Subject: "New Area 51" in June Popular Mechanics

In the June Issue of Popular Mechanics there will be an article titled The 'New' Area 51. In the back of the May issue it says this. "All is quiet at Area 51, home of America's supersecret spyplanes. That's because Area 51 has been moved. Well tell you why --- and where."

Does anyone have any ideas on this?

Craig S.
