of myself if the truth came out. I checked into this thoroughly. I spent a lot of time talking to people who had worked on Project Grudge.

The Dark Ages.59

The anti saucer faction was born because of an old psychological trait, people don't like to be losers. To be a loser makes one feel inferior and incompetent. On September 23, 1947, when the chief of ATIC sent a letter to the Commanding General of the Army Air Forces stating that UFO's were real, intelligence committed themselves. They had to prove it. They tried for a year and a half with no success. Officers on top began to get anxious and the press began to get anxious. They wanted an answer. Intelligence had tried one answer, the then Top Secret Estimate of the Situation that "proved" that UFO's were real, but it was kicked back. The people on the UFO project began to think maybe the brass didn't consider them too sharp so they tried a new hypothesis: UFO's don't exist. In

no time they found that this was easier to prove and it got recognition. Before if an especially interesting UFO report came in and the Pentagon wanted an answer, all they'd get was an "It could be real but we can't prove it." Now such a request got a quick, snappy "It was a balloon," and feathers were stuck in caps from ATIC up to the Pentagon. Everybody felt fine.

In early 1949 the term "new look" was well known. The new look in women's fashions was the lower hemlines, in automobiles it was longer lines. In UFO circles the new look was cuss 'em.

The new look in UFO's was officially acknowledged on February 11, 1949, when an order was written that changed the name of the UFO project from Project Sign to Project Grudge. The order was supposedly written because the classified name, Project Sign, had been compromised. This was always my official answer to any questions about the name change. I'd go further and say that the names of the projects, first Sign, then Grudge, had no significance. This wasn't true, they did have significance, a lot of it.

Chapter 5: The Dark Ages, Page 59

NICAP Home Page

CHAPTER FIVE

The Dark Ages

The order of February 11, 1949, that changed the name of Project Sign to Project Grudge had not directed any change in the operating policy of the project. It had, in fact, pointed out that the project was to continue to investigate and evaluate reports of sightings of unidentified flying objects. In doing this, standard intelligence procedures would be used. This nor-

---

mally means the unbiased evaluation of intelligence data. But it doesn't take a great deal of study of the old UFO files to see that standard intelligence procedures were no longer being used by Project Grudge. Everything was being evaluated on the premise that UFO's couldn't exist. No matter what you see or hear, don't believe it.

New people took over Project Grudge. ATIC's top intelligence specialists who had been so eager to work on Project Sign were no longer working on Project Grudge. Some of them had drastically and hurriedly changed their minds about UFO's when they thought that the Pentagon was no longer sympathetic to the UFO cause. They were now directing their talents toward more socially acceptable projects. Other charter members of Project Sign had been "purged." These were the people who had refused to change their original opinions about UFO's.

With the new name and the new personnel came the new objective, get rid of the UFO's. It was never specified this way in writing but it didn't take much effort to see that this was the goal of Project Grudge. This unwritten objective was reflected in every memo, report, and directive.

To reach their objective Project Grudge launched into a campaign that opened a new age in the history of the UFO. If a comparative age in world history can be chosen, the Dark Ages would be most appropriate. Webster's Dictionary defines the Dark Ages as a period of "intellectual stagnation."

To one who is intimately familiar with UFO history it is clear that Project Grudge had a two phase program of UFO annihilation. The first phase consisted of explaining every UFO report. The second phase was to tell the public how the Air Force had solved all the sightings. This, Project Grudge reasoned, would put an end to UFO reports.

Phase one had been started by the people of Project Sign. They realized that a great many reports were caused by people seeing balloons or such astronomical bodies as planets, meteors, or stars. They also realized that before they could get to the heart of the UFO problems they had to sift out this type of report. To do this they had called on outside help. Air Weather Service had been asked to screen the reports and check those that sounded like balloons against their records of balloon flights. Dr. J. Allen Hynek, distinguished astrophysicist and head of Ohio State University's Astronomy Department, had been given a contract to sort out those reports that could be blamed on stars, planets, meteors, etc. By early March the Air Weather Service and Dr. Hynek had some positive identifications. According to the old records, with these solutions and those that Sign and Grudge had already found, about 50 per cent of the reported UFO's could now be positively identified as hoaxes, balloons,

---

planets, sundogs, etc. It was now time to start phase two, the publicity campaign.

For many months reporters and writers had been trying to reach behind the security wall and get the

UFO story from the horse's mouth, but no luck. Some of them were still trying but they were having no success because they were making the mistake of letting it slip that they didn't believe that airline pilots, military pilots, scientists, and just all around solid citizens were having "hallucinations," perpetrating "hoaxes," or being deceived by the "misidentification of common objects." The people of Project Grudge weren't looking for this type of writer, they wanted a writer who would listen to them and write their story. As a public relations officer later told me, "We had a devil of a time. All of the writers who were after saucer stories had made their own investigations of sightings and we couldn't convince them they were wrong."

Before long, however, the right man came along. He was Sidney Shallet, a writer for The Saturday Evening Post. He seemed to have the prerequisites that were desired, so his visit to ATIC was cleared through the Pentagon. Harry Haberer, a crack Air Force public relations man, was assigned the job of seeing that Shallet got his story. I have heard many times, from both military personnel and civilians, that the Air Force told Shallet exactly what to say in his article - play down the UFO's - don't write anything that even hints that there might be something foreign in our skies. I don't believe that this is the case. I think that he just wrote the UFO story as it was told to him, told to him by Project Grudge.

Shallet's article, which appeared in two parts in the April 30 and May 7, 1949, issues of The Saturday Evening Post, is important in the history of the UFO and in understanding the UFO problem because it had considerable effect on public opinion. Many people had, with varying degrees of interest, been wondering about the UFO's for over a year and a half. Very few had any definite opinions one way or the other. The feeling seemed to be that the Air Force is working on the problem and when they get the answer we'll know. There had been a few brief, ambiguous press releases from the Air Force but these meant nothing. Consequently when Shallet's article appeared in the Post it was widely read. It contained facts, and the facts had come from Air Force Intelligence. This was the Air Force officially reporting on UFO's for the first time.

The article was typical of the many flying saucer stories that were to follow in the later years of UFO history, all written from material obtained from the Air Force. Shallet's article casually admitted that a few UFO sightings couldn't be explained, but the reader didn't have much chance to think about this fact because 99 per cent of the story was devoted

---

to the anti saucer side of the problem. It was the typical negative approach. I know that the negative approach is typical of the way that material is handed out by the Air Force because I was continually being told to "tell them about the sighting reports we've solved - don't mention the unknowns." I was never ordered to tell this, but it was a strong suggestion and in the military when higher headquarters suggests, you do.

Shallet's article started out by psychologically conditioning the reader by using such phrases as "the great flying saucer scare," "rich, full blown screwiness," "fearsome freaks," and so forth. By the time the reader gets to the meat of the article he feels like a rich, full blown jerk for ever even thinking about UFO's.

He pointed out how the "furor" about UFO reports got so great that the Air Force was "forced" to investigate the reports reluctantly. He didn't mention that two months after the first UFO report ATIC had asked for Project Sign since they believed that UFO's did exist. Nor did it mention the once Top Secret Estimate of the Situation that also concluded that UFO's were real. In no way did the article reflect the excitement and anxiety of the age of Project Sign when secret conferences preceded and followed every trip to investigate a UFO report. This was the Air Force being "forced" into reluctantly investigating the UFO reports.

Laced through the story were the details of several UFO sightings; some new and some old, as far as the public was concerned. The original UFO report by Kenneth Arnold couldn't be explained. Arnold, however, had sold his story to Fate magazine and in the same issue of Fate were stories with such titles as "Behind the Etheric Veil" and "Invisible Beings Walk the Earth," suggesting that Arnold's story might fall into the same category. The sightings where the Air Force had the answer had detailed explanations. The ones that were unknowns were mentioned, but only in passing.

Many famous names were quoted. The late General Hoyt S. Vandenberg, then Chief of Staff of the Air Force, had seen a flying saucer but it was just a reflection on the windshield of his B-17. General Lauris Norstad's UFO was a reflection of a star on a cloud, and General Curtis E. Le May found out that one out of six UFO's was a balloon; Colonel McCoy, then chief of ATIC, had seen lots of UFO's. All were reflections from distant airplanes. In other words, nobody who is anybody in the Air Force believes in flying saucers.

Figures in the top echelons of the military had spoken.

A few hoaxes and crackpot reports rounded out Mr. Shallet's article.

The reaction to the article wasn't what the Air Force and ATIC expected. They had thought that the public would read the article and

---

toss it, and all thoughts of UFO's, into the trash can. But they didn't. Within a few days the frequency of UFO reports hit an all-time high. People, both military and civilian, evidently didn't much care what Generals Vandenberg, Norstad, Le May, or Colonel McCoy thought; they didn't believe what they were seeing were hallucinations, reflections, or balloons. What they were seeing were UFO's, whatever UFO's might be.

I heard many times from ex-Project Grudge people that Shallet had "crossed" them, he'd vaguely mentioned that there might be a case for the UFO. This made him pro saucer.

A few days after the last installment of the Post article the Air Force gave out a long and detailed press release completely debunking UFO's, but this had no effect. It only seemed to add to the confusion.

The one thing that Shallet's article accomplished was to plant a seed of doubt in many people's minds. Was the Air Force telling the truth about UFO's? The public and a large percentage of the military didn't know what was going on behind ATIC's barbed wire fence but they did know that a lot of reliable people had seen UFO's. Airline pilots are considered responsible people - airline pilots had seen UFO's. Experienced military pilots and ground officers are responsible people - they'd seen UFO's. Scientists, doctors, lawyers, merchants, and plain old Joe Doakes had seen UFO's, and their friends knew that they were responsible people. Somehow these facts and the tone of the Post article didn't quite jibe, and when things don't jibe, people get suspicious.

In those people who had a good idea of what was going on behind ATIC's barbed wire, the newspaper reporters and writers with the "usually reliable sources," the Post article planted a bigger seed of doubt. Why the sudden change in policy they wondered? If UFO's were so serious a few months ago, why the sudden debunking? Maybe Shallet's story was a put-up job for the Air Force. Maybe the security had been tightened. Their sources of information were reporting that many people in the military did not quite buy the Shallet article. The seed of doubt began to grow, and some of these writers began to start "independent investigations" to get the "true" story. Research takes time, so during the summer and fall of 1949 there wasn't much apparent UFO activity.

As the writers began to poke around for their own facts, Project Grudge lapsed more and more into a period of almost complete inactivity. Good UFO reports continued to come in at the rate of about ten per month but they weren't being verified or investigated. Most of them were being discarded. There are few, if any, UFO reports for the middle and latter part of 1949 in the ATIC files. Only the logbook, showing incoming reports, gives any idea of the activity of this period. The meager effort that was

---

being made was going into a report that evaluated old UFO reports, those received prior to the spring of 1949. Project Grudge thought that they were writing a final report on the UFO's.

From the small bits of correspondence and memos that were in the ATIC files, it was apparent that Project Grudge thought that the UFO was on its way out. Any writers inquiring about UFO activity were referred to the debunking press release given out just after the Post article had been published. There was no more to say. Project Grudge thought they were winning the UFO battle; the writers thought that they were covering up a terrific news story - the story that the Air Force knew what flying saucers were and weren't telling.

By late fall 1949 the material for several UFO stories had been collected by writers who had been traveling all over the United States talking to people who had seen UFO's. By early winter the material had been worked up into UFO stories. In December the presses began to roll. True magazine "scooped" the world with their story that UFO's were from outer space.

The True article, entitled, "The Flying Saucers Are Real," was written by Donald Keyhoe. The article opened with a hard punch. In the first paragraph Keyhoe concluded that after eight months of extensive research he had found evidence that the earth was being closely scrutinized by intelligent beings. Their vehicles were the so-called flying saucers. Then he proceeded to prove his point. His argument was built around the three classics: the Mantell, the Chiles-Whitted, and the Gorman incidents. He took each sighting, detailed the "facts," ripped the official Air Force conclusions to shreds, and presented his own analysis. He threw in a varied assortment of technical facts that gave the article a distinct, authoritative flavor. This, combined with the fact that True had the name for printing the truth, hit the reading public like an 8 inch howitzer. Hours after it appeared in subscribers' mailboxes and on the newsstands, radio and TV commentators and newspapers were giving it a big play. UFO's were back in business, to stay. True was in business too. It is rumored among magazine publishers that Don Keyhoe's article in True was one of the most widely read and widely discussed magazine articles in history.

The Air Force had inadvertently helped Keyhoe in fact, they made his story a success. He and several other writers had contacted the Air Force asking for information for their magazine articles. But, knowing that the articles were pro saucer, the writers were unceremoniously sloughed off. Keyhoe carried his fight right to the top, to General Sory Smith, Director of the Office of Public Information, but still no dice - the Air Force wasn't divulging any more than they had already told. Keyhoe

---

construed this to mean tight security, the tightest type of security. Keyhoe had one more approach, however. He was an ex-Annapolis graduate, and among his classmates were such people as Admiral Delmar Fahmey, then a top figure in the Navy guided missile program and Admiral Calvin Bolster, the Director of the Office of Naval Research. He went to see them but they couldn't help him. He knew that this meant the real UFO story was big and that it could be only one thing - interplanetary spaceships or earthly weapons - and his contacts denied they were earthly weapons. He played this security angle in his True article and in a later book, and it gave the story the needed punch.

But the Air Force wasn't trying to cover up. It was just that they didn't want Keyhoe or any other saucer fans in their hair. They couldn't be bothered. They didn't believe in flying saucers and couldn't feature anybody else believing. Believing, to the people in ATIC in 1949, meant even raising the possibility that there might be something to the reports.

The Air Force had a plan to counter the Keyhoe article, or any other story that might appear. The plan originated at ATIC. It called for a general officer to hold a short press conference, flash his stars, and speak the magic words "hoaxes, hallucinations, and the misidentification of known objects," True, Keyhoe and the rest would go broke trying to peddle their magazines. The True article did come out, the general spoke, the public laughed, and Keyhoe and True got rich. Only the other magazines that had planned to run UFO stories, and that were scooped by True, lost out. Their stories were killed they would have been an anti-climax to Keyhoe's potboiler.

The Air Force's short press conference was followed by a press release. On December 27, 1949, it was announced that Project Grudge had been closed out and the final report on UFO's would be released to the press in a few days. When it was released it caused widespread interest because, supposedly, this was all that the Air Force knew about UFO's. Once again, instead of throwing large amounts of cold water on the UFO's, it only caused more confusion.

The report was officially titled "Unidentified Flying Objects Project Grudge," Technical Report No. 102-AC-49/15-lOO. But it was widely referred to as the Grudge Report.

The Grudge Report was a typical military report. There was the body of the report, which contained the short discussion, conclusions, and recommendations. Then there were several appendixes that were supposed to substantiate the conclusions and recommendations made in the report.

One of the appendixes was the final report of Dr. J. Allen Hynek, Project Grudge's contract astronomer. Dr. Hynek and his staff had studied

---

237 of the best UFO reports. They had spent several months analyzing each report. By searching through astronomical journals and checking the location of various celestial bodies, they found that some UFO's could be explained. Of the 237 reports he and his staff examined, 32 per cent could be explained astronomically.

The Air Force Air Weather Service and the Air Force Cambridge Research Laboratory had sifted the reports for UFO's that might have been balloons. These two organizations had data on the flights of both the regular weather balloons and the huge, high flying skyhooks. They wrote off 12 per cent of the 237 UFO reports under study as balloons.

This left 56 per cent still unknown. By weeding out the hoaxes, the reports that were too nebulous to evaluate, and reports that could well be misidentified airplanes, Project Grudge disposed of another 33 per cent of the reports. This left 23 per cent that fell in the "unknown" category.

There were more appendixes. The Rand Corporation, one of the most unpublicized yet highly competent contractors to the Air Force, looked over the reports and made the statement, "We have found nothing which would seriously controvert simple rational explanations of the various phenomena in terms of balloons, conventional aircraft, planets, meteors, bits of paper, optical illusions, practical jokers, psycho pathological reporters, and the like." But Rand's comment didn't help a great deal because they didn't come up with any solutions to any of the 23 per cent unknown.

The Psychology Branch of the Air Force's Aeromedical Laboratory took a pass at the psychological

angles. They said, "there are sufficient psychological explanations for the reports of unidentified objects to provide plausible explanations for reports not otherwise explainable." They pointed out that some people have "spots in front of their eyes" due to minute solid particles that float about in the fluids of the eye and cast shadows on the retina. Then they pointed out that some people are just plain nuts. Many people who read the Grudge Report took these two points to mean that all UFO observers either had spots in front of their eyes or were nuts. They broke the reports down statistically. The people who wrote the report found that over 70 per cent of the people making sightings reported a light colored object. (This I doubt, but that's what the report said.) They said a big point of these reports of light colored objects was that any high flying object will appear to be dark against the sky. For this reason the UFO's couldn't be real.

I suggest that the next time you are outdoors and see a bomber go over at high altitude you look at it closely. Unless it's painted a dark color it won't look dark.

The Dark Ages.67

The U.S. Weather Bureau wrote an extremely comprehensive and interesting report on all types of lightning. It was included in the Grudge Report but contained a note: "None of the recorded incidents appear to have been lightning."

There was one last appendix. It was entitled, "Summary of the Evaluation of Remaining Reports." What the title meant was, We have 23 per cent of the reports that we can't explain but we have to explain them because we don't believe in flying saucers. This appendix contributed greatly to the usage of the analogy to the Dark Ages, the age of "intellectual stagnation."

This appendix was important - it was the meat of the whole report. Every UFO sighting had been carefully checked, and those with answers had been sifted out. Then the ones listed in "Summary of the Evaluation of Remaining Reports" should be the best UFO reports - the ones with no answers.

This was the appendix that the newsmen grabbed at when the Grudge Report was released. It contained the big story. But if you'll check back through old newspaper files you will hardly find a mention of the Grudge Report.

I was told that reporters just didn't believe it when I tried to find out why the Grudge Report hadn't been mentioned in the newspapers. I got the story from a newspaper correspondent in Washington whom I came to know pretty well and who kept me filled in on the latest UFO scuttlebutt being passed around the Washington press circles. He was one of those humans who had a brain like a filing cabinet; he could remember everything about everything. UFO's were a hobby of his. He remembered when the Grudge Report came out; in fact, he'd managed to get a copy of his own. He said the report had been quite impressive, but only in its ambiguousness, illogical reasoning, and very apparent effort to write off all UFO reports at any cost. He, personally, thought that it was a poor attempt to put out a "fake" report, full of misleading information, to cover up the real story. Others, he told me, just plainly and simply didn't know what to think - they were confused.

And they had every right to be confused.

As an example of the way that many of the better reports of the 1947-49 period were "evaluated" let's take the report of a pilot who tangled with a UFO near Washington, D.C., on the night of November 18, 1948.

At about 9:45 EST I noticed a light moving generally north to south over Andrews AFB. It appeared to be one continuous, glowing white light. I thought it was an aircraft with only one landing light so I moved

---

68.The Report on Unidentified Flying Objects

in closer to check, as I wanted to get into the landing pattern. I was well above landing traffic altitude at this time. As I neared the light I noticed that it was not another airplane. Just then it began to take violent evasive action so I tried to close on it. I made first contact at 2,700 feet over the field. I switched my navigation lights on and off but got no answer so I went in closer - but the light quickly flew up and over my airplane. I then tried to close again but the light turned. I tried to turn inside of its turn and, at the same time, get the light between the moon and me, but even with my flaps lowered I couldn't turn inside the light. I never did manage to get into a position where the light was silhouetted against the moon.

I chased the light up and down and around for about 10 minutes, then as a last resort I made a pass and turned on my landing lights. Just before the object made a final tight turn and headed for the coast I saw that it was a dark gray oval-shaped object, smaller than my T-6. I couldn't tell if the light was on the object or if the whole object had been glowing.

Two officers and a crew chief, a master sergeant, completely corroborated the pilot's report. They had been standing on the flight line and had witnessed the entire incident.

The Air Weather Service, who had been called in as experts on weather balloons, read this report. They said, "Definitely not a balloon." Dr. Hynek said, "No astronomical explanation." It wasn't another airplane and it wasn't a hallucination.

But Project Grudge had an answer, it was a weather balloon. There was no explanation as to why they had so glibly reversed the decision of the Air Weather Service.

There was an answer for every report.

From the 600 pages of appendixes, discussions of the appendixes, and careful studies of UFO reports, it was concluded that:

1. Evaluation of reports of unidentified flying objects constitute no direct threat to the national security of the United States.

2. Reports of unidentified flying objects are the result of:

a. A mild form of mass hysteria or "war nerves."

b. Individuals who fabricate such reports to perpetrate a hoax or seek publicity.

c. Psycho pathological persons.

d. Misidentification of various conventional objects.

It was recommended that Project Grudge be "reduced in scope" and that only "those reports clearly indicating realistic technical applications" be sent to Grudge. There was a note below these recommendations. It said, "It is readily apparent that further study along present lines would only confirm the findings presented herein."

Somebody read the note and concurred because with the completion and approval of the Grudge Report, Project Grudge folded. People could

---

The Presses Roll-The Air Force Shrugs.69

rant and rave, see flying saucers, pink elephants, sea serpents, or Harvey, but it was no concern of ATIC's.

Chapter 6: The Presses Roll-The Air Force Shrugs, Page 69

NICAP Home Page

CHAPTER SIX

The Presses Roll -The Air Force Shrugs

The Grudge Report was supposedly not for general distribution. A few copies were sent to the Air Force Press Desk in the Pentagon and reporters and writers could come in and read it. But a good many copies did get into circulation. The Air Force Press Room wasn't the best place to sit and study a 600 page report, and a quick glance at the report showed that it required some study - if no more than to find out what the authors were trying to prove - so several dozen copies got into circulation. I know that these "liberated" copies of the Grudge Report had been thoroughly studied because nearly every writer who came to ATIC during the time that I was in charge of Project Blue Book carried a copy.

Since the press had some questions about the motives behind releasing the Grudge Report, it received very little publicity while the writers put out feelers. Consequently in early 1950 you didn't read much about flying saucers.

Evidently certain people in the Air Force thought this lull in publicity meant that the UFO's had finally died because Project Grudge was junked. All the project files, hundreds of pounds of reports, memos, photos, sketches, and other assorted bits of paper were unceremoniously yanked out of their filing cabinets, tied up with string, and chucked into an old storage case. I would guess that many reports ended up as "souvenirs" because a year later, when I exhumed these files, there were a lot of reports missing.

About this time the official Air Force UFO project had one last post death muscular spasm. The last bundle of reports had just landed on top of the pile in the storage case when ATIC received a letter from the Director of Intelligence of the Air Force. In official language it said, "What gives?" There had been no order to end Project Grudge. The answer went back that Project Grudge had not been disbanded; the project functions had been transferred and it was no longer a "special"

---

project. From now on UFO reports would be processed through normal intelligence channels along with other intelligence reports.

To show good faith ATIC requested permission to issue a new Air Force wide bulletin which was duly mimeographed and disseminated. In essence it said that Air Force Headquarters had directed ATIC to continue to collect and evaluate reports of unidentified flying objects. It went on to explain that most UFO reports were trash. It pointed out the findings of the Grudge Report in such strong language that by the time the recipient of the bulletin had finished reading it, he would be ashamed to send in a report. To cinch the deal the bulletins must have been disseminated only to troops in Outer Mongolia because I never found anyone in the field who had ever received a copy.

As the Air Force UFO investigating activity dropped to nil, the press activity skyrocketed to a new peak. A dozen people took off to dig up their own UFO stories and to draw their own conclusions.

After a quiet January, True again clobbered the reading public. This time it was a story in the March 1950 issue and it was entitled, "How Scientists Tracked Flying Saucers." It was written by none other than the man who was at that time in charge of a team of Navy scientists at the super hush-hush guided missile test and development area, White Sands Proving Ground, New Mexico. He was Commander R. B. McLaughlin, an Annapolis graduate and a Regular Navy officer. His story had been cleared by the military and was in absolute, 180 degree, direct contradiction to every press release that had been made by the military in the past two years. Not only did the commander believe

that he had proved that UFO's were real but that he knew what they were. "I am convinced," he wrote in the True article, "that it," referring to a UFO he had seen at White Sands, "was a flying saucer, and further, that these disks are spaceships from another planet, operated by animate, intelligent beings."

On several occasions during 1948 and 1949, McLaughlin or his crew at the White Sands Proving Ground had made good UFO sightings. The best one was made on April 24, 1949, when the commander's crew of engineers, scientists, and technicians were getting ready to launch one of the huge 100-foot-diameter skyhook balloons. It was 10:30 AM. on an absolutely clear Sunday morning. Prior to the launching, the crew had sent up a small weather balloon to check the winds at lower levels. One man was watching the balloon through a theodolite, an instrument similar to a surveyor's transit built around a 25 power telescope, one man was holding a stop watch, and a third had a clipboard to record the measured data. The crew had tracked the balloon to about 10,000 feet when one of them suddenly shouted and pointed off to the left. The whole crew

---

looked at the part of the sky where the man was excitedly pointing, and there was a UFO. "It didn't appear to be large," one of the scientists later said, "but it was plainly visible. It was easy to see that it was elliptical in shape and had a 'whitish silver color.'" After taking a split second to realize what they were looking at, one of the men swung the theodolite around to pick up the object, and the timer reset his stop watch. For sixty seconds they tracked the UFO as it moved toward the east. In about fifty-five seconds it had dropped from an angle of elevation of 45 degrees to 25 degrees, then it zoomed upward and in a few seconds it was out of sight. The crew heard no sound and the New Mexico desert was so calm that day that they could have heard "a whisper a mile away."

When they reduced the data they had collected, McLaughlin and crew found out that the UFO had been traveling 4 degrees per second. At one time during the observed portion of its flight, the UFO had passed in front of a range of mountains that were visible to the observers. Using this as a check point, they estimated the size of the UFO to be 40 feet wide and 100 feet long, and they computed that the UFO had been at an altitude of 296,000 feet, or 56 miles, when they had first seen it, and that it was traveling 7 miles per second.

This wasn't the only UFO sighting made by White Sands scientists. On April 5, 1948, another team watched a UFO for several minutes as it streaked across the afternoon sky in a series of violent maneuvers. The disk shaped object was about a fifth the size of a full moon.

On another occasion the crew of a C-47 that was tracking a skyhook balloon saw two similar UFO's come loping in from just above the horizon, circle the balloon, which was flying at just under 90,000 feet, and rapidly leave. When the balloon was recovered it was ripped.

I knew the two pilots of the C-47; both of them now believe in flying saucers. And they aren't alone; so do the people of the Aeronautical Division of General Mills who launch and track the big skyhook balloons. These scientists and engineers all have seen UFO's and they aren't their own balloons. I was almost tossed out of the General Mills offices into a cold January Minneapolis snowstorm for suggesting such a thing but that comes later in our history of the UFO.

I don't know what these people saw. There has been a lot of interest generated by these sightings because of the extremely high qualifications and caliber of the observers. There is some legitimate doubt as to the accuracy of the speed and altitude figures that McLaughlin's crew arrived at from the data they measured with their theodolite. This doesn't mean much, however. Even if they were off by a factor of 100 per cent, the speeds and altitudes would be fantastic, and besides they looked at

---

the UFO through a 25 power telescope and swore that it was a flat, oval- shaped object. Balloons, birds, and airplanes aren't flat and oval shaped.

Astrophysicist Dr. Donald Menzel, in a book entitled Flying Saucers, says they saw a refracted image of their own balloon caused by an atmospheric phenomenon. Maybe he is right, but the General Mills people don't believe it. And their disagreement is backed up by years of practical experience with the atmosphere, its tricks and its illusions.

When the March issue of True magazine carrying Commander McLaughlin's story about how the White Sands Scientists had tracked UFO's reached the public, it stirred up a hornets' nest. Donald Keyhoe's article in the January True had converted many people but there were still a few heathens. The fact that government scientists had seen UFO's, and were admitting it, took care of a large percentage of these heathens. More and more people were believing in flying saucers.

The Navy had no comment to make about the sightings, but they did comment on McLaughlin. It seems that several months before, at the suggestion of a group of scientists at White Sands, McLaughlin had carefully written up the details of the sightings and forwarded them to Washington. The report contained no personal opinions, just facts. The comments on McLaughlin's report had been wired back to White Sands from Washington and they were, "What are you drinking out there?" A very intelligent answer- and it came from an admiral in the Navy's guided missile program.

By the time his story was published, McLaughlin was no longer at White Sands; he was at sea on the destroyer Bristol. Maybe he answered the admiral's wire.

The Air Force had no comment to make on McLaughlin's story. People at ATIC just shrugged and smiled as they walked by the remains of Project Grudge, and continued to "process UFO reports through regular intelligence channels."

In early 1950 the UFO's moved down to Mexico. The newspapers were full of reports. Tourists were bringing back more saucer stories than hand tooled, genuine leather purses. Time reported that pickpockets were doing a fabulous business working the sky gazing crowds that gathered when a plativolo was seen. Mexico's Department of National Defense reported that there had been some good reports but that the stories of finding crashed saucers weren't true.

On March 8 one of the best UFO sightings of 1950 took place right over ATIC.

About midmorning on this date a TWA airliner was coming in to land at the Dayton Municipal Airport. As the pilot circled to get into the

---

traffic pattern, he and his copilot saw a bright light hovering off to the southeast. The pilot called the tower operators at the airport to tell them about the light, but before he could say anything, the tower operators told him they were looking at it too. They had called the operations office of the Ohio Air National Guard, which was located at the airport, and while the tower operators were talking, an Air Guard pilot was running toward an F-51, dragging his parachute, helmet, and oxygen mask.

I knew the pilot, and he later told me, "I wanted to find out once and for all what these screwy flying saucer reports were all about."

While the F-51 was warming up, the tower operators called ATIC and told them about the UFO and where to look to see it. The people at ATIC rushed out and there it was - an extremely bright light, much brighter and larger than a star. Whatever it was, it was high because every once in a while it

would be blanked out by the thick, high, scattered clouds that were in the area. While the group of people were standing in front of ATIC watching the light, somebody ran in and called the radar lab at Wright Field to see if they had any radar "on the air." The people in the lab said that they didn't have, but they could get operational in a hurry. They said they would search southeast of the field with their radar and suggested that ATIC send some people over. By the time the ATIC people arrived at the radar lab the radar was on the air and had a target in the same position as the light that everyone was looking at. The radar was also picking up the Air Guard F-51 and an F-51 that had been scrambled from Wright-Patterson. The pilots of the Air Guard '51 and the Wright-Patterson '51 could both see the UFO, and they were going after it. The master sergeant who was operating the radar called the F-51's on the radio, got them together and started to vector them toward the target. As the two airplanes climbed they kept up a continual conversation with the radar operator to make sure they were all after the same thing. For several minutes they could clearly see the UFO, but when they reached about 15,000 feet, the clouds moved in and they lost it. The pilots made a quick decision; since radar showed that they were getting closer to the target, they decided to spread out to keep from colliding with one another and to go up through the clouds. They went on instruments and in a few seconds they were in the cloud. It was much worse than they'd expected; the cloud was thick, and the airplanes were icing up fast. An F-51 is far from being a good instrument ship, but they stayed in their climb until radar called and said that they were close to the target; in fact, almost on it. The pilots had another hurried radio conference and decided that since the weather was so bad they'd better come down. If a UFO, or something, was in the clouds, they'd hit it before they could see it. So

---

they made a wise decision; they dropped the noses of their airplanes and ck down into the clear. They circled awhile but the clouds didn't break. In a few minutes the master sergeant on the radar reported that the target was fading fast. The F-51's went in and landed.

When the target faded on the radar, some of the people went outside to visually look for the UFO, but it was obscured by clouds, and the clouds stayed for an hour. When it finally did clear for a few minutes, the UFO was gone.

A conference was held at ATIC that afternoon. It included Roy James, ATIC's electronics specialist and expert on radar UFO's. Roy had been over at the radar lab and had seen the UFO on the scope but neither the F-51 pilots nor the master sergeant who operated the radar were at the conference. The records show that at this meeting a unanimous decision was reached as to the identity of the UFO's. The bright light was Venus since Venus was in the southeast during midmorning on March 8, 1950, and the radar return was caused by the ice laden cloud that the F-51 pilots had encountered. Ice laden clouds can cause a radar return. The group of intelligence specialists at the meeting decided that this was further proved by the fact that as the F-51's approached the center of the cloud their radar return appeared to approach the UFO target on the radarscope. They were near the UFO and near ice, so the UFO must have been ice.

The case was closed.

I had read the report of this sighting but I hadn't paid too much attention to it because it had been "solved." But one day almost two years later I got a telephone call at my office at Project Blue Book. It was a master sergeant, the master sergeant who had been operating the radar at the lab. He'd just heard that the Air Force was again seriously investigating UFO's and he wanted to see what had been said about the Dayton Incident. He came over, read the report, and violently disagreed with what had been decided upon as the answer. He said that he'd been working with radar before World War II; he'd helped with the operational tests on the first microwave warning radars developed early in the war by a group headed by Dr. Luis Alvarez. He said that what he saw on that radarscope was no ice

cloud; it was some type of aircraft. He'd seen every conceivable type of weather target on radar, he told me; thunderstorms, ice laden clouds, targets caused by temperature inversions, and the works. They all had similar characteristics - the target was "fuzzy" and varied in intensity. But in this case the target was a good, solid return and he was convinced that it was caused by a good, solid object.

And besides, he said, when the target began to fade on his scope he had raised the tilt of the antenna and the target came back, indicating that whatever it was, it was climbing. Ice laden clouds don't climb, he commented rather bitterly.

Nor did the pilot of one of the F-51's agree with the ATIC analysis. The pilot who had been leading the two ship flight of F-51's on that day told me that what he saw was no planet. While he and his wing man were climbing, and before the clouds obscured it, they both got a good look at the UFO, and it was getting bigger and more distinct all the time. As they climbed, the light began to take on a shape; it was definitely round. And if it had been Venus it should have been in the same part of the sky the next day, but the pilot said that he'd looked and it wasn't there. The ATIC report doesn't mention this point.

I remember asking him a second time what the UFO looked like; he said, "huge and metallic" - shades of the Mantell Incident.

The Dayton Incident didn't get much of a play from the press because officially it wasn't an unknown and there's nothing intriguing about an ice cloud and Venus. There were UFO reports in the newspapers, however.

One story that was widely printed was about a sighting at the naval air station at Dallas, Texas. Just before noon on March 16, Chief Petty Officer Charles Lewis saw a disk shaped UFO come streaking across the sky and buzz a high flying B-36. Lewis first saw the UFO coming in from the north, lower than the B-36; then he saw it pull up to the big bomber as it got closer. It hovered under the B-36 for an instant, then it went speeding off and disappeared. When the press inquired about the incident, Captain M. A. Nation, commander of the air station, vouched for his chief and added that the base tower operators had seen and reported a UFO to him about ten days before.

This story didn't run long because the next day a bigger one broke when the sky over the little town of Farmington, New Mexico, about 170 miles northwest of Albuquerque, was literally invaded by UFO's. Every major newspaper carried the story. The UFO's had apparently been congregating over the four comers area for two days because several people had reported seeing UFO's on March 15 and 16. But the seventeenth was the big day, every saucer this side of Polaris must have made a successful rendezvous over Farmington, because on that day most of the town's 3,600 citizens saw the mass fly-by. The first reports were made at 10:15 A.M.; then for an hour the air was full of flying saucers. Estimates of the number varied from a conservative 500 to "thousands." Most all the observers said the UFO's were saucer shaped, traveled at almost unbelievable speeds, and didn't seem to have any set

---

flight path. They would dart in and out and seemed to avoid collisions only by inches. There was no doubt that they weren't hallucinations because the mayor, the local newspaper staff, ex-pilots, the highway patrol, and every type of person who makes up a community of 3,600 saw them.

I've talked to several people who were in Farmington and saw this now famous UFO display of St. Patrick's Day, 1950. I've heard dozens of explanations - cotton blowing in the wind, bugs' wings

reflecting sunlight, a hoax to put Farmington on the map, and real honest-to-goodness flying saucers. One explanation was never publicized, however, and if there is an explanation, it is the best. Under certain conditions of extreme cold, probably 50 to 60 degrees below zero, the plastic bag of a skyhook balloon will get very brittle, and will take on the characteristics of a huge light bulb. If a sudden gust of wind or some other disturbance hits the balloon, it will shatter into a thousand pieces. As these pieces of plastic float down and are carried along by the wind, they could look like thousands of flying saucers.

On St. Patrick's Day a skyhook balloon launched from Holloman AFB, adjacent to the White Sands Proving Ground, did burst near Farmington, and it was cold enough at 60,000 feet to make the balloon brittle. True, the people at Farmington never found any piece of plastic, but the small pieces of plastic are literally as light as feathers and could have floated far beyond the city.

The next day, on March 18, the Air Force, prodded by the press, shrugged and said, "There's nothing to it," but they had no explanation.

True magazine came through for a third time when their April issue, which was published during the latter part of March 1950, carried a roundup of UFO photos. They offered seven photos as proof that UFO's existed. It didn't take a photo interpretation expert to tell that all seven could well be of doubtful lineage, nevertheless the collection of photos added fuel to the already smoldering fire. The U.S. public was hearing a lot about flying saucers and all of it was on the pro side. For somebody who didn't believe in the things, the public thought that the Air Force was being mighty quiet.

The subject took on added interest on the night of March 26, when a famous news commentator said the UFO's were from Russia.

The next night Henry J. Taylor, in a broadcast from Dallas, Texas, said that the UFO's were Uncle Sam's own. He couldn't tell all he knew, but a flying saucer had been found on the beach near Galveston, Texas. It had USAF markings.

Two nights later a Los Angeles television station cut into a regular program with a special news flash; later in the evening the announcer

---

said they would show the first photos of the real thing, our military's flying saucer. The photos turned out to be of the Navy XF-5-U, a World War II experimental aircraft that never flew.

The public was now thoroughly confused.

By now the words "flying saucer" were being batted around by every newspaper reporter, radio and TV newscaster, comedian, and man on the street. Some of the comments weren't complimentary, but as Theorem I of the publicity racket goes, "It doesn't make any difference what's said as long as the name's spelled right."

Early in April the publication that is highly revered by so many, U.S. News and World Report, threw in their lot. The UFO's belonged to the Navy. Up popped the old non flying XF-5-U again.

Events drifted back to normal when Edward R. Murrow made UFO's the subject of one of his TV documentaries. He took his viewers around the U.S., talked to Kenneth Arnold, of original UFO fame, by phone and got the story of Captain Mantell's death from a reporter "who was there." Sandwiched in between accounts of actual UFO sightings were the pro and con opinions of top Washington brass, scientists, and the man on the street.

Even the staid New York Times, which had until now stayed out of UFO controversy, broke down and ran an editorial entitled, "Those Flying Saucers - Are They or Aren't They?"

All of this activity did little to shock the military out of their dogma. They admitted that the UFO investigation really hadn't been discontinued. "Any substantial reports of any unusual aerial phenomena would be processed through normal intelligence channels," they told the press.

Ever since July 4, 1947, ten days after the first flying saucer report, airline pilots had been reporting that they had seen UFO's. But the reports weren't frequent - maybe one every few months. In the spring of 1950 this changed, however, and the airline pilots began to make more and more reports - good reports. The reports went to ATIC but they didn't receive much attention. In a few instances there was a semblance of an investigation but it was halfhearted. The reports reached the newspapers too, and here they received a great deal more attention. The reports were investigated, and the stories checked and rechecked. When airline crews began to turn in one UFO report after another, it was difficult to believe the old "hoax, hallucination, and misidentification of known objects" routine. In April, May, and June of 1950 there were over thirty five good reports from airline crews.

One of these was a report from a Chicago and Southern crew who

---

were flying a DC-3 from Memphis to Little Rock, Arkansas, on the night of March 31. It was an exceptionally clear night, no clouds or haze, a wonderful night to fly. At exactly nine twenty-nine by the cockpit clock the pilot, a Jack Adams, noticed a white light off to his left. The copilot, G. W. Anderson, was looking at the chart but out of the corner of his eye he saw the pilot lean forward and look out the window, so he looked out too. He saw the light just as the pilot said, "What's that?"

The copilot's answer was classic: "No, not one of those things."

Both pilots had only recently voiced their opinions regarding the flying saucers and they weren't complimentary.

As they watched the UFO, it passed across the nose of their DC-3 and they got a fairly good look at it. Neither the pilot nor the copilot was positive of the object's shape because it was "shadowy" but they assumed it was disk shaped because of the circular arrangement of eight or ten "portholes," each one glowing from a strong bluish white light that seemed to come from the inside of whatever it was that they saw. The UFO also had a blinking white light on top, a fact that led many people to speculate that this UFO was another airliner. But this idea was quashed when it was announced that there were no other airliners in the area. The crew of the DC-3, when questioned on this possibility, were definite in their answers. If it had been another airplane, they could have read the number, seen the passengers, and darn near reached out and slugged the pilot for getting so close to them.

About a month later, over northern Indiana, TWA treated all the passengers of one of their DC-3 flights to a view of a UFO that looked like a "big glob of molten metal."

The official answer for this incident is that the huge orange red UFO was nothing more than the light from the many northern Indiana blast furnaces reflecting a haze layer. Could be, but the pilots say no.

There were similar sightings in North Korea two years later - and FEAF Bomber Command had caused a shortage of blast furnaces in North Korea.

UFO sightings by airline pilots always interested me as much as any type of sighting. Pilots in general should be competent observers simply because they spend a large part of their lives looking around the sky. And pilots do look; one of the first things an aviation cadet is taught is to "Keep your

head on a swivel"; in other words, keep looking around the sky. Of all the pilots, the airline pilots are the cream of this group of good observers. Possibly some second lieutenant just out of flying school could be confused by some unusual formation of ground lights, a meteor, or a star, but airline pilots have flown thousands of hours or they

---

wouldn't be sitting in the left seat of an airliner, and they should be familiar with a host of unusual sights.

One afternoon in February 1953 I had an opportunity to further my study sightings by airline pilots I had been out at Air Defense Command Headqua Colorado Springs and was flying back East on United Airlines DC-6. There wa my passengers on the airplane that afternoon but, as usual, the c aptain came strolling back through the cabin to chat. When he got to me he sat down in the next seat. We talked a few minutes; then I asked him what he knew about flying saucers. He sort of laughed and said that a dozen people a week asked that question, but when I told him who I was and why I was interested, his attitude changed. He said that he'd never seen a UFO but he knew a lot of pilots on United who had. One man, he told me, had seen one several years ago. He'd reported it but he had been sloughed off like the rest. But he was so convinced that he'd seen something unusual that he'd gone out and bought a Leica camera with a 105 mm. telephoto lens, learned how to use it, and now he carried it religiously during his flights.

There was a lull in the conversation, then the captain said, "Do you really want to get an opinion about flying saucers?"

I said I did.

"O.K.," I remember his saying, "how much of a layover do you have in Chicago?"

I had about two hours.

"All right, as soon as we get to Chicago I'll meet you at Caffarello's, across the street from the terminal building. I'll see who else is in and I'll bring them along."

I thanked him and he went back up front.

I waited around the bar at Caffarello's for an hour. I'd just about decided that he wasn't going to make it and that I'd better get back to catch my flight to Dayton when he and three other pilots came in. We got a big booth in the coffee shop because he'd called three more off duty pilots who lived in Chicago and they were coming over too. I don't remember any of the men's names because I didn't make any attempt to. This was just an informal bull session and not an official interrogation, but I really got the scoop on what airline pilots think about UFO's.

First of all they didn't pull any punches about what they thought about the Air Force and its investigation of UFO reports. One of the men got right down to the point: "If I saw a flying saucer flying wing tip formation with me and could see little men waving - even if my

---

whole load of passengers saw it - I wouldn't report it to the Air Force." Another man cut in, "Remember the thing Jack Adams said he saw down by Memphis?" I said I did.

"He reported that to the Air Force and some red-hot character met him in Memphis on his next trip.

He talked to Adams a few minutes and then told him that he'd seen a meteor. Adams felt like a fool. Hell, I know Jack Adams well and he's the most conservative guy I know. If he said he saw something with glowing portholes, he saw something with glowing portholes - and it wasn't a meteor."

Even though I didn't remember the pilots' names I'll never forget their comments. They didn't like the way the Air Force had handled UFO reports and I was the Air Force's "Mr. Flying Saucer." As quickly as one of the pilots would set me up and bat me down, the next one grabbed me off the floor and took his turn. But I couldn't complain too much; I'd asked for it. I think that this group of seven pilots pretty much represented the feelings of a lot of the airline pilots. They weren't wide-eyed space fans, but they and their fellow pilots had seen something and whatever they'd seen weren't hallucinations, mass hysteria, balloons, or meteors.

Three of the men at the Caffarello conference had seen UFO's or, to use their terminology, they had seen something they couldn't identify as a known object. Two of these men had seen odd lights closely following their airplanes at night. Both had checked and double-checked with CAA, but no other aircraft was in the area. Both admitted, however, that they hadn't seen enough to class what they'd seen as good UFO sighting. But the third man had a lulu.

If I recall correctly, this pilot was flying for TWA. One day in March 1952 he, his copilot, and a third person who was either a pilot dead-heading home or another crew member, I don't recall which, were flying a C-54 cargo airplane from Chicago to Kansas City. At about 2:30 P.M. the pilot was checking in with the CAA radio at Kirksville, Missouri, flying 500 feet on top of a solid overcast. While he was talking he glanced out at his No.2 engine, which had been losing oil. Directly in line with it, and a few degrees above, he saw a silvery, disk shaped object. It was too far out to get a really good look at it, yet it was close enough to be able definitely to make out the shape.

The UFO held its relative position with the C-54 for five or six minutes; then the pilot decided to do a little on-the-spot investigating himself. He started a gradual turn toward the UFO and for about thirty seconds he was getting closer, but then the UFO began to make a left turn. It had apparently slowed down because they were still closing on it.

About this time the copilot decided that the UFO was a balloon; it just looked as if the UFO was turning. The pilot agreed halfway - and since the company wasn't paying them to intercept balloons, they got back on their course to Kansas City. They flew on for a few more minutes with "the darn thing" still off to their left. If it was a balloon, they should be leaving it behind, the pilot recalled thinking to himself; if they made a 45 degree right turn, the "balloon" shouldn't stay off the left wing; it should drop way behind. So they made a 45 degree right turn, and although the "balloon" dropped back a little bit, it didn't drop back far enough to be a balloon. It seemed to put on speed to try to make a turn outside of the C-54's turn. The pilot continued on around until he'd made a tight 360 degree turn, and the UFO had followed, staying outside. They could not judge its speed, not knowing how far away it was, but to follow even a C-54 around in a 360 degree turn and to stay outside all of the time takes a mighty speedy object.

This shot the balloon theory right in the head. After the 360 degree turn the UFO seemed to be gradually losing altitude because it was getting below the level of the wings. The pilot decided to get a better look. He asked for full power on all four engines, climbed several thousand feet, and again turned into the UFO. He put the C-54 in a long glide, headed directly toward it. As they closed in, the UFO seemed to lose altitude a little faster and "sank" into the top of the overcast. Just as the C-54 flashed across the spot where the UFO had disappeared, the crew saw it rise up out of the overcast off their right wing and begin to climb so fast that in several seconds it was out of sight.

Both the pilot and copilot wanted to stay around and look for it but No.2 engine had started to act up soon after they had put on full power for the climb, and they decided that they'd better get into Kansas City.

I missed my Dayton flight but I heard a good UFO story.

What had the two pilots and their passenger seen? We kicked it around plenty that afternoon. It was no balloon. It wasn't another airplane because when the pilot called Kirksville Radio he'd asked if there were any airplanes in the area. It might possibly have been a reflection of some kind except that when it "sank" into the overcast the pilot said it looked like something sinking into an overcast - it just didn't disappear as a reflection would. Then there was the sudden reappearance off the right wing. These are the types of things you just can't explain.

What did the pilots think it was? Three were sold that the UFO's were interplanetary spacecraft, one man was convinced that they were some U.S. "secret weapon," and three of the men just shook their heads. So did I. We all agreed on one thing - this pilot had seen something and it was something highly unusual.

82.The Report on Unidentified Flying Objects

The meeting broke up about 9:00 P.M. I'd gotten the personal and very candid opinion of seven airline captains, and the opinions of half a hundred more airline pilots had been quoted. I'd learned that the UFO's are discussed often. I'd learned that many airline pilots take UFO sightings very seriously. I learned that some believe they are interplanetary, some think they're a U.S. weapon, and many just don't know. But very few are laughing off the good sightings.

By May 1950 the flying saucer business had hit a new all-time peak. The Air Force didn't take any side, they just shrugged. There was no attempt to investigate and explain the various sightings. Maybe this was because someone was afraid the answer would be "Unknown." Or maybe it was because a few key officers thought that the eagles or stars on their shoulders made them leaders of all men. If they didn't believe in flying saucers and said so, it would be like calming the stormy Sea of Galilee. "It's all a bunch of damned nonsense," an Air Force colonel who was controlling the UFO investigation said. "There's no such thing as a flying saucer." He went on to say that all people who saw flying saucers were jokers, crackpots, or publicity hounds. Then he gave the airline pilots who'd been reporting UFO's a reprieve. "They were just fatigued," he said. "What they thought were spaceships were windshield reflections."

This was the unbiased processing of UFO reports through normal intelligence channels.

But the U.S. public evidently had more faith in the "crackpot" scientists who were spending millions of the public's dollars at the White Sands Proving Grounds, in the "publicity mad" military pilots, and the "tired, old" airline pilots, because in a nationwide poll it was found that only 6 per cent of the country's 150,697,361 people agreed with the colonel and said, "There aren't such things."

Ninety-four per cent had different ideas.

CHAPTER SEVEN

The Pentagon Rumbles

On June 25, 1950, the North Korean armies swept down across the 38th parallel and the Korean War was on - the UFO was no longer a news item. But the lady, or gentleman, who first said, "Out of sight is out of mind," had never reckoned with the UFO.

On September 8, 1950, the UFO's were back in the news. On that day it was revealed, via a book entitled Behind the Flying Saucers, that government scientists had recovered and analyzed three different models of flying saucers. And they were fantastic - just like the book. They were made of an unknown super-duper metal and they were manned by little blue uniformed men who ate concentrated food and drank heavy water. The author of the book, Frank Scully, had gotten the story directly from a millionaire oilman, Silas Newton. Newton had in turn heard the story from an employee of his, a mysterious "Dr. Gee," one of the government scientists who had helped analyze the crashed saucers.

The story made news, Newton and "Dr. Gee" made fame, and Scully made money.

A little over two years later Newton and the man who was reportedly the mysterious "Dr. Gee" again made the news. The Denver district attorney's office had looked into the pair's oil business and found that the pockets they were trying to tap didn't contain oil. According to the December 6, 1952, issue of the Saturday Review, the D.A. had charged the two men with a $50,000 con game. One of their $800,000 electronic devices for their oil explorations turned out to be a $4.00 piece of war surplus junk.

Another book came out in the fall of 1950 when Donald Keyhoe expanded his original UFO story that had first appeared in the January 1950 issue of True magazine. Next to Scully's book Keyhoe's book was tame, but it convinced more people. Keyhoe had based his conjecture on fact, and his facts were correct, even if the conjecture wasn't.

Neither the seesaw advances and retreats of the United Nations troops in Korea nor the two flying saucer books seemed to have any effect on the number of UFO reports logged into ATIC, however. By official count, seventy-seven came in the first half of 1950 and seventy-five during the latter half. The actual count could have been more because in 1950, UFO reports were about as popular as sand in spinach, and I would guess that at least a few wound up in the "circular file."

In early January 1951 I was recalled to active duty and assigned to Air Technical Intelligence Center as an intelligence officer. I had been at ATIC only eight and a half hours when I first heard the words "flying saucer" officially used. I had never paid a great deal of attention to flying saucer reports but I had read a few, especially those that had been made by pilots. I'd managed to collect some 2,000 hours of flying time and had seen many odd things in the air, but I'd always been able to figure out what they were in a few seconds. I was convinced that if a pilot, or any crew member of an airplane, said that he'd seen some-

---

thing that he couldn't identify he meant it - it wasn't a hallucination. But I wasn't convinced that

flying saucers were spaceships.

My interest in UFO's picked up in a hurry when I learned that ATIC was the government agency that was responsible for the UFO project. And I was really impressed when I found out that the person who sat three desks down and one over from mine was in charge of the whole UFO show. So when I came to work on my second morning at ATIC and heard the words "flying saucer report" being talked about and saw a group of people standing around the chief of the UFO project's desk I about sprung an eardrum listening to what they had to say. It seemed to be a big deal, except that most of them were laughing. It must be a report of hoax or hallucination, I remember thinking to myself, but I listened as one of the group told the others about the report.

The night before a Mid Continent Airlines DC-3 was taxiing out to take off from the airport at Sioux City, Iowa, when the airport control tower operators noticed a bright bluish white light in the west. The tower operators, thinking that it was another airplane, called the pilot of the DC-3 and told him to be careful since there was another airplane approaching the field. As the DC-3 lined up to take off, both the pilots of the airliner and the tower operators saw the light moving in, but since it was still some distance away the DC-3 was given permission to take off. As it rolled down the runway getting up speed, both the pilot and the copilot were busy, so they didn't see the light approaching. But the tower operators did, and as soon as the DC-3 was airborne, they called and told the pilot to be careful. The copilot said that he saw the light and was watching it. Just then the tower got a call from another airplane that was requesting landing instructions and the operators looked away from the light.

In the DC-3 the pilot and copilot had also looked away from the light for a few seconds. When they looked back, the bluish white light had apparently closed in because it was much brighter and it was dead ahead. In a split second it closed in and flashed by their right wing, so close that both pilots thought that they would collide with it. When it passed the DC-3, the pilots saw more than a light - they saw a huge object that looked like the "fuselage of a B-29."

When the copilot had recovered he looked out his side window to see if he could see the UFO and there it was, flying formation with them. He yelled at the pilot, who leaned over and looked just in time to see the UFO disappear.

The second look confirmed the Mid Continent crew's first impression -

---

the object looked like a B-29 without wings. They saw nothing more, only a big "shadowy shape" and the bluish-white light - no windows, no exhaust.

The tower had missed the incident because they were landing the other airplane and the pilot and the copilot didn't have time to call them and tell them about what was going on. All the tower operators could say was that seconds after the UFO had disappeared the light that they had seen was gone.

When the airliner landed in Omaha, the crew filed a report that was forwarded to the Air Force. But this wasn't the only report that was filed; a full colonel from military intelligence had been a passenger on the DC-3. He'd seen the UFO too, and he was mighty impressed.

I thought that this was an interesting report and I wondered what the official reaction would be. The official reaction was a great big, deep belly laugh.

This puzzled me because I'd read that the Air Force was seriously investigating all UFO reports.

I continued to eavesdrop on the discussions about the report all day since the UFO expert was about

to "investigate" the incident. He sent out a wire to Flight Service and found that there was a B-36 somewhere in the area of Sioux City at the time of the sighting, and from what I could gather he was trying to blame the sighting on the B-36. When Washington called to get the results of the analysis of the sighting, they must have gotten the B-36 treatment because the case was closed.

I'd only been at ATIC two days and I certainly didn't class myself as an intelligence expert, but it didn't take an expert to see that a B-36, even one piloted by an experienced idiot, could not do what the UFO had done - buzz a DC-3 that was in an airport traffic pattern.

I didn't know it at the time but a similar event had occurred the year before. On the night of May 29, 1950, the crew of an American Airlines DC-6 had just taken off from Washington National Airport, and they were about seven miles west of Mount Vernon when the copilot suddenly looked out and yelled, "Watch it - watch it." The pilot and the engineer looked out to see a bluish white light closing in on them from dead ahead. The pilot racked the DC-6 up in a tight right turn while the UFO passed by on the left "from eleven to seven o'clock" and a little higher than the airliner. During this time the UFO passed between the full moon and DC-6 and the crew could see the dark silhouette of a "wingless B-29." Its length was about half the diameter of the full moon, and it had a blue flame shooting out the tail end.

Seconds after the UFO had passed by the DC-6, the copilot looked

---

out and there it was again, apparently flying formation off their right wing. Then in a flash of blue flame it was gone - streaking out ahead of the airliner and making a left turn toward the coast.

The pilot of the DC-6, who made the report, had better than 15,000 hours' flying time.

I didn't hear anything about UFO's, or flying saucers, as they were then known, for several weeks but I kept them in mind and one day I asked one of the old hands at ATIC about them - specifically I wanted to know about the Sioux City Incident. Why had it been sloughed off so lightly? His answer was typical of the official policy at that time. "One of these days all of these crazy pilots will kill themselves, the crazy people on the ground will be locked up, and there won't be any more flying saucer reports."

But after I knew the people at ATIC a little better, I found that being anti saucer wasn't a unanimous feeling. Some of the intelligence officers took the UFO reports seriously. One man, who had been on Project Sign since it was organized back in 1947, was convinced that the UFO's were interplanetary spaceships. He had questioned the people in the control tower at Godman AFB when Captain Mantell was killed chasing the UFO, and he had spent hours talking to the crew of the DC-3 that was buzzed near Montgomery, Alabama, by a "cigar shaped UFO that spouted blue flame." In essence, he knew UFO history from A to Z because he had "been there."

I think that it was this controversial thinking that first aroused my interest in the subject of UFO's and led me to try to sound out a few more people.

The one thing that stood out to me, being unindoctrinated in the ways of UFO lore, was the schizophrenic approach so many people at ATIC took. On the surface they sided with the belly laughers on any saucer issue, but if you were alone with them and started to ridicule the subject, they defended it or at least took an active interest. I learned this one day after I'd been at ATIC about a month.

A belated UFO report had come in from Africa. One of my friends was reading it, so I asked him if I could take a look at it when he had finished. In a few minutes he handed it to me.

When I finished with the report I tossed it back on my friend's desk, with some comment about the whole world's being nuts. I got a reaction I didn't expect; he wasn't so sure the whole world was nuts - maybe the nuts were at ATIC. "What's the deal?" I asked him. "Have they really thoroughly checked out every report and found that there's nothing to any of them?"

He told me that he didn't think so, he'd been at ATIC a long time. He hadn't ever worked on the UFO project, but he had seen many of their reports and knew what they were doing. He just plain didn't buy a lot of their explanations. "And I'm not the only one who thinks this," he added.

"Then why all of the big show of power against the UFO reports?" I remember asking him.

"The powers-that-be are anti flying saucer," he answered about half bitterly, "and to stay in favor it behooves one to follow suit."

As of February 1951 this was the UFO project.

The words "flying saucer" didn't come up again for a month or two. I'd forgotten all about the two words and was deeply engrossed in making an analysis of the performance of the Mig-15. The Mig had just begun to show up in Korea, and finding out more about it was a hot project.

Then the words "flying saucer" drifted across the room once more. But this time instead of belly laughter there was a note of hysteria.

It seems that a writer from Life magazine was doing some research on UFO's and rumor had it that Life was thinking about doing a feature article. The writer had gone to the Office of Public Information in the Pentagon and had inquired about the current status of Project Grudge. To accommodate the writer, the OPI had sent a wire out to ATIC: What is the status of Project Grudge?

Back went a snappy reply: Everything is under control; each new report is being thoroughly analyzed by our experts; our vast files of reports are in tiptop shape; and in general things are hunky-dunky. All UFO reports are hoaxes, hallucinations, and the misidentification of known objects.

Another wire from Washington: Fine, Mr. Bob Ginna of Life is leaving for Dayton. He wants to check some reports.

Bedlam in the raw.

Other magazines had printed UFO stories, and other reporters had visited ATIC, but they had always stayed in the offices of the top brass. For some reason the name Life, the prospects of a feature story, and the feeling that this Bob Ginna was going to ask questions caused sweat to flow at ATIC.

Ginna arrived and the ATIC UFO "expert" talked to him. Ginna later told me about the meeting. He had a long list of questions about reports that had been made over the past four years and every time he asked a question, the "expert" would go tearing out of the room to try to find the file that had the answer. I remember that day people spent a lot of

---

time ripping open bundles of files and pawing through them like a bunch of gophers. Many times, "I'm sorry, that's classified," got ATIC out of a tight spot.

Ginna, I can assure you, was not at all impressed by the "efficiently operating UFO project." People weren't buying the hoax, hallucination, and misidentification stories quite as readily as the Air Force believed.

Where it started or who started it I don't know, but about two months after the visit from Life's representative the official interest in UFO's began to pick up. Lieutenant Jerry Cummings, who had recently been recalled to active duty, took over the project.

Lieutenant Cummings is the type of person who when given a job to do does it. In a few weeks the operation of the UFO project had improved considerably. But the project was still operating under political, economic, and manpower difficulties. Cummings' desk was right across from mine, so I began to get a UFO indoctrination via bull sessions. Whenever Jerry found a good report in the pile - and all he had to start with was a pile of papers and files - he'd toss it over for me to read.

Some of the reports were unimpressive, I remember. But a few were just the opposite. Two that I remember Jerry's showing me made me wonder how the UFO's could be sloughed off so lightly. The two reports involved movies taken by Air Force technicians at White Sands Proving Ground in New Mexico.

The guided missile test range at White Sands is fully instrumented to track high, fast-moving objects - the guided missiles. Located over an area of many square miles there are camera stations equipped with cinetheodolite cameras and linked together by a telephone system.

On April 27, 1950, a guided missile had been fired, and as it roared up into the stratosphere and fell back to earth, the camera crews had recorded its flight. All the crews had started to unload their cameras when one of them spotted an object streaking across the sky. By April 1950 every person at White Sands was UFO conscious, so one member of the camera crew grabbed a telephone headset, alerted the other crews, and told them to get pictures. Unfortunately only one camera had film in it, the rest had already been unloaded, and before they could reload, the UFO was gone. The photos from the one station showed only a smudgy dark object. About all the film proved was that something was in the air and whatever it was, it was moving.

Alerted by this first chance to get a UFO to "run a measured course," the camera crews agreed to keep a sharper lookout. They also got the official O.K. to "shoot" a UFO if one appeared.

The Pentagon Rumbles.89

Almost exactly a month later another UFO did appear, or at least at the time the camera crews thought that it was a UFO. This time the crews were ready - when the call went out over the telephone net that a UFO had been spotted, all of the crews scanned the sky. Two of the crews saw it and shot several feet of film as the shiny, bright object streaked across the sky.

As soon as the missile tests were completed, the camera crews rushed their film to the processing lab and then took it to the Data Reduction Group. But once again the UFO had eluded man because there were apparently two or more UFO's in the sky and each camera station had photographed a separate one. The data were no good for triangulation.

The records at ATIC didn't contain the analysis of these films but they did mention the Data Reduction Group at White Sands. So when I later took over the UFO investigation I made several calls in an effort to run down the actual film and the analysis. The files at White Sands, like all files, evidently weren't very good, because the original reports were gone. I did contact a major who was very cooperative and offered to try to find the people who had worked on the analysis of the film. His report, after talking to two men who had done the analysis, was what I'd expected - nothing concrete except that the UFO's were unknowns. He did say that by putting a correction factor in the

data gathered by the two cameras they were able to arrive at a rough estimate of speed, altitude, and size. The UFO was "higher than 40,000 feet, traveling over 2,000 miles per hour, and it was over 300 feet in diameter." He cautioned me, however, that these figures were only estimates, based on the possibly erroneous correction factor; therefore they weren't proof of anything - except that something was in the air.

The people at White Sands continued to be on the alert for UFO's while the camera stations were in operation because they realized that if the flight path of a UFO could be accurately plotted and timed it could be positively identified. But no more UFO's showed up.

One day Lieutenant Cummings came over to my desk and dropped a stack of reports in front of me. "All radar reports," he said, "and I'm getting more and more of them every day."

Radar reports, I knew, had always been a controversial point in UFO history, and if more and more radar reports were coming in, there was no doubt that an already controversial issue was going to be compounded.

To understand why there is always some disagreement whenever a flying saucer is picked up on radar, it is necessary to know a little bit about how radar operates.

Basically radar is nothing but a piece of electronic equipment that

---

"shouts" out a radio wave and "listens" for the echo. By "knowing" how fast the radio, or radar, wave travels and from which direction the echo is coming, the radar tells the direction and distance of the object that is causing the echo. Any "solid" object like an airplane, bird, ship, or even a moisture laden cloud can cause a radar echo. When the echo comes back to the radar set, the radar operator doesn't have to listen for it and time it because this is all done for him by the radar set and he sees the "answer" on his radarscope - a kind of a round TV screen. What the radar operator sees is a bright dot, called a "blip" or a "return." The location of the return on the scope tells him the location of the object that was causing the echo. As the object moves through the sky, the radar operator sees a series of bright dots on his scope that make a track. On some radar sets the altitude of the target, the object causing the echo, can also be measured.

Under normal conditions the path that the radar waves take as they travel through the air is known. Normal conditions are when the temperature and relative humidity of the air decrease with an increase in altitude. But sometimes a condition will occur where at some level, instead of the temperature and/or relative humidity decreasing with altitude, it will begin to increase. This layer of warm, moist air is known as an inversion layer, and it can do all kinds of crazy things to a radar wave. It can cause part of the radar wave to travel in a big arc and actually pick up the ground many miles away. Or it can cause the wave to bend down just enough to pick up trucks, cars, houses, or anything that has a surface perpendicular to the ground level.

One would immediately think that since the ground or a house isn't moving, and a car or truck is moving only 40, 50, or 60 miles an hour, a radar operator should be able to pick these objects out from a fast-moving target. But it isn't as simple as that. The inversion layer shimmers and moves, and one second the radar may be picking up the ground or a truck in one spot and the next second it may be picking up something in a different spot. This causes a series of returns on the scope and can give the illusion of extremely fast or slow speeds.

These are but a few of the effects of an inversion layer on radar. Some of the effects are well known, but others aren't. The 3rd Weather Group at Air Defense Command Headquarters in Colorado Springs has done a lot of work on the effects of weather on radar, and they have developed

mathematical formulas for telling how favorable weather conditions are for "anomalous propagation," the two-bit words for false radar targets caused by weather.

The first problem in analyzing reports of UFO's being picked up on

---

The Pentagon Rumbles.91

radar is to determine if the weather conditions are right to give anomalous propagation. This can be determined by putting weather data into a formula. If they are, then it is necessary to determine whether the radar targets were real or caused by the weather. This is the difficult job. In most cases the only answer is the appearance of the target on the radar-scope. Many times a weather target will be a fuzzy and indistinct spot on the scope while a real target, an airplane for example, will be bright and sharp. This question of whether a target looked real is the cause of the majority of the arguments about radar detected UFO's because it is up to the judgment of the radar operator as to what the target looked like. And whenever human judgment is involved in a decision, there is plenty of room for an argument.

All during the early summer of 1951 Lieutenant Cummings "fought the syndicate" trying to make the UFO respectable. All the time I was continuing to get my indoctrination. Then one day with the speed of a shotgun wedding, the long overdue respectability arrived. The date was September 12, 1951, and the exact time was 3:04 P.M.

On this date and time a teletype machine at Wright-Patterson AFB began to chatter out a message. Thirty-six inches of paper rolled out of the machine before the operator ripped off the copy, stamped it Operational Immediate, and gave it to a special messenger to deliver to ATIC. Lieutenant Cummings got the message. The report was from the Army Signal Corps radar center at Fort Monmouth, New Jersey, and it was red-hot.

The incident had started two days before, on September 10, at 11:10 A.M., when a student operator was giving a demonstration to a group of visiting brass at the radar school. He demonstrated the set under manual operation for a while, picking up local air traffic, then he announced that he would demonstrate automatic tracking, in which the set is put on a target and follows it without help from the operator. The set could track objects flying at jet speeds.

The operator spotted an object about 12,000 yards southeast of the station, flying low toward the north. He tried to switch the set to automatic tracking. He failed, tried again, failed again. He turned to his audience of VIPs, embarrassed.

"It's going too fast for the set," he said. 'That means it's going faster than a jet!"

A lot of very important eyebrows lifted. What flies faster than a jet?

The object was in range for three minutes and the operator kept trying, without success, to get into automatic track. The target finally went off the scope, leaving the red-faced operator talking to himself.

92.The Report on Unidentified Flying Objects

The radar technicians at Fort Monmouth had checked the weather - there wasn't the slightest indication of an inversion layer.

Twenty-five minutes later the pilot of a T-33 jet trainer, carrying an Air Force major as passenger and flying 20,000 feet over Point Pleasant, New Jersey, spotted a dull silver, disk like object far

below him. He described it as 30 to 50 feet in diameter and as descending toward Sandy Hook from an altitude of a mile or so. He banked the T-33 over and started down after it. As he shot down, he reported, the object stopped its descent, hovered, then sped south, made a 120 degree turn, and vanished out to sea.

The Fort Monmouth Incident then switched back to the radar group. At 3:15 P.M. they got an excited, almost frantic call from headquarters to pick up a target high and to the north - which was where the first "faster-than-a-jet" object had vanished - and to pick it up in a hurry. They got a fix on it and reported that it was traveling slowly at 93,000 feet. They also could see it visually as a silver speck.

What flies 18 miles above the earth?

The next morning two radar sets picked up another target that couldn't be tracked automatically. It would climb, level off, climb again, go into a dive. When it climbed it went almost straight up.

The two-day sensation ended that afternoon when the radar tracked another unidentified slow moving object and tracked it for several minutes.

A copy of the message had also gone to Washington. Before Jerry could digest the thirty-six inches of facts, ATIC's new chief, Colonel Frank Dunn, got a phone call. It came from the office of the Director of Intelligence of the Air Force, Major General (now Lieutenant General) C. P. Cabell. General Cabell wanted somebody from ATIC to get to New Jersey - fast - and find out what was going on. As soon as the reports had been thoroughly investigated, the general said that he wanted a complete personal report. Nothing expedites like a telephone call from a general officer, so in a matter of hours Lieutenant Cummings and Lieutenant Colonel N. R. Rosengarten were on an airliner, New Jersey bound.

The two officers worked around the clock interrogating the radar operators, their instructors, and the technicians at Fort Monmouth. The pilot who had chased the UFO in the T-33 trainer and his passenger were flown to New York, and they talked to Cummings and Rosengarten. All other radar stations in the area were checked, but their radars hadn't picked up anything unusual.

At about 4:00 A.M. the second morning after they had arrived, the investigation was completed, Cummings later told. He and Lieutenant

---

The Pentagon Rumbles.93

Colonel Rosengarten couldn't get an airliner out of New York in time to get them to the Pentagon by 10:00 A.M., the time that had been set up for their report, so they chartered an airplane and flew to the capital to brief the general.

General Cabell presided over the meeting, and it was attended by his entire staff plus Lieutenant Cummings, Lieutenant Colonel Rosengarten, and a special representative from Republic Aircraft Corporation. The man from Republic supposedly represented a group of top U.S. industrialists and scientists who thought that there should be a lot more sensible answers coming from the Air Force regarding the UFO's. The man was at the meeting at the personal request of a general officer.

Every word of the two-hour meeting was recorded on a wire recorder. The recording was so hot that it was later destroyed, but not before I had heard it several times. I can't tell everything that was said but, to be conservative, it didn't exactly follow the tone of the official Air Force releases - many of the people present at the meeting weren't as convinced that the "hoax, hallucination, and misidentification" answer was quite as positive as the Grudge Report and subsequent press releases made out.

Toward the end of the two-hour conference a general asked Lieutenant Cummings to review the activity of the UFO investigation for the past year and a half. Maybe it was just a lack of sleep, or maybe it was just Cummings, but the general got the straight answer - for all practical purposes the project was dead. Then Cummings proceeded to elaborate on the details, the attitude at ATIC, the opposition to his reorganizing the project, and the methods of processing reports. Lieutenant Cummings didn't miss a point. He later told me that all of the generals and about three fourths of the full colonels present at the meeting turned the shade of purple normally associated with rage while a sort of sickly grin graced the faces of the remaining few. Then one of the generals on the purple-faced team glared at the sickly grin team and cut loose.

The first thing the general wanted to know was, "Who in hell has been giving me these reports that every decent flying saucer sighting is being investigated?"

Then others picked up the questioning.

"What happened to those two reports that General sent in from Saudi Arabia? He saw those two flying saucers himself."

"And who released this big report, anyway?" another person added, picking up a copy of the Grudge Report and slamming it back down on the table.

Lieutenant Cummings and Lieutenant Colonel Rosengarten came back to ATIC with orders to set up a new project and report back to General

---

94.The Report on Unidentified Flying Objects

Cabell when it was ready to go. But Cummings didn't get a chance to do much work on the new revitalized Project Grudge - it was to keep the old name - because in a few days he was a civilian. He'd been released from active duty because he was needed back at Cal Tech, where he'd been working on an important government project before his recall to active duty.

The day after Cummings got his separation orders, Lieutenant Colonel Rosengarten called me into his office. The colonel was chief of the Aircraft and Missiles branch and one of his many responsibilities was Project Grudge. He said that he knew that I was busy as group leader of my regular group but, if he gave me enough people, could I take Project Grudge? All he wanted me to do was to get it straightened out and operating; then I could go back to trying to outguess the Russians. He threw in a few comments about the good job I'd done straightening out other foul-up projects. Good old "Rosy." With my ego sufficiently inflated, I said yes.

On many later occasions, when I'd land at home in Dayton just long enough for a clean clothes resupply, or when the telephone would ring at 2:00 A.M. to report a new "hot" sighting and wake up the baby, Mrs. Ruppelt and I have soundly cussed my ego.

I had had the project only a few days when a minor flurry of good UFO reports started. It wasn't supposed to happen because the day after I'd taken over Project Grudge I'd met the ex-UFO "expert" in the hall and he'd nearly doubled up with laughter as he said something about getting stuck with Project Grudge. He predicted that I wouldn't get a report until the newspapers began to play up flying saucers again. "It's all mass hysteria," he said.

The first hysterical report of the flurry came from the Air Defense Command. On September 23, 1951, at seven fifty-five in the morning, two F-86's on an early patrol were approaching Long Beach, California, coming in on the west leg of the Long Beach Radio range. All of a sudden the flight leader called his ground controller - high at twelve o'clock he and his wing man saw an object. It was

in a gradual turn to its left, and it wasn't another airplane. The ground controller checked his radars but they had nothing, so the ground controller called the leader of the F-86's back and told him to go after the object and try to identify it. The two airplanes started to climb.

By this time the UFO had crossed over them but it was still in a turn and was coming back. Several times they tried to intercept, but they could never climb up to it. Once in a while, when they'd appear to be getting close, the UFO would lazily move out of range by climbing

---

slightly. All the time it kept orbiting to the left in a big, wide circle. After about ten minutes the flight leader told the ground controller, who had been getting a running account of the unsuccessful intercept, that their fuel was low and that they'd have to break off soon. They'd gotten a fairly good look at the UFO, the flight leader told the ground controller, and it appeared to be a silver airplane with highly swept back wings. The controller acknowledged the message and said that he was scrambling all his alert airplanes from George AFB. Could the two F-86's stay in the area a few more minutes? They stayed and in a few minutes four more F-86's arrived. They saw the UFO immediately and took over.

The two F-86's with nearly dry tanks went back to George AFB.

For thirty more minutes the newly arrived F-86's worked in pairs trying to get up to the UFO's altitude, which they estimated to be 55,000 feet, but they couldn't make it. All the time the UFO kept slowly circling and speeding up only when the F-86's seemed to get too close. Then they began to run out of fuel and asked for permission to break off the intercept.

By this time one remaining F-86 had been alerted and was airborne toward Long Beach. He passed the four homeward bound F-86's as he was going in, but by the time he arrived over Long Beach the UFO was gone.

All the pilots except one reported a "silver airplane with highly swept back wings." One pilot said the UFO looked round and silver to him.

The report ended with a comment by the local intelligence officer. He'd called Edwards AFB, the big Air Force test base north of Los Angeles, but they had nothing in the air. The officer concluded that the UFO was no airplane. In 1951 nothing we had would fly higher than the F-86.

This was a good report and I decided to dig in. First I had some more questions I wanted to ask the pilots. I was just in the process of formulating this set of questions when three better reports came in. They automatically got a higher priority than the Long Beach Incident.

Chapter 8: The Lubbock Lights, Unabridged, Page 96

NICAP Home Page

CHAPTER EIGHT

The Lubbock Lights, Unabridged

When four college professors, a geologist, a chemist, a physicist, and a petroleum engineer, report seeing the same UFO's on fourteen different occasions, the event can be classified as, at least, unusual. Add the facts that hundreds of other people saw these UFO's and that they were photographed, and the story gets even better. Add a few more facts - that these UFO's were picked up on radar and that a few people got a close look at one of them, and the story begins to convince even the most ardent skeptics.

This was the situation the day the reports of the Lubbock Lights arrived at ATIC. Actually the Lubbock Lights, as Project Blue Book calls them, involved many widespread reports. Some of these incidents are known to the public, but the ones that added the emphasis and intrigue to the case and caused hundreds of hours of time to be spent analyzing the reports have not been told before. We collected all of these reports under the one title because there appeared to be a tie-in between them.

The first word of the sightings reached ATIC late in September 1951, when the mail girl dropped letters into my "in" basket. One of the letters was from Albuquerque, New Mexico, one was from a small town in Washington State, where I knew an Air Defense Command radar station was located, and the other from Reese AFB at Lubbock, Texas.

I opened the Albuquerque letter first. It was a report from 34th Air Defense at Kirtland AFB. The report said that on the evening of August 25, 1951, an employee of the Atomic Energy Commission's super secret Sandia Corporation and his wife had seen a UFO. About dusk they were sitting in the back yard of their home on the outskirts of Albuquerque. They were gazing at the night sky, commenting on how beautiful it was, when both of them were startled at the sight of a huge airplane flying swiftly and silently over their home. The airplane had been in sight only a few seconds but they had gotten a good look at it because it was so low. They estimated 800 to 1,000 feet. It was the shape of a "flying wing" and one and a half times the size of a B-36. The wing was sharply swept back, almost like a V. Both the husband and wife had seen B-36's over their

---

home many times. They couldn't see the color of the UFO but they did notice that there were dark bands running across the wing from front to back. On the aft edge of the wings there were six to eight pairs of soft, glowing, bluish lights. The aircraft had passed over their house from north to south.

The report went on to say that an investigation had been made immediately. Since the object might have been a conventional airplane, air traffic was checked. A commercial airlines Constellation was 50 miles west of Albuquerque and an Air Force B-25 was south of the city, but there had been nothing over Albuquerque that evening. The man's back ground was checked. He had a "Q" security clearance. This summed up his character, oddballs don't get "Q" clearances. No one else had reported the UFO, but this could be explained by the fact the AEC employee and his wife lived in such a location that anything passing over their home from north to south wouldn't pass over or near very many other houses. A sketch of the UFO was enclosed in the report.

I picked up the letter from Lubbock next. It was a thick report, and from the photographs that were attached, it looked interesting. I thumbed through it and stopped at the photos. The first thing that struck me was the similarity between these photos and the report I'd just read. They showed a series of lights in a V shape, very similar to those described as being on the aft edge of the "flying wing" that was reported from Albuquerque. This was something unique, so I read the report in detail.

On the night of August 25, 1951, about 9:20 P.M., just twenty minutes after the Albuquerque sighting, four college professors from Texas Technological College at Lubbock had observed a formation of soft, glowing, bluish green lights pass over their home. Several hours later they saw a similar group of lights and in the next two weeks they saw at least ten more. On August 31 an amateur photographer had taken five photos of the lights. Also on the thirty first two ladies had seen a large "aluminum colored," "pear shaped" object hovering near a road north of Lubbock. The report went into the details of these sightings and enclosed a set of the photos that had been taken.

This report, in itself, was a good UFO report, but the similarity to the Albuquerque sighting, both in the description of the object and the time that it was seen, was truly amazing.

I almost overlooked the report from the radar station because it was fairly short. It said that early on the morning of August 26, only a few hours after the Lubbock sighting, two different radars had shown a target traveling 900 miles per hour at 13,000 feet on a northwesterly heading. The target had been observed for six minutes and an F-86 jet interceptor

---

had been scrambled but by the time the F-86 had climbed into the air the target was gone. The last paragraph in the report was rather curt and to the point. It was apparently in anticipation of the comments the report would draw. It said that the target was not caused by weather. The officer in charge of the radar station and several members of his crew had been operating radar for seven years and they could recognize a weather target. This target was real.

I quickly took out a map of the United States and drew in a course line between Lubbock and the radar station. A UFO flying between these two points would be on a northwesterly heading and the times it was seen at the two places gave it a speed of roughly 900 miles per hour.

This was by far the best combination of UFO reports I'd ever read and I'd read every one in the Air Force's files.

The first thing I did after reading the reports was to rush a set of the Lubbock photos to the intelligence officer of the 34th Air Division in Albuquerque. I asked him to show the photos to the AEC employee and his wife without telling them what they were. I requested an answer by wire. Later the next day I received my answer: "Observers immediately said that this is what they saw on the night of 25 August. Details by airmail." The details were a sketch the man and his wife had made of a wing around the photo of the Lubbock Lights. The number of lights in the photo and the number of lights the two observers had seen on the wing didn't tally, but they explained this by saying that they could have been wrong in their estimate.

The next day I flew to Lubbock to see if I could find an answer to all of these mysterious happenings.

I arrived in Lubbock about 5:00 P.M. and contacted the intelligence officer at Reese AFB. He knew that I was on my way and had already set up a meeting with the four professors. Right after dinner we met them.

If a group had been hand-picked to observe a UFO, we couldn't have picked a more technically qualified group of people. They were:

Dr. W. I. Robinson, Professor of Geology.

Dr. A. G. Oberg, Professor of Chemical Engineering.

Professor W. L. Ducker, Head of the Petroleum Engineering Department.

Dr. George, Professor of Physics.

This is their story:

On the evening of August 25 the four men were sitting in Dr. Robinson's back yard. They were discussing micro meteorites and drinking tea. They jokingly stressed this point. At nine twenty a formation of lights streaked across the sky directly over their heads. It all happened so fast that none

---

The Lubbock Lights, Unabridged.99

of them had a chance to get a good look. One of the men mentioned that he had always admonished his students for not being more observant; now he was in that spot. He and his colleagues realized they could remember only a few details of what they had seen. The lights were a weird bluish green color and they were in a semicircular formation. They estimated that there were from fifteen to thirty separate lights and that they were moving from north to south. Their one wish at this time was that the lights would reappear. They did; about an hour later the lights went over again. This time the professors were a little better prepared. With the initial shock worn off, they had time to get a better look. The details they had remembered from the first flight checked. There was one difference; in this flight the lights were not in any orderly formation, they were just in a group.

The professors reasoned that if the UFO's appeared twice they might come back. Come back they did. The next night and apparently many times later, as the professors made twelve more observations during the next few weeks. For these later sightings they added two more people to their observing team.

Being methodical, as college professors are, they made every attempt to get a good set of data. They measured the angle through which the objects traveled and timed them. The several flights they checked traveled through 90 degrees of sky in three seconds, or 30 degrees per second. The lights usually suddenly appeared 45 degrees above the northern horizon, and abruptly went out 45 degrees above the southern horizon. They always traveled in this north-to-south direction. Outside of the first flight, in which the objects were in a roughly semicircular formation, in none of the rest of the flights did they note any regular pattern. Two or three flights were often seen in one night.

They had tried to measure the altitude, with no success. First they tried to compare the lights to the height of clouds but the clouds were never near the lights, or vice versa. Next they tried a more elaborate scheme. They measured off a base line perpendicular to the objects' usual flight path. Friends of the professors made up two teams. Each of the two teams was equipped with elevation measuring devices, and one team was stationed at each end of the base line. The two teams were linked together by two-way radios. If they sighted the objects they would track and time them, thus getting the speed and altitude.

Unfortunately neither team ever saw the lights. But the lights never seemed to want to run the course. The wives of some of the watchers claimed to have seen them from their homes in the city. This later proved to be a clue.

100.The Report on Unidentified Flying Objects

The professors were not the sole observers of the mysterious lights. For two weeks hundreds of other people for miles around Lubbock reported that they saw the same lights. The professors checked many of these reports against the times of the flights they had seen and recorded, and many checked out close. They attempted to question these observers as to the length of time they had seen the lights

and angles at which they had seen them, but the professors learned what I already knew, people are poor observers.

Naturally there has been much discussion among the professors and their friends as to the nature of the lights. A few simple mathematical calculations showed that if the lights were very high they would be traveling very fast. The possibility that they were some natural phenomena was, of course, discussed and seriously considered. The professors did a lot of thinking and research and decided that if they were natural phenomena they were something altogether new. Dr. George, who has since died, studied the phenomena of the night sky during his years as a professor at the University of Alaska, and he had never seen or heard of anything like this before.

This was the professors' story. It was early in the morning when we returned to Reese AFB. I sat up a few more hours unsuccessfully trying to figure out what they had seen.

The next day I again met the intelligence officer and we went to talk to Carl Hart, Jr., the amateur photographer who had taken the pictures of the lights. Hart was a freshman at Texas Tech. His story was that on the night of August 31 he was lying in his bed in an upstairs room of the Hart home. He, like everyone else in Lubbock, had heard about the lights but he had never seen them. It was a warm night and his bed was pushed over next to an open window. He was looking out at the clear night sky, and had been in bed about a half hour, when he saw a formation of the lights appear in the north, cross an open patch of sky, and disappear over his house. Knowing that the lights might reappear as they had done in the past, he grabbed his loaded Kodak 35, set the lens and shutter at f 3.5 and one tenth of a second, and went out into the middle of the back yard. Before long his vigil was rewarded when the lights made a second pass. He got two pictures. A third formation went over a few minutes later and he got three more pictures. The next morning bright and early Hart said he took the roll of unexposed film to a friend who ran a photo finishing shop. He explained that he did all of his film processing in this friend's lab. He told the friend about the pictures and they quickly developed them.

I stopped Hart at this point and asked why he didn't get more excited

---

about what could be the biggest news photos of the century. He said that the lights had appeared to be so dim that he was sure he didn't have anything on the negatives; had he thought that he did have some good pictures he would have awakened his friend to develop the negatives right away.

When he developed the negatives and saw that they showed an image, his friend suggested that he call the newspaper. At first the paper wasn't interested but then they decided to run the photos. I later found out that they had done some checking of their own.

We went with Hart into his back yard to re-enact what had taken place. He described the lights as being the same dull, glowing bluish green color as those seen by the professors. The formation was different, however. The lights Hart saw were always flying in a perfect V. He traced the path from where they appeared over some trees in the north, through an open patch of sky over the back yard, to a point where they disappeared over the house. From the flight path he pointed out, the lights had crossed about 120 degrees of open sky in four seconds. This 30-degree-per-second angular velocity corresponded to the professors' measured angular velocity.

We made arrangements to borrow Hart's negatives, thanked him for his information, and left.

Armed with a list of names of other observers of the mysterious lights, the intelligence officer and I started out to try to get a cross-section account of the other UFO sightings in the Lubbock area. All the stories about the UFO's were the same; various types of formations of dull bluish green lights, generally moving north to south. A few people had variations. One lady saw a flying venetian blind

and another a flying double boiler. One point of interest was that very few claimed to have seen the lights before reading the professors' story in the paper, but this could get back to the old question, "Do people look up if they have no reason to do so?"

We talked to observers in nearby towns. Their stories were the same. Two of them, tower operators at an airport, reported that they had seen the lights on several occasions.

It was in one of these outlying towns, Lamesa, that we talked to an old gentleman, about eighty years old, who gave us a good lead. He had seen the lights and he had identified them. Ever since he had read the story in the papers he had been looking. One evening he and his wife were in their yard looking for the lights. All of a sudden two or three appeared. They were in view for several seconds, then they were gone. In a few minutes the lights did a repeat performance. The man admitted he had been scared. He broke off his story of the lights and launched into

---

his background as a native Texan, with range wars, Indians, and stage coaches under his belt. What he was trying to point out was that despite the range wars, Indians, and stagecoaches, he had been scared. His wife had been scared too. We had some difficulty getting back to the lights but we finally made it. The third time they came around, he said, one of the lights emitted a sound. It said, "Plover." The old gentleman had immediately identified it as a plover, a water bird about the size of a quail. Later that night, and on several other occasions, they had seen the same thing. After a few more hair-raising but interesting stories of the old west Texas, we left.

Our next stop was the federal game warden's office in Lubbock. We got the low-down on plovers. We explained our interest and the warden was very helpful. He had been around west Texas all of his life so he was familiar with wildlife. The oily white breast of a plover could easily reflect light, but plovers usually didn't travel in more than pairs, or three at the most. He had never seen or heard of them traveling in a flock of fifteen to thirty but, of course, this wasn't impossible. Ducks, yes, but probably not plovers. He did say that for some unknown reason there were more than the usual number of plovers in the area that fall.

I was anxious to get the negatives that Hart had lent us back to the photo lab at Wright Field, but I had one more call to make. I wanted to talk to the two ladies who had seen a strange object hovering near their car, but I also wanted to write my report before I left Lubbock. Two Air Force special investigators from Reese AFB offered to talk to the ladies, so I stayed at the air base and finished my report.

That night when the investigators came back, I got the story. They had spent the whole day talking to the ladies and doing a little discreet checking into their backgrounds.

The two ladies, a mother and her daughter, had left their home in Matador, Texas, 70 miles northeast of Lubbock, about twelve thirty P.M. on August 31. They were driving along in their car when they suddenly noticed "a pear shaped" object about 150 yards ahead of them. It was just off the side of the road, about 120 feet in the air. It was drifting slowly to the east, "less than the speed required to take off in a Cub airplane." They drove on down the road about 50 more yards, stopped, and got out of the car. The object, which they estimated to be the size of a B-29 fuselage, was still drifting along slowly. There was no sign of any exhaust blast and they heard no noise, but they did see a "porthole" in the side of the object. In a few seconds the object began to pick up speed and rapidly climb out of sight. As it climbed it seemed to have a tight spiraling motion.

The investigation showed that the two ladies were "solid citizens," with absolutely no talents, or reasons, for fabricating such a story. The daughter was fairly familiar with aircraft. Her husband was an Air Force officer then in Korea, and she had been living near air bases for several years. The ladies had said that the object was "drifting" to the east, which possibly indicated that it was moving with the wind, but on further investigation it was found that it was moving into the wind.

The two investigators had worked all day and hadn't come up with the slightest indication of an answer.

This added the final section to my now voluminous report on the Lubbock affair.

The next morning as I rode to the airport to catch an airliner back to Dayton I tried to put the whole puzzle together. It was hard to believe that all I'd heard was real. Did a huge flying wing pass over Albuquerque and travel 250 miles to Lubbock in about fifteen minutes? This would be about 900 miles per hour. Did the radar station in Washington pick up the same thing? I'd checked the distances on the big wall map in flight operations just before leaving Reese AFB. It was 1,300 miles from Lubbock to the radar site. From talking to people, we decided that the lights were apparently still around Lubbock at 11:20 P.M. and the radar picked them up just after midnight. They would have had to be traveling about 780 miles per hour. This was fairly close to the 900-mile-per-hour speed clocked by the two radars. The photos of the Lubbock Lights checked with the description of what the AEC employee and his wife had seen in Albuquerque. Nobody in Lubbock, however, had reported seeing a "flying wing" with lights. All of this was swimming around in my mind when I stepped out of the staff car at the Lubbock airport.

My plane had already landed so I checked in at the ticket counter, picked up a morning paper, and ran out and got into the airplane. I sat down next to a man wearing a Stetson hat and cowboy boots. I soon found out he was a retired rancher from Lubbock.

On the front page of the paper was an account of a large meteor that had flashed across New Mexico, west Texas and Oklahoma the night before. According to the newspaper account, it was very spectacular and had startled a good many people in Lubbock. I was interested in the story because I had seen this meteor. It was a spectacular sight and I could easily understand how such things could be called UFO's. My seat partner must have noticed that I was reading the story of the meteor because he commented that a friend of his, the man who had brought him to the airport, had seen it. We talked about the meteor. This led to a discussion of other odd happenings and left a perfect opening for him to

---

bring up the Lubbock Lights. He asked me if I'd heard about them. I said that I had heard a few vague stories. I hoped that this would stave off any detailed accounts of stories I had been saturated with during the past five days, but it didn't. I heard all the details all over again.

As he talked on, I settled back in my seat waiting for a certain thing to happen. Pretty soon it came. The rancher hesitated and the tone of his voice changed to a half proud, half apologetic tone. I'd heard this transition many times in the past few months; he was going to tell about the UFO that he had seen. He was going to tell how he had seen the bluish green lights. I was wrong; what he said knocked me out of my boredom.

The same night that the college professors had seen their formation of lights his wife had seen something. Nobody in Lubbock knew about the story, not even their friends. He didn't want anyone to think he and his wife were crazy. He was telling me only because I was a stranger. Just after dark his wife had gone outdoors to take some sheets off the clothesline. He was inside the house reading the paper. Suddenly his wife had rushed into the house, as he told the story, "as white as the sheets

she was carrying." As close as he could remember, he said, this was about ten minutes before the professors made their first sighting. He stopped at this point to tell me about his wife, she wasn't prone to be "flighty" and she "never made up tales." This character qualification was also standard for UFO storytellers. The reason his wife was so upset was that she had seen a large object glide swiftly and silently over the house. She said it looked like "an airplane without a body." On the back edge of the wing were pairs of glowing bluish lights. The Albuquerque sighting! He said he didn't have any idea what his wife had seen but he thought that it was an interesting story.

It was an interesting story. It hit me right between the eyes. I knew the rancher and his wife couldn't have possibly heard the Albuquerque couple's story, only they and a few Air Force people knew about it. The chances of two identical stories being made up were infinitesimal, especially since neither of them fitted the standard Lubbock Light description. I wondered how many other people in Lubbock, Albuquerque, or any where in the Southwest had seen a similar UFO during this period and hesitated to mention it.

I tried to get a few more facts from the rancher but he'd told me all he knew. At Dallas I boarded an airliner to Dayton and he went on to Baton Rouge, never knowing what he'd added to the story of the Lubbock Lights.

On the way to Dayton I figured out a plan of attack on the thousands

---

of words of notes I'd taken. The best thing to do, I decided, was to treat each sighting in the Lubbock Light series as a separate incident. All of them seemed to be dependent upon each other for importance. If the objects that were reported in several of the incidents could be identified, the rest would merely become average UFO reports. The photographs taken by Carl Hart, Jr., became number one on the agenda.

As soon as I reached Dayton I took Hart's negatives to the Photo Reconnaissance Laboratory at Wright Field. This laboratory, staffed by the Air Force's top photography experts, did all of our analysis of photographs. They went right to work on the negatives and soon had a report.

There had originally been five negatives, but when we asked to borrow them Hart could only produce four. The negatives were badly scratched and dirty because so many people had handled them, so it was difficult to tell the actual photographic images from the dust spots and scratches. The first thing that the lab did was to look at each spot on the negatives to see if it was an actual photographic image. They found that the photos showed an inverted V formation of lights. In each photo the individual image of a light was badly blurred due to motion of the camera, but by careful scrutiny of each blurred image they were able to determine that the original lights that Hart had photographed were circular, near pinpoint sources of light. Like a bright star, or a distant light bulb. Next they made enlargements from the negatives and carefully plotted the position of each light in the formation.

In each photograph the individual lights in the formation shifted position according to a definite pattern.

One additional factor that was brought out in the report was that although the photos were taken on a clear night no images of the stars could be found in the background. This proved one thing, the lights, which were overexposed in the photograph, were a great deal brighter than the stars, or the lights affected the film more than the light from the stars.

This was all that the photos showed. It was impossible to determine the size of each image of the group, speed, or altitude.

The next thing was to try to duplicate what Hart said he had done. I enlisted the aid of several friends and we tried to photograph a moving light. When we were talking to Hart in Lubbock, he had taken us to his back yard, where he had shot the pictures. He had traced the flight path of lights across the sky. We had him estimate the speed by following an imaginary flight of lights across the sky. It came out to about four seconds. We had a camera identical to the one that Hart had used and

---

set up a light to move at the same speed as the UFO's had flown. We tried to take photographs. In four seconds we could get only two poor shots. These were badly blurred, much worse than Hart's, due to the one-tenth-of-a-second shutter speed. We repeated our experiment several times, each time with the same results. This made a lot of people doubt the authenticity of Hart's photos.

With the completed photo lab report in my hands, I was still without an The report was intere ting but didn't prove anything. All I could do was opinions from as qualified sources as I could find. A physiologist at the Aeromed oratory knocked out the timing theory immediately by saying that if Ha rt had been excited he could have easily taken three photos in four seconds if we could get two in four seconds in our experiment. Several professional photographers, one of them a top Life photographer, said that if Hart was familiar with his camera and was familiar with panning action shots, his photos would have shown much less blur than ours. I recalled what I heard about Hart's having photographed sporting events for the Lubbock newspaper. This would have called for a good panning technique.

The photographs didn't tally with the description of the lights that the professors had seen; in fact, they were firmly convinced that they were of "home manufacture." The professors had reported soft, glowing lights yet the photos showed what should have been extremely bright lights. Hart reported a perfect formation while the professors, except for the first flight, reported an unorderly group. There was no way to explain this disagreement in the arrangement of the lights. Of course, it wasn't impossible that on the night that Hart saw the lights they were flying in a V formation. The first time the professors saw them they were flying in a semicircle.

The intensity of the lights was difficult to explain. Again I went to the people in the Photo Reconnaissance Laboratory. I asked them if there was any possible situation that could cause this. They said yes. An intensely bright light source which had a color far over in the red end of the spectrum, bordering on infrared, could do it. The eye is not sensitive to such a light, it could appear dim to the eye yet be "bright" to the film. I asked them what kind of a light source would cause this. There were several things, if you want to speculate, they said, extremely high temperatures for one. But this was as far as they would go. We have nothing in this world that flies that appears dim to the eye yet will show bright on film, they said.

This ended the investigation of the photographs, and the investigation ended at a blank wall. My official conclusion, which was later given

---

to the press, was that "The photos were never proven to be a hoax but neither were they proven to be genuine." There is no definite answer.

The emphasis of the investigation was now switched to the professors sighting. The meager amount of data that they had gathered seemed to be accurate but it was inconclusive as far as getting a definite answer was concerned. They had measured two things, how much of the sky the objects had crossed in a certain time and the angle from one side of the formation to the other. These figures

didn't mean a great deal, however, since the altitude at which the formation of lights was flying was unknown. If you assumed that the objects were flying at an altitude of 10,000 feet you could easily compute that they were traveling about 3,600 miles per hour, or five to six times the speed of sound. The formation would have been about 1,750 feet wide. If each light was a separate object it could have been in the neighborhood of 100 feet in diameter. These figures were only a guess since nobody knew if the lights were at, above, or below 10,000 feet. If they had been higher they would have been going faster and have been larger. If lower than 10,000 feet, slower and smaller.

The only solid lead that had developed while the Reese AFB intelligence officer and I were investigating the professors' sightings was that the UFO's were birds reflecting the city lights; specifically plover. The old cowboy from Lamesa had described something identical to what the professors described and they were plover. Secondly, whenever the professors left the vicinity of their homes to look for the lights they didn't see them, yet their wives, who stayed at home, did see them. If the "lights" were birds they would be flying low and couldn't be seen from more than a few hundred feet. While in Lubbock I'd noticed several main boulevards lighted with the bluish mercury vapor lights. I called the intelligence officer at Reese AFB and he airmailed me a city map of Lubbock with the mercury-vapor-lighted streets marked. The place where the professors had made their observations was close to one of these streets. The big hitch in this theory was that people living miles from a mercury-vapor-lighted boulevard had also reported the lights. How many of these sightings were due to the power of suggestion and how many were authentic I didn't know. If I could have found out, it would have been possible to plot the sightings in Lubbock, and if they were all located close to the lighted boulevards, birds would be an answer. This, however, it was impossible to do.

The fact that the lights didn't make any perceivable sound seemed as if it might be a clue. Birds or light phenomena wouldn't make any sound, but how about some object of appreciable size traveling at or above them

---

speed of sound? Jet airplanes don't fly as fast as the speed of sound but they, make a horrible roar. Artillery shells, which are going much faster than aircraft, whine as they go through the air. I knew that a great deal of the noise from a jet is due to the heated air rushing out of the tail pipe, but I didn't know exactly how much of the noise this caused. If a jet airplane with a silent engine could be built, how much noise would it make? How far could it be heard? To get the answer I contacted National Advisory Committee for Aeronautics Laboratory at Langley AFB, a government agency which specializes in aeronautical research. They didn't know. Neither they nor anybody else had ever done any research on this question. Their opinion was that such an aircraft could not be heard 5,000 or 10,000 feet away. Aerodynamicists at Wright Field's Aircraft Laboratory agreed.

I called the Army's Ballistic Research Laboratories at Aberdeen Proving Grounds, Maryland, to find out why artillery shells whine. These people develop and test all kinds of shells so they would have an answer if anybody did. They said that the majority of the whine of an artillery shell is probably caused by the flat back end of the shell. If a perfectly streamlined shell could be used it would not have any perceivable whine.

What I found out, or didn't find out, about the sound of an object moving at several times the speed of sound was typical of nearly every question that came up regarding UFO's. We were working in a field where there were no definite answers to questions. In some instances we were getting into fields far advanced above the then present levels of research. In other instances we were getting into fields where no research had been done at all. It made the problem of UFO analysis one of getting opinions. All we could do was hope the opinions we were getting were the best.

My attempts to reach a definite conclusion as to what the professors had seen met another blank wall. I had no more success than I'd had trying to reach a conclusion on the authenticity of the photographs.

A thorough analysis of the reports of the flying wings seen by the retired rancher's wife in Lubbock and the AEC employee and his wife in Albuquerque was made. The story from the two ladies who saw the aluminum colored pear shaped object hovering near the road near Matador, Texas, was studied, checked, and rechecked. Another blank wall on all three of these sightings.

By the time I got around to working on the report from the radar station in Washington State, the data of the weather conditions that existed on the night of the sighting had arrived. I turned the incident folder over to the electronics specialists at ATIC. They made the analysis

---

and determined that the targets were caused by weather, although it was a borderline case. They further surmised that since the targets had been picked up on two radars, if I checked I'd find out that the two targets looked different on the two radarscopes. This is a characteristic of a weather target picked up on radars operating on different frequencies. I did check. I called the radar station and talked to the captain who was in charge of the crew the night the target had been picked up.

The target looked the same on both scopes. This was one of the reasons it had been reported, the captain told me. If the target hadn't been the same on both scopes, he wouldn't have made the report since he would have thought he had a weather target. He asked me what ATIC thought about the sighting. I said that Captain James thought it was weather. Just before the long-distance wires between Dayton and Washington melted, I caught some comment about people sitting in swivel chairs miles from the closest radarscope. . . . I took it that he didn't agree the target was caused by weather. But that's the way it officially stands today.

Although the case of the Lubbock Lights is officially dead, its memory lingers on. There have never been any more reliable reports of "flying wings" but lights somewhat similar to those seen by the professors have been reported. In about 70 per cent of these cases they were proved to be birds reflecting city lights.

The known elements of the case, the professors' sightings and the photos, have been dragged back and forth across every type of paper upon which written material appears, from the cheapest, coarsest pulp to the slick Life pages. Saucer addicts have studied and offered the case as all conclusive proof, with photos, that UFO's are interplanetary. Dr. Donald Menzel of Harvard studied the case and ripped the sightings to shreds in Look, Time, and his book, Flying Saucers, with the theory that the professors were merely looking at refracted city lights. But none of these people even had access to the full report. This is the first time it has ever been printed.

The only other people outside Project Blue Book who have studied the complete case of the Lubbock Lights were a group who, due to their associations with the government, had complete access to our files. And these people were not pulp writers or wide-eyed fanatics, they were scientists, rocket experts, nuclear physicists, and intelligence experts. They had banded together to study our UFO reports because they were convinced that some of the UFO's that were being reported were interplanetary spaceships and the Lubbock series was one of these reports.

The fact that the formations of lights were in different shapes didn't bother them; in fact, it convinced them all the more that their ideas of how a spaceship might operate were correct.

This group of scientists believed that the spaceships, or at least the part of the spaceship that came relatively close to the earth, would have to have a highly swept back wing configuration. And they believed that for propulsion and control the craft had a series of small jet orifices all around its edge. Various combinations of these small jets would be turned on to get various flight attitudes. The lights that the various observers saw differed in arrangement because the craft was flying in different flight attitudes.

(Three years later the Canadian Government announced that this was exactly the way that they had planned to control the flying saucer that they were trying to build. They had to give up their plans for the development of the saucer like craft, but now the project has been taken over by the U.S. Air Force.)

This is the complete story of the Lubbock Lights as it is carried in the Air Force files, one of the most interesting and most controversial collection of UFO sightings ever to be reported to Project Blue Book. Officially all of the sightings, except the UFO that was picked up on radar, are unknowns.

Personally I thought that the professors' lights might have been some kind of birds reflecting the light from mercury vapor street lights, but I was wrong. They weren't birds, they weren't refracted light, but they weren't spaceships. The lights that the professors saw - the backbone of the Lubbock Light series - have been positively identified as a very commonplace and easily explainable natural phenomenon.

It is very unfortunate that I can't divulge exactly the way the answer was found because it is an interesting story of how a scientist set up complete instrumentation to track down the lights and how he spent several months testing theory after theory until he finally hit upon the answer. Telling the story would lead to his identity and, in exchange for his story, I promised the man complete anonymity. But he fully convinced me that he had the answer, and after having heard hundreds of explanations of UFO's, I don't convince easily.

With the most important phase of the Lubbock Lights "solved" - the sightings by the professors- the other phases become only good UFO reports.

NICAP Home Page

CHAPTER NINE

The New Project Grudge

While I was in Lubbock, Lieutenant Henry Metscher, who was helping me on Project Grudge, had been sorting out the many bits and pieces of information that Lieutenant Jerry Cummings and Lieutenant Colonel Rosengarten had brought back from Fort Monmouth, New Jersey, and he had the answers.

The UFO that the student radar operator had assumed to be traveling at a terrific speed because he couldn't lock on to it turned out to be a 400-mile-an-hour conventional airplane. He'd just gotten fouled up on his procedures for putting the radar set on automatic tracking. The sighting by the two officers in the T-33 jet fell apart when Metscher showed how they'd seen a balloon.

The second radar sighting of the series also turned out to be a balloon. The frantic phone call from headquarters requesting a reading on the object's altitude was to settle a bet. Some officers in headquarters had seen the balloon launched and were betting on how high it was.

The second day's radar sightings were caused by another balloon and weather - both enhanced by the firm conviction that there were some mighty queer goings on over Jersey.

The success with the Fort Monmouth Incident had gone to our heads and we were convinced that with a little diligent digging we'd be knocking off saucers like an ace skeet shooter. With all the confidence in the world, I attacked the Long Beach Incident, which I'd had to drop to go to Lubbock, Texas. But if saucers could laugh, they were probably zipping through the stratosphere chuckling to themselves, because there was no neat solution to this one.

In the original report of how the six F-86's chased the high flying UFO over Long Beach, the intelligence officer who made the report had said that he'd checked all aircraft flights, therefore this wasn't the answer.

The UFO could have been a balloon, so I sent a wire to the Air Force weather detachment at the Long Beach Municipal Airport. I wanted the track of any balloon that was in the air at 7:55 A.M. on September 23, 1951.

112.The Report on Unidentified Flying Objects

While I was waiting for the answers to my two wires, Lieutenant Metscher and I began to sort out old UFO reports. It was a big job because back in 1949, when the old Project Grudge had been disbanded, the files had just been dumped into storage bins. Hank and I now had four filing case drawers full of a heterogeneous mass of UFO reports, letters, copies of letters, and memos.

But I didn't get to do much sorting because the mail girl brought in a copy of a wire that had just arrived. It was a report of a UFO sighting at Terre Haute, Indiana. I read it and told Metscher that I'd quickly whip out an answer and get back to helping him sort. But it didn't prove to be that easy.

The report from Terre Haute said that on October 9, a CAA employee at Hulman Municipal Airport had observed a silvery UFO. Three minutes later a pilot, flying east of Terre Haute, had seen a similar object. The report lacked many details but a few phone calls filled me in on the complete story.

At 1:43 P.M. on the ninth a CAA employee at the airport was walking across the ramp in front of the

administration building. He happened to glance up at the sky - why, he didn't know - and out of the corner of his eye he caught a flash of light on the southeastern horizon. He stopped and looked at the sky where the flash of light had been but he couldn't see anything. He was just about to walk on when he noticed what he described as "a pinpoint" of light in the same spot where he'd seen the flash. In a second or two the "pinpoint" grew larger and it was obvious to the CAA man that something was approaching the airport at a terrific speed. As he watched, the object grew larger and larger until it flashed directly overhead and disappeared to the northwest. The CAA man said it all happened so fast and he was so amazed that he hadn't called anybody to come out of the nearby hangar and watch the UFO. But when he'd calmed down he remembered a few facts. The UFO had been in sight for about fifteen seconds and during this time it had passed from horizon to horizon. It was shaped like a "flattened tennis ball," was a bright silver color, and when it was directly overhead it was "the size of a 50 cent piece held at arm's length."

But this wasn't all there was to the report. A matter of minutes after the sighting a pilot radioed Terre Haute that he had seen a UFO. He was flying from Greencastle, Indiana, to Paris, Illinois, when just east of Paris he'd looked back and to his left. There, level with his airplane and fairly close, was a large silvery object, "like a flattened orange," hanging motionless in the sky. He looked at it a few seconds, then hauled his plane around in a tight left bank. He headed directly toward the UFO,

---

but it suddenly began to pick up speed and shot off toward the northeast. The time, by the clock on his instrument panel, was 1:45 P.M. - just two minutes after the sighting at Terre Haute.

When I finished calling I got an aeronautical chart out of the file and plotted the points of the sighting. The CAA employee had seen the UFO disappear over the northwestern horizon. The pilot had been flying from Greencastle, Indiana, to Paris, Illinois, so he'd have been flying on a heading of just a little less than 270 degrees, or almost straight west. He was just east of Paris when he'd first seen the UFO, and since he said that he'd looked back and to his left, the spot where he saw the UFO would be right at a spot where the CAA man had seen his UFO disappear. Both observers had checked their watches with radio time just after the sightings, so there couldn't be more than a few seconds' discrepancy. All I could conclude was that both had seen the same UFO.

I checked the path of every balloon in the Midwest. I checked the weather - it was a clear, cloudless day; I had the two observers' back-grounds checked and I even checked for air traffic, although I knew the UFO wasn't an airplane. I researched the University of Dayton library for everything on daylight meteors, but this was no good. From the description the CAA employee gave, what he'd seen had been a clear-cut, distinct, flattened sphere, with no smoke trail, no sparks and no tail. A daylight meteor, so low as to be described as "a 50 cent piece held at arm's length," would have had a smoke trail, sparks, and would have made a roar that would have jolted the Sphinx. This one was quiet. Besides, no daylight meteor stops long enough to let an airplane turn into it. Conclusion: Unknown.

In a few days the data from the Long Beach Incident came in and I started to put it together. A weather balloon had been launched from the Long Beach Airport, and it was in the vicinity where the six F-86's had made their unsuccessful attempt to intercept a UFO. I plotted out the path of the balloon, the reported path of the UFO, and the flight paths of the F-86's. The paths of the balloon and the F-86's were accurate, I knew, because the balloon was being tracked by radio fixes and the F-86's had been tracked by radar. At only one point did the paths of the balloon, UFO, and F-86's coincide. When the first two F-86's made their initial visual contact with the UFO they were looking almost directly at the balloon. But from then on, even by altering the courses of the F-86's, I couldn't prove a thing.

In addition, the weather observers from Long Beach said that during the period that the intercept was taking place they had gone outside and

---

looked at their balloon; it was an exceptionally clear day and they could see it at unusually high altitudes. They didn't see any F-86's around it. And one stronger point, the balloon had burst about ten minutes before the F-86's lost sight of the UFO.

Lieutenant Metscher took over and, riding on his Fort Monmouth victory, tried to show how the pilots had seen the balloon. He got the same thing I did - nothing.

On October 27, 1951, the new Project Grudge was officially established. I'd written the necessary letters and had received the necessary endorsements. I'd estimated, itemized, and justified direct costs and manpower. I'd conferred, inferred, and referred, and now I had the money to operate. The next step was to pile up all this paper work as an aerial barrier, let the saucers crash into it, and fall just outside the door.

I was given a very flexible operating policy for Project Grudge because no one knew the best way to track down UFO's. I had only one restriction and that was that I wouldn't have my people spending time doing a lot of wild speculating. Our job would be to analyze each and every UFO report and try to find what we believed to be an honest, unbiased answer. If we could not identify the reported object as being a balloon, meteor, planet, or one of half a hundred other common things that are sometimes called UFO's, we would mark the folder "Unknown" and file it in a special file. At some later date, when we built up enough of these "Unknown" reports, we'd study them.

As long as I was chief of the UFO project, this was our basic rule. If anyone became anti flying saucer and was no longer capable of making an unbiased evaluation of a report, out he went. Conversely anyone who became a believer was through. We were too busy during the initial phases of the project to speculate as to whether the unknowns were spaceships, space monsters, Soviet weapons, or ethereal visions.

I had to let three people go for being too pro or too con.

By the latter part of November 1951 I knew most of what had taken place in prior UFO projects and what I expected to do. The people in Project Sign and the old Project Grudge had made many mistakes. I studied these mistakes and profited by them. I could see that my predecessors had had a rough job. Mine would be a little bit easier because of the pioneering they had done.

Lieutenant Metscher and I had sorted out all of the pre 1951 files, refiled them, studied them, and outlined the future course of the new Project Grudge.

When Lieut. Colonel Rosengarten and Lieutenant Cummings had been at the Pentagon briefing Major General Cabell on the Fort Monmouth

---

Incidents, the general had told them to report back when the new project was formed and ready to go. We were ready to go, but before taking my ideas to the Pentagon, I thought it might be wise to try them out on a few other people to get their reaction. Colonel Frank Dunn, then chief of ATIC, liked this idea. We had many well known scientists and engineers who periodically visited ATIC as consultants, and Colonel Dunn suggested that these people's opinions and comments would be valuable. For the next two weeks every visitor to ATIC who had a reputation as a scientist, engineer,

or scholar got a UFO briefing.

Unfortunately the names of these people cannot be revealed because I promised them complete anonymity. But the list reads like a page from Great Men of Science.

Altogether nine people visited the project during this trial period. Of the nine, two thought the Air Force was wasting its time, one could be called indifferent, and six were very enthusiastic over the project. This was a shock to me. I had expected reactions that ranged from an extremely cold absolute zero to a mild twenty below. Instead I found out that UFO's were being freely and seriously discussed in scientific circles. The majority of the visitors thought that the Air Force had goofed on previous projects and were very happy to find out that the project was being re-established. All of the visitors, even the two who thought we were wasting our time, had good suggestions on what to do. All of them offered their services at any future time when they might be needed. Several of these people became very good friends and valuable consultants later on.

About two weeks before Christmas, in 1951, Colonel Dunn and I went to the Pentagon to give my report. Major General John A. Samford had replaced Major General Cabell as Director of Intelligence, but General Samford must have been told about the UFO situation because he was familiar with the general aspects of the problem. He had appointed his Assistant for Production, Brigadier General W. M. Garland, to ride herd on the project for him.

Colonel Dunn briefly outlined to General Samford what we planned to do. He explained our basic policy, that of setting aside the unknowns and not speculating on them, and he told how the scientists visiting ATIC had liked the plans for the new Project Grudge.

There was some discussion about the Air Force's and ATIC's responsibility for the UFO reports. General Garland stated, and it was later confirmed in writing, that the Air Force was solely responsible for investigating and evaluating all UFO reports. Within the Air Force, ATIC was the responsible agency. This in turn meant that Project Grudge

---

was responsible for all UFO reports made by any branch of the military service. I started my briefing by telling General Samford and his staff about the present UFO situation.

The UFO reports had never stopped coming in since they had first started in June 1947. There was some correlation between publicity and the number of sightings, but it was not an established fact that reports came in only when the press was playing up UFO's. Just within the past few months the number of good reports had increased sharply and there had been no publicity.

UFO's we're seen more frequently around areas vital to the defense of the United States. The Los Alamos-Albuquerque area, Oak Ridge, and White Sands Proving Ground rated high. Port areas, Strategic Air Command bases, and industrial areas ranked next. UFO's had been reported from every state in the Union and from every foreign country. The U.S. did not have a monopoly.

The frequency of the UFO reports was interesting. Every July there was a sudden increase in the number of reports and July was always the peak month of the year. Just before Christmas there was usually a minor peak.

The Grudge Report had not been the solution to the UFO problem. It was true that a large percentage of the reports were due to the "misidentification of known objects"; people were seeing balloons, airplanes, planets, but this was not the final answer. There were a few hoaxes, hallucinations, publicity seekers, and fatigued pilots, but reports from these people constituted less than 1 per cent of the total. Left over was a residue of very good and very "unexplainable" UFO sightings that were

classified as unknown.

The quality of the reports was getting better, I told the officers; they contained more details that could be used for analysis and the details were more precise and accurate. But still they left much to be desired.

Every one of the nine scientists and engineers who had reviewed the UFO material at ATIC had made one strong point: we should give top priority to getting reasonably accurate measurements of the speed, altitude, and size of reported UFO's. This would serve two purposes. First, it would make it easy to sort out reports of common things, such as balloons, airplanes, etc. Second, and more important, if we could get even one fairly accurate measurement that showed that some object was traveling through the atmosphere at high speed, and that it wasn't a meteor, the UFO riddle would be much easier to solve.

I had worked out a plan to get some measured data, and I presented it to the group for their comments.

The New Project Grudge.117

I felt sure that before long the press would get wind of the Air Force's renewed effort to identify UFO's. When this happened, instead of being mysterious about the whole thing, we would freely admit the existence of the new project, explain the situation thoroughly and exactly as it was, and say that all UFO reports made to the Air Force would be given careful consideration. In this way we would encourage more people to report what they were seeing and we might get some good data.

To further explain my point, I drew a sketch on a blackboard. Suppose that a UFO is reported over a fair-sized city. Now we may get one or two reports, and these reports may be rather sketchy. This does us no good - all we can conclude is that somebody saw something that he couldn't identify. But suppose fifty people from all over the city report the UFO. Then it would be profitable for us to go out and talk to these people, find out the time they saw the UFO, and where they saw it (the direction and height above the horizon). Then we might be able to use these data, work out a triangulation problem, and get a fairly accurate measurement of speed, altitude, and size.

Radar, of course, will give an accurate measurement of speed and altitude, I pointed out, but radar is not infallible. There is always the problem of weather. To get accurate radar data on a UFO, it is always necessary to prove that it wasn't weather that was causing the target. Radar is valuable, and we wanted radar reports, I said, but they should be considered only as a parallel effort and shouldn't take the place of visual sightings.

In winding up my briefing, I again stressed the point that, as of the end of 1951 - the date of this briefing - there was no positive proof that any craft foreign to our knowledge existed. All recommendations for the reorganization of Project Grudge were based solely upon the fact that there were many incredible reports of UFO's from many very reliable people. But they were still just flying saucer reports and couldn't be considered scientific proof.

Everyone present at the meeting agreed - each had read or had been briefed on these incredible reports. In fact, two of the people present had seen UFO's.

Before the meeting adjourned, Colonel Dunn had one last question. He knew the answer, but he wanted it confirmed. "Does the United States have a secret weapon that is being reported as a UFO?"

The answer was a flat "No."

In a few days I was notified that my plan had been given the green light. I already had the plan

written up in the form of a staff study so I sent it through channels for formal approval.

118.The Report on Unidentified Flying Objects

It had been obvious right from the start of the reorganization of Project Grudge that there would be questions that no one on my staff was technically competent to answer. To have a fully staffed project, I'd need an astronomer, a physicist, a chemist, a mathematician, a psychologist, and probably a dozen other specialists. It was, of course, impossible to have all of these people on my staff, so I decided to do the next best thing. I would set up a contract with some research organization who already had such people on their staff; then I would call on them whenever their services were needed.

I soon found a place that was interested in such a contract, and the day after Christmas, Colonel S. H. Kirkland, of Colonel Dunn's staff, and I left Dayton for a two-day conference with these people to outline what we wanted. Their organization cannot be identified by name because they are doing other highly secret work for the government. I'll call them Project Bear.

Project Bear is a large, well known research organization in the Midwest. The several hundred engineers and scientists who make up their staff run from experts on soils to nuclear physicists. They would make these people available to me to assist Project Grudge on any problem that might arise from a UFO report. They did not have a staff astronomer or psychologist, but they agreed to get them for us on a subcontract basis. Besides providing experts in every field of science, they would make two studies for us; a study of how much a person can be expected to see and remember from a UFO sighting, and a statistical study of UFO reports. The end product of the study of the powers of observation of a UFO observer would be an interrogation form.

Ever since the Air Force had been in the UFO business, attempts had been made to construct a form that a person who had seen a UFO could fill out. Many types had been tried but all of them had major disadvantages. Project Bear, working with the psychology department of a university, would study all of the previous questionnaires, along with actual UFO reports, and try to come up with as near a perfect interrogation form as possible. The idea was to make the form simple and yet extract as much and as accurate data as possible from the observer.

The second study that Project Bear would undertake would be a statistical study of all UFO reports. Since 1947 the Air Force had collected about 650 reports, but if our plan to encourage UFO reports worked out the way we expected this number could increase tenfold. To handle this volume of reports, Project Bear said that they would set up a complete UFO file on IBM punch cards. Then if we wanted any bit of information from the files, it would be a matter of punching a few buttons on an

---

The New Project Grudge.119

IBM card sorting machine, and the files would be sorted electronically in a few seconds. Approximately a hundred items pertaining to a UFO report would be put on each card. These items included everything from the time the UFO was seen to its position in the sky and the observer's personality. The items punched on the cards would correspond to the items on the questionnaires that Project Bear was going to develop.

Besides giving us a rapid method of sorting data, this IBM file would give us a modus operandi file. Our MO file would be similar to the MO files used by police departments to file the methods of operations of a criminal. Thus when we received a report we could put the characteristics of the reported UFO on an IBM punch card, put it into the IBM machine, and compare it with the characteristics of other sightings that had known solutions. The answer might be that out of the one

hundred items on the card, ninety-five were identical to previous UFO reports that ducks were flying over a city at night reflecting the city's lights.

On the way home from the meeting Colonel Kirkland and I were both well satisfied with the assistance we believed Project Bear could give to Project Grudge.

In a few days I again left ATIC, this time for Air Defense Command Headquarters in Colorado Springs, Colorado. I wanted to find out how willing ADC was to help us and what they could do. When I arrived I got a thorough briefing on the operations of ADC and the promise that they would do anything they could to help solve the UFO riddle.

All of this co-operation was something that I hadn't expected. I'd been warned by the people who had worked on Project Sign and the old Project Grudge that everybody hated the word UFO - I'd have to fight for everything I asked for. But once again they were wrong. The scientists who visited ATIC, General Samford, Project Bear, and now Air Defense Command couldn't have been more co-operative. I was becoming aware that there was much wider concern about UFO reports than I'd ever realized before.

While I traveled around the United States getting the project set up, UFO reports continued to come in and all of them were good. One series of reports was especially good, and they came from a group of people who had had a great deal of experience watching things in the sky - the people who launch the big skyhook balloons for General Mills, Inc. The reports of what the General Mills people had seen while they were tracking their balloons covered a period of over a year. They had just sent them in because they had heard that Project Grudge was being reorganized and was taking a different view on UFO reports. They, like so many other reliable observers, had been disgusted with the previous

---

Air Force attitude toward UFO reports, and they had refused to send in any reports. I decided that these people might be a good source of information, and I wanted to get further details on their reports, so I got orders to go to Minneapolis. A scientist from Project Bear went with me. We arrived on January 14, 1952, in the middle of a cold wave and a blizzard.

The Aeronautical Division of General Mills, Inc., of Wheaties and Betty Crocker fame, had launched and tracked every skyhook balloon that had been launched prior to mid 1952. They knew what their balloons looked like under all lighting conditions and they also knew meteorology, aerodynamics, astronomy, and they knew UFO's. I talked to these people for the better part of a full day, and every time I tried to infer that there might be some natural explanation for the UFO's I just about found myself in a fresh snowdrift.

What made these people so sure that UFO's existed? In the first place, they had seen many of them. One man told me that one tracking crew had seen so many that the sight of a UFO no longer even especially interested them. And the things that they saw couldn't be explained.

For example: On January 16, 1951, two people from General Mills and four people from Artesia, New Mexico, were watching a skyhook balloon from the Artesia airport. They had been watching the balloon off and on for about an hour when one of the group saw two tiny specks on the horizon, off to the northwest. He pointed them out to the others because two airplanes were expected into the airport, and he thought that these might be the airplanes. But as they watched, the two specks began to move in fast, and within a few seconds the observers could see that "the airplanes" were actually two round, dull white objects flying in close formation. The two objects continued to come in and headed straight toward the balloon. When they reached the balloon they circled it once and flew off to the northwest, where they disappeared over the horizon. As the two UFO's circled the balloon, they tipped on edge and the observers saw that they were disk shaped.

When the two UFO's were near the balloon, the observers also had a chance to compare the size of the UFO's with the size of the balloon. If the UFO's were as close to the balloon as they appeared to be they would have been 60 feet in diameter.

After my visit to General Mills, Inc., I couldn't help remembering a magazine article I'd read about a year before. It said that there was not a single reliable UFO report that couldn't be attributed to a skyhook balloon.

I'd been back at ATIC only a few days when I found myself packing up

---

to leave again. This time it was for New York. A high priority wire had come into ATIC describing how a Navy pilot had chased a UFO over Mitchel AFB, on Long Island. It was a good report.

I remember the trip to New York because my train passed through Elizabeth, New Jersey, early in the morning, and I could see the fires caused by an American Airlines Convair that had crashed. This was the second of the three tragic Elizabeth, New Jersey, crashes.

The morning before, on January 21, a Navy pilot had taken off from Mitchel M. He was a lieute ant commander, had flown in World War II, and was now ar at the Navy Special Devices Cente on Long Island. At nine fifty he had c the traffic pattern and was at about 2,500 feet, circling aroun the airfield. southeast of the field when he first noticed an object below him and "about unway length off the end of Runway 30." The object looked like the top of a ute canopy, he told me; it was whit and he thought he could see the wedges or He said that he thought that it was moving across t he ground a little bit too fast to be drifting with wind, but he was sure that somebody had bailed out and that he was looking at the top of his parachute. He was just ready to call the tower when he suddenly realized that this "parachute" was drifting across the wind. He had just taken off from Runway 30 and knew which direction the wind was blowing.

As he watched, the object, whatever it was (by now he no longer thought that it was a parachute), began to gradually climb, so he started to climb, he said, staying above and off to the right of the object. When the UFO started to make a left turn, he followed and tried to cut inside, but he overshot and passed over it. It continued to turn and gain speed, so he dropped the nose of the TBM, put on more power, and pulled in behind the object, which was now level with him. In a matter of seconds the UFO made a 180 degree turn and started to make a big swing around the northern edge of Mitchel AFB. The pilot tried to follow, but the UFO had begun to accelerate rapidly, and since a TBM leaves much to be desired on the speed end, he was getting farther and farther behind. But he did try to follow it as long as he could. As he made a wide turn around the northern edge of the airfield he saw that the UFO was now turning south. He racked the TBM up into a tight left turn to follow, but in a few seconds the UFO had disappeared. When he last saw it, it had crossed the Long Island coast line near Freeport and it was heading out to sea.

When he finished his account of the chase, I asked the commander some specific questions about the UFO. He said that just after he'd

---

decided that the UFO was not a parachute it appeared to be at an altitude of about 200 to 300 feet over a residential section. From the time it took it to cover a city block, he'd estimated that it was traveling about 300 miles an hour. Even when he pulled in behind the object and got a good look, it still looked like a parachute canopy -- dome shaped --white -and it had a dark under surface. It had

been in sight two and a half minutes.

He had called the control tower at Mitchel during the chase, he told me, but only to ask if any balloons had been launched. He thought that he might be seeing a balloon. The tower had told him that there was a balloon in the area.

Then the commander took out an aeronautical chart and drew in his flight path and the apparent path of the UFO for me. I think that he drew it accurately because he had been continually watching landmarks as he'd chased the UFO and was very careful as he drew the sketches on the map.

I checked with the weather detachment at Mitchel and they said that they had released a balloon. They had released it at nine fifty and from a point southeast of the airfield. I got a plot of its path. Just as in the Long Beach Incident, where the six F-86's tried to intercept the UFO, the balloon was almost exactly in line with the spot where the UFO was first seen, but then any proof you might attempt falls apart. If the pilot knew where he was, and had plotted his flight path even semi accurately, he was never over the balloon. Yet he was over the UFO. He came within less than 2,000 feet of the UFO when he passed over it; yet he couldn't recognize it as a balloon even though he thought it might be a balloon since the tower had just told him that there was one in the area. He said that he followed the UFO around the north edge of the airfield. Yet the balloon, after it was launched southeast of the field, continued on a southeast course and never passed north of the airfield.

But the biggest argument against the object's being a balloon was the fact that the pilot pulled in behind it; it was directly off the nose of his airplane, and although he followed it for more than a minute, it pulled away from him. Once you line up an airplane on a balloon and go straight toward it you will catch it in a matter of seconds, even in the slowest airplane. There have been dogfights with UFO's where the UFO's turned out to be balloons, but the pilots always reported that the UFO "made a pass" at them. In other words, they rapidly caught up with the balloon and passed it. I questioned this pilot over and over on this one point, and he was positive that he had followed directly behind the UFO for over a minute and all the time it was pulling away from him.

This is one of the most typical UFO reports we had in our files. It is

---

typical because no matter how you argue there isn't any definite answer. If you want to argue that the pilot didn't know where he was during the chase - that he was 3 or 4 miles from where he thought he was - that he never did fly around the northern edge of the field and get in behind the UFO - then the UFO could have been a balloon.

But if you want to believe that the pilot knew where he was all during the chase, and he did have several thousand hours of flying time, then all you can conclude is that the UFO was an unknown.

I think the pilot summed up the situation very aptly when he told me, "I don't know what it was, but I've never seen anything like it before or since - maybe it was a spaceship."

I went back to Dayton stumped - maybe it was a spaceship.

CHAPTER TEN

Project Blue Book and the Big Build-Up

Just twenty minutes after midnight on January 22, 1952, nineteen and a half hours after the Navy lieutenant commander had chased the UFO near Mitchel AFB, another incident involving an airplane and something unknown was developing in Alaska. In contrast with the unusually balmy weather in New York, the temperature in Alaska that night, according to the detailed account of the incident we received at ATIC, was a miserable 47 degrees below zero. The action was unfolding at one of our northern-most radar outposts in Alaska. This outpost was similar to those you may have seen in pictures, a collection of low, sprawling buildings grouped around the observatory like domes that house the antennae of the most modern radar in the world. The entire collection of buildings and domes are one color, solid white, from the plastering of ice and snow. The picture that the outpost makes could be described as fascinating, something out of a Walt Disney fantasy - but talk to somebody who's been there - it's miserable.

At 0020, twenty minutes after midnight, an airman watching one of the outpost's radarscopes saw a target appear. It looked like an airplane because it showed up as a bright, distinct spot. But it was unusual because it was northeast of the radar site, and very few airplanes ever flew over

---

this area. Off to the northeast of the station there was nothing but ice, snow, and maybe a few Eskimos until you got to Russia. Occasionally a B-50 weather reconnaissance plane ventured into the area, but a quick check of the records showed that none was there on this night.

By the time the radar crew had gotten three good plots of the target, they all knew that it was something unusual - it was at 23,000 feet and traveling 1,500 miles an hour. The duty controller, an Air Force captain, was quickly called; he made a fast check of the targets that had now been put on the plotting board and called to a jet fighter interceptor base for a scramble.

The fighter base, located about 100 miles south of the radar site, acknowledged the captain's call and in a matter of minutes an F-94 jet was climbing out toward the north.

While the F-94 was heading north, the radar crew at the outpost watched the unidentified target. The bright dots that marked its path had moved straight across the radarscope, passing within about 50 miles of the site. It was still traveling about 1,500 miles an hour. The radar had also picked up the F-94 and was directing it toward its target when suddenly the unidentified target slowed down, stopped, and reversed its course. Now it was heading directly toward the radar station. When it was within about 30 miles of the station, the radar operator switched his set to a shorter range and lost both the F-94 and the unidentified target.

While the radar operator was trying to pick up the target again, the F-94 arrived in the area. The ground controller told the pilot that they had lost the target and asked him to cruise around the area to see if he and his radar operator could pick up anything on the F-94's radar. The pilot said he would but that he was having a little difficulty, was low on fuel, and would have to get back to his base soon. The ground controller acknowledged the pilot's message, and called back to the air base telling them to scramble a second F-94.

The first F-94 continued to search the area while the ground radar tried to pick up the target but neither could find it.

About this time the second F-94 was coming in, so the ground radar switched back to long range. In a minute they had both of the F-94's and the unidentified target on their scope. The ground controller called the second F-94 and began to vector him into the target.

The first F-94 returned to its base.

As both the second F-94 and the target approached the radar site, the operator again switched to short range and again he lost the jet and the target. He switched back to long range, but by now they were too close to the radar site and he couldn't pick up either one.

The pilot continued on toward where the unidentified target should have been. Suddenly the F-94 radar operator reported a weak target off to the right at 28,000 feet. They climbed into it but it faded before they could make contact.

The pilot swung the F-94 around for another pass, and this time the radar operator reported a strong return. As they closed in, the F-94's radar showed that the target was now almost stationary, just barely moving. The F-94 continued on, but the target seemed to make a sudden dive and they lost it. The pilot of the jet interceptor continued to search the area but couldn't find anything. As the F-94 moved away from the radar station, it was again picked up on the ground radar, but the unidentified target was gone.

A third F-94 had been scrambled, and in the meantime its crew took over the search. They flew around for about ten minutes without detecting any targets on their radar. They were making one last pass almost directly over the radar station when the radar operator in the back seat of the F-94 yelled over the interphone that he had a target on his scope. The pilot called ground radar, but by this time both the F-94 and the unidentified target were again too close to the radar station and they couldn't be picked up. The F-94 closed in until it was within 200 yards of the target; then the pilot pulled up, afraid he might collide with whatever was out in the night sky ahead of him. He made another pass, and another, but each time the bright spot on the radar operator's scope just stayed in one spot as if something were defiantly sitting out in front of the F-94 daring the pilot to close in. The pilot didn't take the dare. On each pass he broke off at 200 yards.

The F-94 crew made a fourth pass and got a weak return, but it was soon lost as the target seemed to speed away. Ground radar also got a brief return, but in a matter of seconds they too lost the target as it streaked out of range on a westerly heading.

As usual, the first thing I did when I read this report was to check the weather. But there was no weather report for this area that was detailed enough to tell whether a weather inversion could have caused the radar targets.

But I took the report over to Captain Roy James, anyway, in hopes that he might be able to find a clue that would identify the UFO.

Captain James was the chief of the radar section at ATIC. He and his people analyzed all our reports where radar picked up UFO's. Roy had been familiar with radar for many years, having set up one of the first stations in Florida during World War II, and later he took the first aircraft control and warning squadron to Saipan. Besides worrying about

---

keeping his radar operating, he had to worry about the Japs' shooting holes in his antennae.

Captain James decided that this Alaskan sighting I'd just shown him was caused by some kind of freak weather. He based his analysis on the fact that the unknown target had disappeared each time the ground radar had been switched to short range. This, he pointed out, is an indication that the radar was picking up some kind of a target that was caused by weather. The same weather that caused the ground radar to act up must have caused false targets on the F-94's radar too, he continued. After all, they had closed to within 200 yards of what they were supposedly picking up; it was a clear moonlight night, yet the crews of the F-94's hadn't seen a thing.

Taking a clue from the law profession, he quoted a precedent. About a year before over Oak Ridge, Tennessee, an F-82 interceptor had nearly flown into the ground three times as the pilot attempted to follow a target that his radar operator was picking up. There was a strong inversion that night, and although the target appeared as if it were flying in the air, it was actually a ground target.

Since Captain James was the chief of the radar section and he had said "Weather," weather was the official conclusion on the report. But reports of UFO's' being picked up on radar are controversial, and some of the people didn't agree with James's conclusion.

A month or two after we'd received the report, I was out in Colorado Springs at Air Defense Command Headquarters. I was eating lunch in the officers' club when I saw an officer from the radar operations section at ADC. He asked me to stop by his office when I had a spare minute, and I said that I would. He said that it was important.

It was the middle of the afternoon before I saw him and found out what he wanted. He had been in Alaska on TDY when the UFO had been picked up at the outpost radar site. In fact, he had made a trip to both the radar site and the interceptor base just two days after the sighting, and he had talked about the sighting with the people who had seen the UFO on the radar. He wanted to know what we thought about it.

When I told him that the sighting had been written off as weather, I remember that he got a funny look on his face and said, "Weather! What are you guys trying to pull, anyway?"

It was obvious that he didn't agree with our conclusion. I was interested in learning what this man thought because I knew that he was one of ADC's ace radar trouble shooters and that he traveled all over the world, on loan from ADC, to work out problems with radars.

"From the description of what the targets looked like on the radar-

---

scopes, good, strong, bright images, I can't believe that they were caused by weather," he told me.

Then he went on to back up his argument by pointing out that when the ground radar was switched to short range both the F-94 and the unknown target disappeared. If just the unknown target had disappeared, then it could have been weather. But since both disappeared, very probably the radar set wasn't working on short ranges for some reason. Next he pointed out that if there was a temperature inversion, which is highly unlikely in northern Alaska, the same inversion that would affect the ground radar wouldn't be present at 25,000 feet or above.

I told him about the report from Oak Ridge that Captain James had used as an example, but he didn't buy this comparison. At Oak Ridge, he pointed out, that F-82 was at only 4,000 feet. He didn't know how the F-94's could get to within 200 yards of an object without seeing it, unless the object was painted a dull black.

"No," he said, "I can't believe that those radar targets were caused by weather. I'd be much more inclined to believe that they were something real, something that we just don't know about."

During the early spring of 1952 reports of radar sightings increased rapidly. Most of them came from the Air Defense Command, but a few came from other agencies. One day, soon after the Alaskan Incident, I got a telephone call from the chief of one of the sections of a civilian experimental radar laboratory in New York State. The people in this lab were working on the development of the latest types of radar. Several times recently, while testing radars, they had detected unidentified targets. To quote my caller, "Some damn odd things are happening that are beginning to worry me." He went on to tell how the people in his lab had checked their radars, the weather, and everything else they could think of, but they could find absolutely nothing to account for the targets; they could only conclude that they were real. I promised him that his information would get to the right people if he'd put it in a letter and send it to ATIC. In about a week the letter arrived-hand-carried by no less than a general. The general, who was from Headquarters, Air Material Command, had been in New York at the radar laboratory, and he had heard about the UFO reports. He had personally checked into them because he knew that the people at the lab were some of the sharpest radar engineers in the world. When he found out that these people had already contacted us and had prepared a report for us, he offered to hand carry it to Wright-Patterson.

I can't divulge how high these targets were flying or how fast they were going because it would give an indication of the performance of

---

our latest radar, which is classified Secret. I can say, however, that they were flying mighty high and mighty fast.

I turned the letter over to ATIC's electronics branch, and they promised to take immediate action. They did, and really fouled it up. The person who received the report in the electronics branch was one of the old veterans of Projects Sign and Grudge. He knew all about UFO's. He got on the phone, called the radar lab, and told the chief (a man who possibly wrote all of the textbooks this person had used in college) all about how a weather inversion can cause false targets on weather. He was gracious enough to tell the chief of the radar lab to call if he had any more "trouble."

We never heard from them again. Maybe they found out what their targets were. Or maybe they joined ranks with the airline pilot who told me that if a flying saucer flew wing tip to wing tip formation with him, he'd never tell the Air Force.

In early February I made another trip to Air Defense Command Headquarters in Colorado Springs. This time it was to present a definite plan of how ADC could assist ATIC in getting better data on UFO's. I briefed General Benjamin W. Chidlaw, then the Commanding General of the Air Defense Command, and his staff, telling them about our plan. They agreed with it in principle and suggested that I work out the details with the Director of Intelligence for ADC, Brigadier General W. M. Burgess. General Burgess designated Major Verne Sadowski of his staff to be the ADC liaison officer with Project Grudge.

This briefing started a long period of close co-operation between Project Grudge and ADC, and it was a pleasure to work with these people. In all of my travels around the government, visiting and conferring with dozens of agencies, I never had the pleasure of working with or seeing a more smoothly operating and efficient organization than the Air Defense Command. General Chidlaw and General Burgess, along with the rest of the staff at ADC, were truly great officers. None of them were believers in flying saucers, but they recognized the fact that UFO reports were a problem that must be considered. With technological progress what it is today, you can't afford to have anything in the air that you can't identify, be it balloons, meteors, planets or flying saucers.

The plan that ADC agreed to was very simple. They agreed to issue a directive to all of their units explaining the UFO situation and telling specifically what to do in case one was detected. All radar units equipped with radarscope cameras would be required to take scope photos of targets that fell into the UFO category - targets that were not airplanes or known weather phenomena. These photos, along with a completed technical

---

questionnaire that would be made up at ATIC by Captain Roy James, would be forwarded to Project Grudge.

The Air Defense Command UFO directive would also clarify the scrambling of fighters to intercept a UFO. Since it is the policy of the Air Defense Command to establish the identity of any unidentified target, there were no special orders issued for scrambling fighters to try to identify reported UFO's. A UFO was something unknown and automatically called for a scramble. However, there had been some hesitancy on the part of controllers to send airplanes up whenever radar picked up a target that obviously was not an airplane. The directive merely pointed out to the controllers that it was within the scope of existing regulations to scramble on radar targets that were plotted as traveling too fast or too slow to be conventional airplanes. The decision to scramble fighters was still up to the individual controller, however, and scrambling on UFO's would be a second or third priority.

The Air Defense Command UFO directive did not mention shooting at a UFO. This question came up during our planning meeting at Colorado Springs, but, like the authority to scramble, the authority to shoot at anything in the air had been established long ago. Every ADC pilot knows the rules for engagement, the rules that tell him when he can shoot the loaded guns that he always carries. If anything in the air over the United States commits any act that is covered by the rules for engagement, the pilot has the authority to open fire.

The third thing that ADC would do would be to integrate the Ground Observer Corps into the UFO reporting net. As a second priority, the GOC would report UFO's - first priority would still be reporting aircraft.

Ever since the new Project Grudge had been organized, we hadn't had to deal with any large-scale publicity about UFO's. Occasionally someone would bring in a local item from some newspaper about a UFO sighting, but the sightings never rated more than an inch or two column space. But on February 19, 1952, the calm was broken by the story of how a huge ball of fire paced two B-29's in Korea. The story didn't start a rash of reports as the story of the first UFO sighting did in June 1947, but it was significant in that it started a slow build-up of publicity that was far to surpass anything in the past.

This Korean sighting also added to the growing official interest in Washington. Almost every day I was getting one or two telephone calls from some branch of the government, and I was going to Washington at least once every two weeks. I was beginning to spend as much time telling people what was going on as I was doing anything about it. The answer was to get somebody in the Directorate of Intelligence in the

---

Pentagon to act as a liaison officer. I could keep this person informed and he could handle the "branch office" in Washington. Colonel Dunn bought this idea, and Major Dewey J. Fournet got the additional duty of manager of the Pentagon branch. In the future all Pentagon inquiries went to Major Fournet, and if he couldn't answer them he would call me. The arrangement was excellent

because Major Fournet took a very serious interest in UFO's and could always be counted on to do a good job.

Sometime in February 1952 I had a visit from two Royal Canadian Air Force officers. For some time, I learned, Canada had been getting her share of UFO reports. One of the latest ones, and the one that prompted the visit by the RCAF officers, occurred at North Bay, Ontario, about 250 miles north of Buffalo, New York. On two occasions an orange red disk had been seen from a new jet fighter base in the area.

The Canadians wanted to know how we operated. I gave them the details of how we were currently operating and how we hoped to operate in the future, as soon as the procedures that were now in the planning stages could be put into operation. We agreed to try to set up channels so that we could exchange information and tie in the project they planned to establish with Project Grudge.

Our plans for continuing liaison didn't materialize, but through other RCAF intelligence officers I found out that their plans for an RCAF sponsored project failed. A quasi official UFO project was set up soon after this, however, and its objective was to use instruments to detect objects coming into the earth's atmosphere. In 1954 the project was closed down because during the two years of operation they hadn't officially detected any UFO's. My sources of information stressed the word "officially."

During the time that I was chief of the UFO project, the visitors who passed through my office closely resembled the international brigade. Most of the visits were unofficial in the sense that the officers came to ATIC on other business, but in many instances the other business was just an excuse to come out to Dayton to get filled in on the UFO story. Two RAF intelligence officers who were in the U.S. on a classified mission brought six single-spaced typed pages of questions they and their friends wanted answered. On many occasions Air Force intelligence officers who were stationed in England, France, and Germany, and who returned to the U.S. on business, took back stacks of unclassified flying saucer stories. One civilian intelligence agent who frequently traveled between the U.S. and Europe also acted as the unofficial courier for a German group - transporting hot newspaper and magazine articles about UFO's that I'd collected. In return I received the latest information on

---

European sightings - sightings that never were released and that we never received at ATIC through official channels.

Ever since the fateful day when Lieutenant Jerry Cummings dropped his horn rimmed glasses down on his nose, tipped his head forward, peered at Major General Cabell over his glasses and, acting not at all like a first lieutenant, said that the UFO investigation was all fouled up, Project Grudge had been gaining prestige. Lieutenant Colonel Rosengarten's promise that I'd be on the project for only a few months went the way of all military promises. By March 1952, Project Grudge was no longer just a project within a group; we had become a separate organization, with the formal title of the Aerial Phenomena Group. Soon after this step-up in the chain of command the project code name was changed to Blue Book. The word "Grudge" was no longer applicable. For those people who like to try to read a hidden meaning into a name, I'll say that the code name Blue Book was derived from the title given to college tests. Both the tests and the project had an abundance of equally confusing questions.

Project Blue Book had been made a separate group because of the steadily increasing number of reports we were receiving. The average had jumped from about ten a month to twenty a month since December 1951. In March of 1952 the reports slacked off a little, but April was a big month. In April we received ninety-nine reports.

On April 1, Colonel S. H. Kirkland and I went to Los Angeles on business. Before we left ATIC we had made arrangements to attend a meeting of the Civilian Saucer Investigators, a now defunct organization that was very active in 1952.

They turned out to be a well-meaning but Don Quixote-type group of individuals. As soon as they outlined their plans for attempting to solve the UFO riddle, it was obvious that they would fail. Project Blue Book had the entire Air Force, money, and enthusiasm behind it and we weren't getting any answers yet. All this group had was the enthusiasm.

The highlight of the evening wasn't the Civilian Saucer Investigators, however; it was getting a chance to read Ginna's UFO article in an advance copy of Life magazine that the organization had obtained - the article written from the material Bob Ginna had been researching for over a year. Colonel Kirkwood took one long look at the article, sidled up to me, and said, "We'd better get back to Dayton quick; you're going to be busy." The next morning at dawn I was sound asleep on a United Airlines DC-6, Dayton bound.

The Life article undoubtedly threw a harder punch at the American public than any other UFO article ever written. The title alone, "Have

---

We Visitors from Outer Space?" was enough. Other very reputable magazines, such as True, had said it before, but coming from Life, it was different. Life didn't say that the UFO's were from outer space; it just said maybe. But to back up this "maybe," it had quotes from some famous people. Dr. Walter Riedel, who played an important part in the development of the German V-2 missile and is presently the director of rocket engine research for North American Aviation Corporation, said he believed that the UFO's were from outer space. Dr. Maurice Biot, one of the world's leading aerodynamicists, backed him up.

But the most important thing about the Life article was the question in the minds of so many readers: "Why was it written?" Life doesn't go blasting off on flights of space fancy without a good reason. Some of the readers saw a clue in the author's comments that the hierarchy of the Air Force was now taking a serious look at UFO reports. "Did the Air Force prompt Life to write the article?" was the question that many people asked themselves.

When I arrived at Dayton, newspapermen were beating down the door. The official answer to the Life article was released through the Office of Public Information in the Pentagon: "The article is factual, but Life's conclusions are their own." In answer to any questions about the article's being Air Force inspired, my weasel worded answer was that we had furnished Life with some raw data on specific sightings.

My answer was purposely weasel worded because I knew that the Air Force had unofficially inspired the Life article. The "maybe they're interplanetary" with the "maybe" bordering on "they are" was the personal opinion of several very high-ranking officers in the Pentagon - so high that their personal opinion was almost policy. I knew the men and I knew that one of them, a general, had passed his opinions on to Bob Ginna.

Oddly enough, the Life article did not cause a flood of reports. The day after the article appeared we got nine sightings, which was unusual, but the next day they dropped off again.

The number of reports did take a sharp rise a few days later, however. The cause was the distribution of an order that completed the transformation of the UFO from a bastard son to the family heir. The piece of paper that made Project Blue Book legitimate was Air Force Letter 200-5, Subject: Unidentified Flying Objects. The letter, which was duly signed and sealed by the Secretary of the Air

Force, in essence stated that UFO's were not a joke, that the Air Force was making a serious study of the problem, and that Project Blue Book was responsible for the study. The letter stated that the commander of every Air Force

---

installation was responsible for forwarding all UFO reports to ATIC by wire, with a copy to the Pentagon. Then a more detailed report would be sent by airmail. Most important of all, it gave Project Blue Book the authority to directly contact any Air Force unit in the United States without going through any chain of command. This was almost unheard of in the Air Force and gave our project a lot of prestige.

The new reporting procedures established by the Air Force letter greatly aided our investigation because it allowed us to start investigating the better reports before they cooled off. But it also had its disadvantages. It authorized the sender to use whatever priority he thought the message warranted. Some things are slow in the military, but a priority message is not one of them. When it comes into the message center, it is delivered to the addressee immediately, and for some reason, all messages reporting UFO's seemed to arrive between midnight and 4:00 A.M. I was considered the addressee on all UFO reports. To complicate matters, the messages were usually classified and I would have to go out to the air base and personally sign for them.

One such message came in about 4:30 A.M. on May 8, 1952. It was from a CAA radio station in Jacksonville, Florida, and had been forwarded over the Flight Service teletype net. I received the usual telephone call from the teletype room at Wright-Patterson, I think I got dressed, and I went out and picked up the message. As I signed for it I remember the night man in the teletype room said, "This is a lulu, Captain."

It was a lulu. About one o'clock that morning a Pan-American airlines DC-4 was flying south toward Puerto Rico. A few hours after it had left New York City it was out over the Atlantic Ocean, about 600 miles off Jacksonville, Florida, flying at 8,000 feet. It was a pitch-black night; a high overcast even cut out the glow from the stars. The pilot and copilot were awake but really weren't concentrating on looking for other aircraft because they had just passed into the San Juan Oceanic Control Area and they had been advised by radio that there were no other air planes in the area. The copilot was turning around to look at number four engine when he noticed a light up ahead. It looked like the taillight of another airplane. He watched it closely for a few seconds since no other airplanes were supposed to be in the area. He glanced out at number four engine for a few seconds, looked back, and he saw that the light was in about the same position as when he'd first seen it. Then he looked down at the prop controls, synchronized the engines, and looked up again. In the few seconds that he had glanced away from the light, it had moved to the right so that it was now directly ahead of the DC-4, and it had increased in size. The copilot reached over and slapped the pilot

---

on the shoulder and pointed. Just at that instant the light began to get bigger and bigger until it was "ten times the size of a landing light of an airplane." It continued to close in and with a flash it streaked by the DC-4's left wing. Before the crew could react and say anything, two more smaller balls of fire flashed by. Both pilots later said that they sat in their seats for several seconds with sweat trickling down their backs.

It was one of these two pilots who later said, "Were you ever traveling along the highway about 70 miles an hour at night, have the car that you were meeting suddenly swerve over into your lane and then cut back so that you just miss it by inches? You know the sort of sick, empty feeling you get when it's all over? That's just the way we felt."

As soon as the crew recovered from the shock, the pilot picked up his mike, called Jacksonville Radio, and told them about the incident. Minutes later we had the report. The next afternoon Lieutenant Kerry Rothstien, who had replaced Lieutenant Metscher on the project, was on his way to New York to meet the pilots when they returned from Puerto Rico.

When Kerry talked to the two pilots, they couldn't add a great deal to their original story. Their final comment was the one we all had heard so many times, "I always thought these people who reported flying saucers were crazy, but now I don't know."

When Lieutenant Rothstien returned to Dayton he triple checked with the CAA for aircraft in the area - but there were none. Could there have been airplanes in the area that CAA didn't know about? The answer was almost a flat "No." No one would fly 600 miles off the coast without filing a flight plan; if he got into trouble or went down, the Coast Guard or Air Rescue Service would have no idea where to look.

Kerry was given the same negative answer when he checked on surface shipping.

The last possibility was that the UFO's were meteors, but several points in the pilots' story ruled these out. First, there was a solid overcast at about 18,000 feet. No meteor cruises along straight and level below 18,000 feet. Second, on only rare occasions have meteors been seen traveling three in trail. The chances of seeing such a phenomenon are well over one in a billion.

Some people have guessed that some kind of an atmospheric phenomenon can form a "wall of air" ahead of an airplane that will act as a mirror and that lights seen at night by pilots are nothing more than the reflection of the airplane's own lights. This could be true in some cases, but to have a reflection you must have a light to reflect. There

---

are no lights on an airplane that even approach being "ten times the size of a landing light."

What was it? I know a colonel who says it was the same thing that the two Eastern Airlines' pilots, Clarence Chiles and John Whitted, saw near Montgomery, Alabama, on July 24, 1948, and he thinks that Chiles and Whitted saw a spaceship.

Reports for the month of April set an all time high. These were all reports that came from military installations. In addition, we received possibly two hundred letters reporting UFO's, but we were so busy all we could do was file them for future reference.

In May 1952 I'd been out to George AFB in California investigating a series of sightings and was on my way home. I remember the flight to Dayton because the weather was bad all the way. I didn't want to miss my connecting flight in Chicago, or get grounded, because I had faithfully promised my wife that we would go out to dinner the night that I returned to Dayton. I'd called her from Los Angeles to tell her that I was coming in, and she had found a baby sitter and had dinner reservations. I hadn't been home more than about two days a week for the past three months, and she was looking forward to going out for the evening.

I reached Dayton about midmorning and went right out to the base. When I arrived at the office, my secretary was gone but there was a big note on my desk: "Call Colonel Dunn as soon as you get in."

I called Colonel Dunn; then I called my wife and told her to cancel the baby sitter, cancel the dinner reservations, and pack my other bag. I had to go to Washington.

While I'd been in California, Colonel Dunn had received a call from General Samford's office. It seems that a few nights before, one of the top people in the Central Intelligence Agency was having a lawn party at his home just outside Alexandria, Virginia. A number of notable personages were in attendance and they had seen a flying saucer. The report had been passed down to Air Force intelligence, and due to the quality of the brass involved, it was "suggested" that I get to Washington on the double and talk to the host of the party. I was at his office before 5:00 P.M. and got his report.

About ten o'clock in the evening he and two other people were standing near the edge of his yard talking; he happened to be facing south, looking off across the countryside. He digressed a bit from his story to explain that his home is on a hilltop in the country, and when looking south, he had a view of the entire countryside. While he was talking to the two other people he noticed a light approaching from the west. He had assumed it was an airplane and had casually watched it, but

---

when the light got fairly close, the CIA man said that he suddenly realized there wasn't any sound associated with it. If it were an airplane it would have been close enough for him to hear even above the hum of the guests' conversations. He had actually quit talking and was looking at the light when it stopped for an instant and began to climb almost vertically. He said something to the other guests, and they looked up just in time to see the light finish its climb, stop, and level out. They all watched it travel level for a few seconds, then go into a nearly vertical dive, level out, and streak off to the east.

Most everyone at the party had seen the light before it disappeared, and within minutes several friendly arguments as to what it was had developed, I was told. One person thought it was a lighted balloon, and a retired general thought it was an airplane. To settle the arguments, they had made a few telephone calls. I might add that these people were such that the mention of their names on a telephone got quick results. Radar in the Washington area said that there had been no airplanes flying west to east south of Alexandria in the past hour. The weather station at Bolling AFB said that there were no balloons in the area, but as a double check the weather people looked at their records of high altitude winds. It couldn't have been a balloon because none of the winds up to 65,000 feet were blowing from west to east - and to be able to see a light on a balloon, it has to be well below 65,000 feet; the man from CIA told me that they had even considered the possibility that the UFO was a meteor and that the "jump" had been due to some kind of an atmospheric distortion. But the light had been in sight too long to be a meteor. He added that an army chaplain and two teetotaler guests had also seen the light jump.

There wasn't much left for me to do when I finished talking to the man. He and his guests had already made all of the checks that I'd have made. All I could do was go back to Dayton, write up his report, and stamp it "Unknown."

Back in March, when it had become apparent that the press was reviving its interest in UFO's, I had suggested that Project Blue Book subscribe to a newspaper clipping. Such a service could provide several things. First, it would show us exactly how much publicity the UFO's were getting and what was being said, and it would give us the feel of the situation. Then it would also provide a lot of data for our files. In many cases the newspapers got reports that didn't go to the Air Force. Newspaper reporters rival any intelligence officer when it comes to digging up facts, and there was always the possibility that they would uncover and print something we'd missed. This was especially true in the few

---

cases of hoaxes that always accompany UFO publicity. Last, it would provide us with material on

which to base a study of the effect of newspaper publicity upon the number and type of UFO reports.

Colonel Dunn liked the idea of the clipping service, and it went into effect soon after the first publicity had appeared. Every three or four days we would get an envelope full of clippings. In March the clipping service was sending the clippings to us in letter sized envelopes. The envelopes were thin - maybe there would be a dozen or so clippings in each one. Then they began to get thicker and thicker, until the people who were doing the clipping switched to using manila envelopes. Then the manila envelopes began to get thicker and thicker. By May we were up to old shoe boxes. The majority of the newspaper stories in the shoe boxes were based on material that had come from ATIC.

All of these inquiries from the press were adding to Blue Book's work load and to my problems. Normally a military unit such as ATIC has its own public information officer, but we had none so I was it. I was being quoted quite freely in the press and was repeatedly being snarled at by someone in the Pentagon. It was almost a daily occurrence to have people from the "puzzle palace" call and indignantly ask, "Why did you tell them that?" They usually referred to some bit of information that somebody didn't think should have been released. I finally gave up and complained to Colonel Dunn. I suggested that any contacts with the press be made through the Office of Public Information in the Pentagon. These people were trained and paid to do this job; I wasn't. Colonel Dunn heartily agreed because every time I got chewed out he at least got a dirty look.

Colonel Dunn called General Samford's office and they brought in General Sory Smith of the Department of Defense, Office of Public Information. General Smith appointed a civilian on the Air Force Press Desk, Al Chop, to handle all inquiries from the press. The plan was that Al would try to get his answers from Major Dewey Fournet, Blue Book's liaison officer in the Pentagon, and if Dewey didn't have the answer, Al had permission to call me.

This arrangement worked out fine because Al Chop had been through previous UFO publicity battles when he was in the Office of Public Information at Wright Field.

The interest in the UFO's that was shown by the press in May was surpassed only by the interest of the Pentagon. Starting in May, I gave on the average of one briefing in Washington every two weeks, and there was always a full house. From the tone of the official comments to the public about UFO's, it would indicate that there wasn't a great deal of

---

interest, but nothing could be further from the truth. People say a lot of things behind a door bearing a sign that reads "Secret Briefing in Progress."

After one of the briefings a colonel (who is now a brigadier general) presented a plan that called for using several flights of F-94C jet interceptors for the specific purpose of trying to get some good photographs of UFO's. The flight that he proposed would be an operational unit with six aircraft - two would be on constant alert. The F-94C's, then the hottest operational jet we had, would be stripped of all combat gear to give them peak performance, and they would carry a special camera in the nose. The squadrons would be located at places in the United States where UFO's were most frequently seen.

The plan progressed to the point of estimating how soon enough airplanes for two flights could be stripped, how soon special cameras could be built, and whether or not two specific Air Force bases in the U.S. could support the units.

Finally the colonel's plan was shelved, but not because he was considered to be crazy. After considerable study and debate at high command level, it was decided that twelve F-94C's couldn't be

spared for the job and it would have been ineffective to use fewer airplanes.

The consideration that the colonel's plan received was an indication of how some of the military people felt about the importance of finding out exactly what the UFO's really were. And in the discussions the words "interplanetary craft" came up more than once.

Requests for briefings came even from the highest figure in the Air Force, Thomas K. Finletter, then the Secretary for Air. On May 8, 1952, Lieutenant Colonel R. J. Taylor of Colonel Dunn's staff and I presented an hour-long briefing to Secretary Finletter and his staff. He listened intently and asked several questions about specific sightings when the briefing was finished. If he was at all worried about the UFO's he certainly didn't show it. His only comment was, "You're doing a fine job, Captain. It must be interesting. Thank you."

Then he made the following statement for the press:

"No concrete evidence has yet reached us either to prove or disprove the existence of the so-called flying saucers. There remain, however, a number of sightings that the Air Force investigators have been unable to explain. As long as this is true, the Air Force will continue to study flying saucer reports."

In May 1952, Project Blue Book received seventy-nine UFO reports compared to ninety-nine in April. It looked as if we'd passed the peak and were now on the downhill side. The 178 reports of the past two

---

months, not counting the thousand or so letters that we'd received directly from the public, had piled up a sizable backlog since we'd had time to investigate and analyze only the better reports. During June we planned to clear out the backlog, and then we could relax.

But never underestimate the power of a UFO. In June the big flap hit - they began to deliver clippings in big cardboard cartons.

Chapter 11: The Big Flap, Page 139

CHAPTER ELEVEN

The Big Flap

In early June 1952, Project Blue Book was operating according to the operational plan that had been set up in January 1952. It had taken six months to put the plan into effect, and to a person who has never been indoctrinated into the ways of the military, this may seem like a long time. But consult your nearest government worker and you'll find that it was about par for the red tape course.

We had learned early in the project that about 60 per cent of the reported UFO's were actually balloons, airplanes, or astronomical bodies viewed under unusual conditions, so our operational plan was set up to quickly weed out this type of report. This would give us more time to concentrate on the unknown cases.

To weed out reports in which balloons, airplanes, and astronomical bodies were reported as UFO's, we utilized a flow of data that continually poured into Project Blue Book. We received position reports on all flights of the big skyhook balloons and, by merely picking up the telephone, we could get the details about the flight of any other research balloon or regularly scheduled weather balloon in the United States. The location of aircraft in an area where a UFO had been reported was usually checked by the intelligence officer who made the report, but we double checked his findings by requesting the location of flights from CAA and military air bases. Astronomical almanacs and journals, star charts, and data that we got from observatories furnished us with clues to UFO's that might be astronomical bodies. All of our investigations in this category of report were double checked by Project Bear's astronomer.

Then we had our newspaper clipping file, which gave us many clues. Hydrographic bulletins and Notams (notices to airmen), published by

---

the government, sometimes gave us other clues. Every six hours we received a complete set of weather data. A dozen or more other sources of data that might shed some light on a reported UFO were continually being studied.

To get all this information on balloons, aircraft, astronomical bodies, and what have you, I had to co-ordinate Project Blue Book's operational plan with the Air Force's Air Weather Service, Flight Service, Research and Development Command, and Air Defense Command with the Navy's Office of Naval Research, and the aerology branch of the Bureau of Aeronautics; and with the Civil Aeronautics Administration, Bureau of Standards, several astronomical observatories, and our own Project Bear. Our entire operational plan was similar to a Model A Ford I had while I was in high school - just about the time you would get one part working, another part would break down.

When a report came through our screening process and still had the "Unknown" tag on it, it went to the MO file, where we checked its characteristics against other reports. For example, on May 25 we had a report from Randolph AFB, Texas. It went through the screening process and came out "Unknown"; it wasn't a balloon, airplane, or astronomical body. So then it went to the MO file. It was a flock of ducks reflecting the city lights. We knew that the Texas UFO's were ducks because our MO file showed that we had an identical report from Moorhead, Minnesota, and the UFO's at Moorhead were ducks.

Radar reports that came into Blue Book went to the radar specialists of ATIC's electronics branch.

Sifting through reams of data in search of the answers to the many reports that were pouring in each

week required many hours of overtime work, but when a report came out with the final conclusion, "Unknown," we were sure that it was unknown.

To operate Project Blue Book, I had four officers, two airmen, and two civilians on my permanent staff. In addition, there were three scientists employed full time on Project Bear, along with several others who worked part time. In the Pentagon, Major Fournet, who had taken on the Blue Book liaison job as an extra duty, was now spending full time on it. If you add to this the number of intelligence officers all over the world who were making preliminary investigations and interviewing UFO observers, Project Blue Book was a sizable effort.

Only the best reports we received could be personally investigated in the field by Project Blue Book personnel. The vast majority of the reports had to be evaluated on the basis of what the intelligence officer who had written the report had been able to uncover, or what data we

---

could get by telephone or by mailing out a questionnaire. Our instructions for "what to do before the Blue Book man arrives," which had been printed in many service publications, were beginning to pay off and the reports were continually getting more detailed.

The questionnaire we were using in June 1952 was the one that had recently been developed by Project Bear. Project Bear, along with psychologists from a Midwestern university, had worked on it for five months. Many test models had been tried before it reached its final form - the standard questionnaire that Blue Book is using today.

It ran eight pages and had sixty eight questions which were booby- trapped in a couple of places to give us a cross check on the reliability of the reporter as an observer. We received quite a few questionnaires answered in such a way that it was obvious that the observer was drawing heavily on his imagination.

From this standard questionnaire the project worked up two more specialized types. One dealt with radar sightings of UFO's, the other with sightings made from airplanes.

In Air Force terminology a "flap" is a condition, or situation, or state of being of a group of people characterized by an advanced degree of confusion that has not quite yet reached panic proportions. It can be brought on by any number of things, including the unexpected visit of an inspecting general, a major administrative reorganization, the arrival of a hot piece of intelligence information, or the dramatic entrance of a well stacked female into an officers' club bar.

In early June 1952 the Air Force was unknowingly in the initial stages of a flap - a flying saucer flap - the flying saucer flap of 1952. The situation had never been duplicated before, and it hasn't been duplicated since. All records for the number of UFO reports were not just broken, they were disintegrated. In 1948, 167 UFO reports had come into ATIC; this was considered a big year. In June 1952 we received 149. During the four years the Air Force had been in the UFO business, 615 reports had been collected. During the "Big Flap" our incoming message log showed 717 reports.

To anyone who had anything to do with flying saucers, the summer of 1952 was just one big swirl of UFO reports, hurried trips, midnight telephone calls, reports to the Pentagon, press interviews, and very little sleep.

If you can pin down a date that the Big Flap started, it would probably be about June 1.

It was also on June 1 that we received a good report of a UFO that had been picked up on radar. June 1 was a Sunday, but I'd been at the

142.The Report on Unidentified Flying Objects

office all day getting ready to go to Los Alamos the next day. About 5:00 P.M. the telephone rang and the operator told me that I had a long- distance call from California. My caller was the chief of a radar test section for Hughes Aircraft Company in Los Angeles, and he was very excited about a UFO he had to report.

That morning he and his test crew had been checking out a new late- model radar to get it ready for some tests they planned to run early Monday morning. To see if their set was functioning properly, they had been tracking jets in the Los Angeles area. About midmorning, the Hughes test engineer told me, the jet traffic had begun to drop off, and they were about ready to close down their operation when one of the crew picked up a slow moving target coming across the San Gabriel Mountains north of Los Angeles. He tracked the target for a few minutes and, from the speed and altitude, decided that it was a DC-3. It was at 11,000 feet and traveling about 180 miles an hour toward Santa Monica. The operator was about ready to yell at the other crew members to shut off the set when he noticed something mighty odd - there was a big gap between the last and the rest of the regularly spaced bright spots on the radarscope. The man on the scope called the rest of the crew in because DC-3's just don't triple their speed. They watched the target as it made a turn and started to climb over Los Angeles. They plotted one, two, three, and then four points during the target's climb; then one of the crew grabbed a slide rule. Whatever it was, it was climbing 35,000 feet per minute and traveling about 550 miles an hour in the process. Then as they watched the scope, the target leveled out for a few seconds, went into a high speed dive, and again leveled out at 55,000 feet. When they lost the target, it was heading southeast somewhere near Riverside, California.

During the sighting my caller told me that when the UFO was only about ten miles from the radar site two of the crew had gone outside but they couldn't see anything. But, he explained, even the high flying jets that they had been tracking hadn't been leaving vapor trails.

The first thing I asked when the Hughes test engineer finished his story was if the radar set had been working properly. He said that as soon as the UFO had left the scope they had run every possible check on the radar and it was O.K.

I was just about to ask my caller if the target might not have been some experimental airplane from Edwards AFB when he second guessed me. He said that after sitting around looking at each other for about a minute, someone suggested that they call Edwards. They did, and Edwards' flight operations told them that they had nothing in the area.

The Big Flap.143

I asked him about the weather. The target didn't look like a weather target was the answer, but just to be sure, the test crew had checked. One of his men was an electronics/weather specialist whom he had hired because of his knowledge of the idiosyncrasies of radar under certain weather conditions. This man had looked into the weather angle. He had gotten the latest weather data and checked it, but there wasn't the slightest indication of an inversion or any other weather that would cause a false target.

Just before I hung up I asked the man what he thought he and his crew had picked up, and once again I got the same old answer: "Yesterday at this time any of us would have argued for hours that flying saucers were a bunch of nonsense but now, regardless of what you'll say about what we saw, it was something damned real."

I thanked the man for calling and hung up. We couldn't make any more of an analysis of this report

than had already been made, it was another unknown.

I went over to the MO file and pulled out the stack of cards behind the tab "High Speed Climb." There must have been at least a hundred cards, each one representing a UFO report in which the reported object made a high speed climb. But this was the first time radar had tracked a UFO during a climb.

During the early part of June, Project Blue Book took another jump up on the organizational chart. A year before the UFO project had consisted of one officer. It had risen from the one man operation to a project within a group, then to a group, and now it was a section. Neither Project Sign nor the old Project Grudge had been higher than the project-within-a-group level. The chief of a group normally calls for a lieutenant colonel, and since I was just a captain this caused some consternation in the ranks. There was some talk about putting Lieutenant Colonel Ray Taylor of Colonel Dunn's staff in charge. Colonel Taylor was very much interested in UFO's; he had handled some of the press contacts prior to turning this function over to the Pentagon and had gone along with me on briefings, so he knew something about the project. But in the end Colonel Donald Bower, who was my division chief. decided rank be damned, and I stayed on as chief of Project Blue Book.

The location within the organizational chart is always indicative of the importance placed on a project. In June 1952 the Air Force was taking the UFO problem seriously. One of the reasons was that there were a lot of good UFO reports coming in from Korea. Fighter pilots reported seeing silver colored spheres or disks on several occasions, and radar in Japan, Okinawa, and in Korea had tracked unidentified targets.

144.The Report on Unidentified Flying Objects

In June our situation map, on which we kept a plot of all of our sightings, began to show an ever so slight trend toward reports beginning to bunch up on the east coast. We discussed this build-up, but we couldn't seem to find any explainable reason for it so we decided that we'd better pay special attention to reports coming from the eastern states.

I had this build-up of reports in mind one Sunday night, June 15 to be exact, when the OD at ATIC called me at home and said that we were getting a lot of reports from Virginia. Each report by itself wasn't too good, the OD told me, but together they seemed to mean something. He suggested that I come out and take a look at them - so I did.

Individually they weren't too good, but when I lined them up chronologically and plotted them on a map they took the form of a hot report.

At 3:40 P.M. a woman at Unionville, Virginia, had reported a "very shiny object" at high altitude.

At 4:20 P.M. the operators of the CAA radio facility at Gordonsville, Virginia, had reported that they saw a "round, shiny object." It was southeast of their station, or directly south of Unionville.

At 4:25 P.M. the crew of an airliner northwest of Richmond, Virginia, reported a "silver sphere at eleven o'clock high."

At 4:43 P.M. a Marine pilot in a jet tried to intercept a "round shiny sphere" south of Gordonsville.

At 5:43 P.M. an Air Force T-33 jet tried to intercept a "shiny sphere" south of Gordonsvllle. He got above 35,000 feet and the UFO was still far above him.

At 7:35 P.M. many people in Blackstone, Virginia, about 80 miles south of Gordonsville, reported it. It was a "round, shiny object with a golden glow" moving from north to south. By this time radio

commentators in central Virginia were giving a running account of the UFO's progress.

At 7:59 P.M. the people in the CAA radio facility at Blackstone saw it.

At 8:00 P.M. jets arrived from Langley AFB to attempt to intercept it, but at 8:05 P.M. it disappeared.

This was a good report because it was the first time we ever received a series of reports on the same object, and there was no doubt that all these people had reported the same object. Whatever it was, it wasn't moving too fast, because it had traveled only about 90 miles in four hours and twenty five minutes. I was about ready to give up until morning and go home when my wife called. The local Associated Press man had called our home and she assumed that it was about this sighting. She had just said that I was out so he might not call the base. I decided that I'd better keep working so I'd have the answer in time to keep the

---

story out of the papers. A report like this could cause some excitement. The UFO obviously wasn't a planet because it was moving from north to south, and it was too slow to be an airplane. I called the balloon- plotting center at Lowry AFB, where the tracks of the big skyhook balloons are plotted, but the only big balloons in the air were in the western United States, and they were all accounted for.

It might have been a weather balloon. The wind charts showed that the high altitude winds were blowing in different directions at different altitudes above 35,000 feet, so there was no one flow of air that could have brought a balloon in from a certain area, and I knew that the UFO had to be higher than 35,000 feet because the T-33 jet had been this high and the UFO was still above it. The only thing to do was to check with all of the weather stations in the area. I called Richmond, Roanoke, several places in the vicinity of Washington, D.C., and four or five other weather stations, but all of their balloons were accounted for and none had been anywhere close to the central part of Virginia.

A balloon can travel only so far, so there was no sense in checking stations too far away from where the people had seen the UFO, but I took a chance and called Norfolk; Charleston, West Virginia; Altoona, Pennsylvania; and other stations within a 150 mile radius of Gordonsville and Blackstone. Nothing.

I still thought it might be a balloon, so I started to call more stations. At Pittsburgh I hit a lead. Their radiosonde balloon had gone up to about 60,000 feet and evidently had sprung a slow leak because it had leveled off at that altitude. Normally balloons go up till they burst at 80,000 or 90,000 feet. The weather forecaster at Pittsburgh said that their records showed they had lost contact with the balloon when it was about 60 miles southeast of their station. He said that the winds at 60,000 feet were constant, so it shouldn't be too difficult to figure out where the balloon went after they had lost it. Things must be dull in Pittsburgh at 2:00 A.M. on Monday mornings, because he offered to plot the course that the balloon probably took and call me back.

In about twenty minutes I got my call. It probably was their balloon, the forecaster said. Above 50,000 feet there was a strong flow of air southeast from Pittsburgh, and this fed into a stronger southerly flow that was paralleling the Atlantic coast just east of the Appalachian Mountains. The balloon would have floated along in this flow of air like a log floating down a river. As close as he could estimate, he said, the balloon would arrive in the Gordonsville-Blackstone area in the late afternoon or early evening. This was just about the time the UFO had arrived.

"Probably a balloon" was a good enough answer for me.

The next morning at 8:00 A.M., Al Chop called from the Pentagon to tell me that people were crawling all over his desk wanting to know about a sighting in Virginia.

The reports continued to come in. At Walnut Lake, Michigan, a group of people with binoculars watched a "soft white light" go back and forth across the western sky for nearly an hour. A UFO "paced" an Air Force B-25 for thirty minutes in California. Both of these happened on June 18, and although we checked and rechecked them, they came out as unknowns.

On June 19 radar at Goose AFB in Newfoundland picked up some odd targets. The targets came across the scope, suddenly enlarged, and then became smaller again. One unofficial comment was that the object was flat or disk shaped, and that the radar target had gotten bigger because the disk had banked in flight to present a greater reflecting surface. ATIC's official comment was weather.

Goose AFB was famous for unusual reports. In early UFO history someone had taken a very unusual colored photo of a "split cloud." The photographer had seen a huge ball of fire streak down through the sky and pass through a high layer of stratus clouds. As the fireball passed through the cloud it cut out a perfect swath. The conclusion was that the fireball was a meteor, but the case is still one of the most interesting in the file because of the photograph.

Then in early 1952 there was another good report from this area. It was an unknown.

The incident started when the pilot of an Air Force C-54 transport radioed Goose AFB and said that at 10:42 P.M. a large fireball had buzzed his airplane. It had come in from behind the C-54, and nobody had seen it until it was just off the left wing. The fireball was so big that the pilot said it looked as if it was only a few hundred feet away. The C-54 was 200 miles southwest, coming into Goose AFB from Westover AFB, Massachusetts, when the incident occurred. The base officer-of-the-day, who was also a pilot, happened to be in the flight operations office at Goose when the message came in and he overheard the report. He stepped outside, walked over to his command car, and told his driver about the radio message, so the driver got out and both of them looked toward the south. They searched the horizon for a few seconds; then suddenly they saw a light closing in from the southwest. Within a second, it was near the airfield. It had increased in size till it was as big as a "golf ball at arm's length," and it looked like a big ball of fire. It was so low that both the OD and his driver dove under

---

the command car because they were sure it was going to hit the airfield. When they turned and looked up they saw the fireball make a 90 degree turn over the airfield and disappear into the northwest. The time was 10:47 P.M.

The control tower operators saw the fireball too, but didn't agree with the OD and his driver on how low it was. They did think that it had made a 90 degree turn and they didn't think that it was a meteor. In the years they'd been in towers they'd seen hundreds of meteors, but they'd never seen anything like this, they reported.

And reports continued to pour into Project Blue Book. It was now not uncommon to get ten or eleven wires in one day. If the letters reporting UFO sightings were counted, the total would rise to twenty or thirty a day. The majority of the reports that came in by wire could be classified as being good. They were reports made by reliable people and they were full of details. Some were reports of balloons, airplanes, etc., but the percentage of unknowns hovered right around 22 per cent.

To describe and analyze each report, or even the unknowns, would require a book the size of an unabridged dictionary, so I am covering only the best and most representative cases.

One day in mid June, Colonel Dunn called me. He was leaving for Washington and he wanted me to come in the next day to give a briefing at a meeting. By this time I was taking these briefings as a matter of course. We usually gave the briefings to General Garland and a general from the Research and Development Board, who passed the information on to General Samford, the Director of Intelligence. But this time General Samford, some of the members of his staff, two Navy captains from the Office of Naval Intelligence, and some people I can't name were at the briefing.

When I arrived in Washington, Major Fournet told me that the purpose of the meetings, and my briefing, was to try to find out if there was any significance to the almost alarming increase in UFO reports over the past few weeks.

By the time that everyone had finished signing into the briefing room in the restricted area of the fourth floor "B" ring of the Pentagon, it was about 9:15 A.M. I started my briefing as soon as everyone was seated.

I reviewed the last month's UFO activities; then I briefly went over the more outstanding "Unknown" UFO reports and pointed out how they were increasing in number - breaking all previous records. I also pointed out that even though the UFO subject was getting a lot of publicity, it wasn't the scare type publicity that had accompanied the earlier flaps - in fact, much of the present publicity was anti saucer.

Then I went on to say that even though the reports we were getting were detailed and contained a great deal of good data, we still had no proof the UFO's were anything real. We could, I said, prove that all UFO reports were merely the misinterpretation of known objects if we made a few assumptions.

At this point one of the colonels on General Samford's staff stopped me. "Isn't it true," he asked, "that if you make a few positive assumptions instead of negative assumptions you can just as easily prove that the UFO's are interplanetary spaceships? Why, when you have to make an assumption to get an answer to a report, do you always pick the assumption that proves the UFO's don't exist?"

You could almost hear the colonel add, "O.K., so now I've said it."

For several months the belief that Project Blue Book was taking a negative attitude and the fact that the UFO's could be interplanetary spaceships had been growing in the Pentagon, but these ideas were usually discussed only in the privacy of offices with doors that would close tight.

No one said anything, so the colonel who had broken the ice plunged in. He used the sighting from Goose AFB, where the fireball had buzzed the C-54 and sent the OD and his driver belly whopping under the command car as an example. The colonel pointed out that even though we had labeled the report "Unknown" it wasn't accepted as proof. He wanted to know why.

I said that our philosophy was that the fireball could have been two meteors: one that buzzed the C-54 and another that streaked across the airfield at Goose AFB. Granted a meteor doesn't come within feet of an airplane or make a 90 degree turn, but these could have been optical illusions of some kind. The crew of the C-54, the OD, his driver, and the tower operators didn't recognize the UFO's as meteors because they were used to seeing the normal "shooting stars" that are most commonly seen.

But the colonel had some more questions. "What are the chances of having two extremely

spectacular meteors in the same area, traveling the same direction, only five minutes apart?"

I didn't know the exact mathematical probability, but it was rather small, I had to admit.

Then he asked, "What kind of an optical illusion would cause a meteor to appear to make a 90 degree turn?"

I had asked our Project Bear astronomer this same question, and he couldn't answer it either. So the only answer I could give the colonel was, "I don't know."

The Big Flap.149

I felt as if I were on a witness stand being cross-examined, and that is exactly where I was, because the colonel cut loose.

"Why not assume a point that is more easily proved?" he asked. "Why not assume that the C-54 crew, the OD, his driver, and the tower operators did know what they were talking about? Maybe they had seen spectacular meteors during the hundreds of hours that they had flown at night and the many nights that they had been on duty in the tower. Maybe the ball of fire had made a 90 degree turn. Maybe it was some kind of an intelligently controlled craft that had streaked northeast across the Gulf of St. Lawrence and Quebec Province at 2,400 miles an hour.

"Why not just simply believe that most people know what they saw?" the colonel said with no small amount of sarcasm in his voice.

This last comment started a lively discussion, and I was able to retreat. The colonel had been right in a sense - we were being conservative, but maybe this was the right way to be. In any scientific investigation you always assume that you don't have enough proof until you get a positive answer. I don't think that we had a positive answer - yet.

The colonel's comments split the group, and a hot exchange of ideas, pros and cons, and insinuations that some people were imitating ostriches to keep from facing the truth followed.

The outcome of the meeting was a directive to take further steps to obtain e identification of the UF 's. Our original idea of attempting to get several te reports from one sighting so we could use tri angulation to measure speed, altitude, and size wasn't working out. We had given the idea enough publicity, but reports where triangulation could be used were few and far between. Mr. or Mrs. Average Citizen just doesn't look up at the sky unless he or she sees a flash of light or hears a sound. Then even if he or she does look up and sees a UFO, it is very seldom that the report ever gets to Project Blue Book. I think that it would be safe to say that Blue Book only heard about 10 per cent of the UFO's that were seen in the United States.

After the meeting I went back to ATIC, and the next day Colonel Don Bower and I left for the west coast to talk to some people about how to get better UFO data. We brought back the idea of using an extremely long focal length camera equipped with a diffraction grating.

The cameras would be placed at various locations throughout the United States where UFO's were most frequently seen. We hoped that photos of the UFO's taken through the diffraction gratings would give us some proof one way or the other.

The diffraction gratings we planned to use over the lenses of the cameras were the same thing as prisms; they would split up the light

---

from the UFO into its component parts so that we could study it and determine whether it was a meteor, an airplane, or balloon reflecting sunlight, etc. Or we might be able to prove that the photographed UFO was a craft completely foreign to our knowledge.

A red-hot, A-1 priority was placed on the camera project, and a section at ATIC that developed special equipment took over the job of obtaining the cameras, or, if necessary, having them designed and built.

But the UFO's weren't waiting around till they could be photographed. Every day the tempo and confusion were increasing a little more.

By the end of June it was very noticeable that most of the better reports were coming from the eastern United States. In Massachusetts, New Jersey, and Maryland jet fighters had been scrambled almost nightly for a week. On three occasions radar equipped F-94's had locked on aerial targets only to have the lockon broken by the apparent violent maneuvers of the target.

By the end of June there was also a lull in the newspaper publicity about the UFO's. The forthcoming political conventions had wiped out any mention of flying saucers. But on July 1 there was a sudden outbreak of good reports. The first one came from Boston; then they worked down the coast.

About seven twenty five on the morning of July 1 two F-94's were scrambled to intercept a UFO that a Ground Observer Corps spotter reported was traveling southwest across Boston. Radar couldn't pick it up so the two airplanes were just vectored into the general area. The F-94's searched the area but couldn't see anything. We got the report at ATIC and would have tossed it out if it hadn't been for other reports from the Boston area at that same time.

One of these reports came from a man and his wife at Lynn, Massachusetts, nine miles northeast of Boston. At seven thirty they had noticed the two vapor trails from the climbing jet interceptors. They looked around the sky to find out if they could see what the jets were after and off to the west they saw a bright silver "cigar shaped object about six times as long as it was wide" traveling southwest across Boston. It appeared to be traveling just a little faster than the two jets. As they watched they saw that an identical UFO was following the first one some distance back. The UFO's weren't leaving vapor trails but, as the man mentioned in his report, this didn't mean anything because you can get above the vapor trail level. And the two UFO's appeared to be at a very high altitude. The two observers watched as the two F-94's searched back and forth far below the UFO's.

Then there was another report, also made at seven thirty. An Air

---

Force captain was just leaving his home in Bedford, about 15 miles northwest of Boston and straight west of Lynn, when he saw the two jets. In his report he said that he, too, had looked around the sky to see if he could see what they were trying to intercept when off to the east he saw a "silvery cigar shaped object" traveling south. His description of what he observed was almost identical to what the couple in Lynn reported except that he saw only one UFO.

When we received the report, I wanted to send someone up to Boston immediately in the hope of getting more data from the civilian couple and the Air Force captain; this seemed to be a tailor-made case for triangulation. But by July 1 we were completely snowed under with reports, and there just wasn't anybody to send. Then, to complicate matters, other reports came in later in the day.

Just two hours after the sighting in the Boston area Fort Monmouth, New Jersey, popped back into

UFO history. At nine thirty in the morning twelve student radar operators and three instructors were tracking nine jets on an SCR 584 radar set when two UFO targets appeared on the scope. The two targets came in from the northeast at a slow speed, much slower than the jets that were being tracked, hovered near Fort Monmouth at 50,000 feet for about five minutes, and then took off in a "terrific burst of speed" to the southwest.

When the targets first appeared, some of the class went outside with an instructor, and after searching the sky for about a minute, they saw two shiny objects in the same location as the radar showed the two unidentified targets to be. They watched the two UFO's for several minutes and saw them go zipping off to the southwest at exactly the same time that the two radar targets moved off the scope in that direction.

We had plotted these reports, the ones from Boston and the one from Fort Monmouth, on a map, and without injecting any imagination or wild assumptions, it looked as if two "somethings" had come down across Boston on a southwesterly heading, crossed Long Island, hovered for a few minutes over the Army's secret laboratories at Fort Monmouth, then proceeded toward Washington. In a way we half expected to get a report from Washington. Our expectations were rewarded because in a few hours a report arrived from that city.

A physics professor at George Washington University reported a "dull, gray, smoky colored" object which hovered north northwest of Washington for about eight minutes. Every once in a while, the professor reported, it would move through an arc of about 15 degrees to the right or left, but it always returned to its original position. While he was watching the UFO he took a 25 cent piece out of his pocket and held it at arm's length

---

so that he could compare its size to that of the UFO. The UFO was about half the diameter of the quarter. When he first saw the UFO, it was about 30 to 40 degrees above the horizon, but during the eight minutes it was in sight it steadily dropped lower and lower until buildings in downtown Washington blocked off the view.

Besides being an "Unknown," this report was exceptionally interesting to us because the sighting was made from the center of downtown Washington, D.C. The professor reported that he had noticed the UFO when he saw people all along the street looking up in the air and pointing. He estimated that at least 500 people were looking at it, yet his was the only report we received. This seemed to substantiate our theory that people are very hesitant to report UFO's to the Air Force. But they evidently do tell the newspapers because later on we picked up a short account of the sighting in the Washington papers. It merely said that hundreds of calls had been received from people reporting a UFO.

When reports were pouring in at the rate of twenty or thirty a day, we were glad that people were hesitant to report UFO's, but when we were trying to find the answer to a really knotty sighting we always wished that more people had reported it. The old adage of having your cake and eating it, too, held even for the UFO.

Technically no one in Washington, besides, of course, Major General Samford and his superiors, had anything to do with making policy decisions about the operation of Project Blue Book or the handling of the UFO situation in general. Nevertheless, everyone was trying to get into the act. The split in opinions on what to do about the rising tide of UFO reports, the split that first came out in the open at General Samford's briefing, was widening every day. One group was getting dead serious about the situation. They thought we now had plenty of evidence to back up an official statement that the UFO's were something real and, to be specific, not something from this earth. This group wanted Project Blue Book to quit spending time investigating reports from the standpoint of trying to

determine if the observer of a UFO had actually seen something foreign to our knowledge and start assuming that he or she had. They wanted me to aim my investigation at trying to find out more about the UFO. Along with this switch in operating policy, they wanted to clamp down on the release of information. They thought that the security classification of the project should go up to Top Secret until we had all of the answers, then the information should be released to the public. The investigation of UFO's along these lines should be a maximum effort, they thought, and their plans called for lining up many top scientists to devote their full time to the project. Someone once said that enthusiasm

---

is infectious, and he was right. The enthusiasm of this group took a firm hold in the Pentagon, at Air Defense Command Headquarters, on the Research and Development Board, and many other agencies throughout the government. But General Samford was still giving the orders, and he said to continue to operate just as we had - keeping an open mind to any ideas.

After the minor flurry of reports on July 1 we had a short breathing spell and found time to clean up a sizable backlog of reports. People were still seeing UFO's but the frequency of the sighting curve was dropping steadily. During the first few days of July we were getting only two or three good reports a day.

On July 5 the crew of a non-scheduled airliner made page two of many newspapers by reporting a UFO over the AEC's super secret Hanford, Washington, installation. It was a skyhook balloon. On the twelfth a huge meteor sliced across Indiana, southern Illinois, and Missouri that netted us twenty or thirty reports. Even before they had stopped coming in, we had confirmation from our astronomer that the UFO was a meteor.

But forty two minutes later there was a sighting in Chicago that wasn't so easily explained.

According to our weather records, on the night of July 12 it was hot in Chicago. At nine forty two there were at least 400 people at Montrose Beach trying to beat the heat. Many of them were lying down looking at the stars, so that they saw the UFO as it came in from the west north west, made a 180 degree turn directly over their heads, and disappeared over the horizon. It was a "large red light with small white lights on the side," most of the people reported. Some of them said that it changed to a single yellow light as it made its turn. It was in sight about five minutes, and during this time no one reported hearing any sound.

One of the people at the beach was the weather officer from O'Hare International Airport, an Air Force captain. He immediately called O'Hare. They checked on balloon flights and with radar, but both were negative; radar said that there had been no aircraft in the area of Montrose Beach for several hours.

I sent an investigator to Chicago, and although he came back with a lot of data on the sighting, it didn't add up to be anything known.

The next day Dayton had its first UFO sighting in a long time when a Mr. Roy T. Ellis, president of the Rubber Seal Products Company, and many other people, reported a teardrop shaped object that hovered over Dayton for several minutes about midnight. This sighting had an interesting twist because two years later I was in Dayton and stopped in at ATIC to see a friend who is one of the technical advisers at the center.

Naturally - the conversation got around to the subject of UFO's, and he asked me if I remembered this specific sighting. I did, so he went on to say that he and his wife had seen this UFO that night but they had never told anybody. He was very serious when he admitted that he had no idea what it could have been. Now I'd heard this statement a thousand times before from other people, but coming from this person, it was really something because he was as anti saucer as anyone I knew. Then he added, "From that time on I didn't think your saucer reporters were as crazy as I used to think they were."

The Dayton sighting also created quite a stir in the press. In conjunction with the sighting, the Dayton Daily Journal had interviewed Colonel Richard H. Magee, the Dayton-Oakwood civil defense director; they wanted to know what he thought about the UFO's. The colonel's answer made news: "There's something flying around in our skies and we wish we knew what it was."

When the story broke in other papers, the colonel's affiliation with civil defense wasn't mentioned, and he became merely "a colonel from Dayton." Dayton was quickly construed by the public to mean Wright- Patterson AFB and specifically ATIC. Some people in the Pentagon screamed while others gleefully clapped their hands. The gleeful handclaps were from those people who wanted the UFO's to be socially recognized, and they believed that if they couldn't talk their ideas into being they might be able to force them in with the help of this type of publicity.

The temporary lull in reporting that Project Blue Book had experienced in early July proved to be only the calm before the storm. By mid July we were getting about twenty reports a day plus frantic calls from intelligence officers all over the United States as every Air Force installation in the U.S. was being swamped with reports. We told the intelligence officers to send in the ones that sounded the best.

The build-up in UFO reports wasn't limited to the United States- every day we would receive reports from our air attaché in other countries. England and France led the field, with the South American countries running a close third. Needless to say, we didn't investigate or evaluate foreign reports because we had our hands full right at home.

Most of us were putting in fourteen hours a day, six days a week. It wasn't at all uncommon for Lieutenant Andy Flues, Bob Olsson, or Kerry Rothstien, my investigators, to get their sleep on an airliner going out or coming back from an investigation. TWA airliners out of Dayton were more like home than home. But we hadn't seen anything yet.

All the reports that were coming in were good ones, ones with no answers. Unknowns were running about 40 per cent. Rumors persist

---

that in mid July 1952 the Air Force was braced for an expected invasion by flying saucers. Had these rumormongers been at ATIC in mid July they would have thought that the invasion was already in full swing. And they would have thought that one of the beachheads for the invasion was Patrick AFB, the Air Force's Guided Missile Long Range Proving Ground on the east coast of Florida.

On the night of July 18, at ten forty five, two officers were standing in front of base operations at Patrick when they noticed a light at about a 45 degree angle from the horizon and off to the west. It was an amber color and "quite a bit brighter than a star." Both officers had heard flying saucer stories, and both thought the light was a balloon. But, to be comedians, they called to several more officers and airmen inside the operations office and told them to come out and "see the flying saucer." The people came out and looked. A few were surprised and took the mysterious light seriously, at the expense of considerable laughter from the rest of the group. The discussion about the light grew livelier and bets that it was a balloon were placed. In the meantime the light had drifted over the base, had stopped for about a minute, turned, and was now heading north. To settle the bet,

one of the officers stepped into the base weather office to find out about the balloon. Yes, one was in the air and being tracked by radar, he was told. The weather officer said that he would call to find out exactly where it was. He called and found out that the weather balloon was being tracked due west of the base and that the light had gone out about ten minutes before. The officer went back outside to find that what was first thought to be a balloon was now straight north of the field and still lighted. To add to the confusion, a second amber light had appeared in the west about 20 degrees lower than where the first one was initially seen, and it was also heading north but at a much greater speed. In a few seconds the first light stopped and started moving back south over the base.

While the group of officers and airmen were watching the two lights, the people from the weather office came out to tell the UFO observers that the balloon was still traveling straight west. They were just in time to see a third light come tearing across the sky, directly overhead, from west to east. A weatherman went inside and called the balloon tracking crew again - their balloon was still far to the west of the base.

Inside of fifteen minutes two more amber lights came in from the west, crossed the base, made a 180 degree turn over the ocean, and came back over the observers.

In the midst of the melee a radar set had been turned on but it couldn't pick up any targets. This did, however, eliminate the possibility of the

---

lights' being aircraft. They weren't stray balloons either, because the winds at all altitudes were blowing in a westerly direction. They obviously weren't meteors. They weren't searchlights on a haze layer because there was no weather conducive to forming a haze layer and there were no searchlights. They could have been some type of natural phenomenon, if one desires to take the negative approach. Or, if you take the positive approach, they could have been spaceships.

The next night radar at Washington National Airport picked up UFO's and one of the most highly publicized sightings of UFO history was in the making. It marked the beginning of the end of the Big Flap.

CHAPTER TWELVE

The Washington Merry-Go-Round

No flying saucer report in the history of the UFO ever won more world acclaim than the Washington National Sightings.

When radars at the Washington National Airport and at Andrews AFB, both close to the nation's capital, picked up UFO's, the sightings beat the Democratic National Convention out of headline space. They created such a furor that I had inquiries from the office of the President of the United States and from the press in London, Ottawa, and Mexico City. A junior sized riot was only narrowly averted in the lobby of the Roger Smith Hotel in Washington when I refused to tell U.S. newspaper reporters what I knew about the sightings.

Besides being the most highly publicized UFO sightings in the Air Force annals, they were also the most monumentally fouled-up messes that repose in the files. Although the Air Force said that the incident had been fully investigated, the Civil Aeronautics Authority wrote a formal report on the sightings, and numerous magazine writers studied them, the complete story has never fully been told. The pros have been left out of the con accounts, and the cons were neatly overlooked by the pro writers.

For a year after the twin sightings we were still putting little pieces in the puzzle.

In some aspects the Washington National Sightings could be classed as a surprise - we used this as an excuse when things got fouled up --- but

---

in other ways they weren't. A few days prior to the incident a scientist, from an agency that I can't name, and I were talking about the build-up of reports along the east coast of the United States. We talked for about two hours, and I was ready to leave when he said that he had one last comment to make - a prediction. From his study of the UFO reports that he was getting from Air Force Headquarters, and from discussions with his colleagues, he said that he thought that we were sitting right on top of a big keg full of loaded flying saucers. "Within the next few days," he told me, and I remember that he punctuated his slow, deliberate remarks by hitting the desk with his fist, "they're going to blow up and you're going to have the granddaddy of all UFO sightings. The sighting will occur in Washington or New York," he predicted, "probably Washington."

The trend in the UFO reports that this scientist based his prediction on hadn't gone unnoticed. We on Project Blue Book had seen it, and so had the people in the Pentagon; we all had talked about it.

On July 10 the crew of a National Airlines plane reported a light "too bright to be a lighted balloon and too slow to be a big meteor" while they were flying south at 2,000 feet near Quantico, Virginia, just south of Washington.

On July 13 another airliner crew reported that when they were 60 miles southwest of Washington, at 11,000 feet, they saw a light below them. It came up to their level, hovered off to the left for several minutes, and then it took off in a fast, steep climb when the pilot turned on his landing lights.

On July 14 the crew of a Pan American airliner enroute from New York to Miami reported eight UFO's near Newport News, Virginia, about 130 miles south of Washington.

Two nights later there was another sighting in exactly the same area but from the ground. At 9:00

P.M. a high ranking civilian scientist from the National Advisory Committee for Aeronautics Laboratory at Langley AFB and another man were standing near the ocean looking south over Hampton Roads when they saw two amber colored lights, "much too large to be aircraft lights," off to their right, silently traveling north. Just before the two lights got abreast of the two men they made a 180 degree turn and started back toward the spot where they had first been seen. As they turned, the two lights seemed to "jockey for position in the formation." About this time a third light came out of the west and joined the first two; then as the three UFO's climbed out of the area toward the south, several more lights joined the formation. The entire episode had lasted only three minutes.

The only possible solution to the sighting was that the two men had seen airplanes. We investigated this report and found that there were several B-26's from Langley AFB in the area at the time of the sighting, but none of the B-26 pilots remembered being over Hampton Roads. In fact, all of them had generally stayed well south of Norfolk until about 10:30 P.M. because of thunderstorm activity northwest of Langley. Then there were other factors - the observers heard no sound and they were away from all city noises, aircraft don't carry just one or two amber lights, and the distance between the two lights was such that had they been on an airplane the airplane would have been huge or very close to the observers. And last, but not least, the man from the National Advisory Committee for Aeronautics was a very famous aerodynamicist and of such professional stature that if he said the lights weren't airplanes they weren't.

This then was the big build-up to the first Washington national sighting and the reason why my friend predicted that the Air Force was sitting on a big powder keg of loaded flying saucers.

When the keg blew the best laid schemes of the mice and men at ATIC, they went the way best laid schemes are supposed to. The first one of the highly publicized Washington national sightings started, according to the CAA's logbook at the airport, at 11:40 P.M. on the night of July 19 when two radars at National Airport picked up eight unidentified targets east and south of Andrews AFB. The targets weren't airplanes because they would loaf along at 100 to 130 miles an hour then suddenly accelerate to "fantastically high speeds" and leave the area. During the night the crews of several airliners saw mysterious lights in the same locations that the radars showed the targets; tower operators also saw lights, and jet fighters were brought in.

But nobody bothered to tell Air Force Intelligence about the sighting. When reporters began to call intelligence and ask about the big sighting behind the headlines, INTERCEPTORS CHASE FLYING SAUCERS OVER WASHINGTON, D.C., they were told that no one had ever heard of such a sighting. In the next edition the headlines were supplemented by, AIR FORCE WON'T TALK.

Thus intelligence was notified about the first Washington national sighting.

I heard about the sighting about ten o'clock Monday morning when Colonel Donald Bower and I got off an airliner from Dayton and I bought a newspaper in the lobby of the Washington National Airport Terminal Building. I called the Pentagon from the airport and talked to Major Dewey Fournet, but all he knew was what he'd read in the

---

papers. He told me that he had called the intelligence officer at Bolling AFB and that he was making an investigation. We would get a preliminary official report by noon.

It was about 1:00 P.M. when Major Fournet called me and said that the intelligence officer from

Bolling was in his office with the preliminary report on the sightings. I found Colonel Bower, we went up to Major Fournet's office and listened to the intelligence officer's briefing.

The officer started by telling us about the location of the radars involved in the incident. Washington National Airport, which is located about three miles south of the heart of the city, had two radars. One was a long-range radar in the Air Route Traffic Control section. This radar had 100 mile range and was used to control all air traffic approaching Washington. It was known as the ARTC radar. The control tower at National Airport had a shorter range radar that it used to control aircraft in the immediate vicinity of the airport. Boiling AFB, he said, was located just east of National Airport, across the Potomac River. Ten miles farther east, in almost a direct line with National and Bolling, was Andrews AFB. It also had a short-range radar. All of these airfields were linked together by an intercom system.

Then the intelligence officer went on to tell about the sighting.

When a new shift took over at the ARTC radar room at National Airport, the air traffic was light so only one man was watching the radarscope. The senior traffic controller and the six other traffic controllers on the shift were out of the room at eleven forty, when the man watching the radarscope noticed a group of seven targets appear. From their position on the scope he knew that they were just east and a little south of Andrews AFB. In a way the targets looked like a formation of slow airplanes, but no formations were due in the area. As he watched, the targets loafed along at 100 to 130 miles an hour; then in an apparent sudden burst of speed two of them streaked out of radar range. These were no airplanes, the man thought, so he let out a yell for the senior controller. The senior controller took one look at the scope and called in two more of the men. They all agreed that these were no airplanes. The targets could be caused by a malfunction in the radar, they thought, so a technician was called in - the set was in perfect working order.

The senior controller then called the control tower at National Airport; they reported that they also had unidentified targets on their scopes, so did Andrews. And both of the other radars reported the same slow speeds followed by a sudden burst of speed. One target was clocked at 7,000 miles an hour. By now the targets had moved into every sector of the

---

scope and had flown through the prohibited flying areas over the White House and the Capitol.

Several times during the night the targets passed close to commercial airliners in the area and on two occasions the pilots of the airliners saw lights that they couldn't identify, and the lights were in the same spots where the radar showed UFO's to be. Other pilots to whom the ARTC radar men talked on the radio didn't see anything odd, at least that's what they said, but the senior controller knew airline pilots and knew that they were very reluctant to report UFO's.

The first sighting of a light by an airline pilot took place shortly after midnight, when an ARTC controller called the pilot of a Capital Airlines flight just taking off from National. The controller asked the pilot to keep watch for unusual lights or anything. Soon after the pilot cleared the traffic pattern, and while ARTC was still in contact with him, he suddenly yelled, "There's one - off to the right - and there it goes." The controller had been watching the scope, and a target that had been off to the right of the Capitaliner was gone.

During the next fourteen minutes this pilot reported six more identical lights.

About two hours later another pilot, approaching National Airport from the south, excitedly called the control tower to report that a light was following him at "eight o'clock level." The tower checked their radar-scope and there was a target behind and to the left of the airliner. The ARTC radar also

had the airliner and the UFO target. The UFO tagged along behind and to the left of the airliner until it was within four miles of touchdown on the runway. When the pilot reported the light was leaving, the two radarscopes showed that the target was pulling away from the airliner.

Once during the night all three radars, the two at Washington and the one at Andrews AFB, picked up a target three miles north of the Riverdale Radio beacon, north of Washington. For thirty seconds the three radar operators compared notes about the target over the intercom, then suddenly the target was gone - and it left all three radarscopes simultaneously.

But the clincher came in the wee hours of the morning, when an ARTC traffic controller called the control tower at Andrews AFB and told the tower operators that ARTC had a target just south of their tower, directly over the Andrews Radio range station. The tower operators looked and there was a "huge fiery orange sphere" hovering in the sky directly over their range station.

Not too long after this excitement had started, in fact just after the

---

technician had checked the radar and found that the targets weren't caused by a radar malfunction, ARTC had called for Air Force interceptors to come in and look around. But they didn't show, and finally ARTC called again - then again. Finally, just about daylight, an F-94 arrived, but by that time the targets were gone. The F-94 crew searched the area for a few minutes but they couldn't find anything unusual so they returned to their base.

So ended phase one of the Washington National Sightings.

The Bolling AFB intelligence officer said he would write up the complete report and forward it to ATIC.

That afternoon things bustled in the Pentagon. Down on the first floor Al Chop was doing his best to stave off the press while up on the fourth floor intelligence officers were holding some serious conferences. There was talk of temperature inversions and the false targets they could cause; but the consensus was that a good radar operator could spot inversion- caused targets, and the traffic controllers who operated the radar at Washington National Airport weren't just out of radar school. Every day the lives of thousands of people depended upon their interpretation of the radar targets they saw on their scopes. And you don't get a job like this unless you've spent a good many years watching a luminous line paint targets on a good many radarscopes. Targets caused by inversions aren't rare - in the years that these men had been working with radar they had undoubtedly seen every kind of target, real or false, that radar can detect. They had told the Bolling AFB intelligence officer that the targets they saw were caused by the radar waves' bouncing off a hard, solid object. The Air Force radar operator at Andrews backed them up; so did two veteran airline pilots who saw lights right where the radar showed a UFO to be.

Then on top of all this there were the reports from the Washington area during the previous two weeks - all good - all from airline pilots or equally reliable people.

To say the least, the sighting at Washington National was a jolt.

Besides trying to figure out what the Washington National UFO's were, we had the problem of what to tell the press. They were now beginning to put on a squeeze by threatening to call a congressman - and nothing chills blood faster in the military. They wanted some kind of an official statement and they wanted it soon. Some people in intelligence wanted to say just, "We don't know," but others held out for a more thorough investigation. I happened to be in this latter category. Many times in the past I had seen what first seemed to be a good UFO report completely fall apart under a thorough

investigation. I was for stalling

---

the press and working all night if necessary to go into every aspect of the sighting. But to go along with the theme of the Washington National Sightings - confusion - there was a lot of talk but no action and the afternoon passed with no further investigation.

Finally about 4:00 P.M. it was decided that the press, who still wanted an official comment, would get an official "No comment" and that I would stay in Washington and make a more detailed investigation.

I called Lieutenant Andy Flues, who was in charge of Project Blue Book while I was gone, to tell him that I was staying over and I found out that they were in a deluxe flap back in Dayton. Reports were pouring out of the teletype machines at the rate of thirty a day and many were as good, if not better, than the Washington incident. I talked this over with Colonel Bower and we decided that even though things were popping back at ATIC the Washington sighting, from the standpoint of national interest, was more important.

Feeling like a national martyr because I planned to work all night if necessary, I laid the course of my investigation. I would go to Washington National Airport, Andrews AFB, airlines offices, the weather bureau, and a half dozen other places scattered all over the capital city. I called the transportation section at the Pentagon to get a staff car but it took me only seconds to find out that the regulations said no staff cars except for senior colonels or generals. Colonel Bower tried - same thing. General Samford and General Garland were gone, so I couldn't get them to try to pressure a staff car out of the hillbilly who was dispatching vehicles. I went down to the finance office - could I rent a car and charge it as travel expense? No - city buses are available. But I didn't know the bus system and it would take me hours to get to all the places I had to visit, I pleaded. You can take a cab if you want to pay for it out of your per diem was the answer. Nine dollars a day per diem and I should pay for a hotel room, meals, and taxi fares all over the District of Columbia. Besides, the lady in finance told me, my travel orders to Washington covered only a visit to the Pentagon. In addition, she said, I was supposed to be on my way back to Dayton right now, and if I didn't go through all the red tape of getting the orders amended I couldn't collect any per diem and technically I'd be AWOL. I couldn't talk to the finance officer, the lady informed me, because he always left at 4:30 to avoid the traffic and it was now exactly five o'clock and she was quitting.

At five one I decided that if saucers were buzzing Pennsylvania Avenue in formation I couldn't care less. I called Colonel Bower, explained my troubles, and said that I was through. He concurred, and I caught the next airliner to Dayton.

When I returned I dropped in to see Captain Roy James in the radar branch and told him about the sighting. He said that he thought it sounded as if the radar targets had been caused by weather but since he didn't have the finer details he naturally couldn't make any definite evaluation.

The good UFO reports that Lieutenant Flues had told me about when I called him from Washington had tripled in number before I got around to looking at them. Our daily take had risen to forty a day, and about a third of them were classified as unknowns.

More amber red lights like those seen on July 18 had been observed over the Guided Missile Long Range Proving Ground at Patrick AFB, Florida. In Uvalde, Texas, a UFO described as "a large, round, silver object that spun on its vertical axis" was seen to cross 100 degrees of afternoon sky in

forty eight seconds. During part of its flight it passed between two towering cumulus clouds. At Los Alamos and Holyoke, Massachusetts, jets had chased UFO's. In both cases the UFO's had been lost as they turned into the sun.

In two night encounters, one in New Jersey and one in Massachusetts, F-94's tried unsuccessfully to intercept unidentified lights reported by the Ground Observer Corps. In both cases the pilots of the radar nosed jet interceptors saw a light; they closed in and their radar operators got a lock-on. But the lock-ons were broken in a few seconds, in both cases, as the light apparently took violent evasive maneuvers.

Copies of these and other reports were going to the Pentagon, and I was constantly on the phone or having teleconferences with Major Fournet.

When the second Washington National Sighting came along, almost a week to the hour from the first one, by a stroke of luck things weren't too fouled up. The method of reporting the sighting didn't exactly follow the official reporting procedures that are set forth in Air Force Letter 200-5, dated 5 April 1952, Subject: Reporting of Unidentified Flying Objects - but it worked.

I first heard about the sighting about ten o'clock in the evening when I received a telephone call from Bob Ginna, Life magazine's UFO expert. He had gotten the word from Life's Washington News Bureau and wanted a statement about what the Air Force planned to do. I decided that instead of giving a mysterious "no comment" I would tell the truth: "I have no idea what the Air Force is doing; in all probability it's doing nothing." When he hung up, I called the intelligence duty officer in the Pentagon and I was correct, intelligence hadn't heard about the sighting. I asked the duty officer to call Major Fournet and ask him if he would go out to the airport, which was only two or three miles from his home. When

---

he got the call from the duty officer Major Fournet called Lieutenant Holcomb; they drove to the ARTC radar room at National Airport and found Al Chop already there. So at this performance the UFO's had an official audience; Al Chop, Major Dewey Fournet, and Lieutenant Holcomb, a Navy electronics specialist assigned to the Air Force Directorate of Intelligence, all saw the radar targets and heard the radio conversations as jets tried to intercept the UFO's.

Being in Dayton, 380 miles away, there wasn't much that I could do, but I did call Captain Roy James thinking possibly he might want to talk on the phone to the people who were watching the UFO's on the radarscopes. But Captain James has a powerful dislike for UFO's- especially on Saturday night.

About five o'clock Sunday morning Major Fournet called and told me the story of the second sighting at Washington National Airport:

About 10:30 P.M. on July 26 the same radar operators who had seen the UFO's the week before picked up several of the same slow moving targets. This time the mysterious craft, if that is what they were, were spread out in an arc around Washington from Herndon, Virginia, to Andrews AFB. This time there was no hesitation in following the targets. The minute they appeared on the big 24 inch radarscope one of the controllers placed a plastic marker representing an unidentified target near each blip on the scope. When all the targets had been carefully marked, one of the controllers called the tower and the radar station at Andrews AFB - they also had the unknown targets.

By 11:30 P.M. four or five of the targets were continually being tracked at all times, so once again a call went out for jet interceptors. Once again there was some delay, but by midnight two F-94's from New Castle County AFB were airborne and headed south. The reporters and photographers were

asked to leave the radar room on the pretext that classified radio frequencies and procedures were being used in vectoring the interceptors. All civilian air traffic was cleared out of the area and the jets moved in.

When I later found out that the press had been dismissed on the grounds that the procedures used in an intercept were classified, I knew that this was absurd because any ham radio operator worth his salt could build equipment and listen in on any intercept. The real reason for the press dismissal, I learned, was that not a few people in the radar room were positive that this night would be the big night in UFO history - the night when a pilot would close in on and get a good look at a UFO and they didn't want the press to be in on it.

But just as the two '94's arrived in the area the targets disappeared

---

from the radarscopes. The two jets were vectored into the areas where the radar had shown the last target plots, but even though the visibility was excellent they could see nothing. The two airplanes stayed around a few minutes more, made a systematic search of the area, but since they still couldn't see anything or pick up anything on their radars they returned to their base.

A few minutes after the F-94's left the Washington area, the unidentified targets were back on the radarscopes in that same area.

What neither Major Fournet nor I knew at this time was that a few minutes after the targets left the radarscopes in Washington people in the area around Langley AFB near Newport News, Virginia, began to call Langley Tower to report that they were looking at weird bright lights that were "rotating and giving off alternating colors." A few minutes after the calls began to come in, the tower operators themselves saw the same or a similar light and they called for an interceptor.

An F-94 in the area was contacted and visually vectored to the light by the tower operators. The F-94 saw the light and started toward it, but suddenly it went out, "like somebody turning off a light bulb." The F-94 crew continued their run and soon got a radar lock-on, but it was broken in a few seconds as the target apparently sped away. The fighter stayed in the area for several more minutes and got two more lock-ons, only to have them also broken after a few seconds.

A few minutes after the F-94 over Newport News had the last lock-on broken, the targets came back on the scopes at Washington National.

With the targets back at Washington the traffic controller again called Defense Command, and once again two F-94's roared south toward Washington. This time the targets stayed on the radarscopes when the airplanes arrived.

The controllers vectored the jets toward group after group of targets, but each time, before the jets could get close enough to see anything more than just a light, the targets had sped away. Then one stayed put. The pilot saw a light right where the ARTC radar said a target was located; he cut in the F-94's afterburner and went after it, but just like the light that the F-94 had chased near Langley AFB, this one also disappeared. All during the chase the radar operator in the F-94 was trying to get the target on his set but he had no luck.

After staying in the area about twenty minutes, the jets began to run low on fuel and returned to their base. Minutes later it began to get light, and when the sun came up all the targets were gone.

Early Sunday morning, in an interview with the press, the Korean veteran who piloted the F-94, Lieutenant William Patterson, said:

166.The Report on Unidentified Flying Objects

I tried to make contact with the bogies below 1,000 feet, but they [the radar controllers] vectored us around. I saw several bright lights. I was at my maximum speed, but even then I had no closing speed. I ceased chasing them because I saw no chance of overtaking them. I was vectored into new objects. Later I chased a single bright light which I estimated about 10 miles away. I lost visual contact with it about 2 miles.

When Major Fournet finished telling me about the night's activity, my first question was, "How about the radar targets, could they have been caused by weather?"

I knew that Lieutenant Holcomb was a sharp electronics man and that Major Fournet, although no electronics specialist, was a crackerjack engineer, so their opinion meant a lot.

Dewey said that everybody in the radar room was convinced that the targets were very probably caused by solid metallic objects. There had been weather targets on the scope too, he said, but these were common to the Washington area and the controllers were paying no attention to them.

And this something solid could poke along at 100 miles an hour or outdistance a jet, I thought to myself.

I didn't ask Dewey any more because he'd been up all night and wanted to get to bed.

Monday morning Major Ed Gregory, another intelligence officer at ATIC, and I left for Washington, but our flight was delayed in Dayton so we didn't arrive until late afternoon. On the way through the terminal building to get a cab downtown, I picked up the evening papers. Every headline was about the UFO's:

FIERY OBJECTS OUTRUN JETS OVER CAPITAL - INVESTIGATION VEILED IN SECRECY FOLLOWING VAIN CHASE

JETS ALERTED FOR SAUCER - INTERCEPTORS CHASE LIGHTS IN D.C. SKIES

EXPERT HERE TO PUSH STUDY AS OBJECTS IN SKIES REPORTED AGAIN

I jokingly commented about wondering who the expert was. In a half hour I found out - I was. When Major Gregory and I walked into the lobby of the Roger Smith Hotel to check in, reporters and photographers rose from the easy chairs and divans like a covey of quail. They wanted

The Washington Merry-Go-Round.167

my secrets, but I wasn't going to tell nor would I pose for pictures while I wasn't telling anything. Newspaper reporters are a determined lot, but Greg ran interference and we reached the elevator without even a "no comment."

The next day was one of confusion. After the first Washington sighting the prevailing air in the section of the Pentagon's fourth floor, which is occupied by Air Force Intelligence, could be described as excitement, but this day it was confusion. There was a maximum of talk and a minimum of action. Everyone agreed that both sightings should be thoroughly investigated, but nobody did anything. Major Fournet and I spent the entire morning "just leaving" for somewhere to investigate "something." Every time we would start to leave, something more pressing would come up.

About 10:00 A.M. the President's air aide, Brigadier General Landry, called intelligence at President

Truman's request to find out what was going on. Somehow I got the call. I told General Landry that the radar target could have been caused by weather but that we had no proof.

To add to the already confused situation, new UFO reports were coming in hourly. We kept them quiet mainly because we weren't able to investigate them right away, or even confirm the facts. And we wanted to confirm the facts because some of the reports, even though they were from military sources, were difficult to believe.

Prior to the Washington sightings in only a very few of the many instances in which radar had picked up UFO targets had the targets themselves supposedly been seen visually. Radar experts had continually pointed out this fact to us as an indication that maybe all of the radar targets were caused by freak weather conditions. "If people had just seen a light, or an object, near where the radar showed the UFO target to be, you would have a lot more to worry about," radar technicians had told me many times.

Now people were seeing the same targets that the radars were picking up, and not just at Washington.

On the same night as the second Washington sighting we had a really good report from California. An ADC radar had picked up an unidentified target and an F-94C had been scrambled. The radar vectored the jet interceptor into the target, the radar operator in the '94 locked-on to it, and as the airplane closed in the pilot and RO saw that they were headed directly toward a large, yellowish orange light. For several minutes they played tag with the UFO. Both the radar on the ground and the radar in the F-94 showed that as soon as the airplane would get almost within gunnery range of the UFO it would suddenly pull away

---

at a terrific speed. Then in a minute or two it would slow down enough to let the F-94 catch it again.

When I talked to the F-94 crew on the phone, the pilot said that they felt as if this were just a big aerial cat-and-mouse game - and they didn't like it - at any moment they thought the cat might have pounced.

Needless to say, this was an unknown.

About midmorning on Tuesday, July 29th, Major General John Samford sent word down that he would hold a press conference that afternoon in an attempt to straighten out the UFO situation with the press.

Donald Keyhoe reports on the press conference and the events leading up to it in detail in his book, Flying Saucers from Outer Space. He indicates that before the conference started, General Samford sat behind his big walnut desk in Room 3A138 in the Pentagon and battled with his conscience. Should he tell the public "the real truth" - that our skies are loaded with spaceships? No, the public might panic. The only answer would be to debunk the UFO's.

This bit of reporting makes Major Keyhoe the greatest journalist in history. This beats wire tapping. He reads minds. And not only that, he can read them right through the walls of the Pentagon. But I'm glad that Keyhoe was able to read the General's mind and that he wrote the true and accurate facts about what he was really thinking because I spent quite a bit of time talking to the General that day and he sure fooled me. I had no idea he was worried about what he should tell the public.

When the press conference, which was the largest and longest the Air Force had held since World War II, convened at 4:00 P.M., General Samford made an honest effort to straighten out the

Washington National Sightings, but the cards were stacked against him before he started. He had to hedge on many answers to questions from the press because he didn't know the answers. This hedging gave the impression that he was trying to cover up something more than just the fact that his people had fouled up in not fully investigating the sightings. Then he had brought in Captain Roy James from ATIC to handle all the queries about radar. James didn't do any better because he'd just arrived in Washington that morning and didn't know very much more about the sightings than he'd read in the papers. Major Dewey Fournet and Lieutenant Holcomb, who had been at the airport during the sightings, were extremely conspicuous by their absence, especially since it was common knowledge among the press that they weren't convinced the UFO's picked up on radars were weather targets.

But somehow out of this chaotic situation came exactly the result

---

that was intended - the press got off our backs. Captain James's answers about the possibility of the radar targets' being caused by temperature inversions had been construed by the press to mean that this was the Air Force's answer, even though today the twin sightings are still carried as unknowns.

The next morning headlines from Bangor to Bogota read:

AIR FORCE DEBUNKS SAUCERS AS JUST NATURAL PHENOMENA

The Washington National Sightings proved one thing, something that many of us already knew: in order to forestall any more trouble similar to what we'd just been through we always had to get all of the facts and not try to hide them. A great deal of the press's interest was caused by the Air Force's reluctance to give out any information, and the reluctance on the part of the Air Force was caused by simply not having gone out to find the answers.

But had someone gone out and made a more thorough investigation a few big questions would have popped up and taken some of the intrigue out of the two reports. It took me a year to put the question marks together because I just picked up the information as I happened to run across it, but it could have been collected in a day of concentrated effort.

There was some doubt about the visual sighting of the "large fiery-orange-colored sphere" that the tower operators at Andrews AFB saw when the radar operators at National Airport told them they had a target over the Andrews Radio range station. When the tower operators were later interrogated they completely changed their story and said that what they saw was merely a star. They said that on the night of the sighting they "had been excited." (According to astronomical charts, there were no exceptionally bright stars where the UFO was seen over the range station, however. And I heard from a good source that the tower men had been "persuaded" a bit.)

Then the pilot of the F-94C changed his mind even after he'd given the press and later told me his story about vainly trying to intercept unidentified lights. In an official report he says that all he saw was a ground light reflecting off a layer of haze.

Another question mark arose about the lights that the airline pilots saw. Months after the sighting I heard from one of the pilots whom the ARTC controllers called to learn if he could see a UFO. This man's background was also impressive, he had been flying in and out of Washington since 1936. This is what he had to say:

The most outstanding incident happened just after a take-off one night from Washington National. The tower man advised us that there was

---

a UFO ahead of us on the take-off path and asked if we would aid in tracking it down. We were given headings to follow and shortly we were advised that we had passed the UFO and would be given a new heading. None of us in the cockpit had seen anything unusual. Several runs were made; each time the tower man advised us we were passing the UFO we noticed that we were over one certain section of the Potomac River, just east of Alexandria. Finally we were asked to visually check the terrain below for anything which might cause such an illusion. We looked and the only object we could see where the radar had a target turned out to be the Wilson Lines moonlight steamboat trip to Mount Vernon. Whether there was an altitude gimmick on the radar unit at the time I do not know but the radar was sure as hell picking up the steamboat.

The pilot went on to say that there is such a conglomeration of lights around the Washington area that no matter where you look you see a "mysterious light."

Then there was another point: although the radars at Washington National and Andrews overlap, and many of the targets appeared in the overlap area, only once did the three radars simultaneously pick up a target.

The investigation brought out a few more points on the pro side too. We found out that the UFO's frequently visited Washington. On May 23 fifty targets had been tracked from 8:00 P.M. till midnight. They were back on the Wednesday night between the two famous Saturday night sightings, the following Sunday night, and again the night of the press conference; then during August they were seen eight more times. On several occasions military and civilian pilots saw lights exactly where the radar showed the UFO's to be.

On each night that there was a sighting there was a temperature inversion but it was never strong enough to affect the radar the way inversions normally do. On each occasion I checked the strength of the inversion according to the methods used by the Air Defense Command Weather Forecast Center.

Then there was another interesting fact: hardly a night passed in June, July, and August in 1952 that there wasn't an inversion in Washington, yet the slow moving, "solid" radar targets appeared on only a few nights.

But the one big factor on the pro side of the question is the people involved - good radar men - men who deal in human lives. Each day they use their radar to bring thousands of people into Washington National Airport and with a responsibility like this they should know a real target from a weather target.

So the Washington National Airport Sightings are still unknowns.

Had the press been aware of some of the other UFO activity in the

---

United States during this period, the Washington sightings might not have been the center of interest. True, they could be classed as good reports but they were not the best that we were getting. In fact, less than six hours after the ladies and gentlemen of the press said "Thank you" to General Samford for his press conference, and before the UFO's could read the newspapers and find out that they were natural phenomena, one of them came down across the Canadian border into Michigan. The incident that occurred that night was one of those that even the most ardent skeptic would have difficulty explaining. I've heard a lot of them try and I've heard them all fail.

At nine forty on the evening of the twenty-ninth an Air Defense Command radar station in central Michigan started to get plots on a target that was coming straight south across Saginaw Bay on Lake Huron at 625 miles an hour. A quick check of flight plans on file showed that it was an unidentified target.

Three F-94's were in the area just northeast of the radar station, so the ground controller called one of the F-94's and told the pilot to intercept the unidentified target. The F-94 pilot started climbing out of the practice area on an intercept heading that the ground controller gave him. When the F-94 was at 20,000 feet, the ground controller told the pilot to turn to the right and he would be on the target. The pilot started to bring the F-94 around and at that instant both he and the radar operator in the back seat saw that they were turning toward a large bluish white light, "many times larger than a star." In the next second or two the light "took on a reddish tinge, and slowly began to get smaller, as if it were moving away." Just then the ground controller called and said that he still had both the F-94 and the unidentified target on his scope and that the target had just made a tight 180 degree turn. The turn was too tight for a jet, and at the speed the target was traveling it would have to be a jet if it were an airplane. Now the target was heading back north. The F-94 pilot gave the engine full power and cut in the afterburner to give chase. The radar operator in the back seat got a good radar lock-on. Later he said, "It was just as solid a lock-on as you get from a B-36." The object was at 4 miles range and the F-94 was closing slowly. For thirty seconds they held the lock-on; then, just as the ground controller was telling the pilot that he was closing in, the light became brighter and the object pulled away to break the lock-on. Without breaking his transmission, the ground controller asked if the radar operator still had the lock-on because on the scope the distance between two blips had almost doubled in one sweep of the antenna. This indicated that the unknown target had almost doubled its speed in a matter of seconds.

172.The Report on Unidentified Flying Objects

For ten minutes the ground radar followed the chase. At times the unidentified target would slow down and the F-94 would start to close the gap, but always, just as the F-94 was getting within radar range, the target would put on a sudden burst of speed and pull away from the pursuing jet. The speed of the UFO - for by this time all concerned had decided that was what it was - couldn't be measured too accurately because its bursts of speed were of such short duration; but on several occasions the UFO traveled about 4 miles in one ten second sweep of the antenna, or about 1,400 miles an hour.

The F-94 was getting low on fuel, and the pilot had to break off the chase a minute or two before the UFO got out of range of the ground radar. The last few plots on the UFO weren't too good but it looked as if the target slowed down to 200 to 300 miles an hour as soon as the F-94 turned around.

What was it? It obviously wasn't a balloon or a meteor. It might have been another airplane except that in 1952 there was nothing flying, except a few experimental airplanes that were far from Michigan, that could so easily outdistance an F-94. Then there was the fact that radar clocked it at 1,400 miles an hour. The F-94 was heading straight for the star Capella, which is low on the horizon and is very brilliant, but what about the radar contacts? Some people said "Weather targets," but the chances of a weather target's making a 180 degree turn just as an airplane turns into it, giving a radar lock-on, then changing speed to stay just out of range of the airplane's radar, and then slowing down when the airplane leaves is as close to nil as you can get.

What was it? A lot of people I knew were absolutely convinced this report was the key - the final proof. Even if all of the thousands of other UFO reports could be discarded on a technicality, this one couldn't be. These people believed that this report in itself was proof enough to officially accept the fact that UFO's were interplanetary spaceships. And when some people refused to believe even this report, the frustration was actually pitiful to see.

As the end of July approached, there was a group of officers in intelligence fighting hard to get the UFO "recognized." At ATIC, Project Blue Book was still trying to be impartial - but sometimes it was difficult.

Chapter 13: Hoax or Horror?, Page 173

CHAPTER THIRTEEN

Hoax or Horror?

To the military and the public who weren't intimately associated with the higher levels of Air Force Intelligence during the summer of 1952 - and few were - General Samford's press conference seemed to indicate the peak in official interest in flying saucers. It did take the pressure off Project Blue Book - reports dropped from fifty per day to ten a day inside of a week - but behind the scenes the press conference was only the signal for an all out drive to find out more about the UFO. Work on the special cameras continued on a high priority basis, and General Samford directed us to enlist the aid of top ranking scientists.

During the past four months we had collected some 750 comparatively well documented reports, and we hoped that something in these reports might give us a good lead on the UFO. My orders were to tell the scientists to whom we talked that the Air Force was officially still very much interested in the UFO and that their assistance, even if it was only in giving us ideas and comments on the reports, was badly needed. Although the statement of the problem was worded much more loosely, in essence it was, "Do the UFO reports we have collected indicate that the earth is being visited by a people from another planet?"

Such questions had been asked of the scientists before, but not in such a serious vein.

Then a secondary program was to be started, one of "educating" the military. The old idea that UFO reports would die out when the thrill wore off had long been discarded. We all knew that UFO reports would continue to come in and that in order to properly evaluate them we had to have every shred of evidence. The Big Flap had shown us that our chances of getting a definite answer on a sighting was directly proportional to the quality of the information we received from the intelligence officers in the field.

But soon after the press conference we began to get wires from intelligence officers saying they had interpreted the newspaper accounts of General Samford's press conference to mean that we were no longer interested in UFO reports. A few other intelligence officers had evidently

---

also misinterpreted the general's remarks because their reports of excellent sightings were sloppy and incomplete. All of this was bad, so to forestall any misconceived ideas about the future of the Air Force's UFO project, summaries of General Samford's press conference were distributed to intelligence officers. General Samford had outlined the future of the UFO project when he'd said:

"So our present course of action is to continue on this problem with the best of our ability, giving it the attention that we feel it very definitely warrants. We will give it adequate attention, but not frantic attention."

The summary of the press conference straightened things out to some extent and our flow of reports got back to normal.

I was anxious to start enlisting the aid of scientists, as General Samford had directed, but before this could be done we had a backlog of UFO reports that had to be evaluated. During July we had been swamped and had picked off only the best ones. Some of the reports we were working on during August had simple answers, but many were unknowns. There was one report that was of special interest because it was an excellent example of how a UFO report can at first appear to be absolutely

insoluble then suddenly fall apart under thorough investigation. It also points up the fact that our investigation and analysis were thorough and that when we finally stamped a report "Unknown" it was unknown. We weren't infallible but we didn't often let a clue slip by.

At exactly ten forty five on the morning of August 1, 1952, an ADC radar near Bellefontaine, Ohio, picked up a high speed unidentified target moving southwest, just north of Dayton. Two F-86's from the 97th Fighter Interceptor Squadron at Wright-Patterson were scrambled and in a few minutes they were climbing out toward where the radar showed the UFO to be. The radar didn't' have any height finding equipment so all that the ground controller at the radar site could do was to get the two F-86's over or under the target, and then they would have to find it visually.

When the two airplanes reached 30,000 feet, the ground controller called them and told them that they were almost on the target, which was still continuing its southwesterly course at about 525 miles an hour. In a few seconds the ground controller called back and told the lead pilot that the targets of his airplane and the UFO had blended on the radar scope and that the pilot would have to make a visual search; this was as close in as radar could get him. Then the radar broke down and went off the air.

But at almost that exact second the lead pilot looked up and there in the clear blue sky several thousand feet above him was a silver colored

---

sphere. The lead pilot pointed it out to his wing man and both of them started to climb. They went to their maximum altitude but they couldn't reach the UFO. After ten minutes of unsuccessful attempts to identify the huge silver sphere or disk - because at times it looked like a disk - one of the pilots hauled the nose of his F-86 up in a stall and exposed several feet of gun camera film. Just as he did this the warning light on his radar gun sight blinked on, indicating that something solid was in front of him - he wasn't photographing a sundog, hallucination, or refracted light.

The two pilots broke off the intercept and started back to Wright- Patterson when they suddenly realized that they were still northwest of the base, in almost the same location they had been when they started the intercept ten minutes before. The UFO had evidently slowed down from the speed that the radar had measured, 525 miles an hour, until it was hovering almost completely motionless.

As soon as the pilots were on the ground, the magazine of film from the gun camera was rushed to the photo lab and developed. The photos showed only a round, indistinct blob - no details - but they were proof that some type of unidentified flying object had been in the air north of Dayton.

Lieutenant Andy Flues was assigned to this one. He checked the locations of balloons and found out that a 20-foot-diameter radiosonde weather balloon from Wright-Patterson had been very near the area when the unsuccessful intercept took place, but the balloon wasn't traveling 525 miles an hour and it couldn't be picked up by the ground radar, so he investigated further. The UFO couldn't have been another airplane because airplanes don't hover in one spot and it was no atmospheric phenomenon. Andy wrote it off as an unknown but it still bothered him; that balloon in the area was mighty suspicious. He talked to the two pilots a half dozen times and spent a day at the radar site at Bellefontaine before he reversed his "Unknown" decision and came up with the answer.

The unidentified target that the radar had tracked across Ohio was a low flying jet. The jet was unidentified because there was a mix-up and the radar station didn't get its flight plan. Andy checked and found that a jet out of Cleveland had landed at Memphis at about eleven forty. At ten forty five this jet would have been north of Dayton on a southwesterly heading. When the ground controller blended the targets of the two F-86's into the unidentified target, they were at 30,000 feet and were looking for the target at their altitude or higher so they missed the low flying jet - but they did see the

balloon. Since the radar went out just as the pilots saw the balloon, the ground controller couldn't see that the

---

176.The Report on Unidentified Flying Objects

unidentified target he'd been watching was continuing on to the south- west. The pilots didn't bother to look around any more once they'd spotted the balloon because they thought they had the target in sight.

The only part of the sighting that still wasn't explained was the radar pickup on the F-86's gun sight. Lieutenant Flues checked around, did a little experimenting, and found out that the small transmitter box on a radiosonde balloon will give an indication on the radar used in F-86 gun sights.

To get a final bit of proof, Lieutenant Flues took the gun camera photos to the photo lab. The two F-86's had been at about 40,000 feet when the photos were taken and the 20 foot balloon was at about 70,000 feet. Andy's question to the photo lab was, "How big should a Biot balloon appear on a frame of 16 mm. movie film when the balloon is 30,000 feet away?"

The people in the photo lab made a few calculations and measurements and came up with the answer, "A 20 foot balloon photographed from 30,000 feet away would be the same size as the UFO in the gun camera photos."

By the middle of August, Project Blue Book was back to normal. Lieutenant Flues's Coca-Cola consumption had dropped from twenty bottles a day in mid July to his normal five. We were all getting a good night's sleep and it was now a rare occasion when my home telephone would ring in the middle of the night to report a new UFO.

But then on the morning of August 20 I was happily taking a shower, getting ready to go to work, when one of these rare occasions occurred and the phone rang - it was the ATIC OD. An operational immediate wire had just come in for Blue Book. He had gone over to the message center and gotten it. He thought that it was important and wanted me to come right out. For some reason he didn't want to read it over the phone, although it was not classified. I decided that if he said so I should come out, so I left in a hurry.

The wire was from the intelligence officer at an air base in Florida. The previous night a scoutmaster and three boy scouts had seen a UFO. The scoutmaster had been burned when he approached too close to the UFO. The wire went on to give a few sketchy details and state that the scoutmaster was a "solid citizen."

I immediately put in a long distance call to the intelligence officer. He confirmed the data in the wire. He had talked briefly to the scoutmaster on the phone and from all he could gather it was no hoax. The local police had been contacted and they verified the story and the fact of the burns. I asked the intelligence officer to contact the scoutmaster and ask

---

177. Hoax or Horror?

if he would submit to a physical examination immediately. I could imagine the rumors that could start about the scoutmaster's condition, and I wanted proof. The report sounded good, so I told the intelligence officer I'd get down to see him as soon as possible.

I immediately called Colonel Dunn, then chief at ATIC, and gave him a brief rundown. He agreed that I should go down to Florida as soon as possible and offered to try to get an Air Force B-25, which would save time over the airlines.

I told Bob Olsson to borrow a Geiger counter at Wright Field, then check out a camera. I called my wife and asked her to pack a few clothes and bring them out to me. Bob got the equipment, ran home and packed a bag, and in two hours he and I and our two pilots, Captain Bill Hoey and Captain David Douglas, were on our way to Florida to investigate one of the weirdest UFO reports that I came up against.

When we arrived, the intelligence officer arranged for the scoutmaster to come out to the air base. The latter knew we were coming, so he arrived at the base in a few minutes. He was a very pleasant chap, in his early thirties, not at all talkative but apparently willing to co-operate.

While he was giving us a brief personal history, I had the immediate impression that he was telling the truth. He'd lived in Florida all of his life. He'd gone to a private military prep school, had some college, and then had joined the Marines. He told us that he had been in the Pacific most of the war and repeated some rather hairy stories of what he'd been through. After the war he'd worked as an auto mechanic, then gone to Georgia for a while to work in a turpentine plant. After returning to Florida, he opened a gas station, but some hard luck had forced him to sell out. He was now working as a clerk in a hardware store. Some months back a local church had decided to organize a boy scout troop and he had offered to be the scoutmaster.

On the night before the weekly scout meeting had broken up early. He said that he had offered to give four of the boys a ride home. He had let one of the boys out when the conversation turned to a stock car race that was to take place soon. They talked about the condition of the track. It had been raining frequently, and they wondered if the track was flooded, so they drove out to look at it. Then they started south toward a nearby town to take another of the boys home. They took a blacktop road about 10 miles inland from the heavily traveled coastal highway that passes through sparsely settled areas of scrub pine and palmetto thickets.

They were riding along when the scoutmaster said that he noticed a light off to his left in the pines. He slowed down and asked the boys if

---

they'd seen it; none of them had. He started to drive on, when he saw the lights again. This time all of the boys saw them too, so he stopped. He said that he wanted to go back into the woods to see what was going on, but that the boys were afraid to stay alone. Again he started to drive on, but in a few seconds decided he had to go back. So he turned the car around, went back, and parked beside the road at a point just opposite where he'd seen the lights.

I stopped him at this point to find out a little bit more about why he'd decided to go back. People normally didn't go running off into palmetto thickets infested with rattlesnakes at night. He had a logical answer. The lights looked like an airplane crashing into the woods some distance away. He didn't believe that was what he saw, but the thought that this could be a possibility bothered him. After all, he had said, he was a scoutmaster, and if somebody was in trouble, his conscience would have bothered him the rest of his life if he hadn't investigated and it had been somebody in need of help.

A fifteen minute radio program had just started, and he told the boys that he was going to go into the woods, and that if he wasn't back by the time the program ended they should run down the road to a farmhouse that they had passed and get help. He got out and started directly into the woods, wearing a faded denim billed cap and carrying machete and two flashlights. One of the lights was a spare he carried in his back pocket.

He had traveled about 50 yards off the road when he ran into a palmetto thicket, so he stopped and

looked for a clear path. But finding none, he started pushing his way through the waist high tangle of brush.

When he stopped, he recalled later, he had first become aware of an odd odor. He couldn't exactly describe it to us, except to say that it was "sharp" or "pungent." It was very faint, actually more like a subconscious awareness at first. Another sensation he recalled after the incident was a very slight difference in temperature, hardly perceivable, like walking by a brick building in the evening after the sun has set. He hadn't thought anything about either the odor or the heat at the time but later, when they became important, he remembered them.

Paying no attention to these sensations then, he pushed on through the brush, looking up occasionally to check the north star, so that he could keep traveling straight east. After struggling through about 30 yards of palmetto undergrowth, he noticed a change in the shadows ahead of him and stopped to shine the flashlight farther ahead of him to find out if he was walking into a clearing or into one of the many ponds that dot that particular Florida area. It was a clearing.

---

179. Hoax or Horror?

The boy scouts in the car had been watching the scoutmaster's progress since they could see his light bobbing around. Occasionally he would shine it up at a tree or across the landscape for an instant, so they knew where he was in relation to the trees and thickets. They saw him stop at the edge of the open, shadowed area and shine his light ahead of him.

The scoutmaster then told us that when he stopped this second time he first became consciously aware of the odor and the heat. Both became much more noticeable as he stepped into the clearing. In fact, the heat became almost unbearable or, as he put it, "oppressively moist, making it hard to breathe."

He walked a few more paces and suddenly got a horrible feeling that somebody was watching him. He took another step, stopped, and looked up to find the north star. But he couldn't see the north star, or any stars. Then he suddenly saw that almost the whole sky was blanked out by a large dark shape about 30 feet above him.

He said that he had stood in this position for several seconds, or minutes - he didn't know how long - because now the feeling of being watched had overcome any power of reasoning he had. He managed to step back a few paces, and apparently got out from under the object, because he could see the edge of it silhouetted against the sky.

As he backed up, he said, the air became much cooler and fresher, helping him to think more clearly. He shone his light up at the edge of the object and got a quick but good look. It was circular shaped and slightly concave on the bottom. The surface was smooth and a grayish color. He pointed to a gray linoleum topped desk in the intelligence officer's room. "Just like that," he said. The upper part had a dome in the middle, like a turret. The edge of the saucer shaped object was thick and had vanes spaced about every foot, like buckets on a turbine wheel. Between each vane was a small opening, like a nozzle.

The next reaction that the scoutmaster recalled was one of fury. He wanted to harm or destroy whatever it was that he saw. All he had was a machete, but he wanted to try to jump up and strike at whatever he was looking at. No sooner did he get this idea than he noticed the shadows on the turret change ever so slightly and heard a sound, "like the opening of a well oiled safe door." He froze where he stood and noticed a small ball of red fire begin to drift toward him. As it floated down it expanded into a cloud of red mist. He dropped his light and machete, and put his arms over his face. As the mist enveloped him, he passed out.

The boy scouts, in the car, estimated that their scoutmaster had been gone about five minutes when they saw him stop at the edge of the clear-

---

ing, then walk on in. They saw him stop seconds later, hesitate a few more seconds, then shine the light up in the air. They thought he was just looking at the trees again. The next thing they said they saw was a big red ball of fire engulfing him. They saw him fall, so they spilled out of the car and took off down the road toward the farmhouse.

The farmer and his wife had a little difficulty getting the story out of the boys, they were so excited. All they could get was something about the boys' scoutmaster being in trouble down the road. The farmer called the Florida State Highway Patrol, who relayed the message to the county sheriff's office. In a few minutes a deputy sheriff and the local constable arrived. They picked up the scouts and drove to where their car was parked.

The scoutmaster had no idea of how long he had been unconscious. He vaguely remembered leaning against a tree, the feeling of wet, dew covered grass, and suddenly regaining his consciousness. His first reaction was to get out to the highway, so he started to run. About halfway through the palmetto thicket he saw a car stop on the highway. He ran toward it and found the deputy and constable with the boys.

He was so excited he could hardly get his story told coherently. Later the deputy said that in all his years as a law enforcement officer he had never seen anyone as scared as the scoutmaster was as he came up out of the ditch beside the road and walked into the glare of the headlights. As soon as he'd told his story, they all went back into the woods, picking their way around the palmetto thicket. The first thing they noticed was the flashlight, still burning, in a clump of grass. Next to it was a place where the grass was flattened down, as if a person had been lying there. They looked around for the extra light that the scoutmaster had been carrying, but it was gone. Later searches for this missing flashlight were equally fruitless. They marked the spot where the crushed grass was located and left. The constable took the boy scouts home and the scoutmaster followed the deputy to the sheriff's office. On the way to town the scoutmaster said he first noticed that his arms and face burned. When he arrived at the sheriff's office, he found that his arms, face, and cap were burned. The deputy called the Air Force.

There were six people listening to his story. Bob Olsson, the two pilots, the intelligence officer, his sergeant, and I. We each had previously agreed to pick one insignificant detail from the story and then requestioning the scoutmaster when he had finished. Our theory was that if he had made up the story be would either repeat the details perfectly or not remember what he'd said. I'd used this many times before, and it was a good indicator

---

of a lie. He passed the test with flying colors. His story sounded good to all of us.

We talked for about another hour, discussing the event and his background. He kept asking, "What did I see?" - evidently thinking that I knew. He said that the newspapers were after him, since the sheriff's office had inadvertently leaked the story, but that he had been stalling them off pending our arrival. I told him it was Air Force policy to allow people to say anything they wanted to about a UFO sighting. We had never muzzled anyone; it was his choice. With that, we thanked him, arranged to pick up the cap and machete to take back to Dayton, and sent him home in. a staff car.

By this time it was getting late, but I wanted to talk to the flight surgeon who had examined the man

that morning. The intelligence officer found him at the hospital and he said he would be right over. His report was very thorough. The only thing he could find out of the ordinary were minor burns on his arms and the back of his hands. There were also indications that the inside of his nostrils might be burned. The degree of burn could be compared to a light sunburn. The hair had also been singed, indicating a flash heat.

The flight surgeon had no idea how this specifically could have happened. It could have even been done with a cigarette lighter, and he took his lighter and singed a small area of his arm to demonstrate. He had been asked only to make a physical check, so that is what he'd done, but he did offer a suggestion. Check his Marine records; something didn't ring true. I didn't quite agree; the story sounded good to me.

The next morning my crew from ATIC, three people from the intelligence office, and the two law officers went out to where the incident had taken place. We found the spot where somebody had apparently been lying and the scoutmaster's path through the thicket. We checked the area with a Geiger counter, as a precautionary measure, not expecting to find anything; we didn't. We went over the area inch by inch, hoping to find a burned match with which a flare or fireworks could have been lighted, drippings from a flare, or anything that shouldn't have been in a deserted area of woods. We looked at the trees; they hadn't been hit by lightning. The blades of grass under which the UFO supposedly hovered were not burned. We found nothing to contradict the story. We took a few photos of the area and went back to town. On the way back we talked to the constable and the deputy. All they could do was to confirm what we'd heard.

We talked to the farmer and his wife - but they couldn't help. The few

---

facts that the boy scouts had given them before they had a chance to talk to their scoutmaster correlated with his story. We talked to the scout master's employer and some of his friends; he was a fine person. We questioned people who might have been in a position to also observe something; they saw nothing. The local citizens had a dozen theories, and we thoroughly checked each one.

He hadn't been struck by lightning. He hadn't run across a still. There was no indication that he'd surprised a gang of illegal turtle butchers, smugglers, or bootleggers. There was no indication of marsh gas or swamp fire. The mysterious blue lights in the area turned out to be a farmer arc-welding at night. The other flying saucers were the landing lights of air- planes landing at a nearby airport.

To be very honest, we were trying to prove that this was a hoax, but were having absolutely no success. Every new lead we dug up pointed to the same thing, a true story.

We finished our work on a Friday night and planned to leave early Saturday morning. Bob Olsson and I planned to fly back on a commercial airliner, as the B-25 was grounded for maintenance. Just after dinner that night I got a call from the sheriff's office. It was from a deputy I had talked to, not the one who met the scoutmaster coming out of the woods, but another one, who had been very interested in the incident. He had been doing a little independent checking and found that our singed UFO observer's background was not as clean as he led one to believe. He had been booted out of the Marines after a few months for being AWOL and stealing an automobile, and had spent some time in a federal reformatory in Chillicothe, Ohio. The deputy pointed out that this fact alone meant nothing but that he thought I might be interested in it. I agreed.

The next morning, early, I was awakened by a phone call from the intelligence officer. The morning paper carried the UFO story on the front page. It quoted the scoutmaster as saying that "high brass" from Washington had questioned him late into the night. There was no "high brass," just four

captains, a second lieutenant, and a sergeant. He knew we were from Dayton because we had discussed who we were and where we were stationed. The newspaper story went on to say that "he, the scout master, and the Air Force knew what he'd seen but he couldn't tell - it would create a national panic." He'd also hired a press agent. I could understand the "high brass from the Pentagon" as literary license by the press, but this "national panic" pitch was too much. I had just about decided to give up on this incident and write it off as "Unknown" until this happened. From all appearances, our scoutmaster was going to make a fast buck on his experience. Just before leaving for Dayton, I called

---

Major Dewey Fournet in the Pentagon and asked him to do some checking.

Monday morning the machete went to the materials lab at Wright- Patterson. The question we asked was, "Is there anything unusual about this machete? Is it magnetized? Is it radioactive? Has it been heated?" No knife was ever tested so thoroughly for so many things. As in using a Geiger counter to check the area over which the UFO had hovered in the Florida woods, our idea was to investigate every possible aspect of the sighting. They found nothing, just a plain, unmagnetized, unradioactive, unheated, common, everyday knife.

The cap was sent to a laboratory in Washington, D.C., along with the scoutmaster's story. Our question here was, "Does the cap in any way (burns, chemicals, etc.) substantiate or refute the story?"

I thought that we'd collected all the items that could be analyzed in a lab until somebody thought of one I'd missed, the most obvious of them all - soil and grass samples from under the spot where the UFO had hovered. We'd had samples, but in the last minute rush to get back to Dayton they had been left in Florida. I called Florida and they were shipped to Dayton and turned over to an agronomy lab for analysis.

By the end of the week I received a report on our ex-Marine's military and reformatory records. They confirmed a few suspicions and added new facts. They were not complimentary. The discrepancy between what we'd heard about the scoutmaster while we were in Florida and the records was considered a major factor. I decided that we should go back to Florida and try to resolve this discrepancy.

Since it was hurricane season, we had to wait a few days, then sneak back between two hurricanes. We contacted a dozen people in the city where the scoutmaster lived. All of them had known him for some time. We traced him from his early boyhood to the time of the sighting. To be sure that the people we talked to were reliable, we checked on them. The specific things we found out cannot be told since they were given to us in confidence, but we were convinced that the whole incident was a hoax.

We didn't talk to the scoutmaster again but we did talk to all the boy scouts one night at their scout meeting, and they retold how they had seen their scoutmaster knocked down by the ball of fire. The night before, we had gone out to the area of the sighting and, under approximately the same lighting conditions as existed on the night of the sighting, had re-enacted the scene - especially the part where the boy scouts saw their scoutmaster fall, covered with red fire. We found that not even by standing on top of the car could you see a person silhouetted in the clearing where the scoutmaster supposedly fell. The rest of their stories fell apart

---

to some extent too. They were not as positive of details as they had been previously.

When we returned to Dayton, the report on the cap had come back. The pattern of the scorch showed that the hat was flat when it was scorched, but the burned holes - the lab found some minute holes we had missed - had very probably been made by an electrical spark. This was all the lab could find.

During our previous visit we repeatedly asked the question, "Was the hat burned before you went into the woods?" and, "Had the cap been ironed?" We had received the same answers each time: "The hat was not burned because we [the boy scouts] were playing with it at the scout meeting and would have noticed the burns," and, "The cap was new; it had not been washed or ironed." It is rumored that the cap was never returned because it was proof of the authenticity of the sighting. The hat wasn't returned simply because the scoutmaster said that he didn't want it back. No secrets, no intrigue; it's as simple as that.

Everyone who was familiar with the incident, except a few people in the Pentagon, were convinced that this was a hoax until the lab called me about the grass samples we'd sent in. "How did the roots get charred?" Roots charred? I didn't even know what my caller was talking about. He explained that when they'd examined the grass they had knocked the dirt and sand off the roots of the grass clumps and found them charred. The blades of grass themselves were not damaged; they had never been heated, except on the extreme tips of the longer blades. These had evidently been bending over touching the ground and were also charred. The lab had duplicated the charring and had found that by placing live grass clumps in a pan of sand and dirt and heating it to about 300 degrees F. over a gas burner the charring could be duplicated. How it was actually done outside the lab they couldn't even guess.

As soon as we got the lab report, we checked a few possibilities ourselves. There were no hot underground springs to heat the earth, no chemicals in the soil, not a thing we found could explain it. The only way it could have been faked would have been to heat the earth from underneath to 300 degrees F., and how do you do this without using big and cumbersome equipment and disturbing the ground? You can't. Only a few people handled the grass specimens: the lab, the intelligence officer in Florida, and I. The lab wouldn't do it as a joke, then write an official report, and I didn't do it. This leaves the intelligence officer; I'm positive that he wouldn't do it. There may be a single answer everyone is over looking, but as of now the charred grass roots from Florida are still a mystery.

Hoax or Horror?185

Writing an official report on this incident was difficult. On one side of the ledger was a huge mass of circumstantial evidence very heavily weighted against the scoutmaster's story being true. On our second trip to Florida, Lieutenant Olsson and I heard story after story about the man's aptitude for dreaming up tall tales. One man told us, "If he told me the sun was shining, I'd look up to make sure." There were parts of his story and those of the boy scouts that didn't quite mesh. None of us ever believed the boy scouts were in on the hoax. They were undoubtedly so impressed by the story that they imagined a few things they didn't actually see. The scoutmaster's burns weren't proof of anything; the flight surgeon had duplicated these by burning his own arm with a cigarette lighter. But we didn't make step one in proving the incident to be a hoax. We thought up dozens of ways that the man could have set up the hoax but couldn't prove one.

In the scoutmaster's favor were the two pieces of physical evidence we couldn't explain, the holes burned in the cap and the charred grass roots.

The deputy sheriff who had first told me about the scoutmaster's Marine and prison record had also said, "Maybe this is the one time in his life he's telling the truth, but I doubt it."

So did we; we wrote off the incident as a hoax. The best hoax in UFO history.

Many people have asked why we didn't give the scoutmaster a lie detector test. We seriously considered it and consulted some experts in this field. They advised against it. In some definite types of cases the lie detector will not give valid results. This, they thought, was one of those cases. Had we done it and had he passed on the faulty results, the publicity would have been a headache.

There is one way to explain the charred grass roots, the burned cap, and a few other aspects of the incident. It's pure speculation; I don't believe that it is the answer, yet it is interesting. Since the blades of the grass were not damaged and the ground had not been disturbed, this one way is the only way (nobody has thought of any other way) the soil could have been heated. It could have been done by induction heating.

To quote from a section entitled "Induction Heating" from an electrical engineering textbook:

A rod of solid metal or any electrical conductor, when subjected to an alternating magnetic field, has electromotive forces set up in it. These electromotive forces cause what are known as "eddy currents." A rise in temperature results from "eddy currents."

Induction heating is a common method of melting metals in a foundry.

Replace the "rod of solid metal" mentioned above with damp sand, an

---

electrical conductor, and assume that a something that was generating a powerful alternating magnetic field was hovering over the ground, and you can explain how the grass roots were charred. To get an alternating magnetic field, some type of electrical equipment was needed. Electricity - electrical sparks - the holes burned in the cap "by electric sparks."

UFO propulsion comes into the picture when one remembers Dr. Einstein's unified field theory, concerning the relationship between electromagnetism and gravitation.

If this alternating magnetic field can heat metal, why didn't everything the scoutmaster had that was metal get hot enough to burn him? He had a flashlight, machete, coins in his pocket, etc. The answer - he wasn't under the UFO for more than a few seconds. He said that when he stopped to really look at it he had backed away from under it. He did feel some heat, possibly radiating from the ground.

To further pursue this line of speculation, the scoutmaster repeatedly mentioned the unusual odor near the UFO. He described it as being "sharp" or "pungent." Ozone gas is "sharp" or "pungent." To quote from a chemistry book, "Ozone is prepared by passing air between two plates which are charged at a high electrical potential." Electrical equipment again. Breathing too high a concentration of ozone gas will also cause you to lose consciousness.

I used to try out this induction heating theory on people to get their reaction. I tried it out one day on a scientist from Rand. He practically leaped at the idea. I laughed when I explained that I thought this theory just happened to tie together the unanswered aspects of the incident in Florida and was not the answer; he was slightly perturbed. "What do you want?" he said. "Does a UFO have to come in and land on your desk at ATIC?"

CHAPTER FOURTEEN

Digesting the Data

It was soon after we had written a finish to the Case of the Scoutmaster that I went into Washington to give another briefing on the latest UFO developments. Several reports had come in during early August that had been read with a good deal of interest in the military and other govern-

---

187. Digesting the Data

mental agencies. By late August 1952 several groups in Washington were following the UFO situation very closely.

The sighting that had stirred everyone up came from Haneda AFB, now Tokyo International Airport, in Japan. Since the sighting came from outside the U.S., we couldn't go out and investigate it, but the intelligence officers in the Far East Air Force had done a good job, so we had the complete story of this startling account of an encounter with a UFO. Only a few minor questions had been unanswered, and a quick wire to FEAF brought back these missing data. Normally it took up to three months to get routine questions back and forth, but this time the exchange of wires took only a matter of hours.

Several months after the sighting I talked to one of the FEAF intelligence officers who had investigated it, and in his estimation it was one of the best to come out of the Far East.

The first people to see the UFO were two control tower operators who were walking across the ramp at the air base heading toward the tower to start the midnight shift. They were about a half hour early so they weren't in any big hurry to get up into the tower - at least not until they saw a large brilliant light off to the northeast over Tokyo Bay. They stopped to look at the light for a few seconds thinking that it might be an exceptionally brilliant star, but both men had spent many lonely nights in a control tower when they had nothing to look at except stars and they had never seen anything like this bright before. Besides, the light was moving. The two men had lined it up with the corner of a hangar and could see that it was continually moving closer and drifting a little off to the right.

In a minute they had run across the ramp, up the several hundred steps to the tower, and were looking at the light through 7x50 binoculars. Both of the men, and the two tower operators whom they were relieving, got a good look at the UFO. The light was circular in shape and had a constant brilliance. It appeared to be the upper portion of a large, round, dark shape which was about four times the diameter of the light itself. As they watched, the UFO moved in closer, or at least it appeared to be getting closer because it became more distinct. When it moved in, the men could see a second and dimmer light on the lower edge of the dark, shadowy portion.

In a few minutes the UFO had moved off to the east, getting dimmer and dimmer as it disappeared. The four tower men kept watching the eastern sky, and suddenly the light began to reappear. It stayed in sight a few seconds, was gone again, and then for the third time it came back, heading toward the air base.

This time one of the tower operators picked up a microphone, called

---

188.The Report on Unidentified Flying Objects

the pilot of a C-54 that was crossing Tokyo Bay, and asked if he could see the light. The pilot didn't see anything unusual.

At 11:45 P.M., according to the logbook in the tower, one of the operators called a nearby radar site and asked if they had an unidentified target on their scopes. They did.

The FEAF intelligence officers who investigated the sighting made a special effort to try to find out if the radar's unidentified target and the light were the same object. They deduced that they were since, when the tower operators and the radar operators compared notes over the telephone, the light and the radar target were in the same location and were moving in the same direction.

For about five minutes the radar tracked the UFO as it cut back and forth across the central part of Tokyo Bay, sometimes traveling so slowly that it almost hovered and then speeding up to 300 miles an hour. All of this time the tower operators were watching the light through binoculars. Several times when the UFO approached the radar station - once it came within 10 miles - a radar operator went outside to find out if he could see the light but no one at the radar site ever saw it. Back at the air base the tower operators had called other people and they saw the light. Later on the tower man said that he had the distinct feeling that the light was highly directional, like a spotlight.

Some of the people who were watching thought that the UFO might be a lighted balloon; so, for the sake of comparison, a lighted weather balloon was released. But the light on the balloon was much more "yellowish" than the UFO and in a matter of seconds it had traveled far enough away that the light was no longer visible. This gave the observers a chance to compare the size of the balloon and the size of the dark, shadowy part of the UFO. Had the UFO been 10 miles away it would have been 50 feet in diameter.

Three minutes after midnight an F-94 scrambled from nearby Johnson AFB came into the area. The ground controller sent the F-94 south of Yokohama, up Tokyo Bay, and brought him in "behind" the UFO. The second that the ground controller had the F-94 pilot lined up and told him that he was in line for a radar run, the radar operator in the rear seat of the F-94 called out that he had a lock-on. His target was at 6,000 yards, 10 degrees to the right and 10 degrees below the F-94. The lockon was held for ninety seconds as the ground controller watched both the UFO and the F-94 make a turn and come toward the ground radar site. Just as the target entered the "ground clutter" - the permanent and solid target near the radar station caused by the radar beam's striking the ground - the lock-on was broken. The target seemed to pull away swiftly from the jet

---

interceptor. At almost this exact instant the tower operators reported that they had lost visual contact with the UFO. The tower called the F-94 and asked if they had seen anything visually during the chase - they hadn't. The F-94 crew stayed in the area ten or fifteen more minutes but couldn't see anything or pick up any more targets on their radar.

Soon after the F-94 left the area, both the ground radar and the tower operators picked up the UFO again. In about two minutes radar called the tower to say that their target had just "broken into three pieces" and that the three "pieces," spaced about a quarter of a mile apart, were leaving the area, going northeast. Seconds later tower operators lost sight of the light.

The FEAF intelligence officers had checked every possible angle but they could offer nothing to account for the sighting.

There were lots of opinions, weather targets for example, but once again the chances of a weather target's being in exactly the same direction as a bright star and having the star appear to move with the false radar target aren't too likely - to say the least. And then the same type of thing had happened twice before inside of a month's time, once in California and once in Michigan.

As one of the men at the briefing I gave said, "It's incredible, and I can't believe it, but those boys in

FEAF are in a war - they're veterans - and by damn, I think they know what they're talking about when they say they've never seen anything like this before."

I could go into a long discourse on the possible explanations for this sighting; I heard many, but in the end there would be only one positive answer - the UFO could not be identified as something we knew about. It could have been an interplanetary spaceship. Many people thought this was the answer and were all for sticking their necks out and establishing a category of conclusions for UFO reports and labeling it spacecraft. But the majority ruled, and a UFO remained an unidentified flying object.

On my next trip to the Pentagon I spent the whole day talking to Major Dewey Fournet and two of his bosses, Colonel W. A. Adams and Colonel Weldon Smith, about the UFO subject in general. One of the things we talked about was a new approach to the UFO problem - that of trying to prove that the motion of a UFO as it flew through the air was intelligently controlled.

I don't know who would get credit for originating the idea of trying to analyze the motion of the UFO's. It was one of those kinds of ideas that are passed around, with everyone adding a few modifications. We'd been talking about making a study of this idea for a long time, but we hadn't had many reports to work with; but now, with the mass of data that we

---

had accumulated in June and July and August, the prospects of such a study looked promising.

The basic aim of the study would be to learn whether the motion of the reported UFO's was random or ordered. Random motion is an unordered, helter-skelter motion very similar to a swarm of gnats or flies milling around. There is no apparent pattern or purpose to their flight paths. But take, for example, swallows flying around a chimney - they wheel, dart, and dip, but if you watch them closely, they have a definite pattern in their movements - an ordered motion. The definite pattern is intelligently controlled because they are catching bugs or getting in line to go down the chimney.

By the fall of 1952 we had a considerable number of well documented reports in which the UFO's made a series of maneuvers. If we could prove that these maneuvers were not random, but ordered, it would be proof that the UFO's were things that were intelligently controlled.

During our discussion Major Fournet brought up two reports in which the UFO seemed to know what it was doing and wasn't just aimlessly darting around. One of these was the recent sighting from Haneda AFB, Japan, and the other was the incident that happened on the night of July 29, when an F-94 attempted to intercept a UFO over eastern Michigan. In both cases radar had established the track of the UFO.

In the Haneda Incident, according to the sketch of the UFO's track, each turn the UFO made was constant and the straight "legs" between the turns were about the same length. The sketch of the UFO's flight path as it moved back and forth over Tokyo Bay reminded me very much of the "crisscross" search patterns we used to fly during World War II when we were searching for the crew of a ditched airplane. The only time the UFO seriously deviated from this pattern was when the F-94 got on its tail.

The Michigan sighting was even better, however. In this case there was a definite reason for every move that the UFO made. It made a 180 degree turn because the F-94 was closing on it head on. It alternately increased and decreased its speed, but every time it did this it was because the F-94 was closing in and it evidently put on speed to pull out ahead far enough to get out of range of the F-94's radar. To say that this motion was random and that it was just a coincidence that the UFO made the 180 degree turn when the F-94 closed in head on and that it was just a coincidence that the UFO

speeded up every time the F-94 began to get within radar range is pushing the chance of coincidence pretty hard.

The idea of the motion analysis study sounded interesting to me, but we were so busy on Project Blue Book we didn't have time to do it. So

---

191. Digesting the Data

Major Fournet offered to look into it further and I promised him all the help we could give him.

In the meantime my people in Project Blue Book were contacting various scientists in the U.S., and indirectly in Europe, telling them about our data, and collecting opinions. We did this in two ways. In the United States we briefed various scientific meetings and groups. To get the word to the other countries, we enlisted the gratis aid of scientists who were planning to attend conferences or meetings in Europe. We would brief these European bound scientists on all of the aspects of the UFO problem so they could informally discuss the problem with their European colleagues.

The one thing about these briefings that never failed to amaze me, although it happened time and time again, was the interest in UFO's within scientific circles. As soon as the word spread that Project Blue Book was giving official briefings to groups with the proper security clearances, we had no trouble in getting scientists to swap free advice for a briefing. I might add that we briefed only groups who were engaged in government work and who had the proper security clearances solely because we could discuss any government project that might be of help to us in pinning down the UFO. Our briefings weren't just squeezed in either; in many instances we would arrive at a place to find that a whole day had been set aside to talk about UFO's. And never once did I meet anyone who laughed off the whole subject of flying saucers even though publicly these same people had jovially sloughed off the press with answers of "hallucinations," "absurd," or "a waste of time and money." They weren't wild eyed fans but they were certainly interested.

Colonel S. H. Kirkland and I once spent a whole day briefing and talking to the Beacon Hill Group, the code name for a collection of some of the world's leading scientists and industrialists. This group, formed to consider and analyze the toughest of military problems, took a very serious interest in our project and gave much good advice. At Los Alamos and again at Sandia Base our briefings were given in auditoriums to standing room only crowds. In addition I gave my briefings at National Advisory Committee for Aeronautics laboratories, at Air Research and Development centers, at Office of Naval Research facilities and at the Air Force University. Then we briefed special groups of scientists.

Normally scientists are a cautious lot and stick close to proven facts, keeping their personal opinions confined to small groups of friends, but when they know that there is a sign on a door that says "Classified Briefing in Progress," inhibitions collapse like the theories that explain all the UFO's away. People say just what they think.

192.The Report on Unidentified Flying Objects

I could jazz up this part of the UFO story as so many other historians of the UFO have and say that Dr. So-and-So believes that the reported flying saucers are from outer space or that Dr. Whosita is firmly convinced that Mars is inhabited. I talked to plenty of Dr. So-and-So's who believed that flying saucers were real and who were absolutely convinced that other planets or bodies in the universe were inhabited, but we were looking for proven facts and not just personal opinions.

However, some of the questions we asked the scientists had to be answered by personal opinions because the exact answers didn't exist. When such questions came up, about all we could do was to

try to get the largest and most representative cross section of personal opinions upon which to base our decisions. In this category of questions probably the most frequently discussed was the possibility that other celestial bodies in the universe were populated with intelligent beings. The exact answer to this is that no one knows. But the consensus was that it wouldn't be at all surprising.

All the briefings we were giving added to our work load because UFO reports were still coming in in record amounts. The lack of newspaper publicity after the Washington sightings had had some effect because the number of reports dropped from nearly 500 in July to 175 in August, but this was still far above the normal average of twenty to thirty reports a month.

September 1952 started out with a rush, and for a while it looked as if UFO sightings were on the upswing again. For some reason, we never could determine why, we suddenly began to get reports from all over the southeastern United States. Every morning, for about a week or two, we'd have a half dozen or so new reports. Georgia and Alabama led the field. Many of the reports came from people in the vicinity of the then new super-hush-hush Atomic Energy Commission facility at Savannah River, Georgia. And many were coming from the port city of Mobile, Alabama. Our first thought, when the reports began to pour in, was that the news papers in these areas were possibly stirring things up with scare stories, but our newspaper clipping service covered the majority of the southern papers, and although we kept looking for publicity, none showed up. In fact, the papers only barely mentioned one or two of the sightings. As they came in, each of the sighting reports went through our identification process; they were checked against all balloon flights, aircraft flights, celestial bodies, and the MO file, but more than half of them came out as unknowns.

When the reports first began to come in, I had called the intelligence officers at all of the major military installations in the Southeast unsuc-

---

cessfully trying to find out if they could shed any light on the cause of the sightings. One man, the man who was responsible for UFO reports made to Brookley AFB, just outside of Mobile, Alabama, took a dim view of all of the proceedings. "They're all nuts," he said.

About a week later his story changed. It seems that one night, about the fourth night in a row that UFO's had been reported near Mobile, this man and several of his assistants decided to try to see these famous UFO's; about 10:00 P.M., the time that the UFO's were usually reported, they were gathered around the telephone in the man's office at Brookley AFB. Soon a report came in. The first question that the investigator who answered the phone asked was, "Can you still see it?"

The answer was "Yes," so the officer took off to see the UFO.

The same thing happened twice more, and two more officers left for different locations. The fourth time the phone rang the call was from the base radar station. They were picking up a UFO on radar, so the boss himself took off. He saw the UFO in air out over Mobile Bay and he saw the return of the UFO on the radarscope.

The next morning he called me at ATIC and for over an hour he told me what had happened. Never have I talked to four more ardent flying saucer believers.

We did quite a bit of work on the combination radar visual sighting at Brookley. First of all, radar visual sightings were the best type of UFO sightings we received. There are no explanations for how radar can pick up a UFO target that is being watched visually at the same time. Maybe I should have said there are no proven explanations on how this can happen, because, like everything else associated with the UFO, there was a theory. During the Washington National Sightings several people proposed the idea that the same temperature inversion layer that was causing the radar beam

to bend down and pick up a ground target was causing the target to appear to be in the air. They went on to say that we couldn't get a radar visual sighting unless the ground target was a truck, car, house, or something else that was lighted and could be seen at a great distance. The second reason the Brookley AFB sighting was so interesting was that it knocked this theory cold.

The radar at Brookley AFB was so located that part of the area that it scanned was over Mobile Bay. It was in this area that the UFO was detected. We thought of the theory that the same inversion layer that bent the radar beam also caused the target to appear to be in the air, and we began to do a little checking. There was a slight inversion but, according to our calculations, it wasn't enough to affect the radar. More important was the fact that in the area where the target appeared there were no

---

targets to pick up - let alone lighted targets. We checked and rechecked and found that at the time of the sighting there were no ships, buoys, or anything else that would give a radar return in the area of Mobile Bay in which we were interested.

Although this sighting wasn't as glamorous as some we had, it was highly significant because it was possible to show that the UFO couldn't have been a lighted surface target.

While we were investigating the sighting we talked to several electronics specialists about our radar visual sightings. One of the most frequent comments we heard was, "Why do all of these radar visual sightings occur at night?"

The answer was simple: they don't. On August 1, just before dawn, an ADC radar station outside of Yaak, Montana, on the extreme northern border of the United States, picked up a UFO. The report was very similar to the sighting at Brookley except it happened in the daylight and, instead of seeing a light, the crew at the radar station saw a "dark, cigar shaped object" right where the radar had the UFO pinpointed.

What these people saw is a mystery to this day.

Late in September I made a trip out to Headquarters, ADC to brief General Chidlaw and his staff on the past few months' UFO activity.

Our plans for periodic briefings, which we had originally set up with ADC, had suffered a bit in the summer because we were all busy elsewhere. They were still giving us the fullest co-operation, but we hadn't been keeping them as thoroughly read in as we would have liked to. I'd finished the briefing and was eating lunch at the officers' club with Major Verne Sadowski, Project Blue Book's liaison officer in ADC Intelligence, and several other officers. I had a hunch that something was bothering these people. Then finally Major Sadowski said, "Look, Rupe, are you giving us the straight story on these UFO's?"

I thought he meant that I was trying to spice things up a little, so I said that since he had copies of most of our reports and had read them, he should know that I was giving them the facts straight across the board.

Then one of the other officers at the table cut in, "That's just the point, we do have the reports and we have read them. None of us can understand why Intelligence is so hesitant to accept the fact that something we just don't know about is flying around in our skies - unless you are trying to cover up something big."

Everyone at the table put in his ideas. One radar man said that he'd looked over several dozen radar reports and that his conclusion was that the UFO's couldn't be anything but interplanetary spaceships.

He started to give his reasons when another radar man leaped into the conversation.

---

195. Digesting the Data

This man said that he'd read every radar report, too, and that there wasn't one that couldn't be explained as a weather phenomenon - even the radar visual sightings. In fact, he wasn't even convinced that we had ever gotten such a thing as radar visual sighting. He wanted to see proof that an object that was seen visually was the same object that the radar had picked up. Did we have it?

I got back into the discussion at this point with the answer. No, we didn't have proof if you want to get technical about the degree of proof needed. But we did have reports where the radar and visual bearings of the UFO coincided almost exactly. Then we had a few reports where airplanes had followed the UFO's and the maneuvers of the UFO that the pilot reported were the same as the maneuvers of the UFO that was being tracked by radar.

A lieutenant colonel who had been sitting quietly by interjected a well chosen comment. "It seems the difficulty that Project Blue Book faces is what to accept and what not to accept as proof."

The colonel had hit the proverbial nail on its proverbial head.

Then he went on, "Everyone has a different idea of what proof really is. Some people think we should accept a new model of an airplane after only five or ten hours of flight testing. This is enough proof for them that the airplane will fly. But others wouldn't be happy unless it was flight tested for five or ten years. These people have set an unreasonably high value on the word 'proof.' The answer is somewhere in between these two extremes."

But where is this point when it comes to UFO's?

There was about a thirty second pause for thought after the colonel's little speech. Then someone asked, "What about these recent sightings at Mainbrace?"

In late September 1952 the NATO naval forces had held maneuvers off the coast of Europe; they were called Operation Mainbrace. Before they had started someone in the Pentagon had half seriously mentioned that Naval Intelligence should keep an eye open for UFO's, but no one really expected the UFO's to show up. Nevertheless, once again the UFO's were their old unpredictable selves - they were there.

On September 20, a U.S. newspaper reporter aboard an aircraft carrier in the North Sea was photographing a carrier take-off in color when he happened to look back down the flight deck and saw a group of pilots and flight deck crew watching something in the sky. He went back to look and there was a silver sphere moving across the sky just behind the fleet of ships. The object appeared to be large, plenty large enough to show up in a photo, so the reporter shot several pictures. They were developed right

---

196.The Report on Unidentified Flying Objects

away and turned out to be excellent. He had gotten the superstructure of the carrier in each one and, judging by the size of the object in each successive photo, one could see that it was moving rapidly.

The intelligence officers aboard the carrier studied the photos. The object looked like a balloon. From its size it was apparent that if it were a balloon, it would have been launched from one of the ships, so the word went out on the TBS radio: "Who launched a balloon?"

The answer came back on the TBS: "Nobody."

Naval Intelligence double checked, triple checked and quadruple checked every ship near the carrier but they could find no one who had launched the UFO.

We kept after the Navy. The pilots and the flight deck crew who saw the UFO had mixed feelings - some were sure that the UFO was a balloon while others were just as sure that it couldn't have been. It was traveling too fast, and although it resembled a balloon in some ways it was far from being identical to the hundreds of balloons that the crew had seen the aerologists launch.

We probably wouldn't have tried so hard to get a definite answer to the Mainbrace photos if it hadn't been for the events that took place during the rest of the operation, I explained to the group of ADC officers.

The day after the photos had been taken six RAF pilots flying a formation of jet fighters over the North Sea saw something coming from the direction of the Mainbrace fleet. It was a shiny, spherical object, and they couldn't recognize it as anything "friendly" so they took after it. But in a minute or two they lost it. When they neared their base, one of the pilots looked back and saw that the UFO was now following him. He turned but the UFO also turned, and again it outdistanced the Meteor in a matter of minutes.

Then on the third consecutive day a UFO showed up near the fleet, this time over Topcliffe Aerodrome in England. A pilot in a Meteor was scrambled and managed to get his jet fairly close to the UFO, close enough to see that the object was "round, silvery, and white" and seemed to "rotate around its vertical axis and sort of wobble." But before he could close in to get a really good look it was gone.

It was these sightings, I was told by an RAF exchange intelligence officer in the Pentagon, that caused the RAF to officially recognize the UFO.

By the time I'd finished telling about the Mainbrace Sightings, it was after the lunch hour in the club and we were getting some get-the-hell-out of-here looks from the waiters, who wanted to clean up the dining room. But before I could suggest that we leave, Major Sadowski repeated his

---

original question - the one that started the whole discussion- "Are you holding out on us?"

I gave him an unqualified "No." We wanted more positive proof, and until we had it, UFO's would remain unidentified flying objects and no more.

The horizontal shaking of heads illustrated some of the group's thinking. We had plans for getting more positive proof, however, and I said that just as soon as we returned to Major Sadowski's office I'd tell them what we contemplated doing.

We moved out onto the sidewalk in front of the club and, after discussing a few more sightings, went back into the security area to Sadowski's office and I laid out our plans.

First of all, in November or December the U.S. was going to shoot the first H-bomb during Project Ivy. Although this was Top Secret at the time, it was about the most poorly kept secret in history - everybody seemed to know all about it. Some people in the Pentagon had the idea that there were beings, earthly or otherwise, who might be interested in our activities in the Pacific, as they seemed to be in Operation Mainbrace. Consequently Project Blue Book had been directed to get transportation to the test area to set up a reporting net, brief people on how to report, and analyze

their reports on the spot.

Secondly, Project Blue Book was working on plans for an extensive system to track UFO's by instruments. Brigadier General Garland, who had been General Samford's Deputy Director for Production and who had been riding herd on the UFO project for General Samford, was now chief at ATIC, having replaced Colonel Dunn, who went to the Air War College. General Garland had long been in favor of trying to get some concrete information, either positive or negative, about the UFO's. This planned tracking system would replace the defraction grid cameras that were still being developed at ATIC.

Thirdly, as soon as we could we were planning to gather together a group of scientists and let them spend a full week or two studying the UFO problem.

When I left ADC, Major Sadowski and crew were satisfied that we weren't just sitting around twiddling our UFO reports.

During the fall of 1952 reports continued to drop off steadily. By December we were down to the normal average of thirty per month, with about 20 percent of these falling into the "Unknown" category.

Our proposed trip to the Pacific to watch for UFO's during the H-bomb test was canceled at the last minute because we couldn't get space on an airplane. But the crews of Navy and Air Force security forces who did

---

go out to the tests were thoroughly briefed to look for UFO's, and they were given the procedures on how to track and report them. Back at Dayton we stood by to make quick analysis of any reports that might come in - none came. Nothing that fell into the UFO category was seen during the entire Project Ivy series of atomic shots.

By December work on the planning phase of our instrumentation program was completed. During the two months we had been working on it we had considered everything from giving Ground Observer Corps spotters simple wooden tracking devices to building special radars and cameras. We had talked over our problems with the people at Wright Field who knew about missile tracking equipment, and we had consulted the camera technicians at the Air Force Aerial Reconnaissance Laboratory. Astronomers explained their equipment and the techniques to use, and we went to Rome, New York, and Boston to enlist the aid of the people who develop the Air Force's electronic equipment.

Our final plan called for visual spotting stations to be established all over northern New Mexico. We'd picked this test location because northern New Mexico still consistently produced more reports than any other area in the U.S. These visual spotting stations would be equipped with a sighting device similar to a gun sight on a bomber. All the operator would have to do would be to follow the UFO with the tracking device, and the exact time and the UFO's azimuth and elevation angles would be automatically recorded. The visual spotting stations would all be tied together with an interphone system, so that as soon as the tracker at one station saw something he could alert the other spotters in the area. If two stations tracked the same object, we could immediately compute its speed and altitude.

This visual spotting net would be tied into the existing radar defense net in the Albuquerque-Los Alamos area. At each radar site we proposed that a long focal length camera be synchronized to the turning radar antenna, so that any time the operator saw a target he could press a button and photograph the portion of the sky exactly where the radar said a UFO was located. These cameras

would actually be astronomical telescopes, so that even the smallest light or object could be photographed.

In addition to this photography system we proposed that a number of sets of instruments be set out around the area. Each set would contain instruments to measure nuclear radiation, any disturbances in the earth's magnetic field, and the passage of a body that was giving off heat. The instruments would continually be sending their information to a central "UFO command post," which would also get reports directly from the radars and the visual spotting stations.

This instrumentation plan would cost about $250,000 because we planned to use as much surplus equipment as possible and tie it into existing communications systems, where they already existed. After the setup was established, it would cost about $25,000 a year to operate. At first glance this seemed like a lot of money, but when we figured out how much the UFO project had cost the Air Force in the past and how much it would probably cost in the future, the price didn't seem too bad - especially if we could solve the UFO problem once and for all.

The powers-that-be at ATIC O.K.'d the plan in December and it went to Washington, where it would have to be approved by General Samford before it went to ADC and then back to the Pentagon for higher Air Force official blessing. From all indications it looked as if we would get the necessary blessings.

But the majority of the effort at Project Blue Book during the fall of 1952 had gone toward collecting together all of the bits and pieces of data that we had accumulated over the past year and a half. We had sorted out the best of the "Unknowns" and made studies of certain aspects of the UFO problem, so that when we could assemble a panel of scientists to review the data we could give them the over-all picture, not just a basketful of parts.

Everyone who knew about the proposed panel meeting was eager to get started because everyone was interested in knowing what this panel would have to say. Although the group of scientists wouldn't be empowered to make the final decision, their recommendations were to go to the President if they decided that the UFO's were real. And any recommendations made by the group of names we planned to assemble would carry a lot of weight.

In the Pentagon and at ATIC book was being made on what their recommendations would be. When I put my money down, the odds were 5 to 3 in favor of the UFO.

CHAPTER FIFTEEN

The Radiation Story

The idea for gathering together a group of scientists, to whom we referred as our "panel of experts," had been conceived early in 1952 - as soon as serious talk about the possibility that the UFO's might be interplanetary

---

200.The Report on Unidentified Flying Objects

spaceships had taken hold in both military and scientific circles. In fact, when Project Grudge was reorganized in the summer of 1951 the idea had been mentioned, and this was the main reason that our charter had said we were to be only a fact finding group. The people on previous UFO projects had gone off on tangents of speculation about the identity of the UFO's; they first declared that they were spacecraft, then later, in a complete about face, they took the whole UFO problem as one big belly laugh. Both approaches had gotten the Air Force into trouble. Why they did this I don't know, because from the start we realized that no one at ATIC, in the Air Force, or in the whole military establishment was qualified to give a final yes or no answer to the UFO problem. Giving a final answer would require a serious decision - probably one of the most serious since the beginning of man.

During 1952 many highly qualified engineers and scientists had visited Project Blue Book and had spent a day or two going over our reports. Some were very much impressed with the reports - some had all the answers.

But all of the scientists who read our reports readily admitted that even though they may have thought that the reports did or did not indicate visitors from outer space, they would want to give the subject a good deal more study before they ever committed themselves in writing. Consequently the people's opinions, although they were valuable, didn't give us enough to base a decision upon. We still needed a group to study our material thoroughly and give us written conclusions and recommendations which could be sent to the President if necessary.

Our panel of experts was to consist of six or eight of the top scientists in the United States. We fully realized that even the Air Force didn't have enough "pull" just to ask all of these people to drop the important work they were engaged in and spend a week or two studying our reports. Nor did we want to do it this way; we wanted to be sure that we had something worth while before asking for their valuable time. So, working through other government agencies, we organized a preliminary review panel of four people. All of them were competent scientists and we knew their reputations were such that if they recommended that a certain top scientist sit on a panel to review our material he would do it.

In late November 1952 the preliminary review panel met at ATIC for three days.

When the meeting ended, the group unanimously recommended that a "higher court" be formed to review the case of the UFO. In an hour their recommendation was accepted by higher Air Force authorities, and the men proceeded to recommend the members for our proposed panel.

---

201. The Radiation Story

They picked six men who had reputations as being both practical and theoretical scientists and who were known to have no biased opinions regarding the UFO's.

The meeting of the panel, which would be held in Washington, was tentatively scheduled for late December or early January - depending upon when all of the scientists who had been asked to attend would be free. At Project Blue Book activity went into high gear as we made preparations for the meeting. But before we were very far along our preparations were temporarily sidetracked - I got a lead on the facts behind a rumor. Normally we didn't pay attention to rumors, but this one was in a different class.

Ever since the Air Force had become interested in UFO reports, the comment of those who had been requested to look them over and give a professional opinion was that we lacked the type of data "you could get your teeth into." In even our best reports we had to rely upon what someone had seen. I'd been told many times that if we had even one piece of information that was substantiated by some kind of recorded proof - a set of cinetheodolite movies of a UFO, a spectrum photograph, or any other kind of instrumented data that one could sit down and study - we would have no difficulty getting almost any scientist in the world interested in actively helping us find the answer to the UFO riddle.

The rumor that caused me to temporarily halt our preparations for the high level conference involved data that we might be able to get our teeth into.

This is the way it went:

In the fall of 1949, at some unspecified place in the United States, a group of scientists had set up equipment to measure background radiation, the small amount of harmless radiation that is always present in our atmosphere. This natural radiation varies to a certain degree, but will never increase by any appreciable amount unless there is a good reason.

According to the rumor, two of the scientists at the unnamed place were watching the equipment one day when, for no apparent reason, a sudden increase of radiation was indicated. The radiation remained high for a few seconds, then dropped back to normal. The increase over normal was not sufficient to be dangerous, but it definitely was unusual. All indications pointed to equipment malfunction as the most probable explanation. A quick check revealed no obvious trouble with the gear, and the two scientists were about to start a more detailed check when a third member of the radiation crew came rushing into the lab.

Before they could tell the newcomer about the unexplained radiation they had just picked up, he blurted out a story of his own. He had driven

---

to a nearby town, and on his return trip, as he approached the research lab, something in the sky suddenly caught his eye. High in the cloudless blue he saw three silvery objects moving in a V formation. They appeared to be spherical in shape, but he wasn't sure. The first fact that had hit him was that the objects were traveling too fast to be conventional aircraft. He jammed on the brakes, stopped his car, and shut off the engine. No sound. All he could hear was the quiet whir of a generator in the research lab. In a few seconds the objects had disappeared from sight.

After the first two scientists had briefed their excited colleague on the unusual radiation they had detected, the three men asked each other the $64 question: Was there any connection between the two incidents? Had the UFO's caused the excessive radiation?

They checked the time. Knowing almost exactly when the instruments had registered the increased radiation, they checked on how long it took to drive to the lab from the point where the three silver objects had been seen. The times correlated within a minute or two. The three men proceeded to check their radiation equipment thoroughly. Nothing was wrong.

The rumor stopped here. Nothing that I or anyone else on Project Blue Book could find out shed any further light on the source of the story. People associated with projects similar to the research lab that was mentioned in the rumor were sought out and questioned. Many of them had heard the story, but no one could add any new details. The three unknown scientists, at the unnamed lab, in an unknown part of the United States, might as well never have existed. Maybe they hadn't.

Almost a year after I had first heard the UFO radiation story I got a long-distance call from a friend on the west coast. I had seen him several months before, at which time I told him about this curious rumor and expressed my wish to find out how authentic it was. Now, on the phone, he told me he had just been in contact with two people he knew and they had the whole story. He said they would be in Los Angeles the following night and would like very much to talk to me.

I hated to fly clear to the west coast on what might be a wild goose chase, but I did. I couldn't afford to run the risk of losing an opportunity to turn that old recurrent rumor into fact.

Twenty hours later I met the two people at the Hollywood Roosevelt Hotel. We talked for several hours that night, and I got the details on the rumor and a lot more that I hadn't bargained for. Both of my informants were physicists working for the Atomic Energy Commission, and were recognized in their fields. They wanted no publicity and I promised them that they would get none. One of the men knew all the details behind the

---

rumor, and did most of the talking. To keep my promise of no publicity, I'll call him the "scientist."

The rumor version of the UFO radiation story that had been kicking around in Air Force and scientific circles for so long had been correct in detail but it was by no means complete. The scientist said that after the initial sighting had taken place word was spread at the research lab that the next time the instruments registered abnormal amounts of radiation, some of the personnel were to go outside immediately and look for some object in the sky.

About three weeks after the first incident a repetition did occur. While excessive radiation was registering on the instruments in the lab, a lone dark object was seen streaking across the sky. Again the instruments were checked but, as before, no malfunction was found.

After this second sighting, according to the scientist, an investigation was started at the laboratory. The people who made the visual observations weren't sure that the object they had seen couldn't have been an airplane. Someone thought that perhaps some type of radar equipment in the airplane, if that's what the object was, might have affected the radiation- detection equipment. So arrangements were made to fly all types of aircraft over the area with their radar in operation. Nothing unusual happened. All possible types of airborne research equipment were traced during similar flights in the hope that some special equipment not normally carried in aircraft would be found to have caused the jump in radiation. But nothing out of the ordinary occurred during these tests either.

It was tentatively concluded, the scientist continued, that the abnormally high radiation readings were "officially" due to some freakish equipment malfunction and that the objects sighted visually were birds or airplanes. A report to this effect was made to military authorities, but since the conclusion stated that no flying saucers were involved, the report went into some unknown file. Project Blue Book never got it.

Shortly after the second UFO radiation episode the research group finished its work. It was at this time that the scientist had first become aware of the incidents he related to me. A friend of his, one of the men involved in the sightings, had sent the details in a letter.

As the story of the sightings spread it was widely discussed in scientific circles, with the result that the conclusion, an equipment malfunction, began to be more seriously questioned. Among the scientists who felt that further investigation of such phenomena was in order, were the man to whom I was talking and some of the people who had made the original sightings.

204.The Report on Unidentified Flying Objects

About a year later the scientist and these original investigators were working together. They decided to make a few more tests, on their own time, but with radiation detection equipment so designed that the possibility of malfunction would be almost nil. They formed a group of people who were interested in the project, and on evenings and weekends assembled and set up their equipment in an abandoned building on a small mountain peak. To insure privacy and to avoid arousing undue interest among people not in on the project, the scientist and his colleagues told everyone that they had formed a mineral club. The "mineral club" deception covered their weekend expeditions because "rock hounds" are notorious for their addiction to scrambling around on mountains in search for specimens.

The equipment that the group had installed in the abandoned building was designed to be self operating. Geiger tubes were arranged in a pattern so that some idea as to the direction of the radiation source could be obtained. During the original sightings the equipment malfunction factor could not be definitely established or refuted because certain critical data had not been measured.

To get data on visual sightings, the "mineral club" had to rely on the flying saucer grapevine, which exists at every major scientific laboratory in the country.

By late summer of 1950 they were in business. For the next three months the scientist and his group kept their radiation equipment operating twenty-four hours a day, but the tapes showed nothing except the usual background activity. The saucer grapevine reported sightings in the general area of the tests, but none close to the instrumented mountain top.

The trip to the instrument shack, which had to be made every two days to change tapes, began to get tiresome for the "rock hounds," and there was some talk of discontinuing the watch.

But persistence paid off. Early in December, about ten o'clock in the morning, the grapevine reported sightings of a silvery, circular shaped object near the instrument shack. The UFO was seen by several people.

When the "rock hounds" checked the recording tapes in the shack they found that several of the Geiger tubes had been triggered at 10:17 A.M. The registered radiation increase was about 100 times greater than the normal background activity.

Three more times during the next two months the "mineral club's" equipment recorded abnormal radiation on occasions when the grapevine reported visual sightings of UFO's. One of the visual sightings was substantiated by radar.

---

205. The Radiation Story

After these incidents the "mineral club" kept its instruments in operation until June 1951, but nothing more was recorded. And, curiously enough, during this period while the radiation level remained normal, the visual sightings in the area dropped off too. The "mineral club" decided to concentrate on determining the significance of the data they had obtained.

Accordingly, the scientist and the group made a detailed study of their mountain top findings. They

had friends working on many research projects throughout the United States and managed to visit and confer with them while on business trips. They investigated the possibility of unusual sunspot activity, but sunspots had been normal during the brief periods of high radiation. To clinch the elimination of sunspots as a cause, their record tapes showed no burst of. radiation when sunspot activity had been abnormal.

The "rock hounds" checked every possible research project that might have produced some stray radiation for their instruments to pick up. They found nothing. They checked and rechecked their instruments, but could find no factor that might have induced false readings. They let other scientists in on their findings, hoping that these outsiders might be able to put their fingers on errors that had been overlooked.

Now, more than a year after the occurrence of the mysterious incidents that they had recorded, a year spent in analyzing their data, the "rock hounds" had no answer.

By the best scientific tests that they had been able to apply, the visual sightings and the high radiation had taken place more or less simultaneously.

Intriguing ideas are hard to kill, and this one had more than one life, possibly because of the element of mystery which surrounds the subject of flying saucers. But the scientific mind thrives on taking the mystery out of unexplained events, so it is not surprising that the investigation went on.

According to my friend the scientist, a few people outside the laboratory where the "rock hounds" worked were told about the activities of the "mineral club," and they started radiation detection groups of their own.

For instance, two graduate astronomy students from a southwestern university started a similar watch, on a modest scale, using a modified standard Geiger counter as their detection unit. They did not build a recorder into their equipment, however, and consequently were forced to man their equipment continuously, which naturally cut down the time they were in operation. On two occasions they reportedly detected a burst of high radiation.

Although the veracity of the two astronomers was not doubted, the scientist felt that the accuracy of their readings was poor because of the rather low quality of their equipment.

The scientist then told me about a far more impressive effort to verify or disprove the findings of the "mineral club." Word of the "rock hounds" and their work had also spread to a large laboratory in the East. An Air Force colonel, on duty at the lab, told the story to some of his friends, and they decided to look personally into the situation.

Fortunately these people were in a wonderful spot to make such an investigation. At their laboratory an extensive survey of the surrounding area was being made. An elaborate system of radiation detection equipment had been set up for a radius of 100 miles around the lab. In addition, the defenses of the area included a radar net.

Thanks to the flashing of silver eagles, the colonel's group got permission to check the records of the radiation survey station and to look over the logs of the radar stations. They found instances where, during the same period of time that radiation in the area had been much higher than normal, radar had had a UFO on the scope. These events had occurred during the period from January 1951 until about June 1951.

Upon learning of the tentative but encouraging findings that the colonel's group had dug out of their

past records, people on both the radiation survey crews and at the radar sites became interested in co-operating for further investigation. A tie-in with the local saucer grapevine established a three way check.

One evening in July, just before sunset, two of the colonel's group were driving home from the laboratory. As they sped along the highway they noticed two cars stopped ahead of them. The occupants were standing beside the road, looking at something in the sky.

The two scientists stopped, got out of their car, and scanned the sky too. Low on the eastern horizon they saw a bright circular object moving slowly north. They watched it for a while, took a few notes, then drove back to the lab.

Some interesting news awaited them there. Radar had picked up an unidentified target near the spot where the scientists in the car had seen the UFO, and it had been traveling north. A fighter had been scrambled, but when it got into the proper area, the radar target was off the scope. The pilot glimpsed something that looked like the reported UFO, but before he could check further he had to turn into the sun to get on an interception course, and he lost the object.

Several days passed before the radiation reports from all stations could be collected. When the reports did come in they showed that

---

stations east of the laboratory, on an approximate line with the radar track, had shown the highest increase in radiation. Stations west of the lab showed nothing.

The possible significance of this well covered incident spurred the colonel's group to extend and refine their activities. Their idea was to build a radiation detection instrument in an empty wing tank and hang the tank on an F-47. Then when a UFO was reported they would fly a search pattern in the area and try to establish whether or not a certain sector of the sky was more radioactive than other sectors. Also, they proposed to build a highly directional detector for the F-47 and attempt actually to track a UFO.

The design of such equipment was started, but many delays occurred. Before the colonel's group could get any of the equipment built, some of the members left the lab for other jobs, and the colonel, who sparked the operation, was himself transferred elsewhere. The entire effort collapsed.

The scientist was not surprised that I hadn't heard the story of the colonel's group. All the people involved, he said, had kept it quiet in order to avoid ridicule. The scientist added that he would be glad to give me all the data he had on the sightings of his "mineral club," and he told me where to get the information about the two astronomers and the colonel's group.

Armed with the scientist's notes and recorder tapes, I left for my office at Wright-Patterson Air Force Base, Dayton.

With the blessings of my chief, I started to run down the rest of the radiation information. The data we had, especially that from the scientist's "mineral club," had been thoroughly analyzed, but we thought that since we now had access to more general data something new and more significant might be found.

First I contacted the government agency for which all of the people involved in these investigations had been working, the scientists who recorded the original incident, the scientist and his "mineral club," the colonel's group, and the rest.

The people in the agency were very co-operative but stressed the fact that the activities I was investigating were strictly the extracurricular affairs of the scientists involved, had no official sanction, and should not be tied in with the agency in any way, shape, or form. This closed door reaction was typical of how the words "flying saucer" seem to scare some people.

They did help me locate the report on the original incident, however, and since it seemed to be the only existing copy, I arranged to borrow it.

208.The Report on Unidentified Flying Objects

About this same time we located the two graduate astronomy students in New Mexico. Both now had their Ph.D.'s and held responsible jobs on highly classified projects. They repeated their story, which I had first heard from the scientist, but had kept no record of their activities.

On one occasion, just before dawn on a Sunday morning, they were on the roof, making some meteorological observations. One of them was listening to the Geiger counter when he detected a definite increase in the clicking.

Just as the frequency of the clicks reached its highest peak - almost a steady buzz - a large fireball, described by them as "spectacular," flashed across the sky. Both of the observers had seen several of the green fireballs and said that this object was similar in all respects except that the color was a brilliant blue white.

With the disappearance of the fireball, the counter once more settled down to a steady click per second. They added that once before they had detected a similar increase in the frequency of the clicks but had seen nothing in the sky.

In telling their story, both astronomers stressed the point that their data were open to a great deal of criticism, mainly because of the limited instrumentation they had used. We agreed. Still their work tended to support the findings of the more elaborate and systematic radiation investigations.

The gods who watch over the UFO project were smiling about this time, because one morning I got a call from a colonel on Wright-Patterson Air Force Base. He was going to be in our area that morning and planned to stop in to see me.

He arrived in a few minutes and turned out to be none other than the colonel who had headed the group which had investigated UFO's and radiation at the eastern laboratory. He repeated his story. It was the same as I had heard from the scientist, with a few insignificant changes. The colonel had no records of his group's operations, but knew who had them. He promised to get a wire off to the person immediately, which he did.

The answer was a bit disappointing. During the intervening months the data had been scattered out among the members of the colonel's group, and when the group broke up, so did its collection of records.

So all we had to fall back on was the colonel's word, but since he now was heading a top priority project at Wright, it would be difficult not to believe him.

After obtaining the colonel's story, we collected all available data concerning known incidents in which there seemed to be a correlation

---

209. The Radiation Story

between the visual sighting of UFO's and the presence of excess atomic radiation in the area of the sightings.

There was one last thing to do. I wanted to take the dates and times of all the reported radiation increases and check them against all sources of UFO reports. This project would take a lot of leg work and digging, but I felt that it would offer the most positive and complete evidence we could assemble as to whether or not a correlation existed.

Accordingly, we dug into our files, ADC radar logs, press wire service files, newspaper morgues in the sighting area, and the files of individuals who collect data on saucers. Whenever we found a visual report that correlated with a radiation peak we checked it against weather conditions, balloon tracks, astronomical reports, etc.

As soon as the data had all been assembled, I arranged for a group of Air Force consultants to look it over. I got the same old answer - the data still aren't good enough. The men were very much interested in the reports, but when it came time to putting their comments on paper they said, "Not enough conclusive evidence." If in some way the UFO's could have been photographed at the same time that the radiation detectors were going wild, it would have been a different story, they later told me, but with the data I had for them this was the only answer they could give. No one could explain the sudden bursts of radiation, but there was no proof that they were associated with UFO's.

The board's ruling wrote finish to this investigation. I informed the colonel, and he didn't like the decision. Later I passed through the city where the scientist was working. I stopped over a few hours to brief him on the board's decision. He shook his head in disbelief.

It is interesting to note that both the colonel and the scientist reacted in the same way. We're not fools - we were there - we saw it - they didn't. What do they want for proof?

Chapter 16: The Hierarchy Ponders, Page 209

NICAP Home Page

CHAPTER SIXTEEN

The Hierarchy Ponders

By early January 1953 the scientists who were to be members of our panel of experts had been contacted and had agreed to sit in judgment of the UFO. In turn, we agreed to give them every detail about the UFO.

210.The Report on Unidentified Flying Objects

We had our best reports for them to read, and we were going to show them the two movies that some intelligence officers considered as the "positive proof" - the Tremonton Movie and the Montana Movie.

When this high court convened on the morning of January 12, the first thing it received was its orders; one of three verdicts would be acceptable:

1. All UFO reports are explainable as known objects or natural phenomena; therefore the investigation should be permanently discontinued.

2. The UFO reports do not contain enough data upon which to base a final conclusion. Project Blue Book should be continued in hopes of obtaining better data.

3. The UFO's are interplanetary spacecraft.

The written verdict, the group was told, would be given to the National Security Council, a council made up of the directors of all U.S. intelligence agencies, and thence it would go to the President of the United States - if they should decide that the UFO's were interplanetary spacecraft.

Because of military regulations, the names of the panel members, like the names of so many other people associated with the UFO story, cannot be revealed. Two of the men had made names for themselves as practical physicists - they could transform the highest theory for practical uses. One of these men had developed the radar that pulled us out of a big hole at the beginning of World War II, and the other had been one of the fathers of the H-bomb. Another of the panel members is now the chief civilian adviser to one of our top military commanders, and another was an astronomer whose unpublished fight to get the UFO recognized is respected throughout scientific circles. There was a man who is noted for his highly theoretical physics and mathematics, and another who had pioneered operations research during World War II. The sixth member of the panel had been honored by the American Rocket Society and the International Astronautical Federation for his work in moving space travel from the Buck Rogers realm to the point of near reality and who is now a rocket expert.

It was an impressive collection of top scientific talent.

During the first two days of the meeting I reviewed our findings for the scientists. Since June 1947, when the first UFO report had been made, ATIC had analyzed 1,593 UFO reports. About 4,400 had actually been received, but all except 1,593 had been immediately rejected for analysis. From our studies, we estimated that ATIC received reports of only 10 per cent of the UFO sightings that were made in the United States, therefore in five and a half years something like 44,000 UFO sightings had been made.

---

211. The Hierarchy Ponders

Of the 1,593 reports that had been analyzed by Project Blue Book, and we had studied and evaluated every report in the Air Force files, we had been able to explain a great many. The actual breakdown was like this:

Balloons

Known	1.57%
Probable	4.99%
Possible	11.95%
Total	18.51%

Aircraft

Known	0.98%
Probable	7.74%
Possible	3.04%
Total	11.76%

Astronomical Bodies

Known	2.79%
Probable	4.01%
Possible	7.40%
Total	14.20%

Other: 4.21%

i.e. Searchlights on clouds, birds, blowing paper, inversions, reflections, etc.

Hoaxes: 1.66%

Reports with insufficient data to evaluate: 22.72%

(In addition to those initially eliminated)

Unknowns: 26.94%

By using the terms "Known," "Probable," and "Possible," we were able to differentiate how positive we were of our conclusions. But even in the "Possible" cases we were, in our own minds, sure that we had identified the reported UFO.

And who made these reports? Pilots and air crews made 17.1 per cent from the air. Scientists and engineers made 5.7 per cent, airport control tower operators made an even 1.0 per cent of the reports, and 12.5 per cent of the total were radar reports. The remaining 63.7 per cent were made by military and civilian observers in general.

The reports that we were interested in were the 26.94 per cent or 429 "Unknowns," so we had studied them in great detail. We studied the reported colors of the UFO's, the shapes, the directions they were traveling, the times of day they were observed, and many more details,

---

but we could find no significant pattern or trends. We did find that the most often reported shape was elliptical and that the most often reported color was white or "metallic." About the same number of UFO's were reported as being seen in daytime as at night, and the direction of travel equally covered the sixteen cardinal headings of the compass.

Seventy per cent of the "Unknowns" had been seen visually from the air; 12 per cent had been seen visually from the ground; 10 per cent had been picked up by ground or airborne radar; and 8 per cent

were combination visual radar sightings.

In the over-all total of 1,593 sightings women made two reports for every one made by a man, but in the "Unknowns" the men beat out women ten to one.

There were two other factors we could never resolve, the frequency of the sightings and their geographical distribution. Since the first flurry of reports in July of 1947, each July brought a definite peak in reports; then a definite secondary peak occurred just before each Christmas. We plotted these peaks in sightings against high tides, world-wide atomic tests, the positions of the moon and planets, the general cloudiness over the United States, and a dozen and one other things, but we could never say what caused more people to see UFO's at certain times of the year.

Then the UFO's were habitually reported from areas around "technically interesting" places like our atomic energy installations, harbors, and critical manufacturing areas. Our studies showed that such vital military areas as Strategic Air Command and Air Defense Command bases, some A-bomb storage areas, and large military depots actually produced fewer reports than could be expected from a given area in the United States. Large population centers devoid of any major "technically interesting" facilities also produced few reports.

According to the laws of normal distribution, if UFO's are not intelligently controlled vehicles, the distribution of reports should have been similar to the distribution of population in the United States - it wasn't.

Our study of the geographical locations of sightings also covered other countries. The U.S. by no means had a curb on the UFO market

In all of our "Unknown" reports we never found one measurement of size, speed, or altitude that could be considered to be even fairly accurate. We could say only that some of the UFO's had been traveling pretty fast.

As far as radar was concerned, we had reports of fantastic speeds - up to 50,000 miles an hour - but in all of these instances there was some doubt as to exactly what caused the target. The highest speeds reported

---

for our combination radar visual sightings, which we considered to be the best type of sighting in our files, were 700 to 800 miles an hour.

We had never picked up any "hardware" - any whole saucers, pieces, or parts - that couldn't be readily identified as being something very earthly. We had a contract with a materials testing laboratory, and they would analyze any piece of material that we found or was sent to us. The tar covered marble, aluminum broom handle, cow manure, slag, pieces of plastic balloon, and the what-have-you that we did receive and analyze only served to give the people in our material lab some practice and added nothing but laughs to the UFO project.

The same went for the reports of "contacts" with spacemen. Since 1952 a dozen or so people have claimed that they have talked to or ridden with the crews of flying saucers. They offer affidavits, pieces of material, photographs, and other bits and pieces of junk as proof. We investigated some of these reports and could find absolutely no fact behind the stories.

We had a hundred or so photos of flying saucers, both stills and movies. Many were fakes some so expert that it took careful study by photo interpreters to show how the photos had been faked. Some were the crudest of fakes, automobile hub caps thrown into the air, homemade saucers suspended by

threads, and just plain retouched negatives. The rest of the still photos had been sent in by well meaning citizens who couldn't recognize a light flare of flaw in the negative, or who had chanced to get an excellent photo of a sundog or mirage.

But the movies that were sent in to us were different. In the first place, it takes an expert with elaborate equipment to fake a movie. We had or knew about four strips of movie film that fell into the "Unknown" category. Two were the cinetheodolite movies that had been taken at White Sands Proving Ground in April and May of 1950, one was the Montana Movie and the last was the Tremonton Movie. These latter two had been subjected to thousands of hours of analysis, and since we planned to give the panel of scientists more thorough reports on them on Friday, I skipped over their details and went to the next point I wanted to cover - theories.

Periodically throughout the history of the UFO people have come up with widely publicized theories to explain all UFO reports. The one that received the most publicity was the one offered by Dr. Donald Menzel of Harvard University. Dr. Menzel, writing in Time, Look, and later in his Flying Saucers, claimed that all UFO reports could be explained as various types of light phenomena. We studied this theory thoroughly because it did seem to have merit. Project Bear's physicists studied it. ATIC's scientific consultants studied it and discussed it with several

---

leading European physicists whose specialty was atmospheric physics. In general the comments that Project Blue Book received were, "He's given the subject some thought but his explanations are not the panacea."

And there were other widely publicized theories. One man said that they were all skyhook balloons, but we knew the flight path of every skyhook balloon and they were seldom reported as UFO's. Their little brothers, the weather balloons, caused us a great deal more trouble.

The Army Engineers took a crack at solving the UFO problem by making an announcement that a scientist in one of their laboratories had duplicated a flying saucer in his laboratory. Major Dewey Fournet checked into this one. It had all started out as a joke, but it was picked up as fact and the scientist was stuck with it. He gained some publicity but lost prestige because other scientists wondered just how competent the man really was to try to pass off such an answer.

All in all, the unsolicited assistance of theorists didn't help us a bit, I told the panel members. Some of them were evidently familiar with the theories because they nodded their heads in agreement.

The next topic I covered in my briefing was a question that came up quite frequently in discussions of the UFO: Did UFO reports actually start in 1947? We had spent a great deal of time trying to resolve this question. Old newspaper files, journals, and books that we found in the Library of Congress contained many reports of odd things being seen in the sky as far back as the Biblical times. The old Negro spiritual says, "Ezekiel saw a wheel 'way up in the middle of the air." We couldn't substantiate Ezekiel's sighting because many of the very old reports of odd things observed in the sky could be explained as natural phenomena that weren't fully understood in those days.

The first documented reports of sightings similar to the UFO sightings as we know them today appeared in the newspapers of 1896. In fact, the series of sightings that occurred in that year and the next had many points of similarity with the reports of today.

The sightings started in the San Francisco Bay area on the evening of November 22, 1896, when hundreds of people going home from work saw a large, dark, "cigar shaped object with stubby wings" traveling northwest across Oakland.

Within hours after the mystery craft had disappeared over what is now the northern end of the Golden Gate Bridge, the stories of people in other northern California towns began to come in on the telegraph wires. The citizens of Santa Rosa, Sacramento, Chico, and Red Bluff- several thousand of them saw it.

I tried to find out if the people in these outlying communities saw the

---

215. The Hierarchy Ponders

UFO before they heard the news from the San Francisco area or afterward, but trying to run down the details of a fifty-six-year-old UFO report is almost hopeless. Once while I was on a trip to Hamilton AFB I called the offices of the San Francisco Chronicle and they put me in touch with a retired employee who had worked on a San Francisco paper in 1896. I called the old gentleman on the phone and talked to him for a long time. He had been a copy boy at the time and remembered the incident, but time had canceled out the details. He did tell me that he, the editor of the paper, and the news staff had seen "the ship," as he referred to the UFO. His story, even though it was fifty six years old, smacked of others I'd heard when he said that no one at the newspaper ever told anyone what they had seen; they didn't want people to think that they were "crazy."

On November 30 the mystery ship was back over the San Francisco area and those people who had maintained that people were being fooled by a wag in a balloon became believers when the object was seen moving into the wind.

For four months reports came in from villages, cities, and farms in the West; then the Midwest, as the airship "moved eastward." In early April of 1897 people in Iowa, Nebraska, Missouri, Wisconsin, Minnesota, and Illinois reported seeing it. On April 10 it was reported to be over Chicago. Reports continued to come in to the newspapers until about April 20; then it, or stories about it, were gone. Literally thousands of people had seen it before the last report clicked in over the telegraph wires.

A study of the hundreds of newspaper accounts of this sighting that rocked the world in the late 1890's was interesting because the same controversies that arose then exist now. Those who hadn't seen the stubby winged, cigar shaped "craft" said, "Phooey," or the nineteenth- century version thereof. Those who had seen it were almost ready to do battle to uphold their integrity. Some astronomers loudly yelled, "Venus," "Jupiter," and "Alpha Orionis" while others said, "We saw it." Thomas Edison, the man of science of the day, disclaimed any knowledge of the mystery craft. "I prefer to devote my time to objects of commercial value," he told a New York Herald reporter. "At best airships would only be toys."

Thomas - you goofed on that prediction.

I had one more important point to cover before I finished my briefing and opened the meeting to a general question-and-answer session.

During the past year and a half we had had several astronomers visit Project Blue Book, and they were not at all hesitant to give us their opinions but they didn't care to say much about what their colleagues were thinking, although they did indicate that they were thinking. We decided

---

216.The Report on Unidentified Flying Objects

that the opinions and comments of astronomers would be of value, so late in 1952 we took a poll. We asked an astronomer, whom we knew to be unbiased about the UFO problem and who knew every outstanding astronomer in the United States, to take a trip and talk to his friends. We asked him not to make a point of asking about the UFO but just to work the subject into a friendly conversation.

This way we hoped to get a completely frank opinion. To protect his fellow astronomers, our astronomer gave them all code names and he kept the key to the code.

The report we received expressed the detailed opinions of forty five recognized authorities. Their opinions varied from that of Dr. C, who regarded the UFO project as a "silly waste of money to investigate an even sillier subject," to Dr. L, who has spent a great deal of his own valuable time personally investigating UFO reports because he believes that they are something "real." Of the forty five astronomers who were interviewed, 36 per cent were not at all interested in the UFO reports, 41 per cent were interested to the point of offering their services if they were ever needed, and 23 per cent thought that the UFO's were a much more serious problem than most people recognized.

None of the astronomers, even during a friendly discussion, admitted that he thought the UFO's could be interplanetary vehicles. All of those who were interested would only go so far as to say, "We don't know what they are, but they're something real."

During the past few years I have heard it said that if the UFO's were really "solid objects" our astronomers would have seen them. Our study shed some light on this point - astronomers have seen UFO's. None of them has ever seen or photographed anything resembling a UFO through his telescope, but 11 per cent of the forty five men had seen something that they couldn't explain. Although, technically speaking, these sightings were no better than hundreds of others in our files as far as details were concerned, they were good because of the caliber of the observer. Astronomers know what is in the sky.

It is interesting to note that out of the representative cross section of astronomers, five of them, or 11 per cent, had sighted UFO's. For a given group of people this is well above average. To check this point, the astronomer who was making our study picked ninety people at random - people he met while traveling - and got them into a conversation about flying saucers. These people were his "control group," to borrow a term from the psychologists. Although the percentage of people who were interested in UFO's was higher for the control group than for the group of astronomers, only 41 per cent of the astronomers were interested while 86 per cent of the control group were interested; 11 per cent of the

---

astronomers had seen UFO's, while only about 1 per cent of the control group had seen one. This seemed to indicate that as a group astronomers see many more UFO's than the average citizen.

When I finished my briefing, it was too late to start the question- and- answer session, so the first day's meeting adjourned. But promptly at nine o'clock the next morning the group was again gathered, and from the looks of the list of questions some of them had, they must have been thinking about UFO's all night.

One of the first questions was about the results of photography taken by the pairs of huge "meteorite patrol" cameras that are located in several places throughout North America. Did they ever photograph a UFO? The cameras, which are in operation almost every clear night, can photograph very dim lights, and once a light is photographed its speed and altitude can be very accurately established. If there were any objects giving off light as they flew through our atmosphere, there is a chance that these cameras might have photographed them. But they hadn't.

At first this seemed to be an important piece of evidence and we had just about racked this fact up as a definite score against the UFO when we did a little checking. If the UFO had been flying at an altitude of 100 miles, the chances of its being picked up by the cameras would be good, but the chances of photographing something flying any lower would be less.

This may account for the fact that while our "inquiring astronomer" was at the meteorite patrol camera sites, he talked to an astronomer who had seen a UFO while operating one of the patrol cameras.

Many people have asked why our astronomers haven't seen anything through their big telescopes. They are focused light years away and their field of vision is so narrow that even if UFO's did exist and littered the atmosphere they wouldn't be seen.

Another question the panel had was about Orson Welles' famous War of the Worlds broadcast of October 1938, which caused thousands of people to panic. Had we studied this to see if there were any similarities between it and the current UFO reporting?

We had.

Our psychologist looked into the matter and gave us an opinion - to make a complete study and get a positive answer would require an effort that would dwarf the entire UFO project. But he did have a few comments. There were many documented cases in which a series of innocent circumstances triggered by the broadcast had caused people to completely lose all sense of good judgment - to panic. There were some similar reports in our UFO files.

But we had many reports in which people reported UFO's and obviously

---

hadn't panicked. Reports from pilots who had seen mysterious lights at night and, thinking that they might be a cockpit reflection, had turned off all their cockpit lights. Or the pilots who turned and rolled their airplanes to see if they could change the angle of reflection and get rid of the UFO. Or those pilots who climbed and dove thousands of feet and then leveled out to see if the UFO would change its relative position to the airplane. Or the amateur astronomer who made an excellent sighting and before he reluctantly reported it as a UFO had talked to a half dozen professional astronomers and physicists in hopes of finding an explanation. All of these people were thinking clearly, questioning themselves as to what the sightings could be; then trying to answer their questions. These people weren't panicked.

The question-and-answer period went on for a full day as the scientists dug into the details of the general facts I had given them in my briefing.

The following day and a half was devoted to reviewing and discussing fifty of our best sighting reports that we had classed as "Unknowns."

The next item on the agenda, when the panel had finished absorbing all of the details of the fifty selected top reports, was a review of a very hot and very highly controversial study. It was based on the idea that Major Dewey Fournet and I had talked about several months before - an analysis of the motions of the reported UFO's in an attempt to determine whether they were intelligently controlled. The study was hot because it wasn't official and the reason it wasn't official was because it was so hot. It concluded that the UFO's were interplanetary spaceships. The report had circulated around high command levels of intelligence and it had been read with a good deal of interest. But even though some officers at command levels just a notch below General Samford bought it, the space behind the words "Approved by" was blank - no one would stick his neck out and officially send it to the top.

Dewey Fournet, who had completed his tour of active duty in the Air Force and was now a civilian, was called from Houston, Texas, to tell the scientists about the study since he had worked very closely with the group that had prepared it.

The study covered several hundred of our most detailed UFO reports. By a very critical process of elimination, based on the motion of the reported UFO's, Fournet told the panel how he and any previous analysis by Project Blue Book had been disregarded and how those reports that could have been caused by any one of the many dozen known objects - balloons, airplanes, astronomical bodies, etc., were sifted out. This sifting took quite a toll, and the study ended up with only ten or twenty reports that fell into the "Unknown" category. Since such critical methods of

---

219. The Hierarchy Ponders

evaluation had been used, these few reports proved beyond a doubt that the UFO's were intelligently controlled by persons with brains equal to or far surpassing ours.

The next step in the study, Fournet explained, was to find out where they came from. "Earthlings" were eliminated, leaving the final answer - spacemen.

Both Dewey and I had been somewhat worried about how the panel would react to a study with such definite conclusions. But when he finished his presentation, it was obvious from the tone of the questioning that the men were giving the conclusions serious thought. Fournet's excellent reputation was well known.

On Friday morning we presented the feature attractions of the session, the Tremonton Movie and the Montana Movie. These two bits of evidence represented the best photos of UFO's that Project Blue Book had to offer. The scientists knew about them, especially the Tremonton Movie, because since late July they had been the subject of many closed door conferences. Generals, admirals, and GS-16's had seen them at "command performances", and they had been flown to Kelly AFB in Texas to be shown to a conference of intelligence officers from all over the world. Two of the country's best military photo laboratories, the Air Force lab at Wright Field and the Navy's lab at Anacostia, Maryland, had spent many hours trying to prove that the UFO's were balloons, airplanes, or stray light reflections, but they failed - the UFO's were true unknowns. The possibility that the movie had been faked was considered but quickly rejected because only a Hollywood studio with elaborate equipment could do such a job and the people who filmed the movies didn't have this kind of equipment.

The Montana Movie had been taken on August 15, 1950, by Nick Mariana, the manager of the Great Falls baseball team. It showed two large bright lights flying across the blue sky in an echelon formation. There were no clouds in the movie to give an indication of the UFO's speed, but at one time they passed behind a water tower. The lights didn't show any detail; they appeared to be large circular objects.

Mariana had sent his movies to the Air Force back in 1950, but in 1950 as no interest in the UFO so , after a quick viewing, Project Grudge had written them off as "the reflections from two F-94 jet fighters that were in the area."

In 1952, at the request of the Pentagon, I reopened the investigation of the Montana Movie. Working through an intelligence officer at the Great Falls AFB, I had Mariana reinterrogated and obtained a copy of his movie, which I sent to the photo lab.

220.The Report on Unidentified Flying Objects

When the photo lab got the movie, they had a little something to work with because the two UFO's had passed behind a reference point, the water tower. Their calculations quickly confirmed that the objects were not birds, balloons, or meteors. Balloons drift with the wind and the wind was not

blowing in the direction that the two UFO's were traveling. No exact speeds could be measured, but the lab could determine that the lights were traveling too fast to be birds and too slow to be meteors.

This left airplanes as the only answer. The intelligence officer at Great Falls had dug through huge stacks of files and found that only two airplanes, two F-94's, were near the city during the sighting and that they had landed about two minutes afterwards. Both Mariana and his secretary, who had also seen the UFO's, had said that the two jets had appeared in another part of the sky only a minute or two after the two UFO's had disappeared in the southeast. This in itself would eliminate the jets as candidates for the UFO's, but we wanted to double check. The two circular lights didn't look like F-94's, but anyone who has done any flying can tell you that an airplane so far away that it can't be seen can suddenly catch the sun's rays and make a brilliant flash.

First we studied the flight paths of the two F-94's. We knew the landing pattern that was being used on the day of the sighting, and we knew when the two F-94's landed. The two jets just weren't anywhere close to where the two UFO's had been. Next we studied each individual light and both appeared to be too steady to be reflections.

We drew a blank on the Montana Movie - it was an unknown.

We also drew a blank on the Tremonton Movie, a movie that had been taken by a Navy Chief Photographer, Warrant Officer Delbert C. Newhouse, on July 2, 1952.

Our report on the incident showed that Newhouse, his wife, and their two children were driving to Oakland, California, from the east coast on this eventful day. They had just passed through Tremonton, Utah, a town north of Salt Lake City, and had traveled about 7 miles on U.S. Highway 30S when Mrs. Newhouse noticed a group of objects in the sky. She pointed them out to her husband; he looked, pulled over to the side of the road, stopped the car, and jumped out to get a better look. He didn't have to look very long to realize that something highly unusual was taking place because in his twenty one years in the Navy and 2,000 hours' flying time as an aerial photographer, he'd never seen anything like this. About a dozen shiny disk like objects were "milling around the sky in a rough formation."

Newhouse had his movie camera so he turned the turret around to a 3 inch telephoto lens and started to photograph the UFO's. He held the camera still and took several feet of film, getting all of the bright objects

---

in one photo. All of the UFO's had stayed in a compact group from the time the Newhouse family had first seen them, but just before they disappeared over the western horizon one of them left the main group and headed east. Newhouse swung his camera around and took several shots of it, holding his camera steady and letting the UFO pass through the field of view before it disappeared in the east.

When I received the Tremonton films I took them right over to the Wright Field photo lab, along with the Montana Movie, and the photo technicians and I ran them twenty or thirty times. The two movies were similar in that in both of them the objects appeared to be large circular lights - in neither one could you see any detail. But, unlike the Montana Movie, the lights in the Tremonton Movie would fade out, then come back in again. This fading immediately suggested airplanes reflecting light, but the roar of a king-sized dogfight could have been heard for miles and the Newhouse family had heard no sound. We called in several fighter pilots and they watched the UFO's circling and darting in and out in the cloudless blue sky. Their unqualified comment was that no airplane could do what the UFO's were doing.

Balloons came under suspicion, but the lab eliminated them just as quickly by studying the kind of a reflection given off by a balloon - it is a steady reflection since a balloon is spherical. Then, to further scuttle the balloon theory, clusters of balloons are tied together and don't mill around. Of course, the lone UFO that took off to the east by itself was the biggest argument against balloons.

Newhouse told an intelligence officer from the Western Air Defense Forces that he had held his camera still and let this single UFO fly through the field of view, so the people in the lab measured its angular velocity. Unfortunately there were no clouds in the sky, nor was he able to include any of the ground in the pictures, so our estimates of angular velocity had to be made assuming that the photographer held his camera still. Had the lone UFO been 10 miles away it would have been traveling several thousand miles an hour.

After studying the movies for several weeks, the Air Force photo lab at Wright Field gave up. All they had to say was, "We don't know what they are but they aren't airplanes or balloons, and we don't think they are birds."

While the lab had been working on the movies at Wright Field, Major Fournet had been talking to the Navy photo people at Anacostia; they thought they had some good ideas on how to analyze the movies, so as soon as we were through with them I sent them to Major Fournet and he took them over to the Navy lab.

The Navy lab spent about two months studying the films and had just

---

completed their analysis. The men who had done the work were on hand to brief the panel of scientists on their analysis after the panel had seen the movies.

We darkened the room and I would imagine that we ran each film ten times before every panel member was satisfied that he had seen and could remember all of the details. We ran both films together so that the men could compare them.

The Navy analysts didn't use the words "interplanetary spacecraft" when they told of their conclusions, but they did say that the UFO's were intelligently controlled vehicles and that they weren't airplanes or birds. They had arrived at this conclusion by making a frame-by-frame study of the motion of the lights and the changes in the lights' intensity.

When the Navy people had finished with their presentation, the scientists had questions. None of the panel members were trying to find fault with the work the Navy people had done, but they weren't going to accept the study until they had meticulously searched for every loophole. Then they found one.

In measuring the brilliance of the lights, the photo analysts had used an instrument called a densitometer. The astronomer on the panel knew all about measuring the density of an extremely small photographic image with a densitometer because he did it all the time in his studies of the stars. And the astronomer didn't think that the Navy analysts had used the correct technique in making their measurements. This didn't necessarily mean that their data were all wrong, but it did mean that they should recheck their work.

When the discussion of the Navy's report ended, one of the scientists asked to see the Tremonton Movie again; so I had the projectionists run it several more times. The man said that he thought the UFO's could be sea gulls soaring on a thermal current. He lived in Berkeley and said that he'd seen gulls high in the air over San Francisco Bay. We had thought of this possibility several months before because the area around the Great Salt Lake is inhabited by large white gulls. But the speed of

the lone UFO as it left the main group had eliminated the gulls. I pointed this out to the physicist. His answer was that the Navy warrant officer might have thought he had held the camera steady, but he could have "panned with the action" unconsciously. This would throw all of our computations way off. I agreed with this, but I couldn't agree that they were sea gulls.

But several months later I was in San Francisco waiting for an airliner to Los Angeles and I watched gulls soaring in a cloudless sky. They were "riding a thermal," and they were so high that you couldn't see them until they banked just a certain way; then they appeared to be a bright white

---

flash, much larger than one would expect from sea gulls. There was a strong resemblance to the UFO's in the Tremonton Movie. But I'm not sure that this is the answer.

The presentation of the two movies ended Project Blue Book's part of the meeting. In five days we had given the panel of scientists every pertinent detail in the history of the UFO, and it was up to them to tell us if they were real - some type of vehicle flying through our atmosphere. If they were real, then they would have to be spacecraft because no one at the meeting gave a second thought to the possibility that the UFO's might be a super secret U.S. aircraft or a Soviet development. The scientists knew everything that was going on in the U.S. and they knew that no country in the world had developed their technology far enough to build a craft that would perform as the UFO's were reported to do. In addition, we were spending billions of dollars on the research and development and the procurement of airplanes that were just nudging the speed of sound. It would be absurd to think that these billions were being spent to cover the existence of a UFO type weapon. And it would be equally absurd to think that the British, French, Russians or any other country could be far enough ahead of us to have a UFO.

The scientists spent the next two days pondering a conclusion. They reread reports and looked at the two movies again and again, they called other scientists to double check certain ideas that they had, and they discussed the problem among themselves. Then they wrote out their conclusions and each man signed the document. The first paragraph said:

We as a group do not believe that it is impossible for some other celestial body to be inhabited by intelligent creatures. Nor is it impossible that these creatures could have reached such a state of development that they could visit the earth. However, there is nothing in all of the so-called "flying saucer" reports that we have read that would indicate that this is taking place.

The Tremonton Movie had been rejected as proof but the panel did leave the door open a crack when they suggested that the Navy photo lab redo their study. But the Navy lab never rechecked their report, and it was over a year later before new data came to light.

After I got out of the Air Force I met Newhouse and talked to him for two hours. I've talked to many people who have reported UFO's, but few impressed me as much as Newhouse. I learned that when he and his family first saw the UFO's they were close to the car, much closer than when he took the movie. To use Newhouse's own words, "If they had been the size of a B-29 they would have been at 10,000 feet altitude." And the Navy man and his family had taken a good look at the objects - they

---

looked like "two pie pans, one inverted on the top of the other!" He didn't just think the UFO's were disk shaped; he knew that they were; he had plainly seen them. I asked him why he hadn't told this to the intelligence officer who interrogated him. He said that he had. Then I remembered that I'd sent the intelligence officer a list of questions I wanted Newhouse to answer. The question "What did the

UFO's look like?" wasn't one of them because when you have a picture of something you don't normally ask what it looks like. Why the intelligence officer didn't pass this information on to us I'll never know.

The Montana Movie was rejected by the panel as positive proof because even though the two observers said that the jets were in another part of the sky when they saw the UFO's and our study backed them up, there was still a chance that the two UFO's could have been the two jets. We couldn't prove the UFO's were the jets, but neither could we prove they weren't.

The controversial study of the UFO's' motions that Major Fournet had presented was discarded. All of the panel agreed that if there had been some permanent record of the motion of the UFO's, a photograph of a UFO's flight path or a photograph of a UFO's track on a radarscope, they could have given the study much more weight. But in every one of the ten or twenty reports that were offered as proof that the UFO's were intelligently controlled, the motions were only those that the observer had seen. And the human eye and mind are not accurate recorders. How many different stories do you get when a group of people watch two cars collide at an intersection?

Each of the fifty of our best sightings that we gave the scientists to study had some kind of a loophole. In many cases the loopholes were extremely small, but scientific evaluation has no room for even the smallest of loopholes and we had asked for a scientific evaluation.

When they had finished commenting on the reports, the scientists pointed seriousness of the decisi n they had been asked to make. They said that th tried hard to be objective and not to be picayunish but actually all we had wasstantial evidence. Good circumstantial evidence, to be sure, but we had othcrete, no hardware, no photos showing any detail of a UFO, no measured speedsdes, or siz es - nothing in the way of good, hard, cold, scientific facts. To stake the future course of millions of lives on a decision based upon circumstantial evidence would be one of the gravest mistakes in the history of the world.

In their conclusions they touched upon the possibility that the UFO's might be some type of new or yet undiscovered natural phenomenon. They explained that they hadn't given this too much credence; however, if the

---

225. The Hierarchy Ponders

UFO's were a new natural phenomenon, the reports of their general appearance should follow a definite pattern - the UFO reports didn't.

This ended the section of the panel's report that covered their conclusions. The next section was entitled, "Recommendations." I fully expected that they would recommend that we as least reduce the activities of Project Blue Book if not cancel it entirely. I didn't like this one bit because I was firmly convinced that we didn't have the final answer. We needed more and better proof before a final yes or no could be given.

The panel didn't recommend that the activities of Blue Book be cut back, and they didn't recommend that it be dropped. They recommended that it be expanded. Too many of the reports had been made by credible observers, the report said, people who should know what they're looking at - people who think things out carefully. Data that was out of the circumstantial - evidence class was badly needed. And the panel must have been at least partially convinced that an expanded effort would prove something interesting because the expansion they recommended would require a considerable sum of money. The investigative force of Project Blue Book should be quadrupled in size, they wrote, and it should be staffed by specially trained experts in the fields of electronics, meteorology, photography, physics, and other fields of science pertinent to UFO investigations. Every effort should be made to set up instruments in locations where UFO sightings are frequent, so that data could be measured and

recorded during a sighting. In other locations around the country military and civilian scientists should be alerted and instructed to use every piece of available equipment that could be used to track UFO's.

And lastly, they said that the American public should be told every detail of every phase of the UFO investigation - the details of the sightings, the official conclusions, and why the conclusions were made. This would serve a double purpose; it would dispel any of the mystery that security breeds and it would keep the Air Force on the ball - sloppy investigations and analyses would never occur.

When the panel's conclusions were made known in the government, they met with mixed reactions. Some people were satisfied, but others weren't. Even the opinions of a group of the country's top scientists couldn't overcome the controversy that had dogged the UFO for five years. Some of those who didn't like the decision had sat in on the UFO's trial as spectators and they felt that the "jury" was definitely prejudiced - afraid to stick their necks out. They could see no reason to continue to assume that the UFO's weren't interplanetary vehicles.

CHAPTER SEVENTEEN

What Are UFO's?

While the scientists were in Washington, D.C., pondering over the UFO, the UFO's weren't just sitting idly by waiting to find out what they were - they were out doing a little "lobbying" for the cause - keeping the interest stirred up.

And they were doing a good job, too.

It was just a few minutes before midnight on January 28, 1953, when a message flashed into Wright-Patterson for Project Blue Book. It was sent "Operational Immediate," so it had priority handling; I was reading it by 12:30 A.M.. A pilot had chased a UFO.

The report didn't have many details but it did sound good. It gave the pilot's name and said that he could be reached at Moody AFB. I put in a long distance call, found the pilot, and flipped on my recorder so that I could get his story word for word.

He told me that he had been flying an F-86 on a "round robin" navigation flight from Moody AFB to Lawson AFB to Robins AFB, then back to Moody - all in Georgia. At exactly nine thirty five he was at 6,000 feet, heading toward Lawson AFB on the first leg of his flight. He remembered that he had just looked down and had seen the lights of Albany, Georgia; then he'd looked up again and seen this bright white light at "ten o'clock high." It was an unusually bright light, and he said that he thought this was why it was so noticeable among the stars. He flew on for a few minutes watching it as he passed over Albany. He decided that it must be an extremely bright star or another airplane - except it just didn't look right. It had too much of a definitely circular shape.

It was a nice night to fly and he had to get in so much time anyway, so he thought he'd try to get a little closer to it. If it was an airplane, chances were he could close in and if it was a star, he should be able to climb up to 30,000 feet and the light shouldn't change its relative position. He checked his oxygen supply, increased the r.p.m. of the engine, and started to climb. In three or four minutes it was obvious that he was getting above the light, and he watched it; it had moved in relation to the

---

stars. It must be an airplane then, he'd decided - an airplane so far away that he couldn't see its red and green wing tip lights.

Since he'd gone this far, he decided that he'd get closer and make sure it was an airplane; so he dropped the nose of the F-86 and started down. As the needle on the machmeter nudged the red line, he saw that he was getting closer because the light was getting bigger, but still he couldn't see any lights other than the one big white one. Then it wasn't white any longer; it was changing color. In about a two second cycle it changed from white to red, then back to white again. It went through this cycle two or three times, and then before he could realize what was going on, he told me, the light changed in shape to a perfect triangle. Then it split into two triangles, one above the other. By this time he had leveled off and wasn't closing in any more. In a flash the whole thing was gone. He used the old standard description for a disappearing UFO: "It was just like someone turning off a light - it's there, then it's gone."

I asked him what he thought he'd seen. He'd thought about flying saucers, he said, but he "just couldn't swallow those stories." He thought he had a case of vertigo and the more he thought about it, the surer he was that this was the answer. He'd felt pretty foolish, he told me, and he was glad that he was alone.

Up ahead he saw the sprawling lights of Fort Benning and Lawson AFB, his turning point on the flight, and he'd started to turn but then he'd checked his fuel. The climb had used up quite a bit, so he changed his mind about going to Robins AFB and started straight back to Moody.

He called in to the ground station to change his flight plan, but before he could say anything the ground radio operator asked him if he'd seen a mysterious light.

Well - he'd seen a light.

Then the ground operator proceeded to tell him that the UFO chase had been watched on radar. First the radar had the UFO target on the scope, and it was a UFO because it was traveling much too slowly to be an airplane. Then the radar operators saw the F-86 approach, climb, and make a shallow dive toward the UFO. At first the F-86 had closed in on the UFO, but then the UFO had speeded up just enough to maintain a comfortable lead. This went on for two or three minutes; then it had moved off the scope at a terrific speed. The radar site had tried to call him, the ground station told the F-86 pilot, but they couldn't raise him so the message had to be relayed through the tower.

Rack up two more points for the UFO - another unknown and another confirmed believer.

228.The Report on Unidentified Flying Objects

Two or three weeks after the meeting of the panel of scientists in Washington I received word that Project Blue Book would follow the recommendations that the panel had made. I was to start implementing the plan right away. Our proposal for setting up instruments had gone to the Pentagon weeks before, so that was already taken care of. We needed more people, so I drew up a new organizational cable that called for more investigators and analysts and sent it through to ATIC's personnel section.

About this time in the history of the UFO the first of a series of snags came up. The scientists had strongly recommended that we hold nothing back - give the public everything. Accordingly, when the press got wind of the Tremonton Movie, which up until this time had been a closely guarded secret, I agreed to release it for the newsmen to see. I wrote a press release which was O.K.'d by General Garland, then the chief of ATIC, and sent it to the Pentagon. It told what the panel had said about the movies, "until proved otherwise there is no reason why the UFO's couldn't have been sea gulls." Then the release went on to say that we weren't sure exactly what the UFO's were, the sea gull theory was only an opinion. When the Pentagon got the draft of the release they screamed, "No!" No movie for the press and no press release. The sea gull theory was too weak, and we had a new publicity policy as of now - don't say anything.

This policy, incidentally, is still in effect. The January 7, 1955, issue of the Air Force Information Services Letter said, in essence, people in the Air Force are talking too much about UFO's - shut up. The old theory that if you ignore them they'll go away is again being followed.

Inside of a month the UFO project took a few more hard jolts. In December of 1952 I'd asked for a transfer. I'd agreed to stay on as chief of Blue Book until the end of February so that a replacement could be obtained and be broken in. But no replacement showed up. And none showed up when Lieutenant Rothstien's tour of active duty ended, when Lieutenant Andy Flues transferred to the Alaskan Air Command, or when others left. When I left the UFO project for a two month tour of temporary duty in Denver, Lieutenant Bob Olsson took over as chief. His staff consisted of Airman First Class Max Futch. Both men were old veterans of the UFO campaign of '52, but two people can do only so much.

When I came back to ATIC in July 1953 and took over another job, Lieutenant Olsson was just

getting out of the Air Force and Al/c Futch was now it. He said that he felt like the President of Antarctica on a non expedition year. In a few days I again had Project Blue Book, as an additional duty this time, and I had orders to "build it up."

---

229. What Are UFO's?

While I had been gone, our instrumentation plan had been rejected. Higher headquarters had decided against establishing a net of manned tracking stations, astronomical cameras tied in with radars, and our other proposed instrumentation. General Garland had argued long and hard for the plan, but he'd lost. It was decided that the cameras with diffraction gratings over the lenses, the cameras that had been under development for a year, would suffice.

The camera program had started out as a top priority project, but it had lost momentum fast when we'd tested these widely publicized instruments and found that they wouldn't satisfactorily photograph a million candle power flare at 450 yards. The cameras themselves were all right, but in combination with the gratings, they were no good. However, Lieutenant Olsson had been told to send them out, so he sent them out.

The first thing that I did when I returned to Project Blue Book was to go over the reports that had come in while I was away. There were several good reports but only one that was exceptional. It had taken place at Luke AFB, Arizona, the Air Force's advanced fighter bomber school that is named after the famous "balloon buster" of World War I, Lieutenant Frank Luke, Jr. It was a sighting that produced some very interesting photographs.

There were only a few high cirrus clouds in the sky late on the morning of March 3 when a pilot took off from Luke in an F-84 jet to log some time. He had been flying F-51's in Korea and had recently started to check out in the jets. He took off, cleared the traffic pattern, and started climbing toward Blythe Radio, about 130 miles west of Luke. He'd climbed for several minutes and had just picked up the coded letters BLH that identified Blythe Radio when he looked up through the corner glass in the front part of his canopy - high at about two o'clock he saw what he thought was an airplane angling across his course from left to right leaving a long, thin vapor trail. He glanced down at his altimeter and saw that he was at 23,000 feet. The object that was leaving the vapor trail must really be high, he remembered thinking, because he couldn't see any airplane at the head of it. He altered his course a few degrees to the right so that he could follow the trail and increased his rate of climb. Before long he could tell that he was gaining on the object, or whatever was leaving the vapor trail, because he was under the central part of it. But he still couldn't see any object. This was odd, he thought, because vapor trails don't just happen; something has to leave them. His altimeter had ticked off another 12,000 feet and he was now at 35,000. He kept on climbing, but soon the '84 began to mush; it was as high as it would go. The pilot dropped down 1,000 feet and continued on - now he was below

---

230.The Report on Unidentified Flying Objects

the front of the trail, but still no airplane. This bothered him too. Nothing that we have flies over 55,000 feet except a few experimental airplanes like the D-558 or those of the "X" series, and they don't stray far from Edwards AFB in California. He couldn't be more than 15,000 feet from the front of the trail, and you can recognize any kind of an airplane 15,000 feet away in the clear air of the sub stratosphere. He looked and he looked and he looked. He rocked the F-84 back and forth thinking maybe he had a flaw in the Plexiglas of the canopy that was blinking out the airplane, but still no airplane. Whatever it was, it was darn high or darn small. It was moving about 300 miles an hour because he had to pull off power and "S" to stay under it.

He was beginning to get low on fuel about this time so he hauled up the nose of the jet, took about 30

feet of gun camera film, and started down. When he landed and told his story, the film was quickly processed and rushed to the projection room. It showed a weird, thin, forked vapor trail - but no airplane.

Lieutenant Olsson and Airman Futch had worked this one over thoroughly. The photo lab confirmed that the trail was definitely a vapor trail, not a freak cloud formation. But Air Force Flight Service said, "No other airplanes in the area," and so did Air Defense Command, because minutes after the F-84 pilot broke off contact, the "object" had passed into an ADIZ - Air Defense Identification Zone - and radar had shown nothing.

There was one last possibility: Blue Book's astronomer said that the photos looked exactly like a meteor's smoke trail. But there was one hitch:

the pilot was positive that the head of the vapor trail was moving at about 300 miles an hour. He didn't know exactly how much ground he'd covered, but when he first picked up Blythe Radio he was on Green S airway, about 30 miles west of his base, and when he'd given up the chase he'd gotten another radio bearing, and he was now almost up to Needles Radio, 70 miles north of Blythe. He could see a lake, Lake Mojave, in the distance.

Could a high altitude jet stream wind have been blowing the smoke cloud? Futch had checked this - no. The winds above 20,000 feet were the usual westerlies and the jet stream was far to the north.

Several months later I talked to a captain who had been at Luke when this sighting occurred. He knew the F-84 pilot and he'd heard him tell his story in great detail. I won't say that he was a confirmed believer, but he was interested. "I never thought much about these reports before," he said, "but I know this guy well. He's not nuts. What do you think he saw?"

I don't know what he saw. Maybe he didn't travel as far as he thought he did. If he didn't, then I'd guess that he saw a meteor's smoke trail. But if he did know that he'd covered some 80 miles during the chase, I'd say

---

that he saw a UFO - a real one. And I find it hard to believe that pilots don't know what they're doing.

During the summer of 1953, UFO reports dropped off considerably. During May, June, and July of 1952 we'd received 637 good reports. During the same months in 1953 we received only seventy six. We had been waiting for the magic month of July to roll around again because every July there had been the sudden and unexplained peak in reporting; we wanted to know if it would happen again. It didn't - only twenty one reports came in, to make July the lowest month of the year. But July did bring new developments.

Project Blue Book got a badly needed shot in the arm when an unpublicized but highly important change took place: another intelligence agency began to take over all field investigations.

Ever since I'd returned to the project, the orders had been to build it up - get more people - do what the panel recommended. But when I'd asked for more people, all I got was a polite "So sorry." So, I did the next best thing and tried to find some organization already in being which could and would help us. I happened to be expounding my troubles one day at Air Defense Command Headquarters while I was briefing General Burgess, ADC's Director of Intelligence, and he told me about his 4602nd Air Intelligence Squadron, a specialized intelligence unit that had recently become operational. Maybe it could help - he'd see what he could work out, he told me.

Now in the military all commitments to do something carry an almost standard time factor. "I'll expedite it," means nothing will happen for at least two weeks. "I'll do it right away," means from a month to six weeks. An answer like, "I'll see what I can work out," requires writing a memo that explains what the person was going to see if he could work out, and sealing it in a time capsule for preservation so that when the answer finally does come through the future generation that receives it will know how it all started. But I underestimated the efficiency of the Air Defense Command. Inside of two weeks General Burgess had called General Garland, they'd discussed the problem, and I was back in Colorado Springs setting up a program with Colonel White's 4602nd.

The 4602nd's primary function is to interrogate captured enemy airmen during wartime; in peacetime all that they can do is participate in simulated problems. Investigating UFO reports would supplement these problems and add a factor of realism that would be invaluable in their training. The 4602nd had field teams spread out all over the United States, and these teams could travel anywhere by airplane, helicopter, canoe, jeep, or skis on a minute's notice. The field teams had already established a

---

working contact with the highway patrols, sheriffs' offices, police, and the other military in their respective areas, so they were in an excellent position to collect facts about a UFO report. Each member of the field teams had been especially chosen and trained in the art of interrogation, and each team had a technical specialist. We couldn't have asked for a better ally.

Project Blue Book was once more back in business. Until the formal paper work went through, our plan was that whenever a UFO report worth investigating came in we would call the 4602nd and they would get a team out right away. The team would make a thorough investigation and wire us their report. If the answer came back "Unknown," we would study the details of the sighting and, with the help of Project Bear, try to find the answer.

A few weeks after the final plans had been made with the 4602nd, I again bade farewell to Project Blue Book. In a simple ceremony on the poop deck of one of the flying saucers that I frequently have been accused of capturing, before a formation of the three-foot-tall green men that I have equally as frequently been accused of keeping prisoner, I turned my command over to Al/c Max Futch and walked out the door into civilian life with separation orders in hand.

The UFO's must have known that I was leaving because the day I found out that officers with my specialty, technical intelligence, were no longer on the critical list and that I could soon get out of the service, they really put on a show. The show they put on is still the best UFO report in the Air Force files.

I first heard about the sighting about two o'clock on the morning of August 13, 1953, when Max Futch called me from ATIC. A few minutes before a wire had come in carrying a priority just under that reserved for flashing the word the U.S. has been attacked. Max had been called over to ATIC by the OD to see the report, and he thought that I should see it. I was a little hesitant to get dressed and go out to the base, so I asked Max what he thought about the report. His classic answer will go down in UFO history, "Captain," Max said in his slow, pure Louisiana drawl, "you know that for a year I've read every flying saucer report that's come in and that I never really believed in the things." Then he hesitated and added, so fast that I could hardly understand him, "But you should read this wire." The speed with which he uttered this last statement was in itself enough to convince me. When Max talked fast, something was important.

A half hour later I was at ATIC - just in time to get a call from the Pentagon. Someone else had gotten out of bed to read his copy of the wire.

233. What Are UFO's?

I used the emergency orders that I always kept in my desk and caught the first airliner out of Dayton to Rapid City, South Dakota. I didn't call the 4602nd because I wanted to investigate this one personally. I talked to everyone involved in the incident and pieced together an amazing story.

Shortly after dark on the night of the twelfth, the Air Defense Command radar station at Ellsworth AFB, just east of Rapid City, had received a call from the local Ground Observer Corps filter center. A lady spotter at Black Hawk, about 10 miles west of Ellsworth, had reported an extremely bright light low on the horizon, off to the northeast. The radar had been scanning an area to the west, working a jet fighter in some practice patrols, but when they got the report they moved the sector scan to the northeast quadrant. There was a target exactly where the lady reported the light to be. The warrant officer, who was the duty controller for the night, told me that he'd studied the target for several minutes. He knew how weather could affect radar but this target was "well defined, solid, and bright." It seemed to be moving, but very slowly. He called for an altitude reading, and the man on the height finding radar checked his scope. He also had the target - it was at 16,000 feet.

The warrant officer picked up the phone and asked the filter center to connect him with the spotter. They did, and the two people compared notes on the UFO's position for several minutes. But right in the middle of a sentence the lady suddenly stopped and excitedly said, "It's starting to move - it's moving southwest toward Rapid."

The controller looked down at his scope and the target was beginning to pick up speed and move southwest. He yelled at two of his men to run outside and take a look. In a second or two one of them shouted back that they could both see a large bluish white light moving toward Rapid City. The controller looked down at his scope - the target was moving toward Rapid City. As all three parties watched the light and kept up a steady cross conversation of the description, the UFO swiftly made a wide sweep around Rapid City and returned to its original position in the sky.

A master sergeant. who had seen and heard the happenings told me that in all his years of duty - combat radar operations in both Europe and Korea - he'd never been so completely awed by anything. When the warrant officer had yelled down at him and asked him what he thought they should do, he'd just stood there. "After all," he told me, "what in hell could we do - they're bigger than all of us."

But the warrant officer did do something. He called to the F-84 pilot he had on combat air patrol west of the base and told him to get ready for an intercept. He brought the pilot around south of the base and gave him a course correction that would take him right into the light, which

234.The Report on Unidentified Flying Objects

was still at 16,000 feet. By this time the pilot had it spotted. He made the turn, and when he closed to within about 3 miles of the target, it began to move. The controller saw it begin to move, the spotter saw it begin to move and the pilot saw it begin to move - all at the same time. There was now no doubt that all of them were watching the same object.

Once it began to move, the UFO picked up speed fast and started to climb, heading north, but the F-84 was right on its tall. The pilot would notice that the light was getting brighter, and he'd call the controller to tell him about it. But the controller's answer would always be the same, "Roger, we can see it on the scope."

There was always a limit as to how near the jet could get, however. The controller told me that it was just as if the UFO had some kind of an automatic warning radar linked to its power supply. When

something got too close to it, it would automatically pick up speed and pull away. The separation distance always remained about 3 miles.

The chase continued on north - out of sight of the lights of Rapid City and the base - into some very black night.

When the UFO and the F-84 got about 120 miles to the north, the pilot checked his fuel; he had to come back. And when I talked to him, he said he was damn glad that he was running out of fuel because being out over some mighty desolate country alone with a UFO can cause some worry.

Both the UFO and the F-84 had gone off the scope, but in a few minutes the jet was back on, heading for home. Then 10 or 15 miles behind it was the UFO target also coming back.

While the UFO and the F-84 were returning to the base - the F-84 was planning to land - the controller received a call from the jet interceptor squadron on the base. The alert pilots at the squadron had heard the conversations on their radio and didn't believe it. "Who's nuts up there?" was the comment that passed over the wire from the pilots to the radar people. There was an F-84 on the line ready to scramble, the man on the phone said, and one of the pilots, a World War II and Korean veteran, wanted to go up and see a flying saucer. The controller said, "O.K., go."

In a minute or two the F-84 was airborne and the controller was working him toward the light. The pilot saw it right away and closed in. Again the light began to climb out, this time more toward the northeast. The pilot also began to climb, and before long the light, which at first had been about 30 degrees above his horizontal line of sight, was now below him. He nosed the '84 down to pick up speed, but it was the same old story - as soon as he'd get within 3 miles of the UFO, it would put on a burst of speed and stay out ahead.

Even though the pilot could see the light and hear the ground controller

---

telling him that he was above it, and alternately gaining on it or dropping back, he still couldn't believe it - there must be a simple explanation. He turned off all of his lights - it wasn't a reflection from any of the airplane's lights because there it was. A reflection from a ground light, maybe. He rolled the airplane - the position of the light didn't change. A star - he picked out three bright stars near the light and watched carefully. The UFO moved in relation to the three stars. Well, he thought to himself, if it's a real object out there, my radar should pick it up too; so he flipped on his radar ranging gun sight. In a few seconds the red light on his sight blinked on - something real and solid was in front of him. Then he was scared. When I talked to him, he readily admitted that he'd been scared. He'd met MD 109's, FW 190's and ME 262's over Germany and he'd met MIG-21's over Korea but the large, bright, bluish white light had scared him - he asked the controller if he could break off the intercept.

This time the light didn't come back.

When the UFO went off the scope it was headed toward Fargo, North Dakota, so the controller called the Fargo filter center. "Had they had any reports of unidentified lights?" he asked. They hadn't.

But in a few minutes a call came back. Spotter posts on a southwest- northeast line a few miles west of Fargo had reported a fast moving, bright bluish white light.

This was an unknown - the best.

The sighting was thoroughly investigated, and I could devote pages of detail on how we looked into every facet of the incident; but it will suffice to say that in every facet we looked into we saw nothing. Nothing but a big question mark asking what was it.

When I left Project Blue Book and the Air Force I severed all official associations with the UFO. But the UFO is like hard drink; you always seem to drift back to it. People I've met, people at work, and friends of friends are continually asking about the subject. In the past few months the circulation manager of a large Los Angeles newspaper, one of Douglas Aircraft Company's top scientists, a man who is guiding the future development of the super secret Atlas intercontinental guided missile, a movie star, and a German rocket expert have called me and wanted to get together to talk about UFO's. Some of them had seen one.

I have kept up with the activity of the UFO and Project Blue Book over the past two years through friends who are still in intelligence. Before Max Futch got out of the Air Force and went back to law school he wrote to me quite often and a part of his letters were always devoted to the latest about the UFO's.

Then I make frequent business trips to ATIC, and I always stop in to

---

see Captain Charles Hardin, who is now in charge of Blue Book, for a "What's new?" I always go to ATIC with the proper security clearances so I'm sure I get a straight answer to my question.

Since I left ATIC, the UFO's haven't gone away and neither has the interest. There hasn't been too much about them in the newspapers because of the present Air Force policy of silence, but they're with us. That the interest is still with us is attested to by the fact that in late 1953 Donald Keyhoe's book about UFO's, Flying Saucers From Outer Space, immediately appeared on best seller lists. The book was based on a few of our good UFO reports that were released to the press. To say that the book is factual depends entirely upon how one uses the word. The details of the specific UFO sightings that he credits to the Air Force are factual, but in his interpretations of the incidents he blasts way out into the wild blue yonder.

During the past two years the bulk of the UFO activity has taken place in Europe. I might add here that I have never seen any recent official UFO reports or studies from other countries; all of my information about the European Flap came from friends. But when these friends are in the intelligence branches of the U.S. Air Force, the RAF, and the Royal Netherlands Air Force, the data can be considered at least good.

The European Flap started in the summer of 1953, when reports began to pop up in England and France. Quality wise these first reports weren't too good, however. But then, like a few reports that occurred early in the stateside Big Flap of 1952, sightings began to drift in that packed a bit of a jolt. Reports came in that had been made by personal friends of the brass in the British and French Air Forces. Then some of the brass saw them. Corners of mouths started down.

In September several radar sites in the London area picked up unidentified targets streaking across the city at altitudes of from 44,000 to 68,000 feet. The crews who saw the targets said, "Not weather," and some of these crews had been through the bloody Battle of Britain. They knew their radar.

In October the crew of a British European Airways airliner reported that a "strange aerial object" had paced their twin-engined Elizabethan for thirty minutes. Then on November 3, about two thirty in the afternoon, radar in the London area again picked up targets. This time two Vampire jets were scrambled and the pilots saw a "strange aerial object" The men at the radar site saw it too; through

their telescope it looked like a "flat, white-colored tennis ball."

The flap continued into 1954. In January those people who officially keep track of the UFO's pricked up their ears when the report of two

---

237. What Are UFO's?

Swedish airline pilots came in. The pilots had gotten a good look before the UFO had streaked into a cloud bank. It looked like a discus with a hump in the middle.

On through the spring reports poured out of every country in Europe. Some were bad, some were good.

On July 3, 1954, at eight fifteen in the morning, the captain, the officers and 463 passengers on a Dutch ocean liner watched a "greenish colored, saucer shaped object about half the size of a full moon" as it sped across the sky and disappeared into a patch of high clouds.

There was one fully documented and substantiated case of a "landing" during the flap. On August 25 two young ladies in Mosjoen, Norway, made every major newspaper in the world when they encountered a "saucer- man." They said that they were picking berries when suddenly a dark man, with long shaggy hair, stepped out from behind some bushes. He was friendly; he stepped right up to them and started to talk rapidly. The two young ladies could understand English but they couldn't understand him. At first they were frightened, but his smile soon "disarmed" them. He drew a few pictures of flying saucers and pointed up in the sky. "He was obviously trying to make a point," one of the young ladies said.

A few days later it was discovered that the man from "outer space" was a lost USAF helicopter pilot who was flying with NATO forces in Norway.

As I've always said, "Ya gotta watch those Air Force pilots - especially those shaggy haired ones from Brooklyn."

The reporting spread to Italy, where thousands of people in Rome saw a strange cigar shaped object hang over the city for forty minutes. Newspapers claimed that Italian Air Force radar had the UFO on their scopes, but as far as I could determine, this was never officially acknowledged.

In December a photograph of two UFO's over Taormina, Sicily, appeared in many newspapers. The picture showed three men standing on a bridge, with a fourth running up with a camera. All were intently watching two disk shaped objects. The photo looked good, but there was one flaw, the men weren't looking at the UFO's; they were looking off to the right of them. I'm inclined to agree with Captain Hardin of Blue Book - the photographer just fouled up on his double exposure.

Sightings spread across southern Europe, and at the end of October, the Yugoslav Government expressed official interest. Belgrade newspapers said that a "thoughtful inquiry" would be set up, since reports had come from "control tower operators, weather stations and hundreds of farmers." But the part of the statement that swung the most weight was, "Scientists in astronomical observatories have seen these strange objects with their own eyes."

238.The Report on Unidentified Flying Objects

During 1954 and the early part of 1955 my friends in Europe tried to keep me up-to-date on all of the better reports, but this soon approached a full time job. Airline pilots saw them, radar picked them up, and military pilots chased them. The press took sides, and the controversy that had plagued the

U.S. since 1947 bloomed forth in all its confusion.

An ex-Air Chief Marshal in the RAF, Lord Dowding, went to bat for the UFO's. The Netherlands Air Chief of Staff said they can't be. Herman Oberth, the father of the German rocket development, said that the UFO's were definitely interplanetary vehicles.

In Belgium a senator put the screws on the Secretary of Defense - he wanted an answer. The Secretary of Defense questioned the idea that the saucers were "real" and said that the military wasn't officially interested. In France a member of parliament received a different answer - the French military was interested. The French General Staff had set up a committee to study UFO reports.

In Italy, Clare Boothe Luce, American Ambassador to Italy, said that she had seen a UFO and had no idea what it could be.

Halfway around the world, in Australia, the UFO's were busy too. At Canberra Airport the pilot of an RAAF Hawker Sea Fury and a ground radar station teamed up to get enough data to make an excellent radar visual report.

In early 1955 the flap began to die down about as rapidly as it had flared up, but it had left its mark - many more believers. Even the highly respected British aviation magazine, Aeroplane, had something to say. One of the editors took a long, hard look at the over-all UFO picture and concluded, "Really, old chaps- I don't know."

Probably the most unique part of the whole European Flap was the fact that the Iron Curtain countries were having their own private flap. The first indications came in October 1954, when Rumanian newspapers blamed the United States for launching a drive to induce a "flying saucer psychosis" in their country. The next month the Hungarian Government hauled an "expert" up in front of the microphone so that he could explain to the populace that UFO's don't really exist because, "all 'flying saucer' reports originate in the bourgeois countries, where they are invented by the capitalist warmongers with a view to drawing the people's attention away from their economic difficulties."

Next the U.S.S.R. itself took up the cry along the same lines when the voice of the Soviet Army, the newspaper Red Star, denounced the UFO's as, you guessed it, capitalist propaganda.

In 1955 the UFO's were still there because the day before the all important May Day celebration, a day when the Soviet radio and TV are

---

normally crammed with programs plugging the glory of Mother Russia to get the peasants in the mood for the next day, a member of the Soviet Academy of Sciences had to get on the air to calm the people's fears. He left out Wall Street and Dulles this time - UFO's just don't exist.

It was interesting to note that during the whole Iron Curtain Flap, not one sighting or complimentary comment about the UFO's was made over the radio or in the newspapers; yet the flap continued. The reports were obviously being passed on by word of mouth. This fact seems to negate the theory that if the newspaper reporters and newscasters would give up the UFO's would go away. The people in Russia were obviously seeing something.

While the European Flap was in progress, the UFO's weren't entirely neglecting the United States. The number of reports that were coming into Project Blue Book were below average, but there were reports. Many of them would definitely be classed as good, but the best was a report from a photo reconnaissance B-29 crew that encountered a UFO almost over Dayton.

About 11:00 A.M. on May 24, 1954, an RB-29 equipped with some new aerial cameras took off from Wright Field, one of the two airfields that make up Wright-Patterson AFB, and headed toward the Air Force's photographic test range in Indiana. At exactly twelve noon they were at 16,000 feet, flying west, about 15 miles northwest of Dayton. A major, a photo officer, was in the nose seat of the '29. All of the gun sights and the bombsight in the nose had been taken out, so it was like sitting in a large picture window - except you just can't get this kind of a view anyplace else. The major was enjoying it. He was leaning forward, looking down, when he saw an extremely bright circular shaped object under and a little behind the airplane. It was so bright that it seemed to have a mirror finish. He couldn't tell how far below him it was but he was sure that it wasn't any higher than 6,000 feet above the ground, and it was traveling fast, faster than the B-29. It took only about six seconds to cross a section of land, which meant that it was going about 600 miles an hour.

The major called the crew and told them about the UFO, but neither the pilot nor the copilot could see it because it was now directly under the B-29. The pilot was just in the process of telling him that he was crazy when one of the scanners in an aft blister called in; he and the other scanner could also see the UFO.

Being a photo ship, the RB-29 had loaded cameras - so the logical thing to do would be to take a picture, but during a UFO sighting logic sometimes gets shoved into the background. In this case, however, it

---

didn't, and the major reached down, punched the button on the intervalometer, and the big vertical camera in the aft section of the airplane clicked off a photo before the UFO sped away.

The photo showed a circular shaped blob of light exactly as the major had described it to the RB-29 crew. It didn't show any details of the UFO because the UFO was too bright; it was completely overexposed on the negative. The circular shape wasn't sharp either; it had fuzzy edges, but this could have been due to two things: its extreme brightness, or the fact that it was high, close to the RB-29, and out of focus. There was no way of telling exactly how high it was but if it were at 6,000 feet, as the major estimated, it would have been about 125 feet in diameter.

Working with people from the photo lab at Wright-Patterson, Captain Hardin from Project Blue Book carried out one of the most complete investigations in UFO history. They checked aircraft flights, rephotographed the area from high and low altitude to see if they could pick up something on the ground that could have been reflecting light, and made a minute ground search of the area. They found absolutely nothing that could explain the round blob of light, and the incident went down as an unknown.

Like all good "Unknown" UFO reports, there are as many opinions as to what the bright blob of light could have been as there are people who've seen the photo. "Some kind of light phenomenon" is the frequent opinion of those who don't believe. They point out that there is no shadow of any kind of a circular object showing on the ground - no shadow, nothing "solid." But if you care to take the time you can show that if the object, assuming that this is what it was, was above 4,000 feet the shadow would fall out of the picture.

Then all you get is a blank look from the light phenomenon theorists.

With the sighting from the RB-29 and the photograph, all of the other UFO reports that Blue Book has collected and all of those that came out of the European Flap, the big question - the key question - is: What have the last two years of UFO activity brought out? Have there been any important developments?

Some good reports have come in and the Air Force is sitting on them. During 1954 they received some 450 reports, and once again July was the peak month. In the first half of 1955 they had 189. But I can assure you that these reports add nothing more as far as proof is concerned. The quality of the reports has improved, but they still offer nothing more than the same circumstantial evidence that we presented to the panel of scientists in early 1953. There have been no reports in which the speed or altitude of a UFO has been measured, there have been no reliable

---

241. What Are UFO's?

photographs that show any details of a UFO, and there is no hardware. There is still no real proof.

So a public statement that was made in 1952 still holds true: "The possibility of the existence of interplanetary craft has never been denied by the Air Force, but UFO reports offer absolutely no authentic evidence that such interplanetary spacecraft do exist."

But with the UFO, what is lacking in proof is always made up for in opinions. To get a qualified opinion, I wrote to a friend, Frederick C. Durant. Mr. Durant, who is presently the director of a large Army Ordnance test station, is also a past president of the American Rocket Society and president of the International Astronautical Federation. For those who are not familiar with these organizations, the American Rocket Society is an organization established to promote interest and research in space flight and lists as its members practically every prominent scientist and engineer in the professional fields allied to aeronautics. The International Astronautical Federation is a world-wide federation of such societies.

Mr. Durant has spent many hours studying UFO reports in the Project Blue Book files and many more hours discussing them with scientists the world over - scientists who are doing research and formulating the plans for space flight. I asked him what he'd heard about the UFO's during the past several years and what he thought about them. This was his reply:

This past summer at the Annual Congress of the IAF at Innsbruck, as well as previous Congresses (Zurich, 1953, Stuttgart, 1952, and London, 1951), none of the delegates representing the rocket and space flight societies of all the countries involved had strong feelings on the subject of saucers. Their attitude was essentially the same as professional members of the American Rocket Society in this country. In other words, there appear to be no confirmed saucer fans in the hierarchy of the professional societies.

I continue to follow the subject of UFO's primarily because of my being requested for comment on the interplanetary flight aspects. My personal feelings have not changed in the past four years, although I continue to keep an objective outlook.

There are many other prominent scientists in the world whom I met while I was chief of Project Blue Book who, I'm sure, would give the same answer - they've not been able to find any proof, but they continue to keep an objective outlook. There are just enough big question marks sprinkled through the reports to keep their outlook objective.

I know that there are many other scientists in the world who, although they haven't studied the Air Force's UFO files, would limit their comment to a large laugh followed by an "It can't be." But "It can't be's"

242.The Report on Unidentified Flying Objects

are dangerous, if for no other reason than history has proved them so. Not more than a hundred years ago two members of the French Academy of Sciences were unseated because they supported the idea

that "stones had fallen from the sky." Other distinguished members of the French Academy examined the stones, "It can't be - stones don't fall from the sky," or words to that effect. "These are common rocks that have been struck by lightning."

Today we know that the "stones from the sky" were meteorites.

Not more than fifty years ago Dr. Simon Newcomb, a world famous astronomer and the first American since Benjamin Franklin to be made an associate of the Institute of France, the hierarchy of the world science, said, "It can't be." Then he went on to explain that flight without gas bags would require the discovery of some new material or a new force in nature.

And at the same time Rear Admiral George W. Melville, then Chief Engineer for the U.S. Navy, said that attempts to fly heavier-than-air vehicles was absurd.

Just a little over ten years ago there was another "it can't be." Ex President Harry S. Truman recalls in the first volume of the Truman Memoirs what Admiral William D. Leahy, then Chief of Staff to the President, had to say about the atomic bomb. "That is the biggest fool thing we have ever done," he is quoted as saying. "the bomb will never go off, and I speak as an expert in explosives."

Personally, I don't believe that "it can't be." I wouldn't class myself as a "believer," exactly, because I've seen too many UFO reports that first appeared to be unexplainable fall to pieces when they were thoroughly investigated. But every time I begin to get skeptical I think of the other reports, the many reports made by experienced pilots and radar operators, scientists, and other people who know what they're looking at. These reports were thoroughly investigated and they are still unknowns. Of these reports, the radar visual sightings are the most convincing. When a ground radar picks up a UFO target and a ground observer sees a light where the radar target is located, then a jet interceptor is scrambled to intercept the UFO and the pilot also sees the light and gets a radar lock on only to have the UFO almost impudently outdistance him, there is no simple answer. We have no aircraft on this earth that can at will so handily outdistance our latest jets.

The Air Force is still actively engaged in investigating UFO reports, although during the past six months there have been definite indications that there is a movement afoot to get Project Blue Book to swing back to the old Project Grudge philosophy of analyzing UFO reports - write

---

them all off, regardless. But good UFO reports cannot be written off with such answers as fatigued pilots seeing a balloon or star, "green" radar operators with only fifteen years' experience watching temperature inversion caused blips on their radarscopes; or "a mild form of mass hysteria or war nerves." Using answers like these, or similar ones, to explain the UFO reports is an expedient method of getting the percentage of unknowns down to zero, but it is no more valid than turning the hands of a clock ahead to make time pass faster. Twice before the riddle of the UFO has been "solved," only to have the reports increase in both quantity and quality.

I wouldn't want to hazard a guess as to what the final outcome of the UFO investigation will be, but I am sure that within a few years there will be a proven answer. The earth satellite program, which was recently announced, research progress in the fields of electronics, nuclear physics, astronomy, and a dozen other branches of the sciences will furnish data that will be useful to the UFO investigators. Methods of investigating and analyzing UFO reports have improved a hundred fold since 1947 and they are continuing to be improved by the diligent work of Captain Charles Hardin, the present chief of Project Blue Book, his staff, and the 4602nd Air Intelligence Squadron. Slowly but surely these people are working closer to the answer - closer to the proof.

Maybe the final proven answer will be that all of the UFO's that have been reported are merely

misidentified known objects. Or maybe the many pilots, radar specialists, generals, industrialists, scientists, and the man on the street who have told me, "I wouldn't have believed it either if I hadn't seen it myself," knew what they were talking about. Maybe the earth is being visited by interplanetary spaceships.

Only time will tell.

Radar-Visual Over ATIC

Wright-Patterson AFB, Dayton, Ohio
March 8, 1950

Francis Ridge:
According to the then Project Blue Book Director, Captain Edward Ruppelt, one of the best UFO sightings of 1950 took place right over the Air Technical Intelligence Center at Dayton, Ohio.

Richard Hall:
In mid-morning, the CAA received a report from Capt. W.H. Kerr, Trans-World Airways pilot, that he and two other TWA pilots had a UFO in sight. A gleaming UFO was visible, hovering at high altitude. CAA also had 20 or more reports on the UFO from the Vandalia area when WPAFB was notified, and sent up four P-51 interceptors. The UFO was also visible to control tower operators and personnel of Air Technical Intelligence Center on the base. Radar had an unidentified target in the same position. (See full report below).

Brad Sparks:
The date was definitely March 8 not 9, 1950 -- the case was investigated while it happened and newspaper articles the next day March 9 prove that it happened "yesterday." It has long been thought to be an IFO, or a bunch of them -- sun reflection off ice laden clouds, Venus, and/or the ice laden clouds themselves, and some later radar trackings of a large cloud-like layer which tracks had nothing to do with the visual sightings. Because this happened right in AMC Project Grudge's backyard and was investigated by AMC personnel including Roy James and James J. Rodgers, it was dragged out by Col Watson's stooges James and Rodgers as "proof" that UFO's were only ice crystals, year after year. However the data do not all add up to simple IFO explanations. But it is not a very good UFO case either, just some fragmentary details that don't hang together very well.

NENANA, ALASKA RADAR CASE (UT)

Just twenty minutes after midnight on January 22, 1952, nineteen and a half hours after the Navy lieutenant commander had chased the UFO near Mitchell AFB, another incident involving an airplane and something unknown was developing in Alaska.....

At 0020, twenty minutes after midnight, an airman, watching one of the outpost's radarscopes saw a target appear. It looked like an airplane because it showed up as a bright, distinct spot. But it was unusual because it was northeast of the radar site, and very few airplanes ever flew over this area. Off to the northeast of the station there was nothing but ice, snow, and maybe a few Eskimos until you got to Russia. Occasionally a B-5O weather reconnaissance plane ventured into the area, but a quick check of the records showed that none was there on this night.

By the time the radar crew had gotten three good plots of the target, they all knew that it was something unusual - it was at 23,000 feet and traveling 1,500 miles an hour. The duty controller, an Air Force captain, was quickly called; he made a fast check of the targets that had now been put on the plotting board and called to a jet fighter-interceptor base for a scramble.

The fighter base, located about 100 miles south of the radar site, acknowledged the captain's call and in a matter of minutes an F-94 jet was climbing out toward the north.

While the F-94 was heading north, the radar crew at the outpost watched the unidentified target. The bright dots that marked its path had moved straight across the radarscope, passing within about 50 miles of the site. It was still traveling about 1,500 miles an hour. The radar had also picked up the F-94 and was directing it toward its target when suddenly the unidentified target slowed down, stopped, and reversed its course. Now it was heading directly toward the radar station. When it was within about 30 miles of the station, the radar operator switched his set to a shorter range and lost both the F-94 and the unidentified target.

While the radar operator was trying to pick up the target again, the F-94 arrived in the area. The ground controller told the pilot that they had lost the target and asked him to cruise around the area to see if he and his radar operator could pick up anything on the F-94's radar. The pilot said he would but that he was having a littie difficulty, was low on fuel, and would have to get back to his base soon. The ground controller acknowledged the pilot's message, and called back to the air base telling them to scramble a second F-94.

The first F-94 continued to search the area while the ground radar tried to pick up the target but neither could find it.

About this time the second F-94 was coming in, so the ground radar switched back to long range. In a minute they had both of the F-94's and the unidentified target on their scope. The ground controller called the second F-94 and began to vector him into the target.

The first F-94 returned to its base.

As both the second F-94 and the target approached the radar site, the operator again switched to short range and again he lost the jet and the target. He switched back to long range, but by now they were too close to the radar site and he couldn't pick up either one.

The pilot continued on toward where the unidentified target should have been. Suddenly the F-94 radar operator reported a weak target off to the right at 28,000 feet They climbed into it but it faded before they could make contact.

The pilot swung the F-94 around for another pass, and this time the radar operator reported a strong return. As they closed in, the F-94's radar showed that the target was now almost stationary, just barely moving. The F-94 continued on, but the target seemed to make a sudden dive and they lost it. The pilot of the jet interceptor continued to search the area but couldn't find anything. As the F-94 moved away from the radar station, it was again picked up on the ground radar, but the unidentified target was gone.

A third F-94 had been scrambled, and in the meantime its crew took over the search. They flew around for about ten minutes without detecting any targets on their radar. They were making one last pass almost directly over the radar station when the radar operator in the back seat of the F-94 yelled over the interphone that he had a target on his scope. The pilot called ground radar, but by this time both the F-94 and the unidentified target were again too close to the radar station and they couldn't be picked up. The F-94 closed in until it was within 200 yards of the target; then the pilot pulled up, afraid he might collide with whatever was out in the night sky ahead of him. He made another pass, and another, but each time the bright spot on the radar operator's scope just stayed in one spot as if something were defiantly sitting out in front of the F-94 daring the pilot to close in. The pilot didn't take the dare. On each pass he broke off at 200 yards.

The F-94 crew made a fourth pass and got a weak return, but it was soon lost as the target seemed to speed away. Ground radar also got a brief return, but in a matter of seconds they too lost the target as it streaked out of range on a westerly heading.

As usual, the first thing I did when I read this report was to check the weather. But there was no weather report for this area that was detailed enough to tell whether a weather inversion could have caused the radar target.

But I took the report over to Captain Roy James, anyway, in hopes that he might be able to find a clue that would identify the UFO.

Captain James was the chief of the radar section at ATIC. He and his people analyzed all our reports where radar picked up UFO's. Roy had been familiar with radar for many years, having set up one of the first stations in Florida during World War II, and later he took the first aircraft control and warning squadron to Saipan. Besides worrying about keeping his radar operating, he had to worry about the Japs' shooting holes in his antennae.

Captain James decided that this Alaskan sighting I'd just shown him was caused by some kind of freak weather. He based his analysis on the fact that the unknown target had disappeared each time the ground radar had been switched to short range. This, he pointed out, is an indication that the radar was picking up some kind of a target that was caused by weather. The same weather that caused the ground radar to act up must have caused false targets on the F-94's radar too, he continued. After all, they had closed to within 200 yards of what they were supposedly picking up; it was a clear moonlight night, yet the crews of the F-94's hadn't seen a thing.

Taking a clue from the law profession, he quoted a precedent. About a year before over Oak Ridge, Tennessee, an F-82 interceptor had nearly flown into the ground three times as the pilot attempted to follow a target that his radar operator was picking up. There was a strong inversion that night, and although the target appeared as if it were flying in the air, it was actually a ground target.

Since Captain James was the chief of the radar section and he had said "Weather," weather was the official conclusion on the report. But reports of UFO's' being picked up on radar are controversial, and some of the people didn't agree with James's conclusion.

A month or two after we'd received the report, I was out in Colorado Springs at Air Defense Command Headquarters. I was eating lunch in the officers' club when I saw an officer from the radar operations section at ADC. He asked me to stop by his office when I had a spare minute, and I said that I would. He said that it was important.

It was the middle of the afternoon before I saw him and found out what he wanted. He had been in Alaska on TDY when the UFO had been picked up at the outpost radar site. In fact, he had made a trip to both the radar site and the interceptor base just two days after the sighting, and he had talked about the sighting with the people who had seen the UFO on the radar. He wanted to know what we thought about it.

When I told him that the sighting had been written off as weather, I remember that he got a funny look on his face and said, "Weather! what are you guys trying to pull, anyway?"

It was obvious that he didn't agree with our conclusion. I was interested in learning what this man thought because I knew that he was one of ADC's ace radar trouble shooters and that he traveled all over the world, on loan from ADC, to

work out problems with radars.

"From the description of what the targets looked like on the radarscopes, good, strong, bright images, I can't believe that they were caused by weather," he told me.

Then he went on to back up his argument by pointing out that when the ground radar was switched to short range both the F-94 and the unknown target disappeared. If just the unknown target had disappeared, then it could have been weather. But since both disappeared, very probably the radar set wasn't working on short ranges for some reason. Next he pointed out that if there was a temperature invenion, which is highly unlikely in northern Alaska, the same inversion that would affect the ground radar wouldn't be present at 25,000 feet or above.

I told him about the report from Oak Ridge that Captain James had used as an example, but he didn't buy this comparison. At Oak Ridge, he pointed out, that F-82 was at only 4,000 feet. He didn't know how the F-94's could get to within 200 yards of an object without seeing it, unless the object was painted a dull black,

"No," he said, "I can't believe that those radar targets were caused by weather. I'd be much more inclined to believe that they were something real, something that we just don't know about."

Captain Edward J. Ruppelt
Former Head of Project Blue Book

The following is the Air Force report listed as explained: "Target caused by weather phenomena".

Case Summary : (from Project Blue Book - Report # 7- 31 May 1952)

No visual sighting, ground and airborne radar only

1. Description of incident :

At 1020Z (Zulu Time) on 22 January 1952, a radar station at Murphy's Dome, Alaska, observed an unidentified radar return. The target was going away from the station on an azimuth of 210°, at a speed of about 1500 mph when first observed but appeared to reverse its direction and returned toward the station. The set was adjusted so that the target could be observed as it closed in on the station but after this change was made the target was again observed, however, at about its original location, and again going away from the station. Just before it faded, it appeared to be making a turn back toward the station.

At 1030Z an F-94 was airborne to search for the object. At this time the object was going away from the station at a high rate of speed so the F-94 was told to orbit. About this time the ground station lost contact with the object but continued to track the F-94.

At about 1100Z as the F-94 was approaching Nenana (near Fairbanks), the radar observer in the F-94 observed two targets, one faint and one bright. The aircraft was at 30,000 ft and the target was at 25,000 ft. The targets crossed from right to left and appeared to be traveling slowly and as the F-94 approached the target a high rate of closure was indicated. The contact was lost at a range of 200 yards.

Approximately one hour later, again near Nenana, another contact was made by the F-94. In this instance the target was kept dead ahead and level. When the target was at a range of 200 yards, the pilot pulled up and the target was lost. The rate of closure during the run was 100 knots even though the F-94 had flaps down. No other contacts were made and the aircraft was released at 1210Z.

During the two airborne contacts the F-94 was being tracked by the ground station but the object was not being picked up.

The weather was clear but no visual sighting was made. On the same night, the same crew had visually identified a C-

54, a C-47, and a small civilian aircraft from 300 to 500 yards. There were no clouds in the sky but it was a dark night.

No malfunctions were found in either radar set.

2. Status of investigation :

Report by electronic branch of ATIC.

Target being slanted instead of perpendicular to radii from radar station indicates possible weather target. Speed may be accounted for by the momentary appearance and disappearance of other weather targets . Further explanation cannot be made.

3. Conclusion :

Target caused by weather phenomena.

Radar-visual UFO case in 1952, by Richard Hall, FUFOR, 1996

(This web page produced for **NICAP InterLink:UFO** by Francis Ridge & Dominque Weinstein)

RV NEAR OAK RIDGE AEC PLANT
June 21, 1952

On June 21, 1952, at 10:58 PM**,** a Ground Observer Corps spotter reported that a slow-moving craft was nearing the AECs Oak Ridge Laboratory, an area so secret that it is prohibited to aircraft. The spotter called the light into his filter center and the filter center relayed the message to the ground control intercept radar. They had a target. But before they could do more than confirm the GOC spotter's report, the target faded from the radarscope.

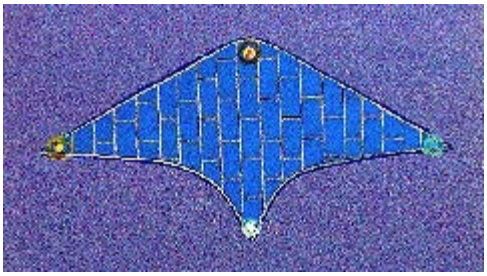
An F-47 aircraft on combat air patrol in the area was vectored in visually, spotted a light, and closed on it. They "fought" from 10,000 to 27,000 feet, and several times the object made what seemed to be ramming attacks. The light was described as white, 6 to 8 inches in diameter, and blinking until it put on power. The pilot could see no silhouette around the light. The similarity to the Fargo case was striking.

In each of these instances, as well as in the case narrated next, the sources of the stories were trained airmen with excellent reputations. They were sincerely baffled by what they bad seen. They had no conceivable motive for falsifying or "dressing up" their reports.

Captain Edward J. Ruppelt

(This web page produced for **InterLink:UFO** by Francis Ridge)

THE CARSON SINK CASE



This object, similar to the one discussed below, was observed 30 years later at Floyd Knobs, Indiana, on March 4, 1990. It still hasn't shown up in any world military inventory.

Michael David Hall:
One such case had to be believed because it came from extremely reliable witnesses. Their sighting occurred over Carson Sink, Nevada. It involved two competent observers who were both Air Force officers. These witnesses, Lieutenant Colonel John L. McGinn and Lieutenant Colonel John R. Barton, were also intimately familiar with every type of aircraft or missile in the world at that time. For that reason their sighting drew great attention at both ATIC and the Pentagon when it surfaced. The incident took place while on board a twin engine B-25 bomber that they had requisitioned for a cross-country flight beginning from Hamilton AFB (formerly Hamilton Field). After take off they were headed for Colorado Springs on a very clear day with unlimited visibility. Such perfect flying conditions are appreciated by any veteran flyer, especially the two lieutenant colonels who were looking forward to a smooth ride and the chance to take in some beautiful scenery. While over the Sierra Nevada, McGinn and Barton did see some amazing terrain but soon saw something even more spectacular.

Between Sacramento and Reno they entered “Green 3,” the airway’s version of a highway into Salt Lake City. At 3:40 P.M. MST while at 11,000 feet over the Carson Sink area of Nevada, the pilots spotted three aircraft ahead of them and to their right. At first the lieutenant colonels assumed these must be F-86 jet fighters. The “bogies” were moving much like the new jets - although something just didn’t add up. If they were F-86s, they should be lower in accordance with civil air regulations, and it also appeared odd to see military jets fly in what appeared to be a perfect V formation.

In short order their B-25 closed in on the objects, close enough for a better look. The pilots then immediately realized they weren’t F-86s at all, but what were they? Each craft appeared very bright silver in color with a delta wing-like airfoil. They thought these couldn’t be a new type of delta jet because they had no tails or pilot’s canopies. The craft all displayed a clean upper triangular wing with a definite ridge running from nose to tail. Before McGinn and Barton fully grasped the fantastic sight before them, the strange objects made a left bank and zoomed within 400 to 800 yards of their B-25, an uncomfortably short amount of space in the air. Their speed was estimated by the men to be at the very least three times that of any conventional jet then flying! Yet after four short seconds the hair raising maneuver was over and the UFOs were gone.

As soon as McGinn and Barton landed at Colorado Springs they were on the phone to Air Defense Command Headquarters. When they learned that no civilian or military aircraft were anywhere near them at 3:40 P.M., the magnitude of their sighting finally sunk in. McGinn and Barton were both command pilots with very distinguished service careers, having logged several thousand hours flying time each. They were assigned to the Pentagon with highly classified assignments and were perfectly familiar with even the most secret foreign and domestic aircraft designs. Neither had seen anything remotely like those objects before, but they indicated
that they had probably witnessed what friends of theirs had observed, “flying saucers.”

Blue Book made their own study and located all delta wing jets, then exclusively flown by the Navy, yet none were in the Green 3 area. They also checked other sources, which had no records of aircraft, balloons, or anything of any kind over Carson Sink at the time.36 Although only one of 22 reports which made it into ATIC that day, and just one of

about 100 worldwide sightings for the 24th, the Carson Sink Sighting, case number 1584, is the best of those in the files marked unidentified.

Edward J. Ruppelt version:
Here is a "good" UFO report with an "unknown" conclusion:

On July 24, 1952, two Air Force colonels, flying a B-25, took off from Hamilton Air Force Base, near San Francisco, for Colorado Springs. The day was clear; not a cloud in the sky.

The colonels had crossed the Sierra Nevada between Sacramento and Reno and were flying east at 11,000 feet on "Green 3," the aerial highway. At 3:40 P.M., they were over the Carson Sink area of Nevada when one of the colonels noticed three objects ahead of them and a little to the right. The objects looked like three F-86's flying a tight V formation. If they were F-86's the should have been lower, according to civil air regulations, but on a clear day some pilots don't watch their altitude too closely.

In a matter of seconds the three aircraft were close enough to the B-25 to be clearly seen. They were not F-86's. They were three bright silver, delta wing craft with no tails and no pilot's canopies. The only thing that broke the sharply defined, clean upper surface of the triangular wing was a definite ridge that ran from the nose to the tail.

In another second the three deltas made a slight left bank and shot by the B-25 at terrific speed. The colonels estimated that the speed was at least three times that of an F-86. They got a good look at the three deltas as the unusual craft passed within 400 to 800 years of the B-25.

When they landed at Colorado Springs, the two colonels called the intelligence people at Air Defense Command Headquarters to make a UFO report. The suggestion was offered that they might have seen three F-86's. The colonels promptly replied that if the objects had been F-86's they would have been able to recognize them as such. They colonels knew what F-86's looked like.

Air Defense Command relayed the report to Project Blue Book. An investigation was started at once.

Flight Service, which clears all military aircraft flights, was contacted and asked about the location of aircraft near the Carson Sink area at 3:40 PM. They had no record of the presence of aircraft in that area.

Since the colonels had mentioned delta wing aircraft, and both the Air Force and the Navy had a few of this type, we double-checked. The Navy's delta's were all on the east coast, at least all of the silver ones were. A few deltas painted the traditional navy blue were on the west coast, but not near Carson Sink. The Air Force's one delta was temporarily grounded.

Since balloons once in a while can appear to have an odd shape, all balloon flights were checked for both standard weather balloons and the big 100'-diameter research balloons. Nothing was found.

A quick check on the two colonels revealed that both of them were command pilots and that each had several thousand hours of flying time. They were stationed at the Pentagon. Their highly classified assignments were such that they would be in a position to recognize anything that the United States known to be flying anywhere in the world.

Both men had friends who had "seen flying saucers" at some time, but both had openly voiced their skepticism. Now, from what the colonels said when they were interviewed after landing at Colorado Springs, they had changed their opinions.

(Source: Michael David Hall, "UFOs, A Century of Sightings", Page 187 & Captain Edward J. Ruppelt's, Report on Unidentified Flying Objects, Page 10).

RV NEAR HANFORD AEC PLANT

On the night of December 10, 1952, near another atomic installation. the Hanford plant in Washington, the pilot and radar observer of a patrolling F-94 spotted a light while flying at 26,000 feet. The crew called their ground control station and were told that no planes were known to be in the area. They closed on the object and saw a large, round, white "thing" with a dim reddish light corning from two "windows." They lost visual contact but got a radar lock-on. They reported that when they attempted to close on it again it would reverse direction and dive away. Several times the plane altered course itself because collision seemed imminent.

In each of these instances, as well as in the case narrated next, the sources of the stories were trained airmen with excellent reputations. They were sincerely baffled by what they had seen. They had no conceivable motive for falsifying or "dressing up" their reports.

Light Makes 5-6 Head On Passess At Navy Plane

Nov. 7, 1950
E. of Lakehurst, New Jersey

7:15 p.m. EST	Military
Duration 25-30 mins	2 observers
aircraft AD-4Q (Navy)	No EMI
United States	No radar contact

Brad Sparks:
Nov. 7, 1950; E of Lakehurst, New Jersey (BBU)
7:15 p.m. USN pilot Lt. jg Robert Haven flying AD-4Q at 3,500 ft heading W saw a steady white light [estimated later at 10-12 inches during close approach] to his right at about 4,000 ft 5 miles away heading SE, made a slight climbing turn to the left to get on the tail of the object but it responded by making a head on pass about 100-200 ft over the AD-4Q in a slight dive at high speed. Haven made a tight turn to pursue, noted no wash or slipstream from the object traveling at about 900 mph, which made 5-6 head on passes at the AD-4Q, climb rate >2,000 ft/min, chase abandoned at 11,500 ft., as object outmaneuvered aircraft. When jets arrived object reached about 25,000 ft and disappeared. (Hynek UFO Rpt pp. 68-70; NARCAP)

Dan Wilson:
Nov. 7, 1950; E of Lakehurst, New Jersey (BBU)
LTJG Robert Haven stated that the light had a speed range much greater than a jet fighter. It appeared to circle his aircraft at a terrific rate of speed, even when climbing. The rate of climb was estimated to be over 2000 feet per minute, therefore, it would not be possible to class this incident as a lighted weather balloon. Project Blue Book's Evaluation: Balloon

Fran Ridge:
The testimony in this particular incident was detailed enough and of substantial importance that I had Jean do a transcript of page 6 from Dan Wilsons's report and pdf file.

Martin Shough:
The crucial part of this report is the implication that the object repeatedly turned *outside* the climbing plane, making an estimated two orbits to the plane's one. Up to that point BB's "balloon" could be defended. The repeated "head on passes" a la Gorman could be explained by a lighted balloon, and the

estimated average rate of climb of the light (total estimated height over total duration) is probably in the ballpark for a balloon. But turning outside the AD-4Q's spiralling climb is clearly impossible, as the letter from Col Harris to BB points out.

TBM Chases Climbing & Accelerating Object

Jan. 21, 1952
Mitchel AFB, New York

9:50 a.m. EST	Military
Duration 2-1/2 mins	1 observer
TBM aircraft	No EMI
United States	No radar contact

Brad Sparks:
Jan. 21, 1952. 3 miles ESE of Mitchel AFB runway 30, New York (BBU)
9:50 a.m. (EST). USN pilot Lt. James R. Zeitvogel, USN Special Devices Center, Long Island, flew USN TBM-3W bomber heading 45° (NE) at 160 knots (200 mph) at 6,000 ft shortly after takeoff from Mitchel AFB, sighted a 20-30 ft white circular domed or parachute-shaped, with parachute-like segmentation and dark underside, about 1/3 ratio thickness to diameter, which appeared to be about 1-1/2 miles to the WNW or half way between TBM and end of runway 30 at Mitchel AFB, silhouetted against the ground at a depression angle of about 45° at a very low altitude of 200-300 ft (consistent with ground range of 1-1/2 miles from TBM at 6,000 ft height). Pilot then chased object which was at first traveling about 300 knots (350 mph), by turning left in the TBM in a sharp 2-3 g turn, having to bank at almost 90° to see the low altitude object about 1- 1/2 mins into sighting when TBM about completed 360° turn, object cutting on inside of TBM's turn apparently accelerating. Object at about 2 mins into sighting started climbing in altitude while still accelerating, disappearing suddenly not due to distance about 7 miles to the SW at 500+ knots (600+ mph) and about 10° above TBM's horizontal level. (Sparks; GRUDGE Rpts. No. 3, p. 8, No. 4, pp. 9-11ff.; Project 1947; NICAP)

Capt. Edward J. Ruppelt:
I think the pilot summed up the situation very aptly when he told me, "I don't know what it was, but I've never seen anything like it before or since - maybe it was a spaceship." I went back to Dayton stumped - maybe it was a spaceship.

Brigham/T-6 Case: UFO Makes Pass At F-84 (BBU 1082)

March 29, 1952
Misawa, Japan

11:20 local	Military, USAF
Duration 10 secs?	1 observer
T-6 aircraft	No EMI
Japan	No radar contact

Fran Ridge:
This report is case #29, on the official clearance list. of 41 formerly classified Air Technical Intelligence UFO reports cleared for Maj. Donald E. Keyhoe by Albert M. Chop, Air Force Press Desk. Throughout UFO history; small discs have been reported from time to time that may be remote-controlled devices. The estimates of size range from about eight inches to a few feet in diameter.

Richard Hall:
March 29, 1952; Misawa, Japan
11:20 a.m. local. Lt. David C. Brigham, flying a T-6 as target plane for an intercept exercise by two F-84 jet fighters, saw a small, shiny disc about eight inches in diameter make a pass at one of the F-84s. It flew a pursuit curve and closed rapidly. Just as it would have flown into Brigham's fuselage it decelerated to his airspeed, almost instantaneously In doing so, it flipped up on its edge at an approximate 90-degree bank. It fluttered within two feet of his fuselage for perhaps two or three seconds. Then it pulled away around his starboard wing, appearing to flip once as it hit the slipstream behind his wing-tip fuel tank. Then it passed him, crossed in front, and pulled up abruptly appearing to accelerate, and shot out of sight in a steep, almost vertical climb. An unusual flight characteristic was a slow, fluttering motion. It rocked back and forth in 40-degree banks, at about one-second intervals throughout its course. (10 secs?)

Dan Wilson:
This was a hot zone for the Russians were moving bombers into China in 1952 (having to do with the Korean War) not far from Japan. It was in December of 1952, that the US Fifth Air Force moved the 49th's 9th Fighter-Bomber Squadron of F-84Gs from Korea to Japan to train its aircrews in the delivery of tactical atomic weapons.

Two F-86 Pilots Sight Round Silver Object

May 9, 1952
George AFB, California

10:30 a.m. PST	Military
Duration 10-13 mins	2 air/3 control tower observers
aircraft F-86's	No EMI
United States	No radar contact

Brad Sparks:
May 9, 1952; George AFB, Calif. (BBU 1194)
10:30 a.m. 2 USAF F-86 pilots (Crown and another) in the air and a witness on the ground saw a round silver object. (Berliner; FUFOR Index)

Dan Wilson:
May 9, 1952; George AFB, California
At around 10:30 a.m. PST, 2 F-86 pilots observed a silvery round object overhead and set out in pursuit. When the two F-86s reached an altitude of 36,000 feet the object appeared to be at least twice their height. Both USAF pilots observed the object to be motionless and then it accelerated in an easterly direction. The object also executed various port and starboard turns of 180 degrees and then it would hover motionless. The pursuit of the object continued for approximately 5 minutes when the aircraft ran low on fuel. The object was also observed by three experienced control towers operators.

Observers In T-6 Watch Round Object

May 13, 1952
George AFB, California

2:25 p.m. PDST	Private Aircraft
Duration 30 mins	2 observer
aircraft T-6	No EMI
United States	No radar contact

Dan Wilson:
May 13, 1952; George AFB, California (BB)
At 2:25 p.m. PDST, a pilot and an observer in an T-6G aircraft flying at 10,500 feet altitude observed a white or silver round object at an estimated altitude of 45,000 feet. The passenger stated that he was looking at the object almost directly overhead when it disappeared very fast, almost like a light being turned off. The object was observed for approximately 30 minutes.

Two Reddish Torpedos Near TWA

May 24, 1952
Zuni, New Mexico

1:27 a.m. MST	Commercial
Duration 15 secs	1 observer
aircraft TWA	No EMI
United States	No radar contact

Brad Sparks:
May 24, 1952; Zuni, New Mexico (BBU)
1:27 a.m. Pilot of TWA airliner Brass saw 2 reddish torpedo-shaped objects appear in front of the aircraft. (Project 1947; FUFOR Index)

Dan Wilson:
May 24, 1952; Zuni, New Mexico (BBU)
At 1:27 a.m. MST, the pilot, Glenn Bras, of a TWA airliner observed two torpedo shaped objects appear directly in front of the aircraft. The objects moved through 60 degrees arc at 45 degrees elevation. The aircraft was flying east at 15,000 feet at 7 miles SW of Zuni, New Mexico, at a speed of 280 mph. The objects were observed for 15 seconds.

Fran Ridge:
Some sightings seem trivial until you compare them with later years. But something was going on in 1952 as we all know, and there were four incidents in New Mexico within three days, two of which occurred the same day as this one (see NARA-PBB1-52 below).

July 23, 1952; South Bend, Indiana (BBU 1578)
11:35 p.m. USAF pilot Capt. H. W. Kloth saw 2 bright blue-white objects flying together, then the rear one veered off. 9 mins. (Berliner
==========

July 23, 1952; South Bend, Indiana (BBU 1578)

At 11:35 P.M. CDT, USAF Capt. Harold W. Kloth, Regional Air Provost Marshal, and a rated pilot, observed two objects giving off a blue-white light. The objects were moving south and were observed for approximately 9 minutes. Before contact was lost the rear-most object appeared to swerve to the west. No sound was heard from the objects. A pair of 6x35 binoculars were used to view the objects for the last 4 minutes of the sighting.

Object Accelerates Away From Marine TV-2

Dec. 7, 1954
Edenton, North Carolina

3:05 p.m. EST	Military
Duration 20-23 secs	2 observers
aircraft Marine TV-2	No EMI
United States	No radar contact

Dan Wilson:
Dec. 7, 1954; Edenton, North Carolina (BB)
At 3:05 p.m. Capt. Dayton Robinson, Jr. was flying a Marine TV-2 aircraft near Norfolk, Va., with his passenger Cpl. Edwin G. Capone, when they observed a dull white balloon-shaped object. Robinson rolled the aircraft toward the object with the intention of circling the object. At this time the object appeared to accelerate rapidly and moved to the south in a slight climb at approximately 15,000 feet. The speed of the object was estimated to be 2,700 to 3,000 mph. The object was observed for approximately 20-23 seconds. (BB files).

Huge Disc Sparks Scramble

Sept, 24, 1959
Redmond, Oregon

Fran Ridge:
A cat 9,11 incident. A huge disc hovered over the city. Six F-102 fighters were scrambled from Portland. As they took off, the Air Force radioed the pilots of a B-47 bomber and a F-89 fighter on routine flights nearby, ordering them to join the chase. The Air Force radar at Klamath Falls tracked the disc. Given the Air Force "explanations" and some incorrect data in 1959 and published in the UFO Evidence (1964), the validity and seriousness of this encounter is much clearer in the MUFON report published much later in 1989. Dan Wilson located 55 documents on this case in the Blue Book files.

Brad Sparks:
Sept. 24, 1959; near Redmond Oregon (BBU)
About 4:55 a.m. (PST). Redmond Police officer Robert Dickerson saw a strange bright light [white ball shaped?] rapidly descending north of the airport then stopped and hovered several hundred [200?] feet above ground for several mins where it lit up the juniper trees below. He drove toward it on the Prineville Hwy then turned toward the airport, when the object turned orange [reddish-orange?] and moved rapidly to [dive and hover?] about 10 miles NE of the airport at about 3,000 ft [height? altitude? Redmond is at 3,000 ft elevation MSL]. Dickerson arrived at the airport to report sighting in person at 4:59 a.m. at Redmond FAA Air Traffic Communication Station. FAA Flight Service Specialist Laverne Wertz, Dickerson and others viewed object through binoculars. FAA station reported UFO to Seattle Air Route Control Center at 5:10 a.m., which in turn reported it to Hamilton AFB, Calif., which scrambled 6 F-102 jets from Portland [?] to intercept UFO. FAA station observers saw object hover and emit long tongues of red, yellow and green light which extended and retracted at irregular intervals. As F-102's approached the object from the SE [?] it turned into mushroom shape, emitted red and yellow flames from lower side and ascended rapidly, disappearing above scattered clouds at about 14,000 ft [altitude? height?]. [Object's departure forced one F-102 to swerve to avoid collision, another nearly lost control from UFO's turbulent wake; tracked on F-102 airborne radars but jets unable to intercept.] Object reappeared about 20 miles S of Redmond at about 25,000 ft. Seattle Center reported at 6:20 a.m. radar contact with object about 25 miles S of Redmond at 52,000 ft was made by USAF ADC radar site at Klamath Falls, Ore., which tracked a large 300-400 ft[?] target and vectored B-47 and F-89 aircraft to identify. Redmond FAA controllers lost sight of object. Seattle FAA reported at 7:11 a.m. that Klamath Falls radar still tracked object at 25 miles S of Redmond but varying altitude from 6,000 to 52,000 ft. (Fran Ridge/NICAP UFOE, V)

Ground/Air Visuals Over City Stir Air Force

Oct. 15, 1959
Terre Haute, Indiana

6:10 p.m. local CST	Civilian
Duration over 50 min period	observer, several
aircraft ???	No EMI
United States	No radar contact

Dan Wilson:
Oct. 15, 1959; Terre Haute, Indiana (BB)
6:10 - 7:00 p.m. local. Several sightings were brought up for Congressional Inquiry by the President of local UFO Club RECAP. At 6:10 witnesses saw a white light overhead the size of Saturn, at about 6:45 several people saw red lights south of Terre Haute, at 6:45 to 6:50 one witness (pilot?) says two big green balls of fire approaching, they reversed course and sped out of sight. At 7:00 a pilot saw two orange balls of fire ahead of him, seconds later he saw a white flash. (Note: This sighting may be important though because of the crashed B-52. One hundred miles southeast of Terre Haute at Hardinsburg, Kentucky, on October 15 (same day) a B-52 bomber and a KC-135 tanker collided and crashed --7 dead. The B-52 was carrying nuclear bombs.)

Fran Ridge:
This series of incidents was posted for its historical value. RECAP was a group copying off the name of NICAP but the Air Force took interest in this. See the documents below.

Reddish Light Performs Maneuvers Near Airplane

Feb. 4, 1959
Swan Island, Gulf of Mexico

3 AM	Commercial
45 secs Duration	3 observers
DC6 aircraft	No EMI
Gulf of Mexico	No radar contact

Fran Ridge:
Feb. 4, 1959; Gulf of Mexico
Reddish light sped back and forth across course of Pan American Airways plane, then disappeared at high speed in vertical climb. [NICAP UFOE, V]

Bill Nash:
At 3 A.M., 2/4/59, enroute in a DC6B Aircraft flying from New Orleans, direct to Panama, Captain H. Dunker and his copilot and engineer saw an unexplainable device perform unexplainable maneuvers in the sky in front of them. They were just South of Swan Island at 17,500 ft when a reddish light sped across their course from their right to their left (West to East). About 45 lateral degrees to their left, it stopped abruptly with a rapid fade in color intensity. A few seconds later it sped back across their course to a position about 10 degrees to their right, and again stopped abruptly, in only a few more seconds, the object sped back to the 45 degree left position, again stopping "on a dime" and again, as each time before, with a quick fade of color intensity, when the object started to move again, it moved right straight up at the same tremendous speed until out of sight. Total sighting about 45 seconds. The pilots were impressed by the stops and accelerations, and can think of no other term to apply to the object than "UFO".

A/c Sees Object Maneuver and Land

Jan. 10, 1961
Wichita Falls (Benjamin), Texas

Brad Sparks:
Jan. 10, 1961; Wichita Falls, Kansas (BBU)
(McDonald list)

Dan Wilson:
Jan. 10, 1961; Wichita Falls, Texas
9:18 p.m. CST. A round, bright, white light, with an amber-red color on its lower side was observed from a Beechcraft Debonair aircraft flying from Tulsa, Okla. to Abilene, Texas. The plane was approximately 15 miles from Wichita Falls on an outbound heading at an altitude of 6,500 feet and at a speed of 160 mph. Thinking the object was an aircraft in trouble, the pilot took up course of 268 degrees toward Benjamin, Texas, in pursuit of the object. At approximately 9:24 p.m., the object disappeared toward the ground near Benjamin. About 10 seconds later a red flash was seen on the ground. The aircraft continued toward a red glow at the point of the flash and at about 9:29 p.m. another red flash on the ground was observed. At a point about 4 1/2 miles from Benjamin, the aircraft flew directly over the area of the red glows. The two red glows were approximately 1/4 mile apart. The aircraft circled the area with its landing lights on in an attempt to guide men on the ground to the source of the glows. The aircraft ran low on fuel and the search was discontinued. Duration: Approx. 6 minutes in the air (Dan Wilson)

Fran Ridge:
Jan. 10, 1961; Benjamin, Texas
Glowing red, zigzagging UFO observed from air by pilot (also from ground by others); maneuvered and landed on large overgrown field. [NICAP UFOE, V]. This is historically interesting and is double listed as an AVCAT. OSI document of previous September (28th) says crash (was) reported and mention of "Moon Dust", asks ATIC to come to the scene.

The 1967 Cuban Jet Incident

March 1967
NE of Cuba

Fran Ridge:
March 1967; NE of Cuba
Time not stated. This incident has been explained to my satisfaction, but is placed here for the historical record. Briefly, this is what was supposed to have happened. Nuclear physicist Stanton Friedman, one of America's leading UFO researchers, obtained details of an alarming incident which included a statement by a security specialist attached to a unit of the Air Force Security Service, based with the 6947th Security Squadron whose mission was the monitoring of all Cuban military communications: In March of 1967... Cuban radar installations reported a bogey approaching the Cuban land mass from the northeast. Two MiG-21 interceptors were scrambled. After a futile attempt to contact the object for identification, Cuban Air Defense headquarters ordered the wing leader to arm his weapons and destroy the object. The wing leader reported his missiles armed and his radar locked-on. Seconds later the wing man began screaming to the ground controller that the wing leader's aircraft had exploded. The best version of this incident was written up in JUST CAUS, but is not available. However, the best-available source that we have is CLEAR INTENT, which for this now non-UFO case is linked below.

Shiny Triangular Object Encountered By Two Jets

June 11, 1975
Quebec City, Quebec, Canada

4:00 p.m. EST	Military & Commercial
Duration ??	observers ?
aircraft T-33 & DC-8	No EMI
Canada	No radar contact

Dan Wilson:
June 11, 1975; Quebec City, Quebec, Canada
4:00 p.m. A large shiny triangular object was observed over Quebec City at an estimated altitude above 40,000 feet. Observers were a T-33 at 29,000 feet and a DC-8 at 31,000 feet and personnel of Quebec Terminal. The object moving very slowly to the NNW was observed on the Monteal/Quebec radar. There was no radar contact on the 22nd NORAD Region radars due to outages. (National Research Council of Canada Record Group 77, Vol. 308, reel number 1742 N75/071)

Martin Shough:
<>This sounds like another of those big "tetrahedral" balloons.

Date	City	State or Country	Cat	Code	Rating	BB	NC flag	LC	Description
18600806	Norfolk	VA	1						Two objects, one red and one green, flew overhead together, moving with an undulating motion. (NICAP UFO Evidence, 1964, Hall)
18770000	Unknown City	UK	1						Three meteor-like objects moving together with "remarkable slowness" flew across the sky, visible about three minutes, "moving with the same velocity and grade of regularity.
18810611	Between Melbourne and Sydney at sea	AU	1						4:00 a.m. The two sons of the Prince of Wales, one of them the future king of England, were cruising aboard "LaBacchante" when an object resembling a fully lighted ship was seen ("a phantom vessel all aglow").
18970415	St. Louis	MO	1						7:45 p.m. This is the first report from the entire period to be declared a possible UFO. Dr. Eddie Bullard provided this report to Brad Sparks in Dec. 2006. A Medical doctor/amateur astronomer observed a cigar shaped object with a telescope.
18970425	Merkel	TX	1						Evening. People returning from church observed a heavy object being dragged along the ground by a rope attached to a flying craft. The rope got caught in a railroad track. The craft was too high for its structure to be visible but protrusions and a light could be distinguished.
19040228	San Francisco (North Pacific off)	CA	1						Formation of three objects sighted by U.S.S. Supply in North Pacific off San Francisco. (NICAP UFO Evidence, 1964, Hall, II) (These were apparently fireball meteors. See report and analysis by Brad Sparks.)
160719	Huntington	WV	1	D	5				Elongated Oval Object Hovers Near Ground
270805	Himalayan Mts.	Nepal	1						We all saw, in the direction north to south, something big and shiny reflecting sun, like a huge oval moving at great speed.
311101	Unknown City	WV	1						Flaming, one-hundred foot blimp (Page 6 Ref. 1)
32 or 33	Oakland	CA	1						About seven brilliant objects in a group flew from 30 degrees elevation in the east to 45 degrees elevation in the west, in an arc.
32 or 33	Hawthorne	CT	1						The object was cigar-shaped, emitting a pink glow at its front and a light swirl of grey smoke along its sides. It was huge compared to any other plane, and it had no rudder, [wings,] or elevator.
320129	Unknown City	NJ	1						Aluminum-like disc with periphery of yellowish lights or "portholes" on underside. (NICAP UFO Evidence, 1964, Hall)
32April/May	Durham	NY	1						Airplane. (Page 6 Ref. 1)
330705	Sussex	UK	1						Gigantic light (Page 6-7 Ref. 1)
33Aug-Dec	East Coast United States	East Coast	1						East Coast and Britain, mysterious aircraft (Page 7 Ref. 1)
331224	Kalix	Sweden	1						Beam of light coming from machine (Page 7 Ref. 1)
340203	Sweden, Northern Finland, Norway	Various	1						Ghost aviators (as reported by the New York Times) (Page 8 Ref. 1)
351124	Palestine	TX	1						Bright shaft of light (Page 10 Ref. 1)
351200	Unknown City	Brazil	1						Snake-like shafts of light hanging motionless in sky (Page 10 Ref. 1)
370720	London	UK	1						Light (Nicknamed Ghost Flier) (Page 11 Ref. 1)
370722	500 miles off US coast	In Air Space	1						Lights of alleged aircraft (Page 11 Ref. 1)
37Late	German-Polish border	In Air Space	1						Objects described as coffins and swords (Page 11 Ref. 1)
380208	Unknown City	UK	1						Things like glowing spheres that were floating in the British sky (Page 11-12 Ref. 1)

390700	Unknown City	PA	1						Resembled a modern day jet airliner without wings; weird glow (Page 14 Ref. 1)
391000	Wisconsin Rapids	WI	1						Egg-shaped object with spots like portholes observed through an astronomical reflector telescope. (Ref. 3; Report in NICAP files.)
40Spring	Hinsdale	IL	1						William T. Powers (later associated with the Center for UFO Studies) saw five disc-shaped objects traveling at about 100-200 m.p.h. They disappeared into a cloud and did not re-emerge. (Ref. 3; Jerry Clark Encyclopedia, 1992, Vol. II, p. 380.)
400530	Toledo	OH	1						At sunrise a dark ellipse was seen moving northeast, then making a 90-degree turn. Color visible on the dark object changed from red to orange to yellow. (Ref. 3; Report in NICAP files.)
400600	Hoy Island, The Orkneys	Scotland	1						On a bright sunny day an anti-aircraft unit member focused a height- and range-finder on a flattened sphere moving rapidly on a horizontal course and tracked it for 10 seconds. It's height was computed to be 38,000 feet. (Ref. 3; Randles & Warrington, 1985, p. 9.)
411200	Mozambique	Africa	1						Mozambique and Island of Madagascar strange globe glowing with greenish light about half the size of full moon. (Page 17 Ref. 1)
411200	Unknown City	GA	1						Light moving in counterclockwise circles (Page 17-18 Ref. 1)
411222	Unknown City	NY	1						Round sharply outlined object with bright aluminum or chrome finish (Patrick, delete single quotes) (Page 18 Ref. 1)
420227	Timor Sea	At Sea	1						Large disc; departed location at 3,500 miles per hour (Page 23 Ref. 1)
42Spring	Unknown City	KY	1						Powerful searchlight shining down, emanating from unidentifiable object; sometimes remained motionless (Page 23 Ref. 1)
42Spring	Unknown City	IL	1						Light gray, sharply defined rectangle; gray in color (Page 23 Ref. 1)
420625	Unknown City	Holland	1						Shining copper object, like setting sun, the size of a full moon (Page 23-25 Ref. 1)
420805	Unknown City	Solomon Isl	1						Saucer shaped cigar with round dome on top; approximately ninety feet in diameter (Page 27 Ref. 1)
420811-12	Aachen (near)	Germany	1						A phenomenon described as a bright white light (Page 29-30 Ref. 1)
420812	Unknown City	Solomon Isl	1						Formation of silvery objects directly overhead, numbering close to 150; mighty roaring sound (Page 28 Ref. 1)
420817-18	Osnabruk	Germany	1						A rocket with a long white tail of light (Page 30 Ref.1)
4208Mid	Tula Region, near Moscow	Russia	1						Huge cigar-shaped object something like a Zeppelin, but much bulkier and rounder at the front; aluminum hued color. (Page 30-31, Ref 1)
42Fall	Long Branch	NJ	1						A research engineer saw a dark elliptical object sharply outlined against the star field in the night sky. A flickering light was visible at the trailing end as it sped from horizon to horizon in 10-15 seconds. "I saw a nose view, side view, and tail view", the witness said. (Ref. 3; Report in NICAP files.)
421128-29	Turin	Italy	1						Object two to three hundred feet in length 500 mph &.four red lights spaced at equal distances along its body. (Page 34-35 Ref. 1)
421100	Bay of Biscay	UK	1						Thing massive in size; no wings; electronic interference. (Page 35-36 Ref. 1)
421200	French coast (mouth of Somme River)	At Sea	1						Two amber and orange lights, flying in unison; not aircraft. (Page 36 Ref.1)
43Approx	Washington	DC	1						Sighting of UFO formation by Metropolitan policeman. [NICAP UFO Evidence, 1964, Hall, VII]

430313	Naples	Italy	1						Roman candlelights; bright very large red light that looked like a huge irregular mass of neon. (Page 39, Ref. 1)
430512-13	Duisburg	Germany	1						Object like meteor; reddish orange in color; emitted a burst giving off a green star. (Ref. 1 Page 39)
430523-24	Dortmund	Germany	1						Large number of so-called rockets (Page 39-40 Ref.1)
430527-28	Essen	Germany	1						Cylindrical object, silvery-gold in color, with several portholes evenly spaced along its side; motionless until speeding away at several thousand miles per hour. (Page 40-41 Ref.1)
430500	English Channel	UK	1						Large, stationary orange balloon on or near the sea. (Page 41 Ref.1)
430906	Stuttgart	Germany	1						Objects resembling silver discs. (Page 43 Ref.1)
431211	Edmen	Germany	1						Unidentified object; size of thunderbolt aircraft; streak-like vapor trail. (Page 51 Ref.1)
431214	Naples	Italy	1						Small round bright light. (Page 52 Ref.1)
43Approx	Unknown City	CA	1						Object, international orange in color, elliptical shape; wobbled in unstable manner; no wings, jet exhaust, smoke, or vapor trails. (Page 51 Ref.1)
440102-03	Halberstadt	Germany	1						Two rockets; altered course; fiery head and blazing stern. (Page 54 Ref.1)
440105	Kiel	Germany	1						Black plate-sized discs. (Page 55 Ref.1)
440128	Somewhere over France	In Air	1						Airborne red light. (Page 56 Ref.1)
440219-20	Leipzig-Berlin area	Germany	1						Two objects: glowing balls; snake-like motion. (Page 59-60 Ref.1)
440219-20	Coblence and Aachen	Germany	1						Silvery cigar-shaped object like an airship; appeared to be a line of windows along the bottom of the object. (Page 60 Ref.1)
440224-25	St. Quentin	France	1						Three silver objects & resembling zeppelins & moving independently of the wind & not interconnected. (Page 60 Ref.1)
440411	Location unknown, probably	Germany	1						Projectiles resembling glider bombs; a large orange glow & smoke trail. (Page 66 Ref.1)
440425	Unknown City	France	1						Black tear-dropped craft; probable Me-163. (Page 63 Ref.1)
440426	Essen	Germany	1						Things; four orange glows; short stubby wings; football-sized¬; looking like large oranges. (Page 64-65 Ref.1)
440600	Normandy	France	1						Luminescent discus-shaped object. (Page 67-68 Ref.1)
440606	Normandy Coast	France	1						Dark ellipsoidal object & blunted on each end like sausage. (Page 67 Ref.1)
44June/July	Normandy	France	1						Spheres approximately the size of a football. (Page 70 Ref.1)
440700	Brest	France	1						Two men of the 175th Infantry Regiment, 29th Infantry Division, saw a large rectangular object with no apparent source of propulsion move steadily over the front lines and out to sea. The UFO at one point passed in front of the moon, briefly obscuring it from view. [NICAP UFO Evidence, 1964, Hall, IV]
440700	Normandy	France	1						Targets flying at extremely high altitudes. (Page 81 Ref.1)
44Summer	Unknown City	Italy	1						Egg-shaped, metallically glistening motionless object. (Page 78 Ref.1)
440800	Bt. St. Lo and Vire	France	1						Cherry-red light; size of large star; sat motionless in sky before disappearing into clouds. (Page 79-80 Ref.1)
440801	Ploesti	Rumania	1						Reddish orange balls, about the size of a baseball; spherical object, probably 5 or 6 feet in diameter, of a very bright and intense red or orange in color. (Page 71-74 Ref.1)

440812	Pelice	France	1						Enormous disc; circular lights (changing from bright yellow top white) like portholes in a ship; motionless. (Page 75 Ref.1)
440813	Kaoe Bay	Indonesia	1						Very brilliant light appearing to hover in air for at least five minutes. (Page 76 Ref.1)
440900	Unknown Island	Japan	1						White object & egg-shaped & very brilliant. (Page 76 Ref.1)
440900	Unknown City	UK	1						Bright spherical object & like a rolling ball. (Page 83 Ref.1)
440900	Antwerp	Belgium	1						Glowing globe, cloudy gas with a light inside; & three to four feet in diameter. (Page 82-83 Ref.1)
4409Late	Dover	UK	1						Solid black cylindrical-shaped; red glow emitting from rear. (Page 81-82 Ref.1)
43Fall	Unknown City	Holland	1						Light moving high in night sky. (Page 84 Ref.1)
441000	Southeast	Holland	1						Field Artillery officer and men saw a brilliant object moving from NW to SW, crossing an arc of about 90 degrees in about 45 minutes. [NICAP UFO Evidence, 1964, Hall, IV]
441016	Formosa	Taiwan	1						Small black dot; hanging stationary. (Page Ref.1)
441020	Po Valley	Italy	1						Red light appearance of an aircraft light. (Page 84 Ref.1)
441020	N. Florence	Italy	1						Two orange balls diving into the hills. (Page 84 Ref.1)
441025	Omura	Japan	1						Multiple sightings of possible balloons. (Page 78 Ref.1)
441029	Munich	Germany	1						Light blue colored ball of fire approximately three feet in diameter. (Page 85-86 Ref.1)
441030-31	Cologne	Germany	1						A ball of fire; circular, pale orange, clean edged light. (Page 86 Ref.1)
441105	Singapore	Malaya	1						A long purple-blue parabolic trail. (Page 77-78 Ref.1)
441105-06	Aachen/Bonn/Cologne	Germany	1						Possible jet; single light; 5 free lance visuals on jets, no A.I. or G.C.I. contacts; several flares similar to jets. (Page 86-87 Ref.1)
441122	Unknown City	Germany	1						Spherical object, fluctuating in brightness, pyrotechnic pink in color, changing speeds violently, swift and jerking movements. (Page 89 Ref.1)
441126	Mannheim	Germany	1						Red light that disappeared in long red streak. (Page 93-94 Ref.1)
4410Late	Strasbourg	Germany	1						Eight to ten lights in a row, glowing orange, and moving at terrific speed. (Page 95 Ref.1)
4410Late	Lingayen Gulf	Philippines	1						Bright green globe. (Page 95-96 Ref.1)
441200	Ardennes offensive	Germany	1						Amorphous reddish-glow that at times appeared cigar-shaped. (Page 97-98 Ref.1)
441202	Villafranca	Italy	1						A steady, seemingly hanging light. (Page 96 Ref.1) Ghedi Airdrome area
441205	Rhine River area	Germany	1						Alleged aircraft that climbed out of range in nothing flat. (Page 96 Ref.1)
441214-15	Erstein	Germany	1						Brilliant red light & appeared to be 4 or 5 times larger than a star going 200 mph. (Page 96,130 Ref.1)
441216-24	Unknown City	Germany	1						Amorphous reddish-glow that at times appeared cigar-shaped. (Page 103-104 Ref.1)
441217	Breisach	Germany	1						5 or 6 flashing red and green lights in T-shape. (Page 100,130 Ref.1)
441222-23	Hagenau	Germany	1						Two lights that appeared to be a large orange glow coming from ground - followed plane - appeared to be under perfect control (Page 102,130 Ref.1)
441223-24	Unknown City	Germany	1						Red streak in sky. (Page 103,130 Ref.1)

441223-24	Unknown City	Germany	1						Glowing red object shooting straight up; appeared to be aircraft doing a wingover and going into a dive and disappearing. (Page 103,130 Ref.1)
441226-27	Worms	Germany	1						Circular, fiery ball; triangle of ovals three circular, reddish-blue in color, vivid lights, looking like flames, in a tight inverted triangle formation. (Page 104-106 Ref.1)
441227	Luneville	France	1						Two sets of three red and white lights. (Page 107-108,131 Ref.1)
441227	Unknown City	France	1						Orange lights, singly and in pairs, suspended in air, moving slowly before disappearing. (Page 108 Ref.1)
441228	Neuwied / Koblenz	Germany	1						A green ball about six inches in diameter; motionless and did not appear to have anything supporting it. (Page 108 Ref.1)
441228	Ardennes	Belgium	1						Large white light; no radar contact; went straight up at a tremendous speed; disappeared. (Page 108-110 Ref.1)
441200	Strasbourg and Manheim Btn.	Germany	1						Bright fuzzy round ball, twice the size of full moon; yellow, white, red tint that was not solid color; no radar return. (Page 118-119 Ref.1)
441200	Frankfurt and Karlsrhue btn.	Germany	1						Three to four very bright balls, completely illuminated red, yellow, white and blue in color; size of tennis ball at arms length. (Page 119 Ref.1)
441200	Somewhere bt. eastern France and Western Germany	Europe	1						String of lights, twelve to fifteen in number, orange to yellow in color, approximately four feet in diameter, stretching twice the length of crews aircraft; no radar contact. (Page 120 Ref.1)
450000	Habbebishopsheim	Germany	1						An American soldier saw a disk-shaped object come down rapidly, oscillate, and land. The site could not be found in the dark. The event took place 35 km northwest of the town. (Magonia #52, Atic)
450101	Ardennes	Belgium	1						Pair of fog lights; bright yellowish orange; flying in tandem; three feet in diameter. (Page 114-117 Ref.1)
450114-15	Ingweiller	Germany	1						A large orange glow in sky approx. 5 ft. in diameter. (Page 131 Ref.1)
450118	Vancouver Island	CAN	1						Large silvery cylinder or balloon that appeared to discharge another balloon or object, each traveling in separate directions. (Page 132 Ref.1)
450129	Wissembourg and Landau bt.	Germany	1						Two amber colored lights about one foot in diameter. (Page 129,131 Ref.1)
450201	Colmar	France	1						Unusual green light & moving rapidly. (Page 133 Ref.1)
450204	Frankfurt	Germany	1						Two sightings: stationary object of tear-drop shape, resembling a balloon; shiny silver ball looking like a very bright weather balloon with a metal sheen. (Page 59 Ref.1)
450204	Dutch Coast	Holland	1						One long black stationary object, similar to a small flak burst floating. (Page 59 Ref.1)
450208	Frankfurt	Germany	1						Silver-colored ball-like object changing stationary. (Page 59 Ref.1)
450208	Strasbourg (near)	France	1						Yellow light. (Page 133 Ref.1)
450209-10	Riegel	Germany	1						Very bright light moving slowly. (Page 133 Ref.1)
450214-15	Freiburg	Germany	1						String of lights & (1 red one in center, 4 white ones on each side) blinking off and on. (Page 136 Ref.1)
450215-16	Pisa	Italy	1						Multiple sightings: flare; flare that seemed to spiral. (Page 136 Ref.1)
450221	Po Valley	Italy	1						Alleged flares: cluster of 11 or more colored flares that remained motionless; cluster of 15 orange balls of fire. (Page 139-140 Ref.1)
450222	Leghorn (near)	Italy	1						Three lights red-orange in color that did not appear to be flares. (Page 141 Ref.1)
450303	Misburg	Germany	1						Two balloon-like silver balls. (Page 143 Ref.1)

450305	Either Holland or North Germany	Germany	1						Two sightings: (1) large orange ball hanging in air; (2) similar ball that was moving horizontally at same altitude. (Page 145 Ref.1)
450323	Germersheim	Germany	1						Stationary airborne object. (Page 150 Ref.1)
4503Mid	Unknown City	New Guinea	1						Object, silver in color, very shiny & much larger than the brightest star; unaffected by gunfire; departed upward at a fantastic rate of speed . (Page 151-152 Ref.1)
450324	Nagoya	Japan	1						Multiple sightings: yellow ball of fire about 6 inches in diameter; orange and red flashes; six white balls of fire; grayish ball of fire about size of soccer ball; red ball of fire. (Page 152-153 Ref.1)
450325	Mannheim and Darmstadt bt.	Germany	1						Six or seven circular, yellowish-orange objects, solid color, and brightness; apparently individually controlled. (Page 153-154 Ref.1)
450407	North Sea	At Sea	1						A wingless object, able to stop in mid-flight and travel thousands of miles per hour. (Page 158-159 Ref.1)
450407	Nagoya	Japan	1						Ball of fire changing colors; orange to red. (Page 161 Ref.1)
450514	Nagoya	Japan	1						Red or flame-colored light, constant position, same size as B-29 landing light. (Page 166 Ref.1)
450618	Unknown City	Japan	1						A fluctuating light round in shape that changed from bright red, to dim orange. (Page 180 Ref.1)
450619	Fukuoka	Japan	1						One bright ball of fire; no fuselage or any wings. (Page 180 Ref.1)
450702	Unknown City	Japan	1						Several balls of fire much larger than supercharger glow, but of somewhat the same color. (Page 182-183 Ref.1)
4507Mid	Unknown City	WA	1						Object was very bright and had saucer-like appearance; was the size of three aircraft carriers, side-by side, oval shaped, very streamlined like a stretched-out egg and, and pinkish in color; Hovered in fixed position and then went straight-up and disappeared. (Page 188 Ref.1)
450800	Okinawa	Japan	1						Cigar-shaped, metallic, and without markings or visible openings, and 35 to 50 feet in length. (Page 189-190 Ref.1)
450900	Buckner Bay, Okinawa	Japan	1						A stationary bluish-whitelight, about the size of a dime at arms length, move and then return to original position. (Page 195-196 Ref.1)
460500	LaGrange	FL	1						A Navy gunnery and radar officer observed a dark elliptical object which moved slowly overhead, disappearing in a cloud bank. [NICAP UFO Evidence, 1964, Hall, I]
4704xx	Richmond	VA	1	D	5	BBU			Silvery Disc Seen Through Theodolite
470517	Oklahoma City	OK	1	D	5	BBU			8:30-9 p.m Field Engineer Savage saw a frosty white round and flat objectRound & Flat Object Observed By Field Engineer
470519	Manitou Springs	CO	1	D	5				Silver Object Gyrates Then Heads WNW
4705Late	Beaufort (near)	SC	1	D	5				Four Discs Flying Overhead
470612	Weiser	ID	1			BBU			6:15 p.m. 2 high speed round objects glistening in the sun at high altitude (McDonald list; FOIA; FUFOR Index; Bloecher 1967)
470614	Bakersfield	CA	1	D	5	BBU			Ten "Almost Round" Objects In Formation
470620	Hot Springs	NM	1						8:00 PM MST. Woman and her daughter observed three revolving groups of three discs in trianglular formation , straight course, S-NE (Bloecher,17,II-9)
470621	Spokane	WA	1	D	5	BBU			Eight Disc-Shaped Objects Big As A House
470621	Richland	WA	1	D	5				Three Flat Objects Faster Than P-38's
470623	Cedar Rapids	IA	1						Railroad engineer saw 10 shiny disc-shaped objects, very high, fluttering along in a string toward NW. [UFOE, XII]

470628	Rockfield	WI	1			BBU			3:43 [3:45 CST?] p.m. saw 7-10 saucer-shaped objects fly overhead heading S at high speed (McDonald list; FOIA; FUFOR Index; Bloecher 1967)
470628	Maxwell AFB, Montgomery	AL	1	D	5	BBU			Object Zig-Zags With Bursts of Speed
470629	Des Moines	IA	1	D	5	BBU			Line Of Saucers Headed SSE
470629	Jacksonville	OR	1						V-formation of nine UFOs seen by a group of people west of Medford
470629	Las Cruces	NM	1	D	5	BBU	NC		Naval Research Lab Rocket Scientists See Silver Disc
470703	South Brooksville-Harborside	ME	1	D	5	27			Astronomer Observes Ten Large Objects
470704	Redmond (near)	OR	1			BBU			11 a.m. witnesses in a car near Redmond saw 4 discs
470704	Portland and Milwaukie, OR, Vancouver, WA	various	1			BBU			many over a wide area saw 5 large discs moving at high speed
470704	Portland	OR	1			BBU			3 metallic discs glinting sunlight
470704	Portland	OR	1			BBU			a silvery disc-shaped object flipping in an erratic path
470704	Portland and Milwaukie, OR, Vancouver, WA	various	1	D	5	BBU			Seven Discs Observed By Many Witnesses
470705	Albuquerque	NM	1						9:00 AM. Five discs flew toward the east over the city; one circled back over the city. In the afternoon five witnesses saw a sphere maneuver in-and-out of clouds
470706	Fairfield-Suisan AFB	CA	1	D	5	36			Round Flat Object Size Of C-54
470706	S. Central	WY	1						Aviation engineer saw oval UFO. [UFOE, VI]
470707	Willow Springs	IL	1						Robert Meegan and his 14 year old son John saw "13 round objects all going east, single file in a straight line
470707	Lakeland	FL	1	D	5	BBU			Five "Turtle-Backed" Objects Headed NE (Sound Heard)
470707	Hickam Field	HI	1			BBU			a bright silver object about the angular size of the moon
470707	Muroc Army Air Field	CA	1	D	5	BBU			Oscillating Sphere Observed By Test Pilot & Others
470707	Arlington	VA	1			BBU			Bet. 10:30 and 11 p.m. (EDT) "blob," the size of a small airplane, reflecting white light (FOIA; FUFOR Index)
470708	Muroc AFB	CA	1			50			9:30 AM: 2 disc-shaped or spherical objects, silver and apparently metallic
470708	Muroc AFB	CA	1			BBU			11:50 AM - Noon: Sightings of discs had impact on EOTS. A round silver or aluminum-white object at first thought to be a parachute was seen
470708	Muroc AFB	CA	1			BBU			Noon. Others witnesses independently, including Muroc CO Col. Signa A. Gilkey and engineer Major Richard R. Shoop and wife saw from a different location 5-8 miles away
470708	Muroc AFB (40 miles S of)	CA	1			BBU			4 PM: a flat reflective object with no vertical fin or wings
470710	Ft. Sumner (near)	NM	1			BBU	NC		a sharply outlined, white ellipsoidal seemingly luminous 200 ft object
470711	Elmendorf AFB, Anchorage	AK	1	D	5	BBU			Round 3' Aluminum Object At Great Speed
470729	Canyon Ferry (Helena?)	MT	1	D	5	BBU			3' Bright Disc Maneuvers At High Speed
470729	Hamilton Field	CA	1	D	5	69			Two 15-25' Spheres Observed By AF Men
470813	Twin Falls	ID	1	D	5	BBU			Two Discs 6' In Diameter Near Dam
470814	Placerville	CA	1			BBU			metallic highly polished chromium surface obj 4-6 ft wide(McDonald list; FOIA; FUFOR Index)
470815-20	Rapid City AFB	SD	1	D	5	BBU			12 B-29-Sized Elliptical Objects Seen
481018	Pacific Heights, Oahu	HI	1	D	5	BBU			Bright Silver Object Cruises Across Sky
470819	Twin Falls	ID	1			BBU			55 [?] [luminous?] objects in horizontal flight looking like electric lights

470903	Lake Oswego	OR	1			85			Housewife saw 12-15 round, silver objects
470908	Logan	UT	1			BBU			5 groups of a total of 12 [?] white or yellowish objects traveling at high speed
470709	Meridian	ID	1			BBU			black disc made a half-roll and then a stair-step climb
470710	Harmon Field, Newfoundland	CAN	1			BBU			disc-shaped object flew very fast, leaving a dark blue trail
470917	Ft. Richardson	AK	1			BBU			a 2-3 ft silver sphere traveling S at tremendous speed (McDonald list; Mary Castner/CUFOS)
471001	Dodgeville	WI	1			91			man saw an undescribed object fly counterclockwise circles
471008-09	Las Vegas	NV	1			BBU			AAF reserve Capt. Moore saw object traveling at 700 mph (McDonald list; FOIA; FUFOR Index)
471014	Cave Creek (11 miles NNE of)	AZ	1			95			3-foot “flying wing,” black against the white clouds and red against the blue sky (Berliner)
471020	Xenia	OH	1			BBU			saw a round 1 ft object at 1,500 ft
471020	Dayton	OH	1			BBU			2 cigar-shaped objects reflecting brilliant sunlight (McDonald list; FOIA; Mary Castner/CUFOS)
471102	Houston	TX	1			BBU			an almost round or oval or saucer-shaped object with bright light
471112	Cape Blanco (40 miles from)	OR	1			BBU			2 balls of fire with a fiery trail headed NW at 700-900 mph
471208	Las Vegas	NV	1						Moving reddish UFO emitted flash of light, shot upwards out of sight. [XII]
480107	Wilmington	OH	1						appearance of a flaming red cone in the skies of Wilmington, Ohio, on January 7, 1948, at between 7:20 and 7:55 P.M.
480110	Wildwood	NJ	1			BBU			saw a "saucer" or "queer light" approach from the ocean
480201	Circleville	OH	1			BBU			large 60 ft domed disc, with bright orange-amber glow from within
480301	Coast of	Sweden	1			BBU			a missile-like object flying at 20,000 ft
480405	Holloman AFB	NM	1			139	**NC**		Team watches 35 meter disc executing a series of violent turns and maneuvers
480408	Ashley	OH	1			BBU			Delaware?]. Paines
480409	Holloman AFB	NM	1			BBU	**NC**		2:06 p.m. (MST). (Trakowski GRUDGE rpt)
480411	Alton	IL	1			BBU			(38.90° N, 90.17° W). Siegmund.
480418	North Atlantic	At Sea	1			BBU			N Atlantic bet. Iceland and Greenland
480418	Fairbanks	AK	1			BBU			a noiseless object with a flat discus shaped object 8 inches in size
480419	Greenville AFB	SC	1			BBU			a stationary silvery or white sphere directly overhead. Size estimated at slightly smaller than a 42 ft AT-6 at the indicated altitude. (FOIA; FUFOR Index)
480505	Adapasari	Turkey	1			BBU			[or Adapazari], Turkey (40°45' N, 30°23' E).
480506	Wake Island (near)	At Sea	1			BBU			a ball of fire explode like a shell
480507	Memphis	TN	1			BBU			(35.14° N, 90.03° W) Bray and Kaiser
480531	Wilmington	NC	1			BBU			(34.23° N, 77.94° W). Alspach and Colvin
48Summer	Erie	PA	1						Engineer saw elliptical UFO which flew horizontally, then ascended rapidly. [UFOE, VI]
48Summer	Easton	PA	1						Physicist watched 3 luminescent greenish discs cross sky. [UFOE,VI]
480620	Belleville	IL	1			BBU			Scott AFB
480629	W. Uniontown	PA	1			BBU			an oval luminous object "rolling" vertically on its edge
480630	Knoxville	TN	1			BBU			(35.98* N, 83.92° W) Whitehouse
480630	Hecla	SD	1			BBU			Pfutzenreuter. (McDonald list; FUFOR Index)
480704	Dravesburg	PA	1			BBU			Jannicky. (McDonald list; FUFOR Index)

480704	Nr. Longmont	CO	1						Revolving silver circular object soared upward at "terrific speed." [UFOE, XII]
480708	McKeesport	PA	1			BBU			Veway and Geltz. (McDonald list; FUFOR Index)
480709	Fielding Lake	WA	1			BBU			Caramia. (McDonald list; FUFOR Index)
480709	Osborn	OH	1			BBU			luminous yellowish-white object traveling E to W
480717	San Acacia Dam	NM	1			BBU	NC		group of 7 aluminum circular possibly spherical objects
480720	Arnhem	Netherlands	1						two Eastern Airlines pilots reported having seen a huge flying craft similar to a V-2 pass their aircraft in flight
480721	Van Nuys	CA	1			BBU			(34.18° N, 118.45° W). (McDonald list)
480724	Altoona	PA	1			BBU			Griebel. (McDonald list; FUFOR Index)
480725	Yakima	WA	1						At 2:00 P.M. and at 4:20 P.M., a silvery moon-sized flying blob was seen by hundreds of witnesses over the city of Yakima. Hundreds of calls flooded into the CAA office concernig the flying object.
480726	Chamblee	GA	1			BBU			green light with a silver tail about the size of a football
480727	Albuquerque	NM	1				NC	LC	AFOSI Case 3: 08:33-08:45 - Flat, round obj reflecting light, stationary at times
480729	Indianapolis	IN	1			185			shiny propeller-shaped aluminum object
480731	Indianapolis (central)	IN	1			190			cymbal shaped or domed disc object
480802	Columbus	OH	1			BBU			(39.98° N, 82.99° W). Saunders
480803	Moscow	USSR	1			BBU			(55°45' N, 37°42' E).
480804	North Powder	OR	1			BBU		LC	(McDonald list)
480811	Hamel	MN	1			BBU			a round, dull gray or silver object 2 ft diameter
480912	Pittsburgh (8-12 miles SE of)	PA	1			BBU			round white object moving at high speed
480918	Shreveport	LA	1			BBU			bright white aluminum half-spherical object
480923	San Pablo	CA	1			208			fast-flying irregularly shaped translucent white “amoeba”
480928	San Simeon	CA	1			BBU			(McDonald list; FUFOR Index)
481011	Munich	West Germany	1			BBU			Neubiberg AFB
481013	South Bend	IN	1			BBU			(41.68° N, 86.26° W). Brooke and Thompson
481014	Between Dayton, Ohio, and Indianapolis, Ind	various	1						Air Force pilot, major, saw a UFO flying in an oscillatory path, up and down motions. Intelligence report missing. (Fund Report * C-13; 2 pp.) (Project GRUDGE Report Case No. 181)
481015	50 miles E of Virginia coast	At Sea	1			BBU			bright nearly moon-shaped object with distinct bright center
481016	Sterling	UT	1			BBU			a flattened football or lozenge shaped black object
481017	Crescent City	CA	1			BBU			Blimplike object much too fast and maneuverable for a blimp
481018	Pacific Heights, Oahu	HI	1			BBU			round or elliptical bright silver object 10-15 ft in size
481024	Junction City (10 miles SW of)	KS	1			BBU			Huber. (McDonald list; FUFOR Index
481024	Phoenix	AZ	1			BBU		LC	Peterson. (McDonald list; FUFOR Index)
481024	Moorhead (4 miles SE of)	MN	1			BBU			brilliant golden-white round object suddenly appear
481031	Unknown Location	Azores	1			BBU			(McDonald list)
481103-04	Vaughn	NM	1			BBU	NC	LC	AFOSI Case 6; app 22;00 - white round obj larger than basketball (McDonald list, FUFOR index)
481112	Clark AFB, Manila	Philippines	1			BBU			very large 300 ft long 140 ft wingspan snow-white aircraft
481117	Peace River, Alberta	CAN	1			BBU			bright orange flaming egg-shaped object flying
481123	Vaughn	NM	1				NC	LC	AFOSI Case 7; app 22;00 - Colonel Hayes obs ball of light, descending vertically, which burst 100-200 feet from the ground
481126	Washington and Oregon	various	1			BBU			Young. (McDonald list; FUFOR Index)

481200	Los Alamos	NM	1				NC		Dec. 5 - 8,11,13,14,20 & 28, 1948; Los Alamos, NM. OSI, pilots, Los Alamos
481203	Fairfield-Suisan AFB	CA	1			257			round, white light fly with varying speed, bouncing motion
481203	Dayton	OH	1			BBU			(39.75° N, 84.18° W). Hoffman
481206	Albuquerque	NM	1			BBU	NC	LC	AFOSI Case 10; AESS Observed Green Flare Directly Over Sandia Base
481208	Chanute AFB	IL	1			BBU			(McDonald list; FUFOR Index)
481212	Starvation Peak (near Bernal)	NM	1			BBU	NC	LC	AFOSI Case 13; LaPaz, Captain, CAP Intel Officer Observed Green Fireball
481217	North Ambridge	PA	1			BBU			formation of 8 white luminescent rotating spherical objects
481220	Los Alamos (W of)	NM	1			BBU	NC	LC	AFOSI Case 14; AESS OP Sighted Green Fireball With Triangulation
481228	Los Alamos	NM	1				NC	LC	AFOSI Case 15: 04:31 - white obj disappeared w/greenish flash
481230	Unknown Location	Sweden	1			BBU			(McDonald list)
490104	Hickam Field	HI	1			275			a flat white, elliptical object, with a matte top
490106	Kirtland AFB, Albuquerque	NM	1				NC	LC	AFOSI Case 16: 17:50 - bright white diamond shaped obj faster than jet disappeared
490106	Los Alamos	NM	1			BBU	NC	LC	AFOSI Case 17: 03:10 - brilliant green obj at high speed disappeared behind mountainous horizon - Mexico (35.89° N, 106.31° W). (McDonald list)
490123	Tillamook (4 miles S of)	OR	1			BBU			shiny, silvery, round stationary object about 10-15 ft size (FOIA; FUFOR Index)
490127	Cortez-Bradenton	FL	1			284			a cigar shaped object as long as 2 pullman cars with 7 lighted square windows and throwing sparks (Berliner; FUFOR Index)
490214	Canado	NM	1				NC	LC	AFOSI Case 22: 18:40 - brilliant white, slightly green stationary obj fell to the west
490217	Grants	NM	1				NC	LC	AFOSI Case 23: 10:00 - oval orange luminous object moving south in vertical climb
490217	Albuquerque	NM	1			BBU	NC	LC	AFOSI Case 24; time unknown - Vertical Climb, Then Leveled Off
490227	Los Alamos	NM	1			BBU	NC	LC	AFOSI Case 25; 19:05 - Green-white fireball in horizaontal flight low in the sky
490302	Los Alamos	NM	1			BBU	NC	LC	AFOSI Case 26; 00:10 - AESS Inspector Reports High Speed Light
490303	Los Alamos	NM	1				NC	LC	AFOSI Case 27; 01:59 - bright green obj went straight down and disappeared
490307	Los Alamos	NM	1				NC	LC	AFOSI Case 32-34; PFC. Max Eugene Manlove, 1st Provost Squadron, Camp Hood, Texas, observed a teardrop-shaped object
490308	Los Alamos	NM	1				NC	LC	AFOSI Case 36; 18:36 - bright white w/greenish tint went out or disappeared behind cloud
490308	Los Alamos	NM	1				NC	LC	AFOSI Case 37; 18:35 - white aluminum colored elliptical obj disappeared behind trees
490308	Killeen Base, Camp Hood	TX	1			BBU			one white and one yellowish-red light in level flight
490313	Albuquerque	NM	1				NC	LC	AFOSI Case 40; 21:55 - Bluish-greenish white obj 1/2 diameter of full moon
490317	Killeen Base, Camp Hood	TX	1			319			7 separate sightings by trained artillery observers
490318	Fort Chimo, Quebec	CAN	1			BBU			red light like an aircraft light traveling W to E at high altitude
490327	Tucumcari	NM	1			BBU	NC	LC	AFOSI Case 42; 18:00-18:05 - amber colored, long and narrow obj faded out in distance
490327	Montoya	NM	1			BBU	NC	LC	AFOSI Case 43; 18:00 - a contrail-like yellow-amber-orange object

490327	Tucumcari	NM	1			BBU	NC	LC	AFOSI Case 44; 10:15 - bright orange, long and narrow obj faded in distance
490327	Tucumcari	NM	1			BBU	NC	LC	AFOSI Case 45; 18:00 - orange obj about the size of C-47 at 10,000 ft
490331	Killeen Base, Camp Hood (east of)	TX	1			BBU			a reddish white ball of fire pass horizontally over the base airstrip
490403	Dillon (1 mile SE of)	MT	1			BBU			Object like 2 inverted plates-matte blue-grey non-reflected bottom (Berliner; cf. FOIA; Jan Aldrich)
490405	Los Alamos	NM	1				NC	LC	AFOSI Case 47; 22:00 - green w/red afterglow obj of tremendous speed disappeared
490406	Los Alamos	NM	1				NC	LC	AFOSI Case 48; 12:05 - btwn light and dark green object traveling very fast
490407	Los Alamos	NM	1				NC	LC	AFOSI Case 49; 01:35 - green obj sighted about 200 yds from top of hill moved slowly
490407	Los Alamos	NM	1				NC	LC	AFOSI Case 50; 01:00 - green obj going S to N moving slowly
490406-07	Memphis	TN	1			BBU			6-9 climbing, diving, whirling yellow or silvery oval objects which avoided 3-4 airplanes (FOIA) 2-4 hrs
490412	Albuquerque	NM	1				NC	LC	AFOSI Case 51; 19:30 - white round obj 1/8 size of moon just extinguished
490412	El Paso	TX	1					LC	AFOSI Case 52; Witness reported grayish object rose straight up leaving smoke trail, 15 minutes duration
490420	Ludington	MI	1			BBU			fast-moving "comet with a tail" cross the sky disappearing over lake Michigan
490422	Cliff	NM	1				NC	LC	AFOSI Case 54; 09:05 - round, flat thin disc-shaped aluminum obj disappeared behind mtns
490424	Arrey (3 miles N of)	NM	1			358	NC	LC	AFOSI Case 55; 10:33 - white-yellow ellipsoid obj disappeared at tremendous rate of speed
490425	Springer Lake	NM	1			BBU	NC	LC	AFOSI Case 56; 00:50 - silvery spherical objects over a lake at high speed
490427	Killeen Base, Camp Hood (SE of)	TX	1			BBU			blinking violet object passing through branches of a tree
490428	Tucson	AZ	1			361	NC	LC	AFOSI Case 57; app 17:45 - a very large bright, sausage-shaped object
490428	Killeen Base, Camp Hood (SE of)	TX	1			BBU			a variety of strange lights, mostly slow-moving changing color from white to red to green
490430	Albuquerque	NM	1				NC	LC	AFOSI Case 58; 22:15 - Blue-green round obj abt 10th size of moon just went out
490500	Los Alamos	NM	1				NC		saw 13 saucer shaped objects in a perfect straight line formation
490502	Elko	NV	1			BBU			3 flying discs 30 ft diameter at 14,000 ft make a left turn and depart ahead of a United airliner taking off from Elko airport. (FOIA; FUFOR Index)
490503	Los Alamos	NM	1				NC	LC	AFOSI Case 59; 21:43 - bright white obj went very fast (up to 1,000 mph)
490503	Los Alamos	NM	1				NC	LC	AFOSI Case 60; 21:26;21:43;22:05 - Large white size like airplane landing lights obj
490503	Los Alamos	NM	1				NC	LC	AFOSI Case 61; 21:26-white baseball diamond lights; 21:40 - slightly larger than firebox lights
490503	Sidney	OH	1			BBU			bright shiny disc high overhead wavering, climbing and descending slightly on a straight path. (FOIA; FUFOR Index)
490504	Maplewood (4.5 Miles W of)	OH	1			BBU			bright silver flat circular object to the SE traveling NE
490505	Fort Bliss	TX	1			376			2 oblong white discs, flying at about 200-250 mph

490506	Sidney	OH	1			BBU			object with no trail or sound-too bright to see the shape
490506	Livermore	CA	1			379			2 shiny, disc-like objects rotate around each other
490506	Killeen Base, Camp Hood	TX	1			BBU	NC	LC	AFOSI Case 62; 21:40 - 21:30 - Army artillery observers est 2 days earlier, tracks its first object
490506	Los Alamos	NM	1				NC	LC	AFOSI Case 63; 01:05 - round green obj 1/8 sz of moon disappeared W of Jamez mtns
490507	St. Louis	MO	1			BBU			sun glinting off a flat reddish-brown object "somewhat triangular" shaped
490507	Killeen Base, Camp Hood	TX	1			BBU	NC	LC	AFOSI Case 64; 20:25-21:05 - brilliant white diamond-shaped obj at triangulated location
490507	Killeen Base, Camp Hood	TX	1				NC	LC	AFOSI Case 65; 19:40 - reddish greenish white diamond shaped obj dimmed and went out
490508	Killeen Base, Camp Hood	TX	1			BBU	NC	LC	AFOSI Case 66; 20:08-20:17 - brilliant white diamond-shaped object caused severe radio interference
490508	Tucson	AZ	1				NC	LC	AFOSI Case 67; 09:30-11:00 - white metallic circular obj from motionless to faster than jet
490509	Tucson	AZ	1			384	NC	LC	AFOSI Case 68; app 14:30 - silvery, round and flat obj at 750-1000 mph faded from view
490512	Holloman AFB	NM	1			BBU			Donald H. Menzel sighting
490512	Alamogordo	NM	1				NC	LC	AFOSI Case 69; 21:15-21:30 - white w/greenish twinge 1/4 diameter of full moon
490516	Davis Monthan AFB	AZ	1						Object was described as black, round and flat in shape, similar to a washtub. It maintained the same altitude, fluttering as it disappeared behind an obstacle. Ground/visual from a military source. 8-10 seconds
490516	Tucson	AZ	1				NC	LC	AFOSI Case 70; app 17:00 - black round solid flat obj at 800-1000 mph
490519	Fort Bliss	TX	1				NC		Numerous military witnesses observed a round silver thin object
490524	Bend	OR	1						Rogue River Incident
490524	Gold Beach	OR	1	D	5	BBU			hamburger-shaped metallic disc about 25-35 ft to 100 ft wide (1-1/2 miles E of Rogue River)
490601	Stewart Field, Newburgh	NY	1			BBU			yellow oblong soundless object appear and disappear every few mins
490602	Los Alamos	NM	1				NC	LC	AFOSI Case 71; 00:40 - green ball of light with no sound
490606	Killeen Base, Camp Hood	TX	1			BBU			9:05-9:08 p.m. Williams, Jones and others in UFO observation and triangulation network tracked a hovering orange object about 30-70 ft in diameter, 2 mils angular size, 1 mile above ground, 3 miles S of the observation post, 4-1/2 miles S of the Plotting Center, which suddenly started moving in level flight then exploded in a shower of particles.
490611	Los Alamos	NM	1				NC	LC	AFOSI Case 72; 20:57 - obj green then red at end of flight - about the size of a star
490614	White Sands	NM	1			BBU	NC		McLaughlin crew sights UFO pacing Navy missile
490614	Killeen Base, Camp Hood	TX	1			BBU			hovering orange object about 30-70 ft in diameter
490620	Los Alamos	NM	1				NC	LC	AFOSI Case 73; 20:10 - round, green obj turned red before vanishing
490620	Los Alamos	NM	1				NC	LC	AFOSI Case 74; 20:10 - blue-green obj directly overhead vanished
490624	Mesa	AZ	1						Five objects observed by two witnesses. One object moved vertical. Described as steel gray and at least one was a disc with two flanges
490627	Albuquerque	NM	1				NC	LC	AFOSI Case 76; 01:38 - round obj slightly more orange than star went behind building

490629	White Sands	NM	1				NC		Naval rocket expert observed a silvery disc
490703	Longview	WA	1	D	5	BBU			Metallic Discus Object Observed By 150-200 Observers
490723	Delphi (north of)	IN	1						2 observers fishing saw some 12-meter objects circle and play in the sky
490724	Socorro (near)	NM	1			BBU	NC		Green fireball sighting-left possible copper particles
490730	Mount Hood	OR	1			496			object with 1 white light and 2 red lights
490806	Las Cruses	NM	1				NC	LC	AFOSI Case 85; 20:00 - round bluish green obj disappeared behind building
490806	Las Cruses	NM	1				NC	LC	AFOSI Case 86; 20:00 - reddish blue/green round obj app 6" in diameter disappeared
490806	Alamogordo	NM	1				NC	LC	AFOSI Case 87; 20:00 - round, bright white w/slight reddish cast 1/2 size of moon
490806	Alamogordo	NM	1				NC	LC	AFOSI Case 88; 20:00-20:05 - white obj large as auto at arm's length disappeared
490806	Alamogordo	NM	1				NC	LC	AFOSI Case 89; 20:15 - round, whitish yellow w/red tail obj twice as fast as falling star
490806	Alamogordo	NM	1				NC	LC	AFOSI Case 90; 20:30 - round, white/bluish obj similar to falling star went out
490808	Medford	OR	1						objects, varying from 1 to 7, traveling slow to very fast. Air Force Conclusion: Balls of thistle
490820	Las Cruses	NM	1			BBU	NC		a rigid formation of faint bluish-green rectangles
490905	Reno (east of)	NV	1						perfectly round, silver object with curved sides coming to a smooth round edge, about the size of a P-38 wingspan
491012	Davis-Monthan AFB, Tucson	AZ	1	D	5				Four Airman View Metallic Craft
491012	Holloman AFB	CA	1	D	5	BB			H. S. Object Observed By Flight Engineer & Mechanics
491017	Mt. Palomar Observatory and Palomar Gardens	CA	1			BBU			Observatory Asst. Superintendent-Electrical B. B. Traxler saw a small black object without apparent projections moving at high speed (Sparks)
491021	Mt. Palomar Observatory	CA	1			BBU			elongated slightly curved or banana shaped object
491030	Novato (10 miles N of)	CA	1						observed a white round solid disc-shaped object that was approximately 50 feet in diameter.
491121	Akita, Honshu	Japan	1			BBU			rectangular object flying at 500 mph
491213	Holloman AFB	NM	1				NC		Unknown Aerial Phenomenon Sighted
500107	Corona (south of)	NM	1			BBU	NC		OSI Case 161 yellowish-white ball of light at about 45° elevation changing color to orange with trailing flame (FOIA; FUFOR Index)
500110	Las Vegas AFB	NV	1						A man and his father stated that an object was within their vision for approximately twenty five (25) seconds and that the appearance of the object was pure silver, round "like a balloon" and apparently constructed of. a solid material, "a metal".
500113	Holloman AFB	NM	1				NC		observed a bright white object that changed color to red and green in northern sky
500202	Davis-Monthan AFB, Tucson	AZ	1			BBU			saw object trailing smoke
500205	Teaticket	MA	1			BBU			2 thin, illuminated cylinders, one dropped a fireball, both maneuvered together then disappeared high and fast. (Berliner) 5 mins
500224	Albuquerque	NM	1			642	NC		UAO observed over Los Alamos
500225	Los Alamos	NM	1			645	NC		AEC Investigators Sighted cylinder with tapered ends, silver and flashing
500303	Selfridge AFB	MI	1			650			an intense, dull yellowish light descend vertically
500310	Orangeburg	SC	1						Disc hovered over city, sped away. [XII]

500311	Punta Arenas	Chile	1			BBU			silver ping-pong-shaped object at extreme altitude
500313	Clarksburg	CA	1						Saucer-shaped object descended, hovered with swaying motion, moved away. [IV]
500313	Mexico City	MX	1						Airport observers saw 4 UFOs, one through theodolite. [V, Xl
500316	Dallas	TX	1						Navy Chief Petty Officer at Naval Air Station saw a flat oval UFO pass under a B-36 bomber.
500317	Farmington	NM	1						Retired Army Captain, others, saw dozens of discs gyrating in sky. [IV]
500320	Clovis (35 miles SE of)	NM	1			BBU	NC		spherical then elongated object flying at 2,000 mph
500321	Kirtland AFB, Albuquerque	NM	1				NC		4925th Test Group Sees UFO
500322	Kirtland AFB, Albuquerque	NM	1				NC		4925th Test Group Sees UFO
500326	Reno	NV	1						CAA control tower operator saw maneuvering light source. [V]
500328	Santiago	Chile	1			680			white object through binoculars flying at extreme altitude and speed
500329	Marrowhode Lake	TN	1			682			6-12 dark objects shaped like 300-lb. bombs
500407	Boston (Logan Airport)	MA	1			BBU			deep-blue ellipsoid object at 15° elevation moving SW-NE opposite the winds
500410	Mobile (Brookley AFB & Bates Field)	AL	1			BBU			object flying to the NE or E over Brookley AFB at 3,500 ft
500414	Fort Monmouth	NJ	1			711			4 rectangular, amber objects
500427	Hachinohe (NE of Camp Haugen)	Japan	1			BBU			rectangular cream-colored flat object about 20 ft high, 60 ft long
500507	Ely (9 miles S of)	NV	1			721			silvery white object hover at 100 ft altitude
500509	Selfridge AFB	MI	1						object with erratically varying height, position and speed
500520	Flagstaff	AZ	1						Astronomer/meteorologist observed a "powered" disc-like object from the grounds of Lowell Observatory. [I]
500529	Mt. Vernon (about 7 miles W of)	VA	1			BBU			a spindle-shaped 150 ft long metallic object
500612	Unknown City	CA	1						Geologist saw disc-shaped object loop around plane. [VI]
500614	Oak Ridge	TN	1						4:45 PM. Fairchild plant workers at the nuclear research facilities watched a brilliant fiery ball of light hover over restricted military airspace for about two minutes. (Source: Loren E. Gross, UFOs: A History. 1951, p. 3).
500621	Misawa AFB	Japan	1	D	5				30' Disc Seen From Golf Course
500621	Hamilton AFB	CA	1	D	5				Disc Makes Five Passes At Control Tower
500623	Gulf of Mexico	At Sea	1			BBU			huge ball of fire descend slowly in 1-1/2 mins in a wavy spiral path
500627	Texarkana	TX	1	D	5	738			Huge "Dishpan" Flies Over Arsenal
500700	Cincinnati	OH	1						CAA flight engineer observed a "wingless, fuselage-shaped" UFO. [V]
500713	Huntsville	GA	1			758			polished aluminum object, shaped like a bowtie
500804	North Atlantic	At Sea	1	U	5	773			Object 100' Above Sea Observed By Ship MV Marcala
500820	Nicosia	Cyprus	1			793			small, round or elliptical, bright object overhead
500827	Brockton (near)	MA	1			BBU			shiny white spherical object about 20 ft diameter
500830	Sandy Point, Newfoundland	CAN	1			790			a black or dark round object
500830	S of Kippens, Newfoundland	CAN	1			790			(BB# may be wrong) black or yellowish-brown object
500830	Alamogordo (Holloman AFB)	NM	1	D	5	BBU	NC		Two Objects Filmed During Shrike Missile Test
500901	McKorryuk, Nunivak Island, Aleutians	AK	1			BBU			strange deep red ball of fire near the horizon
500903	Spokane	WA	1	D	5	797			Three Pancake-Shaped Objects Observed
500908	Unkown location	Germany	1			BBU			(McDonald list)
500918	Poplar (Bluff?)	MT	1			BBU			round object moving erratically at high speed then hover

500920	Kit Carson	CO	1			807			brilliant white star like object accelerate and decelerate
501003	Pomona	CA	1						Disc-shaped UFO reported by scientist. [VI]
501015	Knoxville	TN	1			819			saw 2 shiny silver objects shaped like bullet
501016	Oak Ridge	TN	1				NC		Oak Ridge Security Guard Reports Spinning Object
501020	Oak Ridge	TN	1				NC		UFOs sighted over "Control Zone"
501020	Kirtland AFB (and over Camp Hood, TX)	NM	1				NC		Flying Saucers Observed Over Kirtland AFB and Camp Hood
501023	Oak Ridge	TN	1				NC		Lab Employee Sees Flash/Radiation Detected at Oak Ridge
501023	Bonlee	NC	1			824			aluminum object shaped like a dirigible
501105	Oak Ridge	TN	1			829	NC		Aircraft Illustrator Reports Darting Pear-Shaped Object Over Oak Ridge
501123	Maxwell AFB, Montgomery	AL	1			BBU			(32.37° N, 86.36° W). Thompson. (McDonald list; FUFOR Index)
501127	Huron	SD	1						CAA personnel saw hovering maneuvering UFO. [V]
501130	Knoxville	TN	1			BBU	NC		More UFOs, Radar-Jamming, and Radiation at Oak Ridge
501200	Cheyenne (near)	WY	1						USAF officer saw aluminum-like oval UFO. [III]
501202	Nanyika, Kenya	Africa	1			845			pearly, iridescent object with a flattened top
501205	Oak Ridge	TN	1				NC		Wife of Security Officer Reports Object Made of Polished Metal
501205	Oak Ridge	TN	1				NC		FBI Memo - Detection of UFOs Over Oak Ridge
501206	Fort Meyers	FL	1			848			75 ft object, 3-4 ft thick, bubble on top, silver with a red rim having 2 white and 2 orange jets
501206	Westover AFB	MA	1	D	5				Sighting 2 Hours Before National Alert
501211	Gulkana (10 miles NW of)	AK	1			849			2 white flashes, followed by dark cloud - rose and split in 2
501227	Lakehurst	NJ	1			BBU			(40.01° N, 74.31° W). Folean. (McDonald list; FUFOR Index)
510108	Fort Worth (South of)	TX	1			864			watch 2 stationary groups of red and green lights
510112	Fort Benning	GA	1			868			light with a fan-shaped wake remain motionless like a star
510116	Artesia (near)	NM	1	D	5	BBU			Two Discs Approach Skyhook
510214	Alamogordo	NM	1						Two Air Force pilots, while watching a large balloon, saw a flat, round white object hovering at high altitude. [III]
510219	Rodeo	NM	1			BBU	NC		pilot saw a green flare [fireball?] pass his plane.
510221	Durban	S. Africa	1			896			dark red, torpedo-shaped object with darker center
510226	Ladd AFB	AK	1	D	5	897			Oblong Object Hovers Over Runway
510310	Chinnampo	Korea	1			BBU			large red-yellow glow burst and become blue-white
510313	McClellan AFB, Sacramento	CA	1	D	5	907			Cylinder With Twin Trails
510315	New Delhi	India	1	D	5	908			20+ Top Shelf Witnesses / Metallic Cigar
510324	Holloman AFB	NM	1			BBU	NC		Project Twinkle Photographed UFO
510601	Niagara Falls	NY	1			925			glowing yellow-orange, saucer shaped object
510601	Dayton	OH	1						Wright-Patterson AFB official watched disc make sharp turn. [III]
510709	Corona	NM	1			BBU	NC		red glowing ball about size of full moon
510724	Portsmouth	NH	1			943			greyish 100-200 ft tubular object
510800	Central	NM	1						Mining engineer sighted two discs with "portholes." [VI]
510803	Pinckney (near)	MI	1						NICAP Adviser saw a glowing, yellowish UFO which moved on an undulating course. [VI]
510820	Finland AFS	MN	1			BBU			(McDonald list; FUFOR Index)
510825	Albuquerque	NM	1			955	NC		wife saw a flying wing-shaped craft pass overhead
510827	Vandalia	IL	1			BBU			large blinding orange light to the SW
510906	Claremont	CA	1			964			6 orange lights in an irregular formation, fly straight and level

510923	Victorville (1st jets scrambled from)	CA	1			BBU			a bright silvery aircraft with highly swept back 45° wings
511002	White Sands	NM	1				NC		Three Separate Reports
511002	Columbus	OH	1			980			bright oval with a clipped tail fly
511009	Terre Haute	IN	1	D	5	985			object appearing as a silvery "flattened tennis ball"
511009	Terre Haute	IN	1						CAA employee saw h.s. "flattened tennis ball"
511102	AZ, NM, TX, OK	various	1			BBU			Green fireball. (LIFE Incident 10; [FUFOR Index?])
511102	Mojave (30 (35?) miles N of)	CA	1			BBU			30 ft disk-shaped flying object in the SW, 10 ft thick, blue green
511107	Lake Superior	MI	1						Steamship Captain and crew watched elongated orange object with six glowing "portholes" speed towards Ontario. [XII]
511110	Albuquerque	NM	1						The eighth fireball in 13 days was seen here and as far away as Wyoming. (United Press)
511124	Coopersville	MI	1			BBU			a large round object flying at 500-1,000 ft height at about 1,000 mph
511126	Milwaukee (25 miles E of)	WI	1			BBU			an orange ball of fire with blue tail flying on a level trajectory
511030	Yucca Flats	NV	1				NC		Squadrons of UFOs over atomic test site
511200	Peru (NW of)	NB	1			BBU			blue light in the NW, vanish to the SE
511207	Oak Ridge	TN	1			1021	NC		20' square obs by secty guard; F-47's scrambled
511224	Mankato	MN	1			1013			Military witness(es). [Nov. 24, 1951, case??] (NARA)
511207	Sunbury	OH	1			1023			silvery sphere through telescope; 2 specks sighted at sides
520000	London, Ont	CAN	1						Astronomer observed elliptical UFO with 2 bright body lights. [UFOE, VI]
520116	Artesia	NM	1			1037	NC		a motionless dull white, round object 5/3 larger than the balloon
520120	Fairchild AFB	WA	1			BBU			bluish-white spherical object with a long blue tail that flew beneath a solid overcast
520201	Terre Haute (10 miles W of)	IN	1			BBU			close group of moving lights changing color from blue to green to yellow
520220	Greenfield	MA	1						Congregational Minister saw three very bright silver objects, apparently spherical, traveling in a perfect V. [VII]
520226	Albany	NY	1						Minimum 3-5 Minute Incident Described As Possible Meteor????
520310	Oakland	CA	1						An engineering metals inspector watched two dark wing (or hemisphere) shaped objects pass overhead, swaying back and forth like a pendulum. (NICAP report.)
520315	Sandia Base	NM	1			BBU	NC		4:30 p.m. (MST). (McDonald list; BB Rpt 7) Flattened Oval As Large As B-29
520320	Centreville	MD	1			1074			dull orange-yellow saucer-shaped light fly straight and level
520329	Butler	MO	1						Chairman of Industrial Commission of Missouri saw cylinder-shaped, silver UFO, [UFOE, VII]
520402	Lake Mead	NV	1						a man observed a UFO. It was silver in color, very large and at a tremendous altitude
520403	Marana	AZ	1			BBU			bright aluminum shiny oblong object above 54,000 ft (Project 1947; FUFOR Index)
520405	Phoenix (Glendale?)	AZ	1			1096			large, dull grey circular object, followed by 2 more, fly straight and level at high speed. (Berliner)
520405	Miami	FL	1			1097			4 dark circular objects with mostly fuzzy edges each ½ the angular size of Moon. (Berliner)
520406	Temple	TX	1			1099			50-75 grey white discs
520408	Big Pines (near)	CA	1						Disc-like UFO observed by TV network engineer. [UFOE, VI]

520409	Pecos (6 miles W of near Lackland AFB)	TX	1			BBU			Bethune. (Hynek UFO Rpt p. 43; FUFOR Index)
520412	North Bay CFS, Ontario	CAN	1			1108			The round amber object came in from the southwest and moved across the RCAF Station airfield at North Bay, stopped and moved off again in the reverse direction
520415	Santa Cruz	CA	1			1115			2 faint objects flying fast along the horizon
520416	Madison	WI	1						observed 5 or 6 semi-circular objects almost overhead, glowing with a yellowish-white light
520416	Shreveport	LA	1			BBU			Course reversing light. (Willy Smith pp. 25-29; FUFOR Index)
520417	Longmeadow	MA	1			1124			round, deep orange object fly fast and erratic
520417	Yuma Test Station	AZ	1			1127			flat-white, circular object flew with an irregular trajectory
520417	Nellis AFB	NV	1						Large group of circular UFOs. [UFOE, III]
520418	Bethesda	MD	1			1128			7-9 circular, orange-yellow lights
520418	Corner Brook, Newfoundland	CAN	1			1129			Janitor saw a yellow-gold object make a sharp turn, leaving a short, dark trail. (Berliner; FUFOR Index)
520418	Corner Brook, Newfoundland	CAN	1			1131			round, yellow-gold object fly S then return
520420	Flint	MI	1	D	5	BBU			Twenty Groups of Objects Observed
520422	Naha AFB	Okinawa	1			1144			elliptical object followed by 2 then another 2
520424	Milton	MA	1	D	5	1148			Squarish Objects Observed By Tower Crew
520424	Colorado Springs	CO	1						Dark (object) with luminous glow, swept wing, no fuselage. Straight and level maneuvers
520424	Clovis	NM	1			1151	NC		orange-amber lights, sometimes separate, sometimes fused
520427	Roseville	MI	1			1160			silver oval roll, descend and stop
520427	Yuma	AZ	1			1163			bright red or flame-colored discs
520428	Homewood	IL	1						Two civilian witnesses reported to the Air Force that an object in the SE that resembled a white parachute was apparently circling a large airplane for about three minutes. Not listed in BB unknowns
520501	Moses Lake	WA	1			1174			Civilian AEC employees observed a slow moving wingless silver object at 5,000 feet altitude in the Hanford area
520505	Tenafly	NJ	1			1183			6-7 objects translucent, cream-yellow
520507	Keesler AFB	MS	1			1185			aluminum or silver cylindrical object dart in and out of the clouds 10 times. (Berliner)
520510	Albuquerque	NM	1			BBU	NC		saw 2 silvery disc-shaped objects
520510	Paphos, SW	Cyprus	1			BBU			luminous circular object rise from sea level
520510	New Ellenton	SC	1			1198	NC		UFO Incident at Savannah River (AEC) Plant
520511	George AFB	CA	1			BBU			(McDonald list; FUFOR Index)
520512	Roswell (near)	NM	1						An object was seen that was blue-green in color and its estimated altitude above the terrain was 30,000 to 40,000 feet.
520513	Greenville	SC	1	D	5	BBU			4 oval reddish-yellow or reddish-brown luminous objects
520513	National City	CA	1						meteor-like obj seen descending in a curving path to the northwest over the San Diego Bay area
520514	Mayaquez	Puerto Rico	1			1213			2 shining orange spheres
520515	Georgetown, Washington	D.C.	1			BBU			soft golden glowing oval object
520518	Greenville	SC	1						Four amateur astronomers observed a diamond-shaped formation, oval shaped objects, wobbled in flight
520520	George AFB	CA	1			BBU			1:25 p.m. (PST) (McDonald list; FUFOR Index)
520522	Alexandria	VA	1	D	5	BBU	NC		Top CIA Official & Guests Have Notable Sighting

520523	Kirtland AFB, Albuquerque	NM	1	D	5	BBU	NC		silvery or aluminum color flat on the bottom, slightly rounded on top
520525	Randolph AFB	TX	1			BBU			12 orange-white tear-drop shaped lights (McDonald files; Jan Aldrich; cf. Ruppelt p. 140; FUFOR Index)
520525	Walnut Lake	MI	1			1227			large white circular object having dark sections on its rim
520528	Saigon	Indochina	1			1232			white-silver disc-shaped object
520528	Albuquerque	NM	1			1233	NC		(1:45-2:40 PM) 2 circular objects
520528	Albuquerque	NM	1			1233	NC		(8:20-8:40 PM) 2 circular objects
520529	San Antonio	TX	1			1236			bright tubular object tilt from horizontal to vertical
520601	Rapid City	SD	1			1243			USAF A/1c Beatty and two civilians saw at least 5 long silver objects which flew in a neat box formation with a leader. (Berliner)
520601	Walla Walla	WA	1			1245			oval object with a "definite airfoil" perform a fast climb
520601	Soap Lake	WA	1			1246			3 glimmering objects fly straight and level
520602	Bayview	WA	1			1249			purple object for unknown length of time
520604	Stuttgart	West Germany	1			BBU			circular object with white lights on the leading edge
520605	Lubbock	TX	1			1255			8 yellow circular objects
520605	Albuquerque	NM	1			1256	NC		shiny round object fly 5-6x as fast as an F-86 jet
520605	Offutt AFB, Omaha	NE	1			1257			bright red stationary object for 4-5 mins
520606	Kimpo AB	Korea	1			BBU			(Case missing) cylinder-section flat disc-shaped object
520608	Albuquerque	NM	1	D	5	1263	NC		4 shiny objects fly straight and level in a diamond formation
520609	Minneapolis	MN	1			BBU			(Case missing) Berliner
520612	Fort Smith	AR	1			1269			orange ball with a tail fly with a low angular velocity
520613	Le Bourget (airport)	France	1						Control tower operators and pilot watched brilliant light source cross sky SW of field after hovering for about an hour. [UFOE, X]
520613	Middletown	PA	1			1273			orange object travel S, stop for 1 sec
520615	Louisville	KY	1			1285			large, cigar-shaped object with a blunt front
520616	Walker AFB, Roswell	NM	1			1295	NC		S/Sgt. Sparks saw 5-6 greyish discs, in a half-moon formation fly at 500-600 mph. (Berliner)
520617	McChord AFB	WA	1			1298			Many witnesses saw 1-5 large silver yellow objects flying erratically, stop and start. (Berliner)
520617	Hasselbach	East Germany	1			BBU			40-50 ft frying pan-shaped object with two rows of 1 ft holes
520617	Cape Cod	MA	1			1299			light like a bright star cross the nose of a jet
520618	Columbus	WI	1			1302			crescent-shaped object hover then speed away
520618	Walnut Lake	MI	1			1305			orange light zigzag then hover
520620	Paulette (near)	MS	1			BBU			cone-shaped object
520622	Pyungthek	Korea	1			1323			4 ft diameter orange object
520623	Spokane	WA	1			1331			round disc with a metallic shine flash and flutter like a flipped coin. (Berliner)
520623	McChord AFB	WA	1			1332			a very large light fly straight and level
520623	Oak Ridge	TN	1			1334	NC		Secretary Martha Milligan saw a bullet-shaped object with burnt-orange exhaust fly straight and level. (Berliner)
520623	unknown location	Japan	1			BBU			black coin-shaped object, 15-20 ft in diameter
520623	Owensboro (near)	KY	1			1335			2 obj looking like “giant soap bubbles” reflecting
520625	Tokyo	Japan	1			1340			no information
520625	Japan, Korea Area	Far East	1			1347			Military witness(es). Case missing [?]. (NARA)
520625	Chicago	IL	1			1344			bright yellow-white, egg-shaped object
520625	unknown location	MI	1			BBU			(FUFOR Index)
520626	Terre Haute	IN	1			1348			undescribed object fly at 600 mph

520626	Pottstown	PA	1			1351			3 different sightings of flashing lights
520627	Topeka	KS	1			1355			pulsating red object change shape from circular to a vertical oval
520628	Kirtland AFB, Albuquerque	NM	1			BBU	NC		2 silvery disc-like objects high in the sky
520628	Lake Kishkonoug	WI	1			1361			silver-white sphere become an ellipse
520628	Nagoya, Honshu	Japan	1			1363			dark blue elliptical-shaped object
520629	O'Hare Airport, Chicago	IL	1			1364			a bright silver smooth surfaced, flat oval 30 ft object (Jan Aldrich; unpublished Ruppelt manuscript)
520630	Columbia	MO	1			BBU			object at extreme distance irregularly changing color from red to green
520630	Phoenix	AZ	1			BBU			Gaudet [and Wolf?]. (Jan Aldrich; FUFOR Index)
520630	Sea of Japan	at sea	1			BBU			circular object flattened on top and bottom
520701	Boston	MA	1						7:25 am. Two silvery elliptical UFOs were observed visually near Boston, where an F-94 interceptor was sent up to investigate
520703	Selfridge AFB	MI	1			1380			2 big lights about 20 ft diameter
520703	Chicago	IL	1			1382			2 bright pastel green discs fly straight and level very fast
520705	Elmendorf AFB, Anchorage	AK	1			BBU			(FUFOR Index)
520709	Colorado Springs	CO	1			1405			object shaped like an airfoil less its trailing edge, luminous white, move slowly and erratically. 12-mins. (Berliner)
520709	Kutztown	PA	1			1409			aluminum, oval-shaped object change direction
520709	Rapid City AFB	SD	1			BBU			A sergeant and three airmen reported that three milky white discs were between 30,000 and 40,000 feet. The airmen observed the objects which appeared between 3 and 4 inches in diameter (at arm's length), moving faster than any jet aircraft they have seen (FUFOR Index)
520712	Annapolis	MD	1			1431			3:30 p.m. Insurance company president William Washburn saw 4 large, elliptical-shaped objects fly very fast, stop, turn 90° and fly away. 7-8 secs. (Berliner)
520712	Chicago	IL	1						Air Force weather officer, many others at Montrose Beach saw large red object with small white lights on side reverse course directly overhead. [UFOE, III]
520714	Okinawa (near)	Guam	1						a spherical object to the north of the base. The object was moving straight down, but its course changed immediately as it moved to the northeast across the sky
520715	West Palm Beach	FL	1			1451			discus-shaped object, greyish, except when hovering
520715	Pendleton	OR	1						Many civilians in 5 cars and an Oregon State Trooper observed a spherical-shaped object
520716	Hampton Roads	VA	1			BBU			2 amber-colored objects approach from the S
520717	Batesville	MS	1						State Highway Patrolmen observed two or three round blue flourescent colored objects approximately 100 feet in diamter. The objects were observed for approximately 30 minutes.
520717	White Plains	NY	1			1502			2 round objects, bluish white with brighter rims, fly in formation
520717	Lockbourne AFB	OH	1			1476			amber-colored elliptical-shaped object with a small flame
520717	Rapid City	SD	1			1479			Military (USAF?) witness(es).
520717	Tsuiki Air Base, Kyushu	Japan	1						a formation of twelve circular luminous objects moving in the same direction as balloons just released
520718	Lockbourne AFB	OH	1			1482			a light like a big star that disappeared when an aircraft approached
520718	Miami	FL	1			1483			opaque, silvery bubble fly very fast at a right-angle to the wind
520718	Patrick AFB	FL	1	D	5	1485			series of hovering and maneuvering red-orange lights

520719	unknown location	Unknown	1			BBU			2 cigar-shaped objects, one hovering the other moving to the E (Battelle Unknown #4)
520719	River Edge	NJ	1						Associated Press reporter Saul Pett about midnight saw an intensely glowing, non-blinking orange ball of light moving steadily overhead from the northwest to the southeast for 1-2 minutes
520719	Williston	ND	1			1492			elliptical-shaped object with a light fringe, descend fast
520719	Elkins Park	PA	1	D	5	1494			saw 2 star-like lights maneuver, hover and speed
520720	Lavalette	NJ	1	D	5	1504			2 large orange-yellow lights with some dull red color fly in trail
520721	Baltimore	MD	1						Brilliant orange, cone-shaped object size of four engine aircraft sighted at 15,000 to 20,000 feet then dove to 2000 feet
520721	San Marcos AFB	TX	1			1516			a blue circle with a blue trail hover then accelerate
520721	Randolph AFB	TX	1			1522			an elongated, fuselage-shaped object fly straight and level
520721	Holyoke	MA	1			1524			round, yellow, flashing light fly downward
520722	Rockville	IN	1			1533			an aluminum delta-shaped object with vertical fin
520722	Uvalde	TX	1	D	5	1536			large, round, silver object fly at 1,000+ mph while gyrating
520722	Maxwell	TX	1						At 2240 CST one bluish green object was observed at 8,000 feet. The object climbed to 14,000 in arc very rapid.
520722	Los Alamos	NM	1			1538	NC		saw 8 large, round, bright aluminum objects fly straight and level
520722	Brookley AFB (Mobile)	AL	1			BBU			barrel-shaped black object 3.5-4 ft diameter, emitting black smoke trail
520722	Stafford	VA	1			1654			bright ovoid object hover then move in stops and starts
520723	Long Beach	CA	1	D	5				Oval Object Zig Zags Over Naval Ship Yard
520723	Culver City	CA	1	D	5				Two Discs Emerge From Elliptical Object
520723	Alexandria	VA	1						9:00 p.m. A red object, size undetermined, was sighted southwest of Alexandria, Virginia. The object hovered for 10 minutes, then disappeared in a westerly direction at a high rate of speed
520723	Springfield	OH	1						Bt. 8:05 and 10:15 p.m. two lights, some described them as white globes, were seen high in the sky.
520723	Nahant	MA	1						2:15-218 a.m. A Seaman on watch at Nahant Coast Guard Station observed two (2) bluish lights approximately 5 feet in diameter, appearing as flat, disc-shaped objects having no aerodynamic features
520723	Lockbourne AFB	OH	1						Numerous witnesses observed four (4) objects hovering in the vicinity of the Lockbourne AFB, Columbus, Ohio. The objects were round and flourescent white in color.
520724	Clovis (Clovis AFB)	NM	1						2 oval-shaped objects, reddish-orange neon glow, approx 3-4 mi high and trav E approx speed 400-600 MPH. In formation approx 1-1½ mi apart on level course-no vapor trails, no sound. Duration approx 4 mins
520724	Travis AFB	CA	1			1588			At 2215 hours PDST, thirteen witnesses of the 1501st Maintenance Squadron observed a round object with a reddish center with a halo around the object. (NARA)
520725	Wilmington	DE	1			BBU			Afternoon VA employee saw 2 discs reflecting light in a climb
520726	Kansas City	MO	1			1628			light with red-orange flashes descend in the NW
520726	Kirtland AFB, Albuquerque	NM	1			1637	NC		8-10 orange balls in triangular or V-formation flying fast
520726	New York City (Atlantic 200 miles S of)	NY	1			BBU			3 amber edged [?] white flashing objects traveling at Mach 1
520727	Wilmington	DE	1						James R. Thomas observed one cylindrical object with a domed top and bottom moving northwest to southeast
520727	Wilmington	DE	1			1664			[Same as July 25 case?] (NARA)

520727	Selfridge AFB	MI	1			1680			many round white objects fly straight and level, very fast
520727	Ann Arbor	MI	1						Biologist reported "flotilla" of rocket-like UFOs. [UFOE, VI]
520727	Washington	DC	1						At 7:30 p.m. Both Air Force personnel and National Airport employees observed a large round object reflecting sunlight as it hovered over the U.S. Capitol Building.
520727	Witchita Falls	TX	1			1684			2 disc-shaped objects illuminated by a phosphorus light
520727	Manhattan Beach	CA	1	D	5	BBU			Large Object Separates Into 7 Discs
520727-28	Washington (The Pentagon)	DC	1						At 2000 hours July 27 and 0200 hours July 28, 1952, Mrs. XXXXXXX observed a white light immediately over the Pentagon, then it made a direct descent toward the Pentagon, stopped and veered off.
520728	Heidelberg	West Germany	1			1700			saucer-shaped object having appearance of light metal
520728	McChord AFB	WA	1			1708			dull, glowing, blue green ball, size of a dime at arms' length
520728	Baltimore	MD	1						FLYOBRPT. Mr. S. Robert Tralins observed 17 shooting lights moving in varied directions at extremely high speed
520729	Walker AFB, Roswell	NM	1			BBU	**NC**		sighted several high-speed discs through theodolite
520729	Merced	CA	1			1738			dark, discus shaped object, trailed by a silvery light
520729	Witchita	KS	1			1739			bright white circular object with a flat bottom fly very fast
520729	Albuquerque	NM	1	D	5				Air Force reserve colonel at Los Alamos saw a strange ellipse shaped light
520730	Atlanta	GA	1			BBU			(FUFOR Index)
520730	Albuquerque	NM	1			1755	**NC**		stationary orange light. No further details in files
520730	San Antonio	TX	1			1758			round, white object fly slow then speed away
520730	Holloman AFB, Alamogordo	NM	1			BBU	**NC**		(FUFOR Index)
520800	Washington County (Skylight Mtn.)	AR	1			BBU			Inverted tin colored saucers
520800	Falls Church	VA	1	D	5				Rotating light UFO seen by ground observers, including police.
520801	Sharonville	OH	1						Brilliant white disc observed at low altitude. Others reported oval object. [UFOE, XII]
520801	Albuquerque	NM	1						At 9:50 p.m. a Scripps-Howard reporter saw a cluster of glowing white objects overhead
520801	Lancaster	CA	1			1771			2 brilliant red lights hovering and maneuvering
520801	Vincennes	IN	1						Three men witness maneuvering disc
520802	Lake Charles	LA	1			1783			red ball with blue flame tail fly straight and level
520802	Lubbock	TX	1						five civilian men observed a metallic looking spherical shaped object hanging in the air. The only apparent movement was a quivering motion.
520802	Houlton	ME	1			BBU			saw 21 objects traveling 200-600 mp
520803	Truth or Consequences	NM	1	D	5	BBU	**NC**		3 light green cylindrical objects hovering at 45° elevation
520804	Phoenix	AZ	1			1812			yellow ball which lengthened and narrowed to plate shape
520804	Mount Vernon	NY	1			1813			object, shaped like a lifesaver or donut emitting black smoke from its top
520805	Baltimore	MD	1						Experienced amateur astronomer observed two copper-like discs. [UFOE, VI]
520805	Huacho (between Lima and)	Peru	1			BBU			3 saucer-shaped objects in a V-formation maneuver
520806	Tokyo	Japan	1			1841			Continuation of Haneda AFB sightings. (NARA)
520806	Belleville	MI	1			1843			Military witness(es) (NARA)
520806-07	Port Lyautey	Fr. Morocco	1			BBU			brilliant white disc-shaped luminous object with red blinking light

520806-07	Kerkrade	Holland	1						Marine engineer designer saw two disc-shaped objects with superstructures. [UFOE, X]
520807	San Antonio	TX	1			1855			4 glowing white discs
520808	Warren AFB	WY	1			BBU			object immediately stop without appearing to decelerate
520809	Lake Charles AFB	LA	1			1870			disc-shaped object fly S at 5,000 ft at high speed
520810	In airspace over	Japan	1			BBU			object moving down from 8,000 to 1,500 ft then hovering and vanishing
520811	Hampton	VA	1			BBU			series of 7 yellowish-orange low-flying objects climb away
520811	Rockford	IL	1						Fifty - four "flying saucers" were sighted streaking over Rockford Sunday evening by at least 14 persons
520812	Cape May (near)	NJ	1			BBU			stationary glowing object lose brightness and diminish in size
520812	Wink (70 miles W of)	TX	1			BBU			several pie-pan-shaped aluminum colored objects
520813	Tokyo	Japan	1			1889			orange light fly a left orbit at 8,000 ft and 230 mph
520817	Athens	GA	1			BBU			an intensely bright bright white round object hovering
520817	Abilene	TX	1			BBU			oblong polished metal object climbing at 500 mph
520818	Fairfield	CA	1			1920			object change color from red green-orange-blue
520819	Boron	CA	1			1928			GOC Observer saw 2 objects, shaped like fat bullets
520821	Dallas	TX	1			1944			3 blue-white lights hover then descend
520822	Elgin	IL	1						USAF jets, guided by Ground Observer Corps, chased a pulsating yellowish light. [UFOE, VII]
520823	Sinuiju	North Korea	1			BBU			orange-red cigar-shaped object
520823	Akron	OH	1			1956			pulsing amber light fly straight and level
520824	Tucson	AZ	1			1964			a large round, metallic, white light with a vague lower surface
520824	Leveland	TX	1			1969			object shaped like a spinning top, changing color
520825	Frontenac-Pittsburg	KS	1			1972			70-75 ft inverted platter-shaped dull aluminum color
520825	Delaware	OH	1			1915			(NARA; FUFOR Index)
520825	Holloman AFB	NM	1			1979	**NC**		round silver object fly S, turn and fly N
520826	Lathrop Wells	NV	1			1986			V-shaped contrail, a dark cone in the center
520826	Biloxi	MS	1			1987			(NARA)
520826-30	Veracruz	Mexico	1			1994			object traveling in straight line out to sea with buzzing noise
520828	Brookley AFB, Mobile	AL	1			2006			multiple red stationary and maneuvering objects
520828	LeRoy	NY	1						Disc circled airliner verttically. [UFOE, II]
520828	Atlanta	GA	1						Police watched maneuvering UFO. [UFOE, VII]
520829	Villacoublay	France	1						Unidentified bright blue light observed through theodolite; once appeared as luminous white bar edged with black. [UFOE, X]
520829	Colorado Springs	CO	1			2013			3 objects 50 ft in diameter, 10 ft high, aluminum
520830	Santa Monica	CA	1			BBU			horizontal bar-shaped objects appearing and disappearing
52Fall	NY to Puerto Rico	In Airspace	1						Three Pan American Airways pilots watched UFO hover, speed away. [UFOE, V]. Zammett/Harris/Hutchins (AL)
520901	Atlanta	GA	1			BBU			light, similar to the evening star, move up and down
520901	Marietta	GA	1			2022			red, white, and blue-green object which spun and shot off sparks
520901	Marietta	GA	1			BBU			2 large white disc-shaped objects with green vapor trails
520903	Tucson	AZ	1			BBU			shiny, dark ellipse make three broad, curving sweeps
520906	Lake Charles AFB	LA	1			2045			bright star-like light move about the sky
520907	Tucson	AZ	1			2048			orange teardrop-shaped object whirl on its vertical axis,
520907	San Antonio	TX	1			2049			orange object or light (color temperature 2,000° F.)
520907	San Antonio	TX	1			2052			(NARA)
520909	Portland	OR	1						Two oval objects observed in searchlight beam. [UFOE, XII]

520909	Rabat	Fr. Morocco	1			2062			disc with lights along part of its circumference (Berliner)
520912	Allen	MD	1			2077			a white light with red trim and streamers fly NE
520913	Allentown	PA	1			2085			a white light with red trim and streamers fly NE
520914	Santa Barbara	CA	1			2086			blue white light travel straight and level, then fly up
520914	White Lake	SD	1			2089			red, cigar-shaped object, with three puffs behind it
520914	El Paso	TX	1			2092			(NARA)
520914-15	Ciudad Jaurez	Mexico	1			BBU			6 groups of 12-15 luminous spheres or discs
520916	Belle Glade	FL	1						Circular object with row of lights on underside passed low overhead; cattle bolted. [UFOE, XII]
520917	Tucson	AZ	1			2105			2 groups of 3 large, flat, shiny objects
520922	Fairfax County	VA	1						Police observed 3-4 UFOs maneuvering erratically. [UFOE, VII]
520923	Gander Lake	CAN	1			2119			bright white light, which reflected on the lake
520924	Charleston	WV	1			2124			bright metallic particles or flashes, up to 3 ft in length
520927	Hempstead	TX	1			BBU			white-silver circular flat disc flying erratically at 600-700 mph
520927	Inyokern	CA	1			2128			2 couples using a 5x telescope saw a large, round object
520928	Tsushima Island	Japan	1			BBU			(35°11’ N, 136°45’ E). (McDonald list)
520929	Rochester, England	UK	1			2136			2 flat objects hovering then speeding away
520929	Aurora	CO	1			BBU			5-6 circular objects, bright white but not shiny
520930	Denver	CO	1			2138			[Same as Sept. 29 Aurora case?] (NARA)
520930	Edwards AFB	CA	1						Aviation photographer, others, observed two discs alternately hovering and darting around. [UFOE, VI]
520929	Southern Pines	NC	1			2140			green ellipse. with a long tail
521001	Shaw AFB	SC	1			2142			bright white light fly straight, then vertical
521001	Pascagoula	MS	1			2143			heard a loud blast and saw a round, milky-white object
521007	Alamogordo	NM	1			2150	**NC**		pale blue oval, with its long axis vertical, fly straight and level
521010	Otis AFB	MA	1			2155			blinking white light move like a pendulum then shoot straight up
521011	Newport News	VA	1						Ground Observer Corps spotter saw disc-shaped UFO with "dome". [UFOE, XII]
521012	Palo Alto	CA	1						V-formation of six apparent discs. [UFOE, V]
521013	Oshima	Japan	1						Air Force pilot and engineer saw round object in cloud formation; object became elliptical in appearance, sped away disappearing in seconds. [UFOE, III]
521017	Taos	NM	1			2171	**NC**		round bright blue light move from N to NE at an elevation of 45°
521017	Killeen	TX	1			2172			rectangle of 10 lights, move more or less straight and level
521017	Tierra Amarilla AFS	NM	1			2173	**NC**		whites streamer move at an estimated 3,000 mph in an arc
521019	San Antonio	TX	1			2177			3 circular aluminum objects, one olive-drab colored on the side
521021	Knoxville	TN	1			2179			6 white lights fly in a loose formation, make a shallow dive
521024	Elberton	AL	1			2184			object, shaped like a plate, with a brilliant front and vague trail
521027	Gaillac	France	1						Hundreds of citizens saw 16 UFOs in formation surrounding a cigar-shaped object. "Angel's hair" fell. [UFOE, VIII]
521029	Erding Air Depot	West Germany	1			2196			round object, silhouetted against a cloud
521103	Laredo AFB	TX	1			2202			a long, elliptical, white-grey light fly very fast
521104	Columbia (Congaree AFB)	SC	1			BBU			(McDonald list)
521104	West Hokkaido	Japan	1			BBU			(FUFOR Index)
521104	Vineland	NJ	1			2206			2 groups of 2-3 whirling discs of light fly toward the the SE
521112	Los Alamos	NM	1			2219	**NC**		4 red-white-green lights fly slowly over prohibited area
521113	Glasgow	MT	1			2220			5 oval- shaped objects with lights

521116	Landrum (near)	SC	1						Hundreds of people saw a huge disc, watched through binoculars by air-traffic controller. (UFOE)
521124	Annandale	VA	1			2246			round, glowing object fly very fast, make right angle turns
521125	White Sands	NM	1			BBU	NC		(McDonald list)
521127	Albuquerque	NV	1			2249			series of 20 ft black smoke bursts similar to antiaircraft fire
521204	Colorado Springs	CO	1			BBU			(McDonald)
521206	Angoon	AK	1			BBU			2 shiny spheres connected by a solid rod heading S
521208	Ladd AFB	AK	1			2266			white, oval light which changed to red at higher altitude
521209	Madison	WI	1			2267			4 bright lights, in diamond formation
521214	Charlottesville	VA	1			BBU			light orange elliptical shaped object
521215	Greensboro	NC	1			BBU			bright circular or spherical silvery object, losing and gaining altitude
521217	San Diego	CA	1			BBU			two or more objects described as cigar or disc shaped that emanated bright light in smooth flight
521222	Moses Lake (Larson AFB)	WA	1			BBU			hat-shaped glowing object rising vertically in odd spurts right and left
521224	Camp Carson	CO	1			BBU			(McDonald list)
521228	Marysville	CA	1			2302			Civilian witness(es). (NARA)
521229	Amarillo (About 35 miles W of)	TX	1			BBU			extremely large and intense bright round bluish-white light
521230	Terrigal, New South Wales	AU	1			BBU			extremely brilliant carbon-arc bright object
530101	Mobile	AL	1			BBU			bluish-white object 1-2 ft size with a short exhaust trail in rapid level flight
530101	Craig	MT	1			2315			silver, saucer-shaped object with a red glowing bottom
530108	Moses Lake (Larson AFB)	WA	1			2323			green disc shaped or round object fly SW
530110	Sonoma	CA	1	D	5	2326			Flat Object At 2,400 MPR
530117	Guatemala City (near)	Guatemala	1			2337			brilliant green-gold object, shaped like the Goodyear blimp
530122	Harmon AFB	Newfoundland	1						An unidentified flying object described as red, white and blue and oval-shaped, was observed visually from the weather station, control tower, base operations office, and a nearby AC&W site
530122	Patrick AFB	FL	1						At 2400 Z four airmen at Patrick AFB, Florida, visually observed for three minutes a fiery red-orange ball traveling soundlessly from north to south at high speed.
530126	Sampson AFB	NY	1						At 2320 Z an airman at Sampson AFB, New York, visually observed one large luminous rectangular shaped unidentified flying object. In one minute the object traveled through an arc of 70 or 80 degrees, while emitting a humming sound.
530128	Point Mugu	CA	1			2361			18-20-inch white, flat disc with fuzzy or shimmering edges
530128	Corona	CA	1	D	5	2364			five 25 ft green spheres fly in V-formation
530128	St. Georges	DE	1			BBU			rose-orange 7-inch [?] shiny disc-shaped object with a "white tail"
530200	Finland AFS	MN	1			BBU			6:29 a.m. (CST). (McDonald list; FUFOR Index)
530204	Yuma	AZ	1	D	5	2388			white, oblong object with a solid dull pure white color
530206	Truk Atoll	At Sea	1	D	5				Bullet-Shaped Object At 500'
530208	Barter Island	AK	1	D	5	BBU			Object With Falling Leaf Motions Over Airfield
530216	Ramer	AL	1			BBU			Hawk and Stern. (McDonald list; FUFOR Index)
530217	Elmendorf AFB, Anchorage	AK	1			BBU			Nocturnal light with rapid vertical takeoff
530220	Pittsburg-Stockton	CA	1			2426			bright yellow light seen for 8 mins
530222	Erie	PA	1	D	5				150' Silvery Disc Reported By Former Navy Gunner
530224	Sherman	TX	1			2441			2 bright red, round objects with big halos fly in small circles
530227	Shreveport	LA	1			2543			5 yellow discs make circular turns, flutter

530305	Congaree AFB	SC	1			BBU			At 3:45 p.m. (EST), the assistant director of security at the Savannah River Project, Mr. J. Howard Jones, observed a silver crescent-shaped object at a very high altitude over the project.
530305	Shaw AFB	SC	1			BBU			(McDonald list)
530309	Kyushu (Ashiya AFB)	Japan	1			BBU			(McDonald list; FUFOR Index)
530310-11	Hackettstown	NJ	1			2490			large light, blinking at 10-15 times per minute
530321	Elmira	NY	1			2511			6 discs in a group fly high and fast
530325	San Antonio	TX	1			2521			several lights, some moving straight, others making 360° turns
530329	Spooner	WI	1			2526			aluminum, circular object fly high and fast
530504	Antung, Manchuria	China	1			BBU			(McDonald list; FUFOR Index)
530415	Tucson	AZ	1			2542			3 orange lights
530415	East Prairie	MO	1						Several persons observed UFOs. Objects were circular, about 230' feet in diameter, and silver in color. Speed estimated at 400-600 mph.
530504	Goose Bay AFB, Labrador	CAN	1			BBU			football-shaped light metal colored object
530505	Goose Bay AFB, Labrador	CAN	1			BBU			light above at 7,000 to 8,000 ft maneuvering in spiral pattern over airfield
530505	Yuma	AZ	1						Scientist observed silvery disc; concentric rings visible through Polaroid glasses. [UFOE, VI]
530507	Yuma	AZ	1						Air Force officers at a gunnery meet observed about 12 disc-shaped objects that dove down and hovered over the base during the meet. [AP story, Mar. 9th; UFOE, III]
530521	Prescott	AZ	1						A veteran private pilot watched as eight disc-like objects "swooped around in formation, peeled off, and shot directly up and down in a manner that could not be duplicated by a plane." The objects maneuvered overhead for about an hour. [UFOE, V]
530527	San Antonio	TX	1			2577			9 separate meandering lights sighted by many
530616	San Antonio	TX	1			BBU			(McDonald list)
530621	Naha	Okinawa	1			BBU			weather observers saw an unidentified light move slowly
530624	Hampton Bays, Long Island	NY	1			BBU			"a large aircraft" of exotic design with a lighted red band around the middle
530624	Simiutak	Greenland	1		5	2606			saw through a theodolite a rotating red delta shaped
530630	Ramore, Ontario	CAN	1						Pinetreeline Radar Site. UFO was observed for, a period of twenty minutes in the northern sky moving to the southeast by at least 10 personnel of the 912th AC&W Squadron. (not tracked)
530703	Tipp City	OH	1			BBU			(McDonald list)
530709	Columbus	OH	1						Circular, silver UFO seen at North American Aviation plant. [UFOE, VII]
530719	Oak Ridge	TN	1				**NC**		Black objects maneuvered over area near an F-86
530724	Mt. Vernon	OH	1						Large silver object circled over town. [UFOE, VII]
530726	Perrin AFB	TX	1						ground observed seven unidentified objects with one bright red light on each object hovering at estimated altitudes from five to eight thousand feet. Visually observed from Perrin Tower and citizens of Denison and Sherman Texas.
530731	Port Clinton	OH	1						Unidentified white light viewed through field glasses. [UFOE, VII]
530801	Toledo	OH	1						UFO, changing color, flickered and jumped in sky. [UFOE, VII]
530802	Saraland	AL	1			BBU			highly polished spinning top or cone-shaped object
530803	Amarillo	TX	1			2663			round and reflective or translucent object fly straight

530814	Columbus	OH	1						Lighted object came straight down out of sky, stopped, then sped out of view. [UFOE, VII]
530815	Crestline	ID	1						Circling light changed color, white, red, green. [UFOE, VII]
530821	Maumee	OH	1						Black oval with green and red lights around perimeter. [UFOE, VII]
530823	Columbus	OH	1						Red and white object moving very slowly upward, observed by Ground Observer Corps. (UFOE)
530827	Greenville	MS	1			2692			USAF pilot, M/Sgt., others, all on the ground, saw a light
530907	Cleveland	OH	1						Technical writer watched rotating triangle pass overhead (cf., May 22, 1960, Majorca sighting). [UFOE, VII]
530911-13	Chiloquin	OR	1						Police Chief, others, watched top-like UFOs three consecutive nights. [UFOE, VII]
530924	Columbus (Bexley)	OH	1						Ground Observer Corps report: silvery disk followed plane. [UFOE, VII]
531015	Minneapolis	MN	1			BBU			40 ft object leaving brief vapor trail was seen by 3 gm employees
531028	Omaha (Offutt AFB)	NE	1			BBU			(McDonald list)
531030	Mt. Vernon	OH	1						Round, silver object circled at low altitude. [UFOE, VII]
531114	Toledo (near)	OH	1						UFO flashing various colors observed climbing. [UFOE, VII]
531203	Newark	NJ	1			BBU			a tiny reddish-brown oval luminous object flying steady
531203	Houston (Ellington AFB)	TX	1			BBU			silver grey bright light with "skipping" motion
531205	Houston	TX	1			BBU			children saw yellow-orange ellipse with 40x telescope
531213	Central	OH	1						Rocket-like UFO with white lights at both ends observed by Ground Observer Corps. [UFOE, VII]
531216	Toledo	OH	1						Group of lights changing from red to white, each appearing to revolve. [UFOE, VII]
531217	Hassleholm	Sweden	1			2838			(NARA)
531223	Bismarck	ND	1			BBU			4 yellowish-white oval objects in trail formation
531224	Scott AFB	IL	1			BBU			2 oval extremely brilliant silver objects with mirror-like reflections
531228	Marysville	CA	1			2844			saucer with a brilliant blue light
540000	Dayton	OH	1						Air Force Lt. Colonel saw two maneuvering UFOs. [UFOE, III]
540101	Toms River, Marlton, Woodbury, and Surf City	NJ	1	D	5	BBU			Multiple-Witness Sightings Triangulate Location
540104	Quantico	VA	1						Red revolving or blinking lights, hovering and moving soundlessly at tree-top height reportedly seen for six nights
540104	Marignane Airfield	France	1						9:00 p.m. Shortly after, a round luminous machine, coming from the South, landed at the Marignane airfield in Bouches-du-Rhone Department.
540107	Arras	France	1						4:27 a.m. A fiery disk, followed by a luminous trail, was sighted in Arras, Pas-de-Calais department
540109	Luneville	France	1						6:00 a.m. Three residents of Meurthe-et-Moselle Department claim to have seen a round object flying from North to South
540110	Sonoita (5 mi N of)	AZ	1			BBU			brilliant white stationary object, stellar magnitude
540118	Constantine Department	Algeria	1						1:30 p.m. Many persons in Saint Arnaud observed an object leaving a double trail of white smoke, describing an immense circle over the town. Several officers at La Remonte Military base nearby even heard a strange sound made by the object which seemed to have come from the north.
540129	Rangeley	ME	1						Two bright lights moved into valley

540222	York	PA	1			BBU			observers saw 14 discs climb when the fighters approached
540226	Newburyport	MA	1			2913			silver disc, with a white trail make a loud roar
540301	Montevideo	Uruguay	1						Time not given. Numerous bathers at the beaches near Montevideo observed a "flying saucer," a sort of metallic disk emitting yellowish reflections
540302	Harrisburg (near)	PA	1			2923			saw 3 objects, each with two lights, fly straight and level
540309	Cincinnati	OH	1			BBU			pulsating bluish-white luminous halo surrounding a dark ellipsoidal object
540318	Alexandria	VA	1						six round or disc-shaped, shiny aluminum objects were observed traveling in a "V" shaped formation
540324	Baltimore	MD	1						maneuvering formation of UFOs observed by Civil Defense official. [UFOE, VII]
540415	Saint Mexant	France	1						Two residents of Correge Department, observed an elongated, cone-shaped object with two red and green lights at the base, flying at a high altitude from the northwest toward the southwest.
540416	Grand Canton	AZ	1						School superintendent, explorer, watched elongated UFO with "portholes" pass overhead. [UFOE, VII]
540422	San Nicholas Island	CA	1			BBU			4-6 ft long gray cigar-shaped object with pointed nose
540423	Pittsfield	ME	1			2974			silver circular saucer shaped object with a dome
540424	Hartland	ME	1			2976			very large silver, oblong object with a dome on top
540426	Athens	GA	1			2983			saw 15-20 yellow objects in a V shaped formation
540426	Newburyport	MA	1						Round UFO making sharp turn observed by architect. [UFOE, VII]
540428	Pyrenees	France	1						A group of persons taking a walk near Sare in the region close to the Pyrenees border observed a cigar-shaped object traveling rapidly
540510	Northern Area	Sweden	1						Week of UFO sightings investigated by military authorities. Scores of residents reported strange glowing objects maneuvering low over forests. (UFOE)
540511	Washington	D.C.	1			2997			piloceman saw 2 bright lights on 3 occasions fly straight and level
540513	Norrbotten Province	Sweden	1						Morning. Three persons in three different areas observed a "brilliant, silver colored sphere with a tail."
540515	Vienna	Austria	1						Three discs in formation. [UFOE, X]
540518	Cannon AFB	NM	1			BBU	**NC**		house-size lens-shaped object land near railroad tracks
540522	La Porte	IN	1			3009			a bright light make a shallow climb
540530	Bambridge	NY	1						Silvery elliptical UFO with four "portholes" accelerated and shot away. [UFOE, XII]
540531	Concord	NH	1			3020			very white, elongated object fly extremely fast then blink out
540601	Boston (near)	MA	1	A	5	BBU			TWA Crew Spot White Disc / Kratovil Case
540607	unknown Location	West Germany	1			BBU			2 glowing discs descend vertically then rise rapidly
540609	Texarkana	TX	1			3037			man saw golden yellow light fly over his house
540611	Baltimore	MD	1						Huge glowing object seen by GOC observers; alternately hovered, moved rapidly. [UFOE, VII]
540618	French Equatorial	Africa	1						sighted an unidentified flying object over Laketi in the Likuala Mossaka region of the middle Congo.
540621	Savannah	GA	1						Object appeared to be similar to an airplane with a glass bottom with orange lights shining through the object. Mr. XXXXX had sighted the same object on 21 and 23 June 1954.
540621	Delray Beach	FL	1			BBU			bright round disc-shaped object with dome-like stucture on top
540622	Miami Beach	FL	1			3062			meteor like object descend, stop, and become extremely bright

540624	Danvers	MA	1			3067			white, elliptical-shaped object cover 45° of sky
540630	Oslo	Norway	1						Two silvery disks observed and photographed from eclipse expedition planes. [UFOE, VIII]
540705	West Berlin	West Germany	1			BBU			(Jan Aldrich)
540708	Lancashire	UK	1						British astronomer saw a silvery object with 15-20 smaller satellite objects. [NICAP, II]
540709	Lowry AFB	CO	1						6-7 objects appeared to be triangular in shape
540714	St. Louis	MO	1			BBU			1.5-foot sheet-like object maneuvering
540718	Normandy	MO	1			3116			greenish-white disc
540719	French Equatorial	Africa	1			BBU			(Jan Aldrich)
540725	Middle Sister Island	CAN	1			BBU			black cylinder, 12:1 length/width ratio, moving fast
540725	Southern Rhodesia	Africa	1						J. H. Flanagan (a policeman) and some friends recently observed six unidentified objects in the sky over Enkeldoorn
540728	North Atlantic	At Sea	1						Dutch ship observed disc with apparent portholes. [UFOE, XII]
540729	unknown location	Korea	1			BBU			(McDonald list)
540729	Key Largo	FL	1			BBU			huge, bright pale blue or whitish-blue egg or blimp-shaped 300-500 ft object
540802	Westlake	OH	1			3149			thin bright ellipse, like polished metal, hover for 5-8 secs
540804	The Hague	Netherlands	1						Bt. 11:00 and 12:00 p.m. Ten firemen and their chief observed the two flying saucers.
540806	San Antonio	TX	1			3155			white elliptical light change to yellow, orange, pink
540807	unknown location	West Germany	1			BBU			(Jan Aldrich)
540811	Yoron-Jima Island	Okinawa	1			3162			line of blue lights underneath a blue circle with a black center
540822	N France or W Germany	Europe	1			BBU			Jan Aldrich (date could be 23rd)
540824	Egilstadir	Iceland	1			3180			flat cylinder, 2-2.5 ft long, 4-5 ft in diameter
540826	Danville	VA	1			3182			2 domed ellipses, 20 ft long, 8 ft thick, 10 ft at ends
540827	Dorchester	MA	1			3185			7 large, white, teardrop-shaped objects turn blue
540905	Butler	MO	1			3196			3 AM CST 20-30 lights, as if on a string, fly straight and level
540905	Butler	MO	1			3198			12:23 AM CST silver or white object with a slightly swept-back leading edge
540914	Helsinki	Finland	1						Several people reported having seen a circular flying object. The object, flying at an altitude of 800 meters, gave off an intense light and left a trail of reddish smoke about three times its diameter
540915	Bihar	India	1						Gray disc hovered, emitted smoke and climbed away at high speed. [UFOE, X]
540918	Kimpo AB	Korea	1			3213			round object, like polished aluminum, fly straight and level
540918	Denver (near)	CO	1			BBU			Green fireball seen by thousands of witnesses heading SE
540919	Danane	Fr. West Africa	1						Officials watched oval UFO with dome and "searchlights". [UFOE, X]
540920	Cuyahoga Falls	OH	1						Dark saucer-shaped UFO arced overhead, levelled off and moved into distance. [UFOE, XII]
54Fall	Unknown City	Korea	1						Marine Corps weather observer saw 7 discs oscillating in formation.[UFOE, XII]
540921	Barstow	CA	1			3222			a red-orange ball giving off sparks
540921	Santa Maria Airport	Azores	1			3224			10 ft x 5 ft light metallic blue, pecan-shaped object
540922	Marshfield (3 miles E of)	MO	1			3226			thin, translucent, tan asymmetrical boomerang-shaped object
540923	Gatlinburg	TN	1			3227			2 bright silver, wheel-shaped objects fly N to S in trail
541000	Cherry Valley	NY	1						Engineer sighted maneuvering disc. [UFOE, I]

541013	Nouasseur	Fr. Morocco	1			3260			round, flat, silver object fly straight and level
541015-16	Kingfisher	OK	1			3269			50 objects with illuminated bottoms were seen flying
541024	Porto Alegre	Brazil	1						Formation of silver, circular objects sped over Air Force base. [UFOE, X]
541025	Belgrade	Yugoslavia	1						High speed objects some egg-shaped seen by hundreds. [UFOE, X]
541028	Rome	Italy	1						Mrs. Clare Booth Luce, American Ambassador, others sighted luminous, round UFO. [UFOE, X]
541028	Miho AB	Japan	1			3281			brilliant white, round-oval object climb in front of clouds
541029	SE of Taiwan	Taiwan	1			BBU			long narrow bright blue object emitting deep-orange sparks
541029	Terciera Islands	Azores	1			3287			grey object, shaped like a stovepipe
541105	Lookout Point	NZ	1						Orange elliptical object with blue "portholes" observed. [UFOE, XII]
541115	Augusta	ME	1			3326			10 gold, circular objects fly in vertical V-formation
541119	Corvallis	OR	1			3331			bright white light hover 8.5-9 mins
541125	Cordoba	Argentina	1						Meteorologist, control tower operator at airport watched two hovering luminous objects (official report from Argentine Embassy). [UFOE, X]
541126	Matasquan	NJ	1						Formation of round objects. (Confidential report from college professor.) [UFOE, VII] Millville, N. J. Disc with four body lights. [UFOE, II]
541128	Manila	Philippines	1			3341			flat-bottomed, domed object 65-70 ft across, 18-20 ft high
541203	Gulfport	MS	1			3352			a translucent grey, round, flat object rotating
541203	Wilmington	NC	1						Civil Aeronautics Administration personnel watched round, yellowish UFO through binoculars. [UFOE, V]
541207	Cape Province	S. Africa	1			3356			white, semi-circular, flat object with a dome
541219	Vienna	Austria	1						High-speed UFOs reported. [UFOE, X]
541220	Pontiac	MI	1						Red-orange circular UFO, with white glow from "portholes" at front, sped overhead. [UFOE, XII]
550126	Lakeland	FL	1			3401			a black smoke trail/circle-explosion and some objects fell
550201	Cochise (20 miles E of)	NM	1			3414	**NC**		pilot saw a very bright round object with red and white hues
550202	Miramar NAS	CA	1			3416			highly polished sphere, with reddish-brown coloring
550207	Knights Landing	CA	1	D	5				Winged Unidentified Executes Verical Climb Near Jets
550210	Bethesda	MD	1			3427			object, shaped like a small portion of the bottom of moon
550214	Green City	MO	1	D	5				Disc Hovers At 500' / Air Force Doesn't Investigate
550324	Ryukyu Islands	South Japan	1			BBU			hat-shaped object with 3 windows on top section change color
550406	Beaumont	CA	1			BBU			Briggs. (Hynek UFO Rpt p. 44; FUFOR Index)
550422	Tintinara	AU	1						Saturn-shaped UFO made sharp turn, ascended. [UFOE, XII]
550430	Travis County	TX	1			3517			4 black objects in a cluster make a whooshing sound
550504	Keflavik Airport	Iceland	1			3523			10 round, white objects, one of which left a brief smoke trail
550523	Cheyenne	WY	1			3565			2 slender, vertical rectangles low on the horizon
550617	Adelaide (near)	AU	1						Silver oblong UFO viewed through binoculars; hovered; moved away behind clouds as an aircraft neared. [UFOE, XII]
550626	Holt	FL	1			BBU			Civilian and military witnesees. (Hynek UFO Rpt p. 45)
550701	China Lake	CA	1			BBU			(McDonald list)
550709	Santa Catalina Channel	CA	1						Family aboard boat saw a round cylinder, greyish and white, surrounded by a "haze of fumes." UFO zig-zagged upward, then sped away. [UFOE, XII]
550711	Toulab	France	1	A	5	BBU			C-47 Pilot Sees Light Changing Color
550716	Eastern United States	various	1						UFOs observed over wide area, jets scrambled. [UFOE, III]

550717	Nr. Adelaide	AU	1						Silver oblong UFO viewed through binoculars; hovered; moved away behind clouds as an aircraft neared. [UFOE, XII]
550717	Canton	OH	1						Disc hovered, climbed away as airliner approached. [UFOE, XII]
550726	Lasham, Hants	UK	1						Members of British Gliding Association watched boomerang -shaped object (or flattened triangle) hover above glider then speed away. [UFOE, XII]
550729	Cincinnati	OH	1						Zigzagging UFO made shrill sound. [UFOE, VIII]
550729	Columbus	NE	1			3673			4 orange flashing lights and a white flashing light
550806	Cincinnati	OH	1						Oval-shaped UFO observed ascending at high speed. [UFOE, XII]
550811	Unknown Location in Iceland	Iceland	1	D	5	3699			12 Objects Observed By AF Officer
550821	Chalmette	LA	1						Glowing-white Saturn-shaped object hovered, rotating; turned sideways and shot away. [UFOE, XII]
550823	Arlington	VA	1			3720			several (6+) orange lights moving singly or in groups
550828	Yonkers	NY	1						Board of Education official and others saw a white Saturn-shaped object through a telescope. [UFOE, XII]
550903	Bellingham	WA	1			3743			white pinpoint move slowly across 30° of sky
550907	Washington	D.C.	1			3750			glowing round object fly an arc
550909	Rock Garden	TN	1			3757			brown, almost square object fly with a circular motion
551002	Akron and Alliance	OH	1						Hovering disc- like UFO observed over wide area. [UFOE, VII]
551008	Loogootee	IN	1			3800			round, silver or white object fly straight and level
551011	Point Lookout	MD	1			3810			round object, white in daylight and turning red
551014	Transcaucasus region	Russia	1						Senator Richard B. Russell, Jr. (D-GA)—then chairman of the Armed Services Committee—was on a Soviet train when he spotted a disc-shaped craft taking off near the tracks.
551026	Minneapolis	MN	1			BBU			[Same as Oct. 21, 1955, case?] (McDonald list)
551101	Mojave Desert	CA	1						Astronomer observed cigar-shaped UFO and smaller disc. [UFOE, VI]
551102	Williams	FL	1						Police, others saw as many as six oval-shaped objects in formation. [UFOE, VIII]
551105	Cleveland	OH	1						Minister observed elliptical UFO with square "windows". [UFOE, VIl]
551109	Philadelphia	PA	1						Newspaper photographers and others saw 12 silvery-white round objects in formation. [UFOE, VII]
551117	St. Louis	MO	1			3860			saw 12 round, flat objects, silver on top/dark on bottom
551120	Lake City	TN	1			3862			2 oblong, bright orange, semi-transparent objects
551123	Spirit Lake	IA	1						Ground Observer Corps spotters reported a brilliant object which changed color, moved erratically. [UFOE, VII]
551125	LaVeta	CO	1			3869			dirigible-shaped object, fat front, tapered toward the tail
551206	Ashfield & Greenfield	MA	1						Several people watched a cigar-shaped object with long rows of brilliant, reddish body lights, moving slowly south. [UFOE, XII]
551221	Caribou	ME	1			3893			round, very bright gold, domed disc in short climb, then rotate
551229	New Britain	CT	1						Shiny object hovered, sped away. [UFOE, XII]
560122	Gulf of Mexico (nr. New Orleans)	At Sea	1						PanAm engineer saw large elongated object, emitting yellow flame [UFOE, V]
560202	Camp Irwin	CA	1	D	5	BBU			Radar Tracks Objects In Three Instances
560207	Biloxi (Keesler AFB)	MS	1			BBU			(McDonald list; FUFOR Index)
560218	Montelimar Airdrome (N of)	France	1			BBU			a round dot change color every 30 secs from white to red to green
560303	Spokane	WA	1			BBU			(McDonald list; FUFOR Index)
560404	McKinney	TX	1			4050			fat, oblong, stationary object with two lines around its middle

560405	Newport (Almy Pond)	RI	1			BBU			circular silver object with no trail or sound descending from 45° elevation
560406	McKinney (5 miles E of)	TX	1			BBU			6 ft silvery, balloon-shaped craft land in a field 300 ft away from them
560416	Henderson	NC	1			BBU			top-shaped object as large as the road pass over their car, no sound
560428	Newport (near)	UK	1			BBU			bright white star increase in brightness in the E at “high altitude”
560606	Banning	CA	1			4127			thin disc with a small dome, shimmering silver
560627	Trieste	IT	1						Luminous object hovered, sped away. (UFOE, XII)
560719	Phoenix	AZ	1						Luminous round object hovered, sped away. (UFOE, XII)
560800	Boulder City	NV	1						Research technician observed formation of five flat, circular UFOs. (UFOE, VI)
560808-19	Various Cities	CT	1						Concentration of sightings over 12-day period. Retired fire department engineer in Hartford saw an oblong UFO with halo (August 8); an egg-shaped UFO was seen over West Redding (August 11); unidentified white lights reported over West Hartford by Ground Observer Corps (August 14) (UFOE)
560819	Newington	CT	1						Fiery object made turn, dimmed, window-like markings became visible. (UFOE, XII)
560820	Citrus Heights	CA	1						Man & wife saw 25 or more bright, Saturn-like UFOs in a rough semi-circle formation. (UFOE, XII)
560827	Juniata	PA	1			4348			bright disc with a clear dome fly vertically, then N
560904	Dallas	TX	1			4379			family saw a large star, changing to red color, remain stationary
560914	Highland	NC	1			4399			policeman saw 14 yellow-to-red round objects
561119	Frankfurt	Germany	1						V-formation of blue-white, elliptical UFOs. (UFOE, X)
561130	Charleston AFB	SC	1			4543			unspecified object fly at an estimated 100 ft altitude over water
561227	Los Angeles	CA	1						Real estate investor saw three spherical UFOs reflecting sunlight. (UFOE, VII)
570213	Burbank	CA	1						Police received many calls about oval-shaped objects over city. Officer Robert Wells, who went to investigate, confirmed sighting. [NICAP UFOE, XII]
570308	Btn Mockville and Arrity	NC	1	D	5				Long Object With Green Light In Nose
570322	Point Mugu	CA	1			BBU			(McDonald list)
570322	Oxnard AFB	CA	1			BBU			several independent witnesses saw maneuvering lights
570328	Reseda	CA	1						cigar-shaped, golden in color, glowing object was observed at approximately 60 degrees above the horizon
570425	Ringgold	LA	1			4706			Military witness Robertson. Case missing
570429	Virginia	MN	1						10:15 p.m. Robert Lerdahl and Alex Ellison saw about 36 UFOs which passed overhead in groups of 6 and 8 during a forty minute period.
57April/May	Moriah Center	NY	1						"Television started to have all sorts of trouble"; witness called out-doors in time to see red disc pass overhead.
570512	Moab	UT	1						Round, blue-green UFO sped past below observer's altitude. [UFOE, IV]
570612	Milan	Italy	1	D	5	4760			Object Approaches, Zigzags, Shoots Up
570615	Lancashire	UK	1						Saturn-like UFO with "portholes" observed through telescope in bright daylight. [UFOE, XII]
570618	Jackson	MS	1						Physics professor sighted UFO with "a halo of light around it and what appeared to be three portholes." [UFOE, VI]

570618	Pacific Ocean, 150 miles off San Francisco	at Sea	1						Captain and crew of freighter Hawaiian Fisherman saw three brightly lighted objects "like small moons." [UFOE, II]
570701	Azusa	CA	1						"Disc with amber lights around edge made wobbling vertical descent. [UFOE, XII]
570701	Avon	MA	1						Cigar-shaped UFO with green lights like windows. [UFOE, XII]
570709	Hamilton, Ont.	CAN	1						Attorney saw speeding, white elliptical UFO. [UFOE, X]
570727	Longmont	CO	1			4841			a thick disc, ice blue, with a top like honeycomb
570729	Oldsmar	FL	1			4848			a pale yellow fireball glide into the water and exploded
570731	Calistoga	CA	1						Businessman watched two erratically maneuvering brilliant white objects. [VII]
570801	Toronto, Ontario	CAN	1						Large glowing object hovered 20 minutes, sped away. [UFOE, VII]
570815	Woodland Hills	CA	1						Retired Navy pilot watched disc wobble, climb away. [UFOE, IV]
570822	Cecil NAS	FL	1			BBU			car chased a 50 ft black, bell shaped object
570829	Paso Robles	CA	1			BBU			silver circular object flying N to W.
570917	Devens	MA	1						Army report on eight round, orange UFOs which flew over base, one oscillating up and down. [UFOE, IV]
570919	Point Pleasant	NJ	1			BBU			boomerang-shaped object bigger than a house land. Grass flattened
570920	Kadena AFB	Okinawa	1			4959			object like a coke bottle w/o the neck, translucent and fluorescent
570926	Paris	France	1						Confidential report, from U.S. Embassy officer and wife, of bright elliptical UFO. [UFOE, X]
571001	Shippingport	PA	1				NC		UFO circled atomic plant
571007	Cape Canaveral	FL	1						White oval object seen near Cape for second consecutive night. [UFOE, XII]
571008	Seattle	WA	1			5003			2 flat, round, white objects fly in trail formation
571012	Martha's Vineyard	MA	1						3:20 p.m., a strange round object bearing southeast-appeared to be a sphere with sensing elements or spikes protruding from it
571016	Unknown City	AU	1						Round UFO sighted by former Commander-in-Chief of Royal Australian Air Force. [UFOE, X]
571022	Pittsburgh	PA	1						Family saw six UFOs in two separate groups, changing position in formation. [UFOE, II]
571023	London	UK	1						Disc traveling on edge. [UFOE, XII]
571103	Levelland (9 miles E of)	TX	1			BBU			white or aluminum-colored oval-shaped object flat on the bottom
571104	Elmwood Park	IL	1			BBU			police and witness saw red-orange cigar-shaped object - they chased it
571104	El Paso (3 miles SE of airport)	TX	1			BBU			egg shaped object w/bluish glow approaching from the SW
571104	Albuquerque (Kirtland AFB)	NM	1			BBU	NC		highly maneuverable 15-20 ft egg-shaped object w/white light at its base
571105	Long Beach (Airport)	CA	1			BBU			Zibello (McDonald list; FUFOR Index)
571105	Scotia	NE	1			BBU			balloon-like, elongated object coming to ground level, w/o touching down
571105	East St. Louis	IL	1						Three Alton & Southern Railroad employees saw two silvery, egg-shaped UFOs.(UFOE)
571105	Haverhill	MA	1						Ground Observer Corps reported a circular or spherical glowing object which appeared to vibrate up and down and from side to side while hovering. [UFOE, VII]
571106	Boerne	TX	1			5205			oval object, about 15 ft long, bright orange
571106	Kagoshima	Japan	1			BBU			(McDonald list)
571106	Lake County	OH	1			BBU			unbearably bright round object, landed on a ridge, then took off

571106	Radium Springs	NM	1			5227	NC		round object changing from red to green to blue to white
571106	Soeul	S. Korea	1			BBU			luminous bluish-white barrel-shaped object
571107	Harlingen AFB	TX	1			BBU			(McDonald list; FUFOR Index)
571108	Merrick, Long Island	NY	1			5254			a bar-shaped object, 3.5 ft long, giving off blue flashes
571109	Lake City	MO	1			BBU			man saw object 50 ft long. Car engine died as he approached
571111	Canoga Park	CA	1						four engineers observed three UFOs flying in formation in bright daylight
571111	San Fernando Valley	CA	1						Rocketdyne engineers observed three UFOs climbing at high speed. [UFOE, VI]
571115	Carthage	TN	1						Highway patrolman, sheriff, others saw many flashing revolving red lights which moved around slowly, hovered. [UFOE, VII]
571122	Canutillo	TX	1						Silvery UFO sped back and forth, ascended. [UFOE, VII]
571126	Robins AFB	GA	1			5419			many saw silver, cigar-shaped object, which suddenly vanished
571127	Yakima	WA	1			BBU			control tower operator on the ground saw a bright red glow
571130	New Orleans	LA	1			5445			round object turn white, then gold, then separate into 3 parts
571213	Col Anahuac	Mexico	1			5545			14-15 [or 30] circular, tapered discs, very bright, fly in a formation
571216	Old Saybrook	CN	1						Elliptical UFO with "portholes." [UFOE, XII]
571217	Fruita-Grand Junction	CO	1			5559			round object change from yellow to white to green to red
580103	Old Westbury, Long Island	NY	1			BBU			Fensterstock. (Hynek UFO Rpt p.43; FUFOR Index)
580109	Marion	IL	1						Three reports of seven red lighted objects in straight line formation. [UFOE, II]
580202	New South Wales	AU	1						Elliptical UFO with two "porthole" like markings. [UFOE, XII]
580220	Winslow (NW of)	AZ	1			BBU			12 military officers saw a round or cigar-shaped stationary object
580225	Glenwood, Newfoundland	CAN	1			BBU			(McDonald list; FUFOR Index)
580302	Tampa	FL	1			BBU			balloon-shaped object with bright light land on the airfield
580303	Marshall (near)	TX	1						Family saw two bright, planet-like objects with 6 or 7 smaller lights moving around them. [UFOE, II]
580314	Healdsburg	CA	1			5716			3ft round, black object come from the W
580320	Henrietta	MO	1						Saturn-like disc descended hovered, moved away. [UFOE, XII]
580402	Columbus	OH	1						Cigar-shaped UFO with long row of "portholes or windows." [UFOE, XII]
580404	Santa Monica	CA	1						Cigar-shaped UFO with "windows" observed in rapid vertical climb. [UFOE, XII]
580409	Cleveland	OH	1						Nine yellow UFOs in V-formation; split into two groups (5 and 4). [UFOE, II]
580411	Johannesburg	S. Africa	1						Airport instrument inspector, others watched reddish-white UFO arc back and forth. [UFOE, X]
580517	Ft. Lauderdale	FL	1						UFO sped away when light was shone at it. [UFOE, II]
580525	Kirchberg, Hunsruck	Germany	1						Circular silvery UFO observed moving through clouds. [UFOE, X]
580528	Templehof	Germany	1			BBU			(McDonald list; FUFOR Index)
580604	Sarasota	FL	1						White oval-shaped object zigzagged overhead. [UFOE, XII]
580614	Pueblo	CO	1			5852			a theodolite sighted an object shaped like Saturn
580620	Fort Bragg	NC	1			5857			silver, circular object, its lower portion seen through green haze
580620	Glennie (4 miles N of)	MI	1			BBU			an object hit water of a private lake making a circle 10 ft across w/foam
580726	Durango	CO	1						Ground Observer Corps Supervisor spotted a round silvery object moving "at tremendous speed." [UFOE, VII]
580811	Osel Island and Gulf of Finland	At Sea	1			BBU			(McDonald list)

580811	Chautauqua Lake	NY	1						Engineering professor observed unidentified lights arranged as if on oval object. [UFOE, VI]
580812	Las Vegas (12 miles NW of)	NV	1			BBU			(McDonald list)
580817	Warren	MI	1			5999			extremely bright object shaped first like a bell, then a saucer
580824	Westwood	NJ	1						Police reported a circular, orange UFO which hovered, sped away. [UFOE, VII]
580901	Wheelus AFB, Tripoli	N. Africa	1			6027			a round, blue-white object fly at varying speeds
580907	Mission	KS	1						Publisher saw white disc speed overhead. [UFOE, VII]
580921	Sheffield Lake	OH	1			BBU			woman inside her house saw a circular, aluminum color flat object
581002	Stroudsburg	PA	1			6089			Naturalist Ivan Sanderson saw a dull-grey object w/flat bottom
581002	Blairstown (near)	NJ	1						Zoologist watched disc circling and maneuvering. [UFOE, VI]
581007	Nantucket	MA	1						Ship's Master, others watched a grayish oval object hover for several minutes, then climb away at high speed. [UFOE, VII]
581007	Alexandria	VA	1			BBU			saturn shaped “silvery” or “aluminum clad” oblate spherical object
581012	Aurora	IL	1						Police reported several yellowish UFOs moving in all directions. [UFOE, VII]
581017	Grand Rapids	MI	1			BBU			(Hynek UFO Rpt p. 44)
581026	Lafayette	IN	1						Research chemist saw 2-3 bright objects pass through field of telescope. [VI]
581031	Caledon East, Ontario	CAN	1			BBU			Civilian saw an elliptical, aluminum-colored
581103	Minot	ND	1			6153			bright green object and one smaller, silver round object
581105	Conway	NH	1						Hovering light suddenly sped away. [UFOE, XII]
581119	Montauk AFB, Long Island	NY	1			BBU			(McDonald list)
581220	Dunellen	NJ	1						Police witnesses, vehicle encounter, vertical ascent
590101	Newport Beach	CA	1						County Harbor Department guards watched UFO split in four parts; two rose vertically at high speed, one headed SE, one remained stationary. [NICAP UFOE, XII]
590108	Walworth (near)	WI	1						Former control tower operator and flight controller saw UFO descend slowly, then speed away like meteor. [NICAP UFOE, V]
590202	Sandusky (near)	OH	1			BBU			UofM professor saw a yellow half-sphere in the sky
590209	Imperial Beach	CA	1						Bright UFO with halo filmed. [NICAP UFOE, VIII]
590216	Benghazi	Libya	1			BBU			silvery blue to reddish to dark round object with dome, sharply outlined
590226	London	UK	1						Air Traffic Controllers, others saw a bright yellow disc which hovered for 20 minutes above airport, then climbed away at high speed. [NICAP UFOE, X]
590314	Ellsworth AFB	SD	1			BBU			(McDonald list)
590322	Ann Arbor	MI	1			BBU			(McDonald list)
590326-27	Corsica	PA	1			6317			dark red, barrel-shaped object, 20 ft long, 6-7 ft high
590403	Ocoee	FL	1						Treasury enforcement officer saw UFO ascending and descending. [NICAP UFOE, VII]
590412	Montreal	CAN	1						St. Hubert Air Base Control Tower Operators, others saw red light which hovered over base, then darted away. [NICAP UFOE, X]
590513	Omaha (Offutt AFB)	NE	1			BBU			(McDonald list)
590514	Des Moines	IA	1						UFO hovered, sped away. [NICAP UFOE, XII]
590514	Philadelphia	PA	1			BBU			(McDonald list)
590518	Greenbush	KS	1			BBU			(McDonald list)

590521	Rapid City (8 miles E of)	SD	1			BBU			(McDonald list)
590603	Genoa	Italy	1			BBU			(McDonald list)
590603	Bloomington (near)	IN	1						Torpedo-shaped UFO hovered, dove out of sight. [NICAP UFOE, XII]
590611	Henderson	NV	1						Security officers observed a formation of four disc-like objects. [NICAP UFOE, VII]
590616	Meridian (SE of)	MS	1			BBU			(McDonald list)
590618	Pacific bet. Hawaii and Calif	At Sea	1			BBU			(McDonald list)
590618	Forest Park	IL	1			BBU			(McDonald list)
590618	Stephenson-Sault Ste. Marie	MI	1			BBU			(McDonald list)
590618	Enon	OH	1			BBU			(McDonald list)
590618	Lyons	OH	1			BBU			(McDonald list)
590618	Edmonton, Alberta	CAN	1			6400			brown, cigar-shaped object come from below the horizon
590625	Taegu (S) of	Korea	1			BBU			(McDonald list)
590627	Dunville	VA	1			BBU			(McDonald list)
590630	Patuxent River	MD	1			6409			metallic gold, oblate-shaped object
590703	Needles	CA	1			BBU			(McDonald list)
590709	unknown location	Bahamas	1			BBU			(McDonald list)
590712	Ridgecrest (near)	CA	1						Electronics mechanic at China Lake U. S. Naval Ordnance Test Station saw three disc-like UFOs which alternately hovered and moved at high speeds over desert to the Southwest. [NICAP UFOE, IV]
590713	Blenheim	NZ	1						Domed disc descended, hovered. (NICAP UFOE, XIV)
590714	New Delhi	India	1			BBU			(McDonald list)
590725	Irondequoit	NY	1			6446			thin, crescent moon-shaped object, with a small white dome
590728	Corpus Christi	TX	1			BBU			(McDonald list)
590728	unknown location E of	FL	1			BBU			(McDonald list)
590802	Washington	D.C.	1			BBU			(McDonald list)
590803	Silver Springs	MD	1			BBU			(McDonald list)
590816	Macon and Forsyth	GA	1			BBU			(McDonald list)
590819	80 miles E of U.S. [?].	Unk	1			BBU			(McDonald list)
590824	Emmitsburg (near)	MD	1						Planet-like UFO hovered, took off straight up. [NICAP UFOE, XII]
590828	Charlotte Island	CAN	1			BBU			(McDonald list)
590905	Naha	Okinawa	1			BBU			(McDonald list)
590907	Wallingford	KY	1			BBU			15-ft burned mark left by object on takeoff
590910	Camp Kinser	Okinawa	1			BBU			(McDonald list)
590913	Gills Rock	WI	1			6506			round yellow light, with 8 blue lights in it, 5 larger red lights
590928	Detroit	MI	1	D	5				spherical-shaped white to blue in color object
591001	Telephone Ridge	OR	1			6534			bright light approach hover about 30 mins, then disappear
591002	Seattle	WA	1			BBU			(McDonald list)
591004	Quezon	Philippines	1			6538			large round or oval object, changing from red to red orange
591006	Lincoln	NE	1			6543			round, white-yellow light make several abrupt turns at high speed
591012	Washington	GA	1			BBU			(McDonald list)
591019	Langley AFB (N of)	VA	1			BBU			(McDonald list)
591020	Key West	FL	1						Navy enlisted men watched two UFOs rendezvous, speed away. [NICAP UFOE, IV]
591021	Warsaw	NY	1			BBU			(McDonald list)
591022-23	Loring AFB (near)	ME	1			BBU			(McDonald list)

591026	Toccoa	GA	1			BBU			(McDonald list)
591028	Valparaiso	Chili	1						Astronomer, others, observed maneuvering orange disc. [NICAP UFOE, X]
591103	Utica	NY	1			BBU			stationary round yellow-white obj move away, disappear, then reappear
591118	Crystal Springs (South of)	MS	1			6600			a row of red lights fly slow, then accelerate immensely
591218	S Victoria Island	CAN	1			BBU			(McDonald list)
600203	Intervale, New Haven	CT	1						Former Air Force PT Boat Commander watched UFOs rendezvous, travel in formation. [NICAP UFOE, VII]
600205-06	Hollywood	CA	1						Several witnesses (about 11:15 p.m. each night) saw a distinct round UFO hover and maneuver slowly
600214	Nome	AK	1						Airline employee, others, saw a silvery rocket-like object with orange flame trail curving up and away "as if it were manned and controlled." A similar second UFO was sighted at Unalakleet moving rapidly NW leaving contrails. [NICAP UFOE, X]
600216	Laguna Beach	CA	1						Retired chemical manufacturing company executive observed rendezvous of two oval UFOs. [NICAP UFOE, VII]
600227	Rome AFB	NY	1			6663			light trailing a white fan shape make a mild descent
600304	Dubuque	IA	1			6667			3 elliptical-shaped objects make a slight climb
600323	Indianapolis	IN	1			6691			a series of balls, arranged like an “X” with one diagonal line
600412	La Camp	LA	1			6711			a fiery-red disc from the S touch the ground about 1,000 ft
600417	Richards-Gebaur AFB	MO	1			6721			(Berliner)
600425	Shelby	MT	1			6727			saw 5 circular objects fly in trail formation
600504	Sarasota	FL	1						Cigar-shaped UFO with four window-like markings sighted by architect. [NICAP UFOE, XII]
600518	Wellington	NZ	1						Cigar-shaped UFO with "portholes." [NICAP UFOE, XII]
600519	Dillingham	AK	1			BBU			Silver-colored round object 20-25 ft wide with hanging appendages
600522	Majorca Isle	Mediterranean Sea	1						Palma Observatory reported morning observation of a white triangular UFO, about one-fourth the size of the moon, spinning on its axis. [NICAP UFOE, VI]
600604	Pacific Ocean	At Sea	1			BBU			(McDonald list)
600608	New York City	NY	1						Elliptical UFO sighted by biochemist. [NICAP UFOE, VI]
600701	Leefe (near)	WY	1						hovering disc like "two dinner plates face to face," ascended and sped away. [NICAP UFOE, XII]
600719-21	St. Louis	MO	1			6858			round, bright red light fly overhead, stop, hover, and back up
600724	Portville	NY	1						State policeman reported two dumbbell-like UFOs. [NICAP UFOE, VII]
600813-18	Northern Area	US	1						Concentration of UFO sightings, mostly in north, including -many police witnesses. (NICAP UFOE, XII)
600816	Oak Forest	IL	1						Former Air Force pilot saw disc-like UFO which hovered, bobbed around. [NICAP UFOE, V]
600823	Wichita	KS	1			6914			dull orange round object, with yellow lights
600826	Mesa	AZ	1						UFO observed by chemistry teacher, pilot. [NICAP UFOE, VII]
600829	Crete	IL	1			6929			shiny, round, silver object fly straight up at high speed
600904	Lexington	KY	1						Former Strategic Air Command radar technician saw a glowing sphere traveling from horizon to horizon. [NICAP UFOE, VI]

600905	Sonoma County	CA	1						Sheriffs observed six vari-colored UFOs flying in V-formation. [NICAP UFOE, VII]
600910	Ridgecrest	CA	1			6962			2 light gray glowing objects, saucer or boomerang-shaped
600915	Carrizales	Venezuela	1						Professor of engineering observed accelerating luminous object. [NICAP UFOE, X]
600917	Kirksville AFS	MO	1			BBU			(McDonald list)
600919	Susanville	CA	1			BBU			(McDonald list)
600920	Farmington (SE of)	NM	1			BBU	NC		(McDonald list)
600925	Midway Isles	At Sea	1			BBU			(McDonald list)
600928	Arlington	TX	1						Aeronautical engineer observed erratically maneuvering UFO. [NICAP UFOE, V]
601003	City unknown	Tasmania	1						The sighting of six flying saucers and a 'mother ship' has been reported from the Australian island state of Tasmania. A Church of England minister says he saw the mysterious craft nearly one week ago, but was reluctant to report them.
601005	Mount Kisco	NY	1			7057			bright, star-like light move across 120° of sky
601009	Longpoint	IL	1						Minister and others saw a golden, elliptical UFO hover, move away. [NICAP UFOE, VII]
601015	Cressy (30 miles from)	Tasmania	1			BBU			spherical 75 ft object flying at great speed at 36,000 ft
601027	Lexington	KY	1						Attorney saw disc hover, move away. [NICAP UFOE, VII]
601124	Unknown City	OH	1						White elliptical UFO observed by scientist. [NICAP UFOE, VI]
601127	Chula Vista	CA	1			7133			orange-red point of light, with white sparkler-like light
601129	Vincennes	IN	1						Observed for 25 minutes, an object with a bright, pulsating light was seen by Francis Ridge, a NICAP subcommittee chairman, and many other witnesses.
610200	Western Europe	France	1				NC		Disc near nuclear power station
610205-07	Unknown City	ME	1						Many reports of strange lights flashing around in sky. Some blinked and moved up and down.
610223	Misawa AFB	Japan	1			BBU			(McDonald list)
610226	Tyndall AFB	FL	1			BBU			(McDonald list)
610227	Herndon	VA	1			BBU			(McDonald list)
610227	Bark River	MI	1			7284			fiery-red, round object, preceded by light rays
610316	Unknown City	Antarctica	1						Meteorologist observed a fireball-like object, multi-colored, below overcast. [NICAP UFOE, VI]
61Spring	Kemah	TX	1			7321			Case missing (Berliner)
610409	Kingsville	TX	1						Round red UFO descended, hovered, sped away. [NICAP UFOE, XII]
610519	Bay Minette (About 7 miles W of)	AL	1			BBU			silver-like object with tapered edges reflecting sunlight to the NNE
610519	Long Beach	CA	1						Twelve shiny UFOs maneuvered erratically over the area at 3:50 p.m., with an odd fluttering motion; then two loud "skyquakes" were heard. [NICAP UFOE, XII]
610522	Tyndall AFB	FL	1			7417			big silver-dollar disc hover and revolve, then disappear
610525	Shepperton, Middlesex	UK	1						Domed UFO with "portholes." [NICAP UFOE, XII]
610602	Miyako Jima Air Station	Japan	1			7437			blue-white light fly erratic course at varying speed
610604	Blue Ridge Summit	PA	1						A cigar-shaped or long elliptical UFO with a cluster of smaller UFOs was observed by a librarian. First motionless, the smaller objects then streaked across the sky to the large UFO and all vanished behind trees. [NICAP UFOE, VIII]

610707	Copemiah	MI	1			7491			a large ball fly slow, split into 4 after 45 mins flying
610710	Golden	CO	1			BBU			(McDonald list)
610711	Springfield	OH	1			7499			round bright light like shiny aluminum, pass overhead
610717	Las Vegas (Bonnie Springs? near)	NV	1			BBU			2 in/car saw in mirror a low-flying object that overtook their car
610812	Kansas City	KS	1			7579			oval object with/fin extending from one edge to the center
610902	Albuquerque	NM	1			BBU	NC		Object stops twice and emits several small silvery objects
610913	Crawfordsville	IN	1						4:00 a.m. Three people reported a round, orange UFO which moved rapidly east to west, stopped and hovered for 5 minutes, then accelerated rapidly disappearing in the distance. [NICAP UFOE, XII]
611012	Indianapolis	IN	1						Spherical UFO with a row of pulsating lights viewed from many angles by different observers. [NICAP UFOE, XII]
611121	Oldtown	FL	1			7741			round, red-orange object fly straight up and fade.
611030	Ligonier	PA	1						Engineer observed four luminous blue discs with bands of lights or "portholes" on outer periphery. [NICAP UFOE, I]
611122	Grafton (near)	ND	1						Metallurgist observed a hovering, grayish cigar-shaped UFO with "portholes". [NICAP UFOE, VI]
611123	Sioux City	IA	1			7742			bright red star fly straight and level
611213	Washington	D.C.	1			7754			dark diamond-shaped object w/bright tip fly straight and level
620112	Winnemucca AFB	NV	1			BBU			(McDonald list)
620207	Kennebunkport	ME	1						The president of an advertising agency saw a bright red hemispherical UFO which hovered, then suddenly sped away. [NICAP UFOE, VII]
620211	Parque del Este, Caracas	Venezuela	1						UFOs, described as "a body giving off a brilliant light. . . moving at great altitude as if towards the moon." [NICAP UFO Evidence, X]
620219	Dauphin Island	AL	1			BBU			reddish-orange object change shape from round to cigar shape covered with fog
620225	Kotzebue	AK	1			7818			red light, trailed 30 secs later by a blue light
620301	Salem	NY	1			7823			gold-colored box fly straight and level across the horizon
620326	Naperville	IL	1			7841			6-8 red balls, arranged in a rectangular formation become 2
620526	Westfield	MA	1			7930			large red ball fly or fall down, then rise back up
620404	Wurtland	KY	1			7851			telescope spotted a small object changing brightness
620412	Kunia	HI	1			BBU			(McDonald list)
620424-25	Philadelphia	PA	1						Series of UFO sightings over area. Circular UFO with body lights, apparent dome on top, shafts of white light directed downward from base. Center section had rotating row of square "windows." [NICAP UFO Evidence, XII]
620428	Ft. Worth	TX	1			BBU			egg shaped light crossing the sky brighter than the Echo I satellite
620518	Marksville (and Leesville, Colfax)	LA	1			BBU			(McDonald list)
620518	Pompano Beach	FL	1						Cigar-shaped UFO, brilliantly lighted below, dark on top. Hovered, sped away. [NICAP UFO Evidence, VII]
620520	Defiance	OH	1						Scientist, others, watched maneuvering light source, brilliant blue changing to yellow. [NICAP UFO Evidence, VI]
620526	Westfield	MA	1			7930			"Round, slightly oval, bright red object, giving off sparks from top and bottom. Center. . . yellowish or white. . .case is listed as unidentified." (Air Force Project Blue Book 1962 Summary.)
620527	Palmer	AK	1			7931			(NARA)
620607	Hallett Station	Antarctica	1			BBU			(McDonald list)
620630 - 620701	Richmond	VA	1			7968			saw a red, star-like light for unspecified length of time

620719	Metuchen	NJ	1			8020			3-5 lights from different parts of the sky dart about the sky
620730	Ocean Springs	MS	1			8034			bright cherry-red, diamond-shaped object fly slow, hover
620819	Unknown location in Bermuda	Bermuda	1			8064			3 dull-white, egg-shaped objects waver as they moved
620915	Oradell	NJ	1			BBU			Bright luminous object surrounded with a glow
620918	Westwood	NJ	1						4 a.m.. Two policemen reported a 7-8 second observation of a huge object, round at the top and tapering to a cone. 4:45 a.m.; Two Oradell policemen reported a - brilliant light in the sky. [NICAP UFO Evidence]
620918	Northeast	OH	1						Six policemen sighted UFOs about the same time. One hovering object, two maneuvering. [NICAP UFO Evidence, VII]
620920	Hawthorne	NJ	1						Early in the morning, a watchman, William Stock, of Hawthorne, reported a saucer-shaped object which hovered and moved from side to side as it shone bright enough to illuminate a huge area. [NICAP UFO Evidence]
620921	Biloxi (WSW of)	MS	1			8133			2 objects, red and black with orange streaks
620921	Btn Hawthorne & N. Haledon	NJ	1						At 3:40 a.m., William Stock and four invited policemen spent a half hour watching a round object with two apparently revolving body lights. At 4 a.m., two policemen, between Hawthorne and North Haledon, watched a bright light revolving and moving up and down and from side to side for about 35 minutes. [NICAP UFO Evidence]
620921	Hawthorne	NJ	1						That night, 4 young persons in Hawthorne reported seeing a bright star-like object with light beams coming from it. [NICAP UFO Evidence]
620923	Hawthorne	NJ	1						In the middle of the day a Hawthorne woman and her son saw an oblong, silvery object, for about 10 seconds. [NICAP UFO Evidence]
620924	Hawthorne	NJ	1						Early in the morning, a group consisting of the head of an independent news agency, a photographer and numerous policemen watched, for 10 minutes, an object which changed from red to silver to green and back to red. In the evening, a Hawthorne patrolman watched a light approach, hover for 15 minutes and then move away. [NICAP UFO Evidence]
620928	Hawthorne (7 counties near)	NJ	1						Police from seven counties reported seeing UFOs between 2:30 and 3:30 a.m. Most reported three objects which changed color. [NICAP UFO Evidence]
621003	Chicago	IL	1						City of Chicago official watched circular UFO with dome move across lower half of moon. [NICAP UFO Evidence, VII]
621023	Farmington	UT	1			8182			grey and silver ball, trailing what looked like twine
621117	Tampa	FL	1			8215			bright star-like lights approach, hover and bounce and fade
621212	Amagasaki City	Japan	1						Five students saw, and independently sketched, Saturn-shaped UFO. [NICAP UFO Evidence, X]
630105	Nantucket Point, Long Island	NY	1			BBU			(Hynek UFO Rpt p. 45-46)
630124	Lexington	KY	1						Post Office safety engineer saw a round UFO traveling east to west, and a delta-wing aircraft north to south. UFO's line of flight intersected aircraft path at right angles. [Report via Bluegrass NICAP Affiliate, Lexington, Ky.]
630312	Paine	Chile	1						Members of the Santiago NICAP Subcommittee observed a pulsating luminous white sphere about 7:50 p.m. The UFO moved from north to south, disappearing in the distance after about a minute.

630318	Cape Canaveral	FL	1						Minuteman Veers Off Course
630518	New Plymouth	NZ	1			8360			white, fuzzy, flashing light hover and dart around
630522	Pequannock	NJ	1			8363			4 pink wheels spin or roll very fast from E to W in succession
63Summer	Middletown	NY	1			8371			8-10 lights move at random, then in an oval formation
630615	Venezuela (200 miles N of)	At Sea	1			8388			luminous disc travel at 1.5 times the angular speed of a satellite
630616	Palmerston, North City	NZ	1						A college student observed two brilliant lights descending in zig-zag fashion. The UFOs hovered stationary for about 5 seconds, then "suddenly shot off at very great speed, at first in level flight across my front, then climbed up into the sky at approximately 45 degrees to disappear." [Witness interviewed by NICAP Adviser Harold H. Fulton.]
630618	Niagara Falls	NY	1						An unidentified object flashing various colors moved around erratically for over two hours. Witnesses in separate locations described the maneuvers similarly. About 10:00 p.m., the UFO moved from west to east, reversed direction and headed back west. Later, it headed southeast rising higher in the sky. Local astronomers and airport officials could not account for the object. [Report from NICAP member.]
630619	Burlington	MA	1						An unidentified white light was observed descending, changing color; finally appeared silvery. The UFO then circled the area, disappearing behind objects on the visible horizon. [Report via Walter N. Webb, Boston NICAP Adviser.]
630626	Pine Crest	CA	1						Four glowing greenish objects with halos were observed by a technician, many others. Three objects moving westerly were approached by a similar object from the west. The fourth object stopped and hovered as the three approached, split formation, and continued west. Then the fourth object continued east. [Report via Bay Area NICAP Subcommittee.]
630700	Boston	MA	1						An advertising plane caused several erroneous UFO reports. (Aircraft identified by NICAP Adviser, Walter N. Webb.)
630701	Glen Ellyn	IL	1			8434			theodolite saw a light, the size of a match head at arm's length
630702	Tuscon	AZ	1						Large blimp like object reported. [In this area is the Davis Monthan AFB Titan II Missile Site, home of the 390th Strategic Missile Wing consisting of 18 Launch Facilities around the Tucson area].
630720	Springfield	IL	1						About 7:50 p.m., a shiny silver object was observed hovering at high altitude. The UFO moved up and down, back and forth, but remained in the same area of the sky. About dusk, the object (now resembling a bright star) began moving across the sky, picking up speed, and disappeared in the distance. [Witness filed NICAP report form.]
630801	Garston, Herts	UK	1						A former RAF pilot, and flying instructor, observed a triangular UFO which hovered for a -long period of time, then climbed out of sight. An air traffic controller four miles away also observed the UFO. [FLIGHT International, 15 August 1963.]
630806	Sanford	Fl	1						Orville Hartle, Chairman of the LaPorte, Indiana NICAP Subcommittee, on a brief visit to Florida, observed a UFO. He obtained a full report with signatures of 13 additional witnesses.
630811	Warrenville	IL	1			8506			Boersma saw a light move around the sky

630813-14	St. Calen	Switzerland	1			8514			saw a fireball become a dark object after 4 mins
630813	Honolulu	HI	1						While vacationing in Hawaii, a chemist observed a UFO and reported it to NICAP. Dr. Richard Turse, Princeton, N.J., about 11:30 p.m., saw a round reddish object pass overhead from southwest to northeast. The UFO "traveled across the sky at great speed making two sharp turns at the same speed."
630914	Susanville	CA	1			8548			round object intercept a long object &attach to it or disappear
630915	Vandalia	OH	1			8549			2 very bright gold objects one staying stationary, the other moving
630818	Ft. Kent	ME	1						A silvery disc-shaped UFO was seen by two young boys, whose parents agreed they must have seen something unusual. The disc passed from north to south, emitting a hum intermittently.
630920	Huntsville	AR	1						A rancher reported watching an egg-shaped UFO moving eastward about 10 degrees above the southern horizon. Through binoculars, a dark spot was visible near the top of the object. As it proceeded west, the UFO dimmed, turning orange, and faded from view after 10-15 minutes. [Witness reported sighting to NICAP.]
630926	Sunnyvale	CA	1						Police officer, many others, observed a gray disc with central bright spot, moving on a westerly course at high speed. [UFOE, VII]
631004	Bedford	OH	1			8581			intense oblong light with tapered ends
631006	Philadelphia	PA	1			BBU			Freidman. (Mary Castner/CUFOS)
631007	Lanham	MD	1			BBU			Freidman. (Mary Castner/CUFOS)
631023	Meridian	ID	1			8603			object shaped like a circle from below and a football from the side
631024	Cupar Fife	Scotland	1			8604			light move for an unspecified length of time
631103	Corona	NY	1						A Pan American Airways mechanic, about 1:30 a.m., noticed a star-like object maneuvering across the northern sky. The light moved rapidly, slowed and seemed to "shudder," then changed course by about 45 degrees. Finally it made a 90-degree turn, accelerated, turned again and disappeared from view. [Report obtained by New York NICAP Subcommittee.]
631112	Unknown City	Argentina	1						An official Argentine Navy UFO report. Combined visual and E-M incident involved the Navy transport A.R.A. "Punta Medanos." A large airship (never identified) was sighted from the stern of the vessel. The huge UFO was round-shaped, and it was moving at great speed
631112	Port Huron	MI	1						Deputy Sheriffs chased a low-flying UFO which first appeared as a white flashing light. At times the object seemed to have a "big divided window" on it. When the UFO hovered, the deputies approached and flashed their squad car light. Then a flashing red light became visible on the UFO. The object finally moved away to the northwest making a motor-like sound. Other residents reported a flashing light and "high-pitched" or "whining" noises at the same time.
631202	Grand Rapids	MI	1						A motorist stopped at a traffic light about 9:30 a.m., noticed a strange object "glittering in the sun." Then the object tipped on edge (revealing a disc shape) and quickly sped away to the southeast. The shape was "like a pancake."
631205	Carrasco (near)	Uruguay	1						An oval UFO, metallic-looking like aluminum, was observed hovering in the clear morning sky by hundreds at a resort. One description said the object "balanced gently in the air."

66Unknown	Elista, Kalmuk (east of)	Russia	1						9:50 p.m. Russian coal and gas scientists watched a high-flying silent disc-shaped object spiral through the sky east of Elista, Kalmuk. (Source: Larry Hatch, *U* Database, case #7772, citing Lumieres dans la Nuit, issue #204)
660103	Los Altos	CA	1						Night. Army colonel expert on rockets and missiles sighted a group of bright light sources speeding overhead at an estimated 1,000-1,200 m.p.h., maneuvering back and forth. Soon afterwards he observed several searchlights sweeping the area as if trying to spot the flying objects. (NICAP report; U.F.O. Investigator, Vol. Ill, No. 6, Jan.-Feb. 1966, p. 2.)
660111	Pacific Ocean	At Sea	1						Large, cigar shaped object passes within 1 mile of ship
660120	Katanning	AU	1						11-12:30 a.m. An object with a row of bright body lights was observed to hover, and to move up and down, while emitting a blinding light and making a sound like bees humming. After a long period of time, the lights brightened and the object suddenly sped away (luminosity/speed correlation). (Flying Saucer Review, May-June 1966, p. 32; Newcastle Morning Herald, Jan. 24, 1966.)
660202	Salisbury	NC	1			10193			silver, diamond-shaped object with several balls

660214	Witbank	S. Africa	1						7:40 p.m. LT. A farm woman heard a very loud sound and saw a cigar-shaped object descend and hover, the sound level increasing. The UFO had a very bright light at the front, small portholes along the side, and a bluish glow at the trailing end. The object suddenly shot upwards and disappeared. (Flying Saucer Review, 12(4), July-August 1966, pp. 32-33.)
660308	Chesteron	IN	1						2:30 p.m. EST. An ex-Marine airplane mechanic and another witness saw an inverted silvery disc with four projections on top, surrounded by bright haze, that hovered above a cloud bank for 4-5 minutes. The object then tilted and sped away. (NICAP report.)
660316	Burnham	ME	1						7:45 p.m. Two large, moon-sized orange discs flying slowly, then accelerating, body lights blinking on and off. (NICAP notes.)
660317	Grand Rapids	MI	1						Sunset, EST. Three young girls saw a large oval with glowing red light, evenly spaced portholes around the rim from which lights flashed alternately. The UFO moved slowly, then accelerated and sped away. (NICAP notes.)
660319	Bethesda	MD	1						9:05 p.m. EST. Col. Howard Wright, retired Air Force pilot, and family saw a bright white light approach from the south, stop and hover, accelerate, zig-zag, then continue north, joined by a second light. (NICAP notes.)
660320	Miami	FL	1			10247			pulsating light, varying from white to intense blue
660321	Hillsdale	MI	1			BBU			college students saw a football-shaped object with red-green-white lights
660322	Normal	IL	1						7:15 p.m. CST. At least 10 witnesses watched a large oval object with four blinking body lights fly overhead, hover over some trees, then move away. (NICAP notes.)
660323	Trinidad	CO	1						5:00 p.m. MST. At least a dozen witnesses saw two light-reflective disc-shaped objects with domes flying in-line, traveling with a bobbing motion over the terrain. (McDonald, 1968a, Case 14, pp. 51-52; NICAP notes).
660323	Fort Pierce	FL	1			BBU			bright object like a balloon covered with fluorescent paint in woods
660323	Joppa	IL	1						Night, CST. An oblong object surrounded by smaller bright lights was observed by a dozen people. (NICAP notes.)
660324	New Orleans	LA	1						7:10 p.m. CST. A retired Air Force colonel and a General Electric computer programmer watched a glowing oval object speed across the sky. Two smaller lights also hovered, and maneuvered around. (NICAP notes.)
660326	Texahoma	OK	1			10291			object with waffle like surface glowing intense red light
660327	Vancouver, British Columbia	CAN	1						Time not reported. About 100 people watched a revolving disc-shaped object that hovered for an hour, flashing red, blue, green, and white lights (body lights). The object then slowly ascended and disappeared. (Flying Saucer Review, Vol. 12, No. 6, 1966, p. 32; from Vancouver Sun).
660329	Columbus	GA	1						2:30 a.m. EST. A red oval object was observed moving with an oscillating motion, swinging like a pendulum. The object suddenly brightened and made a rapid departure (luminosity/speed correlation). (Hitt, 1999.)

660330	Ottawa	OH	1			10329			(NARA)
660403	Playa Del Ray	CA	1						6:50 p.m. PST. Along the coast of the Pacific Ocean near Los Angeles International Airport, a Coast Guard helicopter pilot and another witness reported seeing four pairs of flashing red lights in changing geometric formations, estimated to be one mile offshore. The pilot reported seeing an oblong object with body lights. (NICAP report forms.)
660405	Lycoming	NY	1			10385			spinning vapor-like sphere, 10 ft in diameter
660407	Mansfield	OH	1						Time not reported. Two sheriffs deputies while on patrol chased a bright round object at high speed, seeing it or a similar object five times. The UFO alternately hovered and sped up, the last time departing vertically upward. (NICAP notes.) [Compare to April 17, 1966, Ravenna, Ohio, sheriffs deputies case.]
660410	Lebanon	IN	1						Night. An engineering draftsman and his wife saw a cone of nine white lights, with a line of 10-12 small blue lights below it. The lights abruptly blinked off. (NICAP notes.)
660411	Greensburg	PA	1			BBU			well-defined cigar shaped object 50 ft long with no wings or tail
660412	Brockton	MA	1						10:00 p.m. EST. An elongated elliptical (or cigar-like) object with a bright red-orange light at each end was seen hovering off Route 24. (Fowler, 1974, p. 337.)
660413	Kalamazoo	MI	1						Time not reported. A police officer and other witnesses saw an elliptical object with flashing white lights, alternating red and green lights. (NICAP report; police department form.)'
660415	F. E. Warren AFB	WY	1						UFO over missile silo (NUFORC)
660417	Danvers	MA	1						7:15 p.m. EST. Several groups of witnesses reported an elliptical object with rotating white lights around its perimeter. The object circled slowly, then disappeared into clouds. (Fowler 1974, p. 337.)
660418	Peabody	MA	1						7:15 p.m.EST. Several witnesses reported an oval object with blue glow, reddish-green flashing lights on each end. The object hovered, and sped back and forth several times. (Fowler 1974, p. 338.)
660418	Cohasset	MA	1						9:45 p.m. EST. About 25 miles southeast of I Peabody, witnesses reported an oval object with flashing red lights around its-circumference, and two smaller white body lights. The object reacted to searchlights (light reaction) shone on it by zig-zagging, accelerating straight up and disappearing. (Fowler 1974, p. 339.)
660418	Battle Creek	MI	1			BBU			egg-shaped object, 75 ft long, 15 ft high, gray-colored
660419	Quincy	MA	1						11:45 p.m. EST. Several persons saw a large disc-shaped object accompanied by two smaller discs that flashed red and white lights, hovered and swung back and forth like a pendulum. (Fowler 1974, < p. 339.) [Note: Bellingham, Cohasset, Quincy, Sharon, and Stoughton, Mass., all are within about a 30-mile radius of Boston, in an arc from the southeast to the southwest.]
660420	Charlevoix	MI	1						Time not reported. A couple reported watching six gray objects make a sharp turn in unison, separate slightly, climb and take off at high speed. (NICAP notes.)
660422	Beverly	MA	1			BBU			a platter shaped object the size of a large car with 3 red-green-white lights

660422	Long Island, Douglastown	NY	1						Time not reported. A Department of Defense engineering technician saw a disc with a row of windows like mercury vapor lamps. (NICAP report form.)
660430	Sacramento	CA	1			BBU			woman saw a light move around the sky
660507	Goodfellow AFB	TX	1			10535			short, cylindrical object with pointed ends
660516	Temple City	CA	1						12:30 p.m. PDT. A newspaper editor and office manager were called outdoors to see a grayish-green object high in the northern sky changing shape from rectangular, or roughly diamond-shaped, to domed disc. The object, apparently metallic, was reflecting sunlight. Haze-like heat waves surrounded it. For 15 minutes the object moved around lazily, then suddenly sped off to the northeast and disappeared. The editor compared the departure speed to that of a jet aircraft.
660516	Temple City	CA	1						About 1:10 p.m. at a school in the area, the principal noticed the children on the playground staring at something in the sky. He looked and saw a dark disc-shaped object with dome on top moving from high overhead toward the east. Several other witnesses made similar reports between 1:00 and 1:30 pm. (Los Angeles NICAP Subcommittee report.)
660517	Mentor	OH	1						Time not reported. An aircraft design engineer saw a bluish-white object pickup 10 smaller objects in groups, brightening each time a pick-up was made, then dimming (luminosity/motion correlation). The parent object then turned to the west and accelerated away. (NICAP notes.)
660606	Spooner	WI	1			10626			2 domed discs with sparkling upper surfaces
660608	Toledo (Between Kansas and)	OH	1			10629			bright silver, cigar-shaped object, as long as an airliner
660616	Elista, Kalmuk	USSR	1				**NC**		Scientist report UFO maneuv nr missile test
660617	Abington, Berkshire	UK	1						8:50 p.m. LT. Two nuclear scientists reported seeing a very bright yellow object above a cloud bank on the western horizon, moving slowly. The object then accelerated northward and disappeared behind a tall bank of clouds. About 10 minutes later the same or a similar object appeared traveling from north to south, stopped and hovered in the northwest sky for about 30 minutes. The object then diminished in apparent size and was hidden by clouds near the horizon. When viewed through 10 x 60 binoculars, the object had a conical shape and was reflecting sunlight. Its length was computed to be about 60 feet. (Flying Saucer Review, Vol. 12, No. 5, Sept.-Oct. 1966, pp. 27-28.)
660618	Burnsville	NC	1			10663			red bell shaped object with 3 flashing red lights
660624	Richmond	VA	1						3:30 a.m. EDT. A police officer on patrol saw a hovering elliptical object with body lights, surrounded by mist or vapor. The lights were alternately yellow and green. As he approached to investigate, the UFO began moving away, leading him on a cat-and-mouse chase. Finally the object accelerated and sped away. Separate police witnesses observed a UFO in the same general area about 40 minutes later. (U.F.O. Investigator, Vol. III, No. 9, Aug.-Sept. 1966, p. 3; Keyhoe & Lore, 1969a, p. 9.)

660624	Charlotte	NC	1						Night. A school teacher, ex-member of Army intelligence saw a flattened ellipse with fuzzy edges, two or three port-like black spots along the body, flying overhead. The object was visible for about 2 minutes in hazy conditions. (NICAP report form.)
660627	Wake Island (Pacific, 400 miles E of)	At Sea	1			10693			Radio Officer saw a "cloud" expand with a light inside
660711	Union-Kirkwood	PA	1			10739			large (100 ft wide, 20 ft high) bright red luminous object
660725	Vanceboro	NC	1			10781			pulsating object change color
660731	Erie (Presque Isle State Park)	PA	1			10798			square or hexagonal object with edges lit or reflecting light
660731	Lake Canandaigua	NY	1						9:30 p.m. EDT. An engineer with the Federal Communications Commission saw a maneuvering light that descended with a falling leaf motion (oscillating from side to side). Then he discerned it as three lights in V formation. (New York NICAP Subcommittee report.)
660805	Erie	PA	1						9:30 p.m. EDT. A woman and four children saw an aluminum-colored oblong object with five evenly spaced yellow windows for about 30 seconds. (Pennsylvania NICAP Subcommittee report.)
660813	McDonald	OH	1						Time not reported. A policeman and others saw a large object accompanied by about 10 smaller objects. When an airplane approached, the smaller objects rushed to the large object, (aircraft avoidance). The sighting lasted 4 hours. (NICAP notes.)
660815	Boston	MA	1						2:30 p.m. EST. An art instructor saw a thin disc with flat dome, and vertical ribbing visible on the dome, for 1 -2 minutes. The object was beneath a cloud or fog layer. (Walter N. Webb report.)
660815	Forest Park	IL	1						5:40 p.m. CST. A Navy technician watched a flat, round object (disc) with red and yellow segments on the underside. The object had a dark center section, and colors around the rim. It flew slowly overhead for 5 minutes as a storm gathered. (NICAP report form.)
660816	Duluth	MN	1						10:45 p.m. CST. Three persons in a car saw a very large, spinning greenish-blue object that had revolving red body lights. The object at one point emitted an extremely bright light beam that blinded the driver. (NICAP report form, newspaper clippings.)
660816	Minot (15 miles south of)	ND	1						football-shaped object that was white with an orange tint appear in front of their car
660817	Ashtabula	OH	1						family saw a silvery disc-shaped object hovering and emitting a humming sound. The object then dove down and disappeared from view. (NICAP notes.)
660819	Donnybrook	ND	1			10872			bright, shiny, round disc, 30 ft in diameter and 15 ft high
660820	Unitah Basin	UT	1						Dusk, MDT. About a dozen witnesses saw a glowing orange disc that hovered, emitting a red light beam from the underside. When children ran toward it, the object took off and disappeared. (Salisbury 1974, Appendix B, Table 1.)
660822	Easton	PA	1						10:15 p.m. EDT. An orange-red mass of light undergoing apparent shape changes was reported. The object fluttered down, moved away, changed to cone shape, then to a thin line, and finally sped away disappearing in seconds. (NICAP report form.)
660823	Da Nang	Vietnam	1			BBU			(McDonald list)
660823	Columbus	OH	1			10888			circular, luminous white object split into 5 objects

660823	New York City	NY	1						8:45 p.m. EDT. A businessman saw an oblong obiect with a row of lights or windows around the middle, antennas (projections) on top, and lights at each end (body lights). The object moved silently at variable speed. (NICAP report form.)
660825	Malibu	CA	1						Sunrise, PDT. A diesel mechanic and former Navy aircraft crewman saw a lens-shaped disc with dome on top, apparent windows or portholes rotating slowly around it. The object performed complex, high-speed maneuvers. (NICAP report form.)
660825	Omaha	NE	1						11:30 p.m. CDT. A radio station staff and dozens of others saw a dark disc-shaped object with flashing red light, surrounded by white or pale green haze, hover, swoop down, and reverse direction. The object was visible for 15 minutes. (NICAP report form.)
660826	Gaylesville	AL	1			10899			cluster of 4 small, glowing, orange yellow lights
660827	Civero	IL	1						9:30 p.m. CDT. A production engineer saw a lens-shaped disc with domes on top and bottom, surrounded by a soft bluish glow. The object was visible for 3 minutes. (NICAP report form.)
660901	Willsboro	NY	1			10917			oval object with lights flashing red and white, and blue
660903	Harlingen	TX	1			BBU			fantastic spinning object same as aug 6th sighting
660906	Suffolk County AFB	NY	1			10933			white cylinder of light come from the E at high speed
660909	Franklin Springs	NY	1			10942			object larger than an army tank, w/3 horizontal bands of light
660913	Stirum	ND	1			10944			silvery-grey elliptical object w/a clear bubble dome on top
660921	Burton	CAN	1						Early on that same morning two fisherman at Burton, 45 miles northwest of Summerside, saw a rapidly-moving light like a "particularly bright star" traveling from west to east in the general direction of Summerside. Both coastal towns face the Northumberland Strait. (Weinstein, 1999, p. 34; U.F.O. Investigator, Vol. III, No. 10, Oct.-Nov. 1966, p. 4.)
660923	Decatur	AL	1						7:30 p.m. CDT. A former army aerial photo specialist and others saw two large objects (shape not specified in notes), one making a high-frequency whistling noise. The two objects performed complex flight patterns for about an hour. (NICAP report form.)
660926	Bridgeport	NJ	1						3:30 p.m. EDT. A group of people saw a metallic-appearing oblong object (shaped like a cold capsule), emitting a brilliant glow even when in clouds. The object tilted upward, spun, and turned on its side. (NICAP notes from newspaper story.)
660928	Wilmington	OH	1			10973			3 round, oval-shaped, aluminum-colored objects w/rotating rings
661005	Osceola	WI	1			10996			small, bright orange, moon-shaped object stationary in the NE
661010	Wanaque	NJ	1						9:15 p.m. EDT. Police officers observed a spherical object with a protrusion on one side emitting an extremely bright, blinding light that lit up the terrain (environmental illumination). The UFO hovered, and moved around erratically at high speeds, making sharp turns and leaving a misty trail in its wake when it moved. (U.F.O. Investigator, Vol. Ill, No. 10, Oct.-Nov. 1966, p. 6; NICAP report, investigation by John Pagano.)

661011	Davenport	IA	1						6:15 p.m. CDT. Several persons saw two brightly luminous objects in daylight, one sped below a jet aircraft's contrail moving like a sailed plate (oscillating motion), once stopping abruptly. (NICAP report form.)
661021	Livermore	CA	1						4:25 p.m. PDT. Two Sandia Corporation ; engineers saw a sphere which at first appeared translucent, then reflecting light. The object hovered, then ascended very rapidly until out of sight. (NICAP * report form, newspaper clippings.)
661023	Southhampton, Long Island	NY	1			BBU			object with arms in front of it which sparkled like an arc-light
661030	Southhampton, Long Island	NY	1			BBU			same as 10/23 case[Same as Oct. 23 case?] (FUFOR Index)
661106or12	White Plains (3 miles W of)	NY	1			BBU			rectangular object emitting steady bluish light moving slowly to the N
661108	Saginaw	MI	1			11135			group of lights flash and change color while hovering
661110	Pinellas Park	FL	1						9:20 p.m. EST. A young boy saw a very bright red, self-luminous, cigar-shaped object emerging from clouds. Then 10 smaller objects like dishes approached and entered the larger object. The parent object had what looked like portholes near its upper edge. (NICAP report in Donald E. Keyhoe Archives.)
661214	Cedarville	CA	1						Early a.m. An elliptical object with visible undercarriage (legs), and a red body light was observed. At one point the object emitted a red ball of light. (NICAP notes.)
661224	Charleston	WV	1						7:40 p.m. EST. Two Air Force pilots in a T-33 at 27,000 feet above a solid undercast saw a bright object in clear sky above them, at an estimated 1,000 feet. The object hovered for about 2 minutes, then suddenly rushed away. (NICAP report form, confidential report.)
661225	Monroe	OR	1			11239			3 round objects, as large as cars, give off vapor
670105	Philadelphia	PA	1						5:40 p.m. EST. A bank employee and three others watched a disc-shaped object with alternate red and green lights around it. The object circled over the area and emitted a buzzing sound. Shortly afterwards, many aircraft were active in the sky. (U.F.O. Investigator, Vol. III, No. 11, Jan.-Feb., 1967, p. 4.)
670107	St. Louis	MO	1						5:45 p.m. CST. A man first saw 4-5 square lights in a tilted row (body lights). The object, a domed disc shaped like a straw hat with flickering lights on the dome, then turned bright red. It appeared to be metallic. It hovered, tilted, leveled off, and sped away. (Letter dated 1/21/67 in NICAP files.)
670116	Charleston	SC	1			BBU			(McDonald list)
670122	Providence	NC	1						8:35 p.m. EST. A man saw a bright light that changed to a series of lights which maneuvered, hovered, and bobbed like a cork on water. The object seemed to ascend with less effort than when it descended . (Compare to Sept. 20, 1966, Sebring, Fla., case.) A wind-like sound was heard. (NICAP report form.)
670124	Astoria	NY	1						1:00 a.m. EST. A witness saw a large solid object with two bright red vertical blinking body lights descend, emitting a sound like an electric shaver (buzzing). (NICAP report form.)
670126	Coffeen (near)	IL	1			BBU			60 ft object, flat on the bottom, rounded on top 10 ft thick

670126	Kirkwood	MO	1						5:40 a.m. CST. A woman saw a disc-shaped object that was flat on the bottom and had a rounded top (dome). A group of closely spaced red lights was visible on the bottom. The object flew straight for 5-6 seconds before disappearing. (NICAP report form.)
670126	Havre	MT	1						8:15 p.m. MST. A man saw a solid ball (sphere) with blinking yellow body light(s) which descended, circled a mountain, and flew off. (NICAP report form.)
670126	Heidelberg	Germany	1						8:30 p.m. LT. Witnesses first heard a -pulsating sound, then saw a shiny, metallic dirigible-shaped (elliptical) object; hovering over a building. As jets approached the object, it took off (aircraft avoidance) with its lights flashing in a regular cycle. (APRO Bulletin, May-June 1967, p. 4.)
670128	Irish Valley	PA	1						6:00 p.m. Members of three families saw two objects, one saucer shaped (disc) with projections and a dome on top, blinking red and green lights across the front and a silver object protruding from the top. The objects variously maneuvered and hovered, together and independently. Many other area sightings also were reported. (Shamokin News Dispatch, Pa., 1/29/67, copy in NICAP files.)
670130	Crosby (5 miles SW and 20 miles W of)	ND	1			BBU			bright white sharply outlined lozenge-shaped object
670131	Kirkwood	MO	1						12:01 a.m. CST. A McDonnell aviation company engineer saw a brilliant bluish-white light going fast in a zig-zag path. (NICAP report form.)
670200	Brown County	IN	1						5:30 a.m. EST. A woman saw a shiny round object with a flat bottom hover over her house and then fly away. The object made a loud whistling sound. (Brown Co. Democrat, Nashville, Ind., 2/9/67, copy in NICAP files.)
670200	San Antonio	TX	1						Night. FAA Flight Service Specialists plus control tower personnel saw a large round red object that moved slowly under the cloud layer. Smaller objects emerged from the larger and flew away rapidly toward the southwest. (Letter dated 2/22/67, in NICAP files
670202	Sumner	IL	1						A well-known craftsman, who requested anonymity, reported to the Lawrenceville-Vincennes Airport that he observed an object for one and a half hours that was doing some pretty good stunts. (Ridge, NICAP files).
670206	Hazard	KY	1						11:30 p.m. EST. Four policemen and a rescue worker saw an object with red flashing lights and blue lights (body lights) that flew very low making a roaring sound. (Hazard Herald 2/13/67, copy in NICAP files.)
670207	Oakhurst	CA	1						11:55 p.m.PST. A couple saw a solid round object and a silver cigar-shaped object oriented vertically. The round object emitted many "contrails" and apparently disintegrated, then the cigar-shaped object flew rapidly away. (NICAP report form.)
670209	Odessa	DE	1			11350			saturn shaped object, 50 ft in diameter and 20 ft high
670212	Grand Rapids	MI	1			11355			4 fluorescent, football-shaped objects

670213	Novato	CA	1						12:30 p.m. PST. A witness watching aircraft first saw a white disc passing overhead at high speed. Three other discs then appeared from different directions and fell in behind the first (rendezvous). The last one was black. (NICAP report form.)
670214	Abington	VA	1						9:00 p.m. EST (8:00 p.m. CST). A woman saw a triangular object with green lights at two points and a red light at the third (body lights). It moved across the sky and then returned to its original position (maneuvered). (NICAP report form.)
670216	Amherst	MA	1						10:15 p.m. EST. Three independent reports from five witnesses (including two policemen) of a glowing bright white, light-bulb-shaped object that hovered in the sky, ejected a small red object, moved back and forth, then suddenly accelerated away. A swishing sound was reported. (Fowler, 1974, p. 344.)
670216	Topeka	KS	1						10:40 p.m. CST (11:40 p.m. EST). Three witnesses, one identified as a colonel, saw a bright object which appeared to drip white phosphorus-like fire. The object was stationary for 4 minutes and then faded out. (Topeka Daily Capital 2/18/67, copy in NICAP files.) [Note: Very likely a flare- or candle-carrying hot-air balloon hoax.]
670218	Chatsworth	GA	1						4:30 p.m. EST. Three people saw a shiny cigar-shaped object along with two round objects for several minutes. The objects hovered, then accelerated away. "Low roaring sound" heard. (NICAP report form.)
670218	Carmel	NY	1						5:30 p.m. EST. A man saw two glowing ovals that hovered, accelerated, and vanished into a funnel-shaped cloud. The objects were viewed through binoculars. (NICAP report form.).
670220	Laconia	NH	1						5:45 p.m. EST. A man saw a bright light with smaller associated lights above it (satellite objects). The larger object swung like a pendulum (oscillation), then suddenly accelerated away. (NICAP report form.)
670224	Lucan, Ontario	CAN	1						10:00 p.m. EST. Two members of a family saw a glowing orange object, also seen separately by an Ontario provincial policeman. The policeman described it as a "flashing orangey-colored object." (London Free Press, Ontario, 2/27/67, copy in NICAP files.)
670225	Minneapolis	MN	1						7:02 p.m. CST. Seven witnesses saw three "brushed aluminum" discs with a row of lights or ports around the edges. At one point the lead disc glowed red like molten iron, then the glow diminished. The three objects banked into a turn in unison. (Air Force Intelligence Report in Colorado Project and in NICAP files.)
670225	Fargo	ND	1						7:50 p.m. CST. Two teenaged boys saw around or disc-shaped brightly illuminated object. It moved higher gaining speed (accelerated) and flew away to the northeast. (Fargo Forum, 2/25/67, copy in NICAP files.)
670227	Port McNeil, British.Columbia	CAN	1						7:30-8:30 p.m. PST. Four people saw a large bright oval with a tail, white on top, blue on bottom and later bright red. The object at times traveled in a straight line, made turns (maneuvered), disappeared, and reappeared. I was also viewed through a 45x telescope. (Letter in NICAP files.)

670227	Omaha	NE	1						8:00 p.m. CST. A couple saw a round bright light, pulsating and changing color. Red lights were either blinking or moving around the main white light (body lights). (Omaha World Herald, 2/28/67, copy in NICAP files.)
670227	Grand Haven	MI	1			11419			large white light, with smaller red and green lights to the sides
670227	Edmonton, Alberta	CAN	1						9:00 p.m. MST (8:00 p.m.). A woman saw a cigar-shaped object with a red light on bottom and a white light on top (body lights) that was hovering over a hospital and spinning. The object emitted a siren-like sound. Other sightings reported about the same time were identified as RCAF aircraft. (Edmonton Journal, 2/28/67, copy in NICAP files.)
670302	Memphis	TN	1						11:30 p.m. A slender ellipse or cigar-shaped object with body lights along its length was reported. The lights were pulsating in a rhythmic pattern opposite to the direction of motion. (Air Force report, Project Blue Book files, National Archives.)
670303	Dorchester	MA	1						7:25 p.m. EST. Two people watched a glowing yellow disc with a small red body light moving slowly to the west. The object stopped and hovered for a long time, then flew away to the east. A sound like a swarm of bees (buzzing) could be heard. (Letter 3/8/67, in NICAP files.)
670306	Bentor Harbor	MI	1			11454			oval-shaped object with red, green and yellow lights
670306	Galesburg-Moline	IL	1			11460			object shaped like a rubber cup placed under a furniture
670309or11	Galesburg	IL	1			BBU			object shaped like a pancake with a rounded top,red lights on rim
670309	Follansbee	WV	1			BBU			car-sized obj, lights on underside, hovering, left at high speed
670309	Onawa	IA	1			11480			bright white, saucer-shaped object fly straight and fast
670322	Wapello	IA	1			11541			fluorescent, solid, multicolored lights stand still, then fly away
670323	Lawrenceville	IL	1						11:30 a.m. Man requesting his name be kept confidential reported that he observed an object, near the airport, in the west that appeared to be an aircraft fuselage (DC-3) without wings. It was white in color, and after a minute of observation, took off fast towards the northwest into a cloud. (Ridge, NICAP files)
670324	Kent	CT	1						7:18 p.m. EST. Many people saw an object hovering in the sky to the northwest. It was changing colors in a cycle from red to blue-green to white, and back to red. After about 25 minutes, the object made a swift departure. (Unidentified newspaper clipping, 3/25/67, copy in Donald E. Keyhoe Archives.)
670324	Georgetown	MA	1						9:00 p.m. EST. Three witnesses described an object as being shaped like a turtle shell with flashing red and white lights. The object hovered over Rock Pond before moving off faster than a jet aircraft. (Fowler, UFOS: INTERPLANETARY VISITORS, December 1979, Bantam Edition, page 331)
670324	Los Alamos	NM	1				**NC**		Disc hovers for 10 minutes
670325	Canton	IL	1						6:25 p.m.CST. A man and his 11-year-old son saw a hovering, dark egg-shaped object that began to glow red when it moved low overhead (luminosity/motion correlation). It made a sound like a quiet washing machine (swishing). The sound varied and pulsated as did the light. (NICAP report form and letter in NICAP files.)
670326	New Winchester	OH	1			11559			oval object, like copper or brass fly with tumbling motion

670329	North Granby	CT	1						7:35 p.m. EST. A woman sighted a glowing disc. She drove home and returned with two more witnesses. The object moved slowly, and disappeared when aircraft approached (aircraft avoidance). (NICAP report form.)
670330	Eastern Seaboard	in air space	1						7:20-7:40 p.m. EST. A NASA launch that created a sodium vapor cloud in the atmosphere caused several false UFO reports.
670330	Westmont	IL	1						8:25 p.m. CST. Three people saw a disc with a dome and two red body lights hovering near the horizon. They observed it through binoculars, and it appeared to oscillate erratically. Report from local resident, received 10/25/67, NICAP files.)
670405	Davis	CA	1						1:50 a.m. PST (4:40 p.m. EST).-A woman saw a basket-shaped (truncated cone) object with flashing lights for 10 minutes. The object was described as tumbling end over end. (NICAP report form.)
670417	Worthing, Sussex	UK	1						2:15 a.m. (9:15 p.m. EST, April 16). A loud humming sound was heard as a glowing object shaped like an upturned saucer flew across the sky. The sound was heard again later and the object was seen moving sideways. (Flying Saucer Review, July-Aug. 1967, p. 30.)
670419	Port Clinton	OH	1						9:00 p.m. EST. Six neighbors saw a bright light that moved straight up, then crossed the sky, stopped, brightened, and emitted two smaller lights. The observation lasted 3 hours. (Port Clinton Daily News 4/20/67, copy in NICAP files.)
670420	Georgetown	MA	1						8:30 p.m. EST. Six witnesses saw two dark objects with two bright flashing red lights and two dimmer white lights (body lights). The objects moved in a pattern, stopping and reversing direction (maneuvering) at times. (Fowler, 1974, p. 347.)
670421	Georgetown	MA	1						7:45 p.m. EST. Three witnesses saw two groups of lights, each composed of three red and one white lights flashing in sequence. A large white light viewed through binoculars showed the appearance of rectangular windows. The object moved into the overcast when aircraft converged on the area (aircraft avoidance). (Fowler, 1974, p. 347.)
670422	Maryville	TN	1						9:50 p.m. EST. An airline mechanic and his wife w observed a bright disc that climbed slowly, sped up, slowed, changed direction (maneuvered), with erratic motions. (NICAP report form.)
670427	Green Lake	WI	1			BBU			cone-shaped object w/blue underside come lower with oscillating motions
670502	Montezuma	IA	1						8:25 p.m. CDT. A gray misty oval object was reported with red blinking lights and a steady white light on top (body lights). It hovered, then rose straight up. (APRO Bulletin, May-June 1967, p. 8.)
670512	Putney	UK	1						11:10 p.m. GMT. A glowing yellow elliptical object with three round spots on the underside passed below clouds and was observed through binoculars. (Flying Saucer Review, Sept.-Oct. 1967, p. 31.)
670515	Scarborough, Ontario	CAN	1						10:00 p.m. EDT. Three witnesses 500 miles to the northeast, in Scarborough, Ontario, Canada, saw an elongated object with one red and one white light. (Air Force report form, NICAP files.)

670517	Ust'kamenogorsk	Russia	1						2:30 a.m. LT. An engineer named T.N. Kanshov saw a bright body twice as large as the moon moving across the sky from south to north for over two minutes. It expanded to three times its original size before disappearing. (Ref. 3)
670517	Bakhrushev	Russia	1						10:05 p.m. LT. By a warm, quiet evening several witnesses including S.V. Ostrovskiy saw a bright point descending in the western sky. It flew down to an altitude estimated as about one mile, when it changed to a horizontal course. (Ref. 3)
670520	Lexington	KY	1						10:45 p.m. EDT. A couple saw an intensely glowing object with shimmering white lights. The object alternated between hovering and moving at an estimated altitude of 1,500-2,000 feet. (Witness letter, 5/25/67, NICAP files.)
670525	Shreveport	LA	1						8:55 p.m. CDT (9:55 p.m. EDT). Two people saw a cigar-shaped object with a string of white lights down the center and a red light at front, and a green light at the rear (body lights). (Witness letter, NICAP files.)
670525	Castro Valley	CA	1						10:30 p.m. PDT. A couple saw a metallic-appearing disc that descended to about 5,000 feet above the ground, emitting a bright red flame which shot from a 3-4 foot round aperture in the underside. (NICAP report form; U.F.O Investigator, Vol. IV, No. 3, Nov.-Dec. 1967, p. 3.)
670528	Wallingford	CT	1						12:01 p.m. EDT. An engineer and his son (age 12) saw a bright silver, wingless object, apparently longer than a Boeing 707 jetliner. Two large transparent domes were visible on top of the object and three oblong windows along the side. (Letter dated 6/5/67, NICAP files.)
6706Early	Khoper River	Russia	1						11:00 p.m. LT. While walking along the banks of the river M. Gavrilyuk and his wife saw a luminous object shaped like a half moon. (Ref. 3)
670600	Fremont	OH	1						Evening. A pilot and his wife saw an object with amber to red body lights moving an estimated 100 mph at about 2,000 feet altitude. (Stroud letter, 7/21/67, NICAP files.)
670601	St. Augustine	FL	1						8:12 a.m. EDT. A woman saw a revolving disc with peaked top for 2-3 minutes. It passed in front of a cloud and made a sound like a jet aircraft. (NICAP report form.)
670601	Warrensburg	MO	1						Witnesses in their car on the way home from College classes at Central Mo. State University in Warrensburg on Hwy. 13. They reported two lights cross in front of their windshield very, very rapidly.
670602	McKeesport	PA	1			BBU			Conflicting data on whether to ID this as meteor.
670602	Philadelphia	PA	1						10:20 p.m. EDT. A man saw a glowing orange disc for 8-10 minutes. The object moved slowly, then suddenly accelerated away. (NICAP report form.)

670605	Selkirk, Manitoba	CAN	1						1:00 p.m. CDT. A Mounted Policeman and a Royal Canadian Air Force squadron leader saw a silvery circular or slightly oblong object flying rapidly to the north with a wobbling motion. The object was “visible for about 15 seconds. (Winnipeg Free Press, Manitoba, 6/29/67, copy in NICAP files; Winnipeg Free Press 6/7/67 with date of sighting indicated as June 6, copy in NICAP files; case reported to the University of Colorado Project).
670606	Pine Grove	PA	1						11:55 p.m. EDT. A woman and her son saw a silvery disc-shaped object that flew two to three times the speed of a jet. (Witness letter to Cook, 7/12/67, NICAP files.)
670609	Pittsburgh	PA	1						9:35 p.m. EDT. Three adults and three children ! saw a fast-flying object with a large white light on top (body lights). The object ; also had lights around the edge like windows, which appeared to revolve. (Letter dated 6/20/67, NICAP files.)
670610	Freeport	TX	1						6:30 a.m. CDT. A man saw four light sources for about an hour that moved fast, stopped, zigzagged, straightened, made right-angle turns and other maneuvers. One object emitted a red flash. (Texas NICAP Subcommittee report, NICAP files.)
670622	Danville	VA	1						9:30 p.m. EDT. A couple saw a central white light surrounded by alternating rows of revolving yellow lights or ports on a dark object. The object tipped 45 degrees, righted, hovered, and reversed direction before disappearing. (Letter dated 6/23/67, NICAP files.).
670624	Austin	TX	1			11815			solid, blue-white, elliptical object fly in response to flashlight
670624	Warrenton	VA	1						11:00 p.m. EDT. Two people saw three small objects and a large object that was white, blue, green, and red colored (multicolored lights). Finally the three smaller objects merged with the larger one and disappeared after about an hour. (Pickrell report, NICAP files.)
670624	Manchester	UK	1						A group of International Sky Scouts in England saw a cigar-shaped object while engaging in a skywatch near London. In Manchester, five unidentified objects were observed making "gyrations and extraordinary maneuvers." (Baltimore Sun 6/26/67, copy in NICAP files.)
670626	Wailuku, Maui	HI	1						8:40 a.m. HDT. A woman and her son saw a double disc (like one plate inverted on top of the other) that hovered and was observed through a 20x telescope. (Witness interviewed by Richard Hall who was visiting in Maui at the time; report in NICAP files.) :
670628	Tehran	Iran	1						8:00 p.m. LT. Reportedly 10,000 people saw a bright round, glowing object three times larger than the full moon. It hovered, sped away, landed, and took off. (Tehran Yomiori, 7/1/67, NICAP files.)
670629	Newington	CT	1						10:50 p.m. EDT. The 18-year-old daughter of an engineering instructor saw a luminous disc for 1 minute as it darted among clouds with abrupt motions. (Letter from witness' father dated 7/6/67, NICAP files.)
670629	Scotch Plain	NJ	1			11831			oyster-shaped object 200 ft wide 25-30 ft thick
670700	Taipei	Taiwan	1						Time not reported. Personnel at Yuanshan Observatory saw a red, cigar-shaped object that flew low and fast to the southwest. (Pacific Stars & Stripes, 7/6/67, copy in NICAP files.)

670703	Saginaw	MI	1						12:05 a.m. EDT. Two people saw a large bright object that emitted four smaller objects, each with an attached ray of light (light beam). At a certain point, these rays of light disappeared, and the four objects sped off in different directions and disappeared after about 3 minutes. (NICAP , report form, 7/18/67.)
670703	Richards-Gebauer AFB (near)	MO	1						9:30 p.m. CDT. At least seven adults saw a highly reflective disc with three bright orange lights on the rim (body lights) approach from the northeast going on a southerly course. (Report submitted to University of Colorado UFO Study, copy in NICAP files.)
670703	Durban	S. Africa	1						Evening. Four people, including a retired U.S. Air Force major with missile tracking experience, saw an egg-shaped, bright orange, glowing light that hovered, moved erratically, and flashed. (Cape Argus 7/5/67, copy in NICAP files.)
670704	Shakhty	Russia	1						9:15 p.m. Docent Y. Krasuntsev and his son were resting near the Don River when they saw a half moon shaped object. They first noticed two luminous points that looked like artificial satellites. (Ref.3)
670706	Palmer Park	MD	1						9:30 p.m. EDT. A 13-year-old girl saw an oval object with pointed ends (ellipse), a dome on top, a red light at each end, and two rapidly blinking white lights in the center (body lights). (Telephone call 7/7/67, notes in NICAP files.)
670715	San Jose	CA	1						2:00 a.m. PDT. Two people saw two bright lights that flew in parallel emitting a sound. (California NICAP Subcommittee report, NICAP files.)
670716	Kudepst	Russia	1						V.N. Chernyavski and his wife, with N. Ognevoy and S. Voronov, were close to the shore when they saw a yellow-rose disk-shaped object moving from west to east in the sky from the direction of the sea. (Ref. 30)
670717	Washington	DC	1						2:00 a.m. EDT. A witness saw a "blob" described as yellow and "rosy gold" (i.e., red-orange) that contracted and expanded in one spot until it disappeared after 10 minutes. (Phone call to NICAP)
670723	Popponessett Beach	MA	1			BBU			(Hynek-CUFOS-Willy Smith files; FUFOR Index)
670729	Olympia	WA	1						9:00 p.m. PDT. A woman saw an oval light, sometimes silver and sometimes red and blue, that descended suddenly, hovered moved laterally, then descended until lost behind the horizon. (Civil Defense report form, 8/28/67, NICAP files.)
670731	Kavkazkiy	Russia	1						9:15 p.m. I. Kosov, his wife and farmer P.I. Marchenko saw a dark red disk flying from the southwest to the northeast. The witness had time to count to forty-two before the object disappeared. (Ref. 3)
670730	Kernville	CA	1			BBU			(McDonald list; FUFOR Index)
670805	Perm	Russia	1						8:50 p.m.Y.G. Solovyev, his wife and his son observed a ring-shaped object flying across the sky. An airliner flying at an altitude of 1,200 feet would have fit inside this ring. It was observed for over ten minutes in the western part of the sky. (Ref. 3)

670808	Kislovodsk	Russia	1						8:40 p.m. An object shaped like a sharply outlined asymmetrical crescent flew over the mountain astronomical station of the Academy of Sciences. The object was slightly smaller than the moon, about twenty minutes of arc, with a color described as reddish by some observers, yellow for others. (Ref.3)
670809	Grey Friars, Stattordshire	UK	1						2:30 AM. A disc-shaped object about the size of a rugby ball was sighted by a married couple in Grey Friars. It flashed blue lights all around its rim, and seemed to be spinning in time with sound coming from it. It caused their dog to begin barking.
670811	Little Rock	AS	1						Orange hovering object chased by Air Force jets. (NUFORC)
670811	Churchtown	PA	1						11:00 p.m. EDT. Two people saw a cigar-shaped object with a row of lights along its length that flashed in sequence (body lights). The object seemed to be as big as an aircraft and maneuvered erratically. (Pennsylvania NICAP Subcommittee report, 9/7/67, NICAP files.)
670812	Barrie, Ontario	CAN	1						9:15 a.m. EDT. A man saw two dark-colored, elongated objects that hovered, started moving, banked, and accelerated, out of sight leaving a red trail. An aircraft passed beneath the objects during the sighting. (NICAP report form.)
670816	El Dorado Hills	CA	1						9:30 p.m. PDT. Two witnesses saw two saucer-shaped objects with flashing red and white body lights. The objects hovered in separate parts of the sky, suddenly accelerated out of sight leaving a "trail of light" on departure. (Sacramento Bee, Calif., 8/18/67, NICAP files.)
670818	Mechanicsburg	PA	1						10:20 p.m. EDT. A woman saw a horizontal row of blinking red and white lights. They appeared to hover, and then moved off and disappeared behind a mountain. A high-pitched hum was heard that diminished as the object moved away. (Pennsylvania NICAP Subcommittee report, 9/7/67, NICAP files.)
670819	Greensboro	NC	1						5:30 a.m. EDT. A man saw a sphere with triangular fin-like projections . The object moved erratically and appeared to "bounce," approaching the witness. At one point it made a U-turn in the space of its own diameter, before eventually moving off. (Witness letter, 8/23/67, NICAP files.)
670828	Rockport	MA	1						7:15 p.m. EST. Three witnesses saw a row of 8-10 revolving white lights and a parallel upper row of yellowish lights (body lights) apparently attached to a curved surface of an object concealed behind the lights. (Fowler, 1974, p. 350.)
670830	Dneprodzerzhinsk	Russia	1						8:50 p.m. A round, bright, uniformly illuminated light yellow disk was seen describing a wide arc in the sky. It disappeared to the north-northeast. There was no sound. (Ref. 3)
670903	Edina	MA	1						5:07 p.m. CDT. A man saw a silver sphere that approached an incoming aircraft on an apparent collision course. The object passed above the aircraft at close range and disappeared in the distance. It appeared to be about one-fourth the size of the plane and traveling twice as fast. (NICAP report form.)

670904	Yevpatoriya	Russia	1						9:17 p.m. N.N. Pronin, senior editor with the "Mysl" publishing house in Moscow, accompanied by his wife, saw a white, crescent-shaped object fly over from the northeast to the southwest along a straight line at an altitude of about 2,500 feet. The object moved with the convex part facing forward. The weather was clear. (Ref. 3)
670905	Nantwich, Cheshire	UK	1						8:55 p.m. LT (4:55 p.m. EDT). Two witnesses saw a brilliant white oval, its light flickering, hovering in the northeast sky. After about 2 minutes, the object began moving, accelerated rapidly and disappeared in the west. No sound was heard. (Stanway and Pace, 1968, p. 14.)
670905	Waterford	CT	1						9:40 p.m. EDT. A man saw a dark, metallic-appearing, cigar-shaped object with a red glow at one end and a white light at the other (body lights). As the object crossed the sky, a bright white light flashed three times amid the red glow. (NICAP report form.)
670908	Newton	NH	1						10:30 p.m. EDT. Four people saw a Saturn-shaped object with two white lights on its leading edge. Pinkish lights were visible along its rim, and a red light on top (body lights). (Massachusetts NICAP Subcommittee report, NICAP files; Fowler, 1974, p. 349.)
670910	Shepherdstown	PA	1						10:35 p.m. EDT. Two men in separate cars stopped and discussed their sighting of a bullet-shaped object with a flashing red light on each end (body lights) and a white glow on the bottom that moved slowly across the sky at low altitude. (Pennsylvania NICAP Subcommittee report, 10/4/67, NICAP files.)
670914	Rockville	MD	1						Unspecified time. A boy saw a bright sphere hovering near the moon. The sphere divided into three parts, two of which accelerated out of sight, and the third lingered, then sped away in a different direction from the first two. (Phone call from witness's father, 9/15/67, NICAP files.)
670914	Barstow	CA	1						7:50 p.m. PDT (10:50 p.m. EDT). A man saw n a green light in the sky that sometimes appeared white. It circled, zig-zagged, moved up and down (maneuvered), and appeared to circle an aircraft. (NICAP report form and letter, NICAP files.)
670915	Winsted	CT	1						7:50 p.m. EDT. Two witnesses saw a red-orange, clam-shell-shaped (disc), fuzzy object move across the sky. The object stopped and hovered, then moved away. (NICAP report form.)
670920	Bucknall, Stoke-On-Trent, Staffordshire	UK	1						8: 30 p.m. LT. At twilight, with a clear sky and bright moon, seven witnesses watched a large, bright silvery oval move slowly overhead, stop, and hover. Two (possibly three) smaller bright round silvery objects emerged and sped off in different directions. (Stanway and Pace, 1968, p. 16.)
670923	Amherst	MA	1						1:37 p.m. EST. A geology professor saw an elongated, silver object and then a second similar object about 5 degrees from the first. (Hall, 2001, p. 161; letter to Raymond E. Fowler, Massachusetts NICAP Subcommittee Chairman, copy in NICAP files; Fowler, 1974, p. 349.)

670923	Mount Holly Springs	PA	1						9:35 p.m. EDT. A policeman saw two lights, one was stationary. The second light moved toward the first, and the two merged. The resultant single light hovered, then divided, with one light moving away and the other remaining motionless. (Pennsylvania NICAP Subcommittee report, NICAP files.)
670924	Minot	ND	1						10:30 p.m. CDT. A podiatrist and his wife saw two disc-shaped objects with domes on top. They first appeared as a string of lights flying at high altitude. (North Dakota NICAP Subcommittee report, received 11 /7/68, NICAP files.) [Minot AFB Minuteman ICBM Complex]
670928	San Mateo	CA	1						3:24 p.m. PDT. Two witnesses saw six silver discs that moved rapidly across the sky, entered clouds, emerged with a 7th disc, then moved off until lost in clouds. (Letter from witness, NICAP files.)
670930	Lakewood	CO	1						9:45 p.m. MST. A couple and their children saw a hat-shaped object (disc with dome), an "antenna" extending from the top that moved steadily in level flight across the sky, hovered, and dropped three fireballs. (Colorado UFO Project report form, NICAP files.)
671002	Rockford	IL	1						Time not reported. A policeman, an FAA specialist, and another man saw an unidentified silver-white, egg-shaped object. (Omaha World Herald, Nebraska, 10/3/67, NICAP files.)
671010	Leek, Staffordshire	UK	1						7:00 p.m. LT (3:00 p.m. EDT). Three witnesses using 7 x 50 binoculars saw a yellowish oval with a small dome on top, a yellow light rotating around the dome. The object also had one red and two green body lights that pulsated off and on. (Stanway and Pace, p. 16.)
671012	Roanoke	VA	1						6:37 p.m. EDT. A man saw a bright, blue-white sphere hovering over a mountain. The object moved laterally when an aircraft approached it (aircraft avoidance), then accelerated and sped away. Witness had seen similar objects before. (NICAP report form.) .
671017	Somerset County	NJ	1						9:20 p.m. EDT. A policeman and another man saw red and green lights in a square pattern that glided, hovered, ascended, then divided into two groups which moved off. A popping sound, like fireworks, was heard during the sighting. (Plainfield Courier-News, N.J., 10/18/67, NICAP files.)
671018	Pyatigorsk	Russia	1						6:00 p.m. Astronomer Z. Kadikov, from Kazan Engelgardt observatory, saw a bright object in the northwest. It was a crescent with sharp edges and pointed horns, yellow in color with a pale bluish tail, moving at about 1.5 degrees per second. (Ref. 3)
671022	Maritimes, Nice	France	1						3:38 p.m. LT. Two witnesses saw a metallic-appearing sphere with a dark central band. The object crossed the sky quickly in a zig-zag pattern. (Report from local investigator, NICAP files.)
671024	Castine	ME	1						6:45 p.m. EDT. A man saw three oval orange lights in step formation which ascended by constantly repositioning the bottom light to the top, the bottom light fading out and then appearing in the top position. This cycle repeated and the formation ascended. (Letter, NICAP files.)
671025	Otradnoy Stanista	Russia	1						4:05 p.m. Witness N. Savrasov, an advanced geography student, and his mother-in-law were able to observe two spherical objects flying from the northwest to the southeast. (Ref. 3)

671026	Wales	UK	1						7:00 a.m. LT. Two men saw two cross-shaped objects hovering in the sky for 20 minutes. (From Hennessey, NICAP report form.)
671026	Middlesex	UK	1						7:10 a.m. LT. Two copoles saw a soft glowing orange ball (sphere) that changed to long star shape (cross shape) which disappeared leaving a black ball with pinpoints of light on each side. (Hennessey report received 12/11/67.)
671027	Hampshire	UK	1						2:20 p.m. LT (10:20 a.m. EDT) A man saw a black, mushroom-shaped object being chased by two aircraft. (Unidentified newspaper clipping and NICAP report form.)
671030	S. Allentown	PA	1						7:10 p.m. EST. A woman and her son saw two luminous globe-shaped objects with red, green, and white body lights, at first moving slowly, then maneuvering rapidly as if in a "dogfight." (NICAP report forms and letter.)
671031	Bournemouth, Southampton	UK	1						8:50 p.m. LT. A man and his family saw two dull red metallic objects shaped like a spinning top or discus. (NICAP report form, received from Hennessey 11/30/67.)
671104	Fort Riley	KS	1						5:00 a.m. CST. Multiple witnesses saw four bright lights that hovered, moved off, changed direction (maneuvered), and went out of sight. An Army unit was dispatched to investigate at the request of local police. (Topeka Capital-Journal, Kans., 11/5/67, NICAP files.)
671105	Alderwood Manor	WA	1						5:35 p.m. PST. A witness saw a bright orange oblong object that passed overhead, maneuvered, hovered, and descended. It produced a humming sound. (Washington State NICAP Subcommittee report, NICAP files.)
671106	Kazan	Russia	1						Night. A luminous red Saturn-shaped object hovered for 7-10 minutes spinning on its axis, then accelerated and sped away. (Vallee, 1992, p. 194.)
671109	Miass (near Chelyabin)	Russia	1						A white cigar-shaped object with some black dashes at one end was seen moving through the sky by I.S. Lunyanov. It was flying toward Zlatoust. (Ref. 3)
671110	Wabash	IN	1						2:00 a.m. EST. A woman heard a sound like a sonic boom and went to the window to investigate. She saw a glimmering, white-green-yellow egg-shaped object hovering in the northwest. (Witness notes and NICAP report form.)
671113	Springfield	OH	1						4:00 a.m. LT. Described as a 30' diameter orange object. When witness shown spotlight on it it changed to a pinkish object and came towards him. (NARA-PBB90-354)
671115	Fort Simpson, NWT	CAN	1						7:11 a.m. PST. A weather observer at a local airport saw a spherical object glowing blue-green that moved across the sky, made a 90-degree turn, slowed down, turned around, and resumed its original flight path. (Letter from witness, NICAP files; U.F.O. Investigator, Vol. IV, No. 4, Jan.-Feb. 1968, p. 3.)
671115	Carlisle	PA	1						8:30 p.m. EST. Two women saw an oblong object which had white glowing lights in front and back (body lights). (Pennsylvania NICAP Subcommittee report and NICAP report form, NICAP files.)

671115	Harrisburg	PA	1						10:00 p.m. EST. Several witnesses saw a shiny metallic-appearing ball with small discs positioned to each side. (Pennsylvania NICAP Subcommittee report, NICAP files.)
671117	Winona	MN	1						5:20 p.m. CST. A man saw a metallic-appearing saucer that had a large canopy (dome) on top and a smaller one underneath. Once it seemed to hover. (Unidentified newspaper clipping, NICAP files.)
671118	Kingston	Jamaica	1						8:00 p.m. LT. Four people saw two red lights (body lights) on an object with a row of windows below. The object circled, approached the witnesses, tilted, circled, and sped off. (Letter, NICAP files.)
671119-20	Burlington County	NJ	1						Bt. 3:30-4:00 a.m. EST. A police officer, who is also a private pilot who has tracked aircraft with NORAD, saw a bright circular object about 50 feet in diameter that traveled under the cloud deck at an estimated 1,000 mph. (Letter, NICAP files.)
671125	Mikhaylovka	Russia	1						Midnight. V. Rogov was listening to the radio inside his home when a bright green light called his attention outside. He saw an object flying at great speed across the sky. (Ref. 3)
671201	Coarsegold	CA	1						Time not reported. A man saw 12 objects displaying green, blue-green, yellow, red, and white lights (body lights). (Phone call, NICAP file memo.)
671203	Wakaw, Saskatchewan	CAN	1						7:45-10:00 p.m. CST. Numerous witnesses in several small towns saw four white or orange objects that appeared and disappeared over a 2-hour period. (Saskatoon UFO Club report, NICAP files.)
671211	Chico	CA	1						Night. Two women saw a hat-shaped object with a rounded top (domed disc), a glowing light in the center of the underside, and a series of blinking white and green lights along the rim (body lights). (Unidentified newspaper clipping, NICAP files.)
671212	Grand Rapids	MI	1						Exact time not given. A woman and four others saw three silvery-white, oblong objects that were flat on the bottom, hat-shaped on top (domed disc). (Unidentified newspaper clipping, NICAP files.)
671213	North Granby	CT	1						5:10 p.m. EST. Three members of a family saw multiple cloud-like rings with dark centers that appeared from behind a storm cloud. Unidentified newspaper clipping, NICAP files.)
671224	Belmont	MA	1						Night. Eight witnesses saw 6-7 lights move across the sky one after the other (procession), spaced 30 seconds apart and each following the same path. (Haines, 1994, p. 44, from UNICAT #302.)
680303	Northeastern and Central United States	various	1						About 9:50 P.M. (CST). Hundreds of people reported fiery objects streaking across the sky, some showering sparks, leaving bright trails. Zond IV Soviet satellite reentry and decay (Sagan and Page, 1972, 155-161).
680306	Amarillo	TX	1			BBU			(McDonald list; FUFOR Index)
68Spring	Aurora	IL	1						Evening. An oval shaped light, red at the front (the direction of travel at the time), yellow in the middle and blue at the back was observed for a few passes, then moved off, silently and quickly to the north without gaining altitude, getting smaller until it was out of sight. (Brian Vike, Director, HBCC UFO Research)

680614	Mendiozaca	Argentina	1						3:00 a.m. Jorge Yaru, 35, saw a strange light outside and a bright object, the size of a bus, 30 m away. It had yellow, green and red lights at the bottom. (Magonia #908; LDLN 95)
680812	Gloucester	MA	1						8:15 p.m. EDT. A golden-white globe surrounded by a dark ring that looked like the planet Saturn flew over Gloucester. (Raymond E. Fowler, case investigation report dated August 15, 1968; Raymond E. Fowler, UFOs: Interplanetary Visitors, p. 354).
680917	Nellis AFB	NV	1			BBU	**NC**		Two military ATCs including supervisor saw nocturnal light and report violent maneuvers
681000	Bt. Boston Bar and Yale, B.C	CAN	1						3:00 a.m.The first sighting took place in the Fraser Canyon between Boston Bar and Yale in an area where the Canyon is quite deep. What they saw was very strange as there seemed to be a fog or mist in the canyon and inside the fog they could make out a luminous, sort of translucent oval light source that was probably several hundred feet long and hovering above the Fraser River. (Brian Vike, Director HBCC UFO Research)
681122-27	SE and NW U.S	various	1						Flurry of sightings primarily in the southeastern and northwestern United States.
69Unknown	Paris	TN	1						Witness was driving back to college with roommate. It was a clear, dark, starry night. They suddenly saw a long streak of light coming down from the top of the windshield. The sparks of light looked similar to holding a piece of metal to a grinding wheel.
690117	Crittendon	VA	1			12607			amber lights, one blinking, in elliptical formation
690403	Southern part	UK	1						7:38 P.M. Bright fireball meteor traveling south-southeast to north-northwest, leaving long trail, sparks.
690618	Apollo 11 Sighting	in space	1						Object apparently not the S4B. Buzz Aldrin recounts encounter. Brad Sparks is convinced this is debris, a piece of mylar covering for the LM, that came off when attitude control rockets blew it off when the controls kept misfiring. Its trajectory and timing and size and shape all fit.
691000	Leary	GA	1						7:15 p.m. Jimmie Carter sighting reported in 1973. Document is hard to read but the sighting was was investigated by the International UFO Bureau, Hayden Hewes. Exact date not known.
700321	Camp Pendleton	CA	1						8:00 p.m. 15-20 minutes While using night vison scopes, Marines witnessed three saucer craft hovering near Camp Pendleton rifle range during night firing exercises. (NUFORC)
700415	Mar del Plata	Argentina	1						Daylight disc photo similar to August 3, 1965, Santa Ana, CA, photos (UFOE II, Section VII).
700900	Jessup	PA	1						9:00 p.m. While walking home from a high school football game, Frank Scassellati (16) observed a glowing white, apparently metallic silvery disc in the southeast sky moving from left to right. Around the dome on top was a row of rectangular windows and three spheres and a flat circle were visible on the underside. (Case documented by Thomas M. Olsen, filed report with several major UFO groups).

710413	Hermissio Sonora (near)	Mexico	1						9:30 p.m. Witness reported an incredible UFO sighting in Mexico while on vacation in Sonora. One night a brillant electric blue UFO flew right by the window of the motel where they were staying. (ufoevidence.org,Unevaluated)
710430	Carlyle	IL	1						11:50 p.m. Herb Williams was filling a truck with diesel fuel at the Ready-Mix Plant at 2090 Washington, on the west side of Carlyle, when he saw the object approximately 100 feet above the ground. (MUFON)
710524	Mendoza	Argentina	1						Saturn-shaped object darted around, rocked back and forth while hovering, rapid acceleration upward at angle (UFOE II, Section VI).
710728	Sackville; New Brunswick	CAN	1						Two men photographing the stars observed a triangular object with colored lights moving rapidly at high altitude. Turning their telescope on it, the men said it suddenly reversed direction and changed both the pattern and color of its lights. (UFO Investigator / Aug. 1971, page 3)
711005	Springfield	IL	1						Evening. Seven reports from Illinois State Troopers over 2 hour period. (UFOI, 71)
711107	Norris City	IL	1						Evening. Former Navy weather observer and wife observed for 9 minutes a bright, slowly-moving "white-orange" light approaching from the East. Object appeared to be about 1500-2000', changed course and disappeared.(UFOI, 71, page 3)
720119	Phoenixville	PA	1						three police officers reported observing a strange object in the shape of a "boomerang" hovering over the High School
720308	Muskegon	MI	1						A large number of witnesses, including police officers, FAA officials, U.S. Coast Guard personnel and numerous other Muskegon citizens observed a brightly colored UFO around 9:15 P.M
720310	Milhousen	IN	1						4:00 a.m. Giant orange glowing boomerang object with no sound, one hour duration
720514	Germantown	IL	1						Three sisters who live on a farm about two miles southwest of Germantown, watched a brilliantly lighted UFO near their home at dusk.
720611	Belleville	IL	1						10:00 p.m. Couple from Millstadt, IL, were driving on 59th St. Lady noticed strange configuration of lights describing a circle. (SL-56, page 7)
720619	George AFB	CA	1						1:00 a.m. Two airman at George AFB, California, verified each other's report of seeing a "bright orange object", that seemed to be 375 feet in diameter as it sank behind a building southwest of their security-police beat at the base. (Skylook 57, page 12).
720703	South Shore	MA	1						7:00 p.m.. More than two dozen witnesses reportedly observed a silvery "triangular-shaped" UFO for almost one hour (7-8 p.m.) before it disappeared behind clouds. (NICAP UFOI, Oct 1972, page 3)
721124	Patoka	IL	1						6:45 p.m. A lady was on her way to Patoka from her home on RR 2, 2 miles SW of the city, when she saw a sudden flash in the sky. First expected to be a "falling star" she then saw it was moving rapidly in a zig-zag fashion from W-E and she slowed her car to watch. (SL-62, Page 11)
730208	Pana	IL	1						Evening. Three boys reported they saw an orange ball coming out of the west

730212	Unknown City	UK	1						Table 1, 116,
730301	Eastern Area	PA	1						A major UFO "wave" apparently hit a three-county area of eastern Pennsylvania. Mostly round and oval lighted objects were reported. On March 20th Bushkill Township Police Chief Harold Kostenbader reportedly observed three objects himself. (Reference: UFO INVESTIGATOR, May 1973, pages 1, 4)
730301	Saylors Lake	PA	1						There were 42 objects with flashing lights observed by multiple witnesses during a three-hour period
730313	Brecksville	OH	1						At 7:30 p.m. a light hovered low over trees making a “throaty sucking sound”
730315	Milton	PA	1						Police reportedly were swamped with calls regarding a "giant ball" which moved quickly across the evening sky from east to west
730324	Piedmont	MO	1						Rapidly moving multi-colored lights, widespread sightings.
730401-08	Los Angeles Basin	CA	1						At least 16 sightings of round or egg-shaped objects (UFOE II, Section VIII).
730415	Bt. Manor & Penn	PA	1						During the late afternoon on the road between Manor and Penn, Pennsylvania twelve witnesses saw a disc-shaped object, between 35-60 feet in diameter
730419	Stoddard County	MO	1						Sheriffs and others on April 10 reported at least three UFOs over Bernie and in Dexter.
730424	Spring Mills	PA	1						three adults observed an oval-shaped fluorescent-white UFO
730511	Piedmont	MO	1						8:10 p.m. Row of seven lights observed for 45 seconds by Harley Rutledge
730517	South Atlantic	At sea	1						Table 1, 116,
730518	North Atlantic	At sea	1						Table 1, 116,
730518	Pekin	IL	1						10:00 p.m. A large "unidentified flying object with an orange glow" was spotted
730519	Unknown City	Turkey	1						Table 1, 116,
730520	Unknown City	UK	1						Table 1, 116,
730524	Farmington	MO	1						Evening. Noiseless, winglike object of unidentified nature observed by four members of Project Identification team.
730602	Divernon	IL	1						2:15 to 2:30 a.m. The UFO had a series of bright running lights then a large orange-red light was turned on beneath the UFO which lit up the entire landscape.
730614	Princton	IL	1						UFOs were sighted by three young girls had seen a silver, gray and black flying object emitting a green mellow light.
730619	Cape Girardeau	MO	1						7:12 p.m. Dull gray, bullet-shaped object observed for several seconds by Harley Rutledge of Project Identification
730620	Fort Wayne	IN	1						10:30 p.m. One resident reported seeing a large hovering aerial object described as round or pear-shaped with four or five red lights on top and bottom and a large white light atop.
730623	Piedmont	MO	1						10:30 p.m. From a cabin on the Rothwell Ranch, two men watched as a bright light that had a ring around it rose from low on the ESE horizon, moved up-down, then left-right
730629	Bayview	ID	1						Thirteen UFOs, which appeared as "steady white lights," were reported

730706	Fairfield	IL	1						Four boys (ages 14-18) saw an illuminated object shaped like a "flat football" near Fairfield Airport about 10 p.m.
730800	Elizabethtown	KY	1						A newsclipping mentioned that a 16-year-old boy had seen a UFO "shaped like a trapazoid, only rounded off on the bottom"
730804	Greenup	IL	1						The fast moving object was rectangular "and had the shape of a large boxcar," Sedgwick said. He described it as being "all the same color, a pale color."
730804	Greenup	IL	1						Evening. Man saw the object across the top of a farm house owned by Walter Gabel. "It was as big as a house,
730804	Greenup	IL	1						Patty Markwell, 13, was in her mother's car on the way to the Tastee Freeze when she saw the object. "I just saw the end of it over the trees," she said* "It was real bright, it looked like light bulbs.
730830	Southern	GA	1						Midnight. Reports of unidentified flashing lights The objects changed colors as they moved through the night, flashing blue, yellow, and green."
730902	Big Bear Lake	CA	1						11:00 p.m. Residents reported a series of sightings at night of unidentified objects with flashing lights.
730911	El Ferrol del Caudillo	Spain	1						"Bright, circular, with two hoops, appeared to have feet on bottom part. Emitted a very powerful light."
730912	Long Barn	CA	1						Two motorists in the early morning observed a “silverish-yellowish orange disc” hovering silently over a canyon
730913	Gravatay	Brazil	1						While driving toward Ijui about 1:30 a.m., a group of motorists saw a luminous yellow egg-shaped object approach their car and begin pacing them to the left side apparently 2-3 km away.
730923	Ft. Wayne	IN	1						7:20 p.m. Witness waiting to turn into Glenbrook Shooping Center. Observed huge object shaped like an ocean liner with rounded back and flat bottom and top.
730924	Ft. Wayne	IN	1						Evening. Two patrolmen saw an unidentified light while checking on a report from a woman from Churubosco. Object moved slowly.
730929	Quincy	IL	1						8:30 p.m. Sheriff's officers trailed an unidentified flying object {UFO) from the edge of Quincy to Baldwin Field before it disappeared .
730929	Hollywood	FL	1						A woman observed an object for 3 to 4 minutes which appeared to be solid, oval shaped with slightly obtuse-angled ends and glowing with a red-orange color, brighter at the edge than in the center.
731000	between Columbus and Mansfield	OH	1						While driving after midnight, a man saw a light flashing to his left, then right, then in front. It gained speed and disappeared ahead of his car.
731001	Blyton	TN	1						6:00 p.m. A lady and her son observed a large domed disc came out of the north, heading south.
731003	Polo	IL	1						Evening. Police officer saw object over Mt. Morris that appeared to project its orange glow in a beam toward the ground and moved with occasional stops.
731005	Laurel	IN	1						6:16 p.m. No sound/3 mins. House sized object seen through binoculars.
731005	Connersville	IN	1						7:17 p.m. Buzzing sound heard by some. Police received about 100 calls. Approx 1.5 hours. Unseen shape with red and white lights. A few saw circular shape.

731005	Waterloo	IN	1						8:15 p.m. 3 Hours 45 Mins. Object sat in eastern sky from 8:15 to nearly midnight, when it finally diminshed into a light point. Mushroon shaped with flat bottom. Red flashing light on top.
731007	Middleton	OH	1						10:00 pm.Cigar shaped object with disks. No sound.
731011	Montgomery County	OH	1						Dawn. About fifty motorists pulled off the expressway to watch two plate-like objects.
731013	Hollywood	FL	1						8:30 p.m. A former naval pilot, his wife and two children spotted a "flying saucer like" object.
731014	West Central	OH	1						About 80 reports of UFOs (discs with red and green lights, elliptical objects) by citizens and police.
731014	Greenfield	IN	1						Three men in their late teens observed a very bright round object having sequentially flashing white lights on the periphery and steady red and white lights
731015	Morgantown	WV	1						Numerous witnesses at Raleigh County Airport reported a UFO with red, green, and white lights.
731015	Connersville	IN	1						4:30 p.m. No sound, three witnesses, 45 seconds. Appeared six blocks from witnesses home. Silver colored oval dome on top with three green doors.
731016	London	OH	1						School bus driver saw a glowing yellow-orange oblong object moving west to east.
731016	Chillicothe	OH	1						Motorist buzzed by three luminous objects; one with blinding green light followed her home.
731016	Burbank	CA	1						Two children, ages 2 and 4, reported a UFO with a pointed dome and rays emanating from the bottom.
731017	Princeton	IN	1						4:40 p.m. Two young boys spotted a strange object just before dark. Described as silver and looking like a "fish"
731017	Connersville	IN	1						8:00 p.m. An 11-year-old girl and her cousin heard a humming sound and The object was saucer-shaped, silver gray on top,with bright lights along the bottom.
731017	Clinton	IL	1						Police and citizens saw as many as eight yellow-orange, highly maneuverable objects. (UFOE II, Section VIII)
731017	Crowley	LA	1						Offshore oil platform crew saw oblong object with several colored lights hovering about 1,000 feet overhead emitting a whining sound.
731017	Powhatan	LA	1						At least 10 reports from central Louisiana. Pulsating luminous object changing colors seen near woods
731017	Pikesville	MD	1						A woman was awakened by a sound like an explosion. She heard a loud humming, walked out onto the front porch ana saw a red, transparent oblong object,
731018	Ft. Knox	KY	1						7:15 a.m. Sergeant First Class Ralph E. Green caught sight of this extreme burst of light twirling in the air. It had a bright red light on top and a bright red light on bottom.
731018	Galion	OH	1						local network of a Ham radio group talking with a Technical Sergeant in the Air Force, said, "There's something strange. First of all, it's a strange light.
731018	Shelby	OH	1						9:00 p.m. (+-) Now it so happens that Mr. Eldon Heck sent his wife out in the yard to scan the skies while he was on the air. She came back to report that she was sighting something strange over the Shelby area.

731018	Mansfield (area)	OH	1						9:00 p.m. (+-) Then we have a report from Gordon Sponseller who was also in the Air National Guard, and he reported while on the air, "There is a strange object.
731019	Campbellsville	KY	1						9:30 p.m. Two men followed an object that looked about the size of a B-52, then lost sight of it behind a cluster of trees
731022	Upton	IN	1						6:50 p.m. A man was farming and noticed an object which looked like it was going to land. No sound was heard.
731022	Mauni	IL	1						Unconfirmed date & insufficient data report of an object seen flying over a train.
731024	Mt. Airy	NC	1						Rash of UFO sightings by citizens and police. Round, red-orange objects, rapid flight, erratic maneuvers. (UFOE II, Section V)
731024	Fayette County	IN	1						No sound,15 secs. Dark object with blue and red lights and one intense white light which blinded him.
731101	Bufkin	IN	1						10:40 p.m. Blue and green object with humming noise observed near Mt. Vernon for 10 minutes.
731102	Mt. Vernon	IN	1						10:40 p.m. The witness was a 23-year-old warehouseman at Mt. Vernon Milling Co. and reported a wedge-shaped object.
731102	Mt. Vernon	IN	1						10:37 p.m. Cop observed an OBOL (Orange Ball of Light) which reacted to light.
731107	Chesapeake	VA	1						Disc-shaped object surrounded by bright green halo, red light emitted from underside. (UFOE II, VIII)
731108	Blythe	CA	1						Motorist observed circular object with red, green, and amber lights moving up and down, side to side. (UFOE II, Section VIII)
731112	Toronto	CAN	1						No Details
731211	Malaga	Spain	1						"Circular, like a flying saucer, had an intense red light." Hovered for about 15 minutes
731213	Ellwood City	PA	1						On a crisp, clear night a couple reported seeing a frightening object as they were about to get in their car. The UFO was described as a red light in the sky.
740213	Barrington	NH	1						A student from the University of New Hampshire reported observing a cigar-shaped object that appeared to have brilliant white lights on both sides. The witness further described the UFO as having an elongated dome on the top (Reference: UFO INVESTIGATOR, April 1974, page 4)
740217	Stuart	FL	1						An unidentified flying object was reported to have landed on Fifth and Jackson Streets. The witness immediately called the local newspaper to report the sighting. The newspaper man then noticed a brilliant object only about 5,000 feet off the ground. It blinked on and off like a light bulb. (Reference: UFO INVESTIGATOR, May 1974, page 2)
740528	Albuquerque	NM	1						A resident was awakened to see a large glowing object moving across the western face of the Sandia Mountains. It was so bright that no discernable structure could be seen. (Reference: UFO INVESTIGATOR, July 1974, page 3)
741006	Mt. Vernon	IN	1						8:20 p.m. SKYWATCH patrol "Money Man" radioed "Sky King" (Fran Ridge) and "Sailor" about a "bogey" crossing the Ohio River S-N with same description as nights previous. (UFOFC, Fran Ridge files)

741010	Owensboro	KY	1						Daytime. Two 9-year-old girls playing on the bank of the Ohio River near the Mid-South Mobile Home Park reported spotting an unidentified flying object on the south side of the river. The girls said the object, about the size of a small automobile, was shaped like a saucer with a handleless cup atop it. (Newsclipping, Messenger & Inquirer, Owensboro, KY)
750102	Baltimore	MD	1						7:35 p.m., John Goode and his wife Margy were driving in their car on the Baltimore Beltway near Route 83 when they saw four bright white lights to the west of Route 83. The lights were traveling in a glide-like motion that Mr. Goode described as "like a gliding ladder." (Reference: UFO INVESTIGATOR, February 1975, pages 1-2)
750103	Cape Girardeau	MO	1						8:30 p.m. Dr. Harley Rutledge logged this report in his book. He and his wife saw an object emerge from behind trees, left to right. Described as semi-convex, self illuminated with dim yellow light on top. 3 secs. (PID,195)
750217	Roundup	MT	1						The Wheatland County Sheriff's office was contacted by radio about 9:00 p.m. Sunday, February 17th by a Highway Patrol radio station who reported that three deputies in Roundup had spotted three UFOs on the horizon heading towards Harlowton. (Harlowton Times newspaper)
750309	Belt	MT	1						Time unknown. Egg-shaped object, bluish lights beaming. (NIDS UFO 89)
750620	Genova	Italy	1						A luminous globe, described also like a large incandescent ball, was seen to fall into the sea some miles off the coast of the port of Genova, Italy. (Source: Marco Bianchini, USOCAT by Italian Center for UFO Studies (CISU), citing Liberta, June 22, 1975 and La Stampa, June 21, 1975).
750706	Wilkes Barre (near)	PA	1						Daytime. A disc made a turn and entered the base of a thunderhead cloud, thirty miles north-northwest of Wilkes Barre. (Sources: NICAP UFO Investigator, October 1975; Richard Hall, The UFO Evidence, Volume II: A Thirty-Year Report, pp. 122 & 264).
750714	Washburn	ND	1						12:30 a.m. A college adminstrator and his wife sighted two unknown objects. The objects were highly-illuminated in white light which pulsed intermittently in an irregular pattern. (Reference: UFO INVESTIGATOR, October 1975, page 3)
750720	Bay Village	OH	1						10:00 p.m. On this cloudy evening an enormous disc-shaped object shot huge beams of energy at four witnesses. It was estimated to be at an altitude of one thousand feet and made no sound. It also reportedly had legs or landing gear. (Sources: Center for UFO Studies case files, report dated August 5, 1975; FSR, April 1976, p. 24).
750815	Vaughn	MT	1						9:32 p.m. UFO with white and red beams. (NIDS UFO 1)
751003	Quincy	MA	1						On this night a large mass of white light, with smaller blue lights inside, hung stationary over Quincy. (Source: CUFOS News Bulletin, February 1976, p. 7).

751004	Ramsey	NJ	1						2:55 a.m. Two police officers, Francis J. Gross and C. Ragazzo were on routine patrol when officer Ragazzo received a radio call from Gross informing him of five "strange looking" lights in the south-west sky. Both officers were able to observe the objects for a period of five minutes. (Reference: UFO INVESTIGATOR. December 1975, page 1)
751016	Davis	CA	1						8:20 p.m. Seven witnesses including the main witness named Landeros sighted two UFOs maneuvering in the sky. The first object was triangular in shape with white and yellow lights. (Source: CUFOS News Bulletin, February 1976, p. 9).
751020	Priest Butte	MT	1						4:30 p.m. A couple living on a ranch near Priest Butte, Montana, reported that they had seen a UFO about half a mile from their home, on the east slope of Priest Butte. Using binoculars, they described it as being egg-shaped, with the large end of the craft on the ground. (Reference: Lawrence Fawcett and Barry J. Greenwood, Clear Intent, page 34)
751030	Ford Creek at Augusta	MT	1						12:00 a.m. Football shaped UFO. (NIDS UFO 42)
751111	Sudbury, Ontario	CAN	1						3:00 a.m. EST. Six nurses at the Pioneer Manor Sudbury, observed a very bright object over the Sudbury Stadium. The object seemed to hover at first and then suddenly shot into the sky. It was still visible when the Sudbury Regional Police arrived at 4:55 a.m. (National Research Council of Canada Record Group 77, Vol. 308, reel number 1742)
751111	Sudbury, Ontario (near)	CAN	1						5:00 a.m. EST. Constables Keables and Whiteside, Sudbury Regional Police, observed a cylindrical-shaped object with shafts of light bright enough to light up clouds in immediate area. (National Research Council of Canada, Record Group 77, Vol. 308, reel number 1742)
751111	Sudbury, Ontario	CAN	1						4:55 a.m. EST. Sudbury Regional Police constables came on a follow up call by six nurses at the Pioneer Manor to check on a reported UFO. The constables observed four objects clearly in the sky. (National Research Council of Canada Record Group 77, Vol. 308, reel number 1742)
751111	Beltsville	MD	1						Lawrence Albert sighted a solid, spherical, evenly distributed green light. The object was much brighter than the sky background and was sharply outlined. The witness stated the apparent size of the object was that of a quarter held at arm's length. The speed of the object was twice that of a jet plane. (Reference: UFO INVESTIGATOR, January 1976, page 1)
751113	midwestern and southern	USA	1						On this night in 1975 a number of multi-colored nocturnal lights were reported in the midwestern and southern United States. Sparkling white, red, and yellow lights flew in formation erratically in Whitewater, Wisconsin. Red, green, and white lights were sighted in Eau Claire, Wisconsin, moving up-and-down and diagonally. In Fort Atkinson, Wisconsin bright white lights that dimmed, disappeared, and then re-appeared were sighted. In Mobile, Alabama a UFO, changing colors, moved across the horizon. A round silver object was seen moving slowly in the northwest sky in Orlando, Florida. It suddenly disappeared. (Source: CUFOS News Bulletin, February 1976, p. 13.)

751114	Falconbridge AFS, Ontario	CAN	1						9:02 p.m. EST (event time). Message of Nov. 15: "0533z (12:33 a.m. EST)...UFO report from Falconbridge, occurrence time 0202z. Report sent to NCOC Surveillance, referred to Assistant Command Director Space Defense Center, and Intelligence. These three individuals considered the report a UFO report and not an unknown track report."
751115	Sudbury, Ontario	CAN	1						6:30 a.m. EST. Lyman Paquette, his wife, plus his brother and sister in law observed one bright white object that looked like a cup in a bowl due east at 70 degrees elevation. Witnesses using binoculars observed the object climb quite high and can hardly now be seen without the aid of binoculars. The object was observed for 20 minutes. (National Research Council of Canada, Record Group 77, Vol. 308, reel number 1742 N75/182)
751115	Falconbridge AFS, Ontario	CAN	1						7:42 a.m. UFO 23rd NORAD REGION. From Falconbridge Radar Site a civilian, Oliver Kizioja, Sudbury, Ontario, at 0615 was standing in back yard facing south. Observed one bright yellow object moving up and back, leaving a tail. It was very high but did not change position in regard to other stars. He watched for 15 minutes, then called radar site. Not observed on radar.
751115	Falconbridge AFS, Ontario	CAN	1						11:30 a.m. event. 12:29 p.m. 23rd NORAD REGION. From Falconbridge. At 1130, Lyman Paqutte, married student, residence Laurentian Univ., Sudbury, Ontario. Reported he had been looking due east, sky partly cloudy, saw one bright white object about 70° elevation, high out of range of binoculars. It climbed high out of range of binoculars. Observed for 20 minutes and witnessed by his wife, brother-in-law and sister-in-law. Negative radar contact.
751116	Curiel, Valladolid	Spain	1						Red ellipse hovering 1-1.5 km. away; suddenly flew away. Flying Saucer Review, Vol. 22, No. 6; see Rodeghier, 1981, p. 66 (E) car
751116	Manitoulin Island, Ontario	CAN	1						9:30 p.m. EST. 17 November 1975 1705 23rd NORAD region; UFO reported 0230z from a Mr. John Dunlops. Two objects, oval shaped with two yellow flashing lights, moving north to south, then became stationary, observed for 10 minutes, one above the other, sky was cloudy.
751117	Falconbridge AFS, Ontario	CAN	1						24 NORAD Region UFO at 132345z Large orange ball with 2 red lights stationary; Azimuth 045° from River Court, Ontario. No radar contact.
751118	Kevin/Dunkirk area	MT	1						4:31 a.m. UFO. RAPCON notified. (NIDS UFO 20)
751118	Strathclair, Manitoba	CAN	1						At 6:30 a.m. Reginald Jack Langstaff while traveling in a vehicle observed a bright orange to red object with a curved dome shaped top and the sides were sloped 70 to 80 degrees. (Reference: Royal Canadian Mounted Police report, November 26, 1975. Shoal Lake Detachment RCMP File References: 75-700-126, National Research Council of Canada Record Group 77, Vol. 308, reel number 1742)
751204	Sturgeon Falls, Ontario	CAN	1						11:05 p.m. Wayne Major, reporter for the North Bay Nugget, observed two quiet triangular shaped objects moving SE. The North Bay Tower advised one light aircraft in the area who reported sighting something else in the area. Possibility of pictures.

751205	Clarkston	GA	1						Evening. An object that looked like a Ferris wheel on its side was sighted on this night. It had yellow and amber colored lights spinning around it as the object moved forward. (Source: CUFOS News Bulletin, February 1976, pp. 11 & 14).
751205	Montville	NJ	1						Evening. A flying object with two large clear lights in front, and a red light in the rear was encountered this evening. A string of lights connected the three large lights and would change colors from red to green to brown to yellow. The UFO moved erratically, in rapid short spurts (Source: CUFOS News Bulletin, February 1976, pp. 11 & 14).
751209	Freeze Out Lake	MT	1						5:00 p.m. UFO flying near B-52. (NIDS UFO 35)
751218	Ancy	France	1						7:45 a.m. A "dah-dit" noise accompanied the slow ascent of an eight-meter wide, gray domed disc over a residential area. The object had square shaped windows. It flew away toward the southeast. (Source: Lumieres dans la Nuit, May 1976).
760101	Marle	France	1						1:00 a.m. Three witnesses watched a 15-meter long football-shaped object hover 800 meters above a road then shot straight up in the sky fast. (Source: Lumieres dans la Nuit, January 1979).
760108	Shale Plant on "Bootlegger"	MT	1						5:30 p.m. Several saucer shape (UFO 51 NIDS)
760208	Manchester	MT	1						5:30 p.m. Two domed objects, white and blue. (UFO 70 NIDS)
760218	Rancho Cordova	CA	1						6:45 p.m. PST 8-10 discs were sighted flying in a V formation over Rancho Cordova, California. The objects were 3 to 6 meters in diameter, gray in color, and made no sound. Afterwards the witness saw ten aircraft circling that portion of the sky. (Source: CUFOS investigation file, report dated March 1, 1976).
760219	Chesapeake Bay	MD	1						About 8:10 p.m. "...went on deck for another check and saw two balls of light moving very rapidly toward the eastern shore ..., altitude approximately 2000 feet heading due east. (Letter to CUFOS from Warren Ballard, Mar. 4, 1981, from ship's log.)
760219	Marysville	CA	1						7:00 p.m. Sutter County sheriff's office received a call reporting a UFO being observed by two witnesses. Deputy Gerald Teplansky was dispatched to the scene and was able to observe the objects for about five minutes. (Reference: UFO INVESTIGATOR, July 1976, page 3)
760219	Lake Hiawatha	NJ	1						9:15 p.m. Numerous witnesses reported a strange object to the Parsipany Police Department. The object was a large rectangularly shaped object seen hovering in the vicinity of Jersey City Reservoir. (Reference: UFO INVESTIGATOR, April 1976, page 1)
760220	Essex County	MA	1						7:00 p.m. A young man and woman saw some odd red lights in the sky in Essex County, Massachusetts. Then two flattened disc-shaped objects with three triangular lights descended close to their car and maneuvered nearby for about 10 minutes. (Source: Mark Rodeghier, UFO Reports Involving Vehicle Interference, case 394, citing MUFON case file).
760226	Long Island	NY	1						6:15 P.M. Mrs. Audrey Manny observed a large dome shaped object hovering to the south of her home. After about three minutes it started moving toward her at a rapid rate of speed. (Reference: UFO INVESTIGATOR, April 1976, page 3)

760315	NW	MD	1						9:20 p.m. The sighting lasted until 1:30 a.m. on March 16. The first observer happened to have a citizens band radio and began communications with other people regarding the light that was displaying unusual movements in the clear night sky. Reference: UFO INVESTIGATOR, April 1976, pages 3-4)
760326	Great Falls (10 mi. S of)	MT	1						9:15 p.m. UFO described as a light that zig-zagged in the sky. (UFO 78 NIDS)
760327	Mt. Vernon	IN	1						5:95 p.m. Distant cylindrical object described as a jumbo jet with no wings observed for 25 seconds moving SE to NW and climbing at a high rate of speed. No sound. (Ridge files, UFO Filter Center)
760405	Great Falls	MT	1						7:10 p.m. Cylindrical object, aluminum colored. (UFO 80 NIDS)
760413	Alliance	OH	1						C1, no details. (EGBA,685)
760509	Braine-le-Comte	Belgium	1						10:30 p.m. A 22-year-old couple saw a rectangular object in the northwestern part of the sky. In the middle portion of the object protruded something like a funnel. It flew off to the north, describing a large circle in the sky as it did so. (Source: Rudy de Groote, UFO Register (Volume 7), 1977, p. 32, citing the Gazzette Antwerpen).
760730	Fort Ritchie	MD	1						0345 EDT. NMCC in Washington, DC put out this memo at 0545 EDT: 1. At approximately 0345 EDT, the ANMCC called to indicate they had received several reports of UFO's in the vicinity of Fort Richie. The following events summarize the reports (times are approximate) 0130 - Civilians reported a UFO sighting near Mt. Airy Md. (Actual FOIA document)
760901	Missile M-1	MT	1						12:38 a.m. UFO described as two red lights on top, silver bottom. (UFO 105 NIDS)
760905	Cape Girardeau	MO	1						10:30 a.m. A fast-moving disc with dome was observed, vertical ascent. One witness. (Rutledge, PID,200)
760908	India 3 and India site	MT	1						10:03 p.m. White, triangular object with red lights. (UFO 107 NIDS)
761021	Stockholm	Sweden	1						5:40 p.m. Several witnesses saw a glowing red circular object moving slowly south at an estimated 1500 meters altitude. Two rows of square windows were visible along the perimeter, and a white light beam shone upwards from the object. (Bertil Soderquist, MUFON representative in Sweden.)
77Jan-May	Various Cities	UK	1						Miniwave of UFO sightings, including round and triangular objects (NICAP UFOE II, Section VIII).
770101	Creysseilles	France	1						1:30 AM. A pink glowing sphere hovered in the sky for six minutes, then flew away to the east toward the Mezayon Valley.
770207	Newcastle-under-Lyme	UK	1						12:30 PM. School students from a school saw a gray flattened cigar-shaped object moving slowly through the sky, surrounded by a vapor or mist. It changed color to orange, then to green, and flew off toward the east-southeast. The sighting lasted 10 minutes. (Sources: Northern Network files, case report dated March 1, 1977; Awareness, July 1977, p. 20).

770405	Deerfield	IL	1						2:17 PM. 1-1.5 mins. Pilot driving on I-94 northbound on a cold, cloudy day (overcast at 5,000') saw object coming toward him (southbound) first in distance then directly above him later on. Described as a silver mushroom three times the apparent size of the moon, moved silently toward Chicago against the wind. (IUR,2,5)
770508	Joliet	IL	1						2:00 PM. Adult couple driving westbound watched as a silver "straw hat" the size of the moon rush eastbound over I-80 (and their car) making no noise. Object, which was in view 30-seconds, was flying against the wind. (IUR,2,6)
770508	Joliet	IL	1						2:30 PM. Adult couple experienced object like a silver sphere with "saturn ring" or halo around it, heading eastbound. 30-secs. (IUR,2,6)
770509	Harding Township	NJ	1						9:30 PM. Mrs.Nancy Allocco and her two children, Lee, age twelve and Nell, age fourteen, observed a large glowing object in the sky. (Reference: UFO INVESTIGATOR, July 1977, page 1)
770509	Harding Township	NJ	1						9:30 PM. Leslie Hendricks while walking out of the Livingston Shopping Mall observed a large glowing sphere high up in the southwestern sky. The sphere was about the size and color of a harvest moon. (Reference: UFO INVESTIGATOR, July 1977, page 1)
770517	Lothian	Scotland	1						9:00 PM In Tranent and seven surrounding towns in Lothian, a domed disc-shaped object and other objects were seen in the skies on a clear evening. (Source: FSR, November 1978, pp. 30-31).
770517	Belem do Para, Para State (near)	Brazil	1						9:30 PM. In the village of Icoaraci, two fiery balls of light were seen in the sky. One was green, and the other was red, and they came from opposite directions and collided causing a tremendous flash and a sound like thunder. (Source: Otto Raymundo, MUFON UFO Journal, July 1977, p. 8).
770704	Arlington	VA	1						Prior to a fireworks display, a retired USAF Colonel, his wife and another couple observed two starlike objects for thirty minutes. Both objects moved at random speeds. (Reference: UFO INVESTIGATOR, December 1977, page 4)
770712	Mt. Vernon	IL	1						2:10 AM. Our local police dispatcher reported to the UFO Filter Center at Mt. Vernon, INDIANA, that multiple witnesses were reporting unusual lights to police at Mt. Vernon, ILLINOIS, which is 60 miles to the NW. (UFOFC, Ridge files)
770712	Mayfield	KY	1						2:10 AM. Police radios were reporting unusual lights being observed at Mayfield, KENTUCKY, which is 85 miles SW of the UFOFC at Mt. Vernon, INDIANA. (UFO Filter Center, Ridge files)
770724	Henderson	KY	1						8:40 PM. Report not phoned in to UFO Filter Center but came over police scanner (KNI Net) at UFOFC. Report of an "aircraft going down" prompted law enforcement officials to look for a crash. None found. (UFOFC, Ridge files)
770811	South Brunswick	NJ	1						A silent disc-shaped object came over the horizon and was seen by five witnesses, including police. There was something that looked like a "radar mast" on the object that was rotating.
771003	Flemingsburg	KY	1						Dayt. Daylight disc, one witness. (EGBA,506)

771013	Champaign	IL	1						3:55 PM. Retired ploice officer, ex-pilot, watched, along with other young men, a "star" in clear daylight rush from SSE to NNE, passing E of overhead in straight path w/o sound or trail. (IUR NF, 10/31/77)
771014	Toledo	OH	1						Dayt. daylight disc. (EGBA,721)
771113	Columbia	KY	1						Daylight disc. (EGBA,504)
771215	Saint Ciers du Taillon	France	1						A domed disc illuminated the area of Saint Ciers du Taillon like day, then flew away. It came back again the same site 20 minutes later. That same night a blindingly bright light came up close to a French Navy Nord-262 transport plane with three crew members aboard and followed it, circling it for five minutes.
780124	Leicester and Hinckley (btn)	UK	1						At least 17 people saw a delta-shaped object that flew low overhead, making no noise. It had steady red, blue, and yellow lights and as it headed south from Leicester it was seen by 12 more witnesses in Hinckley.
780300	Many Locations	MN	1						Widespread UFO sightings, including formations and disc-shaped objects with windows (section VIII).
780310	Toledo	OH	1						7:30 PM (IUR,3,12)
780310	Sylva	NC	1						A round object with glowing blue and red lights was seen by several witnesses. It made a humming sound, gave off beeps and flew in circles at a low altitude
780718	Lurate Caccivio	Italy	1						A red-orange object hovered over Lurate Caccivio, Italy. It resumed revolving and emitted a hissing sound as it departed
780820	Toledo	OH	1						A 64-year old security guard was on patrol in downtown Toledo looking at a "large plane" approaching from the north against a clear, pre-sunset sky. As it passed overhead at a uniform speed, about 1500-2000 feet up, it could be resolved that it was actually a cigar shape.
780821	Indianapolis	IN	1						A 33-year old housewife, in the company of her 8- and 10-year old children, watched a silver "frisbee" from their front porch. Standing outdoors, looking up at the clear sky, they saw the saucer in the SE, much larger than a full moon would look (at night)
780822	Moscow	PA	1						Four rnen were driving in a car pool to work watched a small circular, vague "cloud" descend suddenly in the South. As they watched the cloud before them while driving at expressway speeds, they watched it change to a bright silver and hover, though rocking from side to side. It now looked solid and metallic.
780829	Guemes, Cordoba province	Argentina	1						An ovoid object with reddish flashes moved at a low altitude in the proximity of the local observatory. Residents discarded the notion that it was a plane.
780917	Maatsuyker Island, Tasmania	AU	1						At the Maatsuyker Island Lighthouse an electrical power failed twice when a big glowing light flew by south of the island. It was seen by four men at the lighthouse
780923	Rosario	Argentina	1						That morning a florist in the city of Rosario saw a reddish-orange lighted sphere make several 90-degree turns impossible for any conventional aircraft.
781003	Bogota	Columbia	1						Thousands of witnesses saw two UFOs in an unusually clear sky. One was shaped like a "croissant" and the other was cylinder-shaped. Both gave off an intense luminosity.

781023	Kansu Province	China	1						At an open-air motion picture film showing, several Chinese Air Force pilots sighted a large, bright rectangular object at an estimated 21,000-foot altitude. They watched it for two to three minutes. They said it carried intensely bright lights.
781215	Ragusa	Italy	1						A truck driver suddenly experienced radio interference and stopped to fix it. He then saw two very tall humanoids standing only five meters away. Seconds later the witness saw a dome-shaped craft take off with a bright flash.
781216	Caracas	Venezuela	1						Early morning, predawn hours five UFOs emitted different colors, made a semi-circular turn, and then hovered over a mountain for several minutes before finally shooting away.
781216	Las Vegas	NV	1						At McCarran Airport a married couple and a child saw a disc-shaped object with glowing white lights. An airline pilot flying in the vicinity also reported that a UFO streaked by his airliner although the UFO did not appear on radar.
781219	Montebello di Bertona	Italy	1						A single witness reported that a UFO shaped like a cylindrical space capsule landed and then lifted off again. It had rotating lights.
781220	Sorrento	Italy	1						Three people on the balcony of their house south of the city watched a huge sphere low in the sky over the shoreline of the Mediterranean.
781221	Resistencia	Argentina	1						Shortly after two o'clock in the morning several witnesses saw 6-7 objects moving in formation through the sky at great speed. Power outages were reported throughout the city.
781221	Santa Fe	Argentina	1						A giant light was observed in the western sky. It was blue and green in color, and spewed fiery particles, resembling an airplane on fire.
781221	La Rioja	Argentina	1						At 2:45 a.m. a very large glowing disc-shaped UFO headed a formation of three other craft that flew from north to south at an estimated 1000 meters altitude. They reportedly lit up the sky like day. Each object was white in color with a green halo, and they left behind a bluish trail. A truck driver said his trucks radio stopped working at the time.
781225	San Martin department	Peru	1						A fleet of six UFOs was seen by Peruvian fishermen over the Caynarachi River
781225	San Bernardino County	CA	1						Two huge UFOs came screaming over Lake Arrowhead
781225	Cicagna, Liguria	Italy	1						A three-meter long, oddly shaped UFO was seen at a low altitude over Cicagna, Liguria, Italy. It had what looked like iron claws on one end of the object.
781228	Hemel Hempstead	UK	1						A round orange object with six lights underneath and the size of a double decker bus, and emitted a zooming sound
781228	Santa Tecla	Italy	1						a dark disc shaped object rose from the sea surface and flew to the west. Rays of light beamed down from the object, and several metallic satellite objects jumped around it.
781231	Bayford	UK	1						Mr. and Mrs. Mason sighted a cigar-shaped object at 7:00 p.m. moving silently through the sky from the west to the east
781231	Carlisle, Cumbria	UK	1						7:00 PM. A silver triangle crossed the sky from west to east.
781231	Edinborough	Scotland	1						7:02 PM. A triangle with a grayish hue crossed the sky from west to east.
781231	Hull	UK	1						7:05 PM. A huge triangle was seen flying in the same direction.

781231	Zermatt	Switzerland	1						Two people witnessed a luminous round object over the alpine glacier, brightly illuminating the ice. Later that night, at 2:30 a.m. the next morning (Jan 1, 1979), a big electrical power outage occurred in the city.
790116	City of David	Panama	1						Two women teachers, Ms. Griselda and Ms. Gonzalez, sighted an oval-shaped UFO while walking home from night school. The UFO was spinning and gave off orange and blue lights.
790209	Baleares Islands (near)	Mediterranean Sea	1						Over 50 UFOs surrounded the butane freighter "Tamames" in the Mediterranean Sea as it approached the Escombreras refinery in the Baleares Islands. The radar of a second ship also reported the presence of the UFOs, but not ground radar.
790218	Lardit, Aveyron district	France	1						An incident involving missing time and vehicle electrical system interference occurred. Dark objects flew over a reservoir, followed by a 1.5 meter in diameter metallic disc. The witness experienced semi-paralysis and the car's electrical system failed.
790419	Talisay	Philippines	1						Police witnesses reported seeing a mother ship which later spewed out smaller UFOs,all of which landed in a valley. Military authorities were investigating.
790429	Makapu'u	HI	1						An airline stewardess was at the shore in Makapu'u, when she sighted a huge triangular UFO with many lights. It moved at an estimated 100 mph and made a humming sound. It maneuvered in the sky and flew away out to sea.
790526	Manila	Philippines	1						A UFO with two antennae was sighted over the city. With the aid of binoculars figures could reportedly be seen inside the craft.
790718	Belfort	France	1						A metallic disc flew over the city in the afternoon. It had a shiny top and dark bottom section. It sped up, and then shot straight up.
790909	Chicago	IL	1						The silver disc had angular size about half that of the full moon. The black center could be resolved on the underside and the outline was distinct against the clear blue sky.
790917	Eichstatt	Germany	1						In the Bavarian town of Eichstatt three pentagon-shaped UFOs were seen by many, including 10 police officers.
800306	Warren	Az	1						A disc hovered over mine tailings in Warren and then flew along the ridge of a mountain. It turned on its edge and flew off to the south. The entire sighting lasted eight minutes.
800306	Hudson	NH	1						On this night a witness reported seeing a slow flying disc-shaped UFO over the town. The object made a low, steady humming sound. A second object was seen flying toward the west.
800315	Bannock County	OH	1						Huge cigar UFO in Ohio. Three witnesses for one hour.
800420	Lake Norman Reservoir	NC	1						Two roofers working in the late evening sighted a bright yellow disc-shaped UFO rise vertically from Lake Norman Reservoir, not far from a nuclear power plant in Rutherford County.
800502	San Jose	CA	1						Shiny sphere flying with rapid up and down motions observed through binoculars; stopped, spinning, over Lick Observatory, accelerated rapidly and sped away
800614	Cordoba and Rosario	Arg	1						Flurry of UFO sightings by numerous witnesses, including airport personnel and meteorologists, with extensive newspaper coverage.

800704	Mt. Vernon	IL	1						11-year-old boy reported a disc-shaped object with dome-circle on bottom. Object was moving from overhead to the south, lost the object as it moved behind his home.
800831	between Ashbourne and Derby	UK	1						A witness named Lister reported seeing a disc-shaped object making a humming noise. According to the report it maneuvered in the sky, and there were other independent witnesses.
800911	Easley	SC	1						L. Garrett, age 40, saw a huge gray domed blimp or ovoid UFO making a buzzing noise. It was purplish metallic gray in color. It had a pipe protruding from it, and long windows.
801023	Morenci	AZ	1						Boomerang-shaped object with body lights shone brilliant light beam down smoke stacks, accelerated, made noninertial turn. Satellite objects (section I).
801118	Kirksville	MO	1						Hundreds of people in north-central Missouri, including a dozen police officers, saw a large, triangular object over a period of more than four hours. At one time, the object was tracked on radar moving erratically at a speed of about forty-five miles an hour.
801129	Todmorden, West Yorkshire	UK	1						Two on duty uniformed traffic officers were parked up in a pub car park when they observed a very bright UFO low on the horizon.
801217	Greenup County	KY	1						No details except 5 witnesses of a C1.
801227	Greenup County	KY	1						No details except 5 witnesses of a C1.
810106	Payson	AZ	1						Four silvery discs executed turns, maneuvers, in a diamond formation. Objects flashed in sunlight as they turned, crossed western sky (sections V, X).
810108	Flinders Island (near)	Tasmania	1						On a boat near Flinders Island two men saw two nocturnal lights exchange light beams. The sea was illuminated by the UFO display, and the batteries on board the boat were found to be dead.
810724	Zigong, Henan Province	China	1						A huge silent disc-shaped UFO was seen for three to ten minutes by thousands over Ningsia, China. It flew at a very high altitude and left a spiral trail. It made no sound. Photographs of the object were taken, and several drawings were published.
810900	Todmorden, West Yorkshire	UK	1						Over several nights over 20 members of the public saw a cigar shaped UFO over the town of Todmorden in West Yorkshire. On one of those nights two uniformed police officers also saw the object. (Source: Daily Star 30/03/82, The 5TH ANNUAL PRUFOS POLICE REPORT 2006 by Detective Constable 1877 HESELTINE, British Transport Police)
811000	Texas Gulf Coast	TX	1						Local concentration of sightings (Volume II, The UFO Evidence, Section VIII).
811201	Hessdalen	Norway	1						On this night a bullet-shaped object, a sphere, and several nocturnal lights were sighted flying to the north over Hessdalen Valley, Norway toward Trondheim. According to John Spencer, this report was the first of a four-year wave of reports from the Hessdalen Valley.
811204	Hartford	CT	1						7:10 PM. Two groups of witnesses about twenty miles east of Hartford, CT, saw strange lights or objects travel at a rather slow speed from east to west along a path north of the witnesses. Known as The Case of the Flying Christmas Tree. (Complete report by Bruce Maccabee). (On Dec. 22, 1989 there was a similar event at Vernon, IN)

811208	Reserve (South of)	NM	1						An enormous UFO shaped like an orange ball, and estimated to be 750 feet in length, made a number of turns in the sky south of Reserve, New Mexic and then executed a ninety-degree turn near Luna Mountain. The five witnesses said they saw a jet aircraft chase the UFO out of sight.
820124	Stockdale	TX	1						A flashing light with irregular flashes of red and white traveled from west to east silently across the sky in Stockdale, Texas. It arced slightly and appeared to hover in the eastern sky, 30 degrees above the horizon.
820313	Frankfurt (near)	Germany	1						Several teenagers watched three groups of four lights arranged in squares in the night sky. The first two formations of objects moved slowly, and then hovered. The third group flew fast.
820401	North Washington	PA	1						A reddish triangular object with rounded apexes and a light in each corner was sighted by three witnesses. The witnesses reported suffering from headaches after their close encounter.
820610	Albany	NY	1						While driving home, a woman and several children observed a disc-shaped object with dome on top and blinking red lights, and a row of rectangular windows on the side, hovering in the sky.
820615	Romeoville	IL	1						A fireball with an odd shape flew rapidly toward the power plant in Romeoville, Illinois. It stopped and hovered, then flew away fast toward the west.
820725	Latrobe	PA	1						Several independent witnesses reported seeing a blunt gray, 300-foot long cigar-shaped object with windows fly over woods and the sewage treatment plant heading west.
820917	Ipswich	MA	1						While walking his dog, a man saw a boomerang-shaped object traveling southeast with erratic, zig-zagging motions. His wife came outside to join him, and together they saw three disc-shaped objects pass overhead.
820917	At sea	South Atlantic	1				**NC**		A bright patch of light exploded into an orange fireball near the M.V. Strathdee, a Romanian registry ship sailing in the South Atlantic. According to the article in the MUFON UFO Journal, it flashed rays of light and made no sound. A geiger counter reading indicated a radiation level of 5-7 rads.
821002	Springfield	MO	1						8:00 PM. Ten witnesses of a deltoid object with no sound. (IUR-8,1)
821002	Des Moines (near)	MO	1						8:00 PM. Ten witnesses of a deltoid object with no sound. (IUR-8,1)
821016	Boyd County	KY	1						4:00 PM. Cube-shaped object tumbles across sky while being pursued by two military jets. Any sound masked by jets. (MUJ-189)
821018	Lake Norman	NC	1				**NC**		Silver oval with "four legs"
821106	Lombard	IL	1						3:45 PM. A brilliant round, intense light was seen in the sky over Lombard, Illinois. There appeared to be very small airplanes circling this huge unmoving object.
821231	Kent Cliffs	NY	1						In the lower Hudson River Valley a police officer and his wife spotted a delta-shaped UFO making a faint, low frequency hum. The colored lights on the object switched off and three bright white lights lit up the ground. He was able to shoot some movie film of the UFO, but the images are of low quality
830119	Cardiff, Wales	UK	1						Hundreds Watch Massive UFO

830219	Swansea, Glamorgan, South Wales	UK	1						Daytime. Up to 200 people observed a huge triangular shaped UFO pass overhead in various places along the South Wales coast. They included a class of schoolchildren and a football team.
830315	Reading	UK	1						UFO Alert as Mystery Light Passes over Berks
830324	Bedford	NY	1						Wing or V-shaped UFO hovered, emitted light beam downward. (NICAP UFO Evidence II, Section IX)
830324	Happy Camp	CA	1						4:45 PM. California Highway Patrol officer Harold R. Chandler was on routine patrol near the Northern California border with Oregon when he spotted a dark, circular object, flat with no protuberances, flying overhead across his path.
830330	Shrub Oak	NY	1						8:00 PM. Delta-shaped flying objects were seen widely over suburban Shrub Oak, New York. (Source: J. Allen Hynek, Philip Imbrogno, and Bob Pratt, Night Siege: The Hudson Valley UFO Sightings, p. 202).
830411	Mt. Vernon	IN	1						7:05 PM. Young man & two friends saw a light with light-beam. (Ridge files)
830513	Romsey	AU	1						Bizarre cone-shaped UFOs were spotted over Australia by hundreds of people
830520	Various cities in Victoria	AU	1						Hundreds of people living in the Australian state of Victoria reported seeing brightly colored UFOs
830612	Cupira	Brazil	1						UFO Turns Night into Day
830621	Dubno, Ukraine	Russia	1						A wingless cigar-shaped object circled a strategic nuclear facility at Dubno, Ukraine for 18 minutes. (Source: Larry Hatch, U computer database, case # 13365, citing FSR, volume 37, no. 4).
830722	Houston	TX	1						9:30 PM. A huge silent, stationary, boomerang shaped UFO with two large orange lights and many smaller lights in the middle of the V was sighted hovering over the suburbs in Houston, Texas. It then moved away past many witnesses.
830809	Selma	IN	1						8:50 PM. Close Encounter with two winesses for 11 minutes. Light only, possibly explainable with some elements of strangeness. (NUFORC & MUFON Indiana/Ridge files)
830826	Cedar Lake	IN	1						(IUR-9,1)
831003	Split	Croatia	1						8:00 PM. Nine amateur astronomers sighted at blue ovoid object orbited by smaller objects over Split, Croatia. (Source: MUFON UFO Journal, December 1983).
831031	Rio de Janeiro	Brazil	1						5:10 PM. An F-5E interceptor was scrambled by the Brazilian Air Force as many witnesses in Rio de Janeiro, Brazil reported a silvery spot maneuvering over city.
831212	Byron	IL	1						A triangular flying object was sighted by three men. It moved erratically and made no sound. It had blinking red and white lights. Its erratic path was detected on FAA radar at the Greater Rockford, Illinois airport. (Source: APRO Bulletin, September 1984, p. 8).
840103	Lake Michigan	MI	1						4:14 AM. An ovoid UFO flew low over Lake Michigan and was sighted by three women in Port Washington, Wisconsin. The UFO had three portholes. (Source: Donald R. Schmitt, International UFO Reporter, March-April 1984, p. 3).

840127	Valley Center	CA	1						5:40 AM. Four witnesses observed five large, brilliant, stationary white lights in the northern sky. Four of the lights were in a diamond formation with the fifth light in the center of the formation. After watching the display for several minutes they noticed smaller white lights maneuvering around the large lights.
840130	Miami (40 miles west of)	FL	1						9:00 PM. Mine men working on an oil platform observed a bright orange object descending from the sky at a high rate of speed. When at an estimated altitude of 10,000 feet and about five miles distant, the object came to an instant stop. The bright orange glow faded and the crew observed an object with a bright chrome dome-shaped top and dozens of flashing lights on the underside.
840222	Columbus	OH	1						4:00 PM. This sighting was by five highly educated witnesses. The object's appearance underwent a regular change (possible rotation) approximately every 60 seconds from an upside-down ice cream cone to a rectangle.
840306	Norris (west of)	ND	1						10:00 PM. A large boomerang or U-shaped UFO was seen by two police officers, Jensen and Myers, west of Norris, South Dakota, after having been called out on a reported sighting of the UFO by a citizen ten minutes earlier.
840518	Mt. Vernon	IN	1						10:40 PM. A Skywatch team observed a flashing strobe light coming out of the NE heading SW. The object then passed directly over the team at high altitude and exhibited anamalistic motion during final distant five minutes of the 12 minute observation.
840519	Williams	IN	1						Midnight. The witness said that he was outside behind his house working on equipment. He was working by electric light and suddenly noticed everything around him became brightly lit. He looked up to see that the light source was a brilliant orangish-colored light, low in the northwest.
840520	Monroe City	IN	1						Evening. Black triangle came in, stopped over car for one minute, 200-300 feet overhead, moved off. (UPRO)
840531	Yorktown	NY	1						8:45 PM A V-shaped formation of lights were seen by Mr. D. Boyd in Yorktown, New York. An engineer and private pilot, he watched them turn and fly away toward the west.
840625	Blairgowrie in The Orkney Islands	Scotland	1						A bright circle trailing a red tail and flashing a beam of light from its circumference was seen hovering
840705	Cape Girardeau	MO	1						9:38 PM. A disc with an orange halo hovered over a park in Cape Girardeau, Missouri at an estimated altitude of 1,000 feet.
840712	Hudson Valley	NY	1						On this night hundreds of witnesses in the Hudson Valley, Westchester County, New York saw a number of small round lights which hovered, made abrupt right angle turns, disappeared and reappeared.
840719	Pound Ridge	NY	1						8:20 PM. A huge boomerang-shaped object with lights running along its leading edge was seen flying over Pound Ridge.
840727	Lummi Island	WA	1						At 3:45 a.m. a spark-tailed fireball splashed down 1000 yards south of Lummi Island in Washington State. The impact sent a plume of water 100 feet into the air before the object sank and the water as the surface of the sea rolled and bubbled

840830	Mt. Vernon	IN	1						9:05 PM. Pulsating orange object sighted by MUFON SSD Ridge's 8-year-old daughter. Object was in the north heading east at low level for approximately 10 minutes. This NL was logged as an OBOL (Orange Ball Of Light) and witnessed by the SSD and his son, Brian (15), who observed the object from the roof of their home north of town.
841000	Hudson Valley	NY	1						Astronomer and UFO expert J. Allen Hynek, accompanied by field investigators Philip Imbrogno and Dennis, saw a "Ferris wheel" shaped UFO in the sky in Hudson Valley, New York that turned on its side and then disappeared.
841123	Monroe City	IN	1						10:30 PM. Another black triangle report by two witnesses. No details. (UPRO)
851119	Madison	WI	1						Silent, triangular object with body lights (section IX).
851122	DeForest	WI	1						Silent, triangular object (section IX).
870811	Osbornville	NJ	1						Shiny oval, hovered; brightened, took off like a shot, left white trail; stopped abruptly, maneuvered, lights flashed, shot straight up out of sight (sections IX, X).
920224	Pacific Northwest	OR	1						12:15 A.M. Bright green fireball meteor, wavered, split up, bright illumination, sonic boom.
920814	Homer City	PA	1						Triangular silvery object passed over car, blue flashing body lights; made sharp turns, moved out of sight (section IX).
921009	Kentucky to New York	Various	1						About 7:50 P.M. Green-orange fireball meteor southwest to northeast on flat trajectory for about 17 seconds, broke up over southeastern New York; large meteorite fell in Peekskill, NY.
930720	Antelope Valley	CA	1						Round UFO with satellite objects (section X).
940706	Budabest	Hungary	1						Test pilot encounters fast-moving, maneuvering, object
940909	Racoon	IN	1						reen- and red-lighted object with satellite objects (section I).
950715	Harwinton	CT	1						500' diameter disc observed in broad daylight

Close encounters are normally described as incidents where the object is within 500' of the witness(es). However, we have included cases where the size or viewing conditions allow stereoscopic vision of a superstructure.

Incidents involving Distant Encounters (Cat 1), E-M (Cat 3), Animal Effects (Cat 4), Medical Effects (Cat5), Trace Cases (Cat 6), Entities (Cat 7), Photographs (Cat 8), Radar (Cat 9), Radiation (Cat 10), or Sightings From Aircraft (Cat 11), are listed on their appropriate pages at Special Evidence by categories. However, many classic Close Encounters are also listed on this page. If you find an important case that is NOT listed, please email me at: skyking42@gmx.com

Date	City	State or Country	Cat	Code	Rating	BB	NC flag	LC	Description
18680700	Copiago	Chile	2						A strange "aerial construction" bearing lights and making engine noises flew low over this town. Local people also described it as a giant bird covered with large scales producing a metallic noise.
18721207	Banbury	UK	2						1:00 a.m. At King's Sutton an object resembling a haystack flew on an irregular course. Sometimes high, sometimes very low it was accompanied by fire and dense smoke. It produced the same effect as a tornado, felling trees and walls.
18790515	At sea	Persian Gulf	2						9:40 p.m. Two very large "wheels" were seen spinning in the air and slowly coming to the surface of the sea.
18800000	Eastern area	Venezuela	2						A 14-year-old boy saw a luminous ball descending from the sky and hovering near him. He felt somehow "drawn" to it, but succeeded in backing away in spite of his terror.
18800326	Lamy	NM	2						Evening. Four men walking near Galisteo Junction were surprised as they heard voices coming from a "strange balloon," which flew over them. It was shaped like a fish and seemed to be guided by a large fanlike device. There were eight to ten figures aboard.
18840703	Norwood	NY	2						Saturn-shaped UFO (globe with central ring) flew slowly overhead. [Credit: Charles Fort, from Science Monthly, 2-136]
18851102	Scutari	Turkey	2						Dawn. A luminous object circled the harbor. Altitude: 5-6 m. Illuminated the whole town. Duration: 1 1/2 min, as a bluish-green flame. Then plunged into the sea. Made several circles above the ferry-boat pier.
18861024	Maracaibo	Venezuela	2						During the night, which was rainy and tempestuous, a family of nine persons, sleeping in a hut a few leagues from Maracaibo, were awakened by a loud humming noise and a vivid, dazzling light, which brilliantly illuminated the interior of the house.
18871112	Cape Race	Atlantic Ocean	2						Midnight. A huge sphere of fire was observed rising out of the ocean by witnesses aboard the "Siberian." It rose to an altitude of 16 m, flew against the wind, and came close to the ship, then "dashed oft" toward the southeast.
18970328	Omaha	NE	2						10:30 p.m. The majority of the population observed an object arriving from the southeast. It looked like a huge light, flew northwestward slowly, came to low altitude. A crowd gathered at a street corner to watch it.
18970401	Everest	KS	2						9:00 p.m. The whole town saw an object fly under the cloud ceiling. It came down slowly, then flew away very fast to the southeast. When directly over the town it swept the ground with its powerful light.
18970412	Nilwood	IL	2						2:30 p.m. On the property of Z. Thacker, 19 km north of Carlinville, an unknown object landed. Before the three witnesses could reach it, the craft, which was shaped like a cigar with a dome, rose slowly and left majestically toward the north.

18970412	Girard (near Green Ridge)	IL	2						6:00 p.m. A large crowd of miners saw an unknown object land 3 km north of Green Ridge and 4 km south of Girard. The night operator of the Chicago-and-Alton Railroad, Paul McCramer, stated that he came sufficiently close to the craft to see a man emerge from it to repair the machinery. Traces were found over a large area. The object itself was elongated like a ship with a roof and a double canopy.
18970414	Gas City	IN	2						3:00 p.m. An object landed 2 km south of Gas City on the property of John Roush, terrifying the farmers and causing the horses and cattle to stampede. Six occupants of the ship came out and seemed to make some repairs.
18970414	Cleveland	OH	2						Joseph Singler, captain of the "Sea Wing," was fishing with S. H. Davis, of Detroit, when they saw on the lake what they thought was a ship, about 13 m long, with a canopy.
18970415	Linn Grove	IA	2						Morning. A large object was seen to fly slowly toward the north. It seemed ready to land and five men drove toward it. About 7 km north of Linn Grove, they found the craft on the ground, came within 700 m of it but it "spread its four giant wings and rose towards the North." Two strange figures aboard the craft made efforts to conceal themselves.
18970415	Howard-Artesian	SD	2						Nightfall. A flying object coming closer and closer to the ground followed a train, as reported by the engineer, Joe Wright (Magonia #19, FSR 66,4)
18970415	Perry Springs	MO	2						9:00 p.m. A passenger train on the Wabash line, going toward Quincy, was followed by a low-flying object for 15 min between Perry Springs and Hersman. All the passengers saw the craft, which had a red and white light.
18970415	Springfield	IL	2						Two farm workers, Adolph Winkle and John Hulle, saw a strange craft in a field. They had a discussion with its occupants, a woman and two men, and were told the ship-had flown from Quincy to Springfield in 30 min and that the crew was making electrical repairs.
18970416	Downs Township	IL	2						Approximate date. While working in his field, Haney Savidge saw an aerial craft land near him. Six people emerged from it and spoke to him for a few minutes before leaving again.(Magonia #22, 191)
18970416	Vincennes	IN	2						9:00 p.m. A mysterious airship passed over the city twice on the night of Friday, April 16. According to the Vincennes Morning Commercial, the airship first appeared about nine oclock, traveling along the extreme eastern portion of the horizon
18970417	Williamston	MI	2						Morning. At least a dozen farmers saw an object maneuver in the sky for an hour before it landed. A strange man near 3 m tall, almost naked and suffering from the heat, was the pilot of the craft.
18970419	Leroy	KS	2						10:30 p.m. Alexander Hamilton was awakened by a noise among the cattle and went and saw an elongated cigar-shaped object, about 100 m long with a transparent cabin underneath showing narrow reddish bands, hovering 10 m above ground. Inside it were "six of the strangest beings" the witness had seen, also described as "hideous." A cow was dragged away by the object with the help of a strong red cable; it was found butchered in a field the next day.

18970420	Homan	AR	2						6:00 p.m.Capt. James Hooton was hunting in the vicinity of Homan when he heard the noise of a steam engine and found an object in a clearing. It looked like a cylinder with pointed ends, lateral wheels, and horizontal blade over it. Hooton spoke with a man who wore dark glasses and walked behind the craft. There were three or four occupants.
18970422	Rockland	TX	2						John M. Barclay was intrigued when his dog barked furiously and a high-pitched noise was heard. He went out, saw a flying object circling 5 m above ground. Elongated with protrusions and blinding lights, it went dark when it landed.
18970422	Josserand	TX	2						Midnight. Frank Nichols, who lived 3 km east of Josserand and was one of its most respected citizens, was awakened by a machine noise. Looking outside, he saw a heavy, lighted object land in his wheat field. He walked toward it, was stopped by two men who asked permission to draw water from his well.
18970423	McKinney Bayou	AR	2						Judge Lawrence A. Byrne of Texarkana, Arkansas, was surveying a tract of land when he saw a peculiar object anchored on the ground. "It was manned by three men who spoke a foreign language, but judging from their looks one would take them to be Japs."
18970426	Aquila-Hillsboro	TX	2						Approximate date. A lawyer was surprised to see a lighted object fly over. His horse was scared and nearly toppled the carriage.
18970506	Hot Springs	AR	2						Two policemen, Sumpter and McLenore, were riding northwest of Hot Springs when they saw a bright light in the sky. About 7 km farther they saw the light again coming down to the ground. One km farther the horses refused to walk.
19001032	At sea	Gulf of Guinea	2						3:05 a.m. Three persons aboard the "Fort Salisbury," including Second Officer A. H. Raymer, saw a huge, dark object bearing lights in the sea ahead. It was observed sinking slowly. Estimated length: 200 m.
19001172	Helmer	IN	2						During the early evening a family watched a brilliantly glowing cigar-shaped object hovering at treetop level. It had two rows of evenly spaced windows.
19040000	Rolling Prairie	IN	2						Tom Darby, with his brother and mother, saw two whitish-blue objects about 400 m away, from a point situated 3 km north of Rolling Prairie. The objects hovered 2 or 3 m above ground, flew toward a barn, came closer to each other, and were hidden from view by a hill.
19090513	King's Lynn	UK	2						9:45 PM. A cigar-shaped object illuminated the terrain brightly in King's Lynn. Looking up, he saw the airship-like object speed overhead, two men visible in an undercarriage, and disappear in the distance within a few minutes.
19090518	Caerphilly, Wales	UK	2						11:00 p.m. Mr. Lethbridge was walking along a road near the mountains when he saw on the grass a large tubelike machine. Aboard were two men wearing furs and talking excitedly in a language the witness could not understand. The grass was found depressed at the site after the object had flown off.

19090616	Donghoi	Annam	2						4:10 a.m. An elongated object following a west to east trajectory flew over the town. It gave off a strong light and was seen by two fishermen to plunge into the sea 6 km away from the coast, after a steady flight of about 9 min.
19091222	Worcester	MA	2						"Mysterious Airship" emitting a bright beam of light appeared moving SE to NW, hovered over city, moved away. Seen again two hours later; hovered, moved away to south and turned east.
19100100	Invercargill, New Zealand	AU	2						11:00 p.m. Several witnesses among them the vicar, the Mayor, and a policeman saw a cigar-shaped object hovering at 30 m altitude. A man appeared at a lateral door and was heard shouting some words in an unknown language.
1910Summer	Vernal	UT	2						A man on horseback at night dismounted when his horse became disturbed, and walked to the edge of a clearing in the woods. There he saw a low-hovering disc with a row of lights.
140600	Hamburg	Germany	2						4:00 a.m. Gustav Herwagen opened the door of his house and saw in a field a shining cigar- shaped object with illuminated windows. Near it were four or five dwarfs 1.20 m tall, clad in light clothing.
140800	Georgian Bay	CAN	2						William J. Kiehl and seven other persons saw a spherical craft on the surface of the water. On its deck were two small men wearing green-purple clothes. They seemed to be busy with a hose, plunging it into the water. (This was shown to be as a hoax a long time ago.)
161000	Youngstown	PA	2						John Boback, 17, was walking along the railroad tracks between Youngstown and Mt. Braddock when he saw a saucer-shaped object with a platform and rows of lights, sitting in a field 30 m to his left.
18Early	Waco (near)	TX	2						Reddish cigar-shaped object, with no motor or rigging, passed silently from SW to NE. (NICAP UFO Evidence, 1964, Hall)
220222	Hubbell	NE	2						5:00 a.m. William C. Lamb was following strange tracks when he heard a high-pitched sound and saw a circular object intercepting starlight. It became brilliantly lighted and landed in a hollow. Soon afterword, a creature over 2.4 m tall was seen flying from the direction where the object had landed. It left tracks in the snow, which Lamb followed without results.
220909	Barmouth, Wales	UK	2						John Morris and William James saw an object fall into the ocean so slowly that it was thought to be a plane. A boat was sent out, but nothing was found. (Magonia #45, Fort 639)
230000	Greencastle	IN	2						Revolving red object passed over-head from NE to SW. Two witnesses were college professors. (NICAP UFO Evidence, 1964, Hall)
240100	Unknown City	OK	2						White oval-shaped object lit up ground, moved out of sight over horizon. (NICAP UFO Evidence, 1964, Hall)
281100	Milton	ND	2						A UFO, round "like an inverted soup plate," sped overhead emitting rays of light which illuminated the ground and startled cattle. (NICAP UFO Evidence, 1964, Hall)
290612	Fermeneuve	CAN	2						11:00 p.m. Levis Brosseau, 20 was returning home when he saw a dark object with a yellow light and his horse became very nervous. Within 6 m of the object four or five dwarfish figures were running back and forth.

290700	Robsart	CAN	2						Five persons among them Einar Rostivold, saw a huge ball of light giving off fiery colors, 25 km from Robsart. It landed slowly, vanished gradually after illuminating the whole countryside for 30 min.
310101	Cobden, Ont	CAN	2						UFO sighted in early morning, had bright light on front which lit up tree-tops, flashing lights on rear. Object made sweeping curve, sped up and climbed out of sight. (NICAP UFO Evidence, 1964, Hall)
33Summer	Chrysville	PA	2						Morning. A man observed a faint violet light in a field between this town and Morrestown. Walking to it, he found an ovoid object 3 m in diameter and 2 m thick with a circular opening similar to a vault door.
331230	Unknown City	Sweden	2						Low-flying aeroplane (Page 7 Ref. 1)
340401	Oslo	Norway	2						A very large aeroplane with eight propellers (Page 8 Ref. 1)
370101	Unknown City	NC	2						30-40 foot in diameter object, no propellers, gun metal color (Page 10-11 Ref. 1)
370211	Kvalsik	Norway	2						Large aeroplane with red and green glowing lights (Page 11, Ref. 1)
380725	Guadalaraja	Spain	2						Soldiers at the Spanish Civil War battlefront were illuminated by a bright glow, then saw an oval object about 10-12 meters in diameter shaped like “two inverted plates” hovering near the ground. A cylindrical column came down from the center and two beings emerged.
38Summer	Unknown City	MA	2						Silvery object with rectangular portholes (Page 12 Ref. 1)
391113	Brockworth	UK	2						Motorist heard high-pitched humming sound, saw a gray bell-shaped object hovering over a field, dark window-like patches visible on its side. (Ref. 3; Jenny Randles & Peter Warrington, Sience & The UFOs, 1985, p. 3.)
420829	Columbus	MS	2						Control tower operator at Army Air Base saw two round reddish objects hover over field. [NICAP UFO Evidence, 1964, Hall, III]
430900	Oncativo	Argentina	2						4:00 a.m. Navarro Ocampo, driving between Rosario and Cordoba, saw a large, saucer-shaped object on the ground 500 m to the left of the road. It glowed with a bluish-green light, made a whistling sound, rose to 100 m altitude, then left at fantastic speed. A strange metal block is said to have been found at the spot. (Magonia #50, GEPA Dec., 68)
431100	Escondido	CA	2						On a dark moonless night a family heard a soft humming sound and saw a disc with dome and square windows hovering about 15 feet above the roof of their house. Human-like silhouettes were visible through the windows. When the woman shone a flashlight, the object blinked out and disappeared. (Ref. 3; Greenwood, UFO Historical Revue, June 1998.)
44Summer	Normandy	France	2						Los Angeles columnist George Todt, in a party of four Army officers including a Lt. Col., watched a pulsating red fireball sail up to the front lines, hover for 15 minutes, then move away. [NICAP UFO Evidence, 1964, Hall, IV]
440900	Antwerp	Belgium	2						Around 9 p.m. in the evening a Canadian soldier, stationed near the front lines close to Antwerp, observed "a glowing globe traveling from the direction of the front line towards Antwerp.

441010	Alghut	Sweden	2						At 8:00 p.m. a man on a bicycle was suddenly illuminated by a light beam from the woods, then he saw a large shining sphere rise rapidly from the ground and hover at treetop height. It appeared moon-like; golden in color, and made no sound. After about 5 minutes the object abruptly disappeared. (Ref. 3; Anders Liljegren AFU archives.)
450300	Belfast	ME	2						A man out hunting observed an elongated object flying very slowly, tilted toward the earth. It crashed into some trees at the end of a clearing. (Magonia #53, FS May., 59)
450300	Unknown City	NM	2						Object aluminum colored, 12 to 14 feet off ground, motionless ,swept away like dragonfly. (Page 142-143 Ref.1)
450300	Aleutian Islands	At Sea	2						Aboard the US attack transport "Delarof," 14 sailors saw a dark sphere rise out of the ocean, follow a curved trajectory, and fly away after circling their ship. (Magonia #54, Evidence 30) [NICAP UFO Evidence, 1964, Hall, IV]
45Summer	Aleutian Islands	At Sea	2						Crew saw large round object emerging from sea; 150-20 feet in diameter; object circled ship; three white flashes observed in direction object departed. (Page 188-189 Ref.1)
460500	Angelholm	Sweden	2						At twilight while walking home, a prominent industrialist saw a light in the woods and went to investigate. He saw a disc with dome and oval windows on the ground. Around it were about 11 beings with transparent helmets and uniform-like clothing apparently working on the craft. Later he saw the craft take off emitting bright red light, then speed away. Burned grass and other trace marks were found at the site. (Ref. 3; Flying Saucer Review, March-April 1972.)
4608Late	Oklahoma City	OK	2						Disc-shaped craft with windows, humanoid figures visible inside, hovered at low altitude. After about 1-1/2 minutes the object rotated, then sped away disappearig in seconds. (Ref. 3; Case summary by Ted Bloecher, 14 pages. Interviews by Bloecher, Lucius Farish, and Mildred Higgins.)
470813	Snake River	ID	2	C	5	BBU			Snake River Case
4708Late	Vaughn (near)	NM	2				NC	LC	AFOSI Case 2: approx 20:00 - Basketball-Sized Object Explodes Near Colonel
480829	Maplewood	OH	2			BBU			Farmer Niswenger saw a large silvery sphere rise from a wooded area and hover above his farm, dropping a silvery substance that disintegrated before touching the ground. (Vallée Magonia 67; FUFOR Index)
490306	Killeen Base, Camp Hood	TX	2			BBU			blue-white object about 2 ft x 1 ft in size
490428	Homer	MI	2			BBU			pursued 6 flying discs 10 inches diameter by car (FOIA)
500304	Newburgh (near)	IN	2						A man was driving east approximately two miles east of the junction of Indiana State Hwy 66 and 261 north of Newburgh, when he observed an object he believed to be a rocket at a distance of approximately 50-75 yards in front of his automobile.
500305	Bloomfield	NM	2						Night. A dark, five-foot diameter disc paced a car. When the driver stopped the car the object circled the car, then sped away at a high speed.
500408	Kokomo	IN	2			706			grey metallic disc, 50 ft in diameter, 15 ft thick, top-shaped
500617	Hasselbach	East Germany	2			BBU			40-50 ft frying pan-shaped object with two rows of 1 ft holes

500630	Kingman (near)	KS	2						Rotating disc hovered, sped away when car approached [XII]
501013	Oak Ridge	TN	2				NC		Sightings by AEC security patrols
501015	Oak Ridge	TN	2			BBU	NC		AEC Security Patrol Encounters Object 200' Away
510831	Matador	TX	2			962			pear-shaped object the length of a B-29 fuselage (100 ft),
520329	Glen Burnie	MD	2			BBU			50 ft flat silver disc with cupola/dome
520425	San Jose	CA	2						Scientists close encounter with small daylight disc
520427	Pontiac	MI	2						11:06 pm. Witness observed an object approximately 200 feet in daiameter and approximately 200 feet off the ground.
520427	Birmingham	MI	2			BBU			Witness observed an object approximately 200 feet in daiameter and approximately 200 feet off the ground
520613	Fox Hill	VA	2						object described as similar to a discus used in athletics, about 25 to 30 feet in diameter hovering
520719	Savanna River	SC	2						Hundreds of employees from AEC witnessed UFO cavort
520728	Hallock	MN	2			BBU			(FUFOR Index)
520820	Neffesville	PA	2			1938			undescribed object flying at 500 ft altitude
520827	Pittsburg	KS	2	T	5				Object reported hovering over open field; bluish lights seen through ports; swift ascent when observed
521031	Fayetteville	GA	2			2200			orange blimp-shaped object, 80 ft long 20 ft wide
530307	Yuma	AZ	2						Air Force officers at a gunnery meet observed about 12 disc-shaped objects that dove down and hovered over the base during the meet. [AP story, Mar. 9th; UFOE, III]
540812	Yoron-Jima Island	Okinawa	2	C	5	BBU			S. S. Docteur Close Encounter
540907	Origny	France	2						12:30 a.m. Robert Chovel and his wife and father-in-law were driving home from the theater in Hirson, Aisne Department when they saw a luminous, red-orange "disk" flying above the railroad tracks.
540916	Roanoke (near)	VA	2						Shiny, round object buzzed radio tower; transmitter failed to operate properly. [UFOE, VIII]
541003	Waben (near)	France	2						UFO paced car. [UFOE, II]
541022	Marysville	OH	2						School principal, teacher, 60 students saw silver cigar-shaped UFO with "portholes" hover over school, then speed away; "angel's hair" fell. [UFOE, VIII]
550302	Huntley	IL	2	C	5	BBU			Car Followed By Three Black Objects With Lights
551028	Galloway	UK	2						Disc with row of blue lights on rim, maneuvered slowly over car on lonely road. [UFOE, XII]
560117	Orangeville	CAN	2						Disc-shaped UFO seen at close range; rings of light visible on bottom. [UFOE, XII]
561100	Malibu	CA	2						Flat oval object with three window-like markings on underside flew low, through searchlight beam. (UFOE, XII)
571008	Bua Province	Fiji Islands	2						Natives in small boat saw UFO descend vertically, hover about 20 feet above sea.
571106	Atlanta (near)	GA	2						Three truckers independently reported seeing reddish elliptical objects on the road.(UFOE)
571106	Merom	IN	2						Gilham Case. Ironworker stood under UFO for ten minutes, treated at hospital for burns
571110	Madison	OH	2						Close encounter with domed-top 40' UFO

580407	Newport Beach	CA	2						Police watched two UFOs with flashing body lights, maneuver near coastline. [UFOE, VII] Similar sightings for two nights in El Toro and Santa Ana.
581003	Wasco	IN	2	C	5				The Monon RR UFO Incident
581027	Union Dale	PA	2			BBU			Large gray cigar-like object with an assembly tail flew at treetop height
581026	Lock Raven Dam	MD	2	C	5	6148	NC		Egg-Shaped Object & E-M Effects Over Bridge
581220	Dunellen	NJ	2						Police witnesses, vehicle encounter
590708	Columbus	IN	2						Family in car chased three pulsating object seen moving slowly at low altitude in V-formation. (Two WTTV employees saw similar formation few minutes earlier, 25-30 miles away.) [NICAP UFOE, II]
600413	Red Bluff	CA	2						State Police encounter with highly ma-neuverable elliptical object, red light beams swept ground (NICAP UFOE, V).
600425	Plymouth	NH	2						Former Town Selectman saw bright red cigar-shaped UFO hover, speed away. [NICAP UFOE, VII]
610418	Eagle River	WI	2			BBU			CE-3 case involving ETs giving 'pancakes' for water
610500	Union Mills	IN	2						First Week of May - Hemispherical UFO with "portholes", on road; took off as car approached. [NICAP UFOE, XII]
610817	Stillwater	MN	2						A V-formation of yellowish lights (or V-shaped UFO with body lights) passed behind trees at low altitude. [NICAP UFOE, II]
611021	Datil (near)	NM	2						Four lights paced car, maneuvered, shot away upward. [NICAP UFOE, II]
620710	New Iberia	LA	2						Disc-shaped UFO with rotating dome on top swept low over Naval Auxiliary Air Station, slowed over area of runway and hangar, then climbed out of sight at 20 to 30 degrees angle accelerating rapidly. [NICAP UFO Evidence, IV]
620807	Oracle	AZ	2	C	5		NC		UFO over missile silo
620815	Denver (near)	CO	2						Large UFO hovering over a high line tower, chased by Air Force helicopters.[This is in the area of the Lowry AFB Titan I ICBM Complex].
620918	Hawthorne	NJ	2						7:55 p.m.; A family in Hawthorne watched a greenish disc descend low over their house. [NICAP UFO Evidence]
621025	Delta	CO	2						Police dispatcher saw round glowing object from radio room window. State patrolman and Cedaredge Marshal observed two UFOs "like an inverted umbrella with a number of bright, tail-like appendages." [NICAP UFO Evidence, VII]
621222	Buenos Aires	Argentina	2						At Ezeiza Airport, pilots and control tower operators saw circular UFO rise from end of runway. [NICAP UFO Evidence, X]
630128	Shilton	UK	2			BBU			object on the ground with 4 windows, emitting yellow-orange light
630128	Mamina	Chile	2			BBU			2 disk-shaped objects followed truck driver
630205	Ascension	Paraguay	2			BBU			an object land on the school grounds
630521	Mt. Gambler (near)	AU	2						Unconfirmed report that a brilliant light followed a car. A youth stated the object was at side of road, rose suddenly as he approached, hovered overhead, then followed car. The Dominion. Adelaide, reported May 22 this was "the second report of such an occurrence in a week."
630523	Sunnyvale	CA	2						Bluish disc observed hovering and circling slowly, apparently at tree-top height; rose vertically and disappeared. [Report via Bay Area NICAP Subcommittee.]

630621	Chicago	IL	2						A student saw a gray, apparently spherical UFO with a central row of yellow lig3hts. Apparently at low altitude, the object made a "sizzling sound" as it moved east, turned sharply and disappeared to the north. [Witness filed NICAP report form.]
630626	Rockland	MA	2						About 1:00 a.m., witnesses attracted by a loud roar observed a Saturn-shaped UFO. The object hovered, then moved away horizontally. The shape was observed in silhouette, partly illuminated by a white light on top and orange light on bottom. [Witnesses interviewed by NICAP member Raymond Fowler.]
630809	Mount Vernon	IL	2	C	5				Big As A Washtub
630813	Ellsworth (near)	ME	2						A family and their housekeeper observed an elliptical object, apparently on the ground adjoining Molasses Pond, for more than an hour. Body lights were visible along its length, and rays of light shone upward from each end of the object occasionally. [Witnesses interviewed by Walter N. Webb, NICAP Adviser.]
631004	East Hartland	CT	2						State Representative L. B. Martin, about 1:00 p.m., saw a silvery triangular object with a row of black dots across the leading edge. The UFO passed overhead, emitting a flame-like tail, at an estimated speed of 2000 mph. [Report obtained by NICAP-CONN Affiliate.]
631031	Daylston, Victoria	AU	2						A deliveryman on his rounds at 4:15 a.m., was frightened by a UFO which approached his van, turned and followed his course just ahead. The object seemed to be 8-12 feet long, glowing orange and red. It then darted to the side of the road, continuing to pace the van for a while, finally zooming ahead over a hill and apparently descending. It was not seen again. Other witnesses reported seeing a maneuvering light at the time of the sighting.
631120	Neche	ND	2						Two high school girls reported that a bright orange, oval-shaped object circled their car at night while they were en route home. They were on highway 55 east of town when they first saw the UFO. It appeared to be surrounded by a light haze. The glowing object sped across in front of the car and circled around the side before disappearing to the southeast.
640126	Moultrie	GA	2						7:30 p.m. Dull red sphere rose up from behind trees, crossed highway at low altitude, turned, appeared to follow car, then fell back and seemed to head toward ground. Driver was physics student at Georgia Institute of Technology. (NICAP report form.)
640517	Tipton	IN	2						10:15 p.m. Citizens and police officers called to the scene, witnessed a UFO. The reddish object appeared round while hovering, then darted across the sky and appeared flattened while in motion. (UFOI-II,7)
640728	Lake Chelan	WA	2	C	5	BBU			Round Object Descends To Ground
650105	Wallops Island	VA	2	D	1				Bright Yellow Light Flies Overhead
650112	Blaine AFB	WA	2	C	5	BBU			Driver Avoids Collision With 30' Object
650127	Hampton	VA	2						NASA engineer saw V-shaped object with red-orange lights zigzagging at low level. Object touched down briefly, took off, and rapidly climbed out of sight (UFOE II, Section IV).
650201	Tallahassee	FL	2	C	5	BB			Saucer With Domed Top / Humming Sound / 32-40 Witnesses
650404	Keesler AFB	MS	2	C	5	9345			40' Black Oval Object 500' Away

650423	Rivesville	WV	2			BBU			Woman saw a 25 ft object land near her house shaped like a disc
650601	Knob Noster	MO	2						Close encounter. Obj. 45' above the ground
650720	Chesterville, Ontario	CAN	2						Domed object paced car, climbed out of sight (UFOE II, Section, XII).
650804	Dallas	TX	2			BBU			1:30 AM - Man in a car was passed by a huge, orange object flying at ground level
650830	Urbana	OH	2	C	5	9864			White Ball Hits Road Flies Away
650903	Damon	TX	2	C	5	9915			Dark Grey Disc Shadows Police Car
650903	Exeter	NH	2	C	5	9890			The Exeter / Muscarello Case
650916	Pretoria	S. Africa	2	C	5				Saucer Blasts Off From Highway
650922	Clover	MN	2	C	5	BBU			Close Encounter With 4' Sphere
650925	Rodeo	NM	2	C	5	9971	NC		Two Lights Illuminate Car At 30-50' Altitude
651002	Salem	MA	2	C	5				Cigar Hovers Over Smoke Stacks
660107	Winslow	UK	2						4:10 a.m. LT. Hearing a high-pitched whine, a police constable turned to investigate and saw a domed disc (rounded on top, flat on bottom) hovering low above a field. A greenish glow was visible around the top. After 5 seconds the UFO flew away rapidly. An independent witness later corroborated the sighting. (Flying Saucer Review, 12(2), March-April 1966, p. 3.)
660111	Wanaque	NJ	2						6:20 p.m. EST. Police and citizens reported first a brilliant light source, then later a bright egg-shaped object that hovered at low altitude, flew in circular patterns over a reservoir, occasionally making abrupt changes in altitude (vertical maneuvers). Sightings continued for more than an hour. (NICAP notes; U.F.O. Investigator, Vol. Ill, No. 6, Jan.-Feb. 1966, p. 3; New York Journal-American, Jan. 12, 1966).
660111	Myerstown	PA	2						7:40 p.m. EST. About 140 miles west-southwest of Wanaque, N.J., in the vicinity of Harrisburg, Pennsylvania, a nurse and others together in a car saw a luminous disc, like one saucer inverted on top of another, at relatively close range as it hovered above the car. After about 5 minutes, the object suddenly accelerated and sped away. (Hynek, 1972, pp. 89-90, 238.)
660118	New Britain	CT	2						6:00 p.m. A round object rotating slowly in a clockwise direction was observed by a senior metallurgist for about 7 to 10 minutes as it passed overhead at his workplace. It had a string of red lights that blinked on and off. (U.F.O. Investigator, Vol. Ill, No. 6, Jan.-Feb 1966, p. 3.)
660129	Rexburg	ID	2			BBU			flat, well-defined object blocking the road, the size of a truck
660216	Brunswick NAS	ME	2			BBU			luminous object flashing red, blue, and green lights lands in the woods
660225	Quipapa	Brazil	2						10:15 p.m. LT. Two young female factory workers while walking home saw lights in the road, then saw that it was a large disc with two bright lights (body lights) and three small beings about the size of 9-year-old children standing alongside, along with one being over 6 feet tall. The object rose, then landed in a new location. The girls ran home with the object following. It circled the area near their house, then flew away. No sound was heard. One of the girls suffered unspecified "effects" for a period of time. Grass was found depressed (imprints) at the landing spot. (Phillips, 1975. p. 40; from Flying Saucer Review, March 1971 .)
660226	Farmington (5 miles E of)	IL	2			BBU			flying oval object, the size of a car, came within 10 ft of car

660303	Oswego	NY	2			BBU			object fly slowly to the S, hover, come within 50 ft, then fly off to the SW
660311	Indio	CA	2						2:30 a.m. PST. Three glowing yellowish objects with legs were seen resting on the ground in the California Desert. The brilliant luminosity concealed the exact shape of the objects. "Antennas" (projections) extended and retracted rapidly from the objects, their tips glowed green. One of the objects paced a car for 3 hours between Indio, California, and Salome, Arizona. (NICAP notes; NICAP report.)
660311	Ringwood	NJ	2						Time not reported. A Catholic Mother Superior reported seeing a very bright UFO hovering over the Ringwood iron mines. A distant smaller light flashed as if signaling, and the larger object flew away to the west leaving a red glow in its wake. (NICAP notes.)
660313	Portsmouth	NH	2						Time not available. A reporter and his family saw an egg-shaped object about 150 feet over power lines. TV and house lights dimmed (EM effects), and a vibration was felt. (New Hampshire NICAP Subcommittee report.)
660314	Southport	CT	2						9:00-9:30 p.m. EST. A motorist saw an unidentified aerial object with a dome on top, and a row of red and white flashing lights, that paced his car. The object then changed color to white and sped away (color change-motion correlation). Later (11:30 p.m.), an unidentified aerial object with domed top, flat bottom, and red and white flashing lights, descended abruptly in front of the witness's car, and hovered inches off the road. The driver slammed on the brakes, and the object took off. The object was so large that it overlapped the road. (NICAP report, investigation by John Fuller).
660314	Dexter and Hillsdale	MI	2						Landing, structured object, multiple witnesses
660315	Youngstown	OH	2						Time not reported. A police officer and other witnesses saw a metallic-appearing circular object with blue lights in apparent portholes along its side. The UFO stopped overhead, trailing two exhaust flames, then shot away to the northwest. (NICAP notes.)
660316	Eliot	ME	2						6:30-6:45 p.m. EST. A family saw a bright red ball of light with halo effect at close range for 10-15 minutes. The UFO emitted a high-pitched "beep" every 1 -2 seconds synchronized with a blinking red light. Dogs barked and howled (animal reactions), and ran toward the object, which gradually | disappeared behind trees to the southeast. (New Hampshire NICAP Subcommittee s report.)
660317	Milan	MI	2			BBU			Object w/colored lights spinning came within 80 ft of the patrol car
660319	Big Rapids	MI	2						5:20 a.m. CST. Several witnesses saw an elliptical object with a row of rectangular windows, and with a surrounding blue-white haze. Lights on the bottom (body lights) flicked on and off one at a time. A light beam shone into the house. (Keyhoe & Lore, 1969a, p. 46)
660319	LaPorte	In	2						Dawn, EST. Police and others saw a round luminous yellow-white object with projections on top. The UFO paced a car, swerving from side to side, its light reflected from the hood of the car. (NICAP notes.)

660319-20	Freeport	TX	2						1:25 a.m. CST. Witnesses saw a bright flash of blue light, then a hovering oval UFO was sighted by crew members of the Coast Guard Cutter "Legare." EM effects were experienced on local electric power systems, house lights blinked off and on rapidly. The UFO was orange and had windows or ports with a hazy appearance in the interior. After a while the object slowly rose about 1,000 feet, emitted a blue glow, then disappeared. Shortly afterwards, two bright lights shot up from the ground and disappeared within seconds. An extensive power failure occurred in Freeport about 2 hours earlier (11:10 p.m.) (NICAP report)
660320-21	Exeter	NH	2						10:00 p.m.- 2:40 a.m. EST. Police and citizens saw an egg-shaped object with flashing body lights across the center (red-white-blue-green-red) that hovered over power lines, bobbed around and rocked in a pendulum motion. Through binoculars, a dome-like area was visible on top. The object finally ascended to the east, moved out over the ocean and disappeared. (Fuller, 1966; Massachusetts NICAP Subcommittee report.)
660320	Dexter	MI	2			BBU			hovering object over swamp about 1,500 ft away car-sized
660322-23	Key West	FL	2						Night, EST. FL. Several discs with flashing lights around their edges (body lights) were reported from an outdoor theater. The objects hovered for 4-5 seconds, then shot away northward out of sight in about 1 second. (NICAP notes.)
660322	Houston	TX	2			10262			white flashing lights light up witness' apartment
660323	Temple	OK	2			10270			road blocked by a wingless aircraft, perch fish-shaped
660323	Bangor	ME	2						Landed ellipse with body lights, within 50 ft., humming sound. Report in NICAP files. (E,L) car. Section II
660323	Crown Point	NY	2						8:40 p.m. EST. An elongated object with rays of light (light beams) from its underside was observed hovering above a neighbor's house. The witness called out another neighbor to see the object, which finally shot upwards out of sight. (NICAP report.)
660324	Ypsilanti-Hillsdale	MI	2						Time not reported. A train crew watched a UFO pace their train, pull ahead, hover, and climb (maneuver). The Civil Defense director was notified, and also saw the object. Together with other witnesses he watched a "docking" operation as a second UFO linked with the first. (NICAP notes.)
660324	Holland	MI	2						Time not reported. A car was buzzed by a glowing circular object with red and white body lights at an estimated 150-200 feet altitude. (NICAP notes.)
660324	China Grove	NC	2						8:30 p.m. EST. A round silver object with multi-colored body lights was seen about 200 feet above a house. Witnesses were attracted to it by a "weird" humming sound. Several other North Carolina sightings were reported on the same date. (NICAP notes.)
660324	Sheboygan	WI	2			BBU			a glowing bowl-shaped object on the road hovering
660325	Upper Sandusky	OK	2						1:00 a.m. EST. A top-shaped object with bright body lights visible on its outer edge was seen hovering about 25 feet over woods, point downward, by a farm couple for about an hour. (Associated Press story, few details.)

660326	Ann Arbor	MI	2						Time not reported. Engineers and technicians watched a glowing red disc maneuver, descend to about 10 feet, and fly parallel with the road for several moments. (U.F.O. Investigator, Vol. Ill, No. 7, Mar.-Apr. 1966, p. 4.)
660327	Loraine	OH	2						7:10 p.m. EST. A family saw what appeared to , be a double-decked craft with brightly lit windows on the upper surface. The object hovered, dimmed, shot eastward, returned, got brighter again, then sped away to the west. (NICAP notes.)
660328	Niles	MI	2						Early a.m. EST. A truck driver reported that an unidentified aerial object with red, green, and white body lights had paced his truck. When he blinked his headlights, the UFO blinked in apparent response (light reaction), veered away and disappeared. (NICAP notes.)
660328	Wilmington	DE	2						11:30 p.m. EST. Two witnesses in separate locations independently reported watching a hovering object that was flashing brilliant lights. The object, which made a humming sound, gyrated around erratically. (NICAP notes.)
660328	Fayetteville	TN	2			BBU			large lighted object 3 ft above the road on a hilltop
660329	Haverhill-Merrimac	MA	2						9:15 p.m. EST. About 15-20 miles southwest of Hampton, New Hampshire, several professional people including a deputy sheriff and a teacher saw a pulsating luminous white object moving back and forth. Its color changing from white to red to green to blue, and back to white. The object, circled, hovered, and then sped away leaving a short bluish tail, disappearing in an estimated 3 seconds. (Fowler, 1974, p. 336.)
660329	Hamilton, Ontario	CAN	2						9:15 p.m. EST. A teenage boy saw two luminous oval objects about 8 feet in diameter descend and land, making a buzzing sound. The objects had a row of multicolored lights around the rims (body lights) "flickering like a computer." He approached for a closer look, and touched the nearest object, which felt hard and smooth like metal. No heat or cold was felt. The boy then touched an antenna-like projection at the end of one of the objects and received a shock. Frightened, he ran home. His parents confirmed a 3-inch burn mark on his hand and questioned him thoroughly before reporting the incident to authorities. His first-degree burn was treated at a hospital and healed normally. (Keyhoe & Lore, 1969b, pp. 4-5; Bondarchuk, pp. 45-46, from the Hamilton Spectator, Apr. 2, 1966.)
660329	London, Ontario	CAN	2						11:15 p.m. EST. A bright saucer-shaped (disc) object with central dome and two protuberances (projections) on one side was seen hovering above Westminster Hospital for about 5 minutes. The object then flipped on edge, blue flame was emitted from the protuberances, and it rose into the clouds leaving a comet-like trail. An independent witness confirmed the sighting. (Flying Saucer Review, Vol. 12, No. 4, July-August 1966, P. 31.)

660330	Rehoboth	MA	2			BBU			8:00 p.m. EST. Three separate groups of witnesses had a series of sightings over a period of nearly two hours, including an object with amber body lights that passed over a car and hovered just off the road; an oval object with bright red and orange body lights that hovered over the road ahead of a car, taking off at high speed just as another car approached: and an object with flashing red body lights emitting a whistling or humming sound. (BB files, Fowler, 1974, pp. 125-27.)
660330	Pecos	TX	2						Time not reported. An oblong object estimated to be 85-100 feet long, with lights at top and bottom (body lights), landed near a highway, then took off about 5 minutes later. (NICAP notes; United Press International story.)
660330	Lexisburg (10 miles N of)	IN	2			BBU			family saw an oval object crossing the road as they were driving
660401	Tangier (5 miles S of)	OK	2			BBU			green object wider than the road flying N at very high speed
660403	Franklin	NJ	2						Time not reported. A disc-shaped object with three portholes hovered near a radio transmitter tower, seen by the station owner and his wife after hearing a deep rumbling noise. The object appeared to be "twice the size of a jet fighter plane." (Brief United Press International story.)
660403	Burlington, Ontario	CAN	2						10:15 p.m. EST. A domed UFO emitting a yellow glow hovered about 75 feet above Bronte Gorge, followed a car, then sped up and disappeared to the northeast. (NICAP report form.)
660404	Liberal	KS	2						Time not reported. A blue-green sphere hovered at low altitude, ascended and departed to the southwest. (NICAP notes.)
660404	Hague (<1 mile SE of)	FL	2			BBU			elongated object on the ground, 6 ft long, 2 ft high, with 6 openings
660405	Kittery	ME	2			BBU			4 people saw a landed object through binoculars
660405	Alto	TN	2			10384			Object 100 ft long oval with a dark top appeared cone-shaped
660406	Selkirk	NY	2						Time not reported. A huge grayish-white egg-shaped object with body lights and portholes hovered above trees, rocking back and forth. Finally it accelerated and sped away leaving a trail. (NICAP notes.)
660407	Beulah	MI	2						Time not reported. A cigar-shaped object with red and green body lights flew ahead of a car, circled back emitting sound (unspecified), and settled down behind a ridge. (NICAP notes.)
660407	Lincoln	NE	2						7:00-8:00 p.m. CST. A group of doctors, lawyers, and pilots saw a constellation of lights, including a large white "beacon" with 4-5 bright red lights, hovering at low altitude (estimated to be about 400 feet) for about 7 minutes during heavy rain. The object(s) suddenly sped away at "fantastic speed." (NICAP report.)
660409	Westport	MA	2						Time not reported. An unidentified object approached a car from behind, hovered over it, moved ahead, and ascended vertically out of sight. (NICAP notes.)
660416	Portage County	OH	2			BBU			various officers chased 30-45 ft metallic object from Ohio to PA
660416	Sherborn	MA	2						7:55 p.m. EST. An elongated elliptical object with bright red light on each end and blue lights along its perimeter was seen hovering off Route 16. [Compare to April 12, Brockton, Mass., sighting.] (Fowler, 1974, p. 337.)

660417	Peabody	MA	2						7:30-7:45 p.m. EST. Fifteen minutes later 5 miles south of Danvers, a series of sightings was reported by independent witnesses. An oval object with dome on top, and red, green, blue, and white flashing body lights, was seen flying in circular and zig-zag patterns. The object suddenly darted away at high speed and disappeared. One UFO hovered over a school, then moved away rapidly with up and down oscillatory motion. (Fowler 1974, p. 338.)
660417	Wakefield	MA	2						8:30 p.m. EST. About 9 miles southwest of Peabody, witnesses reported an oval object making a humming sound. It bobbed up and down rapidly and emitted white, red, and blue light beams as it descended to low level above Lake Quannapowitt. (Fowler 1974, p. 338.)
660417	Millersville	TX	2			BBU			man in car saw an sun-reflecting oval, car-sized object follow him
660419	Sharon	MA	2						12:15 a.m. EST. Citizens and police called to the scene to investigate saw an oval or egg-shaped obiect with a glowing rim that looked like lighted windows, and a steady red light on each end. The object hovered, then disappeared when an aircraft approached (aircraft avoidance), reappearing after it left. (Fowler 1974, pp. 128-130, 340; NICAP report.)
660419	Peabody	MA	2						12:00 p.m. EST. On the north-northeast side of the Boston metroplex, witnesses reported an oval object with red, green, f and white body lights, oscillating up and down when in motion. The object appeared to land in a field. Later two witnesses approached the field and saw unidentified lights rise and fly away. (Fowler, 1974, p. 339.)
660419	Hartford	Ct	2						8:00 p.m. EST. Two oval objects with red and green body lights hovered directly over the Rock Hill Veterans Home and Hospital. (Fowler 1974, p. 339.)
660419	Bellingham	Ct	2						10:00 p.m. EST. Two hours later about 80 miles east-northeast of Hartford, an elongated elliptical object with bright red lights on each end flew low, hovered, and made a hissing sound when moving. A separate report was received of a "piercing, humming object" two hours earlier at Stoughton. (Massachusetts NICAP Subcommittee report; Fowler 1974, p. 339)
660422	Halifax	MA	2						Time not reported. About 60 miles south of Beverly, three women saw a round object with colored blinking body lights pace above and ahead of heir car. A low humming sound was heard. (NICAP report form.)
660422	Springfield	MA	2						Time not reported. About 110 miles west-southwest of Beverly, a teacher and a boy saw a dome-shaped object with three lights on its underside hover, then accelerate away. (NICAP report form.)
660422	Alliance	OH	2						12:15 a.m. A disc emitting bright white light from a dome on top and with rotating red lights around the rim approached a car within about 40 feet, and hovered. The frightened witnesses fled at high speed, and the UFO apparently followed. The object was finally seen speeding away to the northeast. (Keyhoe & Lore, 1969a, p. 8; report by Walter N. Webb.)

660422	Wenham	MA	2						9:30 p.m. EST. Several witnesses at a college saw an orange circular object approach to within 600 feet at about 100 feet altitude. The object made a right angle turn and moved out of sight behind trees. (Fowler 1974, p. 340.) [Note: There are two towns named Wenham, one north and one south of Boston.]
660423	Warren	OH	2						Time not reported. A round white object approached and followed a car. (NICAP notes.)
660423	Randolph	MA	2						8:40 p.m. EDT. Police and others in a rural lake area sighted an "elongated egg shaped" (elliptical) object with white lights around its perimeter, colored flashing lights on its underside. (Fowler 1974, p. 340.)
660424	Ashby	MA	2			BBU			silent object with a bright blue light on top dive within 100 ft of a car
660423-24	Dorchester	MA	2						10:30 p.m. EST. Members of a family about 13 miles north of Randolph, Mass., saw a disc with dome on top and blinking red lights around the edge, and a brilliant yellow light on top of the dome, bobbing up and down as it moved. The yellow light blinked or flashed alternately with the red lights. The object stopped, hovering over a building. After a while it approached the family's apartment building and maneuvered between it and the adjacent building, emitting a humming sound. It hovered again briefly at the end of the alley, then moved away erratically to the east and disappeared. The same or an identical object was seen again several hours
660424	Johnson City	TX	2						3:30 a.m. CDT. An architect and Naval reserve officer camping out with his daughter heard a fluttering sound, then they saw a disc-like object (estimated 20 feet diameter) with a double row of lights or ports around the rim hovering 150-200 feet away at treetop height. It appeared to be rotating, and a blue light pulsated around its rim. The UFO gradually accelerated and moved away to the southwest. (NICAP report form; U.F.O. Investigator, Vol. Ill, No. 8, May-June 1966, p. 8).
660426	Follansbee	WV	2			BBU			silent 30 ft object shaped like 2 bowls, at 100 ft altitude ahead of a car
660429	Paraguay, Ascuncion	Argentina	2						3:55 p.m. LT. The pilot of a Beechcraft Bonanza en route to Posadas, Argentina, saw a gray object like one plate inverted on top of the other (disc) with portholes, and emitting an apparent exhaust. (Weinstein, 1999, p. 34, from Lumieres Dan La Nuit, No. 125)
660501	Watertown	MA	2						10:00 p.m. EDT. Four witnesses saw an oval object with bright rotating red, green, and white lights pass over the Watertown Arsenal. (Fowler 1974, p. 341)
660504	Cardington	OH	2						Time not reported. About 10 people watched a saucer-shaped glowing object hover above the trees for 30 minutes. Smaller lights, occasionally flashing, darted to and from it. The object departed when an aircraft approached the area (aircraft avoidance). (NICAP notes.)

660506	Carnestown	FL	2						2:05 a.m. EDT. In Collier County, southwest Florida, vicinity of Naples, a shaken motorist made a statement to Naples police about his car being approached from behind by a "large white light" that came within about 100-150 feet of his car, changing color to blue-green. He tried to flee, but the UFO zoomed past him making a "whooshing" noise, and circled around to the left and disappeared. (NICAP notes, police statement in Donald E. Keyhoe Archives.)
660523	Gainesville	FL	2						University campus police saw a round glowing object with outer ring of red lights, and a white flashing light in the center, hover above the athletic field, then fly away. (NICAP notes from newspaper story.)
660524	Temple City	CA	2						4:15 p.m. PDT. A woman driving in Temple City saw a strange object approach from the southwest, hover and bob around. She stopped and observed the object at relatively close range, at treetop level across a wide highway. "It was the shape of two geranium pots put together with the bands in the center," she said. Although the object was clearly outlined, there was a slight haze surrounding it. The color was bright green. Flashes of sunlight reflected off the surface, giving it a metallic sheen. On the body were what appeared to be a row of louvers and an antenna-like projection. After several minutes the object climbed to the northeast, observed as it moved away by employees of a nearby restaurant who were alerted by the witness. (Los Angeles NICAP Subcommittee report.)
660601	Lake Ontario	CAN	2						10:30 p.m. LT. A former RCAF pilot and a friend were cruising on the lake when they saw lights on the water ahead. As they approached within a mile, the lights rose with an audible "swish" and a pulsating humming sound. The two men now could see that it was a disc with dome on top, and it cast an oval reflection on the lake surface. Around the dome was a row of bright yellow lights, and blue-green lights were visible around the lower perimeter (body lights). After hovering briefly, the UFO took off at high speed and quickly disappeared. (U.F.O. Investigator, Vol. Ill, No. 9, Aug.-Sept. 1966, p. 5)
660602	Massillon	OH	2						Day. A moving luminous cigar-shaped object stopped, then discharged three smaller objects which rose, separated, and flew off in different directions. The parent object then went straight up at terrific speed. (NICAP notes.)
660608	Castlegar, British Columbia	CAN	2						11:00 p.m. LT. Three persons reported that their car was followed by an oval object about 6 feet in diameter moving about 10 feet above the power lines on a parallel path. The object was emitting a bluish glow, and two light beams extended from it, one pointing upward and the other downward. No sound was heard. (Flying Saucer Review, Vol. 12, No. 6, Nov.-Dec. 1966, p. iii; from the Castlegar News.)
660611	Westport	MA	2						3:45 a.m. EDT. A disc shaped like two plates one on top of the other, with a dome on top, white, yellow, blue, and green flashing lights around the circumference (body lights), buzzed over a car and hovered ahead over the road. (Fowler, 1974, p. 341; Boston Traveler, June 13, 1966, quoted in Flying Saucer Review, Vol. 12, No. 5, Sept.-Oct. 1966, p. 30.)

660613	Milan	MI	2			BBU			cops saw object on 3/17 and another on the ground on 6/13
660616	Mt. Sunapee	NH	2						Time not reported. A woman saw a large glowing obiect hovering near telephone lines. An articulated glowing pink to red-colored rod extended to the wires, withdrew, and then the object sped away over the mountains. (New Hampshire NICAP Subcommittee report.) The time probably is included in the NICAP file report.)
660623	Hamburg	NY	2			BBU			an intense red light lit the ground near a house
660718	Baytown	TX	2						9:00 a.m. CDT. Service station personnel saw a white object shaped like two saucers face to face (disc) with a row of square windows in between. The object was hovering above a store about 100 yards distant, then it began moving, rapidly accelerated and sped away. (McDonald, 1968a, pp. 57-58; Houston Post, Oct. 8, 1966.)
660720	Jaffrey	NH	2						10:30 p.m. EDT. An elliptical object with two rows of body lights passed over a religious center. As it progressed, the lights changed color from white to red to orange to yellow to green and back to white. (Fowler 1974, p. 341.)
660722	Fremont	IN	2						11:25 p.m.. While driving his son home from the railway station, a realtor (retired WWII Navy officer) and his son saw an illuminated, 25-foot diameter disc with portholes on its lower convex surface. The object descended low over the car and hovered above it. When two other cars approached, the object extinguished its lights, then shot straight up into the sky leaving a trail of bluish light. (Hynek, 1972, pp. 95-96, 238; Ridge, 1994, pp. 12-13; NICAP notes.)
660801	Prince George's County	MD	2						12:30 a.m. EDT. Citizens and police in College Park, Lanham, Bowie, Seat Pleasant, and elsewhere around the region saw maneuvering, fast-moving lighted objects. When a police officer approached a hovering object that had pulsating red, green, and white lights, it began a series of maneuvers, descended almost to the ground, then sped away "like a shot." Before it sped away, the object emitted a strange multi-colored light beam that moved rapidly to the ground, also observed by another officer. Andrews AFB denied to a County police dispatcher that they had any unknown objects on radar, but the dispatcher said a control tower operator had acknowledged seeing a fast-moving lighted object, and he later learned that Andrews did have a UFO on its radar but would not admit it officially. (U.F.O. Investigator, Vol. Ill, No. 9, Aug. -Sept. 1966, p. 4.)
660802	Vancouver, B.C.	CAN	2						10:30 p.m. LT. A man saw a disc-shaped object behind his house hovering about 400-500 feet off the ground. The object made no sound . It was a darker gray than the overcast sky. After about 45 seconds it accelerated, displaying twinkling lights, and disappeared. (Flying Saucer Review, Vol. 12, No. 6, Nov. -Dec. 1966, p. iii.)
660806	Harlingen	TX	2			BBU			dark obj hover over house and a dwarf in shiny overalls appears
660818	Oil City	PA	2						Time not reported. A train crew saw a thin elongated (cigar-shaped) object whose glow cast a green light over the area (environmental illumination). The glow lasted for about 7 seconds, and then the object shot away and disappeared. (NICAP notes.)

660819	Sault Ste. Marie	MI	2						Time not reported. A disc like an inverted dinner plate, with red and green body lights on top and bottom and flashing lights on the circumference, hovered over the Algoma steel plant. The object abruptly took off to the north at high speed, seen over a wide area. (NICAP notes; U.F.O. Investigator, Vol. Ill, No. 9, Aug. -Sept. 1966, p. 4.)
660831	Makklya	Finland	2						8:20 p.m. LT. A woman was called by her two daughters to observe from a balcony an object shaped like two plates, one inverted on top of the other (disc), flying at an altitude of about 200 meters. (Flying Saucer Review, 12(6), November-December 1966; from the He/s/ng/a Sanomet, Sept. 1, 1966.)
660905	unknown location	TX	2			BBU			peculiar light phenomenon and a small figure that entered a bedroom
660908	Marquette	MI	2						11:50 p.m. EDT. A legal secretary saw a yellow-white disc shaped like a soup plate that made a soft swishing sound as it flew across the highway, climbed, leveled off, and flew away. (NICAP report form.)
660917	Cranes Beach, Ipswich Bay	MA	2						4:45 a.m. EDT. A glowing cigar-shaped object oriented vertically, tilted at times, was observed for about an hour near the edge of the water. (Massachusetts NICAP Subcommittee report; U.F.O. Investigator, Vol. Ill, No. 10, Oct.-Nov. 1966, p. 4; Fowler 1974, p. 341.)
660921	Summerside, Prince Edward Island	CAN	2						6:30 a.m. LT. Eight RCAF pilots and crew members observed a bright circular object flying at high speed and maneuvering. The object stopped abruptly, descended and hovered near the ground for about 20 minutes. It then shot straight up and disappeared.
660922	Deadwood	SD	2						3:00 a.m. CDT. Police from several vantage points saw a large white hovering object, changing color to green, red, and back to white. When a spotlight was shone on it, the object would black out (light reaction). Two smaller white objects operating independently approached and hovered nearby. The large object bobbed around and emitted light beams toward the ground, and finally sped away. (Sagan & Page, 1972, pp. xxii-xxiii.)
660930	Anderson	IN	2						2:00 a.m. EDT. Police sighted a white ball of light surrounded by a bluish-white pulsating glow (halo effect), sometimes flashing red. The object maneuvered, made a sharp turn and flew southwest beneath an overcast, hovered over trees, rose and descended. (Indiana NICAP Subcommittee report; NICAP report form; police department report).
661014	Newton	IL	2						6:45 p.m. CDT. A yellow-orange disc-shaped object with a blue rim and a row of red lights just under the rim was observed at low level, its glow illuminating the ground. Static interfered with the telephone, and TV interference also was experienced (EM effects) during the sighting. (Keyhoe & Lore, 1969a, p. 45.)
661023	Randolph Twp	NJ	2						8:45 p.m. EDT. A policeman watched as a bright yellow oval UFO approached slowly at low altitude, then sped away when he shone a spotlight on it (light reaction.). (NICAP notes, from newspaper story-)
661026	Cold Bay AFS	AK	2			11092			tower operator saw a white object approach runway

661028	Lawrence	MD	2						1:00 a.m. EDT. A newspaper editor responding to phone calls saw a glowing white, cigar-shaped object hovering at a 45-degree angle over water towers. A closer witness saw bright white lights along its side. (Fowler 1974, p. 342.)
661112	Fort Ontario	NY	2						9:35 p.m. EST. A number of witnesses including a former Navy radarman reported a dark domed disc with a row of orange portholes along the lower portion. The object, illuminated by a faint glow, first hovered and then shot upwards out of sight. (NICAP report form.)
661113	Fords	NJ	2						5:35 p.m. EST. Several witnesses including a private pilot saw a very bright, round, pulsating orange light that hovered over a school emitting a humming sound. (NICAP notes.)
661115	Gaffney	MA	2						7:15 a.m. EST. Two hunters in a boat off the coast saw two cigar-shaped objects hovering in a horizontal position over the Beverly Farms area. (Fowler 1974, p. 342.)
661118	McMinnville	OR	2						12:25 a.m. PST. Several witnesses in a car reported an elongated greenish-white oval that hovered or moved slowly at low altitude. The driver felt and heard a deep vibration. (NICAP report.)
661118	Hawkinsville	GA	2						9:30 p.m. EST. Several witnesses including the chief of police saw a dark gray or black disc, with red, blue, green, and white body lights around its perimeter, hovering silently. It had a length to width ratio of 4:1. After a while the object started to move away, and receded into the distance where six more objects were visible (rendezvous). After 5-10 minutes, the objects suddenly disappeared. (Hitt, 1999.)
661201	Middleboro	MA	2						6:35 p.m. EST. An obiect with a curved surface, apparently oval, with two large bright red pulsating lights, dived in front of a car and hovered over woods just off the road. (Fowler 1974, p. 342.)
661202	Lake Sarah	MN	2						2:00 a.m. CST. A farmer saw a disc-shaped object an estimated 40 feet in diameter hovering over a corn field, making a noise like whirling wind. The object moved away, returned and hovered again, then lifted straight up and moved away to the east emitting a red glow. (NICAP notes based on newspaper story.)
661213	Rowley	MA	2						1:00 a.m. EST. A glowing red-orange oval object with a halo of light around it descended and approached the witnesses, t then disappeared behind an embankment. (Fowler 1974, p. 343.)
661230	Haynesville	LA	2			BBU			bright, pulsating glow, changing from orange to white, in the woods
1/0/1967	Galesburg	IL	2						One Knoxville farmer and several motorists reported that the UFO "was round, big as a house, had no flying lights, but let off a greenish-blue light." Vibrations from the craft could be felt in the farmer's truck as it followed him along the Victoria blacktop about 7:00 PM. (Skylook 41, p. 13)
670105	Winsted	MN	2			BBU			75 ft object landed on road, man dressed in blue overalls exited craft
670106	Harwich	MA	2						11:45 p.m. EST. A man and his daughter saw a thick, double-convex (lens-) shaped disc with a dark upper surface, trapezoidal sections of fluorescent light on the lower portion, and pulsating colored lights (body lights). The obiect responded to house spotlights by blinking in the same sequence (light reaction). (Air Force report form in Colorado Project files.)

670110	Bruceville	IN	2						8:30 p.m. EST. A woman and her son, 16, were driving home when they saw an elliptical dull gray object glowing a bluish color around the rim. It was estimated to be 25 feet over the car, 30 feet in diameter and 8 feet thick. The object hovered, moved slowly, then accelerated away. It displayed a disc shape when it banked slightly, and it had several dim lights (body lights) on its rim. (Ridge, 1994, p. 19. from APRO Bulletin No. 15.)
670110	Bangor	ME	2						10:50 p.m. EST. An electronics technician heard an intermittent sound that changed in pitch, then saw over the treetops two brilliant lights. Each light was dome-shaped and had a ring at the outer circumference. (Narrative from witness in Donald E. Keyhoe Archives files.)
1/15?/1967	Boxford	MA	2						3:00 a.m. EST. A witness saw a bright red object that looked like an upside down saucer (disc) with a white glowing rim. The object approached and circled the witness's home before moving away and disappearing. (Fowler, 1974, p. 343.).
670115	Granville	MA	2						5:45 p.m. EST. A woman and her two nieces saw a domed disc with white light emanating from portholes in its base. The object was seen three times within 20 minutes before disappearing. (Hartford Courant, Conn., 1/16/67; Gillmor, 1969, case 13; Keyhoe and Lore, 1969a, p. 45; U.F.O Investigator, Vol. Ill, No. 11, Jan. -Feb., 1967, p. 4.)
670115	North Granby	CN	2						Unspecified time. Six miles to the southeast of Granville, MA in North Granby, Conn., two women saw a disc-shaped object with a flange around it and white beams of light from portholes. The object passed between witnesses and a mountain. (Springfield Union, Mass., 2/22/67, copy in Keyhoe Archives)
670115	Roosevelt	UT	2						6:00 p.m. MST. Two couples saw a yellow glow coming from inside a dome-shaped object estimated to be two miles away. The object hovered and moved around slowly. (Salisbury, 1974, Case 40, Table 1)
670116	Warner	NH	2						5:00 p.m. EST. A motorist noticed a bright light seemingly pacing him. A long cigar-shaped object with amber windows eventually came toward him on a slow and steady course, and he heard a soft purring sound. (New Hampshire NICAP Subcommittee report, NICAP files.)
670116	Warner	NH	2						5:15 p.m. A couple in the same area reported seeing a slow-moving gray object with body lights. At 5:30 pm a woman and her daughter saw an object that looked like a box kite without paper (presumably rectangular) with two bright headlights on the front. The object was moving slowly, and hovering soundlessly, but there was a purring sound when it started to move away rapidly. All witnesses reported the object to be huge. (U.F.O Investigator, Vol. Ill, No. 12, Mar.-Apr., 1967, p. 5.)
670117	Freetown	IN	2						Francis Bedel, Jr., (23) of Portland, Indiana, was driving on State Highway 135, a two-lane blacktop road, north of Freetown, he later reported to State Police, when a brilliant glowing white light darted into his field of vision. (NICAP files)

670117	Freetown	IN	2						On the same stretch of highway on the same night, Mr. & Mrs. Phil Patton of Freetown, reported to State Police that a brightly lighted disc-shaped craft, about 30 feet in diameter, came down alongside their car. (NICAP files)
670118	Williamstown	MA	2						12:15 a.m.EST. Four witnesses saw a flash in the sky just before a power failure occurred. Then they saw a domed disc with body lights. It was near the ground on the opposite bank of the Green River. A red glowing object buzzed their car as they drove away. (Air Force report, Project Blue Book files, National Archives; Fowler, 1974, p. 343.)
670118	Norton	MA	2						6:30-6:45 a.m. EST. A man saw a cloud-like object with flat bottom, a dome on top, and a blue stripe. It hovered over an airport, then accelerated and sped away, disappearing in 3 seconds. (Robinson letter, NICAP files.)
670118	Shamokin	PA	2						6:00 p.m. EST. A family watched a disc with a red light on a projection at the rear approach at low altitude (estimated 400-500 feet), viewed through binoculars. As it neared, the object emitted two pinkish-white light beams downward at about a 45-degree angle from its forward edge. It then turned, rose suddenly, joined a second object and both sped away. (Keyhoe and Lore,1969a, p.43.)
670119	Dunbar	WV	2						9:05 a.m. EST. The owner of an appliance store saw a dull aluminum-colored sphere with a flange around the middle and a window at the top hovering about 4 feet over the road ahead of him. He estimated it to be 25 feet in diameter. When he was 10 feet from it, the object took off and swiftly rose out of sight. (NICAP report; Charleston Gazette, 1/20/67; Huntington Herald 1/20/67; Keyhoe and Lore, 1969a, sketch p. 46; Flying Saucer Review, 13 (3), May-June 1967, p. 4; U.F.O. Investigator, Vol. Ill, No. 11, Jan.-Feb., 1967, p. 4, dated as Jan. 17.)
670119	Shamokin (area)	PA	2						Around 6:00 p.m. Another family reported two objects, one with light beams with red/green blinking lights across the front, a halo of bright light, and two "antennae" on the top. About 45 minutes later, a pastor reported following an object in his car that had two antennae on the top near the rear of the object. (U.F.O. Investigator, Jan.-Feb., 1967, p. 8.)
670121	Gering	NE	2						4:15 a.m. MST. Two men saw a white or silver object with red, white, and blue pulsating body lights. It hovered for about 2 minutes and then seemed to follow their car. (Hall letter, Scottsbluff, NE., in NICAP files.)
670124	Westport	CN	2						6:00 a.m. EST. A driver for a news service saw an elliptical object with many colored lights or ports on the underside, some red, some green. The object hovered over a house for 15 minutes, then flew away. (Westport News, 1/26/67, copy in NICAP files.)
670203	Lindsborg	KS	2						7:40 p.m. CST (8:40 p.m. EST). Five people watched a disc or ellipse that first flew like an airplane, but then moved with irregular, jerky, up and down motions, and sometimes with hesitating forward motion. The object hovered over the highway for 15-20 seconds, then sped from sight in 15 seconds. Witnesses could see military bombing practice in the distance at the same time. (NICAP report form.)

670203	Hamilton, Ontario	CAN	2						8:30 p.m. EST. A man saw an object estimated to be 30 feet in diameter and 15 feet thick with a row of white lights and a tangerine-colored light on the bottom (body lights). The object zipped back and forth at terrific speed. Observations were made from various points coordinated by two-way radios. (Hamilton Spectator, 2/4/67, copy in NICAP files.)
670204	Gary	IN	2						7:00 p.m. CST. A woman saw two large, square amber lights with a green light between them from her home. The lights approached silently and hovered an estimated 30 feet above the ground about 100 feet away from her. (Letter from witness, 2/5/67, Donald E. Keyhoe Archives files.)
670204	Homer City	PA	2						9:15 p.m. EST. A sales engineer and a county assessor saw an egg-shaped object for 10 minutes, apparently on or near a hill at a reservoir. The object rose slowly to around 50 feet, hovered, then moved away after performing several radical maneuvers. (Johnstown Tribune-Democrat, Pa., 3/11/67, copy in NICAP files.)
670205	Oakland City	IN	2						1:45 a.m. EST. Seven members of a band saw an object that first looked like a boomerang, then appeared like a teardrop. It was a pale greenish-blue color with a cluster of white lights (body lights). The object also was seen by people in another car as it moved northwest. (Ridge, 1994, p. 20.)
670205	Crothersville	IN	2						2:30 a.m. Richard D. Barker of the Seymour State Police post reported he followed a huge ball of greenish-blue and white lights for some 10 miles about 2:30 AM before the light moved west towards Bedford. (Ridge, NICAP files)
670205	Bedford	IN	2						6:00 a.m. The woman reporting requested anonymity. The report she gave to the DAILEY HERALD-TELEPHONE provided the most vivid description of an unidentified flying object observed as far southwest as Oakland City and as far east as Crothersville.....35 miles away. At this time she arose because of noises on the roof roof. (Ridge, Clipping in NICAP files)
670205	Barkhamsted	CT	2						8:00 p.m. EST. Two couples in a car at the Barkhamsted Reservoir saw a dark sphere with randomly blinking red, green and white lights (body lights) around the edge. The object approached the witnesses, then hovered over the reservoir. (NICAP report form and report from Ted Thorben, NICAP investigator, 10/20/67.)
670206	Deming	NM	2						Noon MST. A woman saw two green cigar-shaped objects with a row of windows. Two small "propellers" were on top of each end. One object hovered over the highway, then paced the car and was joined by the second object that rose up from the ground. (Lubbock Avalanche-Journal, Texas, 8/10/67; NICAP report form.)
670206-07	St. Louis	MO	2						Midnight CST (1:00 a.m. EST). A couple was approached by an oval object that hovered just above the ground displaying red, blue, green, and white flashing lights. The object then flew away. (St. Louis Post Dispatch, 2/7/67, copy in NICAP files.)

670207	Westport	CT	2						12:20 a.m. EST. A former Navy pilot and airline navigator saw a brilliant white light, sometimes with a strong red light. The object oscillated as it flew along over the Merritt Parkway and returned. (Westport News, 2/9/67, copy in NICAP files.)
670207	Westport	CT	2						1:00 a.m. A woman saw an elliptical object with two flashing white lights and two steady white light beams. It flew at low altitude, slowly and silently. (Westport News 2/9/67, copy in NICAP files.)
670207	Owen County	IN	2						8:00 p.m. An egg-shaped object was reported by Paul Poorman on a farm near some strip mines. Poorman was a 33-year-old specialized police officer and qualified pilot. The object was white and well-defined, turned to a blood-red color, then a pale blue. (Don Worley files)
670208	Rossville	KS	2						Night. Three teenaged boys saw what looked like two car lights that came down to within 20 feet of the ground. The object shone a light beam on the witnesses after they had pointed a spotlight at it (light reaction). (Topeka State Journal, Kans., 2/18/67, copy in NICAP files.)
670208	Pleasant Valley	CT	2						10:00 p.m. EST. A newspaper reporter watched a bright orange ball or cylinder hovering over pine trees for several minutes. (Hartford Courant, Conn., 2/14/67, copy in NICAP files and in Donald E. I Key hoe Archives files.)
670209	Chester	MT	2						6:30 a.m. PST. A railroad foreman saw a saucer (disc) with a bright body light hovering over the railroad depot. The depot was engulfed in light (environmental illumination). The object departed straight up. (Spokane Spokesman-Review, Wash. State, 2/12/67, copy in NICAP
670209	Seymour	IN	2						7:50 p.m. EST. A state policeman saw a huge object, moving slowly, changing colors from white to red to orange, the color change associated with changes of speed (color/speed correlation). Venus was visible separately at the same time. (Ridge, 1994, p. 21.)
670210	Caledonia, Ontario	CAN	2						2:20 a.m. EST. A couple saw a metallic-appearing, saucer-shaped object with bright red and white lights (body lights). The object hovered for about 15 minutes and then flew away. A whirring sound was heard. (Hamilton Spectator, Ontario, 2/11/67, copy in NICAP files.)
670210	Alton	IL	2						7:30 p.m. CST. A couple saw a round, rotating, 25-foot diameter luminous object which changed color from red to white with occasional flashes of green. The object also had white lights in a triangle on the bottom (body lights). It flew, hovered, and passed over the witnesses. While hovering, a humming or droning sound was heard. (St. Louis Globe-Democrat, Missouri, 2/11/67, copy in NICAP files.)
670210	McCune	KS	2						10:30 p.m. CST. A high school teacher saw an unidentified light that changed from red to white to green. The object hovered, then left with a tremendous burst of speed (rapid acceleration). (NICAP report form.).
670210	Sandusky	OH	2				**NC**		Saucer hovers over AEC facility with blue beam
670211	Greenwich	CT	2						Night. An engineer and his wife saw a cylinder with a string of red and white lights (body lights). A steady light beam was emitted from the bottom. The object descended rapidly, then rose again. (Westport News, Conn., 2/16/67, copy in NICAP files.)

670212	Wharton	TX	2						Evening. Many people, including an airport manager, saw a bell-shaped object with bright light in the dome and revolving red, green, blue, and amber lights at the bottom edge (body lights). The object flew over the witness's car just above phone wires along the road, appearing big enough to cover the highway. It was later seen at tree-top level, where it hovered, banked, and took off. (Hall, 2001, p. 160; Houston Chronicle, Texas, 2/15/67.)
670212	Barrow	AK	2						Night. A man saw a basically red object that also emitted some bright green light. The object maneuvered and reportedly landed on ice for up to 20 minutes. It also hovered over a theater. A power failure occurred about the same time. (Fairbanks News-Miner, Alaska, 2/14/67, copy in NICAP files.)
670212	Kensington	CT	2						6:00 p.m. EST. Two known witnesses (plus other curious motorists) stopped to observe a bright white glowing object that had a red light on each side (body lights) hovering just off the road. (Fowler, 1974, p. 344.)
670212	Willington	CT	2						6:10 p.m. A man saw a bright white object that looked like a welding arc hovering over power lines. It was blindingly bright and brought tears to his eyes. (The Hartford Courant, Conn., 2/14/67, copy in Donald E. Keyhoe Archives files.).
670213	Tabor	IA	2						Early Evening. A man saw a large round red object with a searchlight (light beam) directed downwards that was sweeping the ground. The object moved slowly at first, then accelerated. (Letter dated 2/22/67 in NICAP files.)
670213	Davis	CA	2						7:15 p.m. PST. Two women driving home saw an object that came within 100 yards of their car. The initial light resolved itself into three huge lights in a triangular formation. (NICAP report form; McDonald, 1967, case 7; reprinted in Vaughan, 1995, pp. 205-6.)
670213	Woodland	CA	2						8:30 p.m. PST. An ex-Air Force man with pilot training saw a bright light for 25 minutes which maneuvered and seemed to pace his car. (NICAP report form, Los Angeles NICAP Subcommittee report, NICAP files.)
670214	Bellingham	WA	2						6:30 p.m. PST (8:30 p.m.). A woman saw a cigar-shaped object with rotating red, green, orange, and white lights (body lights). The object both hovered and darted around in various directions. The witness could see its reflection in the lake. (NICAP report form.)
670214	Suncrest	WV	2						6:45 p.m. EST. Two women and other family members saw a silvery disc, with porthole-like openings visible around the perimeter. Rays of light (light beams) occasionally were emitted from these openings in a variety of colors. The object hovered, then moved off making a sound like a strong wind. (Morgantown Dominion News, West Virginia, 2/15/67, copy in NICAP files; undated Kalapaca investigation report in NICAP files.)

670214	Lee's Summit	MO	2						7:50-8:30 p.m. CST. Two women saw a house-sized oval object with red, green, and blue blinking lights (body lights). The object hovered at about 40-50 feet altitude. Later it maneuvered around a U.S. Air Force plane that was searching for it, directed by one of the women via telephone. According to the newspaper report, the pilot was unable to see the object. (Kansas City Star, 2/16/67, copy in NICAP files.)
670214	West Frankfort	IL	2						8:20 p.m. CST. A woman saw an object shaped like a derby hat (domed disc) with a metallic sheen. The object hovered, then flew low over trees, remaining visible for 3-4 minutes. (NICAP report form.)
670215	Denton	TX	2						8:10-8:40 p.m.. CST. A teacher's car was followed by a flashing red light at various distances (car pacing). Two of the witness's students confirmed the report. (Letter dated 2/17/67 in NICAP files.)
670215	Arizona, Tennessee and Texas	Various	2						8:30 p.m. Widespread reports from Arizona, Tennessee, and Texas of a prominent fiery object shedding sparks and leaving a trail. A loud sound, flames, falling debris reported. Estimated duration 1-2 minutes. [Note: Positively identified as a satellite re-entry.]
670216	Towanda	PA	2						6:00 p.m. EST. A woman saw a big round light that moved and hovered, then shot out of sight. (NICAP report form.)
670216	Bombay	NY	2						7:15 p.m. A woman saw a round, white shiny object with a ring of orange stars around it at treetop level. The object stopped, hovered, and bobbed around. (Letter in NICAP files.) (Ogdensburg Journal, N.Y., 2/17/67, copy in NICAP files.)
670216	Augusta	GA	2						11:00 p.m. EST. A very bright luminous orange obiect rose out of the woods, its glow illuminating the terrain (environmental illumination). The object followed two women in a car on U.S. 1 south of the city, disappearing after about 5 minutes. (Hitt, 1999.)
670216	Kingman	AZ	2						11:45 p.m. MST. A soldier and his wife saw an pval object with red and green body lights approach their car at low altitude late on a cloudy night. The ground was illuminated (environmental illumination) by a moving light beam emitted from its bottom center. (Letter from witness, 9/14/67, NICAP files; U.F.O. Investigator, Vol. IV, No. 3, Nov.- Dec.. 1967, p. 3; Keyhoe and Lore, 1969a, p.44).
670216	Stoughton	WI	2			11383			a light with faded edges follow car
670217	Dorchester	MA	2						6:55 p.m. EST. A witness saw a cymbal-shaped object (disc) with a dome on top and 4-5 purplish lights around its perimeter (body lights). The object hovered at treetop height over a housing project for the elderly, then moved away. It made a whirring/beeping sound, which two other people also heard. (Fowler, 1974, p. 344.)
670217	Andover	MA	2						About 6:55 p.m. An airline salesman driving on route 93 slowed his car as he saw an object hovering silently just over the road. Uncomfortably, he drove underneath it and saw other people in cars looking at it. (Massachusetts NICAP Subcommittee Report, NICAP files; Project Blue Book files, National Archives; U.F.O. Investigator, Vol.. Ill, No. 12, March-April 1967, p. 6; Fowler, 1974, p. 344.)

670217	Lawrence	MA	2						7:45 p.m. An electrical engineer and his wife going south on Route 93 saw a loose cluster of 8-9 red, green, and white lights apparently on an object at low altitude and moving very slowly. A bright white light was at the bottom of the cluster (body lights). The object, going NE, passed over the road. (U.F.O. Investigator, Vol. Ill, No. 12, March-April 1967, p. 6).
670217	Palmer	MA	2						8:15 p.m. EST. Three yellow-reddish-orange globes of light moving with a smooth gliding motion were seen within 50 feet of a power line. The objects sometimes bounced up and down, and they moved away as a car approached. (Haines, 1994, p. 114; from Story, 1980, p. 202.)
670219	Putnam	CT	2						2:00 a.m. EST. Two police officers saw and pursued a large orange glowing object that moved with a fluttering side-to-side (oscillatory) motion. The object moved fast, hovered, moved slowly, and changed color to pink. (Worcester Evening Gazette, Mass. 2/20/67, and Hartford Courant, 2/21/67, copies in NICAP files.)
670219	Wharton	TX	2						Night. A series of independent sightings was reported overnight southwest of Houston near the Gulf coast in Wharton, Bay City, and Lane City. Witnesses included businessmen and prominent citizens. Exact times generally were not specified. (Houston Tribune, Texas, 2/23/67, copy in NICAP files and in Donald E. Keyhoe Archives files.)
670220	Oxford	WI	2			11394			an orange red object fly parallel to a truck
670220	Wharton	TX	2						Evening. Three bank employees in the Wharton area watched a moving red light that when viewed through binoculars appeared to be a saucer-shaped object, like two incandescent platters inverted one on top of the other and glued together at the rims. The object was flashing red, blue, yellow, and white lights (body lights). It hovered over smoke-stacks, shot up at a 90 degree angle, then dove and retraced its pattern several times.
670220	Binghampton	NY	2						9:10 p.m. EST. A Salvation Army Director while driving saw an object with airplane-like lights (body lights), but it then acquired a brilliant glow and flame was emitted from one end. The object hovered over the car, then sped away. (Binghampton Sun Bulletin, 2/21/67, copy in NICAP files.)
670221	Hungerford	TX	2						9:55 a.m. CST. A rancher saw a glowing disc at low altitude. The object was viewed for 10 minutes, until it shot straight up making an impossible L-shaped maneuver. (Houston Tribune, 2/23/67, copy in NICAP files and in Donald E. Keyhoe Archives files.)
670221	Parkville	MD	2						12:45 p.m. EST (11:45 a.m. CST). A man along with his mother saw a metallic-appearing object that hovered, circled (maneuvered), then accelerated and flew away rapidly. (Letter dated 3/25/67 in NICAP files.)

670221	Winfield	KS	2						8:35-9:00 p.m. CST. Two people saw a brilliant white cylinder that moved up and down, and back and forth, with a "quivering" motion. The object flew off, returned, hovered again, changed color to glowing red and departed. It then returned, hovered again for 3 minutes, and finally sped away. (Winfield Daily Courier 2/23/67, copy in NICAP files.) [Note: There is a Titan II ICBM Missile site located near Winfield.]
670222	Hagerstown	IN	2						Evening. A minister and his wife saw two airborne lights like headlights along with other colored lights. (Richmond Palldium-ltem, Ind., 3/3/67, copy in NICAP files; Keyhoe and Lore, 1969b, p. 34.)
670223	Boneta	UT	2						8:00 p.m. MST (9:00 p.m. CST). A milk truck driver saw a luminous orange object that paced his truck. When he stopped his truck and turned the lights off, the object shot straight up and out of sight. (Salisbury, 1974, Table 1, Case 41F.)
670223	Carterville	IL	2						8:10 p.m. CST. Two women saw a light so bright it hurt their eyes to look directly at it (brilliant luminosity). The object hovered, accelerated, and appeared to land in a clump of trees. It emitted a constant humming sound. The object disappeared after about 25 minutes. (NICAP report form.)
670223	Marion	IL	2						9:30 p.m. CST. A woman saw a red oval object surrounded by a pink glow (halo effect). The object hovered over a truck, then over the witness's car after the truck moved away. (Report in NICAP files; Marion Weekly Leader 2/23/67, copy in NICAP files.)
670226	Marlboro	MA	2						2:00-2:20 a.m. EST. A former teacher and her husband were awakened by an intermittent roaring sound. They sighted a white T glowing egg-shaped object with a red light on each side (body lights). Fowler, 1974, p. 345; Massachusetts NICAP Subcommittee report in NICAP files.)
670226	Abbotstown	PA	2						3:45 p.m. EST. A couple saw a small gray object approach just above the treetops and hover for about 2 minutes, glowing like white-hot metal and wobbling while stationary. (NICAP report form, 3/28/67.)
670226	Wiarton, Ontario	CAN	2						7:30 p.m. EST. Nine people in southeastern Ontario, including four provincial policemen, saw a bright shining object with lights changing color from white to green (body lights). (London Free Press (Ontario) 2/27/67, copy in NICAP files.)
670226	Coshocton	OH	2						7:45 p.m. EST. Two policemen saw two light-colored saucers of different sizes with associated red flames. The larger object was stationary and the smaller object hovered about it (satellite object). (Dover Daily Reporter, Ohio, 2/28/67, copy in NICAP files.)
670228	Madisonville	KY	2						6:30 p.m. EST. A couple saw a round object hovering overhead for about a minute. It had red and green body lights. The object then accelerated and sped away. It made a sound like a "low roar." (NICAP report form.)
670228	Grand Haven	MI	2						Night. Twelve people, including six deputy sheriffs, observed an unexplained object for several minutes. They provided two descriptions: (1) a reddish-orange object, and (2) a cluster of lights with bright center, reddish edges, and oval shape. (Ann Arbor News, Michigan, 3/1/67, copy in NICAP files.) .

670300	New Cuyama	CA	2						Night. A teacher saw a dome-shaped object with orange body lights on the ground (landed), which then rose, hovered, and departed. The witness claimed to be silenced by the U.S. Air Force. (Los Angeles NICAP Affiliate report, NICAP files.)
670301	Blairsville	PA	2						7:00 p.m. EST. Two witnesses watched an object the shape of a lamp shade (truncated cone) with a bright center stripe. The object hovered level, tilted, then accelerated and flew away very fast after 5 minutes. (Air Force UFO report form, copy in NICAP files.)
670301	Sharon	MA	2						7:25 p.m. EST. Two separate witnesses saw a white glowing oval object which moved about in the area of their homes. The object was silent and left a white flowing fuzzy trail in its wake. (Fowler, 1974, p. 345.)
670301	Toledo	OH	2						7:30 p.m. EST. Two couples saw a saucer-shaped object with flashing red and green lights. The object hovered briefly, then suddenly accelerated and zoomed out of sight. It was observed several times over a period of 20 minutes. (Toledo Record, 3/4 or 3/5/67, copy in NICAP files.)
670301	Gosport	IN	2						9:30 p.m. EST. Five people in a car saw a red object, fuzzy around the edges, estimated 50 feet long and 9 feet high (narrow oval or cigar-shaped). The object stopped, hovered, moved back and forth 500 feet away, then accelerated and departed at high speed. (Ridge, 1994, p. 21.)
670301	Poland	IN	2						10:05 p.m. About 20 miles northwest of Gosport, four people in a car saw a luminous red disc with a dome. It followed the car for miles (vehicle encounter), then hovered. (Ridge, 1994, p. 21.)
670302	Piggott	AR	2						11:30 p.m. CST. About 130 miles north-northwest of Memphis, Tenn., a junior high school science teacher and coach saw four lights that hovered at treetop level, then joined by more lights (rendezvous). (Memphis Press-Scimitar, 3/4/67, copy in NICAP files.)
670303	Wheaton	IL	2						7:00 p.m. CST (8:00 p.m. EST). Two people had several sightings of a bright fuzzy ball of light (spherical) one-fourth of a degree in diameter. It moved rapidly and made direction changes (maneuvered). (Letter dated 3/3/67 in NICAP files.)
670303	Wheaton	MA	2						7:25 p.m. EST. Two people watched a glowing yellow disc with a small red body light moving slowly to the west. The object stopped and hovered for a long time, then flew away to the east. A sound like a swarm of bees (buzzing) could be heard. (Letter 3/8/67, in NICAP files.)
670303	Plantation	FL	2						9:00 p.m. EST. Seven high school students saw two glowing pyramids (truncated cones?), followed by an orange flash. The objects landed in the middle of a road, then rose and disappeared. Other sightings were reported in the area. (Pompano Beach Sun-Sentinel, Florida, 3/7/67, copy in NICAP files.)
670303	Lewiston	IL	2						10:20 p.m. CST. A couple saw a large oblong object with 4-6 large square luminous windows in a row along the side. (Lewistown newspaper, copy in NiCAP files; Air Force report, Project Blue Book files, National Archives.)

670304	Vicco	KY	2						2:30 a.m. EST. Two witnesses saw a half-egg-shell (dome-) shaped object; its color varied from brown-red to dull orange to bright white. The object hovered and maneuvered at low level, as smaller objects emerged from its underside. The sighting lasted more than 35 minutes. (NICAP report form.)
670308	Goodland	KS	2						2:00 a.m. MST. A newspaper editor and two policemen saw a torpedo-shaped object with multi-colored flashing body lights that flew irregularly at high speed. The object had bright light beams at each end, and a made a sound like a huge vacuum cleaner. (Wichita Eagle, Kansas, 3/9/67, copy in NICAP files; McDonald, 1967, Case 6, reprinted in Vaughan, 1995, p. 205.)
670308	Sidney	AU	2						10:10 a.m. LT. Two women saw a grayish disc come out of clouds, disappear behind a railroad station, reappear and go back into the clouds, disappearing after 15 minutes. The object made a weird humming sound. (Sydney Sun-Herald, 3/12/67, copy in NICAP files.)
670308	Aurora	IL	2						12:00 Noon CST. A couple saw a brilliant red and blue circular object that emitted a beam of light. The object hovered, approached, then rose up and disappeared into or behind a small cloud after 3-4 minutes. (Aurora Beacon-News, 3/9/67, copy in NICAP files.)
670308	Westmont	IL	2						6:55 p.m. CST (7:55 p.m. EST). About 300 miles to the West of Grosse Pointe Woods, Mich. (see previous entry), several witnesses saw red and green lights that approached slowly at treetop level, then shot upwards, leveled off and moved quickly across the sky, disappearing behind trees and radio towers near the horizon. (Report by local resident received 10/25/67, NICAP files.)
670308	Caledonia	MO	2						7:15 p.m. ST (8:15 p.m. EST). A couple saw a shiny metallic watermelon-(elliptical-) shaped object with many body lights around the perimeter (green and red, plus white, blue, and yellow-orange). The object hovered overhead, then moved away rapidly. (Bardstown Standard, Kentucky, 3/16/67, copy in NICAP files.)
670308	Grosse Pointe Woods	MI	2						7:45-8:10 p.m. EST. Five witnesses saw a fiery glowing object shaped like a camp lantern or cone. Pictures were taken but reportedly show little. There were also reports of both civilian and military radar contact. (Frey report in NICAP files, NICAP report form.)
670308	Oswego	NY	2						8:10 p.m. EST (7:10 p.m. CST). A woman and her young daughter saw an oval with three red ports. The object emitted green" flashes as it passed overhead in straight level flight at moderate speed. (NICAP report form.)
670308	Houston	TX	2						8:35 p.m. CST (9:35 p.m. EST). A woman and four children saw an object described as "tower" shaped, with large "wings" and red, green, and white body lights. The object hovered over some trees for several minutes, then took off straight up and disappeared. (Houston Post, 3/9/67, copy in NICAP files.)
670308	Denver	CO	2						9:00 p.m. MST (10:00 p.m. CST). A greenish disc with dome was observed moving on a level course, then curving downward. (Air Force report No. 00534B in Colorado UFO Project files.)

670309	Shamokin	PA	2						Time not reported. A bank treasurer and his wife saw an enormous row of lights that eventually took on a round shape as an object neared and hovered over a mountain tree line. (U.F.O. Investigator, Vol. Ill, No. 12, Mar.-Apr. 1967, p. 8.) .
670309	Savanna	IL	2						8:35 p.m. CST (9:35 p.m. EST). Police and others saw a glowing disc with flashing red, green, and yellow body lights. The object hovered at first, then moved at high speed. Many other sightings were reported in the area. (Clinton Herald, Iowa, 3/10/67, copy in NICAP files.)
670309	Fort Wayne	IN	2						9:15 p.m. EST. A man (minister, ex-prison guard) saw a group of lights in an X formation that hovered, blinked on and off in sequence, turned like a top (rotated), and shot away. (Federspiel letter in NICAP files.)
670309	Las Cruces	NM	2						9:30 p.m. MST (10:30 p.m. CST). Two administrative staff members of the White Sands Test Facility northeast of Las Cruces saw a fuzzy, fluorescent orange light moving in front of the Organ Mountains to the southeast. (Tillett report in NICAP files).
670310	Phillipston	MA	2						12:20 a.m. EST. A witness saw an object shaped like a half ball with its flat side down (dome-shaped). The object glowed a bright orange-red all over and was about 10 times the apparent diameter of the moon, which was visible. (Fowler, 1974, p. 346.)
670310	Dareton	AU	2						6:30 p.m. An oval object with a tall dome, surrounded by haze, hovered above the road ahead of a car, and then accelerated away. (Flying Saucer Review, July-Aug. 1967, p. 30; APRO Bulletin, Mar.-Apr. 1967, p. 11.)
670310	Pawtucket	RI	2						9:00 p.m. EST. A man saw a large dark oval object that appeared solid and metallic, with a small light in front. It moved on an erratic path, tipping from side to side at 5-10 mph. After being in view for; about 30 seconds, it disappeared behind the gas station. (Massachusetts NICAP , Subcommittee report.)
670310	Salol	MN	2						9:45 p.m. CST. Two women and three youngsters in northwest Minnesota saw a bright orange oval which pulsated. The object hovered for 3-4 minutes, then went up and out of sight with a roar. (Roseau County Times-Region, Minn., 3/16/67, copy in NICAP files.)
670310	Ft. Chaffee	AR	2						11:30 p.m. CST. Three teenagers saw a house-sized object that had three huge lights. The object hovered over trees as if to land for about 5 minutes, then disappeared. (Ft. Smith SW Times Record, Arkansas, 3/12/67, copy in NICAP files.)
670311	Ashtabula	OH	2						Time not reported. An electrical engineer and four other witnesses saw three glowing, golden-colored objects approach from the northeast. The objects circled (maneuvered), and departed to the northeast very fast. (Columbus Dispatch 3/12/67, copy in NICAP files.)
670312	Paragould	AR	2						Early morning CST. Four witnesses saw a disc with bright white light beams that swept the ground. Red lights like roman candles shot out from all sides. The object floated low, and hovered. Witnesses felt vibrations and heard a sound like an alternating frequency beep. (Arkansas Gazette, 3/14/67, copy in NICAP files.)
670312	Rochester	MN	2			BBU			car-sized inverted mushroom-shaped object hovering 30 ft above ground

670312	Vernal and Roosevelt bt.	UT	2						8:15 p.m.MST. A couple saw the ground illuminated in front of their car. Looking for the source of the light, they saw a large object an estimated 150 feet above the ground shoot by. The object was shaped like a tapered boxcar and flame was coming out the rear. (Salisbury, 1974, pp. 46-48.)
670312	Glens Falls	NY	2						10:30 p.m. EST. A man saw a gun-metal-gray object shaped like a child's musical top, with lights around the circumference. Vapor trails emerged from points along the outer edge of the object. It hovered silently near the ground, then rose silently. Signs of life reportedly were seen inside. (Glens Falls Times, 3/14/67, copy in NICAP files.)
670314	Daytona Beach	FL	2						12:45 p.m. EST. Two woman saw a disc with a flat bottom and peaked top moving very slowly. The object was described as a very bright white, brighter than a conventional aircraft. It moved south parallel to U.S. Route A1A, then turned to the right and disappeared to the southwest after 3-5 minutes. (NICAP report form.)
670315	Linda	CA	2						4:30 a.m. PST. A woman saw a triangular object surrounded by red glow (halo effect). The object had two blinking red lights and four steady white body lights. It hovered over a highway intersection, then moved away after 10-15 minutes. (Marysville Appeal-Democrat, Calif., 3/15/67, report in NICAP files.)
670316	Free Soil	MI	2						12:30 a.m. EST. A woman saw a glowing egg-shaped object with lights around it as if they were on wires. The object was 6-8 feet above the ground. It dropped rapidly, then went straight up and repeated the maneuver. The object made a loud humming sound. (Manistee News-Advocate, Manistee County, Mien., 3/17/67, copy in NICAP files.)
670316	Keene	NH	2						11:10 p.m. EST. An associate editor of a local newspaper saw a glowing cigar that drifted back and forth about 30 feet above a snowy field in front of trees for 8 minutes. (NICAP report form.)
670317	Central area	PA	2						7:00 p.m.EST. A couple and their three children saw a fat boomerang-shaped object with three red lights in the center (body lights). It flew overhead, changing color, and seemed to follow their car. (Letter dated 3/29/67 in NICAP files.)
670317	Ann Arbor	MI	2						7:45 p.m. A man saw a red light that changed to blue as it moved slowly across the sky and disappeared. Then what he thought was the same light reappeared but as two white lights that slowly passed overhead (body lights). (Letter from witness dated 1 /9/68 in NICAP files.)
670317	Ohio Pyle	PA	2						8:00 p.m. EST. About 345 miles southeast of Ann Arbor, Mich., a couple in southwest Pennsylvania saw a fiery orange object that paced their car for more than a mile, then hovered over their home. (Uniontown Morning Herald, Pa., 3/18/67, copy in NICAP files.)
670317	Evansville	VT	2						10:30 p.m. EST. A couple saw an oval with a body light changing color from red to blue. The object seemed to follow their car before flying away over the horizon after 15 minutes. (White letter, 4/8/67, NICAP files.)

670318	Stow	MA	2						7:50 p.m. EST. Three witnesses saw a domed oval object surrounded with a ring of vapor. When the object was stationary (hovering), it glowed violet but when moving, it turned to reddish orange (color change/motion correlation). It moved with a dancing motion. (Fowler, 1974, p. 346.)
670318	Champaign	IL	2						7:30 p.m. CST (8:30 p.m. EST). Three people saw an oval or bowl-like object with a dome on too and a series of red lights around the circumference (body lights) that flashed in a pattern. There was a bright white spotlight on the bottom near the front. The object hovered over a field before disappearing, possibly landing. (Munday report, Urbana, 9/6/67, NICAP files.)
670321	Minneapolis	MN	2						7:45 p.m. CST. A couple saw a bright red oval that approached, stopped and hovered, four times emitting light or lighted objects toward the ground. (NICAP report form.)
670323	Omaha	NE	2						3:00-3:30 a.m. CST. A nurse, a nursing supervisor, and an aide saw a slowing white light that at times had a surrounding red glow (halo effect). The shape was said to be " like a bowl atop a plate" (domed disc).
670323	Omaha	NE	2						During the same time period, a woman in another area of Omaha saw two large (moon-size) lights making turns (maneuvering) in the sky. (Omaha World Herald, 3/23/67, copy in NICAP files.)
670323	Great Falls	MT	2						9:00 p.m. MST. Sheriff's deputies and other witnesses saw a yellow object with a red glow coming from the top and the bottom. The object hovered, then flew away. Many sightings reported all over the state. (Great Falls Leader, 3/24/67, copy in NICAP files.) [Malmstrom AFB, MT, Minuteman ICBM Complex]
670324	Los Alamos	NM	2						Disc hovers for 10 minutes.
670324	Belt	MT	2	C	5	11551			Dome-Shaped Object Lands In Ravine
670325	Joplin	MO	2						Early a.m. CST. Two reoorters saw three discs with domes and flat bottoms (domed discs) that were later joined by a fourth. White light was coming from windows positioned around the circumference of the domes. The discs hovered over a highway, then slowly moved away. (Joplin Globe, Missouri, 3/26/67, copy in NICAP files; APRO Bulletin, May-June 1967, p. 1.)
670325	Memphis	TN	2						7:00 p.m. CST. About 480 miles south of Canton, >> Illinois (see previous entry), two witnesses saw a solid, self-luminous, bright ^ reddish-orange circular object that at one point passed in front of a house and in front of power lines. The object disappeared but was then seen again, & and finally departed at tremendous speed. (NICAP report form.)
670329	Newulm	MN	2						7:45 p.m. CST (8:45 p.m. EST). A disc with windows hovered, then accelerated away. (Air Force report in Project Blue Book files, National Archives.)
670330	Burghfield, Berkshire	UK	2						7:30 p.m. GMT. Five people saw a carrot-shaped (cone-shaped) object about twice the size of an airliner. It moved sideways at first, then climbed and accelerated away. (Reading Evening Post, England, 3/31/67, copy in NICAP files.)

670331	Wellington	TX	2						10:30 p.m. CST. A witness reported seeing a cylindrical object about 100 feet long that was hovering just off the ground and emitting a motor-like sound. Other sounds also were heard, including a voice requesting that he undergo a physical examination. When the witness refused to do so, the craft took off. (Washington Star, D.C. (United Press International), 4/2/67; Flying Saucer Review, July-Aug. 1967, p. 31; Air Force report in Project Blue Book files, National Archives.)
670400	Moberly	MO	2						Evening. A couple saw an object with a short cylindrical body, dome-shaped top, and flat bottom (turret shape). Eventually it sped up and crossed the road in front of the car. (MoberLy Monitor-Indexand Evening Democrat, 7/14/67, copy in NICAP files.)
670401	Wayne County	IN	2						5:45 a.m. A farm wife was putting milkers on cows in a barn when she observed a round, red-yellow object the size of the full moon for about a minute. It hovered about 200 yards away, then climbed and disappeared in about three seconds. (Don Worley files)
670401	Hessel	CA	2						7:15 p.m. PST (10:15 p.m. EST). A family saw an unusual reddish light that approached their car after they flashed their headlights at it (light reaction). The object hovered in front of the car, glowing red with a dome visible on top. It had a hazv indefinite lower part at least as large as the upper part. (NICAP report form; U.F.O. Investigator, Vol. IV, No. 2, Oct. 1967, p. 3; NICAP report form.)
670401	Harrisburg	PA	2						9:15 p.m. EST. A woman reported an illuminated bell-shaped object, estimated to be 35 feet long and 20 feet high (length to height ratio 1.75:1), with white lights and a pulsating red light (body lights). (Pennsylvania NICAP Subcommittee report, NICAP files.)
670405	Menominee	MI	2						4:00 a.m. EST. Two University of Wisconsin students saw three large orange oval objects in formation that appeared behind their car, then moved in front of it, north of town. When they stopped the car, the objects hovered over the trees, their color changing from orange to purple. They then emitted a blinding light that lit up the area, and vanished suddenly. (Escanaba Daily Press, Mich., 4/6/67, copy in NICAP files.)
670405	Peterborough, Ontario	CAN	2						7:45 p.m. EST. About 450 miles north-northwest of Jonestown, a woman and her two children saw a small glowing sphere with a metallic band aooroach their car. (Peterborough Examiner 4/14/67.) About 45 minutes later in Welland, Ontario, about 165 miles northeast of Peterborough, a man saw an obiect with bright blue light that moved slowly and hovered, emitting a strange humming sound. (Letter 4/9/67 in NICAP files.)
670405	Belleville	KS	2						8:30 p.m. CST (9:30 p.m. EST). A manager of the Chamber of Commerce, his wife and grandson saw a disc with a peaked top surmounted by a green light. Its body was yellowish (like house lights) with red sections. The object flew over their car at an estimated 3,000 feet altitude. (Belleville Telescope, 4/6/67, NICAP files.)
670406	North Salinas	CA	2						8:45 p.m. PST; 9:45 p.m. MST). A couple watched a fly-by of a red disc with windows at low altitude. ((NICAP report form.)

670406	Los Angeles	CA	2						10:05 p.m. PST (11:05 p.m. MST). Two peoplen saw a fat, solid-gray cigar (ellipse) with a blinking red light for about 4 minutes. ^ The object flew tilted, and two smaller objects came from the path of the first (satellite objects). The objects were viewed through binoculars. (NICAP report form.)
670408	Millersburg	PA	2						Afternoon. Three women and three children saw an elongated object, split in the middle, possibly saucer-shaped, that was hovering near a telephone tower on a mountain. It then shot straight up and disappeared. (Harrisburg Patriot-News, Pa., 4/9/67, copy in NICAP files)
670410	Fayette County	IN	2						9:45 p.m. A glowing orange-yellow ball that swung in a large arc was observed by two witnesses for 20 minutes. It moved closer and became a huge dark object which reminded the witnesses of a passenger coach of a train with seven tall windows emitting light. (Don Worley)
670410-15	Danville	PA	2						3:30-4:00 a.m. EST. A woman saw a shiny inverted bowl with flashing red lights hovering above trees. It emitted five light beams from the underside, took off in "three steps" and quickly disappeared. (NICAP report form.)
670411	Orange	MA	2						6:45 p.m. EST. Three people saw a flattened disc or ellipse with a rotating red light on the underside. The object hovered 100 feet over a pond, moved slowly, then sped away. (Massachusetts NICAP Subcommittee report, NICAP files; Fowler, 1974, p. 346.)
670411	Royalston	MA	2						6:50 p.m. EST. (11 miles northeast of Orange). Two witnesses saw a mass of very bright lights, brighter than the moon which was visible. They descended and hovered, before moving slowly out of sight on an upward course. (Fowler, 1974, p. 346.)
670411	Woodville	ID	2						9:30 p.m. PST. While driving, a woman saw an amber-colored object shaped like a disc with a tall dome. She estimated that it was at a height of two telephone poles and as large as a car. (Ricks letter, NICAP files; The l/.F.O. Investigator, Vol. IV, No. 1, May-June 1967, p. 1.)
670412	Hackettstown	NJ	2						Night. Five people, including a policeman, watched a revolving object with a red middle, green lights on both ends, and white lights on the bottom (body lights) for 1.25 hours. The object left a white trail, and it started and stopped many times, becoming all white when not moving (color/motion correlation). (NICAP report form.)
670412	Toronto, Ontario	CAN	2						8:15 p.m. EST. An adult leader and :! 18 Girl Guides saw four lens-shaped discs with flashing lights on the rims (body lights). The objects circled the witnesses, and two shot away when an airplane Jet approached (aircraft avoidance). (Henry McKay report, 4/17/67, in NICAP files.)
670412	North Granby	CT	2						8:30 p.m. EST. A woman and her two "< children, ages 11 and 8, saw a glowing, red-orange bowl-shaped object that was emitting very bright light ("painful to stare at"). The object made rapid motions and hovered. A rod extended from it for about 5 minutes. Finally it shot ;-away to the northwest. (NICAP report form.)

670412	Coastal Keys Highway	CA	2						8:30 p,m. EST. Six members of a team while doing underwater film work for ABC News saw five bright white lights in formation, “pulsating bright-dim on a 1/2-second cycle and maneuvering around each other as they passed at about 200 feet altitude. (Letter to Herb Roth, 5/5/67, in NICAP files.)
670416	Ramey AFB(Shoreline at NE corner of)	Puerto Rico	2			BBU			disc shaped object with two levels -Hovering just above water
670416	Downsville, Ontario	CAN	2						1:15 a.m. EST. Two rotating red, glowing dome-shaped objects separated by a bar (dumbbell shape) hovered overhead, then accelerated away. (Letter dated 4/16/67 in NICAP files.)
670417	Shelley	ID	2						9:30-10:00 p.m. PST. A woman and her daughter, age 16, saw a large amber-colored light approaching their car at an altitude of 60-80 feet. As it moved closer, the object was seen to be round with windows on top, and light coming from a bottom bulge. (Ricks letter in NICAP files; U.F.O. Investigator, Vol. IV, No. 1, May-June 1967, p. 1.)
670417	Jefferson City	MO	2			BBU			300 ft WWI helmet shaped object come over a car bathing it in intense light
670419	Tully	MA	2						7:30 p.m. EST. Four witnesses saw a cream-colored domed object with flashing lights, bright white at first and then turning to red. The object hovered, made sharp turns, and moved off slowly. (Fowler, 1974, p. 347.)
670419	Huntinton	WV	2						8:45 p.m. EST. A witness reported to the newspaper having seen a round object with red and white colors which followed their car and appeared to move with a gliding motion. (Point Pleasant Register, W.Va., 4/22/67, copy in NICAP files.)
670420	Orange	MA	2						7:15 p.m. EST. Four witnesses saw an object with eight red blinking lights and two white lights (body lights). The object hovered, then moved away slowly. (Fowler, 1974, p. 347.)
670420	Coldwater	MI	2						8:15 p.m. EST. A man saw a large cigar-shaped object with many body lights arranged in groupings. It flew low and slow from east to west. (NICAP report form.)
670420	Bolten	MA	2						9:40 p.m. EST. Three people saw a domed disc with eight glowing yellow ports around the perimeter, white light on top, and red light on the bottom, turauoise lights front and rear (body lights). (Massachusetts NICAP Subcommittee report in NICAP files; Fowler, 1974, p. 347.)
670421	Ephrata	WA	2						1:30 a.m. PST. Two couples saw an unexplained light ahead and chased it in their car. Then they came upon an unidentified object sitting on the road and had to slam on the brakes to avoid hitting it . (June Larson report, 8/1/67, in NICAP files.)
670421	Cocoa Beach	FL	2						4:00 p.m. EST. A woman saw a shiny disc with a dome and hazy underside. The object hovered, and tilted as a small aircraft passed beneath it. The plane reversed course possibly to look at the UFO. (Florida NICAP Subcommittee report, NICAP report form, in NICAP files.)

670421	Phillipston	MA	2						8:00 p.m. EST. Three witnesses plus another separate individual reported a dark object with 2-3 bright red body lights that hovered and descended behind trees. Aircraft seemed to have been chasing it. (Fowler, 1974, p. 348.) .
670421	Tucson	AZ	2						9:55 p.m. MST. A yellow, dome-shaoed object with a flat bottom (hemisphere) and with a shaft of light (light beam) pointed upward, descended , tipping and swaying. (APRO Bulletin, May- June 1967, p. 7.)
670421	Maeser -Vernal	UT	2						10:30 p.m. MST A retired Air Force man saw nine silver, lens-shaped objects (discs) making violent maneuvers at an estimated 20,000 feet altitude. Viewed through binoculars, the objects had no visible rudders or tails and no vapor trails. (Salisbury, 1974, Table 1, case 46.)
670421	South Hill	VA	2			11677			road blocked by storage tank-shaped obj w/dome top
670423	Orange	MA	2						8:45 p.m. EDT,. A witness saw a circle of nine white lights that enclosed two red lights, hovering near a church. (Fowler, 1974, & p. 348.)
670426	Richmond	VA	2						8:30 p.m. EDT. Two siblings, 13 and 16 yearsb old, saw a silver oval object that had central flashing green lights and a bright light underneath (body lights). The object was hovering near the ground. (NICAP report form and letter.)
670426	Mt. St. Helens	WA	2						Night. Two teenagers saw a saucer-shaped object with a dome, swept back wings, and red body lights. As it pursued the witnesses' car and illuminated it with a light beam, a whistling sound could be heard. (Unidentified newspaper clipping, NICAP files.)
670427	Bloomfield	NM	2						4:34 p.m. MDT. Two men, one a Federal Aviation Administration electronic technician, saw a huge, polished, metallic-appearing ball that hovered, started to descend, and then disappeared when an aircraft approached (aircraft avoidance). (Letter received 11 /28/67, NICAP files.)
670427	SW part of State	OK	2						8:30 p.m. Three witnesses saw an object that flashed light beams onto a car and paced the car at J an estimated altitude of 200 feet, remaining visible for several minutes. (Arkansas ' Gazette, 4/29/67, copy in NICAP files.) .
670427	Kingston	NH	2						10:10 p.m. EDT (9:30 p.m. CDT). Three adults independently saw a dirigible-shaped (elliptical) object with "bubble" dome on top and two protrusions on its underside. (NICAP report form; Reynolds report received 7/26/67, NICAP files; U.F.O. Investigator, Vol. IV, No. 2, Oct. 1967, p. 3; Fowler, 1974, p. 348.)
670428	Toronto, Ontario	CAN	2						9:00 p.m. EDT. A real estate agent and occupants of three other cars saw a shiny, metallic-appearing flattened sphere ^ an estimated 20 feet in diameter and 15 feet tall, with a band of alternate non- ; blinking red and green body lights around the middle. (NICAP report 1 form; U.F.O. Investigator, May-June 1967, p. 3.)
670430	Orange	MA	2						Evening. Many witnesses reported five objects with three green lights in a row and two red lights (body lights) underneath. (The Worcester Evening Gazette, Mass., -5/2/67, copy in NICAP files.) [See previous case re: dropped "fire ball."]

670500	Samoset	FL	2						9:00 p.m. EDT. A couple saw a cigar-shaped object that resembled a plane about to land. It appeared to have lights inside and a red light on top (body lights), an estimated 4-5 feet from the body of the craft. (NICAP report form, copy in Donald E. Keyhoe Archives files.)
670506	St. George	UT	2						1:43 a.m. MDT. A motorist on U.S. 91 heard a loud hum, stoooed the car, and saw a 40-foot diameter, amber-colored, circular object with domed top hovering 20-30 feet overhead. (Salt Lake City Tribune, 5/7/67, copy in NiCAP files; L/.F.O. Investigator, Vol. IV, No. 1, May-June 1967, p. 6; APRO Bulletin, May-June 1967, p. 6 (case misdated as May 13.)
670508	Chester Heights	PA	2						11:00 p.m. EDT. A woman saw a round object with four red lights (body lights) in a curving row and a very bright center light that flashed on and off. (Ritter report received 7/28/67, copy in NICAP files.)
670509	Champaign	IL	2						Evening. Two people saw a white-lighted object that changed color to red as it flew rapidly from north to south. The object circled the airport, turned on a bright light, made turns, and hovered, then moved south above the witnesses, who followed it in a car at speeds over 90 m.p.h. (Witness letter, NICAP files.)
670509	Beloit	WI	2						9:05 p.m. CDT. On the same evening, about 200 miles 11 north-northeast of Champaign, Illinois, a woman heard a hissing sound, then saw an object with flashing blue, red, green, and yellow lights. The object "swayed, jumped," and shot out of sight. (The Daily News, 5/10/67, copy in NICAP files.)
670510	Wayne County	IN	2						3:00 a.m.EDT. Fishermen saw a missile-shaped (elongated) object that had a glowing red ball at each end. A white glowing object seemed to land and grew increasingly bright causing the witnesses to fear an explosion. Witnesses left to get the sheriff. No physical traces found. (Ridge, 1994, -? P-22.)
670511	Wareham	MA	2						2:05 a.m. EDT. Four witnesses saw two inverted- -I dish (saucer-) shaped objects with rotating lights. The objects hovered, descended behind trees into a bog, bobbed up and down like a yo-yo, and sped away when police shone a light at them (light reaction). (Fowler, 1974, p. 348.)
670512	Neola	UT	2						8:00 p.m. MDT (2:00 a.m. GMT, May 13). Two men saw a silver ellipse or disc, 45 feet long and 15 feet thick (3:1 length to width ratio), ; with a distinct outline, that approached, slowed, descended level with a road, tilted and went over a hill. (Salisbury, 1974, Appendix B, Table 1, Case 48.)
670513	Vermillion	SD	2						8:00 p.m. CDT. A University of South Dakota faculty member and five others saw a lens-shaped object (disc) that passed under clouds, turned over, and changed direction (maneuvered). (Witness report, 7/18/67, in NICAP files.)
670516	Half Moon Bay	CA	2						1:30 a.m. PDT. A family saw a triangular object with a row of red lights and a white light on one end (body lights). The object hovered over the ground near a pond, made a roaring sound, then took off soaring over the house. (Redwood City Times, Calif., 5/16/67, copy in NICAP files.)

670517	Kamyshin	Russia	2						10:00 p.m. LT. Major Y.B. Popov, of Novosibirsk, together with Junior Lieutenant A.S. Nikitenko and several local residents saw a cascade of lights rushing across the night sky from the northeast in even rows. It was observed for two or three minutes. It passed almost over-head and took off into space. (Ref. 3)
670519	Grove City	OH	2						4:00-4:30 a.m. EDT. Four men saw a cigar-shaped object for 20 minutes that made various movements (maneuvered). One witness said it descended to within 150 feet of the ground, then made a 90-degree turn and flew off to the west. (Grove City Record, 5/25/67, copy in NICAP files.)
670521	Union County	IN	2						3:00 a.m. A dark object with a circle of red pulsating lights which lit up the area was observed for two minutes by two witnesses. The object moved slowly along a highway below tree-top level. (Don Worley files)
670521	Union County	IN	2						8:00 a.m. A farmer out hunting looked up when he heard a brief swishing sound. Six or eight light gray watermelon shaped objects in semicircle formation at undetermined height were moving rapidly to the east. (Don Worley files)
670528	Corinth	NY	2						1:25 a.m. EDT. A couple saw three light green glowing discs that flew low above treetops and then went straight up and out of sight. (Letter dated 5/28/67, NICAP files.)
670529	Saugus	MA	2						2:40 a.m. EDT. One witness saw a glowing red scallop-shaped object (disc) that had white flashing lights along its surface. The object moved slowly with a rocking motion, then departed upward at high speed. (Fowler, 1974, p. 348.)
670529	Bay City	MI	2						Night. Two teenagers saw a large, shiny circular object with whirling lights. The object hovered, moved, descended near a grove of trees, then later rose straight up, hovered, and flew away. (Bay City Times, 6/14/67, copy in NICAP files.)
670531	Danville	PA	2						Evening. A woman and three children saw an object with red and green rotating lights. It took off down river, and turned after a short distance. The colored lights were not visible after the turn, but there was a large light like a locomotive headlight visible. (NICAP report form.)
670601	Richmond	VA	2						11:30 a.m. EDT. A pre-teen boy and a 16-year-old S girl saw a hubcap-shaped (disc) object with red and green lights (body lights) 4 around the perimeter, white and golden at the bottom. The Volkswagen-sized J object landed in a clearing in the woods. (U.F.O. Investigator, Vol. IV, No. 1, May-June f 1967, p. 7; unidentified newspaper clipping, 6/2/67, NICAP files.)
670601	Shaunavon, Saskatchenwan	CAN	2						5:00 p.m. MDT. A school-bus driver saw a circular, dull aluminum object that had a superstructure with eight circular marks or portholes around its midsection. Above that was a glass-like dome. The object paced the bus for 2 miles. (Clausen report, NICAP files; U.F.O Investigator, school bus Vol. IV, No. 1, May-June, p. 3.)

670605	Uncasville	CT	2						9:20 p.m. EDT. A man saw three lights in triangular formation that hovered over a power station, emitted a brilliant blue flash, and moved away. Two of the lights were red and pulsating, and the third was a steady white. They were viewed through binoculars. (NICAP report form.)
670605	Vancouver Island, BC	CAN	2						10:30 p.m. PDT. Five neighbors saw a large saucer-shaped, orange-yellow object with distinct"* edges. The object flew into view, hovered for 2 minutes, tilted on edge, and took off at high speed. (Letter dated 6/9/67, NICAP files.)
670606	Colonsay, Saskatchewan	CAN	2						8:40 p.m. CDT. A former World War II paratrooper and others saw an object with shiny, bright, white oval lights (body lights). It approached within 400 feet, stopped, glided from side-to-side, then sped away. (NICAP report form.)
670611	Harrisburg	PA	2						11:15 p.m. EDT. A woman saw a bright cigar-shaped object with a red light. The object hovered, accelerated straight up and disappeared. The red light turned green when the object ascended (color/motion correlation). (NICAP report form.)
670611	Dorval, Montreal	CAN	2						11:30 p.m. EDT. Two witnesses, including a graduate student in psychology at Harvard, saw an oval, dull gray object with three colored lights (body lights) and a glowing pink band around the middle. The object moved slowly at tree-top level from lake to shore, hovered, then moved behind trees, finally disappearing. It was estimated to have passed 100-150 feet away from the witnesses at eye level. (NICAP report form.)
670618	Falcon Lake	CAN	2						Evening. A family crossing the lake by boat saw a shiny, metallic-appearing oval object with a slight rise on top. The object was an estimated 30 feet in diameter and 15 feet thick. When the object approached the witnesses' boat, it took on an orange tinge. (Bondarchuk, 1979, p. 31-34.)
670621	Los Angeles	CA	2						2:30 a.m. PDT (5:30 a.m. EDT). Two witnesses in a very barren area outside of the city observed two bright, cone-shaped objects, one after the other, that undulated, appeared to change to disc shape, and rose abruptly, the second joining the first in the sky. After hovering briefly, the objects vanished. (Los Angeles NICAP Subcommittee report in NICAP files.)
670621	Kenmare	ND	2						10:45 p.m. CDT. Three boys and a policeman saw a hovering oblong object that had a row of lighted windows or ports. They viewed it through binoculars for about one minute. (North Dakota NICAP Subcommittee report, NICAP files.)
670624	Trenton	ME	2						10:00 a.m. EDT. Two people saw a silver-gray, hat-shaped object hovering over the ocean about 500 feet from the shore. The object emitted vapor at its base. Finally it ascended into a fog bank, descended again farther away (maneuvered), then moved out of sight. (Fowler, 1974, p. 349.)
670624	Paso de los Libres	Argentina	2						At 10:00 pm in Paso de los Libres, policemen saw 8-10 bright lights that flew in formation over a military post at an estimated 15,000 feet altitude. (La Voz Del Interior 6/26/67, NICAP files.)

670625	Wilmington	DE	2						9:30 p.m. A man saw a lens-shaped, metallic-appearing object (disc) with a "deck" and a "pole" (protrusion) at the rear. The object passed over the house, turned about a half mile away, and came back over the house again before disappearing. (Phone call from witness, 7/20/67, NICAP files.)
670627	Winnipeg, Manitoba	CAN	2						1:00 pm. CDT. A couple saw a glowing yellow object shaped like a large soup bowl (dome shaped). The object hovered about 300 feet over a service station, moved slowly, hovered again over a river, then disappeared below the tree line. (McPhillips report, NICAP files.)
670630	Rapid City	SD	2						2:00 a.m. MDT. Three patrolmen saw a large object with red, green, and white flashing lights (body lights) and windows that emitted light illuminating the ground. The object took off and hovered just above trees, exhibited jerky movements, landed again, the white light growing brighter as it neared the ground (luminosity/motion correlation). (Rapid City Journal, 7/2/67, copy in NICAP files.)
670704	Corning	CA	2						5:15 a.m. PDT. At least five witnesses from two independent locations saw an odd oblong, metallic-appearing object with a brilliant light on top and a smaller light on the bottom near the front (body lights). (Corning Daily Observer, 7/6/67, UFO NICAP files; McDonald, 1968b, p. 74, reprinted in Vaughan, 1995, pp. 129-30.)
670704	Harrisburg	PA	2						9:30 p.m. EDT. A woman saw a torpedo-shaped object with two bright white lights and three vertical lines of light toward the rear (body lights). The object was directly over the trees about 300 feet away, and as it approached two smaller red lights were seen. (Cook report, NICAP files.)
670707	Canyon Ferry	MT	2						Nr. midnight. A relative of NICAP member George Earley saw a bright cigar-shaped object with revolving lights of red, white, and blue, that hovered for 12 minutes (timed by watch). He looked away for a moment, and when he looked back the object was gone. (Letter to George Earley, 1/4/69.)
670708	North Sea off English Coast	At sea	2						Time not reported. A ship captain and his crew saw a saturn-shaped object hovering over the sea. It then moved off until out of sight. (Letter from captain, NICAP files.)
670709	Harrisburg	PA	2						10:25 p.m. EDT. Two boys, 12 and 14, saw a round1 object with red lights on top and bottom and two bright white lights on the front , (body lights). The object approached about 60 feet off the ground with a fluttering motion and making a humming sound. (The Evening News, Harrisburg, 7/12/67, copy in , NICAP files; Cook report, NICAP files.)
670710	Lizelia	MS	2			11869			5:50 p.m. CDT. A golf pro, also Marine Corps retired, saw a domed object, the top gunmetal blue and the bottom the color of old lead. The object moved across the highway, tilted up, accelerated and disappeared into the clouds with a swishing sound. (Air Force unexplained case, Project Blue Book files, National Archives.)
670712	Irving	NJ	2						9:47 p.m. EDT. Three witnesses saw a solid disc with a thick rim and windows. Light was coming out of the windows. The object revolved and disappeared behind trees after 2-3 minutes. (NICAP report form.)

670712	Bristol	VT	2						Bt. 10:00-11:00 p.m. EDT. Several witnesses saw a bright object with two sets of lights, some of them green (body lights). The object landed in a pasture about 500 feet from the witnesses. (Burlington Free Press, Vt., 7/14/67, copy in NICAP files.)
670712	Orion	MI	2						Nr. midnight. A family saw two large orange; spheres that hovered over their driveway. One ball disappeared inside the other t (objects merged), which then ascended and disappeared. (Pontiac Press, Mich., 7/14/67, copy in NICAP files.)
670714	Palmerston North	NZ	2						1:30 a.m. LT. A youth saw a "ring of lights" (also described as a huge white oval light the length of a football field). The object(s) stopped (hovered) two or three times. (Evening Standard 7/15/67, copy in NICAP files.)
670714	Harrisburg	PA	2						10:30 p.m. EDT. Two couples, including an ex-military pilot, saw an orange ball (sphere) hovering at low altitude, clearly visible beneath a heavy overcast. (NICAP report form.)
670715	Harrisburg	PA	2						10:30 p.m. EDT. A couple saw an object with a red light on one end and green light on the other, with a row of revolving flashing white lights on the top (body lights). The object moved slowly at low altitude until lost behind trees. (Pennsylvania NICAP Subcommittee report, 9/15/67, NICAP files.)
670715	Enola	PA	2						10:30 p.m. EDT. About 50 witnesses reported seeing an orange-red ball (see July 12, Orion, Mich., and July 14, Harrisburg, Pa.) that hung over the WHP radio towers, moved toward a mountain, hovered again, then dropped out of sight behind the mountain. (Cook report, NICAP files.)
670715	Silver Spring	MD	2						11:30 p.m. EDT. An MIT graduate and retired Army engineer saw a small cylinder (estimated 4 feet long and 1 foot diameter) made of material like clear plastic with lighted grillwork and an open top. Initially, the object approached in the sky as a red light.
670715	Kirkwood	MO	2						10:30 p.m. CDT (11:30 p.m. EDT). A chemist and other witnesses saw a luminous orange sphere (see above reports) at tree-top level. The object slowly ascended, then broke in half. Each half broke into two pieces and their light went out (multiple lights/objects). (Epstein letter, NICAP files.)
670716	Lovelock	NV	2						Time not reported. Three miners reported a honeycomb-shaped object with windows and with glowing lights inside. First seen on the ground (landed), the object then ascended vertically. No marks were found on the ground. (Reno Evening Gazette, Nev., 7/20/67, copy in NICAP files.)
670717	Belfast	Ireland	2						Evening. Two silver-suited humanoids emerged from a craft and entered the woods. They returned and drifted back into the craft. (Flying Saucer Review, Nov.-Dec. 1967, p. 31.
670717	Sukhumi (Agudzeri)	Russia	2						11:00 p.m. L.V. Antonova, an editor with the publishing house "Thought", and T.I. Dantseva, fellow of the Kurchatov scientific institute, observed a strange object along with four other people. The weather was clear at the time. The object looked like a flat disk with shining edge, flying at an altitude of some 350 feet at the speed of a propeller aircraft. (Ref. 3)

670718	Amvrosiyevka	Russia	2						2:47 p.m. Student Y. Divak and a friend were fishing when they saw the reflection of a strange flying object in the water. Looking up, they saw a lusterless craft in the sky. It seemed to affect the sounds from the trains and from the nearby town. (Ref. 3)
670718	Miami	FL	2						10:20 p.m. EDT. Seven witnesses saw an orange, yellow, and red (red-orange) glowing oval, apparently translucent, pass by at an estimated altitude of less than 500 feet. One of the witnesses was a World War II flier. (NICAP report form, Stokesberry report, NICAP files.)
670719	Webster City	IA	2						11:30 p.m. CDT. Two brothers saw a circular object with a large white light in the middle, two red lights and two green, lights along the outer edge (body lights). The object approached at low altitude, passed overhead, made a tight U-turn (maneuvered) and returned, hovered, and moved away slowly. (Letter : received 12/26/67, NICAP files.)
670720	Titusville	FL	2						9:15 p.m. EDT. A woman and her daughter saw a bell-shaped object with a dull metal finish and five square windows. An intense white light came from the inside. A humanoid with slim torso, an egg-shaped head, and long rubbery-looking arms was visible at one of the windows, and "shadowy movements" were seen in other windows. (NICAP report form; Florida NICAP Subcommittee report, 8/11/67, NICAP files.)
670720	Summerdale	PA	2						10:45 p.m. EDT. Three people saw a round green light hovering over the WHP radio towers. The light turned red and descended to 200 feet above the ground. (Cook report, NICAP files.)
670725	Southern part of State	MI	2						11:30 p.m. EDT (10:30 p.m. CDT). A woman and several teenagers about 1,200 miles to the southeast reported a very similar phenomenon. They saw 5-6 objects radiating bright white lights "wobbling" over a field. When a plane flew into the area, the objects (lights) rapidly disappeared after turning bright red (color change/speed correlation). As the color changed, dogs in the area howled (animal reactions). (Stinson letter, NICAP files.)
670726	Rowley	MA	2						11:15 p.m. EDT. A woman looked out her bedroom window when she heard a loud whining, whirring sound and saw a glowing orange object in the sky. (Fowler, 1974, pp. 151-52, 349.)
670721	Jewish Creek [Homestead?],	FL	2			BBU			yellow "jagged" object rise above a swamp and land on a hill
670726	Dauphin	PA	2						11:20 p.m. EDT. A woman saw a red light hovering near her house and illuminating the interior of her house. The color changed to white and then to rose, and the light seemed to rotate as the color changed. (Pennsylvania NICAP Subcommittee report, 10/4/67, NICAP files.)
670727	Farmville	NC	2						12:30 a.m. EDT. Two witnesses saw an orange-yellow, "tri-level" object with lights coming from the upper area, apparently from within. The object appeared to be spinning. (Greenville Reflector, N.C., 7/28/67, copy in NICAP files.)
670727	Newton	NH	2						1:00 a.m. EDT. Three people, including an electronics technician and former Air Force radar operator, and a laboratory technician and former Navy radar operator, saw an orange-red starlike light that began to move. (Fowler report, 8/14/67, NICAP files; NICAP report forms; U.F.O. Investigator, Vol. IV, No. 2, Oct. 1967, p. 3; Fowler, 1974, pp. 152-55, 349.)

670728	Gilroy	CA	2						9:30 p.m. PDT. A state forestry employee at a fire lookout tower saw an oval blue-white light coming toward him at low altitude, a dark band visible around the middle (see July 4, Corning, Calif.). A bright white light also was visible on the top (body lights). The object alternately hovered and moved around, circling the fire tower. At one point it emitted a blue-white light beam which illuminated the ground. As the object circled the tower, the citizen's band radio emitted a variable pitch whining noise (EM effects), interfering with any effort to communicate. (NICAP report form; U.F.O, Investigator, Vol. IV, No. 2, October1967, p. 3; Gillmor, 1969, case 28.)
670729	Arnold	CA	2						1:00 a.m. PDT. Two witnesses saw an orange light "like a ball of fire" that approached from the horizon. It stopped (hovered), changed color to white, ascended slowly, changed direction (maneuvered), and continued ascending. After the color change, it moved in a "pulsating fashion as though leaping through space." (NICAP report form.)
670800	Venice	CA	2						Daytime, PDT. A summer school class and teacher saw a disc-shaped object that was making a loud roaring noise. The object moved directly overhead, now making a sound like an "electronic police car siren." (Amos letter, 9/26/68, NICAP files.)
670801	Chester	PA	2						9:00 p.m. EDT. The wife and daughter of a pastor saw three red, metallic-appearing, saucer-shaped objects with domes and portholes. The object was estimated to be about the size of a two-engine plane. (WXUR News report, copy in NICAP files.)
670803	Sawyer	ND	2						11:30 p.m. CDT. Two men saw a small white glowing object like a "light bulb" that flew from west to east, disappearing behind hills. The object reappeared at about 100 feet altitude, hovered over a wheat field and , slowly landed. (North Dakota NICAP Subcommittee report, NICAP report form.)
670804	La Guaira, Federal District	Venezuela	2						Morning. A lawyer who was fishing from a boat saw a gray-blue, double-saucer (Saturn-shaped) object with a rotating ring around the circumference and triangular windows. The ring was red and blue. (El Universal, Caracas, 8/20/67, 8/28/67 copies in NICAP files; U.F.O. Investigator, March 1968, p. 5.)
670804	Stoke-On-Trent, Kidsgrove, Staffordshire	UK	2						11:00 p.m. LT (7:00 p.m. EDT). Four witnesses saw a bright metallic-appearing disc with bright red dome moving from northeast to the south. Visible around the perimeter of the underside were 15-20 bright red rotating lights.
670804	Syracuse	NY	2						9:20 p.m. EDT. Four people saw a bell-shaped object with a horizontal row of red lights around the top, a series of white lights near the middle, and white-green light coming from the bottom (body lights). (Lorczak letter, NICAP files.)
670805	Eglin AFB	FL	2						6:40 p.m. CDT. A man saw three whitish oval objects approach Eglin at high speed in a V-formation. They stopped abruptly, hovered over the base at the radar station, then accelerated out over the Gulf of Mexico. The departure course appeared to follow the path of a radio navigation beam. (Hunkins letter, NICAP files.)

670806	Wyoming Flats	PA	2						3:30 p.m. EDT. Six witnesses saw a shiny metal-like, saucer-shaped object about 3 feet in diameter descend from above high tension lines with a buzzing sound. The object gave off a red glow as it descended, landed, then shot back up and away to the east. (Unidentified clipping and Bufalino report, 8/9/67, NICAP files.)
670806	Mexico City	Mexico	2						8:17 p.m. LT. Airport control tower personnel and others saw 10 yellow-orange-red objects moving in close formation going south to north. The objects changed formation (maneuvered) as they passed over the airport. (Ramos letter, 8/8/67, NICAP files.)
670809	Belye Krinitsy	Russia	2						3:00 p.m.Mr. Lytkiny and his wife were on vacation resting by the shore of a lake, when they saw a fast-moving oval object. It was milky white, with some small black rods arranged randomly on its surface. (Ref. 3)
670810	Harrisburg	PA	2						9:40 p.m. EDT. A top official with a telephone company saw a huge object, estimated 75 feet long, that was hovering about 125 feet over a field. It was an elongated, diamond-shaped object with white lights at each end, a red light on one side, a blue-green light on the other side (body lights), and a girder-type structure in the middle. (Pennsylvania NICAP Subcommittee report, NICAP files; U.F.O. Investigator, Vol. IV, No. 3, Nov.-Dec. 1967, p. 3.)
670811	Enola	PA	2						Time not reported. Two men saw a glowing object, with a light beam, that moved slowly in a rectangular pattern at low altitude, then accelerated upward and out of sight. At one point the witnesses drove to within one-half block of the object. (Pennsylvania NICAP Subcommittee report, 9/7/67, NICAP files.)
670814	Walnut Creek	CA	2						10:30 p.m. PDT. Four people saw a boomerang-shaped object with a white light on the front and a green light on the rear (body lights). The object was dull gray and apparently solid. It glided slowly along a low-altitude, horizontal path. (NICAP report forms.)
670823	Porthill, Newcastle-Under-Lyme, Staffordshire	UK	2						11:00 p.m. LT (7:00 p.m. EDT). A bright yellow-white elongated oval object was observed hovering in the northeast sky, sharply outlined and solid appearing. The yellowish glow pulsated or flickered in brightness. (Stanway and Pace, 1968, p. 6.)
670824	Pultneyville	NY	2						9:25 p.m. EDT. A woman saw three bright white ovals or elongated objects, each the size of the moon, that moved over Lake Ontario in a V-formation. The objects suddenly ascended and accelerated out of sight. A "beeping" sound was heard during the sighting. (Hall letter, 8/28/67, NICAP files.)
670825	Paragould	AR	2						Early the following morning, witnesses in Paragould, Ark., saw three oval objects, two red and one white, that hovered, then moved in straight-line formation "in circular manner." Other witnesses reportedly heard a buzzing or humming sound. (Arkansas Democrat, 8/25/67, copy in NICAP files.)
670825	Catia La Mar	Venezuela	2						5:00 p.m. LT. A man on the beach saw precipitous movement of water out of which three huge plate-shaped discs emerged and streaked out of sight. (U.F.O. Investigator, Vol. IV, No. 5, March 1968, p. 5.)

670825	Roswell	NM	2						5:25 a.m. MDT. A man with training in aircraft identification and his wife saw a bright white light and a blue glow with three vertical bands of lights (body lights) between them. The object approached at an estimated altitude of 500 feet, disappeared into a cloud bank and reappeared at closer range, hovered, and at one point approached the witnesses. (NICAP report form.)
670828	Rivers, Manitoba	CAN	2						Time not reported. A couple reported that an object hovered over their car, followed them, then hovered to the rear of the car. The car was illuminated by light beams and was reported to heat up. (Brandon Sun, Manitoba, 10/4/67, copy in NICAP files.)
670829	Crewe, Cheshire	UK	2						8:30 am .LT (4:30 a.m. EDT). Two witnesses saw an oval object with tall transparent dome approach from the west, slow and hover at an estimated 100-200 feet above them for about 30 seconds. (Stanway and Pace, 1968, p. 8.)
670829	North York	PA	2						Twilight. Five people, two of them adults, saw a round object with a dome. Soft red light was seen in the dome, and a string of white lights was visible around the bottom of the object (body lights). (Pennsylvania NICAP Subcommittee report, 9/19/67, NICAP files.)
670829	Oka, Quebec	CAN	2						11:10 p.m.EDT. A man saw a round object with pulsating, multicolored lights around the circumference and a white light on top (body lights). The object moved slowly at tree-top level, retraced its path, hovered, and suddenly ascended. The witness had physiological effects (not specified) afterwards. (Montreal Le Petit Journal, 10/1/67, copy in NICAP files.)
670830	Stoke-On-Trent, Staffordshire	UK	2						10:00-10:30 p.m. LT (6:00-6:30 p.m. EDT). Multiple independent witnesses had a complex series of UFO sightings. One witness gave a detailed description of an object first seen with unaided eye, then through a telescope. Other sightings in the area featured "bright" or "brilliant," often red-orange objects that alternately hovered and moved around. (Stanway and Pace, 1968, pp. 29-34.)
670831	Bentilee, Stoke-On-Trent, Staffordshire	UK	2						9:30 p.m. LT (5:30 p.m. EDT). Two young women reported watching a large, silvery-white object shaped like an inverted soup bowl (dome-shaped) that approached and hovered over a high school for about 5 minutes. (Stanway and Pace, 1968, pp. 10, 34-35.)
670831	Lewisberry	PA	2						8:35 p.m. EDT. A woman, her sister, and her children saw a dark gray, disc-shaped object with a row of white lights on the bottom (body lights). Harrisburg airport control tower had reported an odd cloud the same day. (Pennsylvania NICAP Subcommittee report, 10/4/67, NICAP files.)
670900	Drumheller, Alberta	CAN	2						Time not reported. A couple saw an object like two saucers rim to rim (disc) that swooped down toward their car so that the witnesses expected a collision. Then it moved up into the sky and flew away. (Ca/gary Albertan, 10/18/67, NICAP files.)

670902	Bentilee, Stoke-On-Trent, Staffordshire	UK	2						9:15 p.m. LT (5:15 p.m. EDT). Several witnesses watched an orange disc with bright red glowing dome as it flew low overhead and apparently landed in a field about 400 yards away. No sound was heard, but one witness felt "wind" as it passed overhead. A complex case with many facets. (Stanway and Pace, 1968, pp. 11,13, 40-43; witness interview transcripts 46i-46xii.)
670906	Meier, Stoke-On-Trent, Staffordshire	UK	2						9:50 p.m. LT. Several witnesses saw a vertically oriented "sausage-shaped cloud" in the eastern sky, behind which a light flashed for about 20 seconds at irregular intervals. (Stanway and Pace, 1968, pp. 14-15.)
670911	Port Elgin, Ontario	CAN	2						3:30 p.m. EDT. Six or more employees of a nuclear power plant saw a saucer-shaped object passing over the plant going east. The object hovered about 1.5 miles out over the lake and dropped something into the water. (Bondarchuk, 1979, pp. 122-24.)
670911	Silver Spring	MD	2						9:30 p.m. EDT. A couple and their five children saw a flash of bright orange light, then resolved into a bright light seemingly mounted on an object about the size of an automobile. The object appeared to make a search of a park area, moving back and forth and in figure 8's, at about 200-300 feet altitude. (Letter and visit to NICAP Office 11/8/68, NICAP files.)
670911	Arlington	VA	2						12:35 p.m. EDT. A witness in the vicinity of Washington National Airport saw a silver disc with a dome (sombrero shape) hovering, then it banked and moved out of sight behind trees. (Phone call from witness, 9/12/67, NICAP files.)
670913	East Bridgewater	MA	2						10:53 p.m. EDT. A man saw a row of orange-yellow lights (body lights) with a vague form behind them. The object hovered, changed to one light, then returned to its original appearance. (Letter from witness, 9/15/67, NICAP files.)
670913	Southbridge	MA	2						Evening, time not specified. Multiple witnesses, including a pilot, saw a cigar-shaped object with a row of white lights (body lights) on the side. The object hovered and maneuvered around, and once appeared to approach an airport as if to land. (Southbridge Evening News, 9/14/67 and 9/15/67, copies in NICAP files.)
670914	Washington	DC	2						2:20 a.m. EDT. A woman saw a bright, orange-yellow sphere that hovered and then sped away. The object was many times brighter than the moon and was seen for 10 minutes. (NICAP report form.)
670918	Cannock, Staffordshire	UK	2						9:00 p.m. LT (5:00 p.m. EDT). A family had several sightings of red lights like glowing coals beginning about 8:30 pm. At 9:00 pm, two red lights glided in front of a full moon, disappearing behind nearby rooftops. (Stanway and Pace, 1968, p. 15.)
670918	Sault Ste. Marie	MI	2						6:00 p.m. CDT (7:00 p.m. EDT). A woman saw a flat, round (disc-shaped), dark-colored object with a band of light around its circumference. The object landed in a field, ascended, then moved out of sight. No traces of the landing were found in the field. (Evening News, Sault. Ste. Marie, 9/20/67, copy in NICAP files.)

670919	Belgogradskaya	Russia	2						7:40 p.m. A witness named A. Serdyukov, who was traveling with a group of communications technicians, observed a luminous half-moon rising high in the sky directly in front of them. It descended rapidly, leaving a cone-shaped tail. (Ref. 3)
670920	Leek, Staffordshire	UK	2						Around 8:30 p.m. Three witnesses saw a very bright round, slightly oval object "bright as a car headlight" hover overhead in the clear sky for about 30 seconds. (Stanway and Pace, 1968, p. 16.)
670925	Tavigny, Buret	France	2						Daytime. Two hemispherical objects with flat bottoms were seen by a woman to emerge from some mist. One of the objects flew around a house and the other seemed about to land, then both rose and flew off. (Haines, 1994, p. 84, from UNICAT #629.)
670925	Toronto, Ontario	CAN	2						Night. Five policemen saw a white light that moved at low altitude over the highway ahead of a pursuing police car. The object suddenly stopped, then veered and accelerated away. (Toronto Telesram, 9/25/67, copy in NICAP files.)
671000	Sukhumi	Russia	2						Noon. Engineer V.N. Chechyanov and his coworkers saw a strange object in the clear blue sky for half an hour. It hovered for a while, then moved along the shore, rose and disappeared. (Ref. 3)
671000	Glencoe, Ontario	CAN	2						Night. Three adults and their children saw a cluster of unidentified red and white lights that seemed to be spinning as they apparently paced the witnesses' car. (London Free Press, Ontario, 10/12/67, copy in NICAP files.)
671002	Melville	NY	2						7:30 p.m. EDT. An aircraft company engineer and his children saw a white disc with rectangular windows, and a white light on top (body lights). A white light beam from the bottom illuminated the ground. (light reaction). (Hall, 2001, p. 161.)
671005	Johnson City	TN	2						10:15 p.m. EDT (11:15 p.m. ADT). Multiple witnesses reported an object with blinking multicolored lights, three portholes, and a prism-like component on the bottom that emitted light rays. The object hovered, moved slowly, sometimes rising and falling, and ascended. (Johnson City newspapers of 10/5/67 and 10/17/67, copies in NICAP files.)
671010	Bow River Forest, Alberta	CAN	2						Time not reported. A forest fire lookout saw an oval object with a rim around the circumference and a green light on top. The light rotated, and when the object moved it turned white (color/motion correlation). (London Evening Free Press,Ontario, 10/16/67, copy in NICAP files.)
671011	Unitah Basin	UT	2						8:30-9:00 p.m. MDT. Many people, singly and in groups, independently reported seeing a brilliant reddish-orange object moving south to north. It was described as a large, flat-bottomed dome (hemisphere) with pulsating red, green and yellow lights (body lights). Its light illuminated the ground as bright as day. (Salisbury, 1974, p. 55-61.)
671012	Dubuque	IA	2						6:30 p.m.CDT. Seven children saw a silver, egg-shaped object with legs that appeared to be preparing to land in the yard where the children were. Reportedly a similar object was seen several hours later over a nearby town. (Stars 6t Stripes, 10/15/67, NICAP files.)

671013	Elnora and Mirror, Alberta bt.	CAN	2						1:50 a.m. A locomotive engineer reported that his freight train was paced by an unidentified object for 30 miles. The object once came within 100 yards. was seen to be flat on the bottom with a dark dome-like structure on top (domed disc). It was estimated to be 40-50 feet wide and 15-18 feet tall. Possible EM effect noted on radio. (Keyhoe and Lore, 1969a, pp. 10-11.)
671014	Ouray	UT	2						7:45 p.m. MDT. Two men in a car saw a sharp-edged, bright orange object shaped like a "haystack on fire" (hemisphere), flat on the bottom, that rose from on or near the ground emitting blinding light as their car approached. (Salisbury, 1974, pp. 53-55.)
671017	Holmeschapel, Cheshire	UK	2						6:00 p.m. LT (2:00 p.m.EDT). A truck driver on the M6 Motorway watched a dark circular craft moving parallel to his path for 5-1/2 miles as he drove at 35-40 m.p.h. He stopped and got out to better observe the object, which was disc-shaped with a rim around the center and had illuminated portholes. (Stanway and Pace, 1968, pp. 17, 44-46.)
671017	Roosevelt	UT	2						10:00 p.m. MDT. A couple saw a large orange, ball of light that hovered over a corral. It was joined by a second orange ball (rendezvous), and they flew away together to the east. (Salisbury, 1974, Appendix B, Table 1, case 54.)
671017	Berkeley	CA	2						10:04 p.m. PDT (11:04 p.m. MDT). A woman saw an egg-shaped object which swooped down, skimmed over rooftops, stopped, retreated, then fell to the ground. (Letter from witness, 10/23/67, NICAP files.)
671018	Lake Charles	LA	2			BBU			bright, fiery ball flash 4 times while moving E, just above tree tops
671019	Medicine Hat, Alberta	CAN	2						9:45 p.m. MDT. Five teenagers saw a disc with two white lights at one end and a red light at the other (body lights). The object appeared to be spinning. It swooped down from high altitude, leveled off, and moved away at high speed. (Unidentified newspaper clipping, NICAP files.)
671020	Milledgeville	GA	2						4:36 a.m. EDT. Two police officers reported that a bright red ellipse followed and illuminated the interior of their patrol car. Later police sightings that morning very possibly or probably were astronomical. (Hitt, 1999.)
671022	Newnan	GA	2						4:30 a.m. EDT. Two police officers saw a ball of white light flying at treetop level. They stopped to get a fix on it, then tried to approach it, but it apparently outdistanced them so they turned back. (Hitt, 1999.)
671022	Winnipeg, Manitoba	CAN	2						Evening, CDT. Two real ! estate salesmen saw three brilliant, 2-3 foot diameter, pulsating red lights floating over a field, apparently body lights on a larger craft. A car stopped with six people who also saw the lights. (Bondarchuk, 1979, p. 47-50.)
671022	Humboldt, Saskatchewan	CAN	2						7:45-8:00 p.m. CDT. Two witnesses saw three lights that were about 4 feet in diameter. The two outer lights were orange/amber and blinked or flickered. The center light was a bright red inverted teardrop shape that moved up and down at regular 2-3 second intervals. (Clausen report, NICAP files.)

671022	Milledgeville	GA	2						Night. Two groups of policemen about a half-mile apart, while in radio communication, saw a glowing orange-yellow, cylindrical object rise from near the ground about one-quarter of a mile away from one of the groups. (McDonald letter, 12/1/68, Donald E. Keyhoe Archives files.)
671023	Bristol, Avon	UK	2						4:50 a.m. LT. A woman saw a cigar-shaped object, slightly narrower at one end, with a blinding blue light. Hovering near it were three separate, smaller orange and yellowish lights or objects. (Hennessey report, NICAP files.)
671023	Carlisle	PA	2						1:30 a.m. EDT. A man saw a silver egg-shaped object with a light blue ring around the center. The object hovered and then flew away, the blue ring changing color to bright pink (color change/motion correlation). (Pennsylvania NICAP Subcommittee report and NICAP report form.)
671024	Hatherleigh, Devon	UK	2						4:00 a.m. LT. Two policemen saw a bright cross-shaped light that moved at treetop level with witnesses it in pursuit. (Unidentified newspaper clippings and letter from local investigator, NICAP files.)
671026	Rock Hill	SC	2						Dusk, EDT. Two women saw a silver bell-shaped object with red revolving lights at the top (body lights) and an apparent row of windows around the upper portion. (Unidentified newspaper clipping, NICAP files.)
671027	Parshall	ND	2						3:00 a.m. CDT (4:00 a.m. EDT). A waitress driving home saw a large, round, revolving object with alternating triangular areas of coloration. The object was low and moving horizontally an estimated two blocks away. As it paced her car, she saw 2-3 white streaks of light (light beams) coming down vertically from the object.
671027	Max	ND	2						3:30 a.m. CDT. A milk truck driver reported a round, spinning red object that followed his truck for about an hour. At one point it hovered silently over his truck. (Hall, 2001, p. 188; MUFON UFO Journal, Oct. 1987, p. 19; U.F.O. Investigator, Vol. IV, No. 5, March 1968, p. 3; McDonald letter, 12/19/68, Donald E. Reyhoe Archives files; Keyhoe and Lore, 1969a, p. 6.)
671027	Weston Coyney, Stoke-On-Trent, Staffordshire	UK	2						7:15 p.m. LT (3:15 p.m. EDT). A witness saw an object dropping vertically from the sky. The object stopped about 100 feet above the ground and hovered. Its shape was like "squared off" spinning top with a dark band around the center. (Stanway and f, Pace, 1968, p. 18.)
671027	Parshall	ND	2						Sphere rose, paced car, which began steering hard. Object hovered near missile base, shot straight up out of sight in seconds (section V).
671030	Holland	MI	2						4:00 a.m. EST. A policeman saw a bright orange half-moon (hemisphere) shaped object that was three times the size of the moon. The object hovered, but moved off when the witness approached, disappearing behind trees. It reappeared briefly and then moved out of sight. (Holland Sentinel, 10/30/67, copy in NICAP files.)
671031	Stoke-On-Trent, Werrington	UK	2						10:35 p.m. LT. A witness saw through a window a glowing orange-red, cigar-shaped object hovering low in the sky, a bluish-green area visible on its underside. It was a clear, starry night. (Stanway and Pace, 1968, p. 18.)

671103	Verner, Ontario	CAN	2						10:45 p.m. EST. While driving, a couple and their children saw an oval light that moved alongside the highway, crossed over it, crossed back and went out of sight. (NICAP report form.)
671104	Greenfield	CA	2						12:35 a.m. PST (2:35 a.m. CST). Two women saw a bright circular object about 100 feet in diameter hovering 100-150 feet above a house at an angle. (California NICAP Subcommittee report, NICAP report form; U.F.O. Investigator, Vol. IV, No. 5, March 1968, p. 3.)
671106	Treysa	Germany	2						3:30-5:45 a.m. LT. Five UFOs were reported hovering over Hartdurg area. Two of the UFOs were approximately 15 to 20 feet in diameter and three were approximately eight to ten feet in diameter. All of the UFOs were of a red and white color with a green fringe. Witness photographed the UFOs on color film and submitted the unprocessed film to the Military Police. (NARA-PBB92-607)
671108	Charleston	SC	2						4:00 a.m. EST. A policeman saw a bright oval light with a red light on one end. It hovered at low altitude, moved back and forth (maneuvered), then disappeared. (Unidentified newspaper clipping, NICAP files.)
671109	Erin (near)	TN	2						11:45 p.m. CST. Two nurses driving home from a Waverly, Tennessee hospital stopped for a traffic light in Erin, Tennessee. While stopped they saw a large UFO approach and land on the highway in front of them. (MUFON Sympap81, p. 23)
671114	Liepaya	Russia	2						A large, luminous object shaped like a hemisphere hovered low over the ground. It moved away quickly with a fiery light that was painful to the eye. There were several witnesses. (Ref. 3)
671115	Yerecoin	AU	2						Time not reported. A farm manager saw a dome-shaped object with two square portholes bracketed by two round ports and emitting a loud humming sound. Possible EM effects on TV. (The West Australian, 11/17/67; Flying Saucer Review, Jan.-Feb. 1968, p. 32.)
671115	Sasnava	Russia	2						4:30 a.m. V. Treychis observed a round object in the sky for thirty-five minutes, twenty degrees above the northeast horizon. It seemed to measure 300 feet in diameter. (Ref. 3)
671115	Summerdale	PA	2						Bt. 10:50 and 11:15 pm. Multiple witnesses saw a white ball of light, possibly with red blinking lights on the side, bounce around over WTPA TV towers for 2-10 minutes. (Pennsylvania NICAP Subcommittee report and NICAP report forms, NICAP files.)
671120	Roosevelt	UT	2						10:00 p.m. MST. A man saw pulsating, rotating , red, green, and amber lights about 100 yards away. A shadowy round area could be seen below the lights. (Salisbury, 1974, Appendix B, Table 1, case 58.)
671121	Sofia	Bulgaria	2						5:10 p.m. LT. An unknown number of witnesses saw a slowly moving, high altitude object emitting a pale blue light over the city. First it looked like a large ball, then it stopped directly over Sofia and had a trapezoid shape. (U.F.O. Investigator, 5 Vol. IV, No. 4, Jan.-Feb. 1968, p. 3.) [Possible high-altitude plastic research balloon]
671127	Fayette County	IN	2						9:00 p.m. The object was observed by four witnesses at a rural home. The object dropped down near three other witnesses in a car on a rural road northwest of the Philco-Ford Manufacturing Plant. (Don Worley files)

671129	Quinan, Nova Scotia	CAN	2						2:00 a.m. AST. A man saw an object the size of a car with a rounded back, a pointed end, and two or three lights (body lights). It descended and landed in a clearing in woods for about 5 minutes. (The Vanguard, Yarmouth, Nova Scotia, 12/6/67, copy in NICAP files; U.F.O. Investigator, Vol. IV, No. 4, Jan.-Feb. 1968, p. 6.)
671203	Ashland	NE	2						2:30 a.m.CST. A police patrolman (Herbert Schirmer) saw a hovering, bright aluminum, elliptical object estimated to be 15 feet tall and 20 feet wide with flashing red lights inside. (Hall, 2001, p. 530-32, from: Blum and Blum, 1974, pp. 109-121; Gillmor, 1969, pp. 389-91; Story, 1980, pp. 318-19.)
671204	Newfield	NY	2						1:30 p.m. EST. A couple saw two round convex (disc-like) silver objects with windows around the rim. Their size was estimated as 15-20 feet in diameter and 5 feet thick in the center. The objects hovered at about 100 feet, separated, came back together and disappeared. (Unidentified newspaper clipping, NICAP files.)
671206	Harrisburg	PA	2						9:25 p.m. EST. A woman saw an object with a hump (dome) on top and a "window effect" on the underside showing soft white light, and pulsating blue lights on each end (body lights). (NICAP report form.)
671207	El Paso	TX	2						Early evening. An attorney saw a shiny gray cylindrical object with legs and body lights on the underside. The object hovered at 200 feet, then moved away across the mountains. (Unidentified newspaper clipping, NICAP file; U.F.O. Investigator, Vol. IV, No. 5, March 1968, p. 3.)
671207	Saskatoon, Saskatchewan	CAN	2						8:00 p.m. CST. An 11- and a 4-year old saw a large red object that emitted a small fiery object about 8 inches in diameter with manv swirling colors, especially green, pink, and white. (Report from Saskatchewan UFO club, NICAP files.)
671214	Clinton	MI	2						11:30 p.m. EST. Two aircraft pilots in a car saw a triangular object with a red light at each tip (body lights). (Unidentified newspaper clipping, NICAP files; U.F.O. Investigator, Vol. IV, No. 4, Jan.-Feb. 1968, p. 6.)
671215	Saxon	WI	2	0					1:00 a.m. CST. Three men driving to Saxon saw a rapidly spinning sphere with a white light on top and on the bottom, and red and green lights around the equator (body lights). The object approached at low altitude, hovered over a nearby field. (U.F.O. Investigator, Vol. IV, No. 4, Jan.-Feb. 1968, p. 6.)
671222	Millersburg	OH	2						Time not reported. A silvery disc with multicolored body lights revolving around its perimeter buzzed a car. (UFO Fact & Comment, Goodyear UFO Society, Akron, OH, Jan. 9, 1968.)
680000	Canon AFB	NM	2						1:00 a.m. to 2:00 a.m. On one particular night glowing objects were spotted beyond the fence line of the base and in the distant perimeter. The staff at the Air Force Base pretty much ignored these lights on the first night, wondering if it was just someone playing around, or not thinking a whole lot about it. (Brian Vike, HBCC UFO Research)

680800	Fayette County	IN	2						11:00 p.m. Object, humming sound, 5 mins. Dark football shaped object hovered 200 ft. over barn and projected bright bluish beam into cornfield. Moved off south still projecting fan shaped beam over countryside Witnesses 1? (Selby) (Don Worley files)
680120	Vermillion	SD	2						Round orange-red object hovered near ground, moved abruptly to position behind car, road illuminated; made repeated passes at car (Section XII, Vol. II, The UFO Evidence).
680124	Fayette County	IN	2						10:15 p.m. Two orange, glowing saturn-shaped UFO. Motor sound. Twenty minutes. Approaching from distance, objects hovered over woods across road, then one seemed to land while other moved over house. Three women terrified and got bibles and prayed. No landing indications in frozen ground. (Browning) (Worley files)
680204	Redlands	CA	2			BBU			200 witnesses see low-flying disc - 50-60 ft circular obj with 7 lights on the bottom, 8-10 lights on top
680213	Missoula	MT	2						Luminous elliptical object followed car for 30 minutes, moved back and forth across road, made sharp turns and unusual maneuvers, suddenly disappeared (Section IV, Vol. II, The UFO Evidence).
680307	Madison	OH	2						Time not given. CE, one witness (Robbin) No details. (SL-12)
680319	Beallsville	OH	2						Time not given. CE-2, one witness (Wells). No details. (APROB-16)
680616	El Choro	Argentina	2						Night. Chief of Provincial Police German Rocha and Police Major Niceforo Leon observed a round object with a vivid blue light. It landed, left a strange, powerful odor, and burned grass and shrubs. (Magonia #909, FSR 68, 5)
680621	Miramar	Argentina	2						A man riding his bicycle encountered a large object, 50 cm above the ground. The top part was spinning, and it cast a vertical beam of red light toward the ground. Calcinations traces were found by police. (Magonia #911, LDLN 95)
690718	Strongsville	OH	2						7:00 p.m. Walter Rogers was ten years old at the time, a very bright metallic silver disc, reflecting sunlight, descended as if going down a flight of steps, then went straight over the nearby farm field very fast. Viewed about 10 seconds. (Page 31, Regional Encounters: The FC Files, Ridge)
680701	Botucatu	Brazil	2						12:30 a.m. Three boys saw an object, about 8 m wide, 350 m away. It had a large tripod under carriage and a ladder reaching down to the ground. These devices were retracted, and the object rose a few meters, then flew off at high speed. (Magonia #914, FSR 68, 6)
680715	Columbus	TN	2						3:00 a.m. UFO emitted beam-like searchlight to ground. Also narrower red beam or ray in center. (See drawing. UFOs: A New Look, pg. 44)
680716	Indianapolis (near)	IN	2						11:00 p.m. 15 minutes. Two men in a car stopped to rest in a field after long drive. While driving into the field, with headlights on only long enough to avoid obstructions, they encountered a light. Shortly after, a large crimson red object hovered over trees. (MUJ, issue and page unknown)
68LateSummer	Lake Norman	NC	2				**NC**		Domed UFO near nuclear plant.

680800	Fayette County	IN	2						11:00 p.m. Object, humming sound, 5 mins. Dark football shaped object hovered 200 ft. over barn and projected bright bluish beam into cornfield. Moved off south still projecting fan shaped beam over countryside Witnesses 1? (Selby) (Don Worley files)
680816	Hamilton	OH	2						11:00 p.m. Large group of people saw a UFO approach, beam lights down which reflected off Greenbriar Lake. (See drawing. UFO's: A New Look, g. 43)
680816	Fayette County	IN	2						10:30 p.m. Slowly moving round white ball projecting white beam of light onto fields and woods as it moved south. One witness (W. Stanton) No sound. 9.5 mins (Don Worley files)
680818	Cluj	Romania	2						Round silver object flew overhead, reversed direction, three photos taken. Object finally shot upward out of sight (Section VII, Vol. II, The UFO Evidence).
680908	Evansville	In	2						3:00 p.m. Single witness (confidential). Lady and her son were driving and talking. It didn't look to be very far away (1/4 mile or more) and the witness said it didn't look big enough to hold an upright man. (See drawing, Regional Encounters: The FC Files, pg. 27)
681026	Greenfield	IN	2						10:00 p.m. Witnesses: Mr. & Mrs. R. E. Foster. While driving near Greenfield, they saw UFO come to rest on road about two miles ahead of them. It rose up and landed two or three times, and when the car reached the landing site on the road, car lights went out for half a minute or more in each place. (Letter to NICAP)
681122	Biloxi	MS	2						Domed disc descended, flew over shrimp boat, hovered briefly, shone light down on boat, then took off straight up out of sight (Section IX, Vol. II, The UFO Evidence).
681122	Fleury-d'Aude	France	2						9:00 p.m. A dozen witnesses saw a lens-shaped object surrounded with a blue glow, making a noise similar to that of a jet and emitting flashes, which landed in a field briefly. It suddenly took off and was lost to sight at the horizon. (Magonia #923, France-Soir Nov. 24, 1968)
681127	Belcourt	ND	2						Round object with body lights hovered, shone red light beam to ground. When officer shone flashlight at object, it immediately blacked out (Section V, Vol. II, The UFO Evidence).
681208	Grey	S. AU	2						Top-shaped object paced car, sped away (Section XII).
690310	Westhope	ND	2						Disc with dome passed overhead, stopped, emitted light beam onto road, illuminating police chief's car. Finally ascended, flew away to south (Ref. 1, Section V).
690531	Memphis	TN	2						C1 reported by Baird. No details available. (MUFON Skylook 8, 6)
691030	Waipukurau	NZ	2						Circular object with lights hovering over airport sped away making high, whining sound when security guard shone spotlight on it (Ref. 1, Section VI).
700101	Duncan, B.C.	CAN	2						Hospital nurse saw craftlike object hovering near building, two humanoid figures visible in upper portion (UFOE II, Section XII).
700420	Evansville (near)	IN	2						4:10 p.m. 10 minutes. Saucer shaped object above cornfield. (NUFORC)
700830	Vincennes	IN	2						11:30 a.m. Girl (7), saw a metallic disc in the ENE hovering over Wheatland Road and reported it to her parents. Her father went outside and saw the object, too. (See MADAR event Sept. 9)

701029	Helleland	Norway	2						Disc with dome descended, hovered over car, driver blinded by strong blue-white light, physiological effects. Object departed rapidly straight up (UFOE II, Section VI).
710107	Dennis	MA	2						A strange metallic object that shone with an orange glow as it moved through the sky may now be resting at the bottom of a lake. The object was observed independently by two school boys on the morning of the 7th on Cape Cod. (The UFO Investigator, Feb.1971, p.1)
710418	Pittsburgh	PA	2						Dusk. A man and a woman while driving on a rural road north of Pittsburgh, observed a football-shaped object resting on the ground or deployed just a few feet above the ground. The observation was made at a distance of approximately 80 yards. (UFO Investigator / May 1971, page 3)
710425	Pottstown	PA	2						About 9:00 p.m. A woman spotted a luminous object over a farmer's field while driving on a rural road. It was a very bright, pulsating light. It would move and stop, move and stop, in a jerking manner. (UFO Investigator, May 1971, page 3)
710529	Oxford (near)	MA	2						4:00 a.m. EDT. A shiny black "discus" that hovered, gyrated, and flipped over on its side was reported to have been observed at a recreational area near Oxford. (UFO Investigator / July 1971, page 3)
710531	Newmarket	NH	2						Two witnesses sighted a grayish white upright egg-shaped object with dark ports around its perimeter. It hovered a few feet above the ground in plain view in front of trees before ascending straight up and out of sight. (Raymond Fowler, UFOs: Interplanetary Visitors, pages 175-180, 340.)
71Summer	Karnes City	TX	2						Night shift. UFO encounter over open pit uranium mine, near Conoco Oil Co. (rense.com, Unevaluated)
710708	Chesterfield	IN	2						Evening. Saturn type UFO with high frequency whine. (Missing time, abduction) Same type UFO returns to farm (See May 16).Witness loses conciousness while watching it from upstairs bedroom. (Worley files)
710801	Westminster	MD	2						10:30 p.m. Report of an egg-shaped UFO with two rows of colored lights on its underside was received by state police. Charles P. Kenyon, 39, of New Windsor, Md., had driven his wife and their four children to a location outside Westminster to observe a violent Thunder and lighting storm then in progress. (Investigated by NICAP's Capital Area Subcommittee, chaired by astronomer John Carlson).
710920	Northern	Sweden	2						10:45 p.m. Engineer Sten Ceder was driving home when his car was suddenly brightly illuminated by multiple beams of light and he saw a square black object race past. He was then surrounded by a perceived dense black cloud that seemed to extinguish all light. (Flying Saucer Review Case Histories, Supp. No. 10, June 1972.)
711000	Florence	NC	2						6:00 p.m. Traingular Shape - black colored lights on the bottom- no other lights observed approximately 300 ft across completely silent moved slowly app. 30- 40 mph. No. of Witnesses: 1; Duration: 10 min. (ufoevidence.org., Unevaluated).

711012	Mattawan	MI	2						A teenager, four friends, and at least one adult reported observing "a bright white cloud flying in circles but traveling in a west to easterly direction" over Mattawan. Witnesses estimated the object was several hundred feet wide. (UFO Investigator/ Nov. 1971, page 3)
711105	Coarsegold	CA	2						About midnight a rancher and his wife observed a brilliant orange triangular-shaped object with a blinking red light on top. Two more identical objects then appeared alongside the first. (Los Angeles NICAP Subcommittee report filed by Mrs. Idabel Epperson, who interviewed the witnesses by telephone.)
711106	Pickaway County	OH	2						A UFO resembling a plate turned upside down on another plate that glowed with a white light, reportedly followed the president of a local school board and his wife as they were driving on a rural road just south of Lockbourne AIr Force Base. The object flying at an altitude of approximately 500 - 1000 feet, was observed for more than one hour, and appeared to to follow the couple to their farm and orbited the area for about 45 minutes. (UFO Investigator/ Dec. 1971, page 3)
711214	Cavetown	MD	2						11:45 p.m. Several residents (near Hagerstown), including a Maryland State Trooper and a college professor, reported seeing a bright light circling over Holiday Acres, a local subdivision. The object has been reported by local residents on several occasions, and is usually seen around 11 p.m. (UFO Investigator / Jan 1972, page 3)
720211	Apollo Beach	FL	2						A 24-year-old college graduate reported observing a disc-shaped UFO about 300 to 500 feet in the air and not more that 100 yards in front of the witness, flying right in front of his car around 10:40 P.M
720616	Gary	IN	2						No details on this close encounter listed in EGBA. Witness was "Alterwitz". (EGBA, page 672)
720719	Chicago	IL	2						10:42 p.m. Peter Reich, aerospace writer for CHICAGO TODAY, saw a UFO and wrote 4 column article. Incredible high-speed of object that looked like anti-collision beacon (red) over Lake Michigan. Estimated at 1/2 mile and 600 mph, object suddenly stopped, reversed course sharply and appeared to fly along a downward curve in opposite direction. (SL-58, page 12)
720722	St. Louis	MO	2						8:30 p.m. Sixteen witnesses. Large UFO observed over highway intersection I-55 and Union Rd. by three children. KXOK received 13 calls. (SL-72, page 10)
720731	Belleville	IL	2						9:45 p.m. 3-4 Mins. Four people observed a yellow discoid object, 50-60' in diameter at 300' altitude while driving. There was an unconfirmed radar track at Scott AFB. (SL-59, page 13)
720801	Lebanon	IN	2						Early morning. 45-min. First observed as a triangle of lights that just hovered. Object turned and flashed away at high speed. At this time there were three bright orange-red lights which illuminated the "saucer" which appeared to have "bat-like" wings. Observers watched with field glasses. (SL-60, page 9)

720811	Bensonville	IL	2						5:30 a.m. "It was shaped like a football and had a rim around it." Described as 50' long and windowless it continued to pulsate colors. First, a bright orange, then gray, then bright orange again. Estimated at 200' altitude other motorists in vicinity got out of their cars and looked at the object. (SL-59, page 11)
720811	Elgin	IL	2						5:30 a.m. Orange "football-shaped" object hovered over the ground, sighted by motorists. State Police in Elgin, the DuPage County Sheriff's Office, and suburban police departments reportedly received calls concerning the strange object. (See Bensonville, IL) (SL-59, page 11)
720811	Oak Brook	IL	2						5:30 a.m. Same object seen. (SL-59, page 11)
720812	Taize	France	2						Elliptical object with bright lights hovered near ground emitting light beams downward; satellite objects emerged. UFO reacted to flashlight (UFOE II, Section VI).
720819	Colby	KS	2						Luminous, bowl-shaped object hovered near ground; blinding white light brightly illuminated terrain; object made "whooshing" noise, shot straight up (UFOE II, Section - V).
720820	Reading	PA	2						Three city police officers, including a sergeant, observed an oval-shaped object hovering several thousand feet in the sky above Mt. Penn. They said the object changed color from white to red to bluish-green. (NICAP UFOI, Oct 1972, page 3)
720821	Portland	OR	2						9:45 p.m. A 39-year-old woman reported what appeared to be a solid object surrounded by pulsating lights. She first spotted the "elongated" object and observed it for approximately 20 minutes before it disappeared behind some tall fir trees. (NICAP UFOI, Oct 1972, page 3)
720821	Portland	OR	2						9:45 p.m. A 39-year-old woman reported what appeared to be a solid object surrounded by pulsating lights. She first spotted the "elongated" object and observed it for approximately 20 minutes before it disappeared behind some tall fir trees. (NICAP UFOI, Oct 1972, page 3)
720829	Reading	PA	2						Three city police officers, including a sergeant, observed an oval-shaped object hovering several thousand feet in the sky above Mt. Penn. (Reference: UFO INVESTIGATOR, October 1972, page 3)
720911	Butler	IN	2						1:55 p.m. 8-10' altitude!!! City Editor of the Aubury Evening News was in the Butler Police Station when a woman walked in. She came up over the crest of a high hill and there it was, about 3' above my car. It was about a car length long, but perfectly round with what looked like red fluorescent paint along the top, and it had four feet coming out of the bottom." . (SL-60, page 5)
720913	Burlington	CO	2						A rural family, who police say are responsible people, reported that a UFO "as big as a house" flew parallel to their car as they were driving down a country road at night. One witness said the object landed and took off twice in a nearby field. (NICAP UFOI, Oct 1972, page 3)

721009	Vincennes	IN	2						10:00 a.m. Several area residents reported sighting a silvery, blimp-shaped object high in the sky over Knox County at midmorning today, but Vincennes and Knox County police said they had no clues to its identity. Meanwhile, city police received a telephone can from a woman who "followed the UFO from Bicknell to Vincennes." No figures were available on apparent size, speed or height of the object, but all observers gave similar descriptions of its shape.
721014	Lorraine	IL	2						9:00 p.m. A gentleman, while driving a tractor on a side road, observed a dark, rectangular-shaped object (more like a trapezoid) outlined in blue light. Observed suddenly for 3seconds it then switched off. (SL-62, Page 10)
730102	Santa Ana	CA	2						At least eight witnesses observed a large oval-shaped object that appeared to hover as low as two hundred feet from the ground.
730221	Elsinore	MO	2						Evening. Six witnesses reported a close encounter with an object with a row of lights, hovering at 50' altitude. (Reggie Bone incident)
730303	Kampala	Uganda	2						President Idi Amin was among a large number of people who saw a UFO splash down into Lake Victoria
730406	Charleston	MO	2						Mrs. Dorothy Thompson saw an egg-shaped object at treetop level after her TV set went off and on
730406	Ellsinore	MO	2						At 11:30 a.m. a domed disc-shaped object with portholes and landing gear came down and landed in the woods four miles west of Ellsinore
730429	Shamokin	PA	2						More than a dozen residents of the Ferndale sub-division told state police they observed a UFO with "flashing lights" land on Burnside Mountain.
730430	between Kinchela and Gladstone, NSW	AU	2						Four teenagers driving saw a bright yellow domed disc or domed-ovoid craft dive quickly toward the ground.
730500	Catanduva, Sao Paulo (near)	Brazil	2						A man and his wife employed at the Fazenda Secap claimed to have seen an oval shaped flying craft, "with two figures like people, in big hats and linked together by a sort of tube."
730506	Kokomo	IN	2						Humanoid report, no details,
730512	Kent (Near)	OH	2						9:20 p.m. The witness was driving west on Route 76, near Kent, when he observed a group of flashing lights overhead, almost directly above the car.
730519	Springfield	MO	2						9:00 p.m. A blue cylindrical shaped UFO made a low silent pass.
730523	Mount Gambier	So. AU	2						A round spinning UFO with red, green, blue and purple lights buzzed a car with three teenagers
730527	Sao Jose Do Rio Preto, Sao Paulo	Brazil	2						2:00 a.m. saw a luminous flying object approaching her property. The object circled her garden and hovered
73Summer	Littleyork	IN	2						9:30 p.m. Four people in a car were driving near Weston Lake when a bright floodlight-type light was pointed at them. The object was behind the witnesses and off to the right. They stopped their car and watched the object, described as a "flat-bottomed catfish-shaped" object, as it passed overhead and off to the right at 65-70 mph and about 100' up. Duration: 10 mins. (FI-4 /Palmiter/ MUFON Indiana)
730614	Seville (200 miles north of)	Spain	2						4:30 a.m. A man driving saw an object shaped like a pot (truncated cone) flying rapidly toward him at low altitude

730628	Sandoval	IL	2						At 9:00 p.m. Mr. & Mrs. Sanders saw a cone-shaped UFO with multicolored lights at treetop level while driving
730800	Princeton	IN	2	C	5				Three see flying saucer during thunderstorm
730814	Traverse City	MI	2						A 19-year-old Lake Ann, Michigan, resident and his companion claim they observed a cylindrically-shaped object, about 50 feet in length, pass in front of their car around 10:30 p.m.
730819	Greenup	IL	2						One report report came from a Charleston resident who said a UFO had landed "about 200 feet from my car
730900	Brownsville	IN	2						2:00 a.m. Main features of case; disk craft observed at very close range.
730906	bt. Penong and Ivy Tanks	AU	2						The witness was a passenger in a semi-trailer on Route 1 enroute to Perth. She awoke to observe a brightly-lit egg-shaped object on the ground to the left of the road.
730908	Hunter Army Air Field	GA	2						"Saucer-shaped" object with flashing bright red and white lights dove at MP patrol vehicle
730908	Savannah	GA	2						A Savannah police officer saw “a large circular craft something like a flying saucer.
730914	Cuesmes	Belgium	2						At 7:45 p.m. a young woman and her father were driving through a mostly swampy area, when upon rounding a bend in the road they saw a luminous bright orange object shaped like a flower pot (truncated cone) hovering at low altitude
730916	Elmwood Township	MI	2						Brightly glowing ellipse hovered near house. (UFOE II, page 341)
730929	Obiob County	KY	2						Evening. Couple saw a bright-red light swoop down close enough to the earth to light up 1-1/2 acres of land
731000	Puy-Verday	France	2						While enroute to work, the witness' motorcycle misfired and stopped as dazzling bright light appeared on the road ahead. As he approached, he saw it was a luminous ovoid object, with smoke underneath, hovering just above the ground.
731001	Giles	TN	2						Evening. Two witnesses reported egg-shaped object with brilliant light on top disappear behind nearby trees.
731004	Chatsworth	CA	2						Elliptical object with dome hovered about 10 feet off ground, swaying back and forth. Humanoid being appeared,
731004	Simi Valley	CA	2						A man driving on the Simi Freeway saw a 30 by 50 foot triangular object in a dust cloud near the road
731005	Ziegler	IL	2						3:00 a.m. 15 mins. Lady saw object emitting high intensity light that hovered near her residence.
731006	St. Mathias, Quebec	CAN	2						Shortly after midnight a married couple saw bright lights on their property.
731009	Eaton	IN	2						7:30 p.m. No. sound. One hour plus. Object hovered above canning factory in residential area of town.
731010	Dayton (Near)	OH	2						8:00 p.m. At least 15 sightings of unidentified flying objects "covered with red, green and blue lights" zooming about at tree-top level, were reported in Southwestern Ohio
731011	Laurel	IN	2						7:30 p.m. 3-Mins. Sounded like swarm of bees. Object hovered over little town at tree top height. Jiggled up and down and sideways. Looked like two saucers together with cabin on top.

731011	Connersville	IN	2						7:50 p.m. Four witnesses reported two objects flew over at 400-800 feet and headed east. Each oval-shaped object looked like it had around 25 yellow and green lights, with a mist around them.
731014	Connersville	IN	2						Around 8:00 p.m. Grey fish-shaped object with plastic-like compartment on front and portholes on sides.
731014	Boston	OH	2						Evening. About eighty reports. Woman "hysterically" told law officers an oblong object with blinking lights landed in a field in Highland County
731015	Martinsville	IN	2						Evening. In South Central Indiana, Morgan County Deputy Sheriff Robert Williams said he saw an unidentified flying object that "took off from the ground"
731015	Huntington	IN	2						Dusk. UFO terrorized Indiana farmer and his wife by chasing his truck as he raced for home. Object vanished in a dazzling bursts of speed.
731015	Lambert and Marks	MS	2						Woman saw an orange oval giving off red glow hovering at treetop height
731015	Henryville	MS	2						Motorist encountered elliptical object with blue and orange body lights, legs, standing on the road.(UFOE II, Section VIII)
731015	Connersville	IN	2						7:30p.m. Forty-five workers saw a round object during their break. Five men from the D & M Dishwashing Manufacturing Co. saw a round object over the AVCO test area.
731015	Connersville	IN	2						9:00 p.m. Oval with dome, no sound, 1 Min. Seen at rear of D&M Mfg. plant when workers stepped outside for break. Craft with row of yellow lights and intersecting lines on bottom hovered
731015	Berea (Near)	TN	2						10:30 p.m. Awakened by the barking of their dogs, a farm family saw lights from a UFO in the woods.
731015	Connersville	IN	2						11:30 p.m. Three witnesses. No sound. Fishlike object suddenly grew larger and in the blink of an eye appeared just above the ground over a field on the north edge of E.
731015-16	Pine	LA	2						Sheriffs saw and chased pulsating orange objects that alternately hovered, swinging like pendulum, darted around at high speed (UFOE II, Section V, VIII).
731016	Hattiesburg	MS	2						Motorist driving to work, object landed on top of his car, all four doors flew open, then closed and he felt weight lift off car, saw a lighted object with blue, yellow, and gold rings around it moving away to south. (UFOE II, Section VIII)
731016	Between Gulfport and Biloxi	MS	2						A cab driver reported that he was confronted with a. blue, oblong UFO that landed in front of his car on Interstate 90.
731017	Pikesville	MD	2						At three o'clock in the morning a woman saw a red, transparent ovoid object, 15 feet long and 6-8 feet high. On top was a bubble. Inside she saw a human figure standing up.
731017	Warner Robins	GA	2						9 p.m. A cigar-shaped object chased a vehicle, making a humming sound.
731017	Wayne (Near)	NJ	2						Two men, driving on Route 23 to New York City from work, saw a large, round, silver craft hover over a field, then land.
731017	Johnson City	TN	2						Several sightings of UFOs: circular copper-colored object that descended, hovered near ground, took off straight up

731017	Danielsville (Near)	GA	2						A silver, oval-shaped object landed on C.S, Rt 29, 300 feet ahead of Paul Brown's car
731017	Loxley	AL	2						Clarence Patterson and his pickup truck were sucked up into a huge/cigar-shaped object with a green light.
731018	Mt. Vernon	IN	2						10:30 p.m. red flashing light on the rear, long and narrow described as like a squared-off cigar.
731019	Goshen	OH	2						9:00 p.m. (=-) While out on his farm with his coon dogs, "Sam" came upon a dimly lit object sitting in a field on tripod legs, approx. 300 ft away. The object was saucer-shaped with a dome atop
731019	Copeland	NC	2						A farm couple encountered a blue, oval UFO hovering near their mobile home.
731020	Campbellsville	KY	2						2:00 a.m. An early morning encounter with a "triangular-shaped object about the size of two cars" hovering about tree-top high not more than 100 yards" from home.
731024	Fredericktown	OH	2						About 9:00 p.m. CE-III; possible CE-IV. Woman in car pulling into drive, notices her headlights appear to cause a "washtub" object to light up and illuminate her back yard.
731025	Christy Creek	KY	2						9:00 p.m. Glowing orange oval hovered 300 feet above car, light reflected brightly off of car hood; object then sped out of sight.
731031	Okawville	IL	2						Time not given. About 20 miles southwest of Okawville. Eight; high school students were driving a station wagon when they spotted an unexplainable light hovering above the road
731101	Morehead City	NC	2						Round object with red and green blinking lights around circumference hovered near car. (UFOE II, Section VIII)
731106	Evansville	IN	2						2:09 a.m. Owner of Stadium Inn saw huge glowing object from front of place of business, chased at high speed
731108	Johnstown	NY	2						2:40 p.m. A group of elementary school students saw a gray-white object shaped like an Apollo capsule (truncated cone) descending as if to land less than 200 feet away. (Marlin Daily Democrat, Texas, Nov. 9, 1973, UPI story)
731116	Evansville	IN	2						9:45 p.m. Young man (15) and three others (l boy & 2 girls) saw object come down and land twice, Had round thing on it like an electric eye and glowing red basket-like bottom section.
731123	Matthews	MO	2						11:30 p.m. This close encounter began with the observation of five red lights in a curve, indicating something round.
731128	Bufkin (2 miles East of)	IN	2						7:15 p.m. This incident involved three witnesses who reported two orange-red balls of light that hovered low to the ground in the west for about six minutes.
731210	Ouzoues-sur-Loire	France	2						About 6:20 p.m. A 50-year-old couple, several other witnesses, and gendarmes watched a silent, 5 meter tall cone-shaped UFO only 20 meters from the ground fly away toward the southwest.
731210	Hochries	Germany	2						About 8:30 p.m. Near the Austrian-Bavarian border, Friedrich Lennartz, 33, and Peter Zettel, 29, had a close encounter of the second kind when a multi-colored, ovoid UFO

731213	Bradenton	FL	2						8:50 p.m. While checking on a strange object seen near the Braden River, the witness started to turn his car around, and the high beams from his car picked up a silvery reflecting object hovering 20 feet above the river.
740104	Berwyn	IL	2						5:15 p.m. Two women were driving, saw hovering object (about 75' high) with two bright lights in front shining straight ahead, and smaller lights around the sides. (SL 75,15)
740104	Santa Ana	CA	2						Martin W Barry, a Marine sergeant, was making his usual early morning 5 mile run in a park, in a driving rain, when he came up with a 7-foot tall, bulky figure standing in a slumped forward posture, long arms dangling nearly to the ground. Behind it, hovering only a few feet off the ground was an orange pulsating flying saucer.
740122	Norton	MA	2						A man on his way home from work spotted what he described as a flying saucer near a gravel pit in this New England town. He saw a light in the air and as he approached it, the light became brighter and larger. (Reference: UFO INVESTIGATOR, February 1974, page 2)
740125	Evansville	IN	2						6:30 p.m. WTVW's David Goodnow (later CNN anchorman) saw three glittering red-colored objects like illuminated sign, blinking at random, very bright, with smaller white light on each side (like oOOOo) with no sound. (Ridge files, UFOFC)
740228	Hirson (Aisne)	France	2						5:30 a.m. The witness was riding his motorcycle to work, when suddenly he found himself face to face with two humanoid beings and having no memory of having stopped the motorcycle. It was still dark at this hour. In an adjacent field he saw a dark circular object. Physical traces were found at the landing site.
740408	Fayetteville	IN	2						Close encounter with two witnesses. No details. (Hynek 4-19?, possibly Don Worley Files)
740414	Vedrin & Courriere	Belgium	2						8:00 p.m. ...and continuing for close to two hours a flurry of UFO sightings was reported. The SOBEPS organization conducted a thorough investigation. (Easter UFO: A SOBEPS Inquiry by Frank Boitte, Brussels, Belgium.)
740415	Adelaide	AU	2						Two motorists from Adelaide reported loss of power from their automobiles after sighting UFOs. These reports were made simultaneously with calls pouring into RAAF officials regarding other sightings in the area. (Reference: UFO INVESTIGATOR, July 1974, page 1)
740606	South Hampton	NH	2						9:30 p.m. A family driving along Route 150 encountered a structured object with a row of body lights. They fled in fear with the object following. When they stopped, the object hovered with a bobbing, fluttering motion above an adjacent field. (Christian Science Monitor, Aug. 2, 1974. Investigation by Raymond B. Fowler.)
740611	Lincolnshire	IL	2						No details but recorded as close encounter one with seven witnesses. (CUFOS)

740614	Medellin Castle	Spain	2						5:30 a.m. Lasted 1-1/2 hours and was seen to the East in the direction of Venus and disappeared as Venus would at sunrise. Some investigators report that the witness may have been the town drunk, but here for-the-record is what he reported. This man driving 200 miles north of Seville saw an object shaped like a pot (truncated cone) flying rapidly toward him at low altitude (estimated 100 meters). (Inforespace, No. 22, August 1975; translated from French by Jacques Deschenes.)
740618	Metcalf	IL	2						4:30 a.m. Second elderly farmer watched fiery object take off from bean field. (Worley files)
740709	Kingston	NY	2						Elliptical object with body lights hovered low, moved toward police car; officer turned spotlight on it, brilliant white beam from object illuminated patrol car (Reference 1, Section I).
740730	Solitude	IN	2						8:50 p.m. Near Solitude, Indiana, just a little over three miles north of us, a Mt. Vernon couple and their little boy were on their way home from a play in New Harmony, heading south on Hwy 69. They observed an object silhouetted against the moonlit haze in the southwest. . (UFOFC files, Fran Ridge)
740811	Concord	NH	2						In the early morning hours eight police officers from several jurisdictions observed low-flying saucer-like objects with red, blue, white, and yellow body lights. (Concord Monitor & Patriot, Aug. 12, 1974.)
740813	Laurel	MS	2						Just after midnight Aug. 12/13 two motorists driving between Laurel and Meridian independently reported to police that they had seen UFOs. In one car an Air Force officer and his family saw two large saucer-shaped objects displaying a blinding bright blue light approach, then buzz the car three times. (New Orleans States-Item, Associated Press story, Aug, 13, 1974.)
740821	Sparta	IL	2						Time not given, or other details. CE-1, multiple witnesses. (CUFOS)
740908	Causses	France	2						10:30 p.m. And continuing until 1:30 a.m. next morning, residents saw an odd red-orange light, then a luminous sphere that rose from behind a hill. A motorist blinked his headlights a couple of times at the object, and it immediately darted toward him and stopped overhead emitting a humming sound, its light illuminating the terrain. (Ouranos No. 14, 2nd Quarter 1975. Investigated by M. Grazzioli and M. De Cordova.)
740924	Brunswick	ME	2						9:00 p.m. Police officers reported a brilliant elliptical object hovering above the Wiscasset Nuclear Power Station. After severl minutes it rose straight up, leveled off and flew away in an arc across the sky. (National Enquirer report July 8, 1975)
741004	Mt. Vernon	IN	2						8:45 p.m. Strange night close encounter with three MUFON FIs out on routine SKYWATCH patrol. This report was not filed for eleven years because of the nature of the incident. Witnesses feel that the UFO knew where they were and was there BECAUSE they were there. See report synopsis. (UFOFC, Fran Ridge files)
741005	Mt. Vernon	IN	2						8:30 p.m. About same time as night before, this 3-5 minute observation of 6-10 white lights in string heading south to north was logged by the SKYWATCH patrol. (UFOFC, ran Ridge files)

741020	Elkhart	IN	2						9:45 p.m. Close encounter with spinning object 15-25' away from two witnesses and their automobile, car engine died. See clippings (main link is page 1) and Page 2. http://www.nicap.org/741020elkhart2.jpg
741031	Barrington	IL	2						Evening. Two 7th graders and one of their moms reported something quite large with lights all around it. Described as round and black, going around in a circle, bigger than an airplane. A beeping sound was heard. The mother reported the object as shaped like a cigar "and it had little square lights that went on and off." (Newsclipping from NCS)
741100	Kampsville	IL	2						6:00 p.m. Lady and her son saw sharply-outlined hovering object through bedroom window, become brighter, made "whirring sound" As it came closer the light changed from white to red, size of plate at arm's length, passed over house. (MUFON, Skylook 89)
741219	Louisville	KY	2						CE1, no details. (CUFOS)
741221	Darmstadt	IL	2						11:30 p.m. Three Illinois youths report UFO descended into woods. While driving, at a point approximately four miles west of Darmstadt, they were suddenly aware of a bright light illuminating the area around them. (MUFON Skylook 90,12)
75Jan-Mar	Algeria	Africa	2						The UFOs in this report were seen by multiple witnesses. The objects landed and took off. They were also spotted on radar and seen visually simultaneously. Message sent to Henry Kissinger, from the American embassy in Algiers, Algeria.
750101	Kankakee	IL	2						9:00 p.m. Two witnesses (William Caldwell) reported that a "large, orange ball" with the apparent size of the full moon was observed from their car, 15-20 degrees above the horizon. MUFON's Walt Andrus told reporters the Moon wasn't visible at the time. (SL-89,10)
750102	Navarra	Spain	2						Dome-shaped object observed on ground by guard at Air Force base. Body lights visible, ground illuminated as object took off (NICAP UFO Evidence II, Section II).
750102	Baltimore	MD	2						7:45 p.m. At Finksburg, about 20 miles west of Baltimore, Mr. Kenneth C. Ryan, an electrical engineer and a private pilot, went to his back door to let the dog in. He immediately noticed four very bright lights about 10 degrees above the horizon in the southwest sky. (Reference: UFO INVESTIGATOR, February 1975, pages 1-2)
750104	Mariemont	OH	2						Close Encounter II listed by CUFOS. No details.
750105	Laulne, Manche Department	France	2						6:50 p.m. A domed disc with three landing gear legs, 15 meters long with portholes, took off from a landing on a farm. It left behind ground imprint marks and an odor like petroleum. (Sources: Roland Godefroy, Phenomenes Spatiaux, March 1975, p. 9).
750105	Mt. Vernon	IN	2						Close Encounter I listed by CUFOS. Two witnesses. No other details.
750105	Bloomington	IL	2						CE-1, one witness. No other details (CUFOS)
750108	Auckland	NZ	2						11:30 p.m. As Dale & Sheryl Ricard were driving home, a brightly lit globe appeared in the sky in front of them; then it approached & paced the car at a distance of 24 ft. About the size of a car, it had a flange bearing 2 red & 2 white lights surrounding a transparent, brightly lit dome, inside of which 3 dark shadowy moving figures were visible. (Humcat 1975-3 Source: New Zealand Spaceview, Auckland # 66 Type: A)

750120	Pike	IL	2						5:00 a.m. Awakened by a brilliant red light shining in her bedroom window, Marjorie Nighbert scurried to the window thinking one of her neighbor's houses was on fire. It wasn't a fire, but a large red blinking ball of light, larger than a "washtub", moving slowly from the north in a southeasterly direction. She described the object as tadpole in shape. (Skylook, newsclipping)
750120	Vinita	OK	2						8:30 p.m. A UFO was reported to the Sheriff's office by a woman who was driving to work. She spotted a round object lit by white lights making a fast circular motion hovernig over a house six miles southeast of town. (Reference: UFO INVESTIGATOR, May 1975, page 3)
750121	Cape Girardeau	MO	2						Listed with no details as a CE-1. No details. (EGBA,562)
750123	Indianapolis	IN	2						9:00 p.m. Listed as a CE-2 by CUFOS, upgraded from an NL. No other details.
750124	Barham, Kent	UK	2						On this night an orange glowing ball flew over and illuminated the area. It stopped and hovered for awhile, then engaged in some maneuvers. It finally flew off toward the south. (Source: Larry Hatch, U computer database, case 11648, citing FSR, volume 21, number 1).
750128	Dolianova	Italy	2						An ovoid-shaped UFO hovered over a football field. Only 10 meters above the ground, the object rose slowly into the sky at an angle when a car approached. (Source: ITACAT computer catalogue).
750209	Carmi	IL	2						7:20 p.m. Witness reported he and his wife saw a blue object with either beams of light coming down or lighted legs or struts. Conventional aircraft seen simultaneously N & S of object at same relative altitude. (UFOFC, Ridge files)
750216	Caribbean	At sea	2						R.M.S. Carmania (UK) observes bright white circular light appear and rise to 20 degrees, leaving comet-like trail, circle and disappear. Repeated four more times at exact hourly intervals. (Soviet scalar EM weapons tests. May have been a ship borne device.) (Clear Intent)
750217	Harlowton	MT	2						Sheriff, county and state officials observed bright, round object hovering near missile base. Object made rapid darting movements, bobbed up and down (NICAP UFO Evidence II, Section I).
750218	Harlowton	MT	2						2:00 a.m. Several Air Policemen from the K-1 missile base [Kilo Flight Launch Control Facility] north of Harlowton reported they had spotted an object hovering over K-10 which is located 7 miles north of the Harlowton airport...(Harlowton Times newspaper)
750226	Lake Sorell	Tasmania	2						Intensely bright domed disc, orange glow, emitted conical light beam down on lake, illuminated terrain, sped away at "colossal speed" (NICAP UFO Evidence II, Section VI).
750300	Lexington	SC	2				**NC**		CE with octagon near nuclear site
750302	Golfo San Matias	Argentina	2						North of the Valdez Peninsula, a group of men on a fishing boat saw a bright light with a definite form behind it moved horizontally through the evening sky at a low altitude. (Source: Wendelle C. Stevens, Saga UFO Report, March 1977, p. 39).
750302	Mehmke Hill	MT	2						A UFO reported 20 feet over highway, size of car. (NIDS, Summary Report on A Wave of UFO/Helicopters and Animal Mutilations in Cascade County, Montana 1974-1977, Frame 16 of 24 Appendix 1)

750308	Elmwood	WS	2						8:00 p.m. A UFO attempted to land in front of a car with the Forster family inside, while the children in the car screamed. The UFO was a disc the size of a car, white in color with lights all around it, and sticklike legs or landing gear. (Source: Jay Rath, The W-Files: True Reports of Wisconsin's Unexplained Phenomena, p. 67).
750308	Stayner, Ontario (near)	CAN	2						8:30 p.m. The witness and two daughters, 18 and 10 years old, while traveling east on Highway 26, observed a huge circular object similiar to the shape of a large water tower moving overhead. The object was 100 to 200 feet in size. (Reference: Letter to the Ontario Provincial Police)
750403	Lumberton	NC	2						1:45 a.m. . The first sighting occurred on Highway 301 where a delta-shaped object the size of a car was sighted by police officers hovering over a water tower. It then shot off to the north.
750403	Lumberton	NC	2						2:05 a.m. Two sheriff deputies in Hoke County pursued a delta-shaped object flying northeast toward Sampson County.
750403	Roseboro	NC	2						2:20 a.m. A silent object with a searchlight flew over Highway 55 at 200 feet altitude and lit up some pecan trees.
750403	Elizabethtown	NC	2						3:30 a.m. A police officer on Highway 701 chased an object along Highway 701 before losing it into the cloud cover.
750403	Grimesland	NC	2						10:30 p.m. A police officer named Godley sighted a disc-shaped object with red, blue and white lights that zigzagged through the sky.
750403	Rowland (north of)	NC	2						11:45 p.m. There were sightings in Robeson County and in Scotland County on Highway 71.
750403	Lumberton	NC	2						11:47 p.m. A Sheriff's deputy named Lewis pursued a V-shaped craft flying to the northeast toward Red Springs.
750409	Lumberton	NC	2						2:30 a.m. A delta-shaped UFO hovered over a house three miles south of Lumberton, and all the lights in the house went out. The lights came back on when the UFO moved away toward the east. (Sources: Center for UFO Studies case files, report dated May 4, 1975; Jennie Zeidman, Lumberton Report: UFO Activity in southern North Carolina, p. 35; Richard Hall, The UFO Evidence Volume II: A Thirty Year Report, p. 19).
750415	San Jose	CA	2						Disc-shaped object with dome, light beam, made right-angle turn, approached, hovered; began to oscillate, shot straight up out of sight in seconds (NICAP UFO Evidence II, Section IV).
750604	Holland, Manitoba	CAN	2						7:40 a.m. Henry Francois while driving east on a municipal road 1 mile south and 1/4 of mile west of the junction of P.T.H. #34 and 2, he observed an oval disc shaped object with a very brilliant light close to the top and center. (Reference: Royal Canadian Mounted Police report 11 June 1975. Treherne Detachment RCMP File Reference: 75-079-4)
750624	Queensland	AU	2						7:45 p.m. Mr. Eric Falkenburger saw a bright object from his car. The object passed within about 1500 feet of his car and was just above tree top level. (Reference: UFO INVESTIGATOR, October 1975, page 2)
750627	Pont-a-Mousson	France	2						3:30 a.m. A 25 meter in diameter metallic disc hovered just 15 meters above a gasoline service station. It illuminated the ground as bright as day. (Source: Lumieres dans la Nuit, March 1976).

750627	Pont-a-Mousson	France	2						11:20 p.m. A vertical cylinder hung in the sky at only 10 meters altitude in Bouillancourt-la-Bataille, Somme, France. It had two antennae. (Source: Lumieres dans la Nuit, March 1976).
750704	Parsippany	NJ	2						12:05 a.m. A college student and friend were on their way home when they observed a huge oval-shaped object approxiamtely 60 to 80 feet in diameter at about 75 feet in altitude. (Reference: UFO INVESTIGATOR, September 1975, pages 1-2
750822	St. Omer, Pas-de-Calais	France	2						11:30 p.m. Two young men were making a bulk newspaper delivery between Boulogne and Lille by motorbike when they were followed briefly by an unknown "vehicle" in the vicinity of St. Omer, Pas-de-Calais, France. A short distance further they saw a light in a field a few hundred meters from the road. (Source: David F. Webb & Ted Bloecher, HUMCAT: Catalogue of Humanoid Reports, case 1975-40, citing Joel Mesnard & Jean Marie Bigorne).
750829	Muret, Haute-Garonne	France	2						Gray, disc-shaped UFO, bright illumination, darted above car, hovered, cast pulsating light beam down on it. Physiological effects (NICAP UFO Evidence II, Section VI).
750902	Chesterland	OH	2						12:30 a.m. A silent, dark disc-shaped object was seen pulsating on the roadside of a highway. It then hovered at treetop level, and shot straight up very quickly. (Source: FSR, April 1976, p. 25, citing CUFOS).
750914	Geyser	MT	2						2:30 a.m. Round 30' UFO with two vivid green lights (NIDS)
751018	Helena (25 miles NW of)	MT	2						12:30 a.m. John Struble was driving his truck when he noticed a large object, fifty feet in diameter and twenty-five to thirty feet in the air. The object passed over his truck from the rear and then stopped and hovered about one hundred yards ahead of him. (Reference: Lawrence Fawcett and Barry J. Greenwood, Clear Intent, page 33)
751019	Hailey	ID	2						11:00 p.m. Two men walking just west of town noticed a red light approaching their position at high speed. It stopped over them, and was described as an almond shaped craft pointed at the ends. It then turned bluish in color and began to hover. (HC addition # 744, CUFOS Reports,Type: A)
751028	Sudbury, Ontario	CAN	2						12:15 a.m. EST. One cup and saucer hat shaped object, very bright, low about 500 feet, was observed over the slag pit Murray Mine, Sudbury. (National Research Council of Canada Record Group 77, Vol. 308, reel number 1742)
751028	Loring AFB	ME	2						7:45 - 8:20 p.m. While patrolling the weapons storage area, Staff Sgt. Lewis, along with Sgt. Clifton W. Blakeslee and Sgt. William J. Long, again spotted the lights of an unidentified aircraft approaching Loring AFB from the north at an altitude of about 3,000 feet.
751029	Loring AFB	ME	2						1:00 a.m. EST. Actual transcript: One unidentified helicopter was sighted 300 to 500 meters from the weapons storage area at Loring AFB, Maine. The helicopter was at an altitude of 150 feet and penetrated Loring AFB. (SOURCE: 42 BW CP LORING AFB 291140Z OCT 75; SAC CP OPS CONTROL 291954Z OCT 75. (Actual document below. See page 1 & 2)
751030	Wurtsmith AFB	MI	2	C	5		**NC**		Shiny Disc Hovers Over Restricted Area (Cat 2,9,10,11)

751101	Monarch	MT	2						Time not given. UFO hovered 75' away, one foot off ground. (NIDS UFO 92)
751104	Lussault-sur-Loire (near)	France	2						At 6:50 p.m. a red disc-shaped object flanked by two nocturnal lights stopped in place, then descended slowly into some woods near Lussault-sur-Loire, France. (Source: Lumieres dans la Nuit, February 1977).
751105	Redwater, Alberta (north of)	CAN	2	C	5				40' Object Causes Van to Hit Ditch
751105	Raynesford (near)	MT	2						4:10 a.m. At least six UFOs near ground. (NIDS UFO 14)
751105	Bowden, Alberta (10 mi south of)	CAN	2						9:50 p.m. (Approximate) Mr. Wayne Morrow, observed an unidentified object flying 10 miles south of Bowden, Alberta. Mr. Morrow was proceeding northbound on NBR 2 Highway at the time of the sighting. The object was approximately 50 feet above the ground traveling in a southerly direction at 100 mph. The object was sighted for approximately 5 to 10 seconds. (National Research Council of Canada Record Group 77, Vol. 308, reel number 1742 N75/149)
751106	Merxheim	France	2						10:00 p.m. A domed disc landed on three legs. The dome on the craft opened, and the head and shoulders of an occupant was seen partially emerging from it. The dome closed and the UFO rose up into the air, then took off toward the east-southeast (Source: Larry Hatch, U computer database, case #11518).
751115	Marseille	France	2						A disc-shaped UFO rose from the sea near a large radio antenna in Marseille, France. It circled, then made a 90 degree turn to the south and flew out to sea.
751119	Oak Brook	IL	2						On this night in 1975 in Oak Brook, Illinois, a boy saw a domed disc hovering near his home. The UFO had a red light on top and two clear lights on the side. (Source: CUFOS News Bulletin, February 1976, p. 13).
751120	Camilla	GA	2						The police chief of Camilla, Georgia reported that a big, round UFO hovered just 80 meters above his police station at two a.m. It had bright lights on the top and bottom. It flew away slowly to the southeast and was in view for three minutes. (Source: Michael Hitt, Georgia UFO Phenomenon 1947-1987, p. 73).
751125	Goodridge	MN	2						On this night in a field nine miles west of Goodridge, Minnesota, a disc-shaped object eight feet in diameter was seen in a field. It rose off the ground, then relanded. The witness's car stalled, and later required major tune-up repair work. (Source: Mark Rodeghier, UFO Reports Involving Vehicle Interference, p. 66).
751208	Simms (area)	MT	2						6:00 a.m. UFO landed on ground, like bean. (NIDS UFO 33)
751209	Missoula (Coming from)	MT	2						8:43 p.m. UFO, tan or orange, 500'. (NIDS UFO 28)
751211	Great Falls	MT	2						7:00 p.m. Great Falls International Airport. UFO sighted, oblong object 10' above ground. (NIDS UFO 44)
751215	La Neuvelot	France	2						11:00 p.m. On a farm, a five-meter in diameter disc landed in a field. It rose up fast and shot away toward the west-southwest. At the same time there were several unexplained nocturnal lights in the sky.
751219	Roy (to Fergus)	MT	2						11:30 p.m. SAC men witnessed UFO on ground. (NIDS UFO 43)
751223	Great Falls	MT	2						6:00 a.m. Great Falls International Airport. Egg-shaped UFO on ground. (NIDS UFO 46)

751224	Bar-sur-Aube	France	2						8:00 p.m. (+) A huge disc covered the entire N19 highway. It vanished at 8:10 p.m. when a car approached. (Source: Lumieres dans la Nuit, May 1976).
760106	Stanford	KY	2						Domed disc with body lights descended, illuminated car interior with blue light; missing time, abduction, physiological effects (Ref. 1, Section XIII).
760110	Belt (NE of)	MT	2						11:00 p.m. Two pulsating red lights at 500' (UFO 48 NIDS)
760117	Augusta (15 miles W. of)	MT	2						5:30 p.m. 70' altitude, light bulb shape (UFO 55 NIDS)
760117	Great Falls	MT	2						5:40 p.m. UFO. NORAD did not confirm. (UFO 54 NIDS)
760119	Heislerville	NJ	2						About 7:30 p.m. Witnesses saw an object with two bright lights hovering over woods about 300 yards away. After about 2 minutes the object sped away, passing directly overhead making a low whirring noise. (The Press, Atlantic City, NJ, Jan. 21, 1976.)
760121	Cannon AFB	NM	2						Sometime before 3:55 a.m. MST. NMCC Memo: The following information was received from the Air Force Operations center at 0555 EST: "Two UFOs are reported near the flight line at Cannon AFB, New Mexico. (Actual FOIA document)
760121	Fairfield	MT	2						9:00 p.m. 300' craft on ground with others. (UFO 52 NIDS)
760125	Gillette	WY	2						8:09 p.m. A Sheriff's deputy was driving with his family when an object started coming toward the car. The deputy immediately stopped the car and turned off the headlights. The object appeared to be the size of a semi-truck and had rotating lights of many different colors. (Reference: UFO INVESTIGATOR, May 1976, page 1)
760127	Key West	FL	2						4:25 a.m. Mrs. Rosemary Heitmeyer was still awake looked out her hall window and observed three objects that looked like upside down soup bowls with domed tops. The objects were bobbing and moving very slowly. (Reference: UFO INVESTIGATOR, April 1976, page 3)
760205	Fort Shaw	MT	2						9:48 p.m. UFO landed near ranch house, 300' long. (UFO 57 NIDS) A report of a UFO landing came in from the Simms area February 5, 1976, and for the first time in their long and frustrating investigation, officers arrived on the scene in time to see the object for themselves. But they were thwarted in their attempts to get a closer look. (Reference: MYSTERY STALKS THE PRAIRIE by Roberta Donovan and Keith Wolverton, pages 48-49)
760207	Farmersville	IN	2						5:15 a.m. The rniddle-aged couple lived in a mobile home. The whole area was lit up "like a dusk to dawn light that wasn't supposed to be there." He was at the back of the trailer looking south at the object, which was less than 200' off the ground and 500-600 yards distant at first. (Ridge files, UFO Filter Center)
760208	Kissimmee	FL	2						At 10:30 p.m. a silvery white disc-shaped object flew over at less than 300 meters altitude, making a whistling noise. (Source: NICAP UFO Investigator, May 1976).
760210	High Spring	FL	2						11:00 p.m. A woman living near Lake City called the sheriff's office to report a "flying saucer." Sheriff deputies were dispatched to investigate and reported seeing a UFO hovering about 500 to 600 feet in the air. (Reference: UFO INVESTIGATOR, July 1976, page 1)

760214	Fort Benton	MT	2						7:20 p.m. Black Horse Lake. UFO, 500' high, landed near lake. (UFO 59 NIDS)
760218	Okatchee (near)	AL	2						8:00 p.m. EST. Two women driving in a rural area reported that lights high in the sky paced their car for 13-14 miles from Chatchee to Lincoln, Alabama. Near Okatchee, The two objects that had paced the car were egg-shaped and glowing with a fluorescent light. (Sources: CUFOS investigation file, report dated May 17, 1976; Mark Rodeghier, UFO Reports Involving Vehicle Interference, case 392, citing CUFOS).
760224	Stratham	NH	2						9:27 p.m. A six meter in diameter domed disc hovered over a road. There were four legs on the bottom of the craft, and it was silent. (Source: Raymond E. Fowler, Skylook, May 1976, p. 3).
760225	Kettering	Tasmania	2						1:00 a.m. A glowing, domed object landed on the beach at 1:00 a.m., making a humming noise. Beings were seen through the windows in the craft. The domed disc made a louder noise as it took off, and flew away toward the east.
760302	Theville	France	2						8:10 p.m. A silver box, about five meters in diameter, flew low over the trees in Theville, France. Two men, Messrs. Leveziel and Mahaut witnessed the UFO, which was described as having 30 round holes on each side. It flew off toward the northwest. (Source: Francis Leblond, Phenomenes Spatiaux, September 1976, p. 12, citing Lumieres dans la Nuit, issue 163).
760325	Belt	MT	2						11:40 p.m. UFO descended over vehicle, 50' diameter. (UFO 77 NIDS)
760328	Villa park	IL	2						No details on this close encounter (C1) (CUFOS)
760404	Huntington	IN	2						C1. Close Encounter listed but no details, one witness. (EGBA,673)
760407	Kontich	Belgium	2						11:40 p.m. A couple driving their car saw a dirigible-shaped UFO cross the road at a fairly low altitude. It had red and white spotlights around its perimeter. (Sources: J. Delaire, UFO Register, Volume 7 (1976), p. 31; Larry Hatch, U computer database, case 11691).
760426	Fayetteville	TN	2						C1. No details. (EGBA,493)
760603	Troy	MI	2						9:55 p.m. Two people saw a disc-shaped object the color of silver or chrome moving nearby in the sky. They followed it in their car for some time as it changed directions and moved erratically about. (Source: Mark Rodeghier, UFO Reports Involving Vehicle Interference, case 398, citing personal investigation).
760605	Merced	CA	2						11:30 p.m. A glowing cigar-shaped object hovered at a 40-degree angle over highway 140. It appeared to have windows. It then made erratic maneuvers in the sky. (Source: NICAP UFO Investigator, July 1976).
760607	Cincinnati	OH	2						C2, one witness. (CUFOS, 9/76)
76June/July	Liberty	IN	2						7:20 a.m. Father driving girl student to school. Object sitting in sky somewhere beyond train that was passing. Grey-silver metallic bar bell shaped object with a few black places she thought were windows. In bar between the two balls was open space. (Worley files)
760704	Bilbao	Spain	2						12:45 p.m. A huge disc-shaped object hovered for a long time over Bilbao, Spain. It flew back over the city and surrounding area several times, then made a ninety-degree turn and flew off toward the south. (Source: Larry Hatch, U computer database, case 11764).

760716	Tokyo	Japan	2						About 6:30 p.m. Seven staff members of the National Police Agency criminal investigation section saw an unidentified object that circled over the Imperial Palace, about 400 yards from the police building. The object circled at a low altitude for about 10 minutes, then flew out of sight. (Agence France-Presse story, Washington Post, July 18, 1976.)
760718	Gravel Switch	KY	2						C2, no details. Witness: Gilpin (SRUFOS,242)
760722	Germantown	WI	2						10:50 p.m. A hexagonal object with a flat bottom hovered over the highway. No color was noted, but it had 4-5 lights in front, with a green light on one end and a red on the other. It hovered for five minutes, and had a red flame coming from the bottom the entire time. (Source: CUFOS News Bulletin, September 1976, p. 6).
760728	Winsted (near)	CT	2						3:45 p.m. Fourteen boys and their camp counselor Mr. Leifer, from Camp Delaware, were hiking in the afternoon on Blueberry Mountain, three miles southwest of Winsted, Connecticut. The group was astonished to see a shiny, metallic domed disc hovering over their heads. (Source: International UFO Reporter, November 1976, p. 6).
760810	Vancouver, BC	CAN	2						A number of objects were observed at Penticton Tower. The objects had steady flashing green and red lights and were seen by civilians and members of the Royal Canadian Mounted Police. (Reference: Fawcett and Greenwood, Clear Intent, page 47)
760815	Connersville	IN	2						10:55 p.m. Object (repeat appearance three days later with artifact.), vacuum cleaner sound, 2.5 mins. Site of events was creek bed off Harrisburg road. Wife of rural family out in backyard notices wide band of white light in creek bed under trees. (Worley files)
760818	Central	FL	2						8:30 p.m. A family of four was traveling about 30 miles outside of Orlando, Florida. Suddenly they noticed a saucer-shaped craft appear at a very close altitude of approximately 1000 yards over their auto. (Reference: UFO INVESTIGATOR,
760818	Fayette County	IN	2						11:15 p.m. Object, no sound, 2.5 mins., five witnesses. Lady, out shaking rug on porch and sees glow in creek bed. Family watches as object again (See Aug. 15) rises from same place near creek and take the same route into the sky and away. (Worley files)
760910	Colusa	CA	2						Low-hovering disc with dome, rotating rim and bright lights, power failure. Object moved away, shone beams of light down (Ref. 1, Section I).
761023	Winchester	MA	2						About 7:15 p.m. A couple driving saw a row of very bright rotating lights rising above the trees, then stopping and hovering. They stopped the car to investigate, and saw that the lights were on a dark, elongated object. (Walter N. Webb investigation report.)
761024	Hobling	France	2						10:30 p.m. A man driving home with his young daughter encountered two globes of light hovering near the highway. When he passed, the object (apparently dumbbell-shaped) followed and confronted him. (Lumieres dans La Nuit No. 169, November 1977.)

761028	Evansville	IN	2						7:05 p.m. A close encounter case with six witnesses. Although a nocturnal sighting, the case has a high degree of strangeness, as can be deduced from the testimony of witness Lee Golden: "This is no hallucination. This thing came right over the top of the house (which was 50' from the witness), I'd say a hundred-150' over the top of the house. Duration: 15 minutes. Moved slowly at first, then seemed to stop, then moved quickly away and out of sig
761114	Kolsva and Aland Island	Sweden	2						Multiple sightings in the early evening, including a silver helmet-shaped (domed disc) object emitting yellow-red light from the underside hovering low above the treetops. (Bertil Soderquist, MUFON representative in Sweden.)
761205	Sollefted	Sweden	2						2:30 p.m. Several witnesses observed an elongated object (estimated 45 meters long) with round openings along the fuselage. A blue-green light shone from the openings, a red light at the front, and a diffuse orange glow from the underside. The object hovered above a military base built into the mountainside at an elevation of about 50 meters. (Bertil Soderquist, MUFON representative in Sweden.)
761218	Caribou County	ID	2						12:55 a.m. On Soda Springs Mountain Road, three police officers had a close encounter with a 30-foot diameter oval-shaped UFO. (Sources: J. Allen Hynek Center for UFO Studies case investigations file, December 1976; International UFO Reporter, February 1977, p. 6).
770101	Eyragues,Bouches-Rhone Department	France	2						10:00 PM. A luminous hemisphere-shaped object, about .65 meters in diameter, maneuvered and glowed among trees. Broken branches were found later in the area.
770121	St. Bernard Parish	LA	2						Boat brightly illuminated by round glowing object, abnormal silence, heat, boat held back as if by invisible force, light beam, time loss (NICAP UFOE II, Section VI).
770121	St. Bernard Parish	LA	2						8:45 PM. Two hunters spotted an extremely bright light which seemed to appear from nowhere. The light moved over them and just hovered. (Reference: UFO INVESTIGATOR, February 1977, page 4)
770202	Pineville	MO	2						CE-II, one witness (EGBA,577)
770202	Louisville	KY	2						Close encounter (CE-II) one witness. (EGBA, 510)
770203	Tasmania	AU	2						9:30 PM. Several children at a youth camp at Seven-Mile Beach observed a stationary, dome-shaped object hovering near the beach. The object then moved behind some trees, partially obscuring it. The object disappeared from view behind the trees. (Source: David F. Webb & Ted Bloecher, HUMCAT: Catalogue of Humanoid Reports, case 1977-68, citing Tasmanian UFO Investigation Centre).
770210	Tucson	AZ	2						7:30 PM. From a window in her house Ms. Lois Stovall saw a luminous object in the sky approach her house from the north. She and her grandmother, Mrs. Alice Buckner, went out to the yard for a better view and saw it hovering over a small tree less than 50 feet away. (Sources: David F. Webb & Ted Bloecher, HUMCAT: Catalogue of Humanoid Encounters, case 1977-8, citing Coral Lorenzen, APRO; Coral & Jim Lorenzen, APRO Bulletin).

770217	Pembrokeshire	Walws	2						During the day a teacher and two canteen workers at Broad Haven school watched a silvery yellow cigar-shaped object glide over a field emitting a loud humming sound. (Source: Albert S. Rosales, Humanoid Contact Database 1977, case # 1386, citing J. A. Brooks, Ghosts and Legends of Wales).
77Spring	Lumberton	OH	2						Alleged skirmish between U.S. military forces and a landed (or disabled) alien craft. (Case B-13 in Status Report II, Leonard Stringfield; SYMPAP, 1978,77)
770306	Sylmar	CA	2						1:05 AM. Mr. Kiese, a security guard, age 18, witnessed an orange, domed disc-shaped UFO descend into the field near his factory's security gate. The UFO either landed or hovered close to the ground for five minutes, but no noticeable landing traces were found at the site. (Source: Ann Druffel, MUFON UFO Journal, March 1978, p. 12).
770306	Evansville	IN	2						5:55 PM. Four witnesses, 5-mins. Two objects, three minutes apart. First one big enough to hold an 18-wheeler. (Ridge files)
770315	West Jacksonport	WI	2						8:30 PM. Mrs. Joan Le Clair and four other local people saw a UFO hovering over some nearby trees. Mrs. Le Clair looked through binoculars and could see an elongated object, green on top and bottom, with a red band around the center. "There appeared to be another compartment on the bottom of this disc, and I could see windows in this lower part. There appeared to be a figure inside the object." (Sources: Sturgeon Bay Advocate, March 17, 1977; David F. Webb & Ted Bloecher, HUMCAT: Catalogue of Humanoid Reports, case 1977-14 (A1715), citing Thomas Heiman).
770429	Oxford	OH	2						A car being driven by a 47-year-old woman and accompained by another female passenger was paced by a white glowing object for three minutes. The description of the shape differed, but one of the women described it as a disc-shaped object. The incident occurred near a Nike missile base. (Source: Allan Hendry, International UFO Reporter, June 1977, p. 3).
770505	Tabio, Cundinamarca province	Colombia	2						9:15 AM. A 22-year-old Cessna 150 pilot trainee, Sr. Lopez Ojeda, had a close encounter with a white object that looked like an inverted plate while flying over Tabio, Cundinamarca province, Colombia. (Sources: Richard H. Hall, Uninvited Guests, p. 291; MUFON UFO Journal, June 1977; Dominique Weinstein, Aircraft UFO Encounters, p. 50; CUFOS files, citing newspaper clipping dated May 6, 1977).
770506	Encinitas	CA	2						A large domed disc-shaped object descended into canyon. A school teacher and fifteen students witnessed the descent, and said that they could see figures inside the craft. It was seen again one hour later. (Source: Larry Hatch, U computer database, case 12693).

770507	Undersaker, Jamtland	Sweden	2						A powerful spotlight from a silent, delta-shaped object lit the forest in Undersaker on this night. A very large second object, also triangle shaped and with three large windows rose in the beam of light. Both objects hovered over the trees, then changed shape from triangular to rectangular. (Sources: Allan Hendry, International UFO Reporter, November 1977, p. 8; Richard F. Haines, Project Delta: A Study of Multiple UFO, p. 191; UNICAT database, case 195, citing Allan Hendry).
770509	Morristown	NJ	2						9:30 PM. Leslie Hendricks while walking out of the Livingston Shopping Mall observed a large glowing sphere high up in the southwestern sky. The sphere was about the size and color of a harvest moon. It appeared to be hovering at an altitude higher than that of an ordinary commercial aircraft. (Reference: UFO INVESTIGATOR, July 1977, page 1)
770511	Clearfield	PA	2						3:00 AM. A housewife reported sighting a green glowing ball with a dark equator hovering near her home. It shot straight up into the sky and was gone in less than a second. (Source: Allan Hendry, International UFO Reporter, June 1977, p. 8).
770511	Bonner Springs	KS	2						9:45 PM. A silent disc-shaped object with white windows hovered for 75 seconds, then flew away slowly. (Source: Allan Hendry, International UFO Reporter, June 1977, p. 36).
770520	Vienna	VA	2						9:45 PM. Doris Cuningham and her nine year old son were proceeding toward their apartment building when the child suddenly motioned for his mother to look over the pool. Hovering no more than twelve stories above the ground was a large circular shaped object. (Reference: UFO INVESTIGATOR, May 1977, page 4)
770523	Santiago	Chile	2						6:00 AM. 8A fiery looking torus-shaped object hovered and tilted over Santiago. A beam extended from the object, and swung back and forth like a pendulum. At ball of light was at the end of the beam. (Source: Lumieres dans la Nuit, January 1978).
770617	Austin	TX	2						2:00 AM. A 29-year-old man returned home in Austin and saw a light in the distance he thought was an airplane but heard no engine sound. The object, a yellow-orange disc, flew along the shoreline of the lake, passing in front of the witness at his lake front home, and flew from view into the distance. (Source: MUFON Investigation files, case #890709).
770621	Salford and Bury btn.	UK	2						On this day a 10 meter long silver cigar shaped object followed two people riding on a motorcycle between Salford and Bury. It replicated all of their turns and was completely silent. It finally flew off behind a house. (Source: FSR, August 1978, p 10).
770628	Abadan and Ahvaz btn.	Iran	2						On this night a man with a flat tire was stopped on the highway between Abadan and Ahvaz, Iran when he suddenly felt heat from a "huge, bright object" that was very close to him. (Source: Allan Hendry, International UFO Reporter, January 1981, p. 15).

770700	Connersville	IN	2						Evening. Three young boys, Todd being 12-years old, were playing on the-playground north of Maplewood School. But as the lights approached, not changing position, they couldn't see any stars between them. The other two boys fled, but Todd was entranced as this now massive triangle-shaped thing came in over the trees in the east and moved overhead at, what he thought, was about 150'. There was a low-toned hum as it moved at about 25-30 mph. (Worley files)
770701	Aviano	Italy	2						Luminous round object with dome hovered above a NATO base security zone, spinning; changed color, emitted sound like swarm of bees (NICAP UFOE II, NICAP UFOE II, Section II).
770704	Toppenish	WA	2						7:45 P.M. PST Four witnesses observed a disk-shaped object approximately 20-22 feet in diameter hovering overhead for around five minutes. Description: I saw people in a disk shaped object approximately 20- 22 feet around hovering over me for around 5 minutes with 6-7 people on board.
770706	Steynsburg	South Africa	2						5:50 PM. A spherical light--larger than the apparent size of Venus--moved, hovered for two minutes, and then shot away. (Source: Awareness, April 1979, p. 4).
770707	Zhang Po	China	2						Three thousand residents of Zhang Po saw two huge, orange-colored UFOs descend from the sky during the showing of an outdoor movie. Eyewitnesses heard a humming sound and felt heat emanating from the objects, which maneuvered just above the crowd. (Anthony Lee, FSR, March 1983, pg. 24).
770709	Flat Rock	MI	2						2:30 AM. A dull silver saucer-shaped UFO hovered off to the left side of a road. It was only about 200 feet above and the ground and 150 feet from the road. (Source: J. Allen Hynek Center for UFO Studies case files).
770715	Bellevue	KY	2						10:45 PM. Mrs. Fern Frey (name changed) was lying in bed with her 11-year-old daughter who was asleep. She cautiously peeked through the curtain and watched in bewilderment as the green light retreated, "just like a liquid being drawn up through a straw." In a matter of seconds the light was "siphoned" up into a low hovering object that was shaped like an inverted saucer a couple of hundred feet away. She guessed it was about 30' in diameter and was metallic. (MUJ-122,9)
770718	Palomares	Spain	2						A red, round object hovered over some olive trees in Palomares, Spain at 2:10 a.m. It directed a beam of light to the ground. (Source: Lumieres dans la Nuit, May 1978).
770721	Porter	TX	2						4:15 AM. Officer John W. Bruner, a deputy sheriff, was on duty and was the first person to observe the phenomenon. Officer Bruner and his partner Officer Coogler were parked west of the object which appeared to be approximately 1/2 to 1 mile away. Bruner and Coogler got out of their vehicle and tried to observe the object better by shinning their light on it. The object moved toward the men and the officers turned off the light because they became nervous at seeing the object's response to their light. (Reference: UFO INVESTIGATOR, October 1977, page 4)

770722	Croix-en-Plaine	France	2						An 18 meter in diameter domed, bowl-shaped disc hovered 50 meters over a house in Croix-en-Plaine, France at 10:30 p.m. Rays from the UFO converged on the roof of the house. (Source: Lumieres dans la Nuit, November 1979).
770731	Normal	IL	2						6:30 PM. University professor called wife and secretary to see a silver "stretched cigar" three times (apparent) diameter in length. Object flew in slow straight path from 30-degrees in SW to 30-degrees in NE and was lost in the trees. (IUR,2,9)
770828	Windermere, Cumbria	UK	2						12:10 AM An on duty police officer PC IAN MACKENZIE observed two very bright horizontal lights in the vicinity of Langdale Pike that moved towards him and grew brighter. He ruled out any type of aircraft. At the same time PS JOHN McMULLEN also spotted the UFO from his location whilst walking through Keswick with three other officers.
77Fall	Lewes, Sussex (near)	UK	2						5:20 PM. The policewoman noticed a curious, silent object, estimated to be as large as a four-inch plate held at arm's length, at no more than 300 feet altitude. (Good, Above Top Secret, 115 457)
770907	Havelock North (south of)	NZ	2						Five members of a family, traveling in a car south of the city of Havelock North, sighted a cigar-shaped, solid-appearing object moving parallel to the road
771000	Lima	OH	2						Evening. CE-1, three witnesses, saucer hovered, paced car. (CIQ,24)
771025	Asbygda Ringerike	Norway	2						5:30 PM. Three witnesses, including two deaf 14 year olds, Johny Myhr and Frank Sverre Mandt, sighted a disc-shaped object some ten meters in diameter that hovered and then descended behind some bushes. Tracks were later found in the newly plowed field.
77OctLate	Salisbury Plain, Wiltshire	UK	2						A uniformed officer observed a UFO at an altitude of only 500-700 feet above the Plain. He described it as being oblong with a rounded top and a flat bottom. The object was seen to travel at a very slow speed across the landscape. Source BUFORA Vol 6 No 6 March/April (Reference: THE 5TH ANNUAL PRUFOS POLICE REPORT 2006 by Detective Constable 1877 HESELTINE British Transport Police
771129	Waimata Valley, Gisborne	NZ	2						Hovering dome-shaped object sped toward witness, stopped, beamed blue light onto dead tree, which fluoresced in bright colors. Sheep fled (NICAP UFOE II, Section VI).
771116	Ellsworth AFB	SD	2						Ellsworth AFB Hoax
771200	Fort Mitchell	KY	2						1:10 AM. CE-1 (50-100' distant) with egg-shaped object, two witnesses. (MUJ-122,9)
771200	Danville	KY	2						CE-2, landing, two women reluctant to talk. (MUJ-122)
771200	Novy Georgy Island (near)	Russia	2						The crew of the fishing trawler Vasily Kiselev also observed something quite extraordinary. Rising vertically from under the water was a doughnut-shaped object. Its diameter was between 300 and 500 meters. It hovered at the altitude of four to five kilometers. The trawler's radar station was immediately rendered inoperative.
771207	Tatapouri	NZ	2						A red, disc-shaped object came over land from the direction of the sea. It followed a car with three people inside. The headlights on the car dimmed but did not go out during the sighting, which ended when the UFO veered off into the sky.

771213	Leitchville, Victoria	AU	2						An orange-red, disc-shaped object descended over a paddock. It then emitted three smaller objects that operated independently. One of these zigzagged, abruptly shot up to higher elevation, then descended again. The UFOs appeared to signal back and forth. Soil and grass samples collected from a circle of burnt grass found on the ground reveal the burn marks were caused by an electrical discharge.
771216	Uzes (just north of)	France	2						On a highway just north of Uzes witnesses on two separate motorbikes both had their bikes stall in the presence of a Saturn-shaped UFO with a red ring around it.
771216	La Aurora	Uruguay	2						There was a great flash in the northeastern sky, followed by a UFO gyrating downward as if out of control. Huge sparks fell to the ground, and the UFO descended as if going to land, but then suddenly rose up into the sky at tremendous speed.
771217	St-Nazaire, Loire-Atlantic department	France	2						A flaming disc-shaped UFO flew to the south and out to sea. The same or a similar object continued to hover offshore.
771221	Fort Mitchell	KY	2						A green glow was first seen by a married couple. This was followed by the sighting of a 12-foot-long ovoid UFO moving at a low altitude, at an estimated distance of only 75 feet. The UFO ascended slowly, then show away fast into the nearby woods.
771228	Norman	OK	2						Morning. A lenticular object flew over Reaves Park at a low altitude. It was silent and had three lights that blinked in sequence. It was estimated to be flying at only 100 meters altitude. If moved away to the south, away from a grassfire. (Source: Norman (Oklahoma) Transcript, March 1, 1978).
780106	Santo Antonio de Caparica, Estremadura	Portugal	2						Two men leaving a beachfront cafe saw a bright bluish light flying low over the ocean descend at a steep angle at high speed. The light then stopped, and descended more slowly into a wooded area next to a nearby campground. Both men ran into the woods, which were now illuminated by a bluish glow. Upon entering a clearing, they saw a 2.1 meter tall human-like figure, standing eight meters away from them.
780110	Grafton, New South Wales (near)	AU	2						A 25-year-old man observed two irregularly shaped bright yellow objects in the night sky while driving.One of the objects approached and appeared to slowly move down a mountainside. It seemed to periodically issue a "shower of sparks". This initial sighting lasted for about 20 minutes. The man then drove on but had difficulty recollecting the next part of his journey. Some 30 minutes later he observed a very bright object that looked like a "chicken coop" at a place called Bakers Creek Falls, near Armidale, New South Wales. The object was on the ground, stationary for 10 minutes, and then it moved.
780110	Chicago	IL	2						A 31-year-old paramedic was driving to pick up her husband (a policeman) from work when the 3-year-old son drew her attention to a "moving star" nearly overhead. At destination a few seconds later she noted a silver disc-shaped object which reversed direction, moved forward again and moved off behind building to which she was parked.

780127	Fordsham, Cheshire County	UK	2						Four men were out in a field by the River Weaver when they sighted a silvery balloon-like object float down along the course of the river and land on the bank. It emitted a strong purplish glow that made it hard to look at. Two figures of normal height emerged. They wore silvery suits and had miner's lamps on their heads, and these glowed purple. Cows on a nearby field seemed to become paralyzed and unable to move. Using a metal cage, the UFOnauts penned in one cow and seemed to measure it.
780131	Pawleena	Tasmania	2						A round object with two brilliant lights in its center approached a farmhouse and circled the paddock at low altitude.
780201	Gainsborough, Lincolnshire	UK	2						The witness saw a large silvery disc-shaped object shoot overhead and land behind some nearby trees. Two figures about six feet tall were next seen standing next to the landed UFO.
780209	Saline	MI	2						Residents saw a boomerang or triangular object hovering near their homes.
780223	Sesto Fiorentino, Toscana	Italy	2						Mr. & Mrs. Morello were sitting in their car listening to their car's stereo when they began getting heavy interference on the radio. Mr. Morello got out of the car to investigate and found himself engulfed in a warm, violet cloud of light. He saw four humanoid "shapes" and other lights around him.
780329	Indianapolis	IN	2						9:30 PM. Truckers engulfed by "UFO" light.(MUJ-126,3)
780330	Albury, New South Wales	AU	2						A chrome colored cigar-shaped object hovered over a nearby hillside, casting a shadow on the ground. A second stingray shaped object swept through the sky in a slow arc and came to a position beside the larger object.
780402	Strinestown	PA	2						Round object with body lights hovered ahead of car, made pulsating sound; tilted down, beamed a bright light from the top onto car (section XII).
780407	Evansville	IN	2						Three boys saw two lights. Then they could see four lights; two in front and two in the back. Then a blue light appeared between the two lights in the rear, and flashed about 7 or 8 times. Each flash was accompanied by a beep, then the blue light stayed on. The object was about as big as a jet and approximately 200-300' high and about 70 yards from the witnesses.
780502	Escazu	Costa Rica	2						A 10 year-old boy was out playing, saw a cat and ran to a field when he suddenly noticed a hovering silvery disc-shaped object that was about 15 meters in diameter, and it was hovering at about 200 meters above the ground with a slight wobbling motion. He watched as a mist-like vapor assumed the shape of a human-like figure that remained suspended above the ground. The figure was about 170 meters tall. The cat also apparently observed the spectacle, since the animal's fur stood on end and it quickly scurried from the scene

780510	Pelotas, Rio Grande do Sul	Brazil	2						The witness was walking home alone when he observed a very bright object in the sky that began to descend at a high speed. The object came low over a nearby fenced field, and he could now see that it was a shiny circular metallic craft within a fiery ball of flames. The area around the witness seemed to darken, and he felt compelled to walk towards the fence. He was quickly grabbed by two short humanoids who wore shiny white tight fitting suits.
780517	Emilcin	Poland	2						A woman cooking heard a sound like thunder which seemed to be coming from the ground. A short time later her son Adas came inside to tell her that he had seen a box-shaped aircraft, like "a little house," fly low over their barn.
780604	Bellaria	Italy	2						Motorists observed flashing lights in the woods, stopped to investigate and saw a bright red, revolving hemispherical object about 10 meters above the ground. It was approximately 10-12 meters in diameter. Next morning physical traces including a deep imprint were found at the site and separate witnesses were located.
780610	New Paltz	NY	2						A dark, silent wedge-shaped object with a square formation of white lights in the back and a triangular formation of red and white lights in the front paced the car of two students, ages 21 and 19, as they drove eastbound on Route 299.
780614	Williamson	WV	2						A 60-foot diameter disc directed beams of light at two boys. The boys found they were paralyzed and couldn't move. They reported an episode of missing time.
780625	Medway	MA	2						At an evening baseball game a silvery-gray domed disc came down low over the field and hovered, bobbed, wobbled, and moved behind some trees. It re-emerged, wobbled and hovered again for about a minute. Its distance was about 200-300 feet from the by-standers.
780626	Ayacucho	Argentina	2						A UFO landed for several minutes on the patio of a residence in Ayacucho, Argentina. Mr. and Mrs. Belloq--the couple who lived there--awoke to a humming noise, looked out and saw that only a few meters over the treetops was the flying disc.
780704	Mt. Etna, Sicily	Italy	2						Saucer-shaped object 40' in diameter, transparent dome on top. Brightly-lighted, red in color. Two tall human-like beings. Long golden hair, wearing white robes. Three or four smaller beings with space suits and helmets.
780704	Schaumburg	IL	2						34-year old school principal watched a distinctly outlined metallic sphere the size of airplane rush in from the East (Chicago) at speed faster than a/c exceptionally high. Object stopped dead over his house and remained stationary for 2-3 minutes.
780708	Lempdes, Puy-de-Dome	France	2						A motorist saw a sharp white gleam of light some 300 meters ahead on the road. As he came to the curve, he saw that the gleam came from a mass approximately 5 meters in height. He can not observe the base of the object, which is below the side of the road. The top was rounded in the form of a dome, surmounted by a white light. As he drove by he saw through a transparent wall in the UFO numerous human like figures wearing helmets and tight-fitting suits. Ground traces were found at the site.

780711	Can Cifre, Ibiza	Spain	2						Two young boys were playing in a tree and heard a loud noise coming from the nearby woods. They were confronted by a strange robot-like being. As they ran to town they were chased by a bright blue light most of the way. Strange tracks were later found at the site of the encounter.
780716	Farningham	UK	2						A metallic gray cigar-shaped object descended over a highway, causing a car on the highway to stop. The witness reported that the car was then levitated inside a beam and brought up inside the craft through an opening.
780716	Iracauba	Brazil	2						On this night J. R. B. and his family observed a dome-shaped metallic object land in a field. A short humanoid with greenish skin and large oval-shaped eyes emerged briefly from the craft.
780717	Castanheira de Pera	Portugal	2						A one-meter diameter sphere was seen spinning 1.5 meters above the ground. At the site witnesses found scorched earth and burnt rocks.
780723	Lake Michigan	At Sea	2						Several Coast Guard stations observed cigar-shaped object with same pattern of body lights, moving at very high rate of speed (section II).
780727	Union	MO	2						Woman reported brilliantly lighted object buzzed her car, briefly lifted it off road (section VII).
780727-28	Union	MO	2						Rash of UFO sightings reported to police over two days, probably including Delta Aquarid meteors (section VIII).
780801	Clarksville	TN	2						A woman had been taking a nap when she woke up to see a large craft hovering outside the upstairs window, over a nearby wood shack. She fainted and then heard a voice telling her to open her eyes. When she did she was confronted by a tall creature resembling an insect, thin and white in color, wearing a dark outfit. It communicated with her by using telepathy.
780807	Peoria	IL	2						9:00 PM. Light with whirring noise paced car for several minutes. (IUR,3,9)
780810	General Belgrano, Santa Fe	Argentina	2						A mushroom-shaped object was sighted at close range over a military base in General Belgrano. The object was several meters in diameter, and had an array of flashing lights around its rim. It flew at a low altitude, and hovered for 10 minutes.
780826	Hyannis	MA	2						Two witnesses in a car on Cape Cod watched an oval-shaped craft hovering low over the US Route 6 road. Within the craft several figures could be seen moving about behind several rectangular windows.
780830	Union County	IN	2						Witness driving on State road 44 observed an orange egg shaped object. Light suddenly engulfed her car and she remembers nothing until she found herself driving about 5 miles down the road. At home troubled mentally and discovered two puncture wounds on her buttocks and small lumps in mid chest.
780831	San Juan and San Luis (btn)	Argentina	2						Two men, Srs. De Cesare and Martin, were driving in a truck on Highway 147 in Argentina when they were circled closely by a group of UFOs. Their truck's engine stopped and they got out, throwing themselves to the ground and hiding among the roadside vegetation.
78Fall	Waterford	OH	2						Two very bright but distant lights approached four witnesses, then moved toward them, hovering within 500-600 over some power lines. All natural sounds stopped at this point.

780901	Llanerchymedd, Anglesey, Wales	UK	2						several villagers including a man hunting rabbits watched a bright white light descend slowly behind a new housing estate. Other independent witnesses saw a large silvery sphere above a field, and watched the cows panic and neighborhood dogs start barking furiously. A woman and her young daughter looked out and saw three tall men in gray uniforms with caps or helmets attached to their suits walk across a field.
780902	San Michele	Italy	2						A man heard a hissing sound and saw a metallic-looking cigar-shaped object about 10 meters long rising from a maize field. An area about 3 x 7 meters was found in the field where plants were bent and dehydrated.
780906	Venado Tuerto	Argentina	2						Round object, 30' in diameter, 15' high, hemispherical dome on top. Several round windows. Multicolored lights. One giant humanoid, over 7' tall. Green hand, blue conical nails, long gloves, cylindrical helmet.
780915	Delano	TN	2						A woman stood at the south window and saw vaguely, object with lights in a long shape, red and pink as if on fire in SW sky. Angular size was somewhat less than moon's. No sound . Two "normal" men dressed in white suits could be seen about 100 yards from window, too dark for details They started for the house, but then stopped and turned back. The UFO came in fast at this point and came very close to ground then left very fast climbing to the West.
780915	Carpentersville	IL	2						A 26-year-old woman was awakened by a whirring sound and she went to her bedroom window to look outside. The noise stopped, but then she saw the figure of a six-foot tall man. He was dressed in a silvery suit. Several feet away from him she saw a small, silver, domed disc sitting on the edge of the grass. It was opaque and smooth and was the source of the whirring sound. The witness then screamed at her husband to wake up, and her dog started barking furiously. They both tried to phone the police but the phone was not working.
780925	Greenfield	IN	2						Three woman observed an object coming down from the sky into the field. Dog barked. UFO was oblong, very, very huge with a kind of greenish-gray color. It had three lights, one red and two white. No sound and it moved flying sideways behind the barn and then took off flying frontways. 140' imprint left in soybean field.
780928	Omaha	NE	2						Two twenty-year-old female steel company employees were driving in a residential area when they drove by a dark, cone-shaped UFO with three white rotating lights on the underside. The tape cassette in the VW car's tape player erased as the car drove close to the object, but other cassette tapes in a cardboard box on a car seat were undamaged.
781025	Tagliocozzo, Abruzzi	Italy	2						A 51-year-old farmer name Giovanni was searching for a stray cow in the hills near his home when he came to an open field and spotted a large light brown object shaped like a shoeshine box on the ground. Lighted windows surrounded the craft. He approached to within three feet and saw six to seven humanoid beings inside.

781030	Carmo Da Cachoeira, Minas Gerais	Brazil	2						Some men were traveling by Jeep on their way to a local farm when suddenly an unknown force halted the vehicle in its tracks, then pulled it backwards into the mud on the side of the road. The UFO flew over them at very low altitude and then descended to hover a few meters away from the witnesses. The light from the object was so bright that it temporarily blinded the three young people. The older man nearly fainted from fright. After awhile they began to hear what seemed to be human voices coming from the object, but the voices spoke in an unknown language. The terrified witnesses began screaming for help because they began to feel a bizarre effect: all three felt as if they were "floating."
781109	In oil fields	Kuwait	2						Technicians observed landing of disc-shaped object in oil field, E-M effects on oil pumps and communications (section IV).
781111	Bragg Creek, Alberta	Can	2						Late in the evening four witnesses traveling by car noticed a bright white light approaching their vehicle. As it got closer they could see that it was a huge object resembling a hovercraft. It had numerous lighted square windows. One witness was able to see several human-like figures standing behind the windows. At one point the witnesses became disoriented and there appears to have been some time loss.
781120	Rowlands Castle (near)	UK	2						A mushroom-shaped UFO, bigger than a double-decker bus, with a blue flashing light on top, hovered over a car near Rowlands Castle. It shot off, circled around, and hovered over the car again for an additional ten seconds.
781125	Atlantic Ocean	At Sea	2						While participating in a trans-Atlantic crossing during a yacht race, the skipper of the yacht "Salamandre" watched a very shiny white disc come down to right above the boat. The greenish-blue color surrounding the object was so brilliant that it was blinding.
781129	Richmond	KY	2						Three witnesses. A car had been chased down a rural road by a flashing UFO. At one time it shot a blue flame out of the front and the car stalled and the lights went out. After the car chase the object was seen to circle a house and surrounding fields at 100-300' off the ground.
781200	Rapatee	IL	2						Two teenage girls from London Mills reported a tubular aircraft approached their car as they drove on Illinois Rt.11 near Rapatee. It came within about 10 feet of their vehicle, circled them once, and left "toward the east at a fantastic speed, but there wasn't any noise at all."
781201	Giulianova	Italy	2						A small dark disc with a luminous underbody, estimated to be about 1.5 meters in diameter, flew slowly along the coast heading south in Giulianova, Italy. About four hours later, in Milan, Italy the entire electrical system of a car failed when a luminous, orange and green saucer-shaped UFO flew overhead.
781203	Leme	Brazil	2						A brightly lit globular shaped object was seen flying at a low altitude over Leme. Several moving figures could be seen moving inside through a large opening.
781206	Siberia (Amur region of)	Russia	2						In the isolated taiga in the Amur region of Siberia a metallic UFO shaped like a mushroom was found apparently having crashed. The body of a short dwarf-like humanoid was found inside, which was delivered for autopsy to the scientific research institute in Novosibirsk.

781208	Portegrandi	Italy	2						A seven-meter diameter domed disc hovered over a road in Portegrandi. It had four windows on its side and emitted rays of light.
781209	Reggio di Calabria, Sicily	Italy	2						Police watched a multi-colored object with intermittent flashing lights. When spotlighted the UFO seemed to enlarge, then emitted a beam down onto the police car.
781211	Navelli, Abruzzi	Italy	2						A taxi driving on a road near the town of Navelli was forced to brake when two luminous globes were blocking the road ahead. The engine of the vehicle then died. Two humanoids glided across the surface without touching the ground.
781211	Arembepe	Brazil	2						On this night a tall human-like figure with light colored skin, dark hair, and wearing a tight fitting silvery suit and boots was seen coming out of a metallic basin-shaped object about 12 meters in diameter that had landed in a field.
781212	Burghausen, Bavaria	Germany	2						Ms. Adele Holzer was in her car driving to work when she saw a hemispherical white disc. As the UFO hovered over some nearby trees, six beams of green light shot from it and she felt slightly paralyzed by one of them. Her watch had stopped at 08:01 a.m. and her car's ignition key, that she believed had been in her hand the entire time, was bent.
781212	Navelli (near)	Italy	2						Alfonso Marinelli was traveling when his engine suddenly quit. He then noted two bright lights approaching slowly in his direction. As the lights approached Marinelli was able to make out two short human-like figures. The figures wore silvery suits, resembling those of astronauts.
781213	Brindisi AFB	Italy	2						Two soldiers on guard duty at the AFB saw a UFO with pulsating lights maneuver and hover near them. As the object was leaving a strange being shot up from the ground skywards, quickly disappearing from sight.
781214	Brewer	ME	2						A man drove in a daze along a very desolate stretch of road. All of a sudden his car's motor went completely dead and he coasted to a stop. He turned to his right and slightly ahead of his car was a huge, long dark rectangular object, about 50 feet from the road. He also felt himself sink into a trance. He remained fully aware but could not move a muscle. He then heard a voice say: "Do not be afraid.
781214	Park Ridge	IL	2						Two 12-year-old girls in Park Ridge who were tobogganing in the city park saw a saucer-shaped object with a row of flashing red lights on the top and bottom and flashing yellow lights in between.
781214	London Mills	IL	2						On Highway 116 a tubular-shaped craft hovered and circled a car being driven by two teenage girls. The craft circled the car "close enough to have touched it."
781214	Pomeroy	WA	2						A large UFO paced a car with three women inside. The object had two transparent blue lights and followed them to one of their homes.
781214	Sarandi del Yi	Uruguay	2						A UFO with bright red lights suddenly appeared and started to circle the car driven by Mr. La Bandera and his two passengers.

781215	Catania	Italy	2						Two young boys were playing in a yard on the island of Sicily, near a large TV antenna. The sky darkened and then a large disc-shaped craft approached and tilted at an angle, just above the TV antenna. A bright beam of light shot out of the opening and a strange, 1.5 meter tall monster descended within the beam. The being was described as "ugly" with two large eyes and two antenna-like protrusions on its head. A second similar being reportedly descended carrying a "laser" type gun and shot at a rock causing it to burn and explode
781216	Francavilla	Italy	2						A college coed saw an ovoid UFO surrounded by a white mist. It descended onto the surface of the sea and became a very bright flourescent white light that reflected off the surface of the water. She next noticed two short figures standing in the garden at the adjacent apartment. They were very thin with large squarish heads and large feet. Both were wearing dark gray tight-fitting uniforms.
781216	Abbington	IN	2						Dark object three times the size of a moon came over low above trees and hovered near auto causing its motor and radio to stop. As it hovered in front of the auto three red lights were seen and a large white light was on the rear.
781231	Posada	Italy	2						A 3-meter in diameter glowing sphere appeared over a marsh. It had dark triangular spots that moved back and forth on the surface of the object.
781231	Homestead	FL	2						Three men saw a silver disc hovering only one block away from one of their residences in Homestead.
790101	Denbigh	North Wales	2						A member of the public, Keith Jones was about to go into the restaurant where he worked near Denbigh when he observed a UFO at an altitude of 100-150 feet.
790103	Miami	FL	2						Mr. Filiberto Cardenas, age 45, was driving on Okeechobee Road just north of Miami, Florida with three family friends when the car engine suddenly failed. He and another man got out of the car to check under the hood when a large luminous object emitting a humming sound descended over the vehicle. The witness vanished in plain sight of the others, apparently taken up into the object by a beam of light.
790105	Bannalec, Finistere	France	2						A 15 meter in diameter circular object hovered near the ground at around 10 p.m. for three minutes. It had a blue halo, and shot away very fast. (Source: Lumieres dans la Nuit, February 1979).
790105	Sturbridge	MA	2						CE-II case with EM effects on car. (Raymond Fowler investigation report)
790108	Rome City	IN	2						Mr. Marion Ritchie and his wife viewed a UFO on County Road 138 for a continuous 5 minutes. Mr. Ritchie, a credible man in his community, viewed a cylinder-shaped object over an open field about 50' from the road with lights of white, red, and green.
790108	San Croce Sull'Arno	Italy	2						In the Tuscany region of Italy a 40-meter wide domed disc with an antenna flew over a farm at only ten meters above the ground. The farm animals were panicked and a tree bent over as the object passed. (Source: Maurizio Verga, ITACAT Italian UFO catalogue).

790108	Tunis	Tunisia	2						A group of people witnessed a small disc, about 1.5 meters in size, hovering near a lake for 10 minutes. It then shot away and was gone in a split second. (Sources: Lumieres dans la Nuit, February 1979)
790113	Viterbo	Italy	2						A farmer spotted a large fiery red sphere descend and land in a nearby pasture. The sphere changed color to a bright orange, then it began to dim revealing a two-meter wide metallic sphere. A small man wearing a silvery white suit emerged from the object and walked around the object, frequently bending down as if he was picking things up.
790118	Metzeral	France	2						A two-meter wide orange disc-shaped UFO made two passes over two witnesses. The UFO made a buzzing sound and had lights at both ends. Both witnesses' eyes hurt after the close encounter.
790118	Lusiana	Italy	2						A witness's car engine died when an ovoid UFO landed nearby. A door in the craft opened and two humanoids emerged. They reportedly had vibrating antennae-like ears or antennae on the sides of their heads
790124	Tyler	TX	2						Close-range sighting and humanoid encounter.
790124	Lindale (near)	TX	2						20-year-old John Scott Cates had stopped his car and gotten out to relieve himself when a blue beam of light from the sky struck him. It caused his hair to stand up like an electric static charge. Two UFOs appeared, and he experienced a six-hour long memory lapse. His next recollection was being back in his car, where he noticed that his engine restarted when a ringing noise sounded.
790124	Toquilla (near Tunja)	Colombia	2						A dentist and three students were traveling by car when their engine suddenly stalled. They then saw two metallic disc-shaped objects land on tripod landing gear nearby, and three men wearing tight fitting silvery outfits and large helmets exited from a hatch in one of the objects.
790128	Vannes	France	2						A 1.5-meter long ovoid hovered over a house in Vannes. A UFO witness to repeated UFO encounters experienced lasting physiological effects due to the close approach of 2 disc-shaped UFOs.
790129	Cornwall County	UK	2						In the early morning hours a married couple in Bissoe Truro, Cornwall County, England were awakened to find their bedroom lit up brightly. One of the witnesses looked out the window and was amazed to see a bright hovering oval-shaped craft. Inside could be seen two human-looking men with long wavy blond hair.
790208	Wiltshire (near)	UK	2						6:00 PM. An oval-shaped flying object approached a car driving between Broad Hinton and Clyffe Pypard in Wiltshire, England. It came to within 150 to 300 feet at its closest approach. It had a cluster of very bright strobe-like lights that lit up ground.
790226	Serodino, Santa Fe province	Argentina	2						Ernaldo Camusoni, age 49, was clearing an overgrown field at the entrance to a farm in Serodino late in the evening when everything became illuminated behind him, turning the darkness into day. When he turned around he saw an approaching object land 40 meters away from him. As he approached the object, he saw a strange luminous figure emerge from the rear of the craft. The whole encounter lasted five minutes. Ground traces were found the next day.

790302	Rivera	Uruguay	2						People watched an ovoid object dive at a truck and circle a radio tower. The encounter lasted for a few minutes; helmeted figures were reportedly seen onboard the craft.
790306	Westminster	SC	2						Dome-shaped object skimmed tree-tops, moved up and down, illuminated area. Similar object hovered over highway, swept area with light beam (section VI).
790407	Bigand	Argentina	2						Several cars experienced electrical system failures on highway 33 in Bigand, Argentina. Mr. Celotto, a farmer, saw an eight meter wide disc land, and circular ground traces were found later in a soybean field.
790419	Croy	UK	2						Two witnesses to a UFO in Croy ran from their car when the brightly lit object passed low overhead. They reported an abnormal silence, as they could no longer hear the car engine or the door slam when they fled
790427	St. Jacques de Nehou, Manche department	France	2						A four meter in diameter, intense reddish-orange colored sphere with "stiff waving arms" or appendages was seen over a farm
790516	Baependi, Minas Gerais State (near)	Brazil	2						Sr. dos Santos next saw an object descend towards the ground in a clearing. He approached to within 180 meters, and saw that the object was shaped like a "telephone booth" about 1 meter in height.
790516	Charleston	SC	2						A mechanic felt compelled to return to a spot where he had previously seen a UFO. A disc-shaped craft landed, and he was given a metal bar as a gift, along with the message that the occupants will return again.
790519	Bukit Mertajam	Malaysia	2						Six school children reported sighting a landed object and four tiny humanoid figures near it. The creatures were only about 4 inches tall. One of the students attempted to catch one of the creatures but was shot in the hand.
790525	Charleston	MO	2						A nocturnal light came down and landed behind a store in the town of Charleston, Missouri. A neon sign was effected and a clock in the vicinity was later found to be 18 minutes slow.
790525	Colusa	CA	2						1:10 AM. A silver colored, heel-shaped or bullet-shaped object hovered between fifty and five hundred feet above some trees near the Sacramento River for three minutes. It made a sound like an electric motor as it moved very slowly toward the two witnesses, Ruben and Carlos Genera. Many animals reacted to its presence.
790526	Colusa	CA	2						Two fishermen observed a hemispherical object with blinding white headlights and a row of body lights. It hovered in one spot for 2-3 minutes, then flew overhead emitting a humming sound like an electric generator.
790526	Kulim	Malaysia	2						A disc with three legs for landing gear hovered just a half a meter above the ground. The witness was temporarily blinded by beams of light from the object.
790612	Pine Ridge	SC	2						Members of a rock band practicing in a barn stepped outside to watch an ovoid shaped object hovering low over the containment building and smokestack of the Carolina Power & Light nuclear power plant one half mile away to their northeast.

790618	Mirassol, Sao Paolo State	Brazil	2						Sr. A. Ferreira was returning home from his job as a security guard when a metallic oval-shaped craft landed on three legs near his home. Three humanoids came out of the craft and paralyzed him with red beams of light, from boxes that they carried on their chests. These humanoid beings also carried boxes on their backs and had an insignia on their chests. He was floated onboard the craft alongside and once inside he believed he passed out.
790619	Rauma	Finland	2						A man and a woman saw a silvery object with a dome on top emitting a blue beam of light into a nearby forest. The woman went to investigate, and saw the object, which was about one meter in diameter, at close range. Inside the dome were two very small creatures with large eyes and frog-like skin. When she started to touch the object, she was temporarily blinded by a bright light and the craft sped away.
790622	Gorgona (offshore of)	Italy	2						The yacht Rainbow II was heading for Corsica,. On board was the owner of the boat, his wife and children and a crew of 11 people. About three miles ahead of the prow of the boat they saw a black cylindrical shape. This object was coming out from the surface of the sea like a tower and rose 30 meters into the air. Although the compass showed the yacht as headed in the right direction, the yacht instead drifted about 12 miles south and ended up in Bastia. Another strange occurrence was that the dog on board started barking and appeared scared and terrified.
790626	Wheeling	IL	2						A dog started barking when a six-foot diameter balloon-shaped object glowed and hovered over the yard of a home in Wheeling, Illinois. The object flew toward the southwest.
790713	Santa Clarita Valley	CA	2						Ed knew immediately that the object was not a helicopter or a plane-it was flatter and wider with lights around the outside of the main front area. He ran to the house, calling his family, but only his wife joined him. The object, some 75-100 feet in diameter, was now directly over their house and pool.
790721	West Plains	MO	2						Six witnesses to a close encounter with a capsule-shaped object for several minutes.
790725	Canoga Park	CA	2						A large white light made several passed at a car. One hour later a diffuse white ball of light maneuvered in the sky for 30 minutes over the Chatsworth Reservoir. At 3:15 a housewife and cocktail waitress was abducted while driving home from work by a UFO she thought was a plane crashing
7908xx	Merom	IN	2	C	5				Round Object Hovers Over Wheat Field
790802	Le Delus	France	2						One of the spheres shot towards the rear of their vehicle while the other descended close to the ground. A large rectangular shaped opening became visible in the second object and three humanoid figures were seen descending a ladder.
790804	Canoga Park	CA	2						Large, glowing disc with bubble-like dome on top, two humanoid beings visible through transparent dome (section XII).
790829	Ernestowo	Poland	2						Silvery cigar with orange light and square windows approached, hovered, and finally sped away over horizon (section IX)

790902	Petushka	Russia	2						witness was out picking mushrooms and saw a landed UFO which effected the ground
790903	Gateshead	UK	2						Following a series of low level sightings in Gateshead by the main witness and her family, the woman awoke in the middle of this night to see a small metallic disc-shaped object inside her bedroom.
790914	Canoga Park	CA	2						Disc with flamelike jets around perimeter hovered ahead of car, darted from point to point; took off at "very high speed" (section X).
790914	Oakenholt, Wales	UK	2						A beam of light shone through the witness's bedroom window and she suddenly felt dizzy. She then felt herself being levitated through some form of a tunnel and encountered two aliens in a field.
790919	Barrio La Gloria, Mendoza province	Arg	2						A man was surprised to see a circular gray metallic object on the ground near his house. A short human-like figure appeared next to the craft.
790921	Sztum	Poland	2						Two men working in garden saw landed UFO and entities
790923	Dexter	Ia	2						A silver cigar-shaped object approached a cattle lot two miles north of Dexter. It was only 150 feet above the ground, had no wings or windows, and made no sound.
790923	Nord	France	2						A near collision occurred on the D136 highway between an automobile and a six-meter wide disc on the highway.
790925	Talco	Chile	2						In a farming region of Talco a peasant out plowing the fields encountered a landed disc-shaped craft. A tall humanoid emerged from the object and briefly chased the peasant. The humanoid caught up with the farmer placing its hand on his shoulder.
790926	Monsey	NY	2						A witness in Monsey watched a saucer-shaped craft hover above some nearby power lines. The craft emitted a soft humming sound and was about 35 feet in diameter. Then he saw a shadowy figure.
791120	Laborie	France	2						A witness stopped his car at a certain spot. He then saw a diamond-shaped UFO hovering and maneuvering in front of him at a low altitude.
791202	Mt. Vernon	IN	2						Six witnesses observed a descending object for 15 minutes that went from a bright distant light in the NW to a pair of bright headlights to what appeared to be a huge jet aircraft with external lights, but with NO sound
791202	Mt. Vernon & Evansville (btn)	IN	2						Blimp-like object seen my motorists on Hwy. 62 between Mt. Vernon & Evansville.
791204	Vastervik	Sweden	2						A young woman was taking a walk when she suddenly became paralyzed and unable to move. Nearby, she could see a luminous object hovering close to the ground. Two five-foot tall thin humanoids appeared from behind the object.
791210	Grays Harbor	WA	2						A fireball or missile flew in over the Grays Harbor area from the sea, executed a 180-degree turn, and headed west. It crashed in a clear-cut forest near Elk River, on the south side of the bay.
791210	Caravac de la Cruz	Spain	2						A UFO with blue lights and a light green hue approached a family in their car at a low height. The driver stopped and signaled with his headlights. The UFO responded by flashing its lights.
791212	Romans	France	2						A multi-colored disc passed by fast a residential neighborhood in Romans, France at a low altitude, spinning as it went. It left behind a luminous trail.

791219	Lunel	France	2						A white, egg-shaped UFO¬one meter in diameter¬landed in an upright orientation in a yard.
791219	Gainesville	FL	2						A large bright disc chased a car down a road, hovered over a house, then shot away at a high rate of speed heading south.
8001or02	Evansville	Il	2						Woman walking dog sees blimp-like UFO overhead
800112	Huayana	Bolivia	2						a man saw a lenticular-shaped object over him. The UFO projected a beam of light and formed a dome shaped luminous form on the ground, not far from the witness. He was met there by a tall, blond-haired humanoid that had tanned skin and slanted eyes with a very prominent chin
800211	Botafuegos	Spain	2						A man spotted a low flying whitish-orange luminous object lifting off from some nearby woods. Minutes later the object divided into three separate luminous sections, then re-united again into one luminous spot. Near the ground two huge man-like silhouettes appeared in front of the lights.
800211	Rio Negro province	Arg	2						A man was driving home when he noticed a strong glowly light over a field 200 meters away, on the left side of his truck and at about 30 meters altitude. He blacked out and remembered entities.
800309	Newcastle	KY	2						Lady said barking dogs drew her attention to a strange very bright object hovering motionless 20' away from ground near back of house. Three antenna-like sticks at slight angle pointing to ground.
800313	Warwickshire	UK	2						A 31-year-old man saw a huge cigar-shaped object with red lights at both ends fly silently south to north over the A422 highway east of Alcester, Warwickshire, England. The man's steering wheel became unbearably hot during the flyover, and it caused burns on his hands.
800402	Pudasjarvi	Finland	2						Car drove into "fog," headlights deflected upwards, driver abducted onto silvery domed object with portholes, examined on metallic table (section XIII).
800406	Lodz	Poland	2						Three bright spheres hovered low over a house in Lodz, Poland spreading a blinding light.
800409	Bollwiller, Alsace	Germany	2						A woman driving through a forested area saw a bright light descending toward her car, first mistaking it for an aircraft landing light. The object then stopped and hovered ahead just off the road.
800410	Lincolnton	NC	2						Red disc-shaped object emitted light beam to ground; took off with intense humming sound leaving exhaust trail (section IX).
800420	San Mateo	CA	2						Five apparently metallic Saturn-shaped objects, high-speed flight in formation at low altitude, visible against local terrain (section IV).
800512	Bulawayo, Zimbabwe	Africa	2						A brilliant blue disc hovered at a low altitude for ten minutes over Bulawayo. It shot straight up, stopped, then shot up again and was gone.
800705	Lake Navsjon	Sweden	2						A large silent sphere dropped to the surface of Lake Navsjon north of Naveksvarn, Sweden. It changed colors while on the surface of the lake
800706	Lake Navsjon	Sweden	2						A large silent sphere dropped to the surface of Lake Navsjon north of Naveksvarn, Sweden. It changed colors while on the surface of the lake
800706	Bear River, Nova Scotia	CAN	2						A silent, fifteen-meter diameter round object hovered only 500 feet away. A dog hid in fear. A six-meter long indentation was discovered on the ground.

800716	Pecos	NM	2						A Civil Air Patrol cadet along with several other witnesses observed a dull metallic, circular object maneuvering near Pecos, New Mexico. The cadet got closer to the object after it landed in a nearby clearing and took some photographs. He then observed a human looking figure dressed in a metallic suit emerge from the object and walk a few feet away from it.
800718	Pine Bush	NY	2						Seven delta-shaped objects cavorted and landed at 10:15 p.m. in Pine Bush. Ellen Crystal approached them in her car, and they in turn took off and paced her car.
800803	Norton AFB, San Bernardino	CA	2						Three airmen and five civilians at separate locations sighted an object that looked like a "metallic balloon" with two flat sides, according to a base spokesman. It either landed or hovered just above a grassy area near a taxiway on the base.
800808	Pine Bush	NY	2						Author Ellen Crystal was out in an isolated field near Pine Bush by herself when she noticed a large lighted object descend among some nearby trees. With a flashlight caught sight of a four-foot tall thin humanoid with a large head and huge yellow cat-like eyes.
800911	Anderson	SC	2						Two friends saw a rounded, seamless disc-shaped UFO that made a whining noise. It hovered over trees in a yard 100 feet away from his bedroom window. It rotated and wobbled. Physiological effects included red burning eyes, swollen glands in neck, headache.
801005	Ta Kang (near)	China	2						On this night near Ta Kang, several sailors off the coast in a ship on the Yellow Sea, including a witness named Hung, saw a reddish cone-shaped object with an intense bluish-green electric-arc glow fly overhead. It was close enough that they were able to feel heat from the object.
801026	Greene County	IN	2						A lopsided triangle shaped UFO was observed by a husband and wife on their farm in a close encounter. The object can be described two full moons spaced about 12 feet apart with a flashing red light in back like a lopsided triangle. Their animals were effected while the UFO was over the barn.
801101	Monroe City	IN	2						Sheriff deputy involved in CE-III. Organization never provided any documentation or report.
801114	Heidelberg	Germany	2						Two students saw a flat cylindrical UFO hovering over an athletic field in Heidelberg. The object had powerful headlights with a pinkish glow, and smaller red and yellow lights. It approached the witnesses and stayed over them for 10 minutes.
801203	McLain	MS	2						On Highway 57 in McLain, Mississippi Mr. and Mrs. Lowrey had the FM radio of their car quit, the car's headlights dim, and the car heater quit when a luminous, blue-white ball of light came briefly over the right side of the car's hood.
801204	Foxboro	MA	2						A young man had a close encounter with a saucer-shaped object with a row of rectangular windows around the circumference, and was struck by a light beam on the chest and felt paralyzed. Perceived communication, apparent abduction, burn marks on chest corresponding to light beam position.

801215	London	UK	2						Over 40 people in the southeastern part of London, England saw a UFO hover, divide into pieces, re-group, dart a short distance, and then shoot straight up.
801229	Huffman	TX	2	C	5				Cash/Landrum Case
810128	Colle Maddalena	Italy	2						A disc was sighted maneuvering over some woods and landing behind some trees in Colle Maddalena, Italy. A burnt circle of grass and some charred tree branches were found at the landing site.
810200	Quindira	Brazil	2						2:00 AM. A woman was awakened by a loud engine type noise coming from outside, she ran out and watched a round object hovering nearby and emitting multi-colored beams of light. Three human like beings cold be clearly seen inside, one them glanced briefly at the witness then the object rose and disappeared. The next day two dead bloodless horses were found on the field where the object had hovered.
810203	Ross	Tasmania	2						A luminous ovoid object maneuvered at 30 meters altitude in Ross, Tasmania and paced a car. When the car approached a hotel, it shot straight up and out of sight.
810210	Auburn	WA	2						The witness had parked her car in her apartment parking lot when she saw a huge lighted object with a ring of flashing lights. The UFO left but a second smaller craft appeared and descended with a falling leaf motion. She later recalled abduction experiences.
810213	Fuentecen	Spain	2						The witness observed several golden lights on a nearby field. He approached the lights but these suddenly rose up, circled, and landed again, this time closer to his home. At the same time his dogs were going berserk. Later he heard footsteps and his dog attracted him to a "figure" standing by the fence. The figure was a meter and a half tall, square in shape and metallic almost robotic in nature; it lacked a head, arms or feet. A scorched area was found on the ground by government authorities.
810214	Greensburg	PA	2						1:45 AM. A 17-year old girl was baby-sitting when she spotted an object hovering at treetop level about 50 feet away. The object was silent and had three white lights forming the point of an equilateral triangle. Inside the craft two humanoid beings could be seen. These were described as having very large heads, oriental like eyes, gill like ears, and two holes instead of a nose. One appeared to be sitting and the other standing behind an instrument panel.
810215	Franklin	OH	2						2:00 AM. A brilliant white light that began filling her room awakened the witness. She got out of bed and through her window saw a bright hovering disc shaped object. Under hypnosis she recalled being taken onboard by several seven-foot tall humanoids with pointed chins and yellow cat like eyes
810218	Manzano Amargo, Neuquen Province	Arg	2						Jose Fermin Albornoz, an illiterate shephard, awoke at 4:00 a.m. to the sounds of his animals causing a commotion. Looking out from his hut he saw a "beautiful" blue light hovering over a field about 20 meters away. His animals were effected and he recalled an abduction experience.

810300	Birstall West Yorkshire	UK	2						Late night, Jane Murphy had gone to bed late when she suddenly woke up standing in a field feeling very cold and wet. She then noticed a huge metallic object hovering over the field, suddenly a group of figures, as many as 10 approached her. When she woke up she was on a bed in a strange room. Several figures were around her communicating via telepathy telling her to look at them. One of the entities was seven-foot tall, human looking with totally black eyes.
810300	Algeciras (near)	Spain	2						10:30 AM. A truck driver was delivering produce to a nearby village when he noticed strange lights on a nearby field behind a row of eucalyptus trees. As the witness entered the field he spotted a large metallic dome shaped craft on the ground about 50 yards away. The object seemed to be supported by three "telescopic" legs like protrusions. He then noticed several man-like figures sitting behind the windows, these were human like, wore helmets and brown uniforms.
810300	Memphis	TN	2						4:40 PM. 5-min duration, two witnesses. Responsible woman, secretary in an executive office, was out driving, which she said was most unusual for her. She had intended to stop for coffee when she sees three shining objects in the sky, and so engrossed in them drives right past the local Pancake House. Suddenly the objects disappear into "what looked like puffs of smoke." A minute later one reappears "directly over the street in front of me, so close that I could have counted the lights on the bottom of the object, had I not panicked."
810310	Skipton, North Yorkshire (near)	UK	2						At Carleton Moors, two uniformed police officers observed a large glowing oval shaped UFO as it moved over the moors. (Source: Yorkshire Post, The 5TH ANNUAL PRUFOS POLICE REPORT 2006 by Detective Constable 1877 HESELTINE British Transport Police).
810330	Magny	France	2						A metallic sphere descended from the sky at a 45º angle and stopped over a house in Magny, France. It then shot straight up and away. A check with authorities showed there were no scheduled balloon releases at that time.
810330	Alton	IL	2						Huge bright light went to very dim, had lights on the bottom as it hovered over trees for ten minutes. Object moved towards witnesses at about 10 mph. Frogs stopped croaking and dogs began barking excitedly
810401	Mount Vernon	OR	2						7:30 PM. The main witness and a friend were driving back home when they noticed three bright lights above the highway. As they approached the top of a hill another larger light appeared. The witness pulled off to the side of the road and then saw a huge lighted bowl shaped object. They both attempted to leave the area but they apparently went into a trance and lost consciousness. The next thing they remembered was sitting in their vehicle and noticing something moving quickly away from the car, moments later a flash of light shot up into the sky
810412	Goodhue	MN	2						Two-foot diameter aluminum-like disc hovered a few feet off road about 40 feet away; climbed rapidly through sky and disappeared in distance (section IV).

810415	Mount Sunapee	NH	2						A huge metallic triangular object with several red lights on the sides and very bright white light on the leading edge flew over Mount Sunapee, New Hampshire. It flew very low to the ground, and passed over a car flying off to the west.
810415-20	Catania, Sicily	Italy	2						12:20 AM. Two police officers in their car saw a strong reddish light descending from the sky. The engine and electrical components to their vehicle become inoperative as a saucer about 3 m in diameter and 1 m in height lands on the street about 50 meters away from their vehicle. A small door opened on the saucer and the witnesses see two human forms emerge; the figures began gesticulating and "jumping" around.
810500	Mennecy	France	2						3:00 AM. Traveling on a road, 3 women, 34-year old Sandra, Viviane and Marie France see a horizontal orange cigar-shaped object, hovering on the right side of the road. As they drove to the top of the hill the cigar vanishes. Soon a white sphere follows their vehicle. Later under hypnosis Sandra remembered seeing humanoids inside the object, described as of normal size, elongated eyes, thin bodies and wearing white coveralls from head to toes.
810501	Clark County	WA	2						A 26-year-old woman reported a large white glowing disc-shaped object just 150 feet from her home in Clark County, Washington. It made a humming sound and flew off to the south toward Oregon. The incident lasted slightly less than a minute.
810504	Minas Gerais state	Brazil	2						a bright disc landed on the ground in Belo Horizonte, Minas Gerais state, Brazil and then vanished. A witness felt pulled toward the spot. Burnt grass was found at the site.
810512	Clatskanie (near)	OR	2						A man and a woman, a truck driver and a cashier, were driving near Clatskanie, Oregon. A large delta-shaped UFO surrounded by a turbulent fog or mist "like smoke from a chimney" followed their truck for 15 miles.
810514	in space, from onboard the Soyuz T-4 spacecraft	Space	2						Cosmonauts Savinikh and Kovlenok observed a strange object from their space station. At first the object was 1/2 mile away but it eventually approached to a distance to 300 feet. Inside the cosmonauts saw three brown skin beings with slanted bright blue eyes straight noses and bushy eyebrows.
810516	Cocklebiddy (near)	AU	2						A couple named Winsome were driving in the desert when they noticed a red glowing dome low on the side of the road. It vanished as the car approached, but a glowing light flew off to the west.
810606	Little Rock	AK	2						Two teenagers in Little Rock saw a small, four-foot long rectangular UFO and a small disc cavorting over a backyard garage and shed. They came very close and the leaves on some trees were withered.
810613	Chia-Li	Taiwan	2						12:20 AM. A spinning transparent cone, 3 meters in length, touched down on the ground in Chia-Li, Taiwan. It expelled a mist, then took off and shot away to the north. (Source: Paul Dong and Wendelle Stevens, UFOs over Modern China, p. 272).

810711	Port Byron	IL	2						10:30 PM. 5-1/2 mins duration. Girl Scout supervisor at camp headquarters suddenly hears his dog barking in a warning manner. The witness moves to an unobstructed view of the pool and notices the pool lights are not on. Instead, directly above the pool, and higher than the regular lights, is a brilliant light. Suddenly the lights go out. He hears a whirring noise that rises in pitch as it apparently rises into the sky. When he turns on the lights he noticed the pump is not running and the water level is down three feet. (IUR-3,6)
810712	South Canterbury	NZ	2						Brightly lighted, dome-shaped object with windows approached, turned, followed car, bright illumination. Object finally shot away (section I).
810716	Atcham, Shropshire (near)	UK	2						2:00 AM. Three women were on their way back home on the A5 expressway when they all suddenly experienced a strange mood change, they all sat very quiet going into some type off limbo state. Then across an open field besides the road four white and two red lights appear. They seemed to be attached to a dark object. The object was round and began pacing the vehicle. At this point the vehicle seem to lose power and would not accelerate. There was an apparent time lapse noted when they reached their destination. Later under hypnosis one of the women recalled the car being floated up to the sky and entering the bottom of an object through two large double doors.
810731	Lieksa	Finland	2						Black sphere and satellite lights seen, two approached motorboat, one surrounded by "fog." Paralysis felt, missing time, physiological effects (Volume II, The UFO Evidence, Section VII).
810810	Apple Valley	MN	2						Russell Matson and another man were driving down a road in Apple Valley when they sighted a hexagonal object nearly overhead, at perhaps a distance of 500 feet. It had two green, two red, and white lights on its corners.
810816	Winnipeg, British Columbia (near)	CAN	2						Midnight, the witness was driving alone outside of Winnipeg when he saw a huge UFO gliding over the roadway. Dimly outlined from the glow inside the "windows" of the central mass were two or three figures, whose features were not discernible, but whose heads and shoulders indicated they were humanoid in shape.
810819	Franklin	OH	2						Daylight. The witness was driving along a highway when a brilliant silvery object descended over her vehicle and forced her to pull off the side of the road. She was then taken onboard by several seven-foot tall humanoids and examined.
810900	Dusheti, Georgia	Russia	2						In the evening the main witness was coming back from school when she saw a man pointing up to the sky. She looked up to see a ball shaped object about 3 meters in diameter slowly descending over them. The object stopped at about 5 meters above the pair. It was described as white in color with some visible figures on its surface.
810900	Meinau Island, Bodensee	Germany	2						Midnight the witness was vacationing in the area and had camped on the south side of the lake. While he slept that night a very loud noise awakened him, looking out of the tent he saw a bright sphere descending rapidly overhead. Through an open port he was briefly able to see a humanoid figure apparently wearing a green outfit.

810912	Trino Vercellese, Piemonte	Italy	2						A man saw a bright football-shaped light that appeared to descend into the thick woods. When he arrived he was overcome by a strange malaise, and soon saw a reddish orange yellow light floating about 100 meters away. Terrified, Cavallo felt himself being levitated up towards the light.
810918	Conejo Valley	CA	2						Triangular objects with body lights, humming sound, observed three times over freeway and valley area (section VI).
811008	Praglia	Italy	2						3:00 PM. Six boys were racing dirt bikes near a lake when one of them fell and hit his head. Two of the other boys went to assist him, when suddenly a bright green light was seen descending over the surface of the lake. Inside the light appeared to be a gray metallic oval shaped craft that descended on telescopic like legs near the witnesses. A door became visible on the craft and a tall human like figure then appeared, his arms seemed to be extended up into the air. It wore a loose fitting silvery outfit, its arms were very long, and its feet resembled oval appendages.
811109	Esengul, Karasu Region	Kazakhstan	2						A large boat shaped, green colored UFO with an open cab or hatch fell into Lake Zaysan. Four humanoid wearing the same color green coveralls were apparently inside. Apparently the craft and its occupants were damaged upon impact.
811121	Naveksvarn (west of)	Sweden	2						Mid-afternoon. An eight-meter wide red disc, giving off a weak blue glow, flew at treetop level west of Naveksvarn, Sweden towards the east. Photographs were taken. (Source: AFU Sweden).
811124	Marshall	TX	2						Domed disc hovered nearby, beamed light down onto truck. Driver fled, object followed and beamed light on truck a second time before departing (section VI).
81End	Fuenlabrada	Spain	2						The witness, Magdalena Sobrino, was out in her yard hanging clothing when she noticed a bright light approaching over the nearby Coca-Cola factory. The light became bigger as it approached her position. It came closer without emitting any noise until the witness was able to notice what appeared to be a transparent cabin-like section.
811215	San Luis Del Palmar	Arg	2						A 42-year old Ruben Meneses was driving a dump truck on a dirt road. Suddenly he observes a bright object that approaches the truck, the truck begins to vibrate, and he is filled with a tingling sensation all over the body. He was not able to move as the truck rises up in the air and apparently becomes transparent. Meneses apparently then passes out.
811217	Bladenboro	NC	2						Daniel Edwards was awakened by the furious barking of his dog towards a pine forest behind his house. He walked out of the house and was startled to see a huge fire like light, illuminating a mass clump of trees a few hundred yards away.
811219	Areal	Brazil	2						Silo-shaped object swooped over vehicle, blocked road ahead of car. (Volume II, The UFO Evidence, Section XII).
811229	Brooklyn	MI	2						Two boys playing in a snow fort behind their house heard a humming sound then saw a lighted disc shaped craft with red lights shining on its top and multicolored lights on the bottom fly overhead and disappear from sight. They saw a four-foot tall human like figure float over a nearby fence and come towards them.

820000	Voronezh (near)	Russia	2						10:00 PM+. Two local militia sergeants were driving a "UAZ-469" vehicle (Russian patrol jeep) in an area about 10-15 kilometers from the city when suddenly they saw a very bright beam of light shining down to earth from somewhere in the sky. The beam of light appeared to be scanning the surface of the ground, and every blade of grass appeared to be lit by it. Several seconds later a hatch opened on the hull of the craft and several tall (about 3-4 meters in height) humanoids exited the object and went to a nearby field. The men could only speak in stuttering voices. At first they were subjected to alcohol tests but it proved negative, both were then sent to a mental hospital.
820124	village of Ipoh in Perak	Malaysia	2						7:00 AM. Five early morning joggers watched a Saturn-shaped object with a revolving rim and sharp lights descend nearby them. (Source: Ahmad Jamaludin, FSR, December 1988, p. 22).
820131	Mechanicsville	VA	2						A general contractor and his wife observed a very large grayish cone-shaped object with rows of amber and blue body lights and two huge white light beams in front through their south-facing window. The object was issuing bright illumination about 400-500 feet from their home.
820208	Bakersfield	VT	2						A delta-shaped object followed a car home, then flew overhead. The witness ran inside his house to hide. The UFO made no sound.
820210	Willernie	MN	2						A UFO with an intense, lime green light hovered just six feet above the snow-covered ground in Willernie, Minnesota. Five spots of fire fell to the ground as the object rose, and melted holes in the snow.
820210	Escanaba	WI	2						On Highway C537 three seventeen-year-old young women were driving in a car near a river when they encountered a low flying domed disc.
820214	Santa Cruz das Palmeiras	Brazil	2						At night, two witnesses, Fernando Antonio Martins & Edson Maragon watched a luminous triangular shaped craft land on an open field. Three humanoids exited the object.
820215	New York City	NY	2						Barbara Warmoth was asleep when a brilliant light filled her bedroom. She looked out the window and spotted a luminous disc-shaped craft hovering nearby. That is the last she remembered for one hour and 15 minutes.
820219	Rio Negro Province	Arg	2						E-M effects on car, dome-shaped object overhead, driver blacked out, taken to hospital with memory loss, physiological effects (section VII).
820220	Rio Negro Province	Arg	2						41-year old Juan Fattorel was traveling in his truck along a secondary road when suddenly the engine cut out; He saw close UFO and aliens and his eyesight was effected.
820224	Fleetwood	PA	2						A bright round, lighted object flew over a car in Fleetwood, Pennsylvania. Its passage was accompanied by radio interference effects. (Source: Richard H. Hall, MUFON UFO Journal, February 1984, p. 14).
820225	Saltsburg	PA	2						A large disc with a dome on top flew over the witness's car and shone a beam of light onto the ground. The UFO came very near the ground and may have landed temporarily, then rose up and flew off over the witness's house and out of sight.

820522	Cleveland	TX	2						Diamond-shaped object with body lights, bright "headlights," flew overhead, seen clearly in police spotlight. Abnormal silence. (section V).
820300	Springfield	MO	2						The witness was traveling in her car when she suddenly lost control of the steering. She felt her vehicle being pulled by an unknown force towards a light that was hovering at tree top level straight ahead. Soon she found herself in a clearing in a wooded area. Nearby sat a silvery metallic disc resting on three legs.
820304	Hellifield	UK	2						A car on the A65 highway in Hellifield, England was surrounded by blue lights and levitated up into the air. The woman driver felt a strong sensation of cold, and experienced 30 minutes of missing time.
820315	San Dimas (near)	CA	2						A mother and her two children were driving on a busy highway when they spotted a rectangular glowing object with a cross in the center hovering over the area. As the car drew closer the mother heard a low humming sound and felt dizzy and had difficulty driving.
820318	Flatwoods	KY	2						Mr. J. Duty, an Army reservist, watched a domed disc-shaped UFO hover off to the left side of a highway in Flatwoods, Kentucky. The disc had red, green, blue, and white lights around its base, which blinked in rotation.
820321	Toledo	OH	2						On an overcast evening a UFO shaped like a vertical football with three tube-like appendages banked to the north across the Ohio Turnpike in Toledo, Ohio and next came in low over a residential area at 200 feet altitude.
820322	Slanesville	VA	2						The witness had gone outside to investigate a commotion among his dogs and cats and saw two lights descend from the sky and land. He approached with his car but the vehicle stalled. He approached on foot holding a flashlight and encountered a five-foot six-inch tall man dressed in a silvery coverall with a hood.
820325	Milton Keynes, Buckinghamshire	UK	2						Two uniformed officers, PS. Ian Victory and PC Anthony Underwood were driving a marked police vehicle when they observed a yellow lozenge shaped UFO in the sky. Stopping the vehicle they sat and watched it pass overhead.
