Hello!

In reference to your post to the Area-51 mailing list:

Lazar's theory actually works pretty well. The reason you wouldn't get an allmighty suction effect is quite complicated. Put very simply (and this is far too over simplified), space-time is bent anyway and the space-time fabric is very resilient. We can punch a hole in it at one point and another out at another point and the fabric will instantly repair itself. Since all travel is through the medium we call space-time, whenever we move we are in fact doing this. The only difference with Lazar's saucers is that they are doing it over a greater distance. To summarize, our 4-D universe is one large doughnut-shaped hyperstructure. For more info, you should read HyperSpace by Michio Kaku. It's ISBN is 0-19-286189-1 and it costs £7.99.

Feel free to write back if you wish.
-Ian :-)

PS It is in fact completely different from 'warp drive theory'. With this, the theory is that space is comprised of two layers and that one can travel between them at infinitesimal speeds. For info on this, see the book entitled: The Complete Schematics Of The USS Enterprise 1701-D.

Date: 15 Dec 1996 04:23:52 GMT

to LaLa

Thank you for your interest in the scheduled THOUSAND MAN MARCH INTO AREA 41 (41?????? -Ken) IN 1998. The scheduled event will take place at the very western end of Groom Lake Road (by the open space right next to, i.e. either right side or left side of the Warning Signs post area on Groom Rd.). All you have to do is just to SHOW UP early on the morning of June 6, 1998. That's all you have to do., There will be hundreds of people there. Just follow the crowd. If you need maps to the area, please go to: <http://home.aol.com/GroomWatch> , or just e-mail me at: GroomWatch@aol.com, and give me your regular snail-mail address. Thanks, from NORIO (GroomWatch@aol.com)

From: "Zero" <akazero@pe.net>
Subject: **Mars Attacks [review from Pahrump]**
Date: Tue, 17 Dec 1996 09:14:28 +0000

From Agent Zeros column in the Pahrump Valley Gazette.
Slightly edited for internet distribution. [AZ]

The Chairman of the Joint Chiefs, a battalion of soldiers, dignitaries sitting in the grandstands and (of course) the media. All awaiting the arrival of aliens from outer space. Where? Why Pahrump, where else?

Yes, it's true (at least in the mind of Warner Bros.) aliens make their first contact in Pahrump, Nevada.

Friday the thirteenth marked the release of Mars Attacks. Another in a string of big budget movies with a decidedly alien theme. And (as everyone knows) when you make a movie about space aliens, you must include the state of Nevada.

Mars Attacks is billed as a comedy. Kind of a cross between Independence Day and Doctor Strangelove, with some 1950's Sci Fi thrown in for flavor. It sports an all-star cast and the usual flashy special effects. Although, I found it a bit lacking in the comedy department.

Even though Pahrump is prominently mentioned in the film, the actual location for the Martian landing set was Red Lake, Arizona, a dry lake 20 miles outside of Kingman - complete with a copy of one of the old wooden "Welcome to Pahrump" signs. [if you've ever been to Pahrump and Kingman, you'll know they share a great open expanse of desert. So I don't understand the reason for the switch? --AZ]

Not everything in the movie was fake. They did use real footage of the Landmark Hotel and Casino demolition during the Martians attack on Las Vegas. The Yesco sign graveyard, the Luxor and the Strip were also featured in living color.

The Martians destroying Vegas came as no great surprise. It seems Vegas destroys itself and rebuilds every few weeks anyhow. The Martians just did the demolition for free!

The lower half of Nevada is quickly becoming the prime location for Hollywood Extraerrestrials. So I suppose (if there are indeed space aliens) they will have seen all this publicity and choose to land somewhere in southern Nevada when they visit Earth - it's almost become the proper protocol.

[on a scale of 1 to 10, 10 being best. I give Mars Attacks a 4]

From: Mike Smith <mickey@anix.co.uk>
Subject: **AREA 51: Interesting British info on Triangles**
Date: Tue, 17 Dec 1996 17:20:01 +0000

Hi All,

The following are extracts from a british ufo e-zine(the UK UFO Network) and maybe of some interest/relevance to the list.

Apologies if this information is already known to the list.

I have no desire to be repetitive. ;-)

Mike

Source: Daily Express newspaper
Date: Tuesday 3rd December 1996

UFO left soldier in a trance

A soldier under hypnosis has recalled how he was left dazed and terrified by a UFO.

News of the alleged incident, which happened while he was on night exercise on Salisbury Plain with five comrades, has just been revealed.

Put into a trance at the request of close encounter sleuths from the magazine UFO Reality, he told how the party was zapped by beams of light from a mysterious black triangular aircraft.

The alleged sighting, in 1990, happened in a part of the area said to house a secret Ministry of Defence compound.

Investigators believe it could have been connected with top secret technology rather than an alien craft.

[Snip - Another very interesting but long story of an aparent military exercise removed - Will repost in full if required]

In a follow up to the above, I thought that some of you may be interested in the following which I received from a friend:-

1 A small 30ft black triangular craft has been seen by members of the public on the ground at WARTON (British Aerospace)

2 It is believed that it is a prototype UAV, designated HALO and can perform up to 9G turns.

3 It has been seen by numerous people in the Meols Cop, Banks and Hesketh Bank areas north of Southport.

4 Test flights are accompanied by a tornado, callsign "Tarnish 3"

5 A D-Notice has been served on the BBC warning it NOT to report on Britains Stealth program.

6 A larger triangular craft is in operation over Britain and has been seen at Boscombe Down.

[Snip]

British Stealth - a report
Date: Tue, 22 Oct 1996 09:46:30 -0100

To: skunk-works@gaia.ucsf.edu
From: John Burtenshaw <jburtens@bournemouth.ac.uk>
Subject: **British Stealth - a report.**

[snip]

There appears to be something strange flying around North West England.. so strange that the folks who live on the Lancashire coast are winding themselves into a frenzy over sightings..."UFO" sightings.

Now we all know this can't be, but...there is substance in the various reports, and they all seem to indicate a dark triangular shape, with the ability to hover, and climb away at high speed.

[snip]

Now here is what I found on dejaneux:

[begins]
Subject: **Black Triangle Conspiracy**
From: Timothy Waters <tim@frwaters.demon.co.uk>
Date: 1996/11/30
Newsgroups: alt.alien.research

I have just finished reading a british UFO magazine Called UFO Reality and would like to bring a small article to your attention concerning The Black Triangle UFO's

the article is as follows

A top BBC executive let slip recently that there is a D-Notice on media reporting of the so called 'Black Triangle'.

The executive- who cannot be named is the former producer of a very popular BBC science program. He told one of our team that the black triangular 'craft' first witnessed by hundreds in the Hudson Valley region of the United States(1988/1989) then by thousands in belgium (1989/90) and more recently by thousands more in britain, has been "heavily D-Noticed" by the government. For this reason the BBC will not be reporting on the enigmatic craft, no matter how many reports they recieve. According to the former 'science program' producer the reason the government has seen fit to slap a restrictive notice on reporting of the triangle is because so far as the government has secretly informed the BBC the craft is part of a new secret military project, and as such must be protected under the secrecy laws. If this is the case, however, it surely begs the question:

If the so called Black Triangle is a secret military aircraft, then what is it doing hovering over residential areas and frightening people half to death. Like the BBC licensing agenda something somewhere simply does not add up...

From: "James R. Graham" <jrg@world.std.com>
Subject: **A post from FAS online conference re:X-33 and Aurora**
Date: Tue, 17 Dec 96 19:10:50 -0400

Hi all,
This may be a fringe topic, but if Aurora was tested at A51, then maybe not so fringe. This was taken from the FAS's online conferences (<http://www.fas.org/irp>)--you have to sign up for access.
james

On July 2, 1996 RELEASE it was announced that LockMart was selected to build the X-33 test vehicle

Well shut my mouth!!! This was really a most surprising development, since LockMart had been the least enthusiastic about X-33, and seemed to be offering the proposal with the highest technical risk.

Rockwell seemed to be the odds on favorite, since their concept was basically the Shuttle-II that NASA has studied to death for over a decade, and they really sorta needed this contract to remain a prime contractor, as opposed to merely a hewer of wood and drawer of water for other primes.

MCDAC seemed to be the second most likely, since they actually had some hardware-in-loop experience with Delta Clipper, and at least they were proposing merely a new airframe for the SSME rather than the riskier approach of both new airframe AND new engines.

So I offer [for entertainment value only, don't try this at home] the proposition that perhaps there is more going on here than meets the eye, and that perhaps the LockMart VentureStar has a somewhat more extensive engineering heritage than some three-decade old aerospace tests.

The X-33, a one-half scale model of the Reusable Launch Vehicle (RLV) sure sorta looks not too unlike our old friend Aurora.

Lockheed Martin will design, build and conduct the first test flight of the X-33 test vehicle by March 1999, and conduct at least fifteen flights by December 1999. NASA has budgeted \$941 million for the project through 1999. Lockheed Martin will invest \$220 million in its X-33 design.

Frankly, it is a bit hard to see just how this is all gonna happen unless LockMart already had a running start with a couple of gigabucks worth of Aurora back in the 1980s.

The X-33 will be a remotely-piloted, sub-orbital vehicle, capable of altitudes up to 50 miles and speeds of Mach 15, which sure sounds a lot like Aurora to me.....

The VentureStar team includes prime contractor Lockheed Martin Skunk Works, Palmdale, CA; Rocketdyne, Canoga Park, CA; Rohr, Chula Vista, CA; and AlliedSignal Aerospace, Teterboro, NJ. -- all of whom sound like folks who might have worked on Aurora.

And, by the way, the Mach 8 X-34 vehicle, to be built by Orbital Sciences Corp., which will demonstrate technologies necessary for a reusable vehicle is another vehicle that seems to have sprung fullblown from the forehead of Zeus....

Subject: **Micheal Wolf's corporation - a lawyer's reply**
Date: Wed, 18 Dec 1996 07:41:55 -0800

[Earlier on this mailing list, Tom Mahood and myself each reviewed "The Catcher's of Heaven", a novel purporting to be a "roman a clef" by someone who worked on an an alien program for the government. We found the book unsubstantial, full of lot of philosophical ramblings interspersed with a straight, unattributed retelling of the Lazar story, with little added. Since the book is classified as "fiction" to begin with, there wasn't much to work with.

In a later message (in the digest preceding this one), I sent an email to the contact for the "Daniel Wolf Memorial Foundation for Children, Inc." asking for corporate information. According to the book jacket, all proceeds from its publication go to this foundation. Following is the reply I received. -- Glenn Campbell]

Subject: **Million Man March Marches On (a.c.a51)**
Date: Wed, 18 Dec 1996 07:52:55 -0800

From: groomwatch@aol.com (GroomWatch)
Newsgroups: alt.conspiracy.area51
Subject: **Re: Appreciation towards Glenn Campbell's AREA 51 RESEARCH CENTER**
Date: 18 Dec 1996 03:45:26 GMT

This is in response to Mike Smith's inquiry on how the THOUSAND-MAN MARCH INTO AREA 51 IN 1998 is coming along. Yes, Mike, the plan is coming along pretty good. In fact, inquiries are coming from such places as New Zealand, Canada as well as from many States in the Union. People are putting the date in their calendar so they could plan for the event in conjunction with their vacation time. The reason why the gathering will probably be successful is because it is very simple. All one has to do is just SHOW UP at either side of the open space adjacent to the last Warning Sign posts right at the boundary on Groom Lake Road. It's as simple as that. Even if a couple of hundred show up, I will consider that to be successful. However, I do feel that (judging from the interest created already in this event which is still 18 months away) there will be twice as much, at least. One night in the month of December of 1990, we had organized a 40-car caravan on the Mail Box Rd. Imagine the consternation felt by the Lincoln County Sheriff patrols as well as the anonymous security force deployed that night who went circles all over the dirt roads both on the Mail Box Rd as well as the Groom Lake Road, not to mention the probable "panic" felt by those watching down from high atop Bald Mountain Security Control that night and watching 40 cars proceeding south on the Mail Box Rd!! In 1993, we organized a huge conference in Rachel that attracted at least 200 people from all over the States, even though the conference was stained by the unexpected ramblings by my former colleague whose name I don't even need to mention. (I am no longer associated with that individual). So, getting a couple of hundred people on June 6, 1998 to gather at the site would not be too difficult a task. However, several points are needed to be brought out for clarification about this unprecedented event. First of all, the Thousand-Man March Into Area 51 in 1998 is NOT limited to men! This is open to anyone, men or women!! I had stated sarcastically that we would march right past the warning signs and up to and past the Guard Shack, right down to the administrative office building by the lakeside, but REALISTICALLY, who would be CRAZY ENOUGH to go ahead and take the steps past the warning signs??? Probably no one. But even if there may be some crazies out there that dare go past the signs and up to the Guard Shack, I highly doubt that shots will be fired directly to the people, especially with the presense of the media, unless malicious, provocative acts, such as firing of shots towards the security trucks are made. The last thing the 'government' wants is a scenario reminiscent of Tianamen Square in China. This will never happen in the U.S.!! In fact, to the best of my knowledge, not a single life has been taken by the security, yet, of any citizen that wandered into the adjacent area unintentionally. Sure, even now, even if you dare go up to the Guard Shack, one will be simply detained right there on the spot, with a stiff fine and several days of time in Lincoln County jail. So, the first point is that this will PRIMARILY be a large symbolic gathering...a symbolic show of force to show our so-called 'government' (which tend to use our hard-earned tax dollars for some dubious, nebulous programs) that we have a right to monitor the accountability of such programs, particularly those programs that may be violating the environmental statutes, such as at the Groom Lake complexes. With a gathering of several hundred people, the media

is almost GUARANTEED to be there. June 6, 1998 will be a "symbolic" gathering at the site, with speakers, music, etc., etc. The reason we chose that date is purely because of symbology....."666" is universally recognized as a Satanic number, connotation of "Evil". 1998 is the first and the only year (coincidentally) which divided by three equals 666!! Why divided by three? Again, a symbol of trinity. June 6, 1998, beginning at 6 a.m. and ending at 6 p.m., is symbolically the ideal day to voice our concerns about anything that may be taking place behind the veil of excessive secrecy that may affect our general well-being one way or another. Maps will be mailed out to those who wish to be there. It's as simple as that. Also, we WILL be notifying the Nellis Air Force Base, the State Highway Patrol, as well as Lincoln County Sheriff Dept. of the event way in advance. However, while attention is being drawn to that portion of AREA 51, we will not be responsible for any intrusion by others into sensitive areas of the Test Site who may take advantage of the diversion created at the aforementioned location. Rumors are that several groups may use this event as a diversion to draw attention away from their own plans, such as an attempt to cross into the area from the South, from Mercury area, or from the east area, such as south of Paranagat or from the West area, etc. But that's a totally separate subject matter for right now. Lastly, as far as temperature-wise, sure, the June weather during the daytime is hot in the desert. However, the nights are fairly comfortable. I hear about the dire warnings about how hot it gets there, etc., etc. Nothing to worry about. I would prefer the hot desert in the summer to freezing temperature in the middle of winter!! There will be tents available there. But, most important of all, A THOUSAND PEOPLE ARE NOT GOING TO MARCH into the administration building at Groom Lake!! That's for sure!! Maps will be made available to everyone.

Subject: **Appreciation towards Glenn Campbell's AREA 51 RESEARCH CENTER**
Date: 14 Dec 1996 23:21:16 GMT

AREA 51 RESEARCH CENTER's website (<http://www.ufomind.com/>) is obviously not only the world's largest and best web-site there is in the Internet, but also, in my opinion, the most unbiased web-site on the topic. What is most impressive is the wealth of information contained therein. In fact, it is the ONLY web-site that I can personally recommend to anyone. It does not attract researchers because of fanciful designs, etc. but because of the wealth of information and because it is up-dated very frequently, unlike most other web-sites I often visit. My respect for Glenn Campbell has become stronger than ever. I am a conspiratologist and have a conspiratorial outlook on AREA 51, while Mr. Campbell always seems to take a realistic, unbiased point of view, which is highly commendable. Yet he is open enough to accept our (conspiratorial proponents') presence in his web-site. Thanks once, again, for your continuous effort in bringing out to the public the many issues of AREA 51 that directly or indirectly may affect all of us in the coming years.
Sincerely,
NORIO HAYAKAWA (GroomWatch@aol.com)

Subject: **Green Flash Meteor**
Date: Thu, 19 Dec 1996 20:36:54 -0800

Well, well, So it was caught between Edwards AFB & Groom Lake. Scientists are hunting for it 50 miles too far west. Maybe these things are more normal than first expected:

Arkansas Gazette, Nov.26, 1986

"Fireball not man-made, experts say".

Defense experts Tuesday eliminated "space junk or any man-made object...explanation for a mysterious meteoric fireball that streaked across the Pacific Coast.

The object, sighted at 8:22PM (I saw the GF meteor at 8:45PM). Monday, dazzled stargazers from the CA-OR border to the Los Angeles area.

"It looked like a long, green meteor but it lasted way too long. Arced across the sky toward the ocean, then it just blew up," Roy Jackson of Mountain View CA, said.

"It wasn't space junk or any man-made object re-entering the atmosphere. We don't track meteors," Del Kindschi of the North American Aerospace Command at Denver said. "We heard about it but there weren't any sats or man-made space objects entering the atmosphere at that time." (UPI).

Whoa! That's not all, check this:

The Daily Press
Victorville CA 12-16-96

The Valley's Past in Review
Thirty Years Ago today.

Several Victorville residents reported seeing a large, green object that hovered over the Victor Valley for several minutes. "In my opinion, it had a marked similarity to a comet I witnessed in Twenty-Nine Palms last year about this same time," said Lt Ligon from George Air Base. (End)
