Hundreds of documented cases have been confirmed by researchers across the globe and thousands more are believed to have taken place, but have not yet been reported for fear of ridicule or failure to understand the experience. What might these experiences teach us and what are the implications for humanity? Hopkins reveals his testing methods and illustrates his talk with drawings by the children themselves! This best-selling author and researcher has conducted more than 1,000 hypnotic regression sessions with people who have reported alien abduction experiences.
