### Publisher's Synopsis

Rand and Rose Flem-Ath present evidence that not only did an advanced civilization once exist on the continent now known as Antarctica, but that it was probably destroyed in a global catastrophe around 9600 B.C. that shifted the continent of Atlantis to its present position in the arctic waters. The authors use Charles Hapgood's theory of earth crust displacement to explain these enigmas: at various stages in prehistory the earth's crust shifted dramatically, causing earthquakes, tidal waves, devastating climatic changes - destruction that could obliterate a sophisticated civilization. By studying the ancient maps, Plato's clues as to the location of Atlantis, and similarities between myths from around the world, the Flem-Aths conclude that a civilization of intelligent seafarers did exist some 12,000 years ago but was destroyed by a geological disaster, leaving only a few survivors to safeguard its legends for posterity. The combined evidence points convincingly at Antarctica, where, under a blanket of impenetrable ice, lies the lost city of Atlantis.

### From the Book Cover

Dramatic New Evidence About the Location of Atlantis... and the Terrifying Disaster Its Fate Foretells

The mystery of Atlantis, the legendary advanced civilization described in ancient tests, has been solved at last. Scientific evidence, exciting new research, and the breakthrough discovery of an amazing Egyptian map prove without a doubt that this lost continent did exist... and reveal where its ruins can be found.

But the fascinating truth about Atlantis also leads to a chilling conclusion about the environmental catastrophe that destroyed it. Now you can find out how the forces that shattered the first great civilization on Earth can happen again, bringing the end of the world to us all!

THE EXCITING PROOF IS IN THIS ACCLAIMED BOOK
