## Our Review

Opinion of the webmaster, subject to debate

This book, the first released on the Roswell incident, embodies one of the half dozen competing theories of what happened. In light of recent releases regarding the Project Mogul balloon series, this 1980 book is interesting because it also makes reference to -- and dismisses -- the NYU project. It even includes a diagram of the balloon train.

## Reservations

Mainly of interest to scholars tracing the evolution of the Roswell claims.

## From the Book Cover

## AFTER FIFTY YEARS OF SILENCE.. WHEN WILL THE TRUTH BE TOLD?

The Roswell Incident was the most important UFO encounter of our century. But the facts about the incident are still being hidden from the American public. This groundbreaking book not only explores every aspect of the mysterious UFO crash near Roswell, New Mexico, but also probes the bizarre government cover-up that began within hours of the discovery and has continued right up to the present day.

Only The Roswell Incident dares to ask, and answer, such questions as:

- What can witnesses -- both civilian and military -- tell us now that they were prevented from telling us at the time of the crash?
- Were the CIA, the FBI, and the Air Force all partners in a major cover-up?
- Is it true that the bodies of dead aliens were carted off, in utmost secrecy, by the military?
- Was Preseident Eisenhower on the verge of informing the American public -- and why did he change his mind at the last minute?
- Are the remains of the craft and the internal organs of the aliens still being analysed in military laboratories today?
- And much, much more!
