Our Review

Opinion of the webmaster, subject to debate

Credibility	Research Value	Cultural Interest	Visual Information	Style	Silliness	Wow Factor	Bargain
5	5	3	5	5	2	5	5
Very High	Very High	Moderate	Very High	Stunning	Low	Wow!	Very High

[Explanation of Ratings](#)

Credibility = Very High: In general, this category is a rating of the author's intellectual discipline and the strength of his argument (which are very high), not the veracity of his claims (which could be false in spite of the strong argument).

An impressive and scholarly review of recent UFO cases in Europe by the head of MUFON Central European Section. The focus is on scientific data, and the book displays many charts and graphs. Of special interest is the analysis of anomalous radar returns in Central Europe that seem to show an object travelling erratically at enormous speed. While most other UFO books are anecdotal and sensationalistic, this one seems to offer some substantial evidence. Clearly one of the best UFO books of 1998. Color photographs and illustrations throughout.

Publisher's Synopsis

This book was developed by Illobrand Von Ludwiger under the auspices of the National Institute for Discovery Science (NIDS). This intent was to present hard, credible material about anomalous aerial phenomena observed and reported in Central Europe by using cases that are, with few exceptions, not well-known in the United States.

We believe this book will be a useful tool for investigators and aerial phenomena around the world. It certainly provides credence to the fact that UFOs are not localized to the United States. The radar cases clearly indicate that UFOs are indeed captured on sensor systems that do not rely on visual acumen or human psychology. As the reader will learn, the European researchers, all technically qualified scientists, have gone to extensive lengths to prove that simple, known possibilities for causing these traces have been examined and rejected for cogent reasons.
