@BennyMack13 @thehill @seanhannity @Acosta The long lasting legacy of Roger Ailes, Rupert Murdoch, and the political ambitions of many will be interesting history to read in when the current tranche of madness fades and we can look dispassionately. If it doesn't fade there is little hope for western democracy.

The JWST launch was like throwing a ball up. It starts fast but it slows down as it climbs up earth"s gravity well. The launch by Ariane wasn't enough to get to the L2 halo orbit. There are 3 thruster firings, just enough to get it to the top & swirling around the saddle top. :nerd_face:

@AntheaButler We didn't serve our ideals then, and while we've made progress, we are going backwards now. If we strive to live up to the ideals embodied in our constitution and bill of rights and apply them equally to everyone, that is the USA I want to be part of.

@NakedPundit Exactly. This guy, Nunes, doesn't understand how intelligence gathering works. I do. I worked it from 1978-2011. When the Dems asked to allow anyone in the house who was raising hell to read the raw Intel behind the memo, the damn GOP voted unanimously no. These folks are nuts.

@W8MM @KimStrassel @WSJ I know Verona by heart. Julius and Ethel were caught, put on trial and convicted. There were many doubters which definitely included her children. But all of us that knew Verona knew they were guilty. McCarthy didn't know Verona. He wasn't trusted by Hoover and others.

This is why for months and weeks I have been calling the Trump administration riddled with traitors.
They KNEW Putin ordered the operation and gave specific instructions. Every time Trump has denied it since he KNOWINGLY LIED. He's a traitor.

Retired US general says the Trump White House 'was complicit in the planning' of the January 6 insurrection

John Haltiwanger Jul 28, 2021, 9:33 AM

President Donald Trump at the "Stop the Steal" rally in Washington, DC, on January 6. Tasos Katopodis/Getty

- **Lt. Gen. Russel Honoré told MSNBC the Trump White House was complicit in planning the Capitol riot.**
- **Honoré also suggested Trump's White House was behind the delayed federal response that day.**
- **Honoré conducted a review of the US**

U.S. Senator ~ *Arizona*

FOR IMMEDIATE RELEASE:

Saturday, November 11, 2017

STATEMENT BY SASC CHAIRMAN JOHN McCAIN ON PRESIDENT TRUMP'S COMMENTS ABOUT VLADIMIR PUTIN

Washington, D.C. — U.S. Senator John McCain (R-AZ), Chairman of the Senate Armed Services Committee, released the following statement today on President Trump's comments about Vladimir Putin:

"President Trump today stated that he believed Vladimir Putin is being sincere when he denies Russian interference in the 2016 presidential election and reiterated that he hopes to cooperate with Russia in Syria.

"There's nothing 'America First' about taking the word of a KGB colonel over that of the American intelligence community. There's no 'principled realism' in cooperating with Russia to prop up the murderous Assad regime, which remains the greatest obstacle to a political solution that would bring an end to the bloodshed in Syria. Vladimir Putin does not have America's interests at heart. To believe otherwise is not only naive but also places our national security at risk."

Current Deployment Step

Solar Array

Webb's solar array is released and deployed.

Nominal Event Time: Launch + 33 minutes

After shedding its fairing and booster rocket, the first two deployments are 'automatic,' meaning they happen without the ground giving commands. Once the solar panel is deployed, the telescope will go off of battery power and start generating its own power.

Current Deployment Step

Solar Array

Webb's solar array is released and deployed.

Nominal Event Time: Launch + 33 minutes

After shedding its fairing and booster rocket, the first two deployments are 'automatic,' meaning they happen without the ground giving commands. Once the solar panel is deployed, the telescope will go off of battery power and start generating its own power.

@ITalksTooMuch Their chance of returning to isolation uninfected is then (1-1/100)^N. So in ten excursions the probability (.99)^10 = 90% chance of not getting infected.
(.99)^100 for a hundred outings is 36% chsnce of staying uninfected. These people are taking a huge risk. Omicron bad. 2/2

https://twitter.com/_/status/1473343596875104266
@ITalksTooMuch I am unsure if this is it. You can evaluate for yourself. Each time an unvaxx goes out is an independent trial, gambling on getting infected. Let's suppose each time they go out, they have a 1/100 chance of getting infected. Let them go out N times. 1/2

Sean Kutzko
13 mins ·

Friends-

I have submitted my resignation as Media and Public Relations Manager at ARRL.

During my ten-year tenure at ARRL, it has been my pleasure to help raise awareness of all that Amateur Radio has to offer, and create or help promote programs such as ARRL's National Parks on the Air, the ARRL Collegiate Amateur Radio Initiative, and satellite and portable operating in general. Being able to serve at this level has been one of the most rewarding experiences of my life. I thank everyone at ARRL for the support of these efforts.

However, it is now time to pursue another path.

While I will still be engaged in social media/PR endeavors, at least part of my path will involve pursuing my second great passion: baking artisan breads, pizza and pastry. I am reviewing several culinary schools that I may attend.

My last day at ARRL will be Friday, August 4.

Of course, I have no plans to go off the air anytime soon. I'll still be enjoying portable QRP adventures and working the Amateur Radio satellites, from one outdoor operating site or another. I hope that if you enjoy Amateur Radio as much as I do, you will make the effort to promote on-air activity in every form, participate in community service, and share your love for the greatest hobby on Earth.

Thank you for letting me be of service to the Amateur Radio community.

73,

Sean Kutzko KX9X

@CTFlyMonkey @GarryPNolan I didnâ□□t say brain causes consciousness. If Astral projection is a fact, for example, or life after death the best the brain can be is a connection between our bodies and our consciousness!! It is a â□□transceiverâ□□.

@dsmethurst66 @GarryPNolan I said nothing about Turing test. I said Turing machine. Not enough bits in the universe to compute on a serial bitstream of a Turing machine in finite time â□□understandingâ□□. Emulate all you want there are things a Turing machine based artificial intelligence cannot understand.

@JonMajerowski Notice neither I nor Reuter's blamed the Russians for doing it. The blame goes to the companies and the system that allows for these things to happen. It is why sanctions often fail as a deterrent. Things are different now. Biden's administration is wielding a sledge hammer.

It will be exciting.

@The1Revolution @BKatakis @FrancMilburn No. I cannot imagine they would use anything that isn't quantum networking and completely immune to eavesdropping/tapping. The no clone theorem is one of the most powerful things about quantum information.

I was answering a specific what if question.
