Our Review

Opinion of the webmaster, subject to debate

Credibility	Research Value	Cultural Interest	Visual Information	Style	Silliness	Wow Factor	Bargain
2	3	3	1	2	4	3	2
Low	Moderate	Moderate	Very Low	Awkward	High	Interesting	Low

[Explanation of Ratings](#)

Credibility = Low: In general, this category is a rating of the author's intellectual discipline and the strength of his argument (which are low), not

the veracity of his claims (which could be true in spite of the weak argument).

Research Value = Moderate: Mostly stuff you can find on the net, but preserved in a convenient form.

Bargain = Low: In general, items with a low bargain rating are not considered worth the retail price as judged by the useful research data they contain. However, they may have cultural or entertainment value, which is not included in the bargain rating.

"Book One: A Briefing on the Phenomenon." ¶ We've been leafing through this strange little book for a while now, trying to figure it out. It claims to be a briefing document for mental health professionals, but we can't imagine any reputable ones ever knowing it exists, let alone reading it. To get any attention, a book for mental health professionals ought to be written by one of them, by someone who at least speaks the lingo. John Mack or Richard Boylan might be able to do it, but the authors of this book seem out of their depth and confused about their aims. The book touts its "UFO Matrix of Belief," a simple one-page classification system for describing what people believe about UFOs. We find it interesting, but we question its value for diagnosis or therapy. ¶ It is easier to be charitable if we disregard the book's title and stated purpose. This book is more a "UFO sampler" -- little random bits of this and that taken from the internet, current events and popular literature. We found some of the tidbits useful when building the relationships section of our website, but we can't recommend the book to casual readers. There is not much here that you can't find for free on the web, and this book isn't any better organized. -- *Glenn Campbell*
