hello all

this is about AREA 51.

this area 51 is off highway 371 in new mexico U.S.A. Since the 1950's this vast area has been completely off limits to anyone without government agency clearance. This particular area is so top secret that the warning signs on the fences around advise trespassers that the agencies involved have authority to use fatal force

however this has not entirely stopped everyone from entering this perimeter. Startling evidence from a series of source's prove conclusively that the u.s. government have effectively been using, testing and investigating alien technology since the 1950's.

This site has been strenuously denied by the U.S. government as being of any world wide significance but workers from the secret desert military hide away have stated reports of the real goings on inside area 51.

One such worker who refuse's to be named for fear of reprisals from M.I.B's (men in black reportedly from unknown government agencies who intimidate and force UFO witnesses into refuting their statements). has given evidence that he himself has worked on at least two of eight alien craft hidden in the base he describes the outside of the crafts as made of some kind of metal but with no visible seams or joints, as if the craft were made of wax melted molded into shape and cooled.

Also this individual claims other workers at the base wore badges with the marking M.J (i can reveal that this marking could very well be related to MAGESTIC TWELVE, which was a covert operation started by president Harry Truman shortly after the Roswell incident. This operation allegedly brought together the forces of the top scientists, top intelligence agencies and other such elite forces with the objectives to :

- 1 discover how this new technology works
- 2 harness its potential as a military weapon
- 3 to keep other nations and indeed its own citizens unaware of this startling discovery at all costs

to receive other information about this area 51 and also to hear about actual aliens at the base send me some posts

thanks shane

=====

From Glenn:

I've always wondered where the "secret deserts" were kept.
