[Explanation of Ratings](#)

Research Value = High: An absence of footnotes and a bibliography is a slight annoyance.

Visual Information = Moderate: B & W Photo insert includes the best known Hudson Valley UFO photos and shots of local settings, but not in great detail. Photos could have been better.

Style = Stylish: Easy and fun to read.

Chronicles the wave of sightings in the mid-1980s of a light formation passing over New York's Hudson River Valley and parts of Connecticut. The lights seemed to indicate a massive triangular or circular craft moving silently through the sky. The lights were witnessed by many credible observers, including police officers and security guards. In one incident, a light formation hovered over the Indian Point Nuclear Power Plant near Peekskill, New York, for more than 10 minutes. That incident alone makes this book worthwhile. Overall, this is a fascinating UFO study. The revised edition includes sightings collected after 1985. -- *Glenn Campbell*

Reservations

Although this book makes compelling reading, we suspect that there is another side that isn't being represented here. We would like to hear what the skeptics have to say.

Comparison to Other Books

This book is probably the best place to start when studying the Hudson Valley sightings.

Publisher's Synopsis

In 1983, just a few miles north of New York City, hundreds of suburbanites were startled to see something hovering in the sky. They described it as a series of flashing lights that formed a "V," as big as a football field, moving slowly and silently.

It has been seen many times since then, yet the media has remained silent about it, as has the military, the FAA, and the nation's scientists. Now, in Night Siege, expert UFO investigators reveal the amazing evidence that cannot be denied and the more than 7,000 sightings that cannot be dismissed.

A classic in the field, Night Siege has been called one of the best researched and factual UFO books to date. This second edition is revised and expanded with sightings up to 1995.

From the Book Cover

CAN 7,000 EYEWITNESSES BE WRONG

They were there to witness the huge, hovering object in the sky, the flashing lights, the eerie silence. They are ordinary people from all walks of life: stay-at-home moms, kids, business people, engineers. They tell their stories here, and that all agree on one thing: they saw the same massive object cruising over their backyards. And it was nothing they'd seen before....

To this day, the military, the media and scientists have remained silent about the Hudson Valley phenomenon. Yet eyewitness reports still continue 15 years after the first sighting. What's going on?

In Night Siege, expert UFO investigators uncover the real story. Night Siege is widely known as a classic in the UFO field for its in-depth reporting of the strange sightings in New York's Hudson Valley in the 1980s. Now Night Siege has been updated to also cover the latest sightings and close encounters -- 7,000 reported between 1982 and 1995.

Are spaceships flying over New York? Seven thousand eyewitnesses couldn't be wrong.

The late Dr. J. Allen Hynek was a professional astronomer and author of The UFO Experience. For 20 years he was the scientific consultant to the U.S. Air Force in its investigation of UFO phenomena. Science educator Philip J. Imbrogno is the author of Contact of the Fifth Kind and Crosswalks across the Universe. Journalist Bob Pratt is a former editor of the MUFON UFO Journal and author of UFO Danger Zone.
