Subject: Aerial "Hockey Puck" video taped in Phoenix

[This report is not very satisfying, but Arizona, Utah and Mojave Desert are part of our area of UFO interest for this mailing list, so we ought to pass it on. -- GC]

Subject: Video from Phoenix continues.

Last week a local skywatcher in the Phoenix area videotaped a strange looking black ball flying over the valley. The object returned on Sunday January 12th and Mike DeVarennes taped this strange object again. Except this time the object was much closer than last time and was hovering at a very low altitude. The video shows a black puck type object hovering with the camera locked down on a tripod and trees are seen on both sides of the object. The most interesting thing about this one is the rapid start and stops the object makes. It does a quick series of 180 degree turns and bobs like its on water. Also noted it appeared in almost the same spot as the last video at nearly the sametime of day and just over 1 week apart. Making this the second video shot in Phoenix and 1997 has barely begun!

You ought to publish more specifics about this. Ideally, you should create a page on the web and let us know the URL

A link can then be made to it from one of the index pages on our server like <http://www.ufomind.com/ufo/topic/sighting>
