Publisher's Synopsis

Carl Sagan believed it--now the bestselling author of "Fermat's Last Theorem" proves it. Basing his book on the discoveries being made by the Hubble telescope, data emerging from Mars, and knowledge about life at the extremes, Aczel pulls together everything science has discovered and mixes in probability theory to argue the case for the existence of intelligent life beyond this planet.

"Probability 1 is a clear and accessible account of the prospects for the existence of intelligent life in the Universe. Amir Aczel covers a lot of ground at a level anyone interested in the puzzle of our origins will find easy to assimilate, and his background in statistics and probability theory makes his conclusions compelling." -- John Gribbin, Visiting Fellow in Astronomy, University of Sussex and author of SCHRODINGER'S CAT
