# Bob Lazar's Mainframe Computer

From: **Jim Dawdy**  
Date: Wed, 11 Jun 1997 20:16:43 -0800  
Subject: Bob Lazar's Mainframe Computer

In a previous posting:

```
> "Intel using captured alien technology to build a revolutionary  
> processor"  
<<SNIP>>  
> Bob Lazar, a physicist and computer expert (who is one of  
> the few individuals in the world to own a mainframe computer),
```

```
<SNIP>  
Um, actually anyone who cares to can buy surplus mainframe computers  
from the government, usually for a couple hundred bucks. WHY anyone  
would want to buy an outdated, electricity guzzleing monster is beyond  
me (looks cool in the living room? Keeps the place toasty warm during  
the winter?).
```

However, if you always wanted to grow up to be just like Bob, here is  
the URL for the Defense Reutilization Marketing Service (govt surplus  
auctions).
