## Our Review

Opinion of the webmaster, subject to debate

This is an excellent book for those who are curious about the mind-expanding discoveries of advanced physics, but who have no scientific background. Like a Wu Li Master who would teach us wonder for the falling petal before speaking of gravity, Gary Zukav writes in beautifully clear language-- with no mathematical equations-- opening our minds to the exciting new theories that are the beginning, if that, to comprehending the ultimate nature of our universe-- quantum mechanics, relativity, and beyond to the Einstein-Podolsky-Rosen effect and Bell's theorem. -- *tm*

## Promotional Material from the Publisher

**"A New Education for a New Age."**

"The Wu Li Master does not teach; he 'dances' with his student as he knows the universe dances with itself.

"Gary Zukav becomes our Wu Li Master and leads us by the hand into the dance. And suddenly the physics which

seemed incomprehensible to us as bystanders is revealed as an extraordinary, 'sparkling realm of continual creation, transformation, and annihilation.' Still more amazingly, we find that we are able to dance too - that we have always been part of the dance.

"To read The Dancing Wu Li Masters is to experience the immense relief inherent in the discovery that we need not be refused admittance to the romance and excitement and holiness which is the universal dance of particles, black holes, stars, and 'unbroken wholeness."

- Parabola

Gary Zukav has written "the Bible" for those who are curious about the mind-expanding discoveries of advanced physics, but who have no scientific background. Like a Wu Li Master who would teach us wonder for the falling petal before speaking of gravity, Zukav writes in beautifully clear language - with no mathematical equations - opening our minds to the exciting new theories that are beginning to embrace the ultimate nature of our universe...Quantum mechanics, relativity, and beyond to the Einstein-Podolsky-Rosen effect and Bell's theorem.

"Stripped of Mathematics, Physics becomes pure enchantment'...I don't care how dumb you are at science you'll come away from this book feeling like a Wu Li Master yourself"

- Christopher Lehmann-Haunt, The New York Times

"Zukav is such a skillful expositor, with such amiable style, that it is hard to imagine a layman who would not find his book enjoyable and informative."

- Martin Gardner, staff writer, Scientific American
