[Explanation of Ratings](#)

Credibility: This category is a rating of the author's intellectual discipline and the strength of his argument (which are very high), not the veracity of his claims (which could be false in spite of the strong argument).

Sagan's bestseller on the history of astronomy, forming the basis for the PBS television series of the same name. -- *Glenn*

Information from the Publisher

Always supportive

From the Book Jacket...

Seventy weeks on the New York Times bestseller list

One of the best-selling science books ever published in the English Language.

"Carl Sagan is one of the most brilliant scientists of our times.... He has done an excellent writing job as he delves into the past, present and future of science, dealing with the mindstaggering enormity of the cosmos in which we exist."

-- Associated Press

COSMOS is like the college course in science you always wanted to take but never know a professor could teach. It's magnificent. Sagan writes beautifully... With a lyrical literary style, and a range that touches almost all aspects of human knowledge, COSMOS often seems too good to be true."

-- The Cleveland Plain Dealer
