[Explanation of Ratings](#)

Credibility = Very High: In general, this category is a rating of the author's intellectual discipline and the strength of his argument (which are very high), not the veracity of his claims (which could be false in spite of the strong argument).

Visual Information = Moderate: Map only.

Bargain = High: Especially useful if you are visiting the area.

A history of the "Marfa Lights" -- glowing orbs seen near the town of Marfa, Texas, for over a century. The author recounts the most compelling of the sighting reports and describes several theories to explain them (neglecting only UFOs). If you are visiting the area, this booklet provides enough information to conduct your own skywatch. Includes a map of the area and an extensive bibliography on these and other "earth lights."

This is a self-published booklet by a local resident. As far as we know, we are the only source on the internet. -- *Glenn Campbell*
