

Footnotes for [Desert Rat #29](#)

1. [gypsy] Gypsies are not Hungarian in origin. We had thought they were Rumanian, but it turns out they are a tribe that originally migrated from India. [[Encyclopedia entry](#)]
2. [various languages] In German, Norwegian, Polish, Czech, Russian and Serbo-Croatian. We oversimplify, however, because snow is *neige* in French and similar words in other Romance languages. We know a word for snow existed in PIE from the evidence of other ancient languages that were recorded.
