The traditional threats remain. But new, shadowy, and mercurial adversaries are emerging.... Non-lethal weapons are a pragmatic application of force, not a peace movement, ranging from old rubber bullets and tear gas to exotic advanced systems that can paralyze a country, they are essential for the preservation of peace and stability. Future War explains exactly how non-lethal electromagnetic and pulsed-power weapons, the laser and tazer, chemical systems, computer viruses, ultrasound and infrasound, and even biological entities will be used to stop enemies. These are the weapons of the future."</p>	<p>\$24.95</p> <p>2 lbs</p> <p>Add to cart</p>
