| <b>Credibility = Very High:</b> In general, this catagory is a rating of the author's intellectual discipline and the strength of his argument (which are very high), not the veracity of his claims (which could be false in spite of the strong argument). |                |                   |                    |                                             |           |            |           |

Never have atomic bombs looked so beautiful! This is an absolutely amazing video of the history of the United States nuclear weapons program. If you liked [Dr. Strangelove](#), you'll **love** this: It's real! It has lots of scenes you've likely never seen before (unless you were there), since much of this footage was recently declassified. Some great film of the only test firing of the nuclear cannon at the Nevada Test Site (Who thinks these things up!?). A lot of the activities in the Pacific are covered, including the early Hydrogen bomb tests that made several atolls vanish. Some interesting tests of what amounted to "nuclear depth charges", complete with scenes of anchored subs getting crushed, shot from the inside. The nuclear programs of Great Britain, the Soviet Union and China also have stunning coverage. In fact, the best scene in the entire video is the film of China's first test. Just after it detonates, hordes of screaming, sword-waving, radiation suited, mounted soldiers ride off into the blast, on horses also wearing respirators. It doesn't get any weirder than that! Narrated in a very restrain manner by Captain Kirk (William Shatner). If you appreciate the black ironies of history, you want this... You **need** this. It's a keeper. (As advertized on the Discovery Channel.)

This "Director's Cut" is the same as the original documentary but with about 10 minutes of 3-D footage added at the end. Glasses included. -- *tm*

Reservations

The original black and white footage has been cleaned up and "colorized," which may offend some purists. However, we like the colorized clips because they make the events seem to be happening right now, instead of 30-40 years ago. You have a greater sense of what it was like to be there.

## Comparison to Other Books

The original edition, without the 3-D footage, is still available from us for a discounted price. [Cover image of original version](#)

## From the Book Cover

### Witness the Incredible History of America's Development of Nuclear Weapons

Renowned special effects filmmaker Peter Kuran (*Star Wars*, *Star Trek II & V*, *Robocop*, *Addams Family*) dedicated over three years to the production of this amazing film which chronicles the top secret, strange and visually compelling history of the design, production and testing of Atomic and Hydrogen bombs by the United States. In addition to uncovering rare film from top secret government archives Kuran travelled far and wide to obtain startling footage of nuclear bomb tests conducted by Great Britain, China and the largest atomic explosion ever created by Russia. The quality of the images is remarkable and required the development of a new film restoration system to preserve these haunting images for generations to come.

Narrated by William Shatner, this award-winning production features an original score performed by the Moscow Symphony Orchestra and an interview with Dr. Edward Teller, a developer of nuclear weapons and one of the most controversial figures of the 20th century. Whether being exploded under the ocean, suspended by a balloon, being shot from a cannon or even detonated in space, these weapons are capable of devastating destruction. *Trinity and Beyond* is an extraordinary production and provides important understanding of events that changed the world forever.
