No, that sounds to me like he really was there. If you live near a place (but not in it), you are more likely to remember how it is pronounced than how it is spelled. If you are not familiar with an area and are just making it up, then you will look at a map and get the spelling right.

The Ufomind website does not actively collect pictures, but we will certainly link to it or provide storage if someone else produces it. --GC

To whom it may be concern.

I have visited inside UFO.
I have familiarized with a construction of a drive UFO.
Henceforth its principle of an operation already more not a secret.
This drive can be made in terrestrial conditions, in any research
laboratory of electric motors.
To whom this information will be interesting?

I shall be very grateful, if you will answer me by E-MAIL:
dbolat@dominet.in.com.tr (or)
bpg@clinet.fi

Yours faithfully
