Information from the Publisher

Always supportive

From the Book Cover

"Fifty million stars in our galaxy have the potential of supporting life forms capable of traveling to other planets," says world-renowned authority Erich von Daniken, whose film version of his best-selling book, [Chariots of the Gods](#), gives stunning visual proof that some form of life from outer space landed on Earth centuries ago.

It took five years for von Daniken to document, on film, the physical evidence of visits by galactic travelers who came to Earth. Just what they did here and the influences they left behind is the core of the film.

In search of basic truth, the film, [Chariots of the Gods](#), takes the viewer in to the far reaches of underground caves and tombs, and to the tops of desolate mountains on every major continent to show the evidence von Daniken has been collecting. Although this controversial film may provide the answers to age-old mysteries, it may be the beginning of an entirely new set of questions.
