From the Book Jacket...

Thirty-Three Weeks on the New York Times bestseller list!

Dr. Carl Sagan takes us on a great reading adventure, offering his vivid and startling insight into the brain of man and beast, the origin of human intelligence, the function of our most haunting legends -- and their amazing links to recent discoveries.

"How can I persuade every intelligent person to read this important and elegant book?... He talks about all kinds of things: the why of the pain of human childbirth... the reason for sleeping and dreaming... chimpanzees taught to communicate in deaf and dumb language... the definition of death... cloning... computers... intelligent life on other planets... Fascinating... Delightful."

-- *The Boston Globe*

"A history of the human brain from the big bang, fifteen billion years ago, to the day before yesterday... It's a delight."

-- *The New York Times*

"A history of the human brain from the big bang, fifteen billion years ago, to the day before yesterday... It's a delight. In some lost Eden where dragons rule, the foundations of our intelligence were laid... Carl Sagan takes us on a guided tour of that lost land... Fascinating... Entertaining... Masterful."

-- *Saint Louis Post-Dispatch*

"Will leave the reader exhilarated and tingling... a masterpiece."

-- *Chicago Tribune Book World*
