Subject: Interesting Location!

Hello,

This is DL Sherman. My publishers have informed me you have published a page dedicated to my book. I'm honored, as I have visited your pages a few times before. (I scan the UFO/alien related pages for any 1st level accounts that I might recognize).

I felt compelled to jet out a message to you because I thought it was a curious location for my story... in the Area 51 section. My story has nothing to do with Area 51 and to be quite frank, I haven't much knowledge of the place. (I wish I did; my book would have been even more earth shattering!) Although, I have heard a great deal through the "classified grapevine," but I have no 1st level accounts of anything there. Anyway..... just thought it was interesting to note. You may want to start a new area altogether. The information that will soon be released through my book will definitely warrant a new section. Cheers!

DLS

P.S. I liked your comments about WM Publishing's "pyramid scheme." That's how I perceived it at first as well. In the big picture though, it's an excellent method of marketing such a high profile story. But that's not my area. They're the marketers, I'm just the author. But it's a subject that will cross all gender, education and nationality lines. It affects us all in a huge way. There is a BIGGER picture out there and very few people are aware of it. (Uh-oh, here I go sounding like an X-File commercial ... I have to be careful of that...when the media's imagination sometimes skirts the edges of reality it becomes dangerous to the credibility of the truth.....)

Cheers again!
