The X-15 reached speeds up to mach 6.7 If it was shown as "white" it may have been an illustration of the rebuilt #2 aircraft called the X-15A-2 which at one stage was coated in an experimental spray-on heat shield material that appears white in pictures but was actually a very pale pink I believe.

check the following url for a good photo:

The 2 aircraft *could* have been a regular X-15 and the X-15A-2
