Subject: Integratron Open House

Ok youse guys, hammer a hole in your busy schedules for this one.  
At \$7 a head, this is the only bargain available at the Integratron; any  
other event is \$100 & up.  
My approach to these folks will be strictly non-argumentative, keep my mouth  
mostly shut, & drink in the lunacy.

=====  
From List Moderator:

The Integratron is a dome-shaped building built by George Van Tassel  
to channel "energy" in some manner. It is located in the Mojave desert  
about 2 hours from Los Angeles and about a mile from Giant Rock,  
site of many 1950s UFO gatherings.
