From the Book Cover

For decades the United States and Russian have been considered the worlds two major super powers. For the United States, the modern flying saucer era began with the report of a crashed space craft in the American desert of Roswell, New Mexico in 1947, but for the former USSR, the modern flying saucer era began in 1908 as villagers from a sparsely populated area of central Siberia, near the Tunguska river, witnessed a large glowing object race across the sky and explode in mid air with the force of an atomic blast equal to over 40 megatons, completely destroying over 2000 square miles of forest.

Ninety years later, ongoing investigations have failed to yield a conclusive scientific consensus or explanation. Was this the result of a naturally occurring meteoric event? Futuristic Military Weaponry? Or the crash sight [sic] of an Alien Spacecraft?

Secrecy since the days od Stalin have shrouded and confused the event... until now. Hear from one of the last living eyewitnesses of this event as well as the experts, including a former KGB officer who describes the cover-up surrounding this event, and how the metallic evidence of an Extraterrestrial space craft gathered by the soviet military from the sight [sic], subsequently disappeared.

Don't miss this revealing account of the events at Tunguska, and decide for yourself the cause of the "Russian Roswell" and the reason for the shroud of secrecy surrounding one of the greatest mysteries of all time.
