@Pickles_Malone @dasfactjack @mattzzjunkla @Meagain10411919 @drsimonegold Numbers involve rates and small sample sizes. 2 boosts might well be people who, in general, follow all medical advice more closely, which may have had bigger impact on keeping that rate below 0 or 1 boost.

@NutritionOverh1 @nilslofgren That's not the point. Breakthrough suggests they're an anomaly anyway. The effectiveness of the vaccines were exaggerated and the numbers bear that out. The unvaxxed should have protected themselves better but the vaxxed were lied to. It's as simple as that.

@magicalpig75 @EricRWeinstein You need to explain your figuring to me. How do you get 810 as a national total when Mass. alone is at 1,054?

2022-01-20T18:08:38+00:00

https://twitter.com/_/status/1484226376530075650

@magicalpig75 @EricRWeinstein This is based on very incomplete data but:
https://oregon.gov/oha/covid19/Documents/DataReports/Breakthrough-Report-01-05-2022.pdf
https://nbcboston.com/news/coronavirus/82466-new-breakthrough-cases-in-mass-nearly-doubling-week-over-week/2610539/
A total of 1742 BT deaths in Oregon and Mass. (11.174M) Add OR and Mass pops and use that to divide total US pop (333M). Thats' 29.8. Multiply 1742 X 29.8 = 51.9K.

2022-01-20T17:58:59+00:00

https://twitter.com/_/status/1484223949781311492

@magicalpig75 @EricRWeinstein As it turned out, everyone at risk was left somewhat vulnerable even if vaxxed. I'm estimating, only because I have to, there have been 50K+ "breakthrough" deaths. Vaxx audacity caused deaths too. Vaxx was sold as a cure.

@neicolec @Mediaite Depends on who you are.

"Paul Offit, the director of the Vaccine Ed Ctr at CHOP, told me that getting boosted would not be worth the risk for the average healthy 17-year-old boy. Offit advised his own son, who is in his 20s, not to get a third dose."

https://nbcboston.com/news/coronavirus/82466-new-breakthrough-cases-in-mass-nearly-doubling-week-over-week/2610539/

Total of 1742 BT deaths in Oregon and Mass. Add OR and Mass pops (11.174M) and use that to divide total US pop (333M). That's 29.8. Multiply 1742 X 29.8 = 51.9K.

@ComradeVero @joerogan Take total virus deaths and subtract all from 2020 and Jan/Feb 2021 (no vaxxes yet). You get about 350K. Divide 350 by 51.9 = 6.74. Those aren't perfect numbers/estimates but I think they are in the ballpark.

2022-01-13T19:34:15+00:00

@ComradeVero @joerogan This is based on very incomplete data but:

https://www.nbcboston.com/news/coronavirus/82466-new-breakthrough-cases-in-mass-nearly-doubling-week-over-week/2610539/
A total of 1742 BT deaths in Oregon and Mass. (11.174M) Add OR and Mass pops and use that to divide total US pop (333M). Thats' 29.8. Multiply 1742 X 29.8 = 51.9K.

2% were vaxxed Jan, 21 and don't believe the completely irresponsible among the unvaxxed today are somehow more irresponsible now than 1 yr ago.

@Bhima_Jenkins @LtTimMcMillan How disproportionate can that possibly be when 75% have gotten some vaxx? My point is not nearly enough to be the sole reason for this holiday spike. Vaxx effectiveness got oversold and people believed they were safe once vaxxed. They weren't.

@UAPmike As we discussed before, the death rate is plummeting and I'll give the vaxxes credit for that along with milder strains of the virus. When things change you should ask why? I think the wing nuts have been largely a constant.

@UAPmike Yes, it's part of the problem but not a big part. Rogan's become a hot toy for lots of sides to play with and his following is enviable but with such a fragmented overall audience, he's not that large an influence.

Too embarrassing for those involved in the "notes" concoction is one obvious possible reason. They'd be a lot more plausible if they weren't chock full of the same hooks and tropes found in earlier known disinfo.

to listen to the experiences of **Master Sergeant Michael Salazar**, a Special Operations Professional involved in covert actions, humanitarian relief, para-rescues, the Gulf War and Afghanistan, and author of three books. A new slate of officers was elected, headed by Chapter President John Hilliard.

The **AFIO Florida Suncoast Chapter**, another active chapter, met on 8 October, with a panel discussion the Cuban Missile Crisis, featuring **Bob Sumner**, past President, as well as representatives from TV Channel 13/Fox News, and the Florida International Museum. This is excellent example of the AFIO public education outreach mission.

The active **AFIO Miami-Dade Chapter** [in Coral Gables, FL] hosted numerous luncheons over past months. In July the Chapter hosted Federal Judge and former naval aviator **A. Jay Cristol** in a talk about his book *The Liberty Incident* - on the attack of a U.S. warship by the Israelis - which many *USS Liberty* members claim was deliberate, and which Cristol purported was a tragic error.

In November, **AFIO's Palm Beach Chapter** hosted **Mr. Guy Lewis**, U.S. Attorney for the Southern District of Florida, U.S. Department of Justice. Lewis spoke on INS activities in the Southern District, illegal immigration through the ports of Miami and Ft. Lauderdale, and the effects of these issues on the terrorist threat to Florida and the rest of our nation.

The **AFIO New Mexico Chapter**, as part of its active year-around monthly program, met on 25 September and, after the pledge of allegiance and the invocation, spoke on 'Intelligence problems Before and After 9/11,' getting an excellent response from the Chapter as well as afterward in interviews at the local radio station and the University of New Mexico. The Chapter also has hosted **Professor Jim Holden-Rhodes** of the U.N.M., and supports his program of intelligence studies.

national intelligence and state and local police elements faces some exceptional obstacles.

On 23 October, at the **AFIO NewMexico Chapter**, **AFIO National President Gene Poteat** traveled to Albuquerque

The **AFIO New England Chapter**, as part of its program of quarterly meetings, met on 25 October at the Nonantum Resort in Kennebunkport, Maine. **MGEN (ret) Ed Thompson** spoke on the US "Remote Viewing" program. Other presentations were made by authors **Fred Jerome** and **James Bamford**. Some 60 individuals attended, including 15 from the local community, thanks to press releases in newspapers and a local radio station, and representation by local journalists.

Congressman Rob Simmons was recruited to be the referee for the 2002 AFIO/NE Ransburg Foundation scholarship program, with the winner to receive a $500 stipend from Chapter and Foundation resources, an example of an innovative Chapter use of the Ransburg Foundation program.

in Moscow during the last five years of the cold war. There also was a post-luncheon speaker was a local senior FBI official discussing post-9/11 activities and the recent Bureau reorganization

In September, The **AFIO Midwest Chapter** (MWAFIO) hosted its annual Current Intelligence Symposium at the Great Lakes Naval Training Center, Great Lakes, IL

In October the **AFIO Northern Ohio Chapter** held elections for 2003 Officers and voted to adopt Chapter Bylaws while at the US Coast Guard Officers Club in Cleveland. In November they held their Annual Holiday Party at Bratenahl Place Penthouse, Bratenahl, Ohio.

In September in Silver Springs, Nevada, **AFIO's NEW North Sierra Chapter** held their kick-off meeting and BBQ at Don Mitchell's ranch, East of Reno. Their special guest—**Gene Poteat, AFIO National President**. For further information to join this chapter, contact Lud Spolyar, Chapter Secretary, at (530) 581-4212 or lud@spolyar.com.

In October, the new **AFIO Las Vegas Chapter** held its first meeting. To join this new chapter or to participate while visiting the area, contact Richard L. Cohn, President, at afiolasvegas@att.net

@TruthofTerAvaya @528vibes The WWII jets weren't holding up. Lots of things were being researched. Kroll invented the Kroll process in the 1930s. VIM furnaces were invented in the mid 1920s. There are always people who are way ahead of the curve.

@grahammessick @ChristopherKMe4 RE: Stephenville 2008. This from commercial radar data FOIA'ed out and analyzed by MUFON investigators plus the 2 USAF pilots pursuit of the UFO.

http://pbs.twimg.com/media/E3yfmg5WQAQuQJf.jpg

As to what these witnesses saw, it is difficult to determine. It was not any known aircraft. The enormous size of the object, its complete silence, and its ability to travel at high rates of speed and to also remain stationary or travel at slow speeds, is not explained by any known aircraft. The smallest size calculated from witness descriptions was 524 feet and most of the calculations based on approximate distance of the object and witness descriptions of degrees of sky covered by the object indicated an object closer to 1,000 feet in size. Twice, radar picked up an unknown object flying at 1,900-2,100 mph. Admittedly, it could have been a coincidental radar hit…but in both cases that coincidence occurred when a witness saw a very fast moving object in the same direction as an object painted by radar. Twice, radar tracked slow moving objects, for extended periods of time, that were very near the witness' location, in the direction described by the witness, and at approximately the same time that the witness saw the unknown object. It is very difficult to dismiss witness testimony that is corroborated by radar. And to further augment the strangeness of these events, radar tracked one of those two objects for over an hour as it traveled directly toward Crawford Ranch. The authors cannot comment on the source or origin of this object, but it is clear to the authors that the unknown object was real and not imaginary.

@RTheatheist @matthewdmarsden Many of these side effects go well beyond a sore arm or a headache including, in a still underdetermined number of cases, death. In age groups where the risk of death is small, like anyone under 40 who isn't obese or diabetic, that should be

considered.

@rosscoulthart @ChristopherKMe4 @usairforce This from commercial radar data FOIA'ed out and analyzed by MUFON investigators plus the 2 USAF pilots pursuit of the UFO.

http://pbs.twimg.com/media/E3yK2sBWYAU3rmv.jpg

As to what these witnesses saw, it is difficult to determine. It was not any known aircraft. The enormous size of the object, its complete silence, and its ability to travel at high rates of speed and to also remain stationary or travel at slow speeds, is not explained by any known aircraft. The smallest size calculated from witness descriptions was 524 feet and most of the calculations based on approximate distance of the object and witness descriptions of degrees of sky covered by the object indicated an object closer to 1,000 feet in size. Twice, radar picked up an unknown object flying at 1,900-2,100 mph. Admittedly, it could have been a coincidental radar hit…but in both cases that coincidence occurred when a witness saw a very fast moving object in the same direction as an object painted by radar. Twice, radar tracked slow moving objects, for extended periods of time, that were very near the witness' location, in the direction described by the witness, and at approximately the same time that the witness saw the unknown object. It is very difficult to dismiss witness testimony that is corroborated by radar. And to further augment the strangeness of these events, radar tracked one of those two objects for over an hour as it traveled directly toward Crawford Ranch. The authors cannot comment on the source or origin of this object, but it is clear to the authors that the unknown object was real and not imaginary.

The NICAP man on the scene, Ray Stanford of Phoenix, picked up a rock in one of the indentations that looked as if it had metallic particles, possibly scraped off the landing-gear footpad. I happened to be in Washington when Mr. Stanford arrived at the NICAP office with the rock. We examined the sample then took it to a prominent government center for analysis. The miniscule size of the particles made proper testing difficult, but eventually the "scrapings" were identified as of granitic origin. After studying the particles myself under magnification at the laboratory, I must admit I did not have much hope that anything convincing would be revealed by the tests.

Hynek was also puzzled by the lack of thrust disturbance at the landing site: "It's been bothering me that Mr. Zamora didn't see a great cloud of dust like this would have kicked up." (A conventional chemical rocket engine would have dug out a sizeable crater and a large quantity of dust.

@MHuntington7 The Sec'y of the USAF did waive any security clearances for anyone talking to the investigators, so that's a nice precedent to keep in mind going forward.

http://pbs.twimg.com/media/E3A_RmKXwAAKEN5.jpg

resulted therefrom. Besides the obvious irregularity and illegality of keeping such information from the most senior Air Force officials, it would also be illogical, since these officials are responsible for obtaining funding for operations, research, development, and security. Without funding, such a program, operation, or organization could not exist. Even to keep such a fact "covered-up" in some sort of passive "caretaker status" would involve money. More importantly, it would involve people and create paperwork.

The aforementioned March 1, 1994, SAF/AA tasking generated negative responses (Atchs 6–12) from all recipients; i.e., all offices reported that they had no information that would explain the incident. Consequently, these negative responses led to an increase in the already ongoing historical research at records centers and archives.

The extensive archival and records center search was systematically carried out by the SAF/AAZD Declassification Review Team. This team is composed entirely of Air Force Reserve personnel who have extensive training and experience in large scale review of records. (Previous efforts include the Southeast Asia Declassification Review, declassification of POW/MIA records, and the review of the Gulf War Air Power Survey records.) The team members all had the requisite security clearances for classified information and had the authority of the Secretary of the Air Force to declassify any classified record they found that might be related to Roswell. SAF/AAZD conducted reviews at a number of locations, including the National Archives in Washington, DC; the National Personnel Records Center, St. Louis, MO; the National Archives, Suitland MD; the National Records Center, Suitland, MD; Naval Research Laboratory, Washington, DC; Federal Records Center, Ft Worth, TX; the INSCOM Archives, Fort Meade, MD; National Air and Space Museum, Washington, DC; Air Force Historical Research Agency, Maxwell AFB, AL; Center for Air Force History, Bolling AFB, DC; Phillips Laboratory, Hanscom AFB, MA and Kirtland AFB, NM; Rome Laboratory, Griffiss AFB, NY; and the Library of Congress, Washington, DC.

A listing of the specific record areas searched is appended as Atch 13. The areas included all those subject areas logically believed to possibly contain any reference to activities at Roswell Army Air Field during the period of time in question. It is anticipated that detractors from this effort will complain that "they did not search record group *x*, box *y*, or reel *z*, etc.; that's where the real records are!" Such complaints are unavoidable and there is no possible way that the millions of records under Air Force control could be searched page by page. The team endeavored to make logical searches in those places where records would likely be found. They were assisted in this task by archivists, historians, and records management specialists, including experienced persons who have continually worked in Army and Air Force records systems since 1943. The team also searched some record areas that were recommended by serious private researchers such as Robert Todd, who had independently obtained almost encyclopedic knowledge of the complexities of Air Force records systems

As to what these witnesses saw, it is difficult to determine. It was not any known aircraft. The enormous size of the object, its complete silence, and its ability to travel at high rates of speed and to also remain stationary or travel at slow speeds, is not explained by any known aircraft. The smallest size calculated from witness descriptions was 524 feet and most of the calculations based on approximate distance of the object and witness descriptions of degrees of sky covered by the object indicated an object closer to 1,000 feet in size. Twice, radar picked up an unknown object flying at 1,900-2,100 mph. Admittedly, it could have been a coincidental radar hit…but in both cases that coincidence occurred when a witness saw a very fast moving object in the same direction as an object painted by radar. Twice, radar tracked slow moving objects, for extended periods of time, that were very near the witness' location, in the direction described by the witness, and at approximately the same time that the witness saw the unknown object. It is very difficult to dismiss witness testimony that is corroborated by radar. And to further augment the strangeness of these events, radar tracked one of those two objects for over an hour as it traveled directly toward Crawford Ranch. The authors cannot comment on the source or origin of this object, but it is clear to the authors that the unknown object was real and not imaginary.

@RealTBaggins @smenor @WalkerBragman @HermanObeat Older age groups are underrepresented. The article says that in plain English. Also, there are such things as statistical anomalies in small sample sizes. Which number is larger? 330M or 78K?

@RealTBaggins @smenor @WalkerBragman @HermanObeat I already the explained the problems with that sampling. It's small. Are you claiming it's an accurate representation of the entire population? The article doesn't.

I have received lots of requests from people who told me to make a lot of wild guesses. I have based what I have written here in this article on positive facts and as far as guessing what it was I observed, it is just as much a mystery to me as it is to the rest of the world.

My pilot's license is 333497. I fly a Callair airplane; it is a three-place single engine land ship that is designed and manufactured at Afton, Wyoming as an extremely high performance, high altitude airplane that was made for mountain work. The national certificate of my plane is 33365.

@BLIP88336529 @MickWest Proof? Hahaha, we're looking for the best evidence. They claim? There are credible witnesses who were watching the scopes, photos/video of the scopes, actual radar reports, documented references to radar in official reports.

http://pbs.twimg.com/media/E1WGDGoWUAUOwqc.jpg

Jean-Jacques Velasco presented information on radar cases drawn in part from the files of GEPAN/SEPRA. He pointed out that one catalog of aircraft cases (Weinstein, 1997), now under development at GEPAN/SEPRA with 489 cases in all, contains 101 (21 percent) radar-visual cases (cases that involve both radar detection and visual observation), and the files of the U.S. Air Force Blue Book project contain 363 aircraft cases of which 76 (also 21 percent) are radar-visual cases. Since 1945, reports of aeronautical cases have been collected by order of the French air force chief of staff. From 1977 on, information from civil and military observations made in French airspace have been sent to GEPAN/SEPRA. It should be noted that civil radar information refers only to objects containing a transponder, whereas military radar equipment can detect any object greater than two square meters in radar-equivalent surface area. From 1982 on, twelve French aeronautical cases were reported to GEPAN/SEPRA. Of these, only three or four cases may be considered to be radar-visual cases of the UFO type.

MEMORANDUM FOR DISTRIBUTION

SUBJECT: Evaluation of the DoD's Actions Regarding the Unidentified Aerial Phenomena (Project No. D2021-DEV0SN-0116.000)

We plan to begin the subject evaluation in May 2021. The objective of this evaluation is to determine the extent to which the DoD has taken actions regarding Unidentified Aerial Phenomena (UAP). We may revise the objective as the evaluation proceeds, and we will consider suggestions from management for additional or revised objectives.

We will perform the evaluation at the Offices of the Secretary of Defense, Military Services, Combatant Commands, Combat Support Agencies, Defense Agencies, and the Military Criminal Investigative Organizations. We may identify additional locations during the evaluation.

Please provide us with a point of contact for the evaluation within **5 days** of the date of this memorandum. The point of contact should be a Government employee or Military Service Member—a GS-15, pay band equivalent, or the military equivalent. Send the contact's name, title, grade/pay band, phone number, and e-mail address to [redacted]

You can obtain information about the Department of Defense Office of Inspector General from DoD Directive 5106.01, "Inspector General of the Department of Defense (IG DoD)," April 20, 2012, as amended; and DoD Instruction 7050.03, "Office of the Inspector General of the Department of Defense Access to Records and Information," March 22, 2013. @PopnCaps551 @foiaboi @alejandrotrojas @ExploreSCU So why would you just accept that? On the report's release, if it proved inadequate, you can always shift focus back to Congress.

Did you know SOD Austin was on the board at Raytheon when 1st NYT story came out?

https://twitter.com/_/status/1388199582555848705

@alejandrotrojas @ExploreSCU Simple math. Even a few thousand contacts spread over 535 is diluted plus the ball is in DOD's court until report is done. A few thousand to one addressee, Lloyd Austin for example, has more impact.

@alejandrotrojas @ExploreSCU It is. People should be able to get involved however they choose. My issue with the SCU letter, and the BigPhoneHome, is the effort is misdirected. Congress did their job. The pressure should be on DOD/Intel structure.

@RealTBaggins @smenor @WalkerBragman @HermanObeat Your data underrepresents the most at risk age group. What part of that don't you understand? Death by age includes

EVERYBODY and is objective. It's not like insomnia, mild or severe . . .

App reporting . . . because elderly people are all over using apps! Again, they're going to be underrepresented. I do accept long Covid is a thing though.

@WalkerBragman @HermanObeat Yes. Your chances of surviving if you're vaxxed/boosted and 65+ are roughly the same as if you're unvaxxed and 50-64. So they buy you roughly an age demographic if you're elderly.

@TheLastSisyphus @SilvaRecord It follows a pattern that's been going on for 3 years now: nothing ever seems to come out clean. I'm used to it now, the MSM doesn't care about these details. UFO buffs can go nuts though.

@SilvaRecord Hopefully the photo doesn't overshadow some really interesting bits McMillan was able to turn up. Might have been more prudent to take a nice victory lap on Story 1 and post the "balloon?" pic story 2 next week or so. Either way, it's out now and it's unsurprisingly muddy.

@VPrasadMDMPH FWIW, as to the value of the shots, your chances of surviving if you're vaxxed/boosted and 65+ are roughly the same as if you're unvaxxed and 50-64. So they buy you roughly an age demographic if you're elderly.

@UFOS8N @buffcommacu @foiaboi There are public studies of odd fragments obtained. Most check out as normal, some are more curious. Has there been an ET UFO crash since Roswell? Maybe. Kingman, Aztec, Kecksburg (I think that one is Earthly but could be wrong). Crashes can't possibly be that common or can they?

@foiaboi @UFOS8N It's out there but it's old material, like from the 40s relating to Roswell and studies from Sturrock and Vallee/Nolan. Breaking news orgs aren't good at history and most UFO types research by proclamation. A lot of it is circumstantial but what if it's true? I think it might be.

@Jayoung1969 @GrantCameron In a strictly aviation context, UFOs can absolutely be a threat. So are birds and weather. Beyond that, show me the evidence.

http://pbs.twimg.com/media/Eeb2BFKXsAIMBS-.png

Environmental Threats	Organisational Threats
Weather: thunderstorms, turbulence, icing, wind shear, cross/tailwind, very low/high temperatures.	**Operational pressure:** delays, late arrivals, equipment changes.
ATC: traffic congestion, TCAS RA/TA, ATC command, ATC error, ATC language difficulty, ATC non-standard phraseology, ATC runway change, ATIS communication, units of measurement (QFE/meters).	**Aircraft:** aircraft malfunction, automation event/anomaly, MEL/CDL.
Airport: contaminated/short runway; contaminated taxiway, lack of/confusing/faded signage/markings, birds, aids U/S, complex surface navigation procedures, airport constructions.	**Cabin:** flight attendant error, cabin event distraction, interruption, cabin door security.
Terrain: High ground, slope, lack of references, "black hole".	**Maintenance:** maintenance event/error.
Other: similar call-signs.	**Ground:** ground handling event, de-icing, ground crew error.
	Dispatch: dispatch paperwork event/error.
	Documentation: manual error, chart error.
	Other: crew scheduling event

MEMORANDUM FOR THE SECRETARY OF DEPENSE

Dear Secretary Forrestal:

As per our recent conversation on this matter, you are hereby authorized to proceed with all due speed and caution upon your undertaking. Hereafter this matter shall be referred to only as Operation Majestic Twelve.

It continues to be my feeling that any future considerations relative to the ultimate disposition of this matter should rest solely with the Office of the President following appropriate discussions with yourself, Dr. Bush and the Director of Central Intelligence.

US seizes advanced Russian military system in Libya

by Tom Rogan | June 19, 2020 08:57 AM

In early June, U.S. military personnel secured an advanced Russian combat system in Libya.

The exact identity of the platform, now extracted out of Libya and subject to U.S. technical analysis, is unknown to me. But I am led to believe it is either the Krasukha-4 electronic warfare system or the S-350 medium-range air defense system. Both reflect higher-end Russian military capabilities, primarily designed to defeat NATO air operations. Such systems have taken on added value in Libya of late due to the success of Turkish drones in targeting older Russian air defense systems such as the Pantsir, which the U.S. military has already had analytical access to.

This U.S. success, under the authority of the Defense Intelligence Agency's foreign military exploitation program, is a significant one.

What do we know?

Well, speaking on the condition of anonymity, two current defense intelligence officials and one former official said that the military now has a highly advanced Russian military system under its control. It was secured from the control of a Russian military intelligence contractor, Wagner Group, which is supporting Khalifa Haftar's campaign to seize control of Libya away from the Government of National Accord, which is supported by the United Nations, the United States, and the European Union. Wagner Group, which operates under the authority of Russia's GRU military intelligence service, recently received Russian military fighter jets to support its operations.

That said, there is no evidence that the system was secured by the use of U.S. combat action. I reached out to numerous government agencies but received no request to avoid publication or omit details. Officials offered no comment on the specifics of this story but did not deny them.

Behind the scenes, however, U.S. officials are celebrating a significant win.

After all, Russian air defense and electronic warfare systems are the crown jewels of Russian President Vladimir Putin's military power. Indeed, Russian electronic warfare systems supersede U.S. capabilities in some areas. Reflecting as much, Russian military planning against NATO is focused around rapid territorial seizure followed by the establishing of strongholds protected by these advanced systems. The NATO concern is that, in the event of conflict, Russia would secure these strongholds, then seek to divide NATO member states by offering a favorable-to-Moscow ceasefire or continued conflict. To counter this strategy, the U.S., British, and French air forces train extensively to destroy these strongholds.

@dave_beaty @PodcastUFO It's hazy. We know anomalous debris studies have taken place, we know there is foreign tech acquisition. Focus on what's known, then at least some speculation is based on something tangible. We know a lot about Roswell.

@mikeb8637 Don't know about that in this context. Lack of oversight could lead to all sorts of illegalities, overcharging or charging for things not done at all. That would be illegal. USAPs not inherently illegal though as McGwier said.

@buffcommacu @UfoJoe11 @alejandrotrojas @BobMcGwier_N4HY Don't know the date. I don't know what the issue is. The find in the newsletter is what it is. It actually confirms one small fact in the "notes": AFIO-LV was brand new that month but leaves Wilson's being in LV open.

https://twitter.com/_/status/1279841312137773058
@UfoJoe11 @buffcommacu @alejandrotrojas @BobMcGwier_N4HY There's more than enough evidence to be highly skeptical of all this.

https://twitter.com/_/status/1279838740966510596
@UfoJoe11 @buffcommacu @alejandrotrojas @BobMcGwier_N4HY I used the word proof because if it had been documented Wilson appeared at Oct 02 AFIO mtg, that would have proved he was in LV in Oct 02. This is not complicated.

@UfoJoe11 Need for clarification:

"I knew him when he was DIA head and I did work for them as an associate of the Institute for Defense Analyses (IDA), which is how I came to know him. I think it was 2004 or 2005."

Wilson head of DIA 5-99/7-02, then retired. Worked for ATK in MN in 04-05

https://twitter.com/_/status/1279638016814964736
@buffcommacu @UfoJoe11 @alejandrotrojas Sure, Davis is an AFIO member. My point with bringing all that out was there's no proof there. If ATW had appeared there, newsletter would have had it. Would have made things more interesting. But chapter was new that month, that's a fact docs get right.

@buffcommacu @UfoJoe11 AFIO-LV's first chapter meeting was, in fact, Oct 02. That part of the doc checks out. The way I read notes, Rich/Doug, as part of NNSA, set up trip but also involved

in AFIO. I see that could be read either way. Murgia goes off, attacks Rojas for no good reason.

EWD NOTES

10/16/02

Eric Davis Meeting with Adm. Wilson

Rich says to go to EG&G Special Projects building at Grier and Paradise. "Meet at 10 A.M. – don't be late!!"

TW: Came to test site special area to wrap up projects (he began in '98) – successor can't be bothered with right now for lack of time and knowledge. Did tour/audit/say goodbye to folks. Trip set up by NNSA (National Nuclear Security Agency) – Rich & Doug – you (EWD) know them – AFIO members – told about how new Las Vegas chapter needed guest speakers for chapter/public venue – raise money/membership, etc. Rich/Doug talked about you (EWD!) - phoned from DC – sent me copies of your NASA papers and other related – wormholes your thing. Sent PACAF orders, US ID, Lockheed slides, some reports I wrote for NASA.

https://twitter.com/_/status/1278991637742575629

UFOs - Documenting The Evidence

Don't Just Believe Me, But Do Look At The Evidence. By Paul Dean. Contact: pj_dean@hotmail.com

The Fake 1961 "Special National Intelligence Estimate", and a $1000 Offer To Prove It Genuine...

"The mention of certain government agencies, which didn't even exist in 1961, is far worse. The Joint Research and Development Board (JDRB) went out of existence in 1948-1949, and was replaced by the Research and Development Board (RDB), which was then abolished in 1953. We see the Joint Nuclear Energy Intelligence Committee (JNEIC) named, yet it was replaced by the Joint Atomic Energy Intelligence Committee (JAEIC) in 1948. In fact both are named, but only the JAEIC existed in 1961 when the document was allegedly authored. The hoaxers should have made up their minds and settled only on the JAEIC. The listing of the CIA's Deputy Director for Operations (DD/O) is impossible. It didn't exist until 1973. In 1961, when this dubious SNIE was supposedly created, the future DD/O was called the Deputy Director for Plans (DD/P). Just as bad is the mention of the CIA's Foreign Broadcast Information Service (FBIS). It didn't exist in 1961 either. It was the Foreign Broadcast Information Division (FBID) back then, and it was only in 1965 that the FBID transitioned to the FBIS. Ooops. The Los Alamos National Laboratory (LANL) is mentioned, but in 1961 it was the Los Alamos Scientific Laboratory (LASL). It wasn't until 1981 that LASL became LANL. Having said that, some LASL staffers, ostensibly, used the term "Los Alamos National Laboratory" or "LANL" on select formal LASL documents. One researcher, who would prefer not to be named, has seen such records. Still, the use of an incorrect, if otherwise internally grasped, term in such an important document seems unlikely. Whatever the situation, the impossible organisational red flags I've highlighted are more than enough to warrant extreme suspicion, if not outright scorn. Finally, the document mentions the hoax "MJTWELVE" group, and we all know where that leads. No more discussion on that affair is worth anyone's time, especially mine."

Critical Aspects of Unidentified Flying Objects and the Nuclear Threat to the Defense of the United States and Allies

In the current political and military situation in which the United States finds itself in the Cold War effort against the USSR, there is the remote possibility within current understanding of the verifiable UFO phenomena that early warning defense systems could err in the identification of unidentified aircraft and missiles. This probability is estimated to fall within a 20% margin for error and could pose possible early attack warnings to be issued within the 30 minute decision window before a DEFCON 2 alert goes into affect. We concur that 2 per cent of UFO cases studied have caused electrical interference with airborne early detection equipment and have caused a confusion and identification factor which could be attributed to enemy ECM. We believe Soviet capabilities in this area are of such sophistication that it is possible that simulated UFO detection could be regarded as an actual attack. We also believe the Soviets have calculated that U.S. ECM capabilities are on a level similar to theirs and are at parody.

Kono: Planning will begin for SDF response to UFO encounter

Defense Minister Taro Kono reviews the Self-Defense Forces after the March graduation ceremony at the National Defense Academy. (Pool)

"Kono made the comment at a news conference on April 28 after the U.S. Defense Department declassified and released videos shot by Navy pilots pointing to the possibility that UFOs exist.

"We would like to establish procedures in the event an encounter is made with a UFO," Kono said.

He indicated his ministry and the SDF would begin preparing for such an event.

While Kono said the SDF had not yet encountered a UFO, he added, "If video can be taken (of a UFO encounter) and if a report is possible, then a report will be made. Discussions will be held with the Air SDF about just what can be done."

He said ministry officials will ask their Pentagon counterparts about the release of the videos as well as any analysis they had conducted."

This is a very detailed denial from Wilson. Among other things, he specifically claims to have never been to Las Vegas since 1979. It's a point I've been making since the beginning: If you can't provide evidence Wilson was in Las Vegas on October 16, 2002, these notes are fake.

There are many reasons the notes are disinfo that even Wilson wouldn't have picked up on unless he was a UFO nut. We went over them in multiple shows:

National Institute for Discovery Science

May 13, 1996

EDGAR MITCHELL, Ph.D.
5968 Western Way
Lake Worth, Florida 33463

Dear Dr. Mitchell:

Since a lot has happened in the past few weeks, I thought I would take this opportunity to give you a brief update and provide information about the next meeting. You will remember that it is scheduled for the evening of May 31st and the entire day of Saturday, June 1st. As usual, we would appreciate it if you make your travel reservations as soon as possible. Again, the travel agency number is (800) 433-6988.

At the upcoming meeting I will discuss some organizational changes that are occurring on the consciousness side of NIDS. To support our research I have facilitated a change in direction for the Consciousness Research Laboratory (CRL) and directed them to concentrate on survival of consciousness issues. The CRL status in UNLV provides an important adjunct to our research capabilities. It ensures both an extensive oversight by the university through the Human Use Review Board and provides the legal umbrella of the State of Nevada for sensitive research projects. Currently we are working out the details, but this move will make the relationship between CRL and NIDS more congruent.

To balance our presentations, at this meeting our speakers will focus on aspects of consciousness on Saturday afternoon. Based on Jack Schmitt's comments, we are starting from what is definitely known. One of your members, Jim Whinnery, has agreed to address his research on loss of consciousness which encompasses more than twenty years of intense investigation. He will be followed by Melvin Morse, a medical doctor who has written several books about near-death experiences. He has been asked to specifically address the issues relating to neurophysiology and NDE's, a topic he has written about in his books.

https://twitter.com/_/status/1265107654436966402

@Deepneuron @KeithBasterfie1 @mikeb8637 Since Green confirmed the AA email chain was essentially true, Davis might have violated some NDA w/Bigelow by letting that fall into someone else's hands. That's all I can see.

Our review of our records and systems reveal that ONI has no releasable records related to your request. ONI has searched our records for responsive documents. We have discovered certain briefing slides that are classified TOP SECRET. A review of these materials indicates that are currently and appropriate Marked and Classified TOP SECRET under Executive Order 13526, and the Original Classification Authority has determined that the release of these materials would cause exceptionally grave damage to the National Security of the United States. Specifically, under Section 1.4, the materials would trigger protections under subcategory c), the Intelligence Activities of the United States, as well as the Sources and Methods that are being used to gather information in support of the National Security of the United States. In addition, the materials would trigger protections under subcategory e), Scientific and Technological Matters related to the National Security of the United States. For this reason, the materials are exempt from release under the (b) (1) Exemption for Classified Matters of National Defense. As a result these records may not be released and are being withheld.

Dear Colleagues:

The Secretary of Health, Rachel Levine, M.D., conveyed the following information to caucus leaders today:

Sadly, 3,106 of our citizens have died due to Covid-19. The average age of those that have passed away is 79 years old.

To date, of these 3,106 deaths, 2,108 of these persons lived in nursing homes, personal care homes and assisted living residences. That means 67.9% those who have died lived in these types of settings.

Of the 3,106 persons who have died, 11.9% had 4 comorbidities, 22.7% had 3 comorbidities, 27.2% had 2 comorbidities, 22.6% had 1 comorbidity and 11% had zero comorbidities. While these percentages only add up to 95.4%, these were the statistics that were provided to us verbally.

Of the 3,106 persons who died, 61% had hypertension, 54% had heart disease, 37% had diabetes and 30% had chronic pulmonary disease.

According to the Hospital and Health System Association of Pennsylvania (HAP), citing Pennsylvania Department of Health statistics, there are 37,000 beds in Pennsylvania hospitals. As of today, 2,572 of these beds were occupied by Covid-19 patients, which amounts to 6.95%.

There are only 539 patients in the hospitals on ventilators, which amounts to 1.46% of all hospital beds.

Very truly yours,

RT @Akam1129: Very important Tom Delonge answer

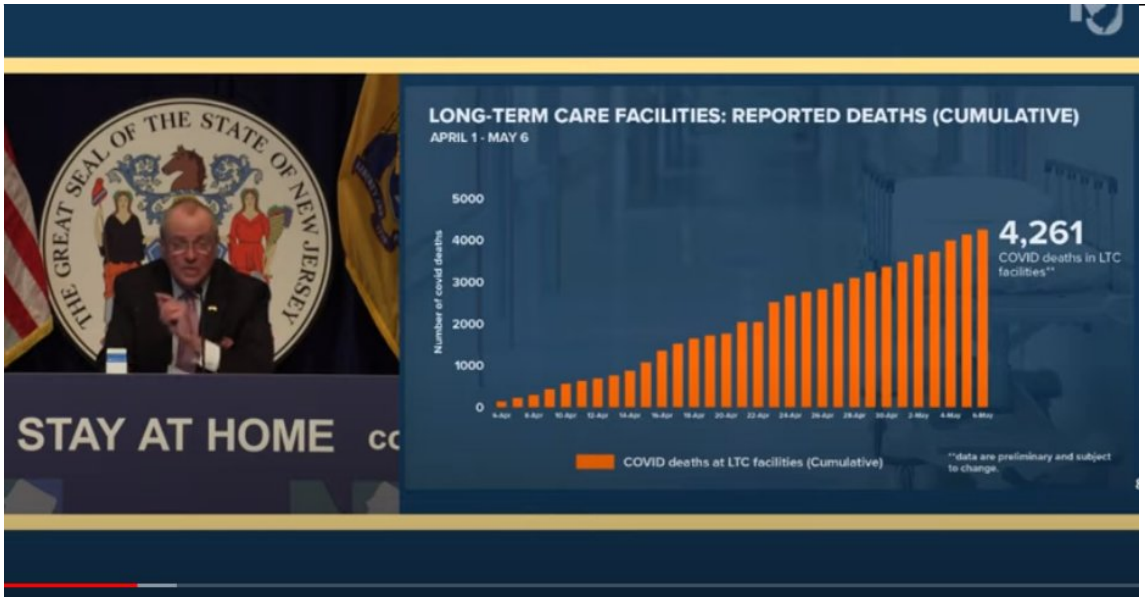

Are people realizing what is going on, now?
http://pbs.twimg.com/media/EXcHGlDXgAM4Ua9.png

Do you know why the Pentagon chose to do this now?

Tom DeLonge

I think To the Stars Academy made all the noise. We've been working tirelessly to get all the senators and congressman briefed. We've been connecting the people that are still running the program to other players in the government to make sure the info is getting passed around. We've been giving advice on national security policy on how they can create a system to be accountable for all the reporting and basically have all the data flow up to the proper think tanks. And you have a situation where [people in] the government aren't allowed to lie about this stuff. They aren't allowed to go out and just act like none of this is real. Now that the cat is out of the bag, what you're seeing is a process that took a little bit of time. Obviously the Department of Defense is massively busy, but what you're seeing is them having meetings and saying, "What are we going to do? Are we going to try to act like this isn't real? I'm not going to be the guy that goes out there and lies. I'm not going to be thee guy that says something that's not true and be the one that has to get hauled before Congress and be deposed on CNN live."

to listen to the experiences of **Master Sergeant Michael Salazar**, a Special Operations Professional involved in covert actions, humanitarian relief, para-rescues, the Gulf War and Afghanistan, and author of three books. A new slate of officers was elected, headed by Chapter President John Hilliard.

The **AFIO Florida Suncoast Chapter**, another active chapter, met on 8 October, with a panel discussion the Cuban Missile Crisis, featuring **Bob Sumner**, past President, as well as representatives from TV Channel 13/Fox News, and the Florida International Museum. This is excellent example of the AFIO public education outreach mission.

The active **AFIO Miami-Dade Chapter** [in Coral Gables, FL] hosted numerous luncheons over past months. In July the Chapter hosted Federal Judge and former naval aviator **A. Jay Cristol** in a talk about his book *The Liberty Incident* - on the attack of a U.S. warship by the Israelis - which many *USS Liberty* members claim was deliberate, and which Cristol purported was a tragic error.

In November, **AFIO's Palm Beach Chapter** hosted **Mr. Guy Lewis**, U.S. Attorney for the Southern District of Florida, U.S. Department of Justice. Lewis spoke on INS activities in the Southern District, illegal immigration through the ports of Miami and Ft. Lauderdale, and the effects of these issues on the terrorist threat to Florida and the rest of our nation.

The **AFIO New Mexico Chapter**, as part of its active year-around monthly program, met on 25 September and, after the pledge of allegiance and the invocation, to listen to the experiences of **Master Sergeant Michael Salazar**, a Special Operations Professional involved in covert actions, humanitarian relief, para-rescues, the Gulf War and Afghanistan, and author of three books. A new slate of officers was elected, headed by Chapter President John Hilliard.

The **AFIO New Mexico Chapter**, as part of its active year-around monthly program, met on 25 September and, after the pledge of allegiance and the invocation, national intelligence and state and local police elements faces some exceptional obstacles.

On 23 October, at the **AFIO NewMexico Chapter**, **AFIO National President Gene Poteat** traveled to Albuquerque and spoke on 'Intelligence problems Before and After 9/11,' getting an excellent response from the Chapter as well as afterward in interviews at the local radio station and the University of New Mexico. The Chapter also has hosted **Professor Jim Holden-Rhodes** of the U.N.M., and supports his program of intelligence studies.

The **AFIO New England Chapter**, as part of its program of quarterly meetings, met on 25 October at the Nonantum Resort in Kennebunkport, Maine. **MGEN (ret) Ed Thompson** spoke on the US "Remote Viewing" program. Other presentations were made by authors **Fred Jerome** and **James Bamford**. Some 60 individuals attended, including 15 from the local community, thanks to press releases in newspapers and a local radio station, and representation by local journalists.

Congressman Rob Simmons was recruited to be the referee for the 2002 AFIO/NE Ransburg Foundation scholarship program, with the winner to receive a $500 stipend from Chapter and Foundation resources, an example of an innovative Chapter use of the Ransburg Foundation program.

in Moscow during the last five years of the cold war. There also was a post-luncheon speaker was a local senior FBI official discussing post-9/11 activities and the recent Bureau reorganization

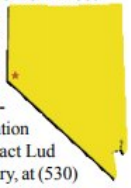

In September, The **AFIO Midwest Chapter** (MWAFIO) hosted its annual Current Intelligence Symposium at the Great Lakes Naval Training Center, Great Lakes, IL

In October the **AFIO Northern Ohio Chapter** held elections for 2003 Officers and voted to adopt Chapter Bylaws while at the US Coast Guard Officers Club in Cleveland. In November they held their Annual Holiday Party at Bratenahl Place Penthouse, Bratenahl, Ohio.

In September in Silver Springs, Nevada, **AFIO's NEW North Sierra Chapter** held their kick-off meeting and BBQ at Don Mitchell's ranch, East of Reno. Their special guest—**Gene Poteat, AFIO National President**. For further information to join this chapter, contact Lud Spolyar, Chapter Secretary, at (530) 581-4212 or lud@spolyar.com.

@An_Oracle @DaveSFoley @realDonaldTrump @POTUS @WHO Pretty vague:

How about:

1. shut down all international travel March 4 (date of New Rochelle outbreak)
2. Shut down mass transit for a week to 10 days to get bearings (never addressed by fed or state)
3. Strongly recommend masks (not done until APRIL 13!!!!)

from H.R. 8367, Intelligence Authorization Act for Fiscal Year 2023, as approved July 20, 2022, by House Permanent Select Committee on Intelligence

552 of title 5, United States Code (commonly known as the "Freedom of Information Act" or "FOIA")), and such other relevant historical sources as the Comptroller General considers appropriate; and

(2) for the period beginning on January 1, 1947, and ending on the date on which the Comptroller General completes activities under this subsection, compile and itemize a complete historical record of the intelligence community's involvement with unidentified aerospace-undersea phenomena, including successful or unsuccessful efforts to identify and track unidentified aerospace-undersea phenomena, efforts to recover or transfer related technologies to United States-based industry or National Laboratories, and any intelligence community efforts to obfuscate, manipulate public opinion, hide, or otherwise provide unclassified or classified misinformation about unidentified aerospace-undersea phenomena or related activities, based on the review conducted under paragraph (1).

(b) REPORT.—

(1) IN GENERAL.—Not later than 180 days after the date on which the Comptroller General completes the compilation and itemization required by subsection (a)(2), the Comptroller General shall

@carolynporco "About one in every three users of mass transit in the United States and two-thirds of the nation's rail riders live in New York and its suburbs."

No place in the US will spike as badly as NYC area has because of this.

@dasingleton @NiekBuurmaH2O @PeterGleick I don't think predicting 4-5K US deaths is flowers

https://twitter.com/_/status/1243254058208636929

@dasingleton @NiekBuurmaH2O @PeterGleick It was 4-5000 and I stand by that. Maybe you should have thought about hushing yourself before spreading fear with your predictions. I called you on it and you backed off. Let's not forget that.

@NiekBuurmaH2O @dasingleton @PeterGleick Trump cut off travel to China January 31. The state governors have control over business shutdowns etc. Some have been better than others. FLA and LA were slow. Cuomo was slow in NY initially, now he's dealing with a catastrophe. Others have overreacted.

https://twitter.com/_/status/1243248941673648128

@NiekBuurmaH2O @dasingleton @PeterGleick I'm mentioning mass transit because no one else seems to be and it is the prime spreader. How did the virus get from China to the US. Did it swim?

2020-03-26T18:43:32+00:00

https://twitter.com/_/status/1243247229533593600

@NiekBuurmaH2O @dasingleton @PeterGleick Have you ever lived or worked in Manhattan? Hahahahahaha! Mass transit, through commercial flights and cruise ships, is how this disease has spread round the world. Your nlind spots are showing.

https://twitter.com/_/status/1243246498114088966

@NiekBuurmaH2O @dasingleton @PeterGleick A confinement strategy with no emphasis on mass transit which works in favor of the pessimistic view. You see I'm looking at everything, upside/downside the unpredictability of human action. You're just looking at numbers.

https://twitter.com/_/status/1243243341439012864

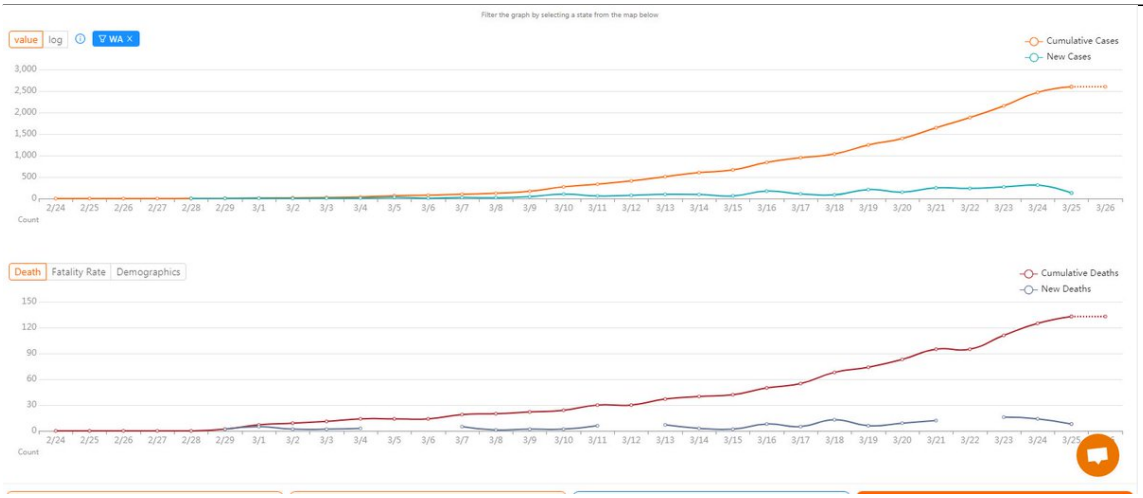

@NiekBuurmaH2O @dasingleton @PeterGleick What you don't seem to understand is that these statistics are based on something with all sorts of variables involved namely human actions. Where would we be if Cuomo had shut down mass transit at the first sign of trouble in New Rochelle on March 4? Better off or worse off?

2020-03-26T18:17:10+00:00

https://twitter.com/_/status/1243240592433446917

@dasingleton @NiekBuurmaH2O @PeterGleick No straw man argument here, just facts: The

numbers from Washington state, location of the first and for a while most deadly outbreak. No other metro area will match the problem in NYC, even weighted by pop, because no other metro area is as dependent on mass transit.

@dasingleton @NiekBuurmaH2O @PeterGleick So you're going back to your original prediction for April 3: 1000 death per day by then continuing off into the future?

2020-03-26T17:47:04+00:00
https://twitter.com/_/status/1243233020330598400
@NiekBuurmaH2O @dasingleton @PeterGleick Not on your numbers. Hahahahaha. There are all sorts of variables that are in play due to human action, some good, some bad.

2020-03-26T17:44:25+00:00
https://twitter.com/_/status/1243232352379248641
@NiekBuurmaH2O @dasingleton @PeterGleick The do have mayhem in NYC. There's a reason for that. Mass transit wasn't shut down and people didn't start wearing masks. You can't social distance on a crowded train car or bus. You pretty well have to take it to get into Manhattan.

2020-03-26T17:41:23+00:00
https://twitter.com/_/status/1243231588541923330
@NiekBuurmaH2O @dasingleton @PeterGleick The reservoir of healthy people riding mass transit without wearing surgical masks and still able to fall ill is still sufficiently large that exponential growth can continue for quite a bit longer.

I fixed that for you.

@NiekBuurmaH2O @dasingleton @PeterGleick Get back to me April 3 before telling me I don't understand something. If we were truly dealing with exponential growth curves, on what date will humanity be rendered extinct?

2020-03-26T17:09:06+00:00

https://twitter.com/_/status/1243223466121330700

@NiekBuurmaH2O @dasingleton @PeterGleick Let's also not forget Prof. Singleton's original prediction was 1000+ per day starting April 3 and continuing indefinitely. I think at this point, that will clearly not happen.

2020-03-26T16:59:01+00:00

https://twitter.com/_/status/1243220924754788352

@NiekBuurmaH2O @dasingleton @PeterGleick Pretty sure. I did underestimate the NYC problem because I underestimated the impact of intense mass transit usage there. FLA and LA also acted slow and they seem to be paying. We do need to change the culture and wear surgical masks while riding mass transit.

@SethBerenzweig @McLaughlinGroup We need a change in the culture. Mass transit is the biggest spreader. NY didn't get that many cases by people working or going to bars. The transit system getting them to work is the problem. People need to mask up to ride planes, trains and buses . . . and get back to work.

@UFO_Researcher @BobMcGwier_N4HY We're not seeing that now because cases are jumping, especially in New York. People kept taking mass transit and flying without protecting themselves properly. That's my guess as to the primary cause of spread there.

RT @devgru1980mi: Read about Wurtsmith AFB overflights of 1975 .

http://pbs.twimg.com/media/ERJcv4rWkAANAma.jpg

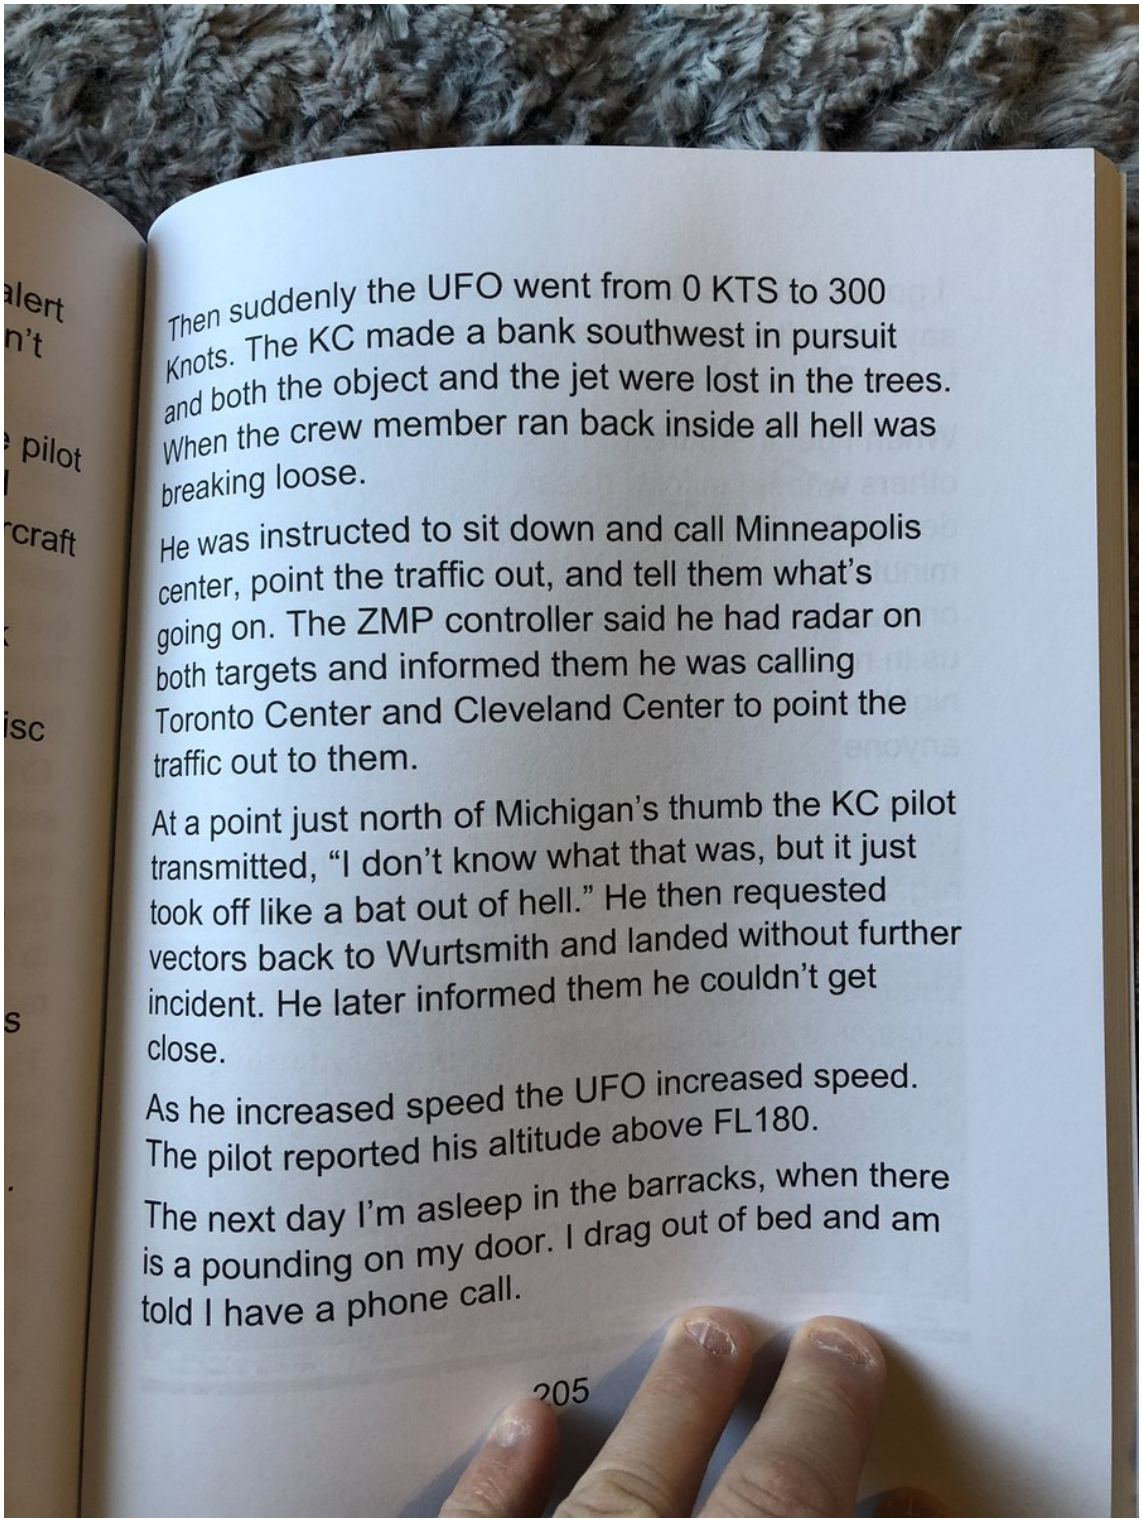

I know this might sound crazy, but I would estimate that the UFO sped away from us doing approximately 1,000 knots. We continued in the direction of the Bay until RAPCON-radar, called us again and said they were painting a UFO four to five miles over the coast traveling in a westerly direction.

They vectored us to this position of the UFO and we proceeded but at point we were low on fuel and were forced to return to Wurtsmith. I remember the while on file approach we saw the lights again near the Weapons Storage Area.

Following the mission we discussed the incident and about a week later, Captain Higgenbotham was questioned by OSI and cautioned not to discuss the incident."

http://pbs.twimg.com/media/ERJcv4rWkAANAma.jpg

Then suddenly the UFO went from 0 KTS to 300 Knots. The KC made a bank southwest in pursuit and both the object and the jet were lost in the trees. When the crew member ran back inside all hell was breaking loose.

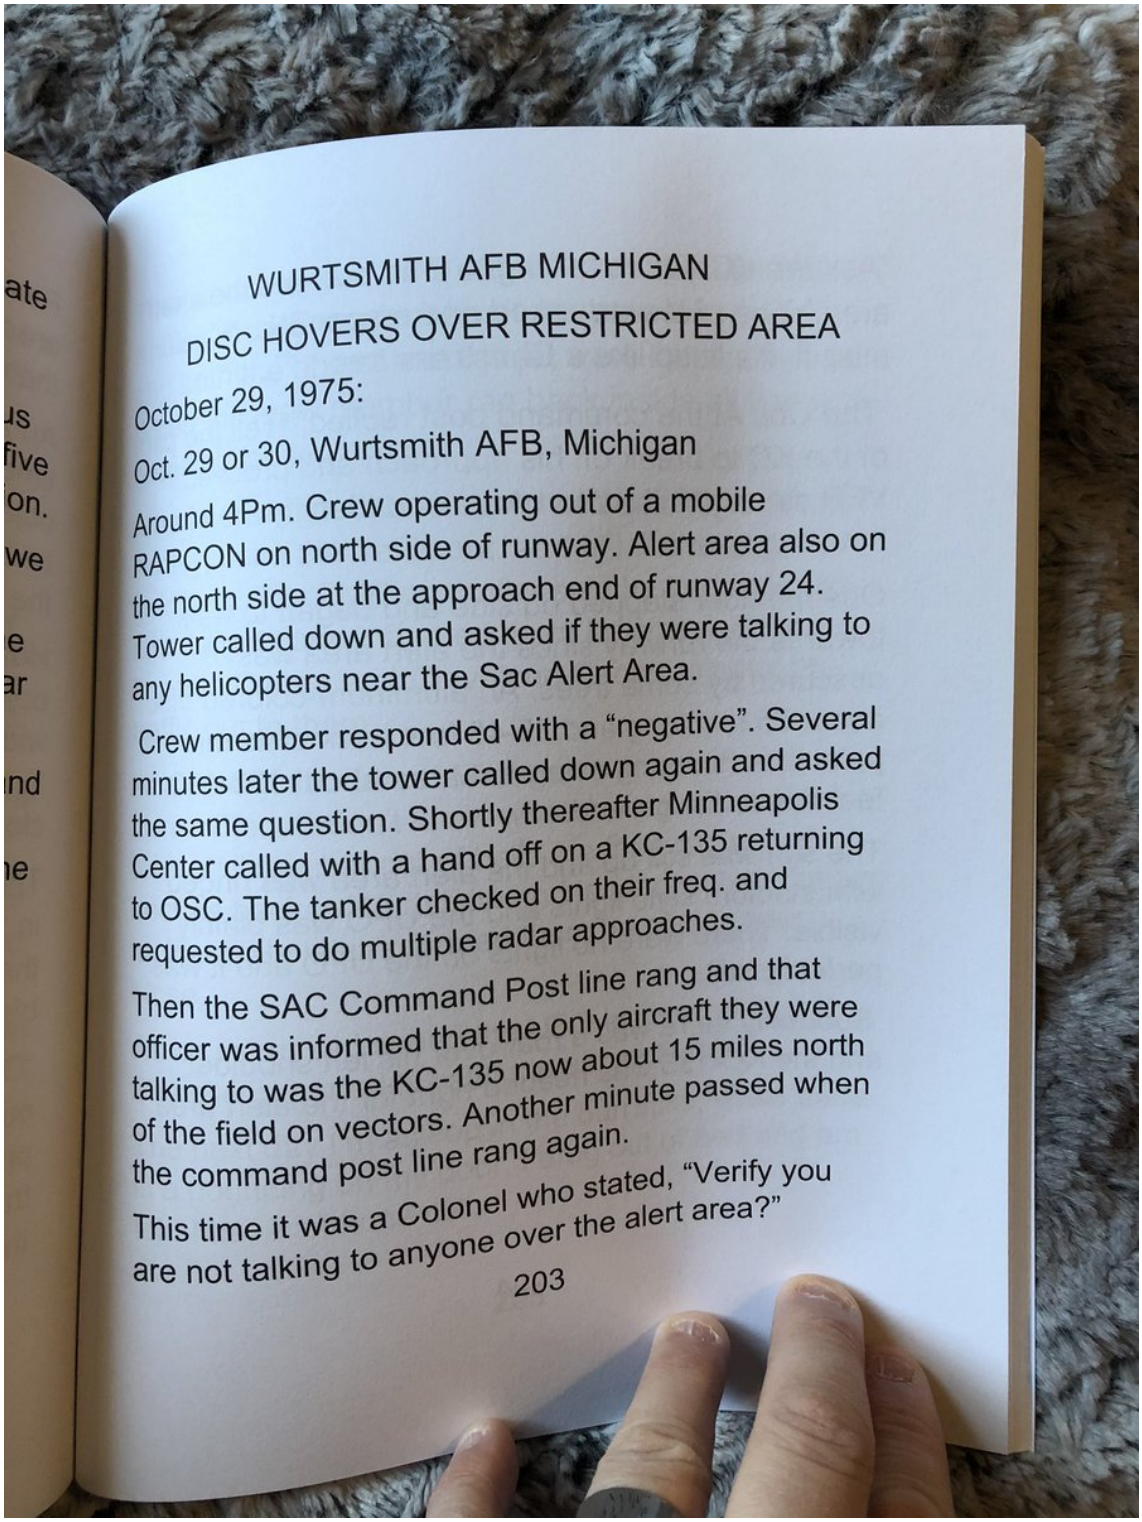

He was instructed to sit down and call Minneapolis center, point the traffic out, and tell them what's going on. The ZMP controller said he had radar on both targets and informed them he was calling Toronto Center and Cleveland Center to point the traffic out to them.

At a point just north of Michigan's thumb the KC pilot transmitted, "I don't know what that was, but it just took off like a bat out of hell." He then requested vectors back to Wurtsmith and landed without further incident. He later informed them he couldn't get close.

As he increased speed the UFO increased speed. The pilot reported his altitude above FL180.

The next day I'm asleep in the barracks, when there is a pounding on my door. I drag out of bed and am told I have a phone call.

WURTSMITH AFB MICHIGAN

DISC HOVERS OVER RESTRICTED AREA

October 29, 1975:

Oct. 29 or 30, Wurtsmith AFB, Michigan

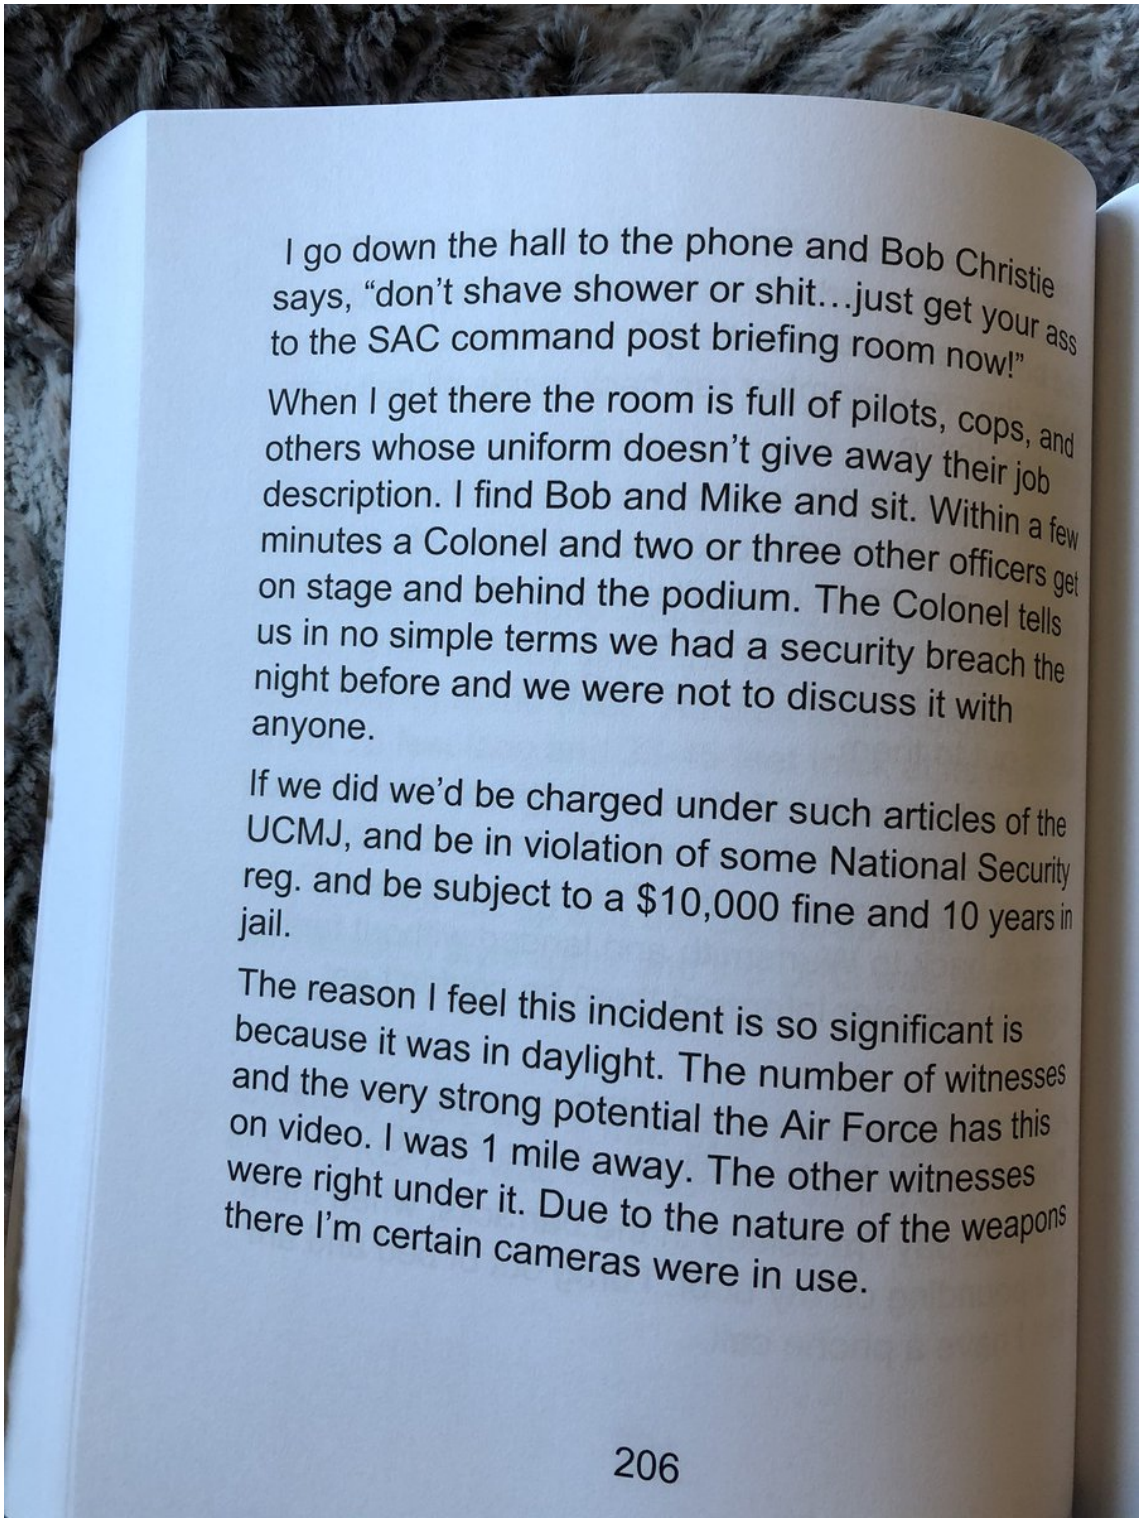

Around 4Pm. Crew operating out of a mobile RAPCON on north side of runway. Alert area also on the north side at the approach end of runway 24. Tower called down and asked if they were talking to any helicopters near the Sac Alert Area.

Crew member responded with a “negative”. Several minutes later the tower called down again and asked the same question. Shortly thereafter Minneapolis Center called with a hand off on a KC-135 returning to OSC. The tanker checked on their freq. and requested to do multiple radar approaches.

Then the SAC Command Post line rang and that officer was informed that the only aircraft they were talking to was the KC-135 now about 15 miles north of the field on vectors. Another minute passed when the command post line rang again.

This time it was a Colonel who stated, “Verify you are not talking to anyone over the alert area?”

http://pbs.twimg.com/media/ERJcv1-WsAEDEmm.jpg

I go down the hall to the phone and Bob Christie says, “don’t shave shower or shit…just get your ass to the SAC command post briefing room now!”

When I get there the room is full of pilots, cops, and others whose uniform doesn’t give away their job description. I find Bob and Mike and sit. Within a few minutes a Colonel and two or three other officers get on stage and behind the podium. The Colonel tells us in no simple terms we had a security breach the night before and we were not to discuss it with anyone.

If we did we’d be charged under such articles of the UCMJ, and be in violation of some National Security reg. and be subject to a $10,000 fine and 10 years in jail.

The reason I feel this incident is so significant is because it was in daylight. The number of witnesses and the very strong potential the Air Force has this on video. I was 1 mile away. The other witnesses were right under it. Due to the nature of the weapons there I’m certain cameras were in use.

Round oblong shape color milky-white then dull green then bright red. No trail - no exhaust. Moved up and to the right then faded. Initial observation at 05 dgr elevation 250 dgr azimuth.

11. COMMENTS

Possible balloon sighting. Disappearance by fading tends to rule out refraction of setting astro body since this type of phenomena disappears with more sudden rising. Insufficient data for evaluation.

WURTSMITH AFB DOCUMENTS

(UFREF-J REPORT

FROM: AF/XOOCOA

LOG SUP # 1-G

EVENT:
dentified Helicopter Intrusion

TION:
Wurtsmith AFB, MI

DATE/TIME OF EVENT:
30/2255E Oct 1975

TIME REPORTED TO AFOC:
30/2327E Oct 1975

SAC (Lt Col Giordano) reports that an unidentified helicopter with no lights came up over the back gate of Wurtsmith and hovered over the Weapons Storage Area and then moved on. RAPCON had it painted for a short period. A tanker at 2700 feet had visual and skin paint out over Lake Huron for about 20 miles heading SE. Tanker reports he thinks he saw a second skin paint. The tanker lost all contact about 35 miles SE of the base over the lake. Tanker is still flying trying to locate by means of telephonic search with FAA and RAPCON. Increased security initiated at Wurtsmith.

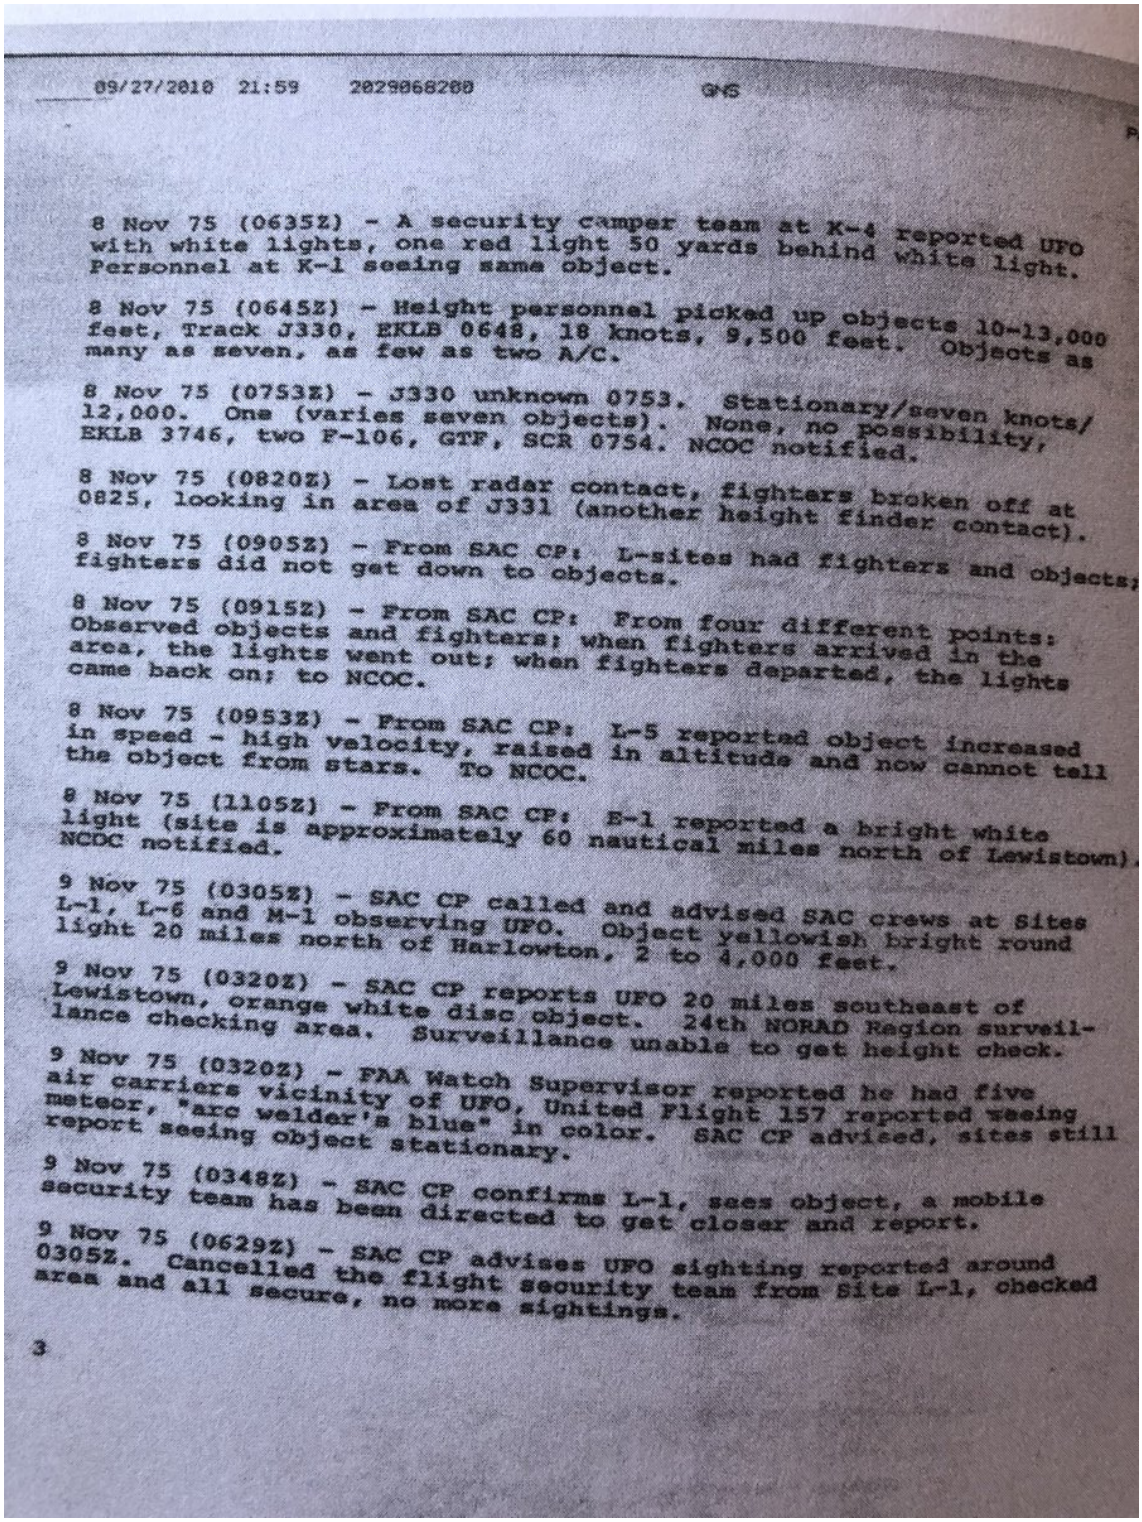

31/0030E Update: Lt Col Giordano (SAC Senior Controller) updates and corrects the above information as follows: An unidentified low flying aircraft came up over the back gate of Wurtsmith and was visually sighted in the vicinity of the motor pool. RAPCON showed several aircraft at the time, one near the WSA (there was no hovering as previously reported). A tanker was dispatched and had visual and skin paint out over Lake Huron of a low flying aircraft (with lights on) heading SE at approximately 150 knots. Tanker reports that the aircraft appeared to be joined by another aircraft (with its lights on also). Tanker reports that both aircraft then turned out their lights simultaneously, as if on signal. Tanker lost all contact approximately 35 NM SE of the base. Upon information that the Dept of Natural Resources sends out aircraft searching for hunters spotting dear, the Dept of Natural Resources was contacted; however, they maintain none of their aircraft were in the area at the time.

@JasonColavito @PopMech @LtTimMcMillan @HISTORY Correct but now you're shifting the goal post. Are all those past connections the key or is it that Hearst owns POPMech and A&E? There are a lot of dodgy professional connections in the world. Does every news story mention every one or fail?

@UFO_Researcher @UfoJoe11 @TTSAcademy There is certainly an "inside team." That was explicitly shown in Ep 6 of Unidentified. I don't think they are representative of the entire gov't but they are there.

@SilvaRecord @Deepneuron @tomdelonge You can follow HIPAA laws simply by non-identifying the EMR effects injured part if you have data regarding their injuries. Any injuries that came out via Cash-Landrum wouldn't apply as details came out in open court. They sued for $20M.

@junglist1973 Word I received is the French passed. If you watched the final Unidentified show, you saw TDL/LE asking for data but not willing to give anything up in return. That's about why that happened. Heard that before the show aired.

@UFO_Researcher @hughespj1 @PostDisclosure That all sounds about right. From the USAF Roswell report:

"If any of the information discovered was under security classification, it was to be declassified, and if active or
former Air Force officials had been sworn to a secrecy oath, they were to be freed from it."

@UFO_Researcher @hughespj1 @PostDisclosure I've heard Grant Cameron say that but I think that's a little bit of an oversimplification. The stealth aircraft were classified for a long time, finally revealed but that wouldn't declassify every aspect about them. John Andrews was a believer BTW.

Steven M. Greer, M.D.
International Director
Center for the Study of Extraterrestrial Intelligence
P.O. Box 265
Crozet, Virginia 22932

Dear Dr. Greer:

It has just come to the attention of the four of us that you have, without giving any of us the opportunity to comment, published a distorted account of a dinner party of some six years ago at which the four of us, you, and your wife were seated together.

In the Introduction to your book, Extraterrestrial Contact, published earlier this year you portray this dinner party conversation during which the four of us listened to your views and politely asked questions as a "briefing" with a "cover story." You further assert that Mr. and Mrs. Woolsey reported a UFO sighting to you and agreed with your views. You include specific alleged quotations from them.

None of this is accurate. You have portrayed politeness as acquiescence and questions as affirmations. Your conduct in this matter contravenes both accuracy and simple manners.

Sincerely,

John L. Petersen Diane C. Petersen R. James Woolsey Suzanne H. Woolsey

@UFO_Researcher @SilvaRecord @UfoJoe11 @GalaxyReport @Reddit_r_UFO I think the speed estimate of around 500 mph is likely correct. Just because a jet is capable of topping out at Mach 2 + doesn't mean it ramps up to full speed every time it's in the air. There are restrictions regarding breaking the sound barrier.

INSTITUTE FOR ADVANCED STUDIES AT AUSTIN

Memorandum

To: Linda Moulton Howe

From: Hal Puthoff

Date: 24 September 2012

Re: Bi/Mg Sample

First, I share your disappointment that the Bi/Mg sample did not yield an interesting /anomalous outcome in the tests involving the application of various fields. They were carried out under very controlled circumstances, however, so I trust the results.

As I indicated in earlier communications, however, there remains yet one additional test that really needs to be done (and which I recommend) that could in principle still provide a significant result, but which, unfortunately, we could not carry out with the instrumentation available to us. This relates to the observation that Bi channels of the size seen in the sample, layered between Mg layers of the size also seen in the sample, closely match (as given in the physics literature) a waveguide structure that permits sub-wavelength THz (terahertz) signals to propagate freely through the waveguide even though sub-wavelength in size - a quite unique property of these specific materials and their dimensional structure due to an unusual negative refractive index characteristic over a particular, well-defined, frequency range. The wavelength range is 53 – 63 microns, which corresponds to a frequency range of 4.76 – 5.66 THz (terahertz) or 4760 – 5660 GHz (gigahertz), a very high frequency that takes special equipment to reach.

Meanwhile, I am returning everything by FEDEX, and, yes, I do have the hard eyecase case to protect the sample(s).

Best regards,

H. E. Puthoff

@_PeteLomas http://pbs.twimg.com/media/EO3IQ_SWkAALBXM.jpg

The NICAP man on the scene, Ray Stanford of Phoenix, picked up a rock in one of the indentations that looked as if it had metallic particles, possibly scraped off the landing-gear footpad. I happened to be in Washington when Mr. Stanford arrived at the NICAP office with the rock. We examined the sample then took it to a prominent government center for analysis. The miniscule size of the particles made proper testing difficult, but eventually the "scrapings" were identified as of granitic origin. After studying the particles myself under magnification at the laboratory, I must admit I did not have much hope that anything convincing would be revealed by the tests.

Hynek was also puzzled by the lack of thrust disturbance at the landing site: "It's been bothering me that Mr. Zamora didn't see a great cloud of dust like this would have kicked up." (A conventional chemical rocket engine would have dug out a sizeable crater and a large quantity of dust.

Jean-Jacques Velasco presented information on radar cases drawn in part from the files of GEPAN/SEPRA. He pointed out that one catalog of aircraft cases (Weinstein, 1997), now under development at GEPAN/SEPRA with 489 cases in all, contains 101 (21 percent) radar-visual cases (cases that involve both radar detection and visual observation), and the files of the U.S. Air Force Blue Book project contain 363 aircraft cases of which 76 (also 21 percent) are radar-visual cases. Since 1945, reports of aeronautical cases have been collected by order of the French air force chief of staff. From 1977 on, information from civil and military observations made in French airspace have been sent to GEPAN/SEPRA. It should be noted that civil radar information refers only to objects containing a transponder, whereas military radar equipment can detect any object greater than two square meters in radar-equivalent surface area. From 1982 on, twelve French aeronautical cases were reported to GEPAN/SEPRA. Of these, only three or four cases may be considered to be radar-visual cases of the UFO type.

@PostDisclosure @GarryPNolan @mikeb8637 @LtTimMcMillan @JazzShaw @dOd Of course not and we never will, likely because the UFO phenomenon doesn't constitute any such thing. We've got 3/4 of a century of data built up on UFO/high end military aircraft encounters. Where's the existential threat?

@PostDisclosure @GarryPNolan @mikeb8637 @LtTimMcMillan @JazzShaw @dOd Of course not, because it's typical DOD nonsense but so was LE's "existential threat" claim in his quit letter.

@PostDisclosure @GarryPNolan @mikeb8637 @LtTimMcMillan @JazzShaw @dOd They've said "existential threat" (LE) and "exceptionally grave damage to the National Security of the United States" (DOD). That's a little different than potential threat. It's also preposterous.

OFFICE OF THE UNDER SECRETARY OF DEFENSE
5000 DEFENSE PENTAGON
WASHINGTON, DC 20301-5000

INTELLIGENCE

MEMORANDUM FOR: RECORD

SUBJECT: Letter of Resignation & Differed Retirement

Mr. Secretary;

It has been my sincere honor and pleasure to have served with some of America's finest men and women in both peace time and in war. For over 22 years, I have been blessed to learn from, and work with world-class leadership, you certainly being among the very best.

With that in mind, bureaucratic challenges and inflexible mindsets continue to plague the Department at all levels. This is particularly true regarding the controversial topic of anomalous aerospace threats. Despite overwhelming evidence at both the unclassified and classified levels, certain individuals in the Department remain staunchly opposed to further research on what could be a tactical threat to our pilots, sailors, and soldiers, and perhaps even an existential threat to our national security. In many instances, there seems to be a direct correlation the phenomena exhibits with respect to our nuclear and military capabilities. The Department must take serious the many accounts by the Navy and other Services of unusual aerial systems interfering with military weapon platforms and displaying beyond next generation capabilities. Underestimating or ignoring these potential threats is not in the best interest of the Department no matter the level of political contention. There remains a vital need to ascertain capability and intent of these phenomena for the benefit of the armed forces and the nation.

For this reason, effective 4 October 2017, I humbly submit my resignation in hopes it will encourage you to ask the hard questions: "who else knows?", what are their capabilities?", and "why aren't we spending more time and effort on the issue?". As I transition to a new chapter of my life, please know it has been an honor and privilege of a lifetime to serve with you. Rest assure, no matter where the path of life may lead me, I will always have the best interest of the Department and the American people as my guiding principle.

2020-01-11T23:57:59+00:00

https://twitter.com/_/status/1216147272616030214

@TheLastSisyphus @MattMelv @UfoJoe11 Sporadically over a long period of time. Now the frequency question is key to me. Elizondo has given conflicting responses to the question. At SCU, he didn't know, during UN'IDed show said it's a "sensitive number."

2020-01-11T23:45:22+00:00

https://twitter.com/_/status/1216144096563204097

@TheLastSisyphus @MattMelv @UfoJoe11 It's not a question of trusting the Pentagon. Do you trust the military witnesses? Consistently they have said never saw anything like this before,

never heard about anything like this after the incident. In service for years and it was an anomalous event. It's not UFOs 24/7.

2020-01-11T23:38:23+00:00

https://twitter.com/_/status/1216142340236115968

@TheLastSisyphus @MattMelv @UfoJoe11 Because there is a decades long track record of behavior. The UFO phenomenon is sporadic. Cases come up from time to time that are compelling but that's not enough to get top DOD officials to lose sleep at night and neither should you.

2020-01-11T23:24:46+00:00

https://twitter.com/_/status/1216138913254907909

@TheLastSisyphus @MattMelv @UfoJoe11 Fakse? It's 100% accurate. Yes, over decades a number of military people have been interested in the subject because they found it interesting not threatening. Elizondo has openly stated he left gov't because he couldn't get his superiors to care. How do you explain his comments?

2020-01-11T23:18:36+00:00

https://twitter.com/_/status/1216137363019137024

@TheLastSisyphus @MattMelv @UfoJoe11 It's a claim that is far out of line from anything we've ever heard from the military on the subject of UFOs.

"Nothing of substance considered credible or threatening to the country was ever received from intelligence."

@TheLastSisyphus @MattMelv @UfoJoe11 And it's a mistake to conflate a well known but narrowly defined aviation threat with an existential threat. Feel free to provide some evidence, from 75 years worth of cases, that UFOs represent an existential threat to the US.

@TheLastSisyphus @MattMelv @UfoJoe11 Birds and weather are considered a threat to aviation too. There are threats and there are threats. The implication from TTSA has been UFOs are an existential threat to the US.

Dr. Jung Says 'Saucers' Exist; Bars Psychological Explanations

Requests Air Force Publish 'Authentic' Account of Facts —Cites 14-Year Study

ALAMOGORDO, N. M., July 29 (AP)—One of the world's most eminent psychologists reports that unidentified flying objects are not quirks of imagination.

Dr. Carl Jung, who studied under Sigmund Freud, said that if they came from other planets they could bring an enforced peace—and universal panic— to the world.

Dr. Jung, 83, now lives in Zurich, Switzerland. He evolved the theory of the psychological complex—an explanation of abnormal behavior. He wrote his speculations on "Unidentified Flying Objects" in the monthly bulletin of the Aerial Phenomena Research Organization, a private organization with headquarters here.

"I can only say for certain

PROF. DR. C. G. JUNG

KÜSNACHT-ZÜRICH
SEESTRASSE 228

December 12th 1957

Gilbert G. Harrison, Esq.

THE NEW REPUBLIC
1244 19th Street
NW Washington 6, D.C.

Dear Mr. Harrison,
the problem of the Ufos is, as you rightly say, a very fascinating one, but it is as puzzling as it is fascinating; since, in spite of all observations I know of, there is no certainty about their very nature. On the other side there is an overwhelming material pointing to their legendary or mythological aspect. As a matter of fact the psychological aspect is so impressive, that one almost must regret that the Ufos seem to be real after all. I have followed up the literature as much as possible and it looks to me as if something were seen and even confirmed by Radar, but nobody knows exactly what is seen. ~~and~~ In consideration of the psychological aspect of the phenomenon I have written a booklet about it, which is soon to appear. It is also in the process of being translated into English. Unfortunately being occupied with other tasks I am unable to meet your proposition. Being rather old, I have to economise my energies.

Very sincerely yours

C. G. Jung

Washington, D.C. 20036

John L. Petersen
Suite 204
1501 Lee Highway
Arlington, Virginia 22209

September 16, 1999

Steven M. Greer, M.D.
International Director
Center for the Study of Extraterrestrial Intelligence
P.O. Box 265
Crozet, Virginia 22932

Dear Dr. Greer:

It has just come to the attention of the four of us that you have, without giving any of us the opportunity to comment, published a distorted account of a dinner party of some six years ago at which the four of us, you, and your wife were seated together.

In the Introduction to your book, Extraterrestrial Contact, published earlier this year you portray this dinner party conversation during which the four of us listened to your views and politely asked questions as a "briefing" with a "cover story." You further assert that Mr. and Mrs. Woolsey reported a UFO sighting to you and agreed with your views. You include specific alleged quotations from them.

None of this is accurate. You have portrayed politeness as acquiescence and questions as affirmations. Your conduct in this matter contravenes both accuracy and simple manners.

Sincerely,

John L. Petersen Diane C. Petersen R. James Woolsey Suzanne H. Woolsey

@PostDisclosure Plus the remote sensing evidence like radar.

http://pbs.twimg.com/media/EANu_AxX4AArnDJ.jpg

Jean-Jacques Velasco presented information on radar cases drawn in part from the files of GEPAN/SEPRA. He pointed out that one catalog of aircraft cases (Weinstein, 1997), now under development at GEPAN/SEPRA with 489 cases in all, contains 101 (21 percent) radar-visual cases (cases that involve both radar detection and visual observation), and the files of the U.S. Air Force Blue Book project contain 363 aircraft cases of which 76 (also 21 percent) are radar-visual cases. Since 1945, reports of aeronautical cases have been collected by order of the French air force chief of staff. From 1977 on, information from civil and military observations made in French airspace have been sent to GEPAN/SEPRA. It should be noted that civil radar information refers only to objects containing a transponder, whereas military radar equipment can detect any object greater than two square meters in radar-equivalent surface area. From 1982 on, twelve French aeronautical cases were reported to GEPAN/SEPRA. Of these, only three or four cases may be considered to be radar-visual cases of the UFO type.

@CHANTHANNAH1 @WORLDUFOGROUP Follow Hynek's advice. It's very good.

http://pbs.twimg.com/media/EALo1VmXUAAZMMU.jpg

Later in the same paper, Dr. Hynek said: "We do have a great richness in material to study. Let us turn our present embarrassment of these riches to good use. We can do this by not wallowing around in a welter of cases of all sorts, unable to do justice to any, but by being very selective in choosing just what cases or aspects of the problem to study. It does no good merely to read about and talk about the whole spectrum of UFO cases." He went on to recommend that UFO researchers specialize in some aspect of the field or some unique cases to develop an impressive amount of material and to have that material published for others to use.

2019-06-10T03:49:47+00:00

https://twitter.com/_/status/1137929829838413825

@DboardUfor @theyre_heeeere @UfoJoe11 @BryanDBender @mesolithicguy Someone who knew the earlier Wilson/Mitchell/Greer exchange could have concocted the Davis/Wilson conversation. There's every reason to be cautious. Further checking into it also reveals it is at least, if fake, well researched. You're too busy attacking, not researching.

2019-06-10T03:23:04+00:00

https://twitter.com/_/status/1137923106729840640

@DboardUfor @theyre_heeeere @UfoJoe11 @BryanDBender @mesolithicguy Of course it's a red flag because that specific has been used before in known AFOSI disinfo. It also doesn't mean the docs are fake, it is a red flag, that is all. It is a reason to be cautious about knee jerk believing these docs are legit.

2019-06-10T03:18:13+00:00

https://twitter.com/_/status/1137921884794867713

@DboardUfor @theyre_heeeere @UfoJoe11 @BryanDBender @mesolithicguy Yes, a portion that consists of AFOSI disinfo. Do you believe that ET met with the USAF on April 24, 1964 at Holloman AFB? Do you believe everything?

@DboardUfor @theyre_heeeere @UfoJoe11 @BryanDBender @mesolithicguy If you review the history of AFOSI disinfo, you'll see these docs are filled with it. I predicted some before they even came out.

@UfoJoe11 @OmniTalkRadio @Reddit_r_UFO @logicalconclusn @CaptSpacePirate @DboardUfor @TTSAcademy The faux attempt by Serpo fiction writers to tie the April 24, 1964 Socorro case to the alleged Holloman AFB ET/USAF meetup.
http://pbs.twimg.com/media/D8eWqIzXkAEkvlD.jpg

THE LANDING: In December 1963, the Eben's sent a message confirming the time, date and location of their landing. The message stated that two crafts were enroute to Earth and would make the appropriate landing at the pre-arranged location.

(NOTE: During this time period, our government was suffering from the loss of President Kennedy. Some on the project wanted to cancel the exchange because of his death. But President Johnson was briefed and decided to continue the event, although, it was noted, that Johnson didn't really believe it would happen.)

Our Team planned for two locations. One "cover" location on Holloman Air Force Base near Alamogordo, New Mexico and the other, which would be the actual landing location, was west of Holloman near the southern entrance to White Sands Army Post.

The first Eben craft entered our atmosphere during the afternoon of April 24, 1964. the Eben craft landed at the wrong location, near Socorro, New Mexico. Our team was in place at White Sands. We were able to communicate a message to the Eben craft that they landed at the wrong location. The second Eben craft picked up the message and landed at the correct location.

@UfoJoe11 @OmniTalkRadio @Reddit_r_UFO @logicalconclusn @CaptSpacePirate @DboardUfor @TTSAcademy There is at least one serious problem with this doc I found that raises concerns related to Socorro/Holloman AFB. @ThanosAlpha Browne isn't the sharpest knife in the drawer. A bipartisan collection of Congresspeople wants more truth. It will be a fight but, whatever their reasons, and it could be as simple as ego, why shouldn't we support that?

Pilots got Navy to stop dismissing UFO reports

The military fliers have been baffled by observing aircraft with no apparent means of propulsion.

By Deanna Paul
WASHINGTON POST

A recent uptick in sightings of unidentified flying objects — or as the military calls them, "unexplained aerial phenomena" — prompted the U.S. Navy to draft formal procedures for pilots to document encounters, a corrective measure that former officials say is long overdue.

"Since 2014, these intrusions have been happening on a regular basis," Joseph Gradisher, spokesman for the deputy chief of naval operations for information warfare, told the Washington Post on Wednesday. Recently, unidentified aircraft entered military-designated airspace as often as multiple times per month. "We want to get to the bottom of this. We need to determine who's doing it, where it's coming from and what their intent is. We need to work to find ways to prevent it from happening again."

Ensuring safety and security concerns, Gradisher vowed to "investigate each and every report."

Luis Elizondo, a former senior intelligence officer, told the Post that the new Navy guidelines formalized the reporting process, facilitating data-driven analysis while removing the stigma from talking about UFOs, calling it "the single greatest decision the Navy has made in decades."

Chris Mellon, a former deputy assistant secretary of defense for intelligence and a staffer on the Senate Intelligence Committee, was less laudatory.

"I don't believe in safety through ignorance," he said, scolding the intelligence community for its lack of "curiosity and courage" and "failure to react" to a strong pattern of sightings.

In some cases, pilots — many of whom are engineers and academy graduates — say they observed small spherical objects flying in formation. Others say they've seen white, Tic-Tac-shaped vehicles. Aside from drones, all engines rely on burning fuel to generate power, but these vehicles all had no air intake, no wind and no exhaust.

"It's very mysterious, and they still seem to exceed our aircraft in speed," he said, calling it a "truly radical technology."

According to Mellon, awestruck and baffled pilots, concerned that reporting unidentified flying aircraft would harm their careers, tended not to speak up. And when they did, he said there was little interest in investigating their reports.

> **"Imagine you see highly advanced vehicles, they appear on radar systems, they look bizarre, no one knows where they're from. This happens on a recurring basis, and no one does anything."**
>
> Chris Mellon, a former deputy assistant secretary of defense for intelligence and a staffer on the Senate Intelligence Committee

"Imagine you see highly advanced vehicles, they appear on radar systems, they look bizarre, no one knows where they're from. This happens on a recurring basis, and no one does anything," said Mellon, who now works with UFODATA, a private organization. Because agencies don't share this type of information, it's difficult to know the full extent of activity. Still, he estimated that dozens of incidents were witnessed by naval officers in a single year, enough to force the service to address the issue.

"Pilots are upset, and they're trying to help wake up a slumbering system," he told the Post.

Lawmakers' growing curiosity and concern also appeared to coax action out of the Navy.

In 2017, the Pentagon first confirmed the existence of the Advanced Aerospace Threat Identification Program, a government operation launched in 2007 to collect and analyze "anomalous aerospace threats." As the Post's Joby Warrick reported, the investigation ranged from "advanced aircraft fielded by traditional U.S. adversaries to commercial drones to possible alien encounters."

According to former Pentagon officials and documents previously seen by the Post, program funding, which totaled at least $22 million, was suspended in 2012.

Gradisher, the Navy spokesman, said that "in response to requests for information from congressional members and staff, officials have provided a series of briefings by senior Naval Intelligence officials as well as aviators who reported hazards to aviation safety."

Elizondo, who also ran AATIP, said the newly drafted guidelines were a culmination of many things. Most notably: that the Navy had enough credible evidence — including witness accounts and corroborating radar information — to "know this is occurring."

"If I came to you and said, 'There are these things that can fly over our country with impunity, defying the laws of physics, and within moments could deploy a nuclear device at will' — that would be a matter of national security."

With the number of U.S. military people in the Air Force and Navy who described the same observations, the noise level could not be ignored.

"This type of activity is very alarming," Elizondo said, "and people are recognizing there are things in our aerospace that lie beyond our understanding."

@PostDisclosure @TTSA_Agent_001 @FreemanStahl Those rumors proved accurate on the Dec 2017 story so that's a reasonable bet. The weirdest thing going on now is lack of promo on TTSA/History show, so having a MSM news blitz again makes some sense. We will see.

@Deepneuron @GarryPNolan @TTSA_Agent_001 From Upton Sinclair's book Mental Radio.
http://pbs.twimg.com/media/D27LveHX4AAJBoL.jpg

PREFACE

I have read the book of Upton Sinclair with great interest and am convinced that the same deserves the most earnest consideration, not only of the laity, but also of the psychologists by profession. The results of the telepathic experiments carefully and plainly set forth in this book stand surely far beyond those which a nature investigator holds to be thinkable. On the other hand, it is out of the question in the case of so conscientious an observer and writer as Upton Sinclair that he is carrying on a conscious deception of the reading world; his good faith and dependability are not to be doubted. So if somehow the facts here set forth rest not upon telepathy, but upon some unconscious hypnotic influence from person to person, this also would be of high psychological interest. In no case should the psychologically interested circles pass over this book heedlessly.

@StevenM10657487 @UfoJoe11 @TxUFOSightings There's a good bit more than that spread over decades now. I do think the true number is 0.something per day but that's why we should dig down. http://pbs.twimg.com/media/D2N6RQkWoAETmgO.jpg

---

Jean-Jacques Velasco presented information on radar cases drawn in part from the files of GEPAN/SEPRA. He pointed out that one catalog of aircraft cases (Weinstein, 1997), now under development at GEPAN/SEPRA with 489 cases in all, contains 101 (21 percent) radar-visual cases (cases that involve both radar detection and visual observation), and the files of the U.S. Air Force Blue Book project contain 363 aircraft cases of which 76 (also 21 percent) are radar-visual cases. Since 1945, reports of aeronautical cases have been collected by order of the French air force chief of staff. From 1977 on, information from civil and military observations made in French airspace have been sent to GEPAN/SEPRA. It should be noted that civil radar information refers only to objects containing a transponder, whereas military radar equipment can detect any object greater than two square meters in radar-equivalent surface area. From 1982 on, twelve French aeronautical cases were reported to GEPAN/SEPRA. Of these, only three or four cases may be considered to be radar-visual cases of the UFO type.

@StevenM10657487 @UfoJoe11 @TxUFOSightings The issue there is not all UFO sightings are

ET. I would start with a dbase of UFO sighting corroborated by radar, but radar data is tough to come by for obvious reasons.

@UfoJoe11 The Q&A was the best part. The ?s were generally really good and the most important one, IMO, about frequency was asked. LE didn't have an answer, I wouldn't expect that but we need to figure out how to estimate that number reasonably.

@TheUndeadGaucho Roosevelt case is fairly recent. One thing you don't see like you once did is when an entire town gets a bunch of sightings. Happened with some frequency over the years. I can't think of a big one since Stephenville 08. You might find this interesting.

@Acecentric @blackvaultcom That's only because so many researchers either misrepresent key facts about cases or pass along misrepresentations about cases without even a cursory fact check.

@Tomfortas @FullStackLogan @TheProjectUnity @shaunattwood I think there's plenty of private sector opportunism going on. I don't see any of this W/D stuff as being directed from Langley. It came from the usual suspects: Puthoff/Doty. It has their past disinfo woven through it.

@SpacedOutRadio Radar is physical evidence of UFOs.

http://pbs.twimg.com/media/Dz9EWhvW0AIF6HA.jpg

Jean-Jacques Velasco presented information on radar cases drawn in part from the files of GEPAN/SEPRA. He pointed out that one catalog of aircraft cases (Weinstein, 1997), now under development at GEPAN/SEPRA with 489 cases in all, contains 101 (21 percent) radar-visual cases (cases that involve both radar detection and visual observation), and the files of the U.S. Air Force Blue Book project contain 363 aircraft cases of which 76 (also 21 percent) are radar-visual cases. Since 1945, reports of aeronautical cases have been collected by order of the French air force chief of staff. From 1977 on, information from civil and military observations made in French airspace have been sent to GEPAN/SEPRA. It should be noted that civil radar information refers only to objects containing a transponder, whereas military radar equipment can detect any object greater than two square meters in radar-equivalent surface area. From 1982 on, twelve French aeronautical cases were reported to GEPAN/SEPRA. Of these, only three or four cases may be considered to be radar-visual cases of the UFO type.

@UfoJoe11 Thanks. This type of thing is not what I got into this for but it was inevitable. All involved knew it because I asked when I had the chance in January. They knew it was coming too and I have little doubt planned it this way based on how obvious the clues were.

@UfoJoe11 @BlueBookBelieve @Cosmonautica1 @SpiritPundit @Akam1129 @SilvaRecord Firstly, I never speculated so there's that. The value in it is it was inevitable and better to come from someone like me rather than have speculation, including incorrect speculation, continue. That's some pretty good advice right there.

http://pbs.twimg.com/media/Dy2wQ5BWoAA-Vzm.jpg

Later in the same paper, Dr. Hynek said: "We do have a great richness in material to study. Let us turn our present embarrassment of these riches to good use. We can do this by not wallowing around in a welter of cases of all sorts, unable to do justice to any, but by being very selective in choosing just what cases or aspects of the problem to study. It does no good merely to read about and talk about the whole spectrum of UFO cases." He went on to recommend that UFO researchers specialize in some aspect of the field or some unique cases to develop an impressive amount of material and to have that material published for others to use.

SPARTANBURG HERALD-JOURNAL, SPARTANBURG, S. C., SUNDAY, NOVEMBER 27, 1977 — Page A11

Pursuit Of 'Saucers' Changes Scientist's Life

ST. LOUIS (AP) — The pursuit of "flying saucers" can be a difficult thing for a scientist, especially if he becomes convinced he has found what he was looking for.

"It's changed my life completely," said Dr. Harley D. Rutledge, head of the physics department of Southeast Missouri State University in Cape Girardeau and a man, colleagues say, who is not prone to exaggerate.

Rutledge began as a skeptic in 1973 when it was suggested that he investigate a rash of sightings of unidentified flying objects in southeast Missouri. Now, after more than four years of firsthand research and observation, he has reluctantly admitted that he cannot debunk the stories.

The information gathered by Rutledge, including more than 700 photographs, is a result of hundreds of nights spent in the air, in fields and on hillsides, accompanied, always, by other observers and equipment which includes telescopes, cameras and a spectrograph.

At 51, married, with five children, he is laying his reputation and career on the line and saying that there really is something up there that cannot be explained by conventional logic.

"Now I know they are up there. What they are or where they came from, I have no way of knowing. But they are there," he said in a recent interview.

Rutledge himself has made more than 140 sightings, both in broad daylight and at night. At least 25 of those sightings he labels as "incredible."

Three of the most convincing sightings came within two weeks of each other in May of 1973. The first, from the air, involved what he calls "a 45-second metamorphosis" involving 10 balls of light that had no business being where they were, in the air near the small town of Piedmont, Mo.

The second and third sightings, which he believes to be conclusive because he was so close to the objects, were made near Farmington, Mo., about two weeks later. On the night of May 24 Rutledge and several other observers spotted an object with a triangular shaped light pattern passing over them. Rutledge tentatively labeled the object as an airplane, but said that later evidence discounted that possibility.

The next night, he said, he and his colleagues observed a huge object that had nearly passed over them before they spotted it.

"It had four lights, two red and two white," the professor said. "It was close enough that I could see parts of it through my 60-power telescope. It had a metallic skin and I could make out a ribbed pattern in the red lights."

Because of the delicacy of his position, Rutledge said he has been reluctant to talk about the phenomena. Now, he said, he believes he can survive the scoffing he will hear — and he says he believes he has an obligation to tell the public what he knows.

Rutledge's colleagues point out that he is an intense man, but rational and conservative.

"Anything he does has lots of effort put into it," said Dr. Donald Fromsdorf, dean of the College of Sciences at SEMO. "Everything is done professionally, scientifically.

"I have no qualms about his professional integrety or the way he goes about things. But he has taken on a monumental task."

Much of the work has been funded through grants from the university and a special grant from the St. Louis Globe-Democrat.

Rutledge reviews, but will not include in his research data, reports from laymen. He also refuses to be associated wi,h amateur UFO clubs, which he says he has learned are usually run by persons who are seeking no more than cheap thrills or publicity.

"I really didn't ask for the position in which I now find myself," Rutledge said. "But now, if I am to perform a service, I suppose it must be to prepare people for the various possibilities."

The professor emphasizes that he does not know the origin of the objects that he has seen. But he does say that he has documented evidence that they have performed aerial gymnastics that seem far beyond what any known manmade aircraft can do.

"Not only have I seen strange vehicles and lights by both day and night," he said, "but they appear to be intelligently controlled and seem to interact with human beings."

Have the experiences frightened him?

"I don't like the word frightened," he said. "They have made me uneasy. When I returned from Piedmont after the first conclusive sightings, I was in the dumps for about two weeks. But I got a lot of support from the university and from my family and I was finally able to say, 'If this is the worst, well, then we're all in it together.'

"But it has changed my life. I have no social life to speak of because of the time required for the research. But I guess I can't stop now. I feel I must try to make people gain a little better understanding of it."

RICHARD GREENOUGH SAUCERS - 2 22/7/52 S.

Air Force officers at the technical intelligence centre in Dayton, Ohio, where all flying saucer reports are sent for study as part of "Operation Bluebook", said they were "quite intrigued" by these latest reports.

Captain E.J.Ruppeld, in charge of the centre there, also admitted that reports are coming in faster this year than at any time since the saucers were first reported in 1947. He said they are coming in at the rate of about 100 a month.

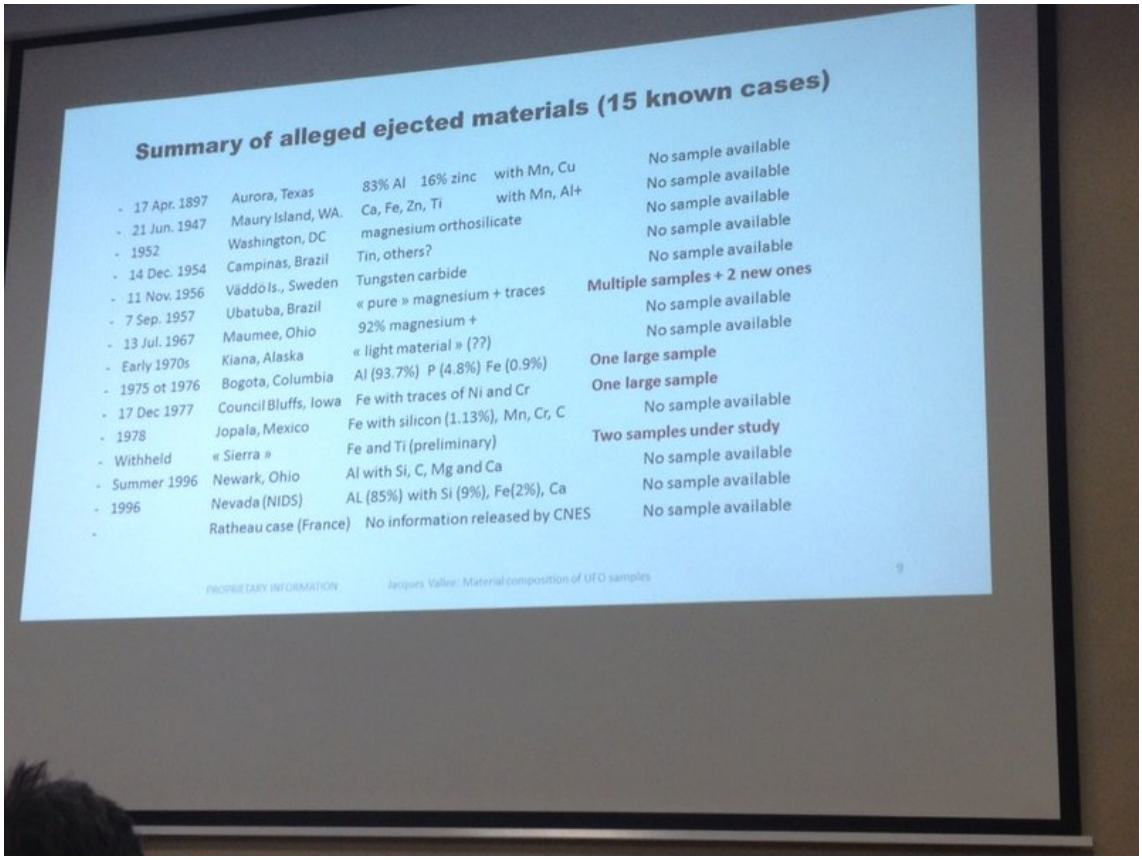

The objects in the night sky near the nation's capital were seen by radarscope operators at WashingtonAirport, by two airline pilots flying in the vicinity at the time, and by a newspaperman on the ground.

After the radar operators had picked up the objects at around midnight on Saturday and asked planes in the air if they could see anything, two pilots soon reported seeing objects near Washington in the direction of Virginia and West Virginia.

Captain S.C. "Casey" Pierman, a veteran airline pilot for 17 years, radioed that he had spotted them moving rapidly up and down at tremendous vertical speeds and hovering. Later another commercial pilot flying 4,000ft. above Washington reported the same thing.

Memorandum for Mr. Ladd

[redacted] also discussed this matter with [redacted] of MID. [redacted] indicated that it was his attitude that inasmuch as it has been established that the flying disks are not the result of any Army or Navy experiments, the matter is of interest to the FBI. He stated that he was of the opinion that the Bureau, if at all possible, should accede to General Schulgen's request. b7C

SWR:AJB

ADDENDUM

I would recommend that we advise the Army that the Bureau does not believe it should go into these investigations, it being noted that a great bulk of those alleged discs reported found have been pranks. It is not believed that the Bureau would accomplish anything by going into these investigations.

DML

I think we should do this
7-15

I would do it but before agreeing to it we must insist upon full access to discs recovered. For instance in the Roswell case the Army grabbed it & would not let us have it for cursory examination.

ENQUIRER EXCLUSIVE: His Ex-Wife Reveals . . .

Jackie Gleason actually saw space aliens and believes he lived before as a swashbuckling English duke, reveals his ex-wife Beverly, who was married to the comic from 1970 through 1974. These are just two of the sensational revelations from a book she's writing that shows "The Great One" — or Jack as she calls him — as he's never been seen before. Gleason declined repeated attempts by The ENQUIRER to interview him about the book. Here, in a sneak preview of her blockbuster book, Beverly tells about Gleason's incredible encounter with aliens . . . exclusively for ENQUIRER readers.

ENQ. 8/16/83

Jackie Gleason Saw Bodies of Space Aliens at Air Force Base

By BEVERLY GLEASON

Space aliens exist! Ask Jackie Gleason — he's actually seen them.

I'll never forget the night in 1973 my famous husband came home, slumped white-faced in an armchair and spilled out the incredible story to me.

He was late. It was around 11:30 p.m. and I'd been worried. As soon as I heard his key turn in the lock of our golf course home in Inverrary, Fla., I jumped to my feet and asked, "Where have you been?"

His reply stunned me:

"I've been at Homestead Air Force Base — and I've seen the bodies of some aliens from outer space.

President Nixon Arranged for Him To See Them

"It's top secret. Only a few people know. But the President arranged for me to be escorted in there and see them."

I knew that he and President Nixon were buddies, so that didn't surprise me. But the story that followed was incredible.

"No one would tell me the full details, but a spacecraft has obviously crashed near here," said Jack.

"When I arrived at the base, I was given a heavily armed military escort and driven to a building in a remote area.

"We had to pass a guard at the door, then were shown into a large room.

"And there were the aliens, lying on four separate tables.

"They were tiny — only about two feet tall — with small bald heads and disproportionately large ears.

"They must have been dead for some time because they'd been embalmed."

I started to smile. It seemed just too much to believe.

But Jack caught my look and stared at me for a long time, his face haggard.

"It sounds incredible, but I swear it's true," he said. "I'll never forget it . . . ever."

It was something that had a profound effect on him. He had obviously been sworn to secrecy, and perhaps regretted even telling me, his wife, because he would never discuss it with anyone else.

A FIRM BELIEVER In UFOs, Jackie Gleason actually saw the bodies of space aliens, according to his ex-wife Beverly, shown at left with Gleason as they posed happily on their wedding day.

But Jack was a changed man. He read anything he could get his hands on about new UFO sightings around the world.

"You see — there's another one," he'd say, pointing to an article about a sighting.

He was fiercely patriotic and even paid his taxes happily.

But one thing he detested about the government was what he called its cover-up on UFOs.

"They know all about them," he'd say angrily. "So why do they keep denying that they exist and painting people who believe in them as idiots?"

He believed that the government should communicate with them," he'd insist.

And he was triumphant when his own beliefs were bolstered by a backstage meeting with one of the astronauts.

Jack was co-hosting a TV show, and one of the guests this night was one of the early American adventurers in space.

When the show was over, Jack and the astronaut became absorbed in a private discussion about UFOs. And when Jack told the man that he was a believer in UFOs, the astronaut confided to him:

"You're right. They do exist. I've seen one with my own eyes during our mission.

"But we've been sworn to secrecy, and the government will never let the information out to the public."

Jack was thrilled — and furious. He was thrilled to be proved right at last, furious to have his theories about a cover-up confirmed.

And, of course, actually seeing the bodies of those aliens was the final proof.

He's intrigued by anything involving the psychic and the occult. He has thousands of books in his library and many of them deal with supernatural subjects.

There was no doubt in Jack's mind that he had lived before, as a swashbuckling English duke in the days of King Henry VIII.

His life as a 16th-century duke had evidently been just as exciting as his present one. He'd tell me how in his nighttime dreams he rode into battle, dressed in a suit of gleaming armor and mounted on a snow white horse. Of course, he was always victorious!

And through his dreams he would recall how he lived in a huge castle and about all the servants he had and people who owed their allegiance to him.

"I've lived before," Jack told me. "I haven't the

@JasonIn16370144 @SilvaRecord @EngagingThe @JeremyCorbell @g_knapp @devgru1980mi @PostDisclosure @Jay09784691 @PaulJamesDean That's my point really. Knapp has been cautious about what he supports with Lazar, again AFAIK. Turning up the reality of A51 was huge, no doubt about that. I accept Lazar worked there. That doesn't make the rest of his account true.

2018-11-27T04:53:22+00:00

https://twitter.com/_/status/1067280197114826753

@SilvaRecord @JasonIn16370144 @EngagingThe @JeremyCorbell @g_knapp @devgru1980mi @PostDisclosure @Jay09784691 @PaulJamesDean As far as I know, all Knapp has said is that Area 51 came into public view because of Lazar and he did work there. Beyond that, I've not heard him specifically support Lazar on anything. If I missed something, I'd like to be pointed to it.

@SilvaRecord @JasonIn16370144 @EngagingThe @JeremyCorbell @g_knapp @devgru1980mi @PostDisclosure @Jay09784691 @PaulJamesDean It's not confusing if Davis believes Lazar is a faker. His crit of Lazar's involvement with the bookkeeping of the hooker service doesn't seem very relevant to me and the others seem to revolve around the claimed academic credentials which is more reasonable.

RT @OmniTalkRadio: Hynek vs Sagan - March 1977...

http://pbs.twimg.com/media/Dqwn6M1WsAQ23Ld.jpg

EDITORIAL

by Dr. J. Allen Hynek

"The reliable (UFO) cases are uninteresting and the interesting cases are unreliable. Unfortunately, there are no cases that are both reliable and interesting."

So has written my astronomer colleague, Dr. Carl Sagan, in his book, "Other Worlds." Much of course depends on those two words "interesting" and "reliable", but persons who have made a serious study of the UFO problem will testify that there are indeed some UFO reports that are both interesting and reliable, even when those two words are not used lightly.

Support for this statement has come rather unexpectedly from both professional and amateur astronomers. Two independent surveys, one of professional astronomers made by Dr. Sturrock of Stanford

@richgel999 Davis worked with Puthoff at NIDS, for him for years at Earth-Tech. Puthoff was contracted by BAASS for AAWSAP and was on the team at TTSA. The two are joined at the hip. The most recent marginally credible word is Puthoff sent W/D notes to Mitchell.

- They had (program manager talking) a craft – an intact craft they believed could fly (space? air? water? dimensions?)
- Was it from overseas or not?
- Said NO! Could not be – not possible!!
- Why, I asked – where did it come from?
- Program manager said they didn't know where it was from [they had some ideas on this] – it was technology that *was not of this Earth – not made by man – not by human hands*
- Said were trying to understand and exploit technology; their program was going on for years and years with very slow progress
- Agonizingly slow with little or no success – painful lack of collaboration to get help from outside community of experts and facilities to assist effort – must remain isolated and use own facilities and cleared personnel – tough environment to work – about 400-800 (bigot list count) workers varying in number with funding or personnel changes
- Miller questions asked:
  - Roswell – craft/bodies/autopsies
  - Holloman AFB Landing
  - MJ-12 and leaked docs
  - Zamora & Bentwaters, etc.
- They were mum – declined to discuss these
- TW threatened to go to SAPOC to complain, gain access to their program
- They said go ahead and do what you must
- I was angry because they defied my authority to be read-in with good logical reason – wouldn't budge
- Their tone was very testy/terse throughout conversation

EWD: What was outcome?

TW: Meeting broke up and I returned to Washington

EWD: What about Corso?

TW: Greer talked about Corso on April 9th

- Miller showed me the book during two-hour private conversation
- Didn't have time to read it through
- Didn't buy a copy
- Didn't bring Corso up at meeting
- But comparing Corso story to what I learned at meeting is more than enough to believe Corso told truth about seeing "alien" hardware, etc.

EWD: Did you complain to SAPOC?

TW: Yes – called the subgroup members (Senior Review Group members) to a meeting at Pentagon

- Told them what happened at meeting

tothestarsacademy "Today we announce the launch of our flagship research program, The ADAM Research Project, and our partnership with EarthTech International (www.earthtech.org), a pioneering research organization in Austin, Texas, at the forefront of next-generation science and technology.

Project ADAM, an acronym for Acquisition & Data Analysis of Materials, will focus on the collection and scientific evaluation of material samples obtained through reliable reports of advanced aerospace vehicles of unknown origin.

We are overwhelmed by the reception our world-class team has received since the launch of the company and are confident in our ability to be among the leading research teams focused on trying to answer some of the biggest questions of our lifetime.

We have been busy the past few months setting up infrastructure and operations. We have been fortunate to have incredible people reaching out to us from all over the globe to collaborate in our scientific exploration and are committed to a thoughtful, open-minded approach to our endeavor.

None of this would be possible without your continued support for which we are grateful. We look forward to sharing our journey with you." -Tom DeLonge

The Washington DC UFO Incident is one of the most significant cases ever. Sightings from commercial and military pilots were recorded with radar hits, one of which reached 7000 mph. There were multiple events spread out over the last half of July in 1952.

@UfonautRadio @PostDisclosure @UFOShowLive @JeremyCorbell @KikPlenty @TTSAcademy @tomdelonge @g_knapp @GarryPNolan @UAPinfo I've been following the subject for close to a decade and discussion and interest is at a 10 year high due to TTSA. It's a great time to be interested in the field regardless of the specifics of what they're up to and how they're up to it.

PRESIDENT: OK, I guess that is it.

WM CASEY: Thank you, Mr President. I will now turn the briefing over to The Caretaker.

ADVISER #3: Mr President, and Mr Director, I already had this briefing. I can stay or leave. Secretary Weinberger and myself received this a few weeks ago.

SECRETARY WEINBERGER: Mr President, as you know, we have some pending business regarding that Soviet problem in Berlin. I think we might just handle that. ADVISER #3 and I will let you close this meeting to just a few.

PRESIDENT: OK, Casp, I guess you and ADVISER #3 can leave. Thanks for coming.

WM CASEY: OK, Mr President, that certainly narrows the audience. I think this is just right.

PRESIDENT: OK, well, I can't wait to hear this. Let's proceed.

The CARETAKER: Good morning, Mr President. First of all, I would like to give you a bit of information on my background. But before that, please, Mr President, if you have questions during this briefing, just interrupt me, sir. I have been employed by the CIA for the past 31 years. I started the caretaking status of this project in 1960. We have a special group of people whom we call "Group 6," that cares for all this information.

TW: They needed to discuss this (his demand) so hung up. Got called 2 days later and they said they don't want to talk on phone and arranged for face-to-face meeting at their facility.

EWD: Did you go?

TW: Yes, ten days later (mid-June or so). Flew out there

- Three of them show up

EWD: 3 guys with whom you had telecon?

TW: Yes, same 3

@UAPmike @devgru1980mi What's with the need to try to rationalize Davis being between jobs? It's not a disgrace and it actually supports what's in the notes.

@devgru1980mi The newness of the LV AFIO chapter in Oct. 02 checked out. That Davis was in job search mode in the time frame checked out.

to listen to the experiences of **Master Sergeant Michael Salazar**, a Special Operations Professional involved in covert actions, humanitarian relief, para-rescues, the Gulf War and Afghanistan, and author of three books. A new slate of officers was elected, headed by Chapter President John Hilliard.

The **AFIO Florida Suncoast Chapter**, another active chapter, met on 8 October, with a panel discussion the Cuban Missile Crisis, featuring **Bob Sumner**, past President, as well as representatives from TV Channel 13/Fox News, and the Florida International Museum. This is excellent example of the AFIO public education outreach mission.

The active **AFIO Miami-Dade Chapter** [in Coral Gables, FL] hosted numerous luncheons over past months. In July the Chapter hosted Federal Judge and former naval aviator **A. Jay Cristol** in a talk about his book *The Liberty Incident* - on the attack of a U.S. warship by the Israelis - which many *USS Liberty* members claim was deliberate, and which Cristol purported was a tragic error.

In November, **AFIO's Palm Beach Chapter** hosted **Mr. Guy Lewis**, U.S. Attorney for the Southern District of Florida, U.S. Department of Justice. Lewis spoke on INS activities in the Southern District, illegal immigration through the ports of Miami and Ft. Lauderdale, and the effects of these issues on the terrorist threat to Florida and the rest of our nation.

The **AFIO New Mexico Chapter**, as part of its active year-around monthly program, met on 25 September and, after the pledge of allegiance and the invocation

national intelligence and state and local police elements faces some exceptional obstacles.

On 23 October, at the **AFIO NewMexico Chapter**, **AFIO National President Gene Poteat** traveled to Albuquerque and spoke on 'Intelligence problems Before and After 9/11,' getting an excellent response from the Chapter as well as afterward in interviews at the local radio station and the University of New Mexico. The Chapter also has hosted **Professor Jim Holden-Rhodes** of the U.N.M., and supports his program of intelligence studies.

The **AFIO New England Chapter**, as part of its program of quarterly meetings, met on 25 October at the Nonantum Resort in Kennebunkport, Maine. **MGEN (ret) Ed Thompson** spoke on the US "Remote Viewing" program. Other presentations were made by authors **Fred Jerome** and **James Bamford**. Some 60 individuals attended, including 15 from the local community, thanks to press releases in newspapers and a local radio station, and representation by local journalists.

Congressman Rob Simmons was recruited to be the referee for the 2002 AFIO/NE Ransburg Foundation scholarship program, with the winner to receive a $500 stipend from Chapter and Foundation resources, an example of an innovative Chapter use of the Ransburg Foundation program.

in Moscow during the last five years of the cold war. There also was a post-luncheon speaker was a local senior FBI official discussing post-9/11 activities and the recent Bureau reorganization

In September, The **AFIO Midwest Chapter** (MWAFIO) hosted its annual Current Intelligence Symposium at the Great Lakes Naval Training Center, Great Lakes, IL

In October the **AFIO Northern Ohio Chapter** held elections for 2003 Officers and voted to adopt Chapter Bylaws while at the US Coast Guard Officers Club in Cleveland. In November they held their Annual Holiday Party at Bratenahl Place Penthouse, Bratenahl, Ohio.

In September in Silver Springs, Nevada, **AFIO's NEW North Sierra Chapter** held their kick-off meeting and BBQ at Don Mitchell's ranch, East of Reno. Their special guest—**Gene Poteat, AFIO National President**. For further information to join this chapter, contact Lud Spolyar, Chapter Secretary, at (530) 581-4212 or lud@spolyar.com.

In October, the new **AFIO Las Vegas Chapter** held its first meeting. To join this new chapter or to participate while visiting the area, contact Richard L. Cohn, President, at afiolasvegas@att.net

RADM T. R. Wilson (-Join Chiefs of Staff)
Joint Staff Vice Director for Intelligence – J2
Pentagon Room IE-880
Washington, D.C. 20318-2000

Dear Admiral Wilson

I trust that all continues well in the Pentagon in spite of the Islamic Jihad. I appreciate your call a few months ago, and wanted to keep you informed on the enclosed subject with which I work in my "spare" time. I had the pleasure recently of meeting with NASA astronauts Brian O'Leary and Ed Mitchell (Apollo-14), as well as several international scientists and Dr. Jesse Marcel, Jr. from Roswell, N. M. I understand that an international press release in planned in the near future.

The enclosed letter and documents have been hand-delivered to POTUS in the past few weeks. Additionally, the President's Science Advisor has been searching for information on the subject via NAIC (FASTC/FTD), apparently with little success. Perhaps you are already aware of inquiries.

I would like to again offer you the opportunity for a personal briefing, at a mutually convenient time and place, by Dr. Steven M. Greer, M.D., International Director of the Center for the Study of Extraterrestrial Intelligence (CSETI), Asheville, North Carolina. Since the topic is sensitive with DoD, the briefing could be informal and off-the-record, if you desire. It would include an overview of CSETI's mission and recent breakthrough, international developments and trends in the field, synopsis of recent briefing to senior White House Staff, the DCI, and foreign Heads of State, and would include potential impacts of projected events on DOD missions and national security.

Dr. Greer may be reached in Asheville, NC directly at: (704) 274-5671.

Please give my best to RADM Cramer next time you talk with him and feel free to share the enclosed.

I'll make a point in calling you prior to my next trip to D.C. The enclosed recipes are for Mrs. Wilson. Enjoy!

Very respectfully,

My team has been steadily briefing multiple committees in Congress, some at the classified level, and holy cow — MAJOR change is coming. :) can't say anything else, but hopefully more to come soon. TTSA is also in the process of bringing 2 Major Motion Pictures, 2 Television Series, and an Unscripted Docu-Series to the world. We are presently negotiating multiple network contracts and after the legal work, announcements will be coming soon. More developments.... TTSA has initiated the beginnings of a major Aerospace partnership and started "scope of work" proposals for our Space-Time Metric Engineering... yes, the stuff you and I really care about! Another great developement, TTSA has been in contact with multiple EU and South American Countries over the past months regarding their respective UFO Programs and the goal of creating an International Information DATA Sharing System and Analysis through the proprietary TTSA "Community of Interest" and it's Artificial Intelligence Analysis Initiative. But all these things take time, money and patience. There is nothing that I am doing that is easy, every single thing here is extremely difficult. So thank you so much for being patient, and understanding what exactly we are trying to achieve here. This is what your investment dollars are going for. @PostDisclosure @gigathought One way they did that was to use multiple RVers on the same target. That way if there were any similarities in their efforts, it improved the odds of them being right. If you listen to R Targ, he's very egalitarian about the whole thing.

RT @MadScientistPod: Effective last night I have resigned as Director of Research. Statement attached. http://pbs.twimg.com/media/DaxL6cUW0AEGcTl.jpg

---

To whom it may Concern,

It is with a heavy heart that I must report my resignation from my position as director of research for the Mutual UFO Network. Yesterday afternoon (Friday, April 13th 2018) it came to my attention that John Ventre, former state director for Pennsylvania, has had a continued role within MUFON as an active member, is listed as a paid consultant, conference coordinator, and treasurer for the PA chapter, and is a part of the preparations for the upcoming symposium. I was stunned to receive an e-mail from Mr. Ventre stating that he was the "guy putting together the symposium" for National MUFON, and even more stunned when his involvement was not strongly condemned and denied. Had I known that Mr. Ventre was not completely removed from MUFON, despite the upheaval that may have caused and potential further resignations that may have followed from those who did not see the issue with what he wrote, I would never have joined. I believed, as I am sure the vast majority of the interested public believes, that he had been completely removed from MUFON and any attempt to return to the fold of this organization would have been completely and instantly rebuffed. However, as I have now discovered through discussion with MUFON, looking at the MUFON PA website and their list of upcoming speakers at their local conventions, and investigating the public comments from Mr. Ventre since his racist diatribe it is clear that this is not the case. I expect this evidence will be removed from these websites, as it is clear that this process has already begun taking place.

When I joined MUFON I had hoped to bring a scientific viewpoint and strong critique of ideas to this field. Sadly, it appears I will have to attempt that effort elsewhere. I am very grateful to those who gave me the opportunity to begin this process, and to those who believed in my plan moving forward. I am sorry that my trust was misplaced, and that your trust in me was not protected correctly.

Chris

@UAPmike Three aspects of the notes have been independently confirmed in 3+ years:
1. AFIO chapter started Oct. 2002
2. Davis was looking for a job in that time frame.

DEADLINE | HOLLYWOOD

JKLC Films has pacted with The Orchard to release its two latest films in the UFO genre: *Bob Lazar* and *Hunt for the Skinwalker*. Both will be released this year.

The Orchard says the films continue the company's successes in the UFO genre, following the distribution of Michael Mazzola's *Unacknowledged: The Greatest Secret in Human History*, the highest-grossing documentary on iTunes for 2017.

Bob Lazar, a former government physicist, remains the most famous and controversial name in the world of UFOs but now is speaking on camera for investigative filmmaker Jeremy Kenyon Lockyer Corbell (*Patient Seventeen*). Lazar over the years has remained elusive — and, for the most part, silent. His disclosures have turned his life upside-down and he has tried to stay out of the spotlight. Corbell's film, *Bob Lazar*, will explore Lazar's claims through the lens of 30 years, providing rare and never-before-revealed footage.

"I know there are alien craft here from another planet. I saw nine, but I was *inside* one," says Lazar on camera in the film. "I know it was not made on Earth. I know it was made with materials that we cannot fabricate, and we cannot duplicate ... we've never been able to. It's nothing I would have ever expected to see. I also know that we have examined bodies of alien creatures. I know this for a fact, and that's the bottom line."

The other film, *Hunt for the Skinwalker,* is based on the best-selling book by George Knapp & Dr. Colm Kelleher. It is about the most intensive scientific study of a paranormal hotspot in human history. In 1996 Robert Bigelow of Bigelow Aerospace, a real estate mogul and self-made billionaire, purchased 480 acres of land in northern Utah for use as a "living laboratory" to study the UFO phenomenon.

"I'm excited to work with The Orchard to release these two groundbreaking films on the subject of UFOs and the government's involvement in the subject," said Jeremy Kenyon Lockyer Corbell of JKLC Films. "These stories have been kept from the public for 30 years, and with the recent news coverage and the Pentagon's admission of an active program studying these issues, there is now a unique opportunity to share them with a wide audience. I'm both excited and hopeful that the UFO problem will be illuminated in a sophisticated and newsworthy way."

Dr. Jung Says 'Saucers' Exist; Bars Psychological Explanations

Requests Air Force Publish 'Authentic' Account of Facts —Cites 14-Year Study

ALAMOGORDO, N. M., July 29 (AP)—One of the world's most eminent psychologists reports that unidentified flying objects are not quirks of imagination.

Dr. Carl Jung, who studied under Sigmund Freud, said that if they came from other planets they could bring an enforced peace—and universal panic— to the world.

Dr. Jung, 83, now lives in Zurich, Switzerland. He evolved the theory of the psychological complex—an explanation of abnormal behavior. He wrote his speculations on "Unidentified Flying Objects" in the monthly bulletin of the Aerial Phenomena Research Organization, a private organization with headquarters here.

'The term RELEASE is where everyone is tripping up. These videos were obtained from a Freedom of Information Act filing. They were prepared internally at the DoD through a vetting process that allowed them to be released through FOI. You are not going to get the DoD to come out and "announce" there are such things as UFOs buzzing around our aircraft carrier groups. They did not actively "release". They passively allowed the FOIA process to occur. Now whether there was INTERNAL acquiescence to this that is a "hidden" active process by people other than Lue... probably you will never know. But we should be happy that it ended up the way it did (whether through active help, passive bureaucratic sleepiness, or otherwise). Active announcement/release would probably upset any White House to be upstaged in such a process as that should clearly be a government level announcement. What you got was people internally at the DoD who decided this information was worth getting out, made sure the video was properly vetted so as to not release "proprietary" data or US military capabilities, and then prepared for eventual FOI access. It was then accessed'

@ShiftingShane @TheProjectUnity @tix3_exe I remain a staunch notes skeptic but accept Shannon's account as being accurate. I don't think it goes anywhere regarding the truth of the notes. Shannon said as much in interview. It's another thing within the notes that does check out. The other is newness of LV AFIO chapter.

to listen to the experiences of **Master Sergeant Michael Salazar**, a Special Operations Professional involved in covert actions, humanitarian relief, para-rescues, the Gulf War and Afghanistan, and author of three books. A new slate of officers was elected, headed by Chapter President John Hilliard.

The **AFIO Florida Suncoast Chapter**, another active chapter, met on 8 October, with a panel discussion the Cuban Missile Crisis, featuring **Bob Sumner**, past President, as well as representatives from TV Channel 13/Fox News, and the Florida International Museum. This is excellent example of the AFIO public education outreach mission.

The active **AFIO Miami-Dade Chapter** [in Coral Gables, FL] hosted numerous luncheons over past months. In July the Chapter hosted Federal Judge and former naval aviator **A. Jay Cristol** in a talk about his book *The Liberty Incident* - on the attack of a U.S. warship by the Israelis - which many *USS Liberty* members claim was deliberate, and which Cristol purported was a tragic error.

In November, **AFIO's Palm Beach Chapter** hosted **Mr. Guy Lewis**, U.S. Attorney for the Southern District of Florida, U.S. Department of Justice. Lewis spoke on INS activities in the Southern District, illegal immigration through the ports of Miami and Ft. Lauderdale, and the effects of these issues on the terrorist threat to Florida and the rest of our nation.

The **AFIO New Mexico Chapter**, as part of its active year-around monthly program, met on 25 September and, after the pledge of allegiance and the invocation, spoke on 'Intelligence problems Before and After 9/11,' getting an excellent response from the Chapter as well as afterward in interviews at the local radio station and the University of New Mexico. The Chapter also has hosted **Professor Jim Holden-Rhodes** of the U.N.M., and supports his program of intelligence studies.

In October the **AFIO Northern Ohio Chapter** held elections for 2003 Officers and voted to adopt Chapter Bylaws while at the US Coast Guard Officers Club in Cleveland. In November they held their Annual Holiday Party at Bratenahl Place Penthouse, Bratenahl, Ohio.

In September in Silver Springs, Nevada, **AFIO's NEW North Sierra Chapter** held their kick-off meeting and BBQ at Don Mitchell's ranch, East of Reno. @luckytran It's normal for people not to care about their health. 93 % of those deaths were

people over 50, 75 % over 65. Expect another spike, not as bad as the previous two, during this holiday season. If you're older, take reasonable precautions.

I have been working for years on some of these cases (such as the Tic Tac case), but don't have any relation to TTSA or the choice to make these videos declassified. However, I am very much in support of the recent releases championed by TTSA.

I hope this clarifies and clears up any confusion.

Let's now get back to the primary question... what are we looking at in these videos?

I just saw a video talking about my time-stamp on the new DOD release... it's a mistake and causing a lot of confusion and tons of messages to me... conspiratorial messages... so I want to clarify.

So there is no mystery, I've been culling my thousands of Vimeo uploads into "groups" or "projects" as I'm in process on two films for 2018 and I'm doing housecleaning in my Vimeo account to make navigation easier on my end. I have been replacing the super old ones with new videos which makes scrolling and searching (non-grouped material), easier in my vast archive by getting rid of the past versions of videos I don't need. I didn't realize when posting my upload on Facebook that the date is publicized via a direct link, as on mobile devices it's not and you only see the video... meaning that it doesn't link back to the Vimeo page (from what I could tell). I guess it does on a desktop computer though. The time-stamp started creating confusion obviously, but was

@BSquidding @DavidSpergel Nonsense. While the more the merrier in terms of scientists

getting involved, history buffs, tech experts, witnesses, investigators, politicians and journalists can all make contributions. Some good advice from Hynek.
http://pbs.twimg.com/media/FdIlJKBWQAAfmNm.jpg

Later in the same paper, Dr. Hynek said: "We do have a great richness in material to study. Let us turn our present embarrassment of these riches to good use. We can do this by not wallowing around in a welter of cases of all sorts, unable to do justice to any, but by being very selective in choosing just what cases or aspects of the problem to study. It does no good merely to read about and talk about the whole spectrum of UFO cases." He went on to recommend that UFO researchers specialize in some aspect of the field or some unique cases to develop an impressive amount of material and to have that material published for others to use.

Dear John:

I am a believer in both categories. I feel anything is possible.

Many of our Man-made UFOs are Un Funded Opportunities.

In both categories, there are a lot of hooks and charlatans — be cautious.

@AllPlanets The curve flattened with no vaccines during the warmer months of 2020. It did the same in 21 and this past summer. Roughly the same number of people died during the winter months of 20/21 as 21/22. If you're in an at risk category, you should be cautious this winter as well.

and his feeling that he had seen something truly unusual is attested by the fact that he asked whether he should speak to the priest first before saying anything about it.

Any question of hallucination seems clearly out. He is a non-drinking man, and is a solid, well-built, physically healthy individual (Photogrph No 10). He is a cop who looks as though he could be pretty gruff with his customers, and in fact, his complaint about the UFO sighting was that it did not allow him to give out his full quota of tickets for the day. Photograph N 11 is of Sergeant Chaves, who is considerably more articulate than Zamora, and appears to have a greater awareness of things and relations than Zamora does. Both men seemed to give every indication of being devoted to duty and being basically simple and honest. Photograph No 12 is a close-up of one of the markings, made very shortly after the craft had departed.

By the time that I got to see the area, it had been so badly trampled over that I could make no assesment of the burned areas. There appear to be a fair amount of charred particles mixed in with the dirt, and some charred cardboard was also found (enc). In conclude, therefore, that Zamora saw a tangible, physical object, under good daylight illumination, and from fairly close range (at the closest, almost as little as 100 feet).

The NICAP man on the scene, Ray Stanford of Phoenix, picked up a rock in one of the indentations that looked as if it had metallic particles, possibly scraped off the landing-gear footpad. I happened to be in Washington when Mr. Stanford arrived at the NICAP office with the rock. We examined the sample then took it to a prominent government center for analysis. The miniscule size of the particles made proper testing difficult, but eventually the "scrapings" were identified as of granitic origin. After studying the particles myself under magnification at the laboratory, I must admit I did not have much hope that anything convincing would be revealed by the tests.

Hynek was also puzzled by the lack of thrust disturbance at the landing site: "It's been bothering me that Mr. Zamora didn't see a great cloud of dust like this would have kicked up." (A conventional chemical rocket engine would have dug out a sizeable crater and a large quantity of dust.

@RiotSeeds @singularitymike @johnbruso I'm OK with the subject being talked up. One change he's made: He was studying the brains of contactees to see if they had psychic antennas. Now, on Fox, it's about brain damage of contactees. Not saying those outcomes are mutually exclusive, just that the message is different.

@MikeColangelo Pretty good advice here from Hynek.
http://pbs.twimg.com/media/Fbg-ennXwAE1ITE.jpg

Later in the same paper, Dr. Hynek said: "We do have a great richness in material to study. Let us turn our present embarrassment of these riches to good use. We can do this by not wallowing around in a welter of cases of all sorts, unable to do justice to any, but by being very selective in choosing just what cases or aspects of the problem to study. It does no good merely to read about and talk about the whole spectrum of UFO cases." He went on to recommend that UFO researchers specialize in some aspect of the field or some unique cases to develop an impressive amount of material and to have that material published for others to use.

to listen to the experiences of **Master Sergeant Michael Salazar**, a Special Operations Professional involved in covert actions, humanitarian relief, para-rescues, the Gulf War and Afghanistan, and author of three books. A new slate of officers was elected, headed by Chapter President John Hilliard.

The **AFIO Florida Suncoast Chapter**, another active chapter, met on 8 October, with a panel discussion the Cuban Missile Crisis, featuring **Bob Sumner**, past President, as well as representatives from TV Channel 13/Fox News, and the Florida International Museum. This is excellent example of the AFIO public education outreach mission.

The active **AFIO Miami-Dade Chapter** [in Coral Gables, FL] hosted numerous luncheons over past months. In July the Chapter hosted Federal Judge and former naval aviator **A. Jay Cristol** in a talk about his book *The Liberty Incident* - on the attack of a U.S. warship by the Israelis - which many *USS Liberty* members claim was deliberate, and which Cristol purported was a tragic error.

In November, **AFIO's Palm Beach Chapter** hosted **Mr. Guy Lewis**, U.S. Attorney for the Southern District of Florida, U.S. Department of Justice. Lewis spoke on INS activities in the Southern District, illegal immigration through the ports of Miami and Ft. Lauderdale, and the effects of these issues on the terrorist threat to Florida and the rest of our nation.

The **AFIO New Mexico Chapter**, as part of its active year-around monthly program, met on 25 September and, after the pledge of allegiance and the invocation, heard **Dr. Jeffrey Richelson** speak on "Intelligence Cooperation." Richelson is a well-known author and researcher on national intelligence and state and local police elements faces some exceptional obstacles.

On 23 October, at the **AFIO NewMexico Chapter**, **AFIO National President Gene Poteat** traveled to Albuquerque and spoke on 'Intelligence problems Before and After 9/11,' getting an excellent response from the Chapter as well as afterward in interviews at the local radio station and the University of New Mexico. The Chapter also has hosted **Professor Jim Holden-Rhodes** of the U.N.M., and supports his program of intelligence studies.

The **AFIO New England Chapter**, as part of its program of quarterly meetings, met on 25 October at the Nonantum Resort in Kennebunkport, Maine. **MGEN (ret) Ed Thompson** spoke on the US "Remote Viewing" program. Other presentations were made by authors **Fred Jerome** and **James Bamford**. Some 60 individuals attended, including 15 from the local community, thanks to press releases in newspapers and a local radio station, and representation by local journalists.

Congressman Rob Simmons was recruited to be the referee for the 2002 AFIO/NE Ransburg Foundation scholarship program, with the winner to receive a $500 stipend from Chapter and Foundation resources, an example of an innovative Chapter use of the Ransburg Foundation program.

in Moscow during the last five years of the cold war. There also was a post-luncheon speaker was a local senior FBI official discussing post-9/11 activities and the recent Bureau reorganization

In September, The **AFIO Midwest Chapter** (MWAFIO) hosted its annual Current Intelligence Symposium at the Great Lakes Naval Training Center, Great Lakes, IL

In October the **AFIO Northern Ohio Chapter** held elections for 2003 Officers and voted to adopt Chapter Bylaws while at the US Coast Guard Officers Club in Cleveland. In November they held their Annual Holiday Party at Bratenahl Place Penthouse, Bratenahl, Ohio.

In September in Silver Springs, Nevada, **AFIO's NEW North Sierra Chapter** held their kick-off meeting and BBQ at Don Mitchell's ranch, East of Reno. Their special guest—**Gene Poteat, AFIO National President**. For further information to join this chapter, contact Lud Spolyar, Chapter Secretary, at (530) 581-4212 or lud@spolyar.com.

In October, the new **AFIO Las Vegas Chapter** held its first meeting. To join this new chapter or to participate while visiting the area, contact Richard L. Cohn, President, at afiolasvegas@att.net

@KenSycspng @jjclose @LaughingTroll1 @ImnobotIthink @RepThomasMassie It was a novel virus. There have been CVs before. Some docs weren't touting IVM out of thin air. @jjclose @KenSycspng @LaughingTroll1 @ImnobotIthink @RepThomasMassie For viruses I think they are. It's moot now as I think we're past that stage. Jersey did bring them back last spike season but I don't live in NJ. A lot of it is political. PA is purpler. Philly did some vaxx ID requirements but I rarely go to Philly.

@jjclose @KenSycspng @LaughingTroll1 @ImnobotIthink @RepThomasMassie Outdoor restrictions, curfews. No evidence the virus can tell time. Gyms for sure. churches, if they'd forgo singing, limit attendance, that's OK. I'm fine with a good mask in spike season but they protect me. Don't care who else wears one. Any kind of vaxx mandate.

@jjclose @KenSycspng @LaughingTroll1 @ImnobotIthink @RepThomasMassie We had great data early on as to what the problems were. Spread almost all indoors, by far worst outcomes old/obese, worst situations mass transit, bars/clubs. A lot of people made bad choices based on beliefs and not data on both sides of any virus subargument.

@KenSycspng @LaughingTroll1 @ImnobotIthink @jjclose @RepThomasMassie I think it's up to individuals to make the choice that's best for them. We certainly know what the spike season is.

Plan accordingly.

@ImnobotIthink @KenSycspng @LaughingTroll1 @jjclose @RepThomasMassie My understanding is Spanish flu variants are still circulating more than a century later, but the pandemic stage lasted roughly 3 years. This coronavirus was never as bad as that one.

https://twitter.com/_/status/1589411141759176705

@KenSycspng @LaughingTroll1 @ImnobotIthink @jjclose @RepThomasMassie Pandemics generally run their course in about 3 years. Some folks are saying we're already in the endemic stage. This holiday season will tell the tale. Lots of natural immunity and a milder strain make it a strong bet this year won't be near as bad as the last two.

@KenSycspng @LaughingTroll1 @ImnobotIthink @jjclose @RepThomasMassie These numbers can be a little misleading. Small sample size, numbers are per capita. Maybe 150 or so deaths a week total. Spike might represent 1 death in younger age group. 1 vaxx lumped in with 0 vaxx.

@KenSycspng @ImnobotIthink @LaughingTroll1 @jjclose @RepThomasMassie The ourworld data stops at 50. I'd like to see more but I doubt the benefit compared with the next youngest age demographic is as significant as for the 65+ers. There's also no data there on comorbidities.

@Ronswanson1A @UAPmike @528vibes Most of it will be classified so they'll have to. I'm not convinced we've recovered crashed ET tech. Less convinced we have intact vehicles. I'm certain we have much better data than we're seeing. Where did the data brick from the Hawkeye radar plane in the Nimitz case go?

@Ronswanson1A @UAPmike @528vibes Yes, I think it's quite possible it's just a very small group that holds the "proof." A larger group than that holds the data we'd all love to see. @Drunk_on_Books @Blackgoo5 @wotzitt No glint. It's blurred white feathers. Take a closer look at Haines' paper and this link on bird photography. A good shutter speed is 1/1500 to 1/1600 for a bird in flight. Haines estimates it at 1/125. There's ton of blur in the photo.

@KeithThompson1 I don't have the @billeecox article in front of me but Wilson told him that he was in transition upon retirement, didn't have a specific answer as to his location and said he couldn't prove it anyway.

@UAPmike @billeecox Might be difficult to prove but it's past time Wilson was asked. I couldn't prove it but I know where I was Oct. 16, 2002. How about you?

@UAPmike Prove him wrong. Three + years ago when this all started, I figured Wilson was in LV that day and it would get proved rather quickly . . . tick tock. I even sought to prove it. http://pbs.twimg.com/media/FZa2fzBXEAM0Yxd.jpg

to listen to the experiences of **Master Sergeant Michael Salazar**, a Special Operations Professional involved in covert actions, humanitarian relief, para-rescues, the Gulf War and Afghanistan, and author of three books. A new slate of officers was elected, headed by Chapter President John Hilliard.

The **AFIO Florida Suncoast Chapter**, another active chapter, met on 8 October, with a panel discussion the Cuban Missile Crisis, featuring **Bob Sumner**, past President, as well as representatives from TV Channel 13/Fox News, and the Florida International Museum. This is excellent example of the AFIO public education outreach mission.

The active **AFIO Miami-Dade Chapter** [in Coral Gables, FL] hosted numerous luncheons over past months. In July the Chapter hosted Federal Judge and former naval aviator **A. Jay Cristol** in a talk about his book *The Liberty Incident* - on the attack of a U.S. warship by the Israelis - which many *USS Liberty* members claim was deliberate, and which Cristol purported was a tragic error.

In November, **AFIO's Palm Beach Chapter** hosted **Mr. Guy Lewis**, U.S. Attorney for the Southern District of Florida, U.S. Department of Justice. Lewis spoke on INS activities in the Southern District, illegal immigration through the ports of Miami and Ft. Lauderdale, and the effects of these issues on the terrorist threat to Florida and the rest of our nation.

The **AFIO New Mexico Chapter**, as part of its active year-around monthly program, met on 25 September and, after the pledge of allegiance and the invocation intelligence and state and local police elements faces some exceptional obstacles.

On 23 October, at the **AFIO NewMexico Chapter**, **AFIO National President Gene Poteat** traveled to Albuquerque and spoke on 'Intelligence problems Before and After 9/11,' getting an excellent response from the Chapter as well as afterward in interviews at the local radio station and the University of New Mexico. The Chapter also has hosted **Professor Jim Holden-Rhodes** of the U.N.M., and supports his program of intelligence studies.

The **AFIO New England Chapter**, as part of its program of quarterly meetings, met on 25 October at the Nonantum Resort in Kennebunkport, Maine. **MGEN (ret) Ed Thompson** spoke on the US "Remote Viewing" program. Other presentations were made by authors **Fred Jerome** and **James Bamford**. Some 60 individuals attended, including 15 from the local community, thanks to press releases in newspapers and a local radio station, and representation by local journalists.

Congressman Rob Simmons was recruited to be the referee for the 2002 AFIO/NE Ransburg Foundation scholarship program, with the winner to receive a $500 stipend from Chapter and Foundation resources, an example of an innovative Chapter use of the Ransburg Foundation program.

in Moscow during the last five years of the cold war. There also was a post-luncheon speaker was a local senior FBI official discussing post-9/11 activities and the recent Bureau reorganization

In September, The **AFIO Midwest Chapter** (MWAFIO) hosted its annual Current Intelligence Symposium at the Great Lakes Naval Training Center, Great Lakes, IL

In October the **AFIO Northern Ohio Chapter** held elections for 2003 Officers and voted to adopt Chapter Bylaws while at the US Coast Guard Officers Club in Cleveland. In November they held their Annual Holiday Party at Bratenahl Place Penthouse, Bratenahl, Ohio.

In September in Silver Springs, Nevada, **AFIO's NEW North Sierra Chapter** held their kick-off meeting and BBQ at Don Mitchell's ranch, East of Reno. Their special guest—**Gene Poteat, AFIO National President**. For further information to join this chapter, contact Lud Spolyar, Chapter Secretary, at (530) 581-4212 or lud@spolyar.com.

In October, the new **AFIO Las Vegas Chapter** held its first meeting. To join this new chapter or to participate while visiting the area, contact Richard L. Cohn, President, at afiolasvegas@att.net

@mhmanley @TheUfoJoe Cdr. Miller is said to have great interest in Zamora case. He denied that to both me and Joe. I believe him on that.

http://pbs.twimg.com/media/FZWN1VpXkAUsNoz.jpg

- They had (program manager talking) a craft – an intact craft they believed could fly (space? air? water? dimensions?)
- Was it from overseas or not?
- Said NO! Could not be – not possible!!
- Why, I asked – where did it come from?
- Program manager said they didn't know where it was from [they had some ideas on this] – it was technology that *was not of this Earth – not made by man – not by human hands*
- Said were trying to understand and exploit technology; their program was going on for years and years with very slow progress
- Agonizingly slow with little or no success – painful lack of collaboration to get help from outside community of experts and facilities to assist effort – must remain isolated and use own facilities and cleared personnel – tough environment to work – about 400-800 (bigot list count) workers varying in number with funding or personnel changes
- Miller questions asked:
  - Roswell – craft/bodies/autopsies
  - Holloman AFB Landing
  - MJ-12 and leaked docs
  - Zamora & Bentwaters, etc.
- They were mum – declined to discuss these
- TW threatened to go to SAPOC to complain, gain access to their program
- They said go ahead and do what you must
- I was angry because they defied my authority to be read-in with good logical reason – wouldn't budge
- Their tone was very testy/terse throughout conversation

EWD: What was outcome?

TW: Meeting broke up and I returned to Washington

EWD: What about Corso?

TW: Greer talked about Corso on April 9th

- Miller showed me the book during two-hour private conversation
- Didn't have time to read it through
- Didn't buy a copy
- Didn't bring Corso up at meeting
- But comparing Corso story to what I learned at meeting is more than enough to believe Corso told truth about seeing "alien" hardware, etc.

EWD: Did you complain to SAPOC?

TW: Yes – called the subgroup members (Senior Review Group members) to a meeting at Pentagon

- Told them what happened at meeting

MICHAEL DEAVER: Mr President, whatever you wish, I'll do. It would be an interesting subject, but do I really have a need to know? No, I don't think so.

PRESIDENT: OK, I guess that is it.

WM CASEY: Thank you, Mr President. I will now turn the briefing over to The Caretaker.

ADVISER #3: Mr President, and Mr Director, I already had this briefing. I can stay or leave. Secretary Weinberger and myself received this a few weeks ago.

SECRETARY WEINBERGER: Mr President, as you know, we have some pending business regarding that Soviet problem in Berlin. I think we might just handle that. ADVISER #3 and I will let you close this meeting to just a few.

PRESIDENT: OK, Casp, I guess you and ADVISER #3 can leave. Thanks for coming.

WM CASEY: OK, Mr President, that certainly narrows the audience. I think this is just right.

PRESIDENT: OK, well, I can't wait to hear this. Let's proceed.

The CARETAKER: Good morning, Mr President. First of all, I would like to give you a bit of information on my background. But before that, please, Mr President, if you have questions during this briefing, just interrupt me, sir. I have been employed by the CIA for the past 31 years. I started the caretaking status of this project in 1960. We have a special group of people whom we call "Group 6," that cares for all this information.

TW: They needed to discuss this (his demand) so hung up. Got called 2 days later and they said they don't want to talk on phone and arranged for face-to-face meeting at their facility.

EWD: Did you go?

TW: Yes, ten days later (mid-June or so). Flew out there
- Met in their conference room in their secure vault
- Three of them show up

EWD: 3 guys with whom you had telecon?

TW: Yes, same 3
- Security director (NSA-retired, a CI expert)
- Program director
- Corporate attorney
- Called themselves "the watch committee," or gate keepers

@Heracli19402827 @MvonRen @TheUfoJoe @GarryPNolan @RepGallagher @ddeanjohnson I'm not sure he didn't have at least a hand in writing them. I'd much rather the focus be elsewhere, known cases with witness and radar/sensor data. I think the notes are junk but worse than all that, they're a distraction from real data.

@KenSycspng @ImnobotIthink @LaughingTroll1 @jjclose @RepThomasMassie That data is very interesting. It demonstrates very little efficacy in multiple boosters. It does show 65+ are helped by initial vaxx. They do roughly as well as unvaxxed 50-64. My estimate: 100K vaxxed deaths from Covid. Not as effective as promised.

@EternalQuest27 I don't see too many with big followings leaving. Twitter is free advertising to YOUR followers for the latest thing you want to promote. If you bought a classified ad in the local paper, it would cost you more than what Musk wants to charge blue checks.

@Danny_Dew @chrismartenson Hahahaha! I'm arguing with a guy with 9 followers. 7 day avg cases topped out at 750K post-vax compared with 300K pre-vaxx. Hosps were higher. There were two spikes in deaths, delta and holiday, post-vaxx.

@Danny_Dew @chrismartenson If you look at any metric, deaths, cases or hospitalizations, and compare pre-vaxx to post-vaxx, vaxxes have proved a massive failure. The best thing that's happened is omicron due to its' relative mildness.

@JeremyCorbell Also from UFO Enigma by Professor Sturrock.

http://pbs.twimg.com/media/FZMAaMYWQAEi_n1.jpg

Jean-Jacques Velasco presented information on radar cases drawn in part from the files of GEPAN/SEPRA. He pointed out that one catalog of aircraft cases (Weinstein, 1997), now under development at GEPAN/SEPRA with 489 cases in all, contains 101 (21 percent) radar-visual cases (cases that involve both radar detection and visual observation), and the files of the U.S. Air Force Blue Book project contain 363 aircraft cases of which 76 (also 21 percent) are radar-visual cases. Since 1945, reports of aeronautical cases have been collected by order of the French air force chief of staff. From 1977 on, information from civil and military observations made in French airspace have been sent to GEPAN/SEPRA. It should be noted that civil radar information refers only to objects containing a transponder, whereas military radar equipment can detect any object greater than two square meters in radar-equivalent surface area. From 1982 on, twelve French aeronautical cases were reported to GEPAN/SEPRA. Of these, only three or four cases may be considered to be radar-visual cases of the UFO type.

@WilliamFergie Not as well documented as you think. You really have to forage around and piece things together. There's no doubt the improved manufacturing processes, like vacuum induction melting, were purely human devised but that was sitting waiting to be used since 1920.

@WilliamFergie One shortcoming with the article is I didn't look closely enough into how advances in materials science brought us the jet age. Commercial jet air travel wouldn't be possible without it and it happened within a few years of Roswell. Those advances are underappreciated today.

@DeepSpace41 @MvonRen Militaries have hard core data. Radar is hard core data. FOIAed radar data analyzed at link here:

https://www.ufocasebook.com/pdf/mufonstephenvilleradarreport.pdf

http://pbs.twimg.com/media/FT0lWSbWQAAckF7.jpg

Jean-Jacques Velasco presented information on radar cases drawn in part from the files of GEPAN/SEPRA. He pointed out that one catalog of aircraft cases (Weinstein, 1997), now under development at GEPAN/SEPRA with 489 cases in all, contains 101 (21 percent) radar-visual cases (cases that involve both radar detection and visual observation), and the files of the U.S. Air Force Blue Book project contain 363 aircraft cases of which 76 (also 21 percent) are radar-visual cases. Since 1945, reports of aeronautical cases have been collected by order of the French air force chief of staff. From 1977 on, information from civil and military observations made in French airspace have been sent to GEPAN/SEPRA. It should be noted that civil radar information refers only to objects containing a transponder, whereas military radar equipment can detect any object greater than two square meters in radar-equivalent surface area. From 1982 on, twelve French aeronautical cases were reported to GEPAN/SEPRA. Of these, only three or four cases may be considered to be radar-visual cases of the UFO type.

to listen to the experiences of **Master Sergeant Michael Salazar**, a Special Operations Professional involved in covert actions, humanitarian relief, para-rescues, the Gulf War and Afghanistan, and author of three books. A new slate of officers was elected, headed by Chapter President John Hilliard.

The **AFIO Florida Suncoast Chapter**, another active chapter, met on 8 October, with a panel discussion the Cuban Missile Crisis, featuring **Bob Sumner**, past President, as well as representatives from TV Channel 13/Fox News, and the Florida International Museum. This is excellent example of the AFIO public education outreach mission.

The active **AFIO Miami-Dade Chapter** [in Coral Gables, FL] hosted numerous luncheons over past months. In July the Chapter hosted Federal Judge and former naval aviator **A. Jay Cristol** in a talk about his book *The Liberty Incident* - on the attack of a U.S. warship by the Israelis - which many *USS Liberty* members claim was deliberate, and which Cristol purported was a tragic error.

In November, **AFIO's Palm Beach Chapter** hosted **Mr. Guy Lewis**, U.S. Attorney for the Southern District of Florida, U.S. Department of Justice. Lewis spoke on INS activities in the Southern District, illegal immigration through the ports of Miami and Ft. Lauderdale, and the effects of these issues on the terrorist threat to Florida and the rest of our nation.

The **AFIO New Mexico Chapter**, as part of its active year-around monthly program, met on 25 September and, after the pledge of allegiance and the invocation intelligence and state and local police elements faces some exceptional obstacles.

On 23 October, at the **AFIO NewMexico Chapter**, **AFIO National President Gene Poteat** traveled to Albuquerque and spoke on 'Intelligence problems Before and After 9/11,' getting an excellent response from the Chapter as well as afterward in interviews at the local radio station and the University of New Mexico. The Chapter also has hosted **Professor Jim Holden-Rhodes** of the U.N.M., and supports his program of intelligence studies.

The **AFIO New England Chapter**, as part of its program of quarterly meetings, met on 25 October at the Nonantum Resort in Kennebunkport, Maine. **MGEN (ret) Ed Thompson** spoke on the US "Remote Viewing" program. Other presentations were made by authors **Fred Jerome** and **James Bamford**. Some 60 individuals attended, including 15 from the local community, thanks to press releases in newspapers and a local radio station, and representation by local journalists.

Congressman Rob Simmons was recruited to be the referee for the 2002 AFIO/NE Ransburg Foundation scholarship program, with the winner to receive a $500 stipend from Chapter and Foundation resources, an example of an innovative Chapter use of the Ransburg Foundation program.

in Moscow during the last five years of the cold war. There also was a post-luncheon speaker was a local senior FBI official discussing post-9/11 activities and the recent Bureau reorganization

In September, The **AFIO Midwest Chapter** (MWAFIO) hosted its annual Current Intelligence Symposium at the Great Lakes Naval Training Center, Great Lakes, IL

In October the **AFIO Northern Ohio Chapter** held elections for 2003 Officers and voted to adopt Chapter Bylaws while at the US Coast Guard Officers Club in Cleveland. In November they held their Annual Holiday Party at Bratenahl Place Penthouse, Bratenahl, Ohio.

In September in Silver Springs, Nevada, **AFIO's NEW North Sierra Chapter** held their kick-off meeting and BBQ at Don Mitchell's ranch, East of Reno. Their special guest—**Gene Poteat, AFIO National President**. For further information to join this chapter, contact Lud Spolyar, Chapter Secretary, at (530) 581-4212 or lud@spolyar.com.

In October, the new **AFIO Las Vegas Chapter** held its first meeting. To join this new chapter or to participate while visiting the area, contact Richard L. Cohn, President, at afiolasvegas@att.net

@tinyklaus Hynek rebuts Church effectively, years before the fact. 2017 newbs chose a perfectly valid path. http://pbs.twimg.com/media/FTnfaL-WQAIjuoj.jpg

---

Later in the same paper, Dr. Hynek said: "We do have a great richness in material to study. Let us turn our present embarrassment of these riches to good use. We can do this by not wallowing around in a welter of cases of all sorts, unable to do justice to any, but by being very selective in choosing just what cases or aspects of the problem to study. It does no good merely to read about and talk about the whole spectrum of UFO cases." He went on to recommend that UFO researchers specialize in some aspect of the field or some unique cases to develop an impressive amount of material and to have that material published for others to use.

to listen to the experiences of **Master Sergeant Michael Salazar**, a Special Operations Professional involved in covert actions, humanitarian relief, para-rescues, the Gulf War and Afghanistan, and author of three books. A new slate of officers was elected, headed by Chapter President John Hilliard.

The **AFIO Florida Suncoast Chapter**, another active chapter, met on 8 October, with a panel discussion the Cuban Missile Crisis, featuring **Bob Sumner**, past President, as well as representatives from TV Channel 13/Fox News, and the Florida International Museum. This is excellent example of the AFIO public education outreach mission.

The active **AFIO Miami-Dade Chapter** [in Coral Gables, FL] hosted numerous luncheons over past months. In July the Chapter hosted Federal Judge and former naval aviator **A. Jay Cristol** in a talk about his book *The Liberty Incident* - on the attack of a U.S. warship by the Israelis - which many *USS Liberty* members claim was deliberate, and which Cristol purported was a tragic error.

In November, **AFIO's Palm Beach Chapter** hosted **Mr. Guy Lewis**, U.S. Attorney for the Southern District of Florida, U.S. Department of Justice. Lewis spoke on INS activities in the Southern District, illegal immigration through the ports of Miami and Ft. Lauderdale, and the effects of these issues on the terrorist threat to Florida and the rest of our nation.

The **AFIO New Mexico Chapter**, as part of its active year-around monthly program, met on 25 September and, after the pledge of allegiance and the invocation intelligence and state and local police elements faces some exceptional obstacles.

On 23 October, at the **AFIO NewMexico Chapter**, **AFIO National President Gene Poteat** traveled to Albuquerque and spoke on 'Intelligence problems Before and After 9/11,' getting an excellent response from the Chapter as well as afterward in interviews at the local radio station and the University of New Mexico. The Chapter also has hosted **Professor Jim Holden-Rhodes** of the U.N.M., and supports his program of intelligence studies.

The **AFIO New England Chapter**, as part of its program of quarterly meetings, met on 25 October at the Nonantum Resort in Kennebunkport, Maine. **MGEN (ret) Ed Thompson** spoke on the US "Remote Viewing" program. Other presentations were made by authors **Fred Jerome** and **James Bamford**. Some 60 individuals attended, including 15 from the local community, thanks to press releases in newspapers and a local radio station, and representation by local journalists.

Congressman Rob Simmons was recruited to be the referee for the 2002 AFIO/NE Ransburg Foundation scholarship program, with the winner to receive a $500 stipend from Chapter and Foundation resources, an example of an innovative Chapter use of the Ransburg Foundation program.

in Moscow during the last five years of the cold war. There also was a post-luncheon speaker was a local senior FBI official discussing post-9/11 activities and the recent Bureau reorganization

In September, The **AFIO Midwest Chapter** (MWAFIO) hosted its annual Current Intelligence Symposium at the Great Lakes Naval Training Center, Great Lakes, IL

In October the **AFIO Northern Ohio Chapter** held elections for 2003 Officers and voted to adopt Chapter Bylaws while at the US Coast Guard Officers Club in Cleveland. In November they held their Annual Holiday Party at Bratenahl Place Penthouse, Bratenahl, Ohio.

In September in Silver Springs, Nevada, **AFIO's NEW North Sierra Chapter** held their kick-off meeting and BBQ at Don Mitchell's ranch, East of Reno. Their special guest—**Gene Poteat, AFIO National President**. For further information to join this chapter, contact Lud Spolyar, Chapter Secretary, at (530) 581-4212 or lud@spolyar.com.

In October, the new **AFIO Las Vegas Chapter** held its first meeting. To join this new chapter or to participate while visiting the area, contact Richard L. Cohn, President, at afiolasvegas@att.net

@MiddleOfMayhem @Robin081564 @RepGallagher He's expressing an informed opinion there. The key point regards the Socorro/Zamora case.

http://pbs.twimg.com/media/FTdV1-eWIAE4yNB.jpg

- They had (program manager talking) a craft – an intact craft they believed could fly (space? air? water? dimensions?)
- Was it from overseas or not?
- Said NO! Could not be – not possible!!
- Why, I asked – where did it come from?
- Program manager said they didn't know where it was from [they had some ideas on this] – it was technology that *was not of this Earth – not made by man – not by human hands*
- Said were trying to understand and exploit technology; their program was going on for years and years with very slow progress
- Agonizingly slow with little or no success – painful lack of collaboration to get help from outside community of experts and facilities to assist effort – must remain isolated and use own facilities and cleared personnel – tough environment to work – about 400-800 (bigot list count) workers varying in number with funding or personnel changes
- Miller questions asked:
    - Roswell – craft/bodies/autopsies
    - Holloman AFB Landing
    - MJ-12 and leaked docs
    - Zamora & Bentwaters, etc.
- They were mum – declined to discuss these
- TW threatened to go to SAPOC to complain, gain access to their program
- They said go ahead and do what you must
- I was angry because they defied my authority to be read-in with good logical reason – wouldn't budge
- Their tone was very testy/terse throughout conversation

EWD: What was outcome?

TW: Meeting broke up and I returned to Washington

EWD: What about Corso?

TW: Greer talked about Corso on April 9th

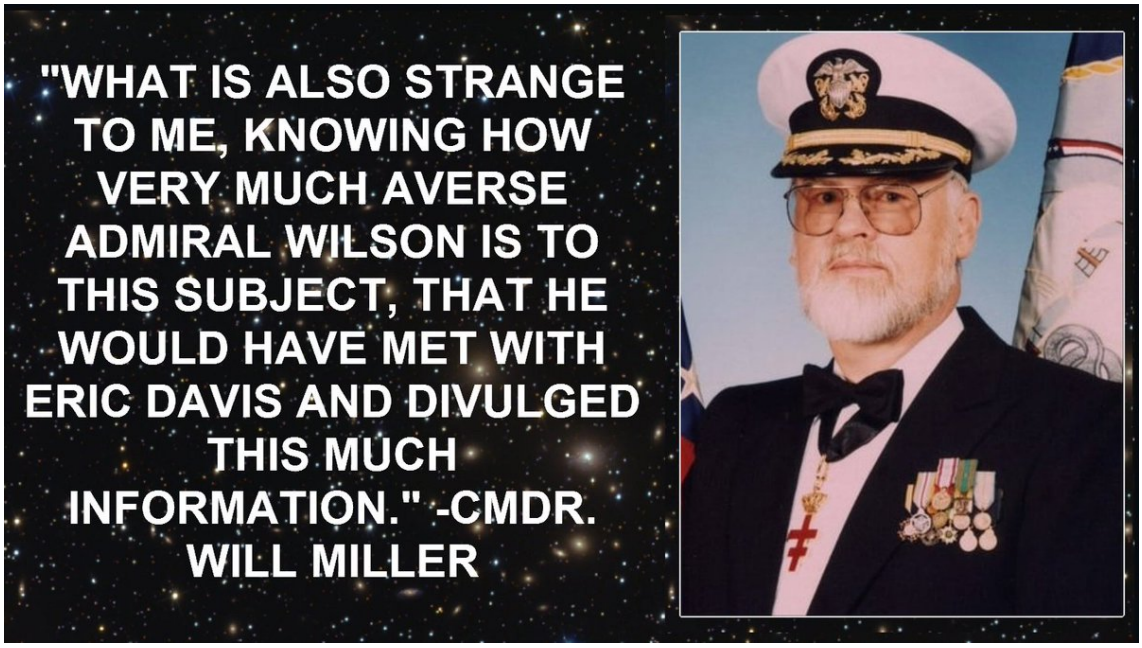

- Miller showed me the book during two-hour private conversation
- Didn't have time to read it through
- Didn't buy a copy
- Didn't bring Corso up at meeting
- But comparing Corso story to what I learned at meeting is more than enough to believe Corso told truth about seeing "alien" hardware, etc.

EWD: Did you complain to SAPOC?

TW: Yes – called the subgroup members (Senior Review Group members) to a meeting at Pentagon

- Told them what happened at meeting

TOP SECRET

EYES ONLY

THE WHITE HOUSE

WASHINGTON

September 24, 1947.

MEMORANDUM FOR THE SECRETARY OF DEFENSE

Dear Secretary Forrestal:

As per our recent conversation on this matter, you are hereby authorized to proceed with all due speed and caution upon your undertaking. Hereafter this matter shall be referred to only as Operation Majestic Twelve.

It continues to be my feeling that any future considerations relative to the ultimate disposition of this matter should rest solely with the Office of the President following appropriate discussions with yourself, Dr. Bush and the Director of Central Intelligence.

@Cernunnos69 @UFOBreddit He can claim it if it's true too. Find evidence he was in LV.

@Cernunnos69 @UFOBreddit Sure there might be but now you're speculating even further. Are the notes real? That's the question. It's simple, yes or no.

@Cernunnos69 @UFOBreddit @OmniTalkRadio I've seen it, I was watching as it got compiled every step of the way. It's not persuasive. What is persuasive is the whole thing has similar hooks and tropes as known disinformation.

@Danny_Dew @chrismartenson When comparing within age groups, it clearly helps. For 65+ it seems to buy you roughly a younger age demographic which is a good bet vs. any side effects but not near what was promised. Boosters don't get you much.

@JordanSchachtel The only data I follow is here. Happy to look at more. Couple points: Deaths have been averaging about 3K per week for months. Assuming roughly 75% of those are 65+ and 20% for 50-64. Max boosted doesn't help much.

@MvonRen @uncertainvector Mach 1 is a really simple benchmark and any un'IDed aircraft flying that fast should raise eyebrows. No current commercial/private aircraft can fly that fast.

@JeffSchogol I think that estimate is very high. The confirmed number of vaccinated people who died is much higher than most people think and not considered at all in the paper. These aren't complete numbers and don't include the Dec-Feb spike.

House Intelligence Counterterrorism, Counterintelligence, and Counterproliferation Subcommittee to Hold Open Hearing on Unidentified Aerial Phenomena

Washington, D.C. – On **Tuesday, May 17, 2022**, at **10:00 a.m. EST**, the House Intelligence Counterterrorism, Counterintelligence, and Counterproliferation Subcommittee, chaired by Congressman André Carson (D-Ind.), will hold an open hearing on unidentified aerial phenomena. Following the open portion of the hearing, the subcommittee will hold a closed, classified briefing.

"The American people expect and deserve their leaders in government and intelligence to seriously evaluate and respond to any potential national security risks – especially those we do not fully understand," said **Chairman Carson**. "Since coming to Congress, I've been focused on the issue of unidentified aerial phenomena as both a national security threat and an interest of great importance to the American public. And I'm pleased to chair the first open Intelligence Committee hearing on these events. It will give the American people an opportunity to learn what there is to know about these incidents. And I look forward to hearing from our witnesses on this critical matter."

"There's still much to learn about unidentified aerial phenomena and the potential risks they may pose to our national security. But one thing is sure – the American people deserve full transparency, and the federal government and Intelligence Community have a critical role to play in contextualizing and analyzing reports of UAPs," said **Chairman Schiff**. "The purpose of this hearing is to give the public an opportunity to hear directly from subject matter experts and leaders in the Intelligence Community on one of the greatest mysteries of our time, and to break the cycle of excessive secrecy and speculation with truth and transparency. I'm grateful to Congressman Carson for his continued leadership, and push for transparency, on this important issue."

Also likely that vaxxed people stopped taking precautions because they believed they were fully protected . . which they weren't. Stats below.

@IsGodanatheist @denise_dewald 97 times more likely, without any underlying numbers to back that claim up. I'd like to see speciifcs, because numbers I linked to are from CDC and very speciifc. You wrote 97% of deaths were vaxxed. That is, again, disinformation.

@JBDC @JonathanEsslin3 @treblemaker2020 @whynotjustblank @dav1dsm1thDawk Why do vaxx apologists always use the vaxx dose number? It's very misleading. You can only die once.

@HighStrangenes3 @mikedamante @JeremyCorbell You're clueless. It's not that difficult to figure it out of you knew how to do some research. Unless you really think Rogan is keeping a scorecard as to who's supporting him now or not. Keep trying though.

@TheProjectUnity I couldn't agree more. Every UFO person was trying to get on Rogan's show, people were supporting viral campaigns to get other UFO folks on Rogan's show. Now that Rogan's show is under fire, I think the UFO community owes him support, since he's done quite a few UFO shows.

@THCWaves @originalpin @Crypto42069 I never said they didn't work to a point. When a minority of the people have the majority or the worst outcomes, it's pretty obvious. But I'm estimating, let me stress that, the total of vaxxed deaths is likely around 60K at this point.

@ABC This story is garbage. No mention that CDC stopped recommending J&J vax or that the death toll for 0-17 yo's is 748. It's marketing masquerading as journalism.

@originalpin @THCWaves @Crypto42069 And how did that work out? From the 6 month period Aug-Jan last year and this, deaths are down barely more that 20K, even with a weaker variant dominating the last 2 mos. and not factoring in deaths from the vaccine, which is still a dodgy number but . . . .

@THCWaves @originalpin @Crypto42069 That's not accurate. Breakthrough deaths and cases started right away. "Breakthrough" was always a misnomer, implying they were anomalous. They never were.

@espiers @sadiesocksjake That is clearly not what's being said there. Obviously, no uninfected person, vaxxed or not, can give the infection to someone else. Why would someone even use that as a point? Hahahahha!
