

# Ufomind Hardware Upgrade

On Tuesday, Feb. 16, the Ufomind website moved to a new dedicated server. The new machine gives us much greater storage, processing and bandwidth capacity.

No URLs have changed, and if all goes well, the change will be invisible to users. However, there may be some unpredictable disruptions during first couple of days.

Some possible effect might be...

- Some messages on archived mailing lists could be lost (UFO Updates, IUFO, etc.)
- Some email messages sent to us (at **@ufomind.com**) could be lost.

In addition, there could be other effects that we cannot predict. If you see anything unusual on our site, please let us know.

During the transition, the webmaster can be contacted directly at [psyspy@vegas.infi.net](mailto:psyspy@vegas.infi.net) or 702-227-1818

Cross your fingers!
