[Explanation of Ratings](#)

Bargain = Low: In general, items with a low bargain rating are not considered worth the retail price as judged by the useful research data they contain. However, they may have cultural or entertainment value, which is not included in the bargain rating.

Testor's plastic model kit of one of nine alien craft allegedly housed at Papoose Lake and examined by Bob Lazar. Details adhere strictly to Lazar's claims. Clear shell displays interior of craft, complete with "gravity amplification system" and seating for 3. An accompanying 15-page booklet describes the Lazar story. Kit also includes scale model alien pilots and a security guard, as well as a booklet explaining the Lazar story, and nice color images of Papoose Lake taken by a Russian spy satellite. Designed by John Andrews in consultation with Bob Lazar.

1/48 scale. Finished saucer is 13 inches in diameter. Now includes a free gray-alien kit. -- *Glenn Campbell*

Reservations

Overpriced, given the simple design and few pieces. You are also going to have to invest a lot of money in paints to make it look right.
