## Our Review

Opinion of the webmaster, subject to debate

This was probably the first book published solely on Area 51, based on Lazar's S-4 claims. The cost hardly seems worth it, though, since everything here is also available on the internet. Low quality data.

### Comparison to Other Books

For a more credible review of the Lazar claims, see Good's [Alien Contact](#) or Darlington's [Area 51: The Dreamland Chronicles](#).

## Information from the Publisher

Always supportive

### From the Book Cover

With introduction by John Lear.

"Shocking Revelation! Captured Alien Spacecraft Now Being Flown by Military!"

"There is," says the author, "a growing feeling that Top Secret, compartmentalized projects within the military-industrial complex are working on extremely advanced super-technology based upon a study of alien artifacts and hardware found in various UFO crashes. Witnesses in growing numbers have reported seeing UFOs being flight-tested above a Nevada Test Site and film crews have videotaped strangely-maneuvering brilliant objects that appear at scheduled times during the wee hours."
