Our Review

Opinion of the webmaster, subject to debate

Credibility	Research Value	Cultural Interest	Visual Information	Style	Silliness	Wow Factor	Bargain
5	5	4	3	4	1	3	5
Very High	Very High	High	Moderate	Stylish	Very Low	Interesting	Very High

[Explanation of Ratings](#)

Credibility = Very High: In general, this category is a rating of the author's intellectual discipline and the strength of his argument (which are very high), not the veracity of his claims (which could be false in spite of the strong argument).

An encyclopedic treatment of all sorts of unexplained phenomena. Like Clark's [UFO Book](#), this is a real encyclopedia with extensive references. There is a lot overlap between the two books regarding UFOs (perhaps 50%), but [Unexplained](#) also covers fortune topics such the Loch Ness Monster, Bigfoot, Alligators in Sewers and assorted mystery appearances and disappearances. Clark brings professional research skills to topics that are way out there, and he maintains his neutrality and academic distance. He doesn't say "This is real"; he simply describes what the reports are and where they are recorded. [The UFO Book](#) should be your first purchase, but [Unexplained!](#) is a worthy supplement. Given the low price and density of data, it is certainly worth the cost. -- *Glenn Campbell*
