Subject: Aurora at Davis-Monthan??

I was riding south of Tucson with my Girlfriend last Wed. Morning when we heard a really loud sonic boom. I mean REALLY loud. We had the radio blasting and it shook our car really hard, I could clearly hear the crack and I almost swerved off the road. It was right after sunrise so the light was just coming above the horizon. I got out of my car and saw doughnuts on a rope, just like they have been described to me. My girlfriend confirmed it when I made her get out of the car and look. Anyway, obviously that proves nothing, but Davis Monthan is just a few miles away. I have always thought of the base as pretty simple, with little or no classified operations going on there. can anyone else in the Tucson area confirm this?
