

# Satellite images of Area 51

From: "Randall J. Stachelrodt"  
Date: Fri, 01 Jan 1988 18:36:46 -0800  
Subject: Satellite images of Area 51

I have been looking around the web, and have found a few interesting pictures of Area 51. They can be found at the following addresses:

1.) <http://www.frogi.org/danz/GroomDetails.jpg>

This doesn't show any buildings, but it is a good image of the terrain around the base, including some large craters that I haven't seen referenced anywhere else.

2.) <http://www.cs.bgsu.edu/~jzwodn/ufo/Groomlake/Groomlake-1968.gif>

This is a satellite photo of the base from 1968. Any and all of the newer buildings are obviously not shown, but it is pretty clear, and does show the general layout of the base.

3.) <http://www.cs.bgsu.edu/~jzwodn/ufo/gifs/a51-1994.jpg>

This is a photo of the same area as #2 above, but is newer (from 1994). It is, however, not as clear as the photo from 1968.
