Subject: Billy Cooper

For fear of legal action, I will not call Mr. Cooper boorish, impolite, or paranoid and will hereby declare that the following may not be entirely correct and is put forth in the interest of public discussion and is in no way, shape, or form intended to be an attack on the above mentioned individual. If I am incorrect, by all means correct me.

All I know about him is from some of his writings and from previous email outbursts of his. Apparently, he was in the military in some capacity that gave him access to various briefing documents concerning USG involvement in alien contact. I believe he mentioned a Project Majority that among other things had Kennedy assassinated because he was going to announce to the world that we had made contact with ETs. He also goes on to say that the US is riddled with underground alien bases and that the USG had unsuccessfully attempted to destroy some of these. One in particular is in Dulce, NM and is called 'Nightmare Hall' and is the sight of hideous genetic experiments. He goes on to describe some weapons systems that the US developed to combat the aliens--the only one I remember is the Excalibur missile, which would be shot into the ground where it would penetrate the alien base and then explode.

Another aspect of Mr. Cooper's story is that the whole alien thing is really a government conspiracy--make it appear to the world that the aliens exist and are hostile and use that to unite the world under one government (ours, of course). I have not figured out how he can on one hand say the aliens are real and on the other say they are not, but perhaps that is just short-sightedness on my part.

I welcome corrections if any of what I have said is untrue or misunderstood on my part.

james
