

[The first message, now lost, asked for verification of the portion of the Groom Lake map linked to the Area 51 page, since the author had "good people planning recon missions behind the line."]

Sorry, I cannot cooperate with any "recon missions behind the line of the groom lake area." Grow up.

Glenn Campbell

In a message dated 95-10-13 15:18:50 EDT, you write:

<< Sorry, I cannot cooperate with any >>

I too can edit a message drawing attention away from the question. I did not ask you to cooperate with a recon team. I asked you to confirm the veracity of a map on YOUR web page. Sir, I am adult enough to refrain from derogatory statements such as "grow up". I find your letter insulting, and I wonder if it is not a reflection of your UFO network.

I underestimated you. I thought you were seeking some line of truth, but I now believe you to be a fraud. I feel sorry for the people that don't question what you distribute, if they had, perhaps they would see your MUD. It is often times those most involved that spread the most disinformation. Please do not misconstrue this as hate mail, and rest assured I will no longer bother you, but I will be damned before I let you get the best of me or the general public.

[The following was received after publication of the above letter in a draft edition of Desert Rat #31.]

I enjoyed the way you drew attention away from my question by editing my mail. I did not ask you to cooperate with any recon mission. I asked you to verify the veracity of information contained on YOUR web page. I also asked about the condition of a link that I was having trouble with (again from your page). If you do not expect people to utilize the information that you display (I.E. questioned map) then why add it to your page. Oh I know, its for entertainment right, why else would you tell me to grow up, unless you were outraged at the thought of someone actually attempting a mission. I've noticed that you are exempt from this perspective (judging by the articles that you display about yourself). Anyway it is clear enough that you offer only mud (truth mixed with lies) to the GENERAL public. It also wouldn't surprise me to learn that you are a victom of disinformation, that would explain your popularity. Popular people are often exploited upon through the media. Any way, just in case you are for real, then you willk now, as do I, that Wakenhut (not really) also puts to use red and blue ford bronkos, much newer than those that react to perimter alarms, and they are equipped with sincgards radios (radios that are capable of frequency hopping) in dual and used in ghost mode complete with keys. Of course we both know (yea right) that sincgards is only authorized for the Army and Navy. I would like to beleive that I am man enough to dismiss your "grow up" message, and that I am above derogatory statements, but in light of your page and mail I must say..."Get Real". And I mean that literally. I won't bother you any more.

out.
