PEOP
Georgia, oh Georgia
No, no, no, no, no peace I find
Just an old sweet song
Keeps Georgia on my mind
I said a Georgia, heh
Maybe it's because I'm from Augusta, Georgia
A song, a song of you
Comes so sweet and clear
Like the moonlight through the pines
Oh now
Other arms will reach out to me
Other eyes smile tenderly
Still in peaceful dreams I see
The road leads back to you, yeah
Georgia, yeah, Georgia
No, no, no, no, no, no, no, no, no, no peace I find
Just an old sweet song
Keeps Georgia on my mind, sing the song
Other arms reach out to me
And other eyes...

@MiddleOfMayhem I can't think of any airport in the US inventory that can accommodate a plane that large. Stealth materials are too subject to damage from debris to allow it to land on salt flats or in the wild. Interesting though.

@cosmicdahlia It is an animal preserve at my house. I have a family of weasels and a deer family that eat my corn. I've seen a bobcat, fox, coyote, armadillo in front of my IR cameras. I've had several snakes visit including two timber rattlers. I grew up in Alabama woods so I'm at home.

@DrAdamKehoe @TomRtweets @LyndaRVA_UAP @rosscoulthart @ddeanjohnson @Jay09784691 @JayCKing78 The space fence works like a solar glint off a spacecraft. When the spacecraft is in the beam for a short time you get a reflected glint of the transmitter at your receiver. IF the thing passing through the beam is reflective enough, you detect it. @SilvaRecord @SicCoP1 UAPTF is a "start-up" without a line item in the ongoing regular US budget. That is what the NDAA with the SSCI language was about. Politics and more have impeded the progress of that. It is not without hope and this is not even that unusual. I am hopeful. Stay positive :folded_hands::nerd_face:

https://twitter.com/_/status/1334878902322417678

@Oswald1160 @PstarmanUa @MiddleOfMayhem The height can be approximated by the context. We know angular width subtended by the canopy. We see the curvature of the Earth. We see the wispy cirrus clouds above both objects. So we guesstimate over 30000 feet and not 50000 feet. The plane has radar to ascertain distance 2/3

@David_desJ @WE4Bravo I wish there weren't decades of precedent of us rolling over and taking whatever they give and take. The Citizens Band was taken from amateur radio for

example.

@WE4Bravo We amateur radio operators have TEMPORARY right use this world wide resource given a grant of access by the ITU and a license to use it in the US granted by the FCC under Part 97 given their establishment to do so by the communications act.

@IWANTTOKNOW2020 @LyndaRVA_UAP @JaneJannievic @Phenomenology19 You are almost there. This election, like no other, will be completely determined by mail in or absentee ballots. On election night it might look like Trump won and the GOP retained the Senate. But if the vote

is fully counted all sorts of polls and other detectors say Dems sweep

@Amy_Siskind The GOP senators are scaring the crap out of this voter. They don't really believe down deep in representative democracy and our republic. They want "their way" and they tried to stay barely lawful. I fear they will give up on that approach to retain power.

@SarahAnneDordel Thank you. You piqued my interest and I thought I'd ask. Lots of research into models for consciousness and many don't know quantum physics is a math description of observation and not "how it works". This is a path forward for consciousness as well.

@ka9q @vk5qi Pay the price for the high speed ADC and control the sample clock with expensive oscillators or live with poorly documented ASICs and imprecision and lack of stability. There is just not much middle ground.

https://twitter.com/_/status/1304387747818491905

@vk5qi @ka9q The only way around this at all is direct sampling of the antenna and only a small percentage actually need and/or can afford the high speed processing needed to directly sample the antenna and get sufficient performance to justify it. We have to live in reality with what we get.

@ka9q Exactly. I have the Airspy and airspy converter, HackRF modded with shields, case, and heat sink, Red Pitaya 16 BIT dual channel SDR transceiver, and Kerberos SDR which is four cohered ports for passive multistatic radar. Lots of inexpensive and capable toys that work.

Sick of the anemic power even if your SDR transmits? The demand is being addressed. WARNING. Most transmitted signals with even modest levels of power require a license to transmit.

@uapufo @Peter50751945 @nibbleshift @uaptn @RyanDBledsoe Very happy to hear it. Can you believe the cesspool Twitter is? I have been depressed and covered it up. Several family members had Covid and I haven't seen my 86 year old mother in 10 months. I am also doing better now that my new home is coming together. I can work now.

@DallasAnalytics @blackvaultcom @MiddleOfMayhem @RepJerryNadler A total constant among the people you call Left does not approve of the riots. They are pointing out that those doing

and/or inciting violence are not with the peaceful protestors and are instigators and agitators and exploiting exercise of rights. How are we to know?

@ka9q Especially there. But the articles about the USS Nimitz in 2004 and US Roosevelt a few years ago are true.

The NDAA just passed the Senate and set up a process to provide unclassified information to the public on the work done on UAP. It will pass the House with that language.

For the six months before I moved I was AirBnB homeless until I finally was able to move and it had nothing to do with money. I should write that up. @MadScientistPod Indeed brother. It is the single best thing besides how to research literature and organize your thoughts and process into small sentences and paragraphs as you build your thinking and then proposal. Hard to learn in a vacuum. THAT is the job of a teacher.

@MadScientistPod At 66 this professor finds many if not most can learn. But the single most difficult impediment is impostor syndrome. "They don't belong here"? Baaa. It is ridiculous to compare yourself to someone with years of experience. All learn incrementally without a mysterious miracle.

@MadScientistPod @IWANTTOKNOW2020 @Deepneuron @_Desmoden @BrianRoemmele @GarryPNolan since quantum mechanics and quantum field theory are not descriptions of reality. They are descriptions of the time evolution of probability functions which describe the outcome of MEASURMENTS most often gotten through experiment. This is Bohr school physics philosophy. 2/2

@MadScientistPod @IWANTTOKNOW2020 @Deepneuron @_Desmoden @BrianRoemmele @GarryPNolan Yes. I went through their derivations when they first cast it out as an explanation and they had involved reputable and published physicists but I tske NO physics theory seriously until it has been tested with experiment. That is the standard that we should all use 1/2

everywhere. It was templated and required in some places and in some institutions. Back in 1961 every entity treated all this differently and there was little standardization. Take care.

@ExogenesisHH @FSaucerer @ElectroDeeJ @RyanDBledsoe @DericKnight Dylan Thomas as our anthem and rallying cry is the only way that isn't a disaster.

@ExogenesisHH @FSaucerer @ElectroDeeJ @RyanDBledsoe @DericKnight The "old" is unsustainable. Pandemics have been predicted by many and notably Gates and attempted intervention by Obama. This will continue. The US economy serving only equity markets and not individuals and the world continued use of Petrodollars as they become valueless.

@ExogenesisHH @FSaucerer @ElectroDeeJ @RyanDBledsoe @DericKnight Watch news and look at the people in the streets in every country that allows protest and even in some that don't. The demand for change, accompanied by the major demographic shifts underway including major inversions lead to crashing the human population as birth rates crash.

@UfoJoe11 @RyanDBledsoe @mmabox @DericKnight As a scientist, my first job is to gather tons of evidence on which a "guess" can be made as a hypothesis to be tested. Science is a boringly long process that is absolutely necessary to produce that which convinces most of its reality.

@19Nimbus @MadScientistPod @monsieur_legris @thatzoroaster @Mabzors my initial reaction is that if it is all gone there is nothing left for me to work on or with. The event involved a system: whatever did this and your body and I've seen neither when there was evidence to gather. A photo isn't something i could work with. Hope you're ok. 2/2

@MadScientistPod @thatzoroaster @Mabzors Totally support this approach. Belief is NOT SCIENCE. What I believe is useless for convincing those in denial. What we can collectivity prove in repeatable fashion and tell everyone how to do is the winning path. And this time we CAN overwhelm the denials with data.

@Blablablablubl2 @Deepneuron Physics is replete with geniuses who work and produce great work that lasts. Feynman was a magician. His creativity was nearly unparalleled and he often got in trouble (socially). He reinvented things so he could understand them. The guy invented quantum computing!

@Ce5Canada @_Desmoden That is not my experience or that of Bledsoe. All nonflash pictures are showing illumination and if near objects they show reflected light on trees, etc. These are all visible to the eye & not needing night vision instrument. More later but I won't work flash pictures at all.

@memcculloch @Deepfryguy76 @Deepneuron @Thealienpickle The one constant in physics is the belief that information is not lost by processes. If your theory destroys information it will be hard to accept.

@Deepfryguy76 @Deepneuron @memcculloch @Thealienpickle There are no mechanisms I am aware that will allow this merger. The inventor or many worlds, Everett, was a student of Wheeler. I was friends with Wheeler for the last years of his life. We discussed many worlds. He never once mentioned coalescing universes. We discussed much.

@N5AC It's hard to tell if we are doing nothing or mitigation but the number of cases is concave up. We can't tell yet if that is lots of new testing or lots of bee cases or both. We aren't doing the hammer. Hard to do in our democracy without martial law.

@wm6h @danak6jq @ESP32net @ka9q @KWF I think you're wasting tap power by using filters designed by the Remez exchange algorithm. Try doing a windowed design. I suggest Blackman-harris window. The main lobe gets slightly larger but the OOB trails off below the noise floor. You might even be able to reduce # taps.

@MiddleOfMayhem @MC05A He visited NIS, and they discussed SWR. You are correct. Reid knew about SWR before Lucatski started AAWSAP with Reid and pals influence. It was rigged by setup. Award made two weeks after annoucement in the Federal Register. And months after BAASS was formed. The breadcrumbs!

@MiddleOfMayhem @MC05A I agree that none of the DIRDs cover Werewolves or Poltergeists. Bigelow bought SWR 1995, most of the weirdness came before 2007 when AAWSAP contract started. Reid visited NIS and SWR before AAWSAP was funded under his partnership with Inoye and Stevenson. It is suggestive.

@MiddleOfMayhem @MC05A From cover to cover. If you are implying that Locatski, Reid, and Bigelow gamed the system, that has already been established by the way the contract was awarded. DIA and other IC elements hand off to other executive departments to pursue long-term. DHS demurred. Why? :woman_shrugging::woman_shrugging:

@RichardGHopf @LyndaRVA_UAP Here is a fact that influences my thinking. The Chinese theft of IP from the US is done by every available body that comes to the US through pressure from the PRC or money flowing from the PRC. It isn't a low probability thing. All The Time. Every Day. All Day. 365 days/year...

@RichardGHopf @LyndaRVA_UAP Until I am shown that the virus or its predecessor was taken from a North American lab to China, the narrative fails. Did they take expertise and IP from the US to China? Of course they did and they did so illegally and they have been doing it for years and $$ are involved.

https://twitter.com/_/status/1239911758464274434

@RichardGHopf @LyndaRVA_UAP But that is not where your story started. Your story attempted to link laboratories in the US with the Wuhan biologic lab to the COVID-19 virus. The beginning of your narrative is where this fails.

https://twitter.com/_/status/1239910460574629890

@RichardGHopf @LyndaRVA_UAP I have read these stories so I know them well enough to say that these are bad things and the Chinese have been doing this for years but none of these cases is weaponized corona virus. From epidemiology studies alone we know what Market this originated from.

It varied in brightness, appeared to be 10-20 feet across. At its brightest it was blinding. kmz of the field shared.

@19Nimbus @StevenM10657487 @ExoAcademian @Deepneuron Well, now we agree. I allow data to influence the outcome by how much I trust it but i never toss it. The weighting is done based on observation/experience. With language I may not be able to interpret what is meant if the language isn't used precisely and causing low weighting.

@19Nimbus @StevenM10657487 @ExoAcademian What is needed is for us to find out HOW to communicate these ideas. Ignoring the problem doesn't make it better. Did you check out @Deepneuron new proposal for the study? It has a discussion. Calling something quantum that misses the scientific meaning makes sure it's ignored.

@19Nimbus @StevenM10657487 @ExoAcademian The precise use of language and terms is required to convey information. Otherwise the efficiency of the idea compression is ruined. This is trivially obvious but apparently it needs to be stated.

@19Nimbus @StevenM10657487 @ExoAcademian Let me help you understand. We already suffer from the loose usage of language. We do not have mind melds to convey concepts. We only have language. Maybe the Ulam-Kurzweil Singularity and brain-machine interfaces will eliminate a large part of the problem. 1/2

@Thealienpickle @Deepneuron @Deepfryguy76 Of course I did. It is much more than a paper. It is a 450+ page collection of papers. That is 450 workdays to go through in detail.

@Deepneuron @Deepfryguy76 @Thealienpickle Good ones answer as I do. If you don't know, you say you don't. If you detect a misunderstanding, you correct it gently. Your job is to bring others with you when it is possible. It isn't always. When you are allowed to share (damn NDAs), you are required to.

@Thealienpickle @Deepneuron But I can't ride a bike as well at 66 as I could at 26. It would take me well over a year to own all of this material. Further, I know that if it all held together it would the biggest news in physics. It isn't so I lack motivation. 2/2.

@TruthcastHQ But I wasn't too lazy to interview everyone there before I decided not to have a comment. Your interpretation of a man facing the camera let me know you didn't do anything at all. This convo is over 2/2.

@uaptn @RichardGHopf My rig is low light level Fisheye with decent IR sensitivity plus low light level PTZ with 140 dB WDR. It is not cheap but it is nearly ideal. The Fisheye will be used to determine crude pointing angle and maintain situational awareness.

@Thealienpickle is somehow nullified. It is a tough thing to explain. All we're doing is guessing until data is gathered. Do you think I believe governments of the world have never gathered data? That is ridiculous to assume so I don't. Then the question is why? Thus conspiracies born 2/2

@Deepneuron In order to reduce the amount of negative energy/matter needed one would apply an impulse response filter to the gravity waveform generator and this would greatly limit the volume of spacetime that would be plucked like a guitar string. This assumes negative matter is hard to do.

@devgru1980mi @Deepneuron I never said they weren't. Dolan satisfied me of that. And further confirmation came when Davis got shuttled off to Huntsville to be in the leper colony for having the temerity to write those notes. So who ends their long relationship after it comes out? Trust that guy?

@cblentz I am not a student of Native American traditions or history. I have opinions that are from reading but I will not speculate. I am going to say what I can measure. It is what I hope people will expect from me. The historical accounts I've read have tales of experiences.

@kevincann @JamesPr65703236 @Deepneuron @IWANTTOKNOW2019 @RyanDBledsoe @cblentz That part of North Carolina is replete with Native Americans. They visited. It was an experience that is not mine to tell or characterize because I didn't witness it. It impacted everyone from their first-hand witness accounts.

https://twitter.com/_/status/1224437850512318466

@RyanDBledsoe @uaptn It shows an extremely high gradient of light coming from the orb and illuminating those things near it. It cannot be coming from the (HORRID) flash that keeps getting used. It would be awesome to make some statement about the "auras" on the tree, but that can't be done (FLASH).

@Deepfryguy76 @AjayDaGreat @GarryPNolan I will contradict what I can show is wrong. But in science and engineering matters, I will not do it with a condescending tone that denigrates a person. In political matters where people's lives are at stake, rest assured my speech can, will be, and has been vicious.

@nibbleshift @uaptn @1947_z At first we will have a huge problem. Not enough data to do anything useful either data science and learning algorithms. So we intend shipping data to a central location where analysis can be done. The RPi4 is capable of applying an algorithm but much less so doing learning.

@TheLastSisyphus @Deepneuron Let me explain to you why your emotionally satisfying hypothesis won't work for scientists. Science is based on hypothesis that you can test and others can repeat. I've no idea personally how to begin to test your hypothesis. I can't observe & control for your other galaxies.

@TheLastSisyphus @Deepneuron is postulated to be caused by dark ENERGY. We have an idea what dark matter could be (axions) and no idea what dark energy is. It enters into the Einstein equation as "Lambda" in the simplest form.

@kevincann @Deepneuron Again they are entangled and have statistical correlations (coherence) or they aren't. As entangled they are a SINGLE quantum system and are thus in the same universe or world. This is why quantum computing is so powerful. All the qubits are a single quantum system.

2019-12-30T16:07:45+00:00

https://twitter.com/_/status/1211680282484596739

@kevincann @Deepneuron If they are entangled they are highly correlated in the statistics of the outcome of measurements well above flat random. So some form of coherence in their state exists. But measurement ends the conherence or correlation and the become statistically independent. Before 1/2

https://twitter.com/_/status/1211676306372468739

@kevincann @Deepneuron Superposition is not state a and state b. Superposition is much richer than that. For a single qubit, it is the uncountable infinity of points on the Bloch sphere, unless physics restricts the allowed states on the to a set of discrete vectors on the sphere. 1/2

@jcdoss3 @RyanDBledsoe @uaptn I believe in the use of the scientific method when trying to find explanations for phenomena. When the events have no repeatability, the hypothesis you wish to make is bad faith when you know the phenomenon to be tested is not repeatable. I love science.

So much to do, but these papers are readable if you can read general relativity work. I am not not being smart-A, I am genuinely asking

@Deepneuron @JazzShaw It is not a metamaterial in any definition you like until it exhibits properties that are different from what is expected from the properties of the substance included in the mix. A negative refractive index (Puthoff) would be of great interest in cloaking, etc.

@Deepneuron @JazzShaw The "pure" Bismuth layers consist of a diamagnetic substance and other stuff between every two layers of this. It is a way to calculate just as you said. Feynman& Bohr agreed. Einstein arguing w/Bohr drove the development. Let's argue!!

@jacobeisenstein @math_rachel People complain about cost of university going up and the massive effort spent aimed at extramural research. There is no choice. The rise in tuition is correlated beautifully with the fall in state support for public universities and thus the need to do so much extramural work.

@bhilburn @nytimesworld I feel the complete loss of the inspired leadership that built and ran the NYT in the 20th century. Now Facebook wants to own all major news, pay their staff, and control the narrative and get a monopoly on dissemination of news/information. Beware.

RT @TheRickWilson: The front runner for the 2024 nomination, folks.

http://pbs.twimg.com/media/FMOqPOrXwAUNHCQ.jpg

BUCK: Mr. President, in the last 24 hours we know Russia has said that they are recognizing two breakaway regions of Ukraine, and now this White House is stating that this is an "invasion." That's a strong word. What went wrong here? What has the current occupant of the Oval Office done that he could have done differently?

PRESIDENT TRUMP: Well, what went wrong was a rigged election and what went wrong is a candidate that shouldn't be there and a man that has no concept of what he's doing. I went in yesterday and there was a television screen, and I said, "This is genius." Putin declares a big portion of the Ukraine — of Ukraine. Putin declares it as independent. Oh, that's wonderful.

So Putin is now saying, "It's independent," a large section of Ukraine. I said, "How smart is that?" And he's gonna go in and be a peacekeeper. That's strongest peace force... We could use that on our southern border. That's the strongest peace force I've ever seen. There were more army tanks than I've ever seen. They're gonna keep peace all right. No, but think of it. Here's a guy who's very savvy... I know him very well. Very, very well.

By the way, this never would have happened with us. Had I been in office, not even thinkable. This would never have happened. But here's a guy that says, you know, "I'm gonna declare a big portion of Ukraine independent," he used the word "independent," "and we're gonna go out and we're gonna go in and we're gonna help keep peace." You gotta say that's pretty savvy. And you know what the response was from Biden? There was no response. They didn't have one for that. No, it's very sad. Very sad.

@MikeJoh84415777 @abraxas3d The only thing I care about is how fictional is the number? At large attenuation how much leaks around it? Is that leakage highly frequency dependent? 1.4 million times drop in power is nice, if it works without leaking.

These attenuators are really hard to get right.

@cameronleeball @Lynda_Katerra I use the Behmor roaster along with green beans I purchased from http://sweetmarias.com The equipment is not cheap but the coffee coasts much less than grocery store fine coffees and the oil have not evaporated.

@Lynda_Katerra I am very glad he is enjoying roasting his own coffee. I use the ~25 minutes for mindful meditation. If you aren't mindful you will burn the beans or roast it unlike your wishes. A plus is I drink coffee for everyone's protection.

@CoziTiger @EricShapiro3 @BrianBiscieglia @thehill It sounds like we are all in agreement that we don't want Trump relected. That sounds like a good start. That is the top of my list in selecting who I will support in the Democratic primary season. Looking at the lasting damage in the courts, alliances, etc. It's #1.

I love it when stupid politicians get caught by their lack of understanding of the constitution which they are sworn to uphold and defend.

I believe there is a very high probability that the electoral college won't elect our next president. We are 75% of the way to success.

@FrancMilburn @173rdAbnBde @16AirAssltBCT That is the mobilization that guarantees war. The West is gambling that Putin will stop if we show we are awake and preparing. It is hard to believe Europe is on the brink of WW III! I agree China would choose this time to act.

@FrancMilburn "We" cannot amass a defensive force in time to stop the completed Russian mobilization from attacking. The moment :Russia: saw us mobilizing they would attack. Given these circumstances, partial mobilizations and our air power are the most credible pre-WW III action along with covert.

@sipansibab @shannonmstirone @nytimes Irrespective of how much cheaper microsats are, there are still physics limitations that no amount of money savings can overcome. Each of them must communicate with earth (for now). This requires time on a large antenna since they can't carry a large antenna. Big problem. :face_with_monocle::nerd_face:

@ThatUfoLady No. This is a technology-based solution that closes the broken circuit of the severed spinal cord. Think of it as a cut cable and the circuitry splices the circuit.

Take on so much debt going to school that one can never escape and then be faced with horrid GOP legislation which upends bankruptcy as a way to undo your mistake. This taps you forever.
