Subject: Test Evaluation Command and Control System

Hi all,
I was doing a Metacrawler search for AFFTC and found this:

<http://www.tspi.elan.af.mil/teccs.html>

TECCS stands for Test Evaluation Command and Control System which "interfaces Surveillance Radars, Tracking Radars, local Cinetheodolite cameras, and Global Positioning System (GPS) data to the various distributed consoles, and generates many real-time flight information and coordination displays as well as airborne vehicle, satellite, and simulated trajectory acquisition data for use by various range sensors including Radars, Telemetry antennas, and Cinetheodolite cameras."

Some of their locations are:

1. Edwards AFB Flight Test Center - CA
 - Ridley Mission Control Center
 - NASA Dryden Flight Research Center
 - Downfall/PIRA Bombing Range
 - TSF - Technical Support Facility
 - B1 Test Facility
2. Utah Test and Training Range - UT
3. Tonopah Test Range - NV
4. China Lake Naval Weapons Center - CA
5. Dugway Proving Grounds - UT

They have some pictures of the displays, one of which:

http://www.tspi.elan.af.mil/images/t7_bg.gif

shows how they see our favorite area. Nothing spectacular, but I thought I'd pass it along.

james
