Subject: Underground Railroad from Mercury to 51, Navy Insider Claims

Last week at my business in Reno, I met a new customer by the name of Dave who is a retired Navy officer and who claims to have worked at NTS and lived at Mercury from 1979 to 1986. He said he worked on several non nuclear projects which included occasional trips to Groom Lake/Area 51 via an underground rail system which ran 6 to 8 times daily from Mercury NTS area to Groom Lake and also ran to other places which required additional security clearance. Do you or anyone else out there know if this could be true? He also claims that he was only allowed to "level 8" at Groom Lake and to access below this required special clearance. He did not claim to work on any extra terrestrial projects, but that rumors were rampant that several "non terrestrial" flying craft were under study. Anyone have any input or comments?
