Our Review

Opinion of the webmaster, subject to debate

This book represents one of the handful of competing viewpoints on the Roswell incident. Friedman proposes that two crashes took place on the same night in 1947 -- one at Corona and one on the Plains of San Augustin. The latter claim is based on the testimony of one Gerald Anderson, a pivotal character in this book who has since been widely discredited. Friedman is also a believer in the veracity of the MJ-12 documents, which make their way into this book. Compared to Randle & Schmitt's books or those of any of the skeptics, this one is relatively weak. -- *Glenn Campbell*

Reservations

Friedman places too much trust in Gerald Anderson.

Comparison to Other Books

If you are a Roswell afficiando or historian trying to keep track of the many claims and counter claims the case, you'll want this on your bookshelf, but if you have only a casual interest, you can get by with R&S's [UFO Crash at Roswell](#) and one of the skeptics' books ([Klass](#) or [Genesis](#)). If you want a more interesting book by Friedman, try [TS/MAJIC](#).
