

Below is the text of letter that Gary Schultz passes around at his conspiracy talks to indicate that the government is trying to suppress him. He says "WWT" is "Wackenhut World Technology," supposedly a sinister government contractor. Gary says the letter is warning him away from Area 51.

October 15, 1990,

Mr. Gary [blacked] Schultz
[address blacked out by Gary]
Santa Monica, California

Dear Mr. Schultz:

According to our representatives, you have expressed an interest of late in a particular geographical region. We understand fully the concerns of ordinary citizens such as yourself, but rest assured, Mr. Schultz, your focus is quite unwarranted under the circumstances. It may put your mind at ease to know that our elite penal of scientists, politicians and educators is very much on top of this situation. At the same time, however, it's the consensus of these top flight personnel that your ongoing visits to the Southern Nevada region can serve no useful purpose, and may in fact subvert the common goal by disrupting the delicate matters at hand.

Therefore, we must ask you kindly to please refrain from making further visits to the region in question. Most assuredly, we are doing everything possible to support the general welfare and achieve the interests of the community-at-large. Your continued presence will only complicate matters and possibly sabotage the productive inroads made so far. In any case, Mr. Schultz, we feel - and we're sure this is something with which you'd agree - that this matter is something clearly best left to professionals. With the cooperation of loyal citizens, we feel confident that the United States can stay the course.

Sincerely,
[indecipherable signature]
Winston F. Hines

MY OPINION: Who really wrote the letter? Anyone can create a letterhead. I suspect it was another conspiracy buff, as these people are always scheming against each other. One might also suspect Gary himself of writing it, since the letter seems to neatly confirm his world view, but the indirection seems a little too complicated for him. He would make the agency more sinister and not so solicitous.

Who is Winston F. Hines? Could that be a real officer of the Wackenhut Corp. (who probably didn't write the letter)?
