@FrancMilburn @The1Revolution If they emit RF comms for communication then there exists a system that can be used to detect the signal.

Construction of that system might be beyond our technical means. It is undecidable without knowledge.

Let's hope we get lucky and they are wasteful of energy.

Sonny White's results are preliminary and untested and not published in a peer-reviewed journal.

Einstein's field equations require lots of Stress-energy to produce that curvature and I do not see any indication in the write-up that White produced it. Let's wait.

surrounded the position taken by the immense multitude of people.

The Marshal took up a position on the left of the stand. Numerous flags and banners, suitably draped, were exhibited on the stand among the audience. The entire scene was one of grandeur due to the importance of the occasion. So quiet were the people that every word uttered by the orator of the day must have been heard by them all, notwithstanding the immensity of the concours.

Among the distinguished persons on the platform were the following: Governors Bradford, of Maryland; Curtin, of Pennsylvania; Morton, of Indiana; Seymour, of New-York; Parker, of New-Jersey, and Tod, of Ohio; Ex-Gov. Dennison, of Ohio: John Brough, Governor Elect, of Ohio; Charles Anderson, Lieutenant-Governor of Ohio; Major-Generals Schenck, Stahel, Doubleday, and Couch; Brigadier-General Gibbon; and Provost-Marshal-General Fry.

PRESIDENT LINCOLN'S ADDRESS.

The President then delivered the following dedicatory speech:

Fourscore and seven years ago our Fathers brought forth upon this Continent a new nation, conceived in liberty and dedicated to the proposition that all men are created equal. [Applause.] Now we are engaged in a great civil war, testing whether that nation, or any nation so conceived and so dedicated, can long endure. We are met on a great battle-field of that war. We are met to dedicate a portion of it as the final resting-place of those who here gave their lives that that nation might live. It is altogether fitting and proper that we should do this. But in a larger sense we cannot dedicate. We cannot consecrate, we cannot hallow this ground. The brave men, living and dead, who struggled here have consecrated it far above our power to add or detract. [Applause.] The world will little note nor long remember, what we say here, but it can never forget what they did here. [Applause.] It is for us, the living, rather to be dedicated here to the refinished work that they have thus so far nobly carried on. [Applause.] It is rather for us to be here dedicated to the great task remaining before us, that from these honored dead we take increased devotion to that cause for which they here gave the last full measure of devotion; that we here highly resolve that the dead shall not have died in vain; [applause] that the Nation shall under God have a new birth of freedom, and that Governments of the people, by the people and for the people, shall not perish from the earth. [Long continued applause.]

@The1Revolution Dune is action plus cerebral book. The movie is both but after he becomes a Fremen and Muad Dib it becomes both violent and highly spiritual. Paul causes a jihad that kills trillions and cannot stop it. If you don't like it, you arent a fan of Herbert's book. It doesnt glorify it

Let me quickly add, I first watched it the way it was intended. IMAX with thousands of watts of surround sound audio with the fantastic sound and music. That was a huge part of the effect. The HBOMAX+home theater is okay.

2021-11-14T12:11:45+00:00

https://twitter.com/_/status/1459856576622305280

Dune ultimately will gross at least two times its cost. Dune 2 has been given the green light and a rush job release date. They better start filming if they are to make it. It leaves HBOMAX in less than two weeks.

I loved it!

@SpacedOutRadio @DaveScottSOR @NicoleSakach @UapStudies @TomTulsa @OdysyRadio @KPNLRadio I am very sorry I could not make it. Two days of travel, packing my truck with stuff from my former home and the 50th HS reunion activities after driving four hours from my former home to where I grew up. I was worn out.

@Julesofthwood @Fortean777 @joaktree33 @makoteko1 I doubt it. He is too prominent and he is the winner. He just didn't follow the rules unless he had permission. He also asserted copyright. Bigelow give away copyright and give Mishlove"s work "fair use". I do not believe that controlling man would.

@BrianX0067 @Lynda_Katerra I find shed snake skins in my attic and I find and plug the entrance. The main work that needs doing is to encapsulate crawlspace under house, block the "air vents" so they don't enter and climb the wall to the attic.

@JeremyUnidenti1 There was no official AATIP while Harry Reid was involved. He made it up when he asked for a SAP for AAWSAP. AATIP was, until the end of Elizondo's career, informal. She walked a line she could defend. AATIP was later working group. People had other assigned duties. UAP -> USN.

@Go_Kick_Rocks88 2021 tax situation is known. It is what Trump and GOP congress gave us. The increase in pain implemented in the Trump GOP was always going to hammer those supporting Democrats. This was by design. Media sucked at reporting because Big MSM wanted the tax cuts that screw most.

@CKakadan @mjbanias And there is no known and tested interpretation for what quantum mechanics means. Quantum mechanics and quantum field theory allow us to make measurements and predict outcomes of these measurements. But not all observers agree on the outcome!! We don't actually have a clue.

Respectfully, I think that's conjecture. We don't know anyone broke a law or oath. There are some who claim this is true, but aren't revealing "sources." IMO that's unfair to put the gen public in such a position. At the center of this is Dr. Davis, who should explain himself.

It is certainly unfair that those closest to the issue, including Eric Davis, will not PUBLICLY confirm what has been quietly acknowledged.

Here is a video of Eric that may provide more insight into why he won't acknowledge it publicly (yet) and it does involve legality.

@AnnieJacobsen The original contracts with NRO for tests were out in 2020. Includes a company I founded @hawkeye360 which does radio geospatial intelligence. Before that NGA and NRO were using spatial imagery (light and not radar). Highly innovative companies are doing what dinosaurs cannot.

I must not fear. Fear is the mind-killer. Fear is the little-death that brings total obliteration. I will face my fear. I will permit it to pass over me and through me. And when it has gone past I will turn the inner eye to see its path. 1/2

Senora McGwier's art lessons

Editor's Notes

Jim Cox

The old house made a grand fire Friday, Aug. 26.

The old Church Pews office, originally the McGwier home, was burned by the Grove Hill Fire/Rescue Department at the request of owner George Jones. The house had deteriorated greatly in recent years.

I won't say personal memories went up in smoke because good memories can't be burned. I have fond memories of the house when Lois McGwier lived there.

The nearby Church Pews, Inc. was originally the McGwier Company, a church furniture manufacturing plant started by Vernon McGwier in the 1950s.

In the early 1970s I was one of a group lucky enough to be selected by Mrs. McGwier to attend art classes at her home once a week. She was an accomplished artist and a well-read and sophisticated lady.

Her "art lessons," and I put the phrase in quotes because it was art — drawing, painting in watercolors and oils— but so much more including history and current events, languages (French and Spanish), manners and more.

Our language lessons consisted mostly of words and phrases and I've forgotten most of it. She did insist that her students call her "Senora" McGwier instead of Mrs. McGwier, a nod to our Spanish lessons.

I wrote a column after her sudden death on June 14, 1981. I had started working at The Democrat earlier that year, hired by then newspaper owner Bob McGwier, her son.

I wrote then that Senora McGwier taught us more than just art and language. "She taught us to think for ourselves, to look at issues impartially and objectively without losing touch with dreams and ideals as we prepared to finish high school."

One of the ways she would do that would be to start a discussion on some topic and take the opposite side from what many of us thought. She may have not always believed the side she was advocating but did it for the sake of challenging us to think and to make us argue our case.

She had a beautiful home, filled with elegant antiques and a great library of books with a wide range of subjects.

Senora McGwier was an unusual person. I called her peculiar in that 1981 column but that wasn't the right word. I also said she was a Don Quixote character who spoke what she thought and didn't mind being accused of chasing windmills at times. I wrote then that I was glad she passed that trait along to the group. I still believe that.

She never charged us for those classes or for the cokes and cookies we enjoyed every week. She provided all our art supplies and would even frame some of our works when, in my case at least, the frame was far more valuable and prettier than what it surrounded.

Some of that group — and I know I'm leaving some out, forgive me —included (and these are all maiden names for the girls, that's who they were then and still are to me) included Neena Skipper, Vicki Edwards, Nancy Duff, Kyla Haskew, Lynn Carleton, Sherry McDonald, Janet Tompkins, Gina Wilson, Karen Bush, Leah Newton, Ken Stephens and others.

I wrote then (41 years ago!), *"In short, Senora McGwier treated us like adults at a time when most folks were still treating us like children. She taught us things and helped us in ways that I didn't realize until years after I left her 'art classes.'"*

I thought of all that I learned from Senora McGwier in those classes and the good times we had as I watched that old house go up in flames last week.

There is a fatal flaw in the plan to steal the "sphere data archive" transfer in Season 2 Episode

11 Star Trek Discovery, and there is no way to fix it given the claims about the time-traveling suit.

Sigh. They need better consultants.

@TOEwithCurt Curt I wish you peace, happiness, and 8 hours a night.

I cut down to two cups of coffee with breakfast (roast the beans myself) and water or home fermented beverages the rest of the day. Around 9 PM I drink a glass of red wine and the melatonin puts me right to sleep, all nite.

@JeremyUnidenti1 @MarkTurnerETC @4Eridani Respectfully. You may be able to tune the oscillators and set the RF paths internally to cover up to 6 GHz. And if you have the typical wideband antenna fed through the typical lossy coaxial cable the usable coverage is much less than that. I hope I am wrong.

@bhilburn It has settings and what I was after was cutting down spam over voice and sms by around 80% and it does better than that. It sends people to voice mail or allows sms unless it is isentified as a known spammer unless you crank up the settings. I do not do that.

The pulsing is a nonlinear operation. This will create modulation sidebands that arranged in harmonic fashion around the center frequency pointed out by Macdonald and not the frequency of the pulsing.

Eight years ago, with Chris DeMay and Robert McGwier I put together the plan for the first commercial space-based RF GEOINT company. A year later, after a series of twists and turns, HawkEye 360 was formed and John Serafini brought it to life. It's a huge honor to have one of the pathfinder satellites slated for the National Air and Space Museum, Smithsonian Institution.

@ThorntonVallery @DigitalDino4 @galaxopithecus @blackvaultcom @FBI I had a few dozen polygraphs. I learned who was good. They were older and experienced. The young people trying for a kill are a PITA. They are so bad that in self defense I learned how to mindfully count my breaths. Since then 15 minutes and out. They are a joke.

@DigitalDino4 @ThorntonVallery @galaxopithecus @blackvaultcom @FBI Statistics on polygraphs SUCK. Unreliable as hell. Maybe machine learning, add body language , and ML sensor fusion (convolutional and recursive NN based) would make a decent untruth detector but we do not have it now. 1 out of 3 false positive is :pile_of_poo:.

CAMBRIDGE UNIVERSITY PRESS

Interpretations of quantum field theory

Nick Huggett, Robert Weingard

Philosophy of Science 61 (3), 370-388, 1994

In this paper we critically review the various attempts that have been made to understand quantum field theory. We focus on Teller's (1990) harmonic oscillator interpretation, and Bohm et al.'s (1987) causal interpretation. The former unabashedly aims to be a purely heuristic account, but we show that it is only interestingly applicable to the free bosonic field. Along the way we suggest alternative models. Bohm's interpretation provides an ontology for the theory—a classical field, with a quantum equation of motion. This too has problems; it is not Lorentz invariant.

Howard County Department of Fire and Rescue Services

On June 25, 2022, crews responded to the 10700 block of Resort Road in Ellicott City for a cyclist in reported cardiac arrest. At the time of the incident, a bystander was walking down the street and called 911. At the same time, someone driving down the road stopped and started CPR. When crews arrived on scene, they were able to take over CPR and revive the patient, achieving return of spontaneous circulation (ROSC), which is a return of blood pressure and pulse rate.

The personnel who responded to the incident were thrilled to reunite with the patient and his wife today at Station 3 in West Friendship. The patient looks forward to continuing with his recovery, and eventually getting back on his bike and riding over to the station to say hello to the crews.

The patient would like to reunite with the individual who stopped and started CPR, and if that person is you or you know who they are, please send us a private message. For each minute that passes without CPR, that person's chances of survival decreases exponentially. We'd love to celebrate the vital part this individual played in the chain of survival.

@implicateflow Oh yes. Entire 3000 atom quantum systems with EVERY particle known to humans have been entangled and located in all possible places.

@implicateflow Wheeler believed there was "one photon" forever traveling forward and backward in time as a "particle" forward in time and antiparticle backward in time. This was his guess when he and Feynman were getting the PhD thesis from Feynman together with "sum over all possible paths".

@implicateflow The way it looks now that question APPEARS meaningless. Any instrument to measure things that small or low in value wind up being a black hole. We are ignorant and lots of physics fun awaits us. It all seems just out of our grasp.

@FeonaSwan @implicateflow The quantum field excitations known as Feona are shared with Science Bob's and Joel's. We are all connected as far as our current science knows and it has been tested extremely rigorously. What that connection entails in terms of how your quantum system and mine interact is ?????

2021-07-23T18:14:45+00:00

https://twitter.com/_/status/1418635711704707078

@FeonaSwan @implicateflow We are ALREADY CONNECTED. Each quantum field has a value at every single location in spacetime. The quantum fields are at least the extent of the universe outside the event horizon of black holes. We cannot yet say inside the event horizon because our understanding breaks down.

DEPUTY SECRETARY OF DEFENSE
1010 DEFENSE PENTAGON
WASHINGTON, DC 20301-1010

JUN 25 2021

MEMORANDUM FOR SENIOR PENTAGON LEADERSHIP
COMMANDERS OF THE COMBATANT COMMANDS
DEFENSE AGENCY AND DOD FIELD ACTIVITY DIRECTORS

SUBJECT: Unidentified Aerial Phenomena Assessments

A recent report from the Office of the Director of National Intelligence (ODNI) highlights the current challenges associated with assessing Unidentified Aerial Phenomena (UAP) occurring on or near DoD training ranges and installations. It is critical that the United States maintain operations security and safety at DoD ranges. To this end, it is equally critical that all U.S. military aircrews or government personnel report whenever aircraft or other devices interfere with military training. This includes the observation and reporting of UAPs.

The report also confirmed that the scope of UAP activity expands significantly beyond the purview of the Secretary of the Navy, who heads the Unidentified Aerial Phenomena Task Force (UAPTF), and suggested process improvements to ensure timely collection of consistent data on UAP. Consistent with these recommendations and to improve partnership with the ODNI and other non-DoD organizations, I direct the Office of the Under Secretary of Defense for Intelligence and Security to develop a plan to formalize the mission currently performed by the UAPTF. The plan should:

1. Establish procedures to synchronize collection, reporting and analysis on the UAP problem set, and to establish recommendations for securing military test and training ranges.

2. Identify requirements for the establishment and operation of the new activity, to include the organizational alignment, resources and staffing required, as well as any necessary authorities and a timeline for implementation.

3. Be developed in coordination with the Principal Staff Assistants, the Chairman of the Joint Chiefs of Staff, the Secretaries of the Military Departments, and the Commanders of the Combatant Commands and with the DNI and other relevant interagency partners.

All members of the Department will utilize these processes to ensure that the UAPTF, or its follow-on activity, has reports of UAP observations within two weeks of an occurrence.

@TheUfoJoe @inf3rence Then there is one of you who cares and also doesn't distort. Your transcript method is best for making sure the distortions are minimized. I just love it when I am "quoted" and being run through the "confirm biases" filter.

1) I am a liar.
2) Whoever it was I might have talked to destroyed the mail forever ago (it was never in a system).
3) They don't care because whatever I might have done is unimportant.

@ka9q At the bottom of the "blue belt" which is known as the black belt and the western side, there is a county shaped like a fat comma. That is Clarke County. That is where we grew up.

Leaving there for college, Sandia, Brown and NJ was an epistemological assault. So glad I did.

@lisaga I love where your heart is. But it was not serious when it had zero chance of passage after the tea party revolution in the 2010 midterm elections. Democratic majorities have Manchins and Sinemas.

@issaufobro @Ziv80916192 @GrantCameron Bill Nelson has been NASA Admin for a few weeks. What do I think? I think he saw something when he was in orbit himself with his own two eyes. He is tired of the BS and NASA being shut out and shut down under the Space Act.

DEPUTY SECRETARY OF DEFENSE
1010 DEFENSE PENTAGON
WASHINGTON, DC 20301-1010

JUN 25 2021

MEMORANDUM FOR SENIOR PENTAGON LEADERSHIP
COMMANDERS OF THE COMBATANT COMMANDS
DEFENSE AGENCY AND DOD FIELD ACTIVITY DIRECTORS

SUBJECT: Unidentified Aerial Phenomena Assessments

A recent report from the Office of the Director of National Intelligence (ODNI) highlights the current challenges associated with assessing Unidentified Aerial Phenomena (UAP) occurring on or near DoD training ranges and installations. It is critical that the United States maintain operations security and safety at DoD ranges. To this end, it is equally critical that all U.S. military aircrews or government personnel report whenever aircraft or other devices interfere with military training. This includes the observation and reporting of UAPs.

The report also confirmed that the scope of UAP activity expands significantly beyond the purview of the Secretary of the Navy, who heads the Unidentified Aerial Phenomena Task Force (UAPTF), and suggested process improvements to ensure timely collection of consistent data on UAP. Consistent with these recommendations and to improve partnership with the ODNI and other non-DoD organizations, I direct the Office of the Under Secretary of Defense for Intelligence and Security to develop a plan to formalize the mission currently performed by the UAPTF. The plan should:

1. Establish procedures to synchronize collection, reporting and analysis on the UAP problem set, and to establish recommendations for securing military test and training ranges.

2. Identify requirements for the establishment and operation of the new activity, to include the organizational alignment, resources and staffing required, as well as any necessary authorities and a timeline for implementation.

3. Be developed in coordination with the Principal Staff Assistants, the Chairman of the Joint Chiefs of Staff, the Secretaries of the Military Departments, and the Commanders of the Combatant Commands and with the DNI and other relevant interagency partners.

All members of the Department will utilize these processes to ensure that the UAPTF, or its follow-on activity, has reports of UAP observations within two weeks of an occurrence.

@Julesofthwood @mintyhyperspace @LueElizondo Yes, but there is a $450 upfront cost:

Starlink already works in Alabama and beats the crap out of Hughes and Viasat. Viasat petitioned the FCC to stop Starlink since it cant compete!! Constellation fully active by the end of the year.

The comment is inflammatory and over-the-top, but I can definitely relate to the sentiment and comparison with fascism. For the software industry, "memory safety" is the new form of authoritarianism in disguise. No more jailbreaking, rooting, or running what you want on hardware you rightfully "bought". All in the name of "safety and security". They want to proclaim everything else to be "unsafe" to further their goals of total control.

As the infamous quote says, "Those who give up freedom for security deserve neither."

With all due respect to Jack he needs to submit his work to the rigor of peer review. It will make it better, find flaws and will not become mainstream because you like it or Jack claims it. I hope he does

@5X5_NEWS @BobKurbel @dave_beaty @Facelessbureau1 One must explain the propulsion, lift and hover if you assume a material object with mass. This is why theorists like Puthoff/Davis continue to return to spacetime metric engineering. If visible light components are red-shifted into IR and what was UV is tiny? Invisible!

Congratulations to all of the ARRL Foundation Scholarship recipients. It is a serious joy to be on the board of ARDC when I see all the good that comes from the work. It is an honor to support the Foundation.

@LtTimMcMillan @ExoExplorer3 @SicCoP1 @LueElizondo I admit Danny was animated. He said there were three complaints and he was meeting IG today. It also made sense to me that Congress made the first complaint. The bottom line is the machinery of government is being used in an attempt to force content to be given to report.

@cwfmoore @mesolithicguy @MickWest If spacetime metric engineering (warp field) is in effect, one can calculate the path photons will take through the spacetime in and around the warp field. So each different observer will have a different perspective RELATIVE to object. All will see photons do different things.

@restmassinfinit I want to argue we see all the evidence we need of four dimensions. We see the spatial world around us AND we watch it change. That nonstatic nature of our world reveals the fourth dimension. In a Galilean/Newtonian world that is time. In Special Relativity, 3+1 is spacetime.

@nathanewest @ka9q @abraxas3d @ka2upw The goal is to build an effective and practical CDR by using ML to decide which SDR is needed and to concentrate the effort, for now, on shortwave and VHF/UHF to show this is efficacious. This could allow automated SDR construction. I hope to finish before the next decade.

@nathanewest @ka9q @abraxas3d @ka2upw It depends on the order of development. One could blindly jump in and begin with naive learning. That will take so much data that it's likely to fail as a project. Recent developments show a preference for hybrid approaches and therefore I'm in the hesitating , studying phase.

@BKatakis @TheProjectUnity ignorant is clear from the theoretical calculations yielding ridiculous energy levels that we know aren't real. We can't account for muon wobble in a magnetic field. We can't write a single quantum Lagrangian for all known forces. We can't explain cosmological measurements. 2/2

@SBrowneITF The stars in the bottom image are close to "in focus". The stars in the upper image are not focused. They are bright enough to produce an Airy diffraction pattern. The edges of Corbell object are linear. That would be an unusual iris. I do not believe it is bokeh. What it is? :woman_shrugging:

Of significance, as stated in the explanatory report is the ***‘elimination of cap on compensatory damages for retaliatory revocation of security clearances and access determinations.’*** The cap currently stands at $300,000 and the language will cover serving and former serving employees. Therefore, the risk of taking action against employees may outweigh any meaningful positives by employers.

@NeedleBodkin I loved being out of doors, next to the fire, cooking dinner, gazing at the star-filled sky and drinking a really good beer. I am filled with awe, wonder and joy every time. I began this at ten years old and at 67 I still love it. I know more and I am still joyful to discover.

@LyndaRVA_UAP @Julesofthwood @novak_meri @N2GJ I'm going to do bees here. I have a

perfect place. We need to encourage bee keeping to keep our crops alive!! Stupid pesticides & herbicides. Our pad for our green house gets put in tomorrow. Woot! We are to four large raised beds with awesome fencing to keep the pests out.

@_Desmoden Minkowski space is a Riemannian manifold. How mass/energy curves spacetime and modifies the spacetime metric is more related to how things are quantized because as space-time volumes "shrink to zero" in all dimensions GR must be the limiting case otherwise it makes no sense.

@HappyAtomsPress It is because you don't understand how systems work. 1) I see a signal 2) is one I am allowed to report giving all the filters you have put in place? 3) is it one of my targets? 4) yes, reported or no, its a UFO, round file.

Quantum systems are an admixture of all possible states (superposition) until some interaction collapses the superposition of states to one.

@Alien_Scientist @JackSarfatti Entropy is a two-headed beast covering different areas. In thermodynamics it is a measure of energy in a physical system unavailable to do work. In information/communication theory it is a measure of information content in a message. All the rest is wasted (heh) bits.

@lucio_linae @_Desmoden No one is perfect, least of all Jefferson. But they laid the groundwork for the fall of their class. Since 1619 we have built a country on sin. It is worse now than it has ever been because it is too easy to listen to all that is known about the lingering damage done. It's time.

@m1che2 AAVSO has an exoplanet section and aides for those who want to do exoplanet detection and measurement. And with TESS there will be many candidates that need verification and measurement. Amateurs with backyard telescopes are a mandatory component. https://www.aavso.org/exoplanet-section

@cryptokeeper198 @TinderCFO Because people don't behave. They gathered for holiday, festivities, etc. If we can't behave this will continue. The thing to fear is a mass kill mutation which happens with all viruses and the rate is determined by the number of cases.
