Our Review

Opinion of the webmaster, subject to debate

Credibility	Research Value	Cultural Interest	Visual Information	Style	Silliness	Wow Factor	Bargain
3	2	4	3	1	5	NR	2
Moderate	Low	High	Moderate	Sloppy	Very High	Not Rated	Low

[Explanation of Ratings](#)

Silliness = Very High: High silliness isn't necessarily a bad thing. Such items often make amusing gifts or may be interesting as cultural artifacts.
Bargain = Low: In general, items with a low bargain rating are not considered worth the retail price as judged by the useful research data they contain. However, they may have cultural or entertainment value, which is not included in the bargain rating.

(Young readers.) In the battle for the hearts and minds of the nation's youth, skeptic Phil Klass weighs in with this children's book. Klass urges young people: "If you or a friend should should chance to see something in the sky that seems strange, don't jump to the conclusion that you have seen an extraterrestrial craft." In text that is appropriate for children between 8 and 13, Klass recounts dozens of cases where people have mistaken meteors, military aircraft, birds, ball lightning, hoaxes and meteorological phenomena for UFOs. Black and white photos and cartoons illustrate various mistaken objects and how easily that can be seen as something extraterrestrial. As with the pro-alien children's book [Ceto's New Friends](#), we carry this one mainly as a curiosity. We are not sure how children will take it, but adults may appreciate it as another strange icon of the UFO movement. Overpriced given its thin size. -- *Glenn Campbell*

Information from the Publisher

Always supportive

From the Book Cover

Have you, or a friend, seen an Unidentified Flying Object -- A UFO? During the last fifty years, thousands of people -- including pilots -- have reported seeing strange objects in the sky that seem to behave mysteriously. Of the billions of stars in our galaxy, some of them may have planets like our own earth with intelligent creatures. Are these aliens visiting us much like our own astronauts visiting the moon?

The idea that we might have extraterrestrial (ET) visitors is very exciting, and TV programs, magazines, and newspapers would like you to believe that UFOs really are extraterrestrial spaceships. But do you know that facts? Have scientists found any hard evidence to prove that ETs have really landed?

Join Philip J. Klass, "the Sherlock Holmes of UFO studies," in his search for the true story behind UFO sightings. He uncovers many different explanations for the strange objects in the sky, and all of them are more interesting than anything you'll ever learn from TV. After reading [Bringing UFOs Down to Earth](#) you, too, will know what to look for when trying to identify the next "UFO" you, or a friend, see.

PHILIP J. KLASS has spent over twenty-five years investigating UFO reports. He is a former senior editor at [Aviations Week & Space Technology](#) magazine.
