UFO EXPERT WARNS EARTHLINGS: SPACE ALIENS WILL INVADE IF WE
LAY ONE FINGER ON 'EM!

Weekly World News, October 3, 1995
By Scotty Paul

The U.S. and all of planet Earth will be invaded in a matter of minutes by space aliens throughout the universe if we advance our nuclear capabilities or space exploration too far, says a noted UFO authority.

"And there isn't a thing we could do about it," says Stanton Friedman, a nuclear scientist and UFO expert. "They are thousands of millions of years ahead of us in intelligence."

In an exclusive interview with Weekly World News, Dr. Friedman made these startling revelations about our neighbors in outer space:

*They are gray and tan in color with oversized heads, skinny bodies, huge eyes and holes for noses.

*They visit the United States frequently to study our way of life and to make sure we are not becoming a threat to them.

*Thousands of unsuspecting earthlings have been abducted for short periods of time by aliens.

Dr. Friedman isn't saying we are going to be invaded immediately, but warns they are watching us and circulate among us every day.

"You must understand the stars are billions of years old, while Earth is considered middle-aged. They've had far more years to advance in every aspect," he said.

"They've watched earthlings kill each other for years instead of using our minds to settle differences."

Dr. Friedman said aliens from outer space have extremely different physical features from us, but are capable of changing their appearance when they visit us.

He is one of many UFO experts who believe the U.S. military captured an alien spacecraft "and crew members" in New Mexico in 1947.

"What we have in this case is a cosmic Watergate among a small group in the government," he said. "They haven't been able to find out how the aliens got here and they probably never will."

Dr. Friedman, who has two degrees from the University of Chicago and has worked for many of America's leading companies in space exploration, says earthlings are kidnapped every day by space aliens.

"I have letters from many of the thousands who have been abducted," he said. "They were studied, X-rayed and released.

"But their memory of what happened was wiped away, much like what a hypnotist does when he snaps someone out of a trance."
