David Adair:
The "Other" Space Program

August 23, 1997, Saturday, 7:30 PM,
Anaheim California

David's new book, America's Fall from Space, tells the story of the U.S. space program through the eyes of a child prodigy turned top rocket scientist. He is an internationally recognized leader and expert in space technology. He crossed swords with NASA as he learned of the corruption and technical problems faced by the Challenger shuttle prior to launching. David will share the testimony he gave at a congressional briefing in April 1997, revealing his encounter with extraterrestrial technology at Area 51, when he was 17 (having developed an amazing rocket at that early age). He claims that reverse engineering of UFO technology has resulted in many of our modern advances. "You're not going to believe what's going to happen in the next ten years," he says.
