This book looks interesting, at least for its many color aerial photos of the Nazca lines.

Publisher's Synopsis

From the world's best known expert on alien phenomena... an astonishing new explanation of the riddle of Nazca

For years archaeologists have been puzzled over the origin of the massive earth etchings at Nazca, high in the remote deserts of Peru. Discovered in 1927, the gigantic "scrape drawings" on the desert floor have remained one of the world's most enduring mysteries. Until now . . .

Erich von Daniken, the author of more than 20 books on unsolved phenomena with over 50 million readers worldwide, recently uncovered startling new evidence on the riddle of Nazca. In this groundbreaking new book, he exclusively reveals his theory about the mile long "landing strips," vivid etchings of people, birds and animals and immense geometric designs.

To von Daniken, Nazca is a fabulous time machine, like the Great Pyramid. Properly interpreted, it can transport us back to a fascinating, undiscovered past.

This extraordinary book begins with the history of the theories of Nazca's origins and purposes. Then, using integrated photographs, specially designed maps, models and drawings, von Daniken begins to explain his solution to one of our planet's greatest enigmas.

Arrival of the Gods will create shockwaves everywhere the name von Daniken has become a legend.

Erich von Daniken is the author of Chariots of the Gods, Return of the Gods and more than 20 other books on unresolved phenomena. He has been awarded many international honors for his research.
